

PROLOGUE

Since, as Damascene states (De Fide Orth. ii, 12), man is said to be made in God's image, in so far as the image implies "an intelligent being endowed with free-will and self-movement": now that we have treated of the exemplar, i.e. God, and of those things which came forth from the power of God in accordance with His will; it remains for us to treat of His image, i.e. man, inasmuch as he too is the principle of his actions, as having free-will and control of his actions.

FIRST PART OF THE SECOND PART, QUESTION 1

Of Man's Last End (In Eight Articles)

In this matter we shall consider first the last end of human life; and secondly, those things by means of which man may advance towards this end, or stray from the path: for the end is the rule of whatever is ordained to the end. And since the last end of human life is stated to be happiness, we must consider (1) the last end in general; (2) happiness.

Under the first head there are eight points of inquiry:

- (1) Whether it belongs to man to act for an end?
- (2) Whether this is proper to the rational nature?
- (3) Whether a man's actions are specified by their end?
- (4) Whether there is any last end of human life?
- (5) Whether one man can have several last ends?
- (6) Whether man ordains all to the last end?
- (7) Whether all men have the same last end?
- (8) Whether all other creatures concur with man in that last end?

Whether it belongs to man to act for an end?

Ia IIae q. 1 a. 1

Objection 1. It would seem that it does not belong to man to act for an end. For a cause is naturally first. But an end, in its very name, implies something that is last. Therefore an end is not a cause. But that for which a man acts, is the cause of his action; since this preposition "for" indicates a relation of causality. Therefore it does not belong to man to act for an end.

Objection 2. Further, that which is itself the last end is not for an end. But in some cases the last end is an action, as the Philosopher states (*Ethic. i, 1*). Therefore man does not do everything for an end.

Objection 3. Further, then does a man seem to act for an end, when he acts deliberately. But man does many things without deliberation, sometimes not even thinking of what he is doing; for instance when one moves one's foot or hand, or scratches one's beard, while intent on something else. Therefore man does not do everything for an end.

On the contrary, All things contained in a genus are derived from the principle of that genus. Now the end is the principle in human operations, as the Philosopher states (*Phys. ii, 9*). Therefore it belongs to man to do everything for an end.

I answer that, Of actions done by man those alone are properly called "human," which are proper to man as man. Now man differs from irrational animals in this, that he is master of his actions. Wherefore those actions alone are properly called human, of which man is master. Now man is master of his actions through his reason and will; whence, too, the free-will is defined as "the faculty and will of reason." Therefore those actions are properly called human which proceed from a deliberate will. And if any other actions are found in man, they can

be called actions "of a man," but not properly "human" actions, since they are not proper to man as man. Now it is clear that whatever actions proceed from a power, are caused by that power in accordance with the nature of its object. But the object of the will is the end and the good. Therefore all human actions must be for an end.

Reply to Objection 1. Although the end be last in the order of execution, yet it is first in the order of the agent's intention. And it is this way that it is a cause.

Reply to Objection 2. If any human action be the last end, it must be voluntary, else it would not be human, as stated above. Now an action is voluntary in one of two ways: first, because it is commanded by the will, e.g. to walk, or to speak; secondly, because it is elicited by the will, for instance the very act of willing. Now it is impossible for the very act elicited by the will to be the last end. For the object of the will is the end, just as the object of sight is color: wherefore just as the first visible cannot be the act of seeing, because every act of seeing is directed to a visible object; so the first appetible, i.e. the end, cannot be the very act of willing. Consequently it follows that if a human action be the last end, it must be an action commanded by the will: so that there, some action of man, at least the act of willing, is for the end. Therefore whatever a man does, it is true to say that man acts for an end, even when he does that action in which the last end consists.

Reply to Objection 3. Such like actions are not properly human actions; since they do not proceed from deliberation of the reason, which is the proper principle of human actions. Therefore they have indeed an imaginary end, but not one that is fixed by reason.

Objection 1. It would seem that it is proper to the rational nature to act for an end. For man, to whom it belongs to act for an end, never acts for an unknown end. On the other hand, there are many things that have no knowledge of an end; either because they are altogether without knowledge, as insensible creatures: or because they do not apprehend the idea of an end as such, as irrational animals. Therefore it seems proper to the rational nature to act for an end.

Objection 2. Further, to act for an end is to order one's action to an end. But this is the work of reason. Therefore it does not belong to things that lack reason.

Objection 3. Further, the good and the end is the object of the will. But "the will is in the reason" (De Anima iii, 9). Therefore to act for an end belongs to none but a rational nature.

On the contrary, The Philosopher proves (Phys. ii, 5) that "not only mind but also nature acts for an end."

I answer that, Every agent, of necessity, acts for an end. For if, in a number of causes ordained to one another, the first be removed, the others must, of necessity, be removed also. Now the first of all causes is the final cause. The reason of which is that matter does not receive form, save in so far as it is moved by an agent; for nothing reduces itself from potentiality to act. But an agent does not move except out of intention for an end. For if the agent were not determinate to some particular effect, it would not do one thing rather than another: consequently in order that it produce a determinate effect, it must, of necessity, be determined to some certain one, which has the nature of an end. And just as this determination is effected, in the rational nature, by the "rational appetite," which is called the will; so, in other things, it is caused by their natural inclination, which is called the "natural appetite."

Nevertheless it must be observed that a thing tends to an end, by its action or movement, in two ways: first, as a thing, moving itself to the end, as man; secondly, as a thing moved by another to the end, as an arrow tends to a determinate end through being moved by the archer who directs his action to the end. Therefore those things that are possessed of reason, move themselves to an end;

because they have dominion over their actions through their free-will, which is the "faculty of will and reason." But those things that lack reason tend to an end, by natural inclination, as being moved by another and not by themselves; since they do not know the nature of an end as such, and consequently cannot ordain anything to an end, but can be ordained to an end only by another. For the entire irrational nature is in comparison to God as an instrument to the principal agent, as stated above (Ia, q. 22, a. 2, ad 4; Ia, q. 103, a. 1, ad 3). Consequently it is proper to the rational nature to tend to an end, as directing [agens] and leading itself to the end: whereas it is proper to the irrational nature to tend to an end, as directed or led by another, whether it apprehend the end, as do irrational animals, or do not apprehend it, as is the case of those things which are altogether void of knowledge.

Reply to Objection 1. When a man of himself acts for an end, he knows the end: but when he is directed or led by another, for instance, when he acts at another's command, or when he is moved under another's compulsion, it is not necessary that he should know the end. And it is thus with irrational creatures.

Reply to Objection 2. To ordain towards an end belongs to that which directs itself to an end: whereas to be ordained to an end belongs to that which is directed by another to an end. And this can belong to an irrational nature, but owing to some one possessed of reason.

Reply to Objection 3. The object of the will is the end and the good in universal. Consequently there can be no will in those things that lack reason and intellect, since they cannot apprehend the universal; but they have a natural appetite or a sensitive appetite, determinate to some particular good. Now it is clear that particular causes are moved by a universal cause: thus the governor of a city, who intends the common good, moves, by his command, all the particular departments of the city. Consequently all things that lack reason are, of necessity, moved to their particular ends by some rational will which extends to the universal good, namely by the Divine will.

Objection 1. It would seem that human acts are not specified by their end. For the end is an extrinsic cause. But everything is specified by an intrinsic principle. Therefore human acts are not specified by their end.

Objection 2. Further, that which gives a thing its species should exist before it. But the end comes into existence afterwards. Therefore a human act does not derive its species from the end.

Objection 3. Further, one thing cannot be in more

than one species. But one and the same act may happen to be ordained to various ends. Therefore the end does not give the species to human acts.

On the contrary, Augustine says (De Mor. Eccl. et Manich. ii, 13): "According as their end is worthy of blame or praise so are our deeds worthy of blame or praise."

I answer that Each thing receives its species in respect of an act and not in respect of potentiality; wherefore things composed of matter and form are established

in their respective species by their own forms. And this is also to be observed in proper movements. For since movements are, in a way, divided into action and passion, each of these receives its species from an act; action indeed from the act which is the principle of acting, and passion from the act which is the terminus of the movement. Wherefore heating, as an action, is nothing else than a certain movement proceeding from heat, while heating as a passion is nothing else than a movement towards heat: and it is the definition that shows the specific nature. And either way, human acts, whether they be considered as actions, or as passions, receive their species from the end. For human acts can be considered in both ways, since man moves himself, and is moved by himself. Now it has been stated above (a. 1) that acts are called human, inasmuch as they proceed from a deliberate will. Now the object of the will is the good and the end. And hence it is clear that the principle of human acts, in so far as they are human, is the end. In like manner it is their terminus: for the human act terminates at that which the will intends as the end; thus in natural agents the form of the thing generated is conformed to the form of the generator. And since, as Ambrose says (Prolog. super Luc.) “morality is said properly of man,” moral acts properly speaking receive their species from the end, for moral acts are the same as human acts.

Reply to Objection 1. The end is not altogether extrinsic to the act, because it is related to the act as prin-

ciple or terminus; and thus it just this that is essential to an act, viz. to proceed from something, considered as action, and to proceed towards something, considered as passion.

Reply to Objection 2. The end, in so far as it pre-exists in the intention, pertains to the will, as stated above (a. 1, ad 1). And it is thus that it gives the species to the human or moral act.

Reply to Objection 3. One and the same act, in so far as it proceeds once from the agent, is ordained to but one proximate end, from which it has its species: but it can be ordained to several remote ends, of which one is the end of the other. It is possible, however, that an act which is one in respect of its natural species, be ordained to several ends of the will: thus this act “to kill a man,” which is but one act in respect of its natural species, can be ordained, as to an end, to the safeguarding of justice, and to the satisfying of anger: the result being that there would be several acts in different species of morality: since in one way there will be an act of virtue, in another, an act of vice. For a movement does not receive its species from that which is its terminus accidentally, but only from that which is its “per se” terminus. Now moral ends are accidental to a natural thing, and conversely the relation to a natural end is accidental to morality. Consequently there is no reason why acts which are the same considered in their natural species, should not be diverse, considered in their moral species, and conversely.

Whether there is one last end of human life?

Ia IIae q. 1 a. 4

Objection 1. It would seem that there is no last end of human life, but that we proceed to infinity. For good is essentially diffusive, as Dionysius states (Div. Nom. iv). Consequently if that which proceeds from good is itself good, the latter must needs diffuse some other good: so that the diffusion of good goes on indefinitely. But good has the nature of an end. Therefore there is an indefinite series of ends.

Objection 2. Further, things pertaining to the reason can be multiplied to infinity: thus mathematical quantities have no limit. For the same reason the species of numbers are infinite, since, given any number, the reason can think of one yet greater. But desire of the end is consequent on the apprehension of the reason. Therefore it seems that there is also an infinite series of ends.

Objection 3. Further, the good and the end is the object of the will. But the will can react on itself an infinite number of times: for I can will something, and will to will it, and so on indefinitely. Therefore there is an infinite series of ends of the human will, and there is no last end of the human will.

On the contrary, The Philosopher says (Metaph. ii, 2) that “to suppose a thing to be indefinite is to deny that it is good.” But the good is that which has the nature of an end. Therefore it is contrary to the nature of an end

to proceed indefinitely. Therefore it is necessary to fix one last end.

I answer that, Absolutely speaking, it is not possible to proceed indefinitely in the matter of ends, from any point of view. For in whatsoever things there is an essential order of one to another, if the first be removed, those that are ordained to the first, must of necessity be removed also. Wherefore the Philosopher proves (Phys. viii, 5) that we cannot proceed to infinitude in causes of movement, because then there would be no first mover, without which neither can the others move, since they move only through being moved by the first mover. Now there is to be observed a twofold order in ends—the order of intention and the order of execution: and in either of these orders there must be something first. For that which is first in the order of intention, is the principle, as it were, moving the appetite; consequently, if you remove this principle, there will be nothing to move the appetite. On the other hand, the principle in execution is that wherein operation has its beginning; and if this principle be taken away, no one will begin to work. Now the principle in the intention is the last end; while the principle in execution is the first of the things which are ordained to the end. Consequently, on neither side is it possible to go to infinity

since if there were no last end, nothing would be desired, nor would any action have its term, nor would the intention of the agent be at rest; while if there is no first thing among those that are ordained to the end, none would begin to work at anything, and counsel would have no term, but would continue indefinitely.

On the other hand, nothing hinders infinity from being in things that are ordained to one another not essentially but accidentally; for accidental causes are indeterminate. And in this way it happens that there is an accidental infinity of ends, and of things ordained to the end.

Reply to Objection 1. The very nature of good is that something flows from it, but not that it flows from something else. Since, therefore, good has the nature of end, and the first good is the last end, this argument does not prove that there is no last end; but that from the end, already supposed, we may proceed downwards indefinitely towards those things that are ordained to the end. And this would be true if we considered but the power of the First Good, which is infinite. But, since the First Good diffuses itself according to the intellect, to which it is proper to flow forth into its effects according to a certain fixed form; it follows that there is a cer-

tain measure to the flow of good things from the First Good from Which all other goods share the power of diffusion. Consequently the diffusion of goods does not proceed indefinitely but, as it is written (Wis. 11:21), God disposes all things “in number, weight and measure.”

Reply to Objection 2. In things which are of themselves, reason begins from principles that are known naturally, and advances to some term. Wherefore the Philosopher proves (Poster. i, 3) that there is no infinite process in demonstrations, because there we find a process of things having an essential, not an accidental, connection with one another. But in those things which are accidentally connected, nothing hinders the reason from proceeding indefinitely. Now it is accidental to a stated quantity or number, as such, that quantity or unity be added to it. Wherefore in such like things nothing hinders the reason from an indefinite process.

Reply to Objection 3. This multiplication of acts of the will reacting on itself, is accidental to the order of ends. This is clear from the fact that in regard to one and the same end, the will reacts on itself indifferently once or several times.

Whether one man can have several last ends?

Ia IIae q. 1 a. 5

Objection 1. It would seem possible for one man’s will to be directed at the same time to several things, as last ends. For Augustine says (De Civ. Dei xix, 1) that some held man’s last end to consist in four things, viz. “in pleasure, repose, the gifts of nature, and virtue.” But these are clearly more than one thing. Therefore one man can place the last end of his will in many things.

Objection 2. Further, things not in opposition to one another do not exclude one another. Now there are many things which are not in opposition to one another. Therefore the supposition that one thing is the last end of the will does not exclude others.

Objection 3. Further, by the fact that it places its last end in one thing, the will does not lose its freedom. But before it placed its last end in that thing, e.g. pleasure, it could place it in something else, e.g. riches. Therefore even after having placed his last end in pleasure, a man can at the same time place his last end in riches. Therefore it is possible for one man’s will to be directed at the same time to several things, as last ends.

On the contrary, That in which a man rests as in his last end, is master of his affections, since he takes therefrom his entire rule of life. Hence of gluttons it is written (Phil. 3:19): “Whose god is their belly”: viz. because they place their last end in the pleasures of the belly. Now according to Mat. 6:24, “No man can serve two masters,” such, namely, as are not ordained to one another. Therefore it is impossible for one man to have several last ends not ordained to one another.

I answer that, It is impossible for one man’s will

to be directed at the same time to diverse things, as last ends. Three reasons may be assigned for this. First, because, since everything desires its own perfection, a man desires for his ultimate end, that which he desires as his perfect and crowning good. Hence Augustine (De Civ. Dei xix, 1): “In speaking of the end of good we mean now, not that it passes away so as to be no more, but that it is perfected so as to be complete.” It is therefore necessary for the last end so to fill man’s appetite, that nothing is left besides it for man to desire. Which is not possible, if something else be required for his perfection. Consequently it is not possible for the appetite so to tend to two things, as though each were its perfect good.

The second reason is because, just as in the process of reasoning, the principle is that which is naturally known, so in the process of the rational appetite, i.e. the will, the principle needs to be that which is naturally desired. Now this must needs be one: since nature tends to one thing only. But the principle in the process of the rational appetite is the last end. Therefore that to which the will tends, as to its last end, is one.

The third reason is because, since voluntary actions receive their species from the end, as stated above (a. 3), they must needs receive their genus from the last end, which is common to them all: just as natural things are placed in a genus according to a common form. Since, then, all things that can be desired by the will, belong, as such, to one genus, the last end must needs be one. And all the more because in every genus there is one

first principle; and the last end has the nature of a first principle, as stated above. Now as the last end of man, simply as man, is to the whole human race, so is the last end of any individual man to that individual. Therefore, just as of all men there is naturally one last end, so the will of an individual man must be fixed on one last end.

Reply to Objection 1. All these several objects were considered as one perfect good resulting therefrom, by those who placed in them the last end.

Reply to Objection 2. Although it is possible to find several things which are not in opposition to one another, yet it is contrary to a thing's perfect good, that anything besides be required for that thing's perfection.

Reply to Objection 3. The power of the will does not extend to making opposites exist at the same time. Which would be the case were it to tend to several diverse objects as last ends, as has been shown above (ad 2).

Whether man will all, whatsoever he wills, for the last end?

Ia IIae q. 1 a. 6

Objection 1. It would seem that man does not will all, whatsoever he wills, for the last end. For things ordained to the last end are said to be serious matter, as being useful. But jests are foreign to serious matter. Therefore what man does in jest, he ordains not to the last end.

Objection 2. Further, the Philosopher says at the beginning of his *Metaphysics* 1,[2] that speculative science is sought for its own sake. Now it cannot be said that each speculative science is the last end. Therefore man does not desire all, whatsoever he desires, for the last end.

Objection 3. Further, whosoever ordains something to an end, thinks of that end. But man does not always think of the last end in all that he desires or does. Therefore man neither desires nor does all for the last end.

On the contrary, Augustine says (*De Civ. Dei* xix, 1): "That is the end of our good, for the sake of which we love other things, whereas we love it for its own sake."

I answer that, Man must, of necessity, desire all, whatsoever he desires, for the last end. This is evident for two reasons. First, because whatever man desires, he desires it under the aspect of good. And if he desire it, not as his perfect good, which is the last end, he must, of necessity, desire it as tending to the perfect good, because the beginning of anything is always or-

daind to its completion; as is clearly the case in effects both of nature and of art. Wherefore every beginning of perfection is ordained to complete perfection which is achieved through the last end. Secondly, because the last end stands in the same relation in moving the appetite, as the first mover in other movements. Now it is clear that secondary moving causes do not move save inasmuch as they are moved by the first mover. Therefore secondary objects of the appetite do not move the appetite, except as ordained to the first object of the appetite, which is the last end.

Reply to Objection 1. Actions done jestingly are not directed to any external end; but merely to the good of the jester, in so far as they afford him pleasure or relaxation. But man's consummate good is his last end.

Reply to Objection 2. The same applies to speculative science; which is desired as the scientist's good, included in complete and perfect good, which is the ultimate end.

Reply to Objection 3. One need not always be thinking of the last end, whenever one desires or does something: but the virtue of the first intention, which was in respect of the last end, remains in every desire directed to any object whatever, even though one's thoughts be not actually directed to the last end. Thus while walking along the road one needs not to be thinking of the end at every step.

Whether all men have the same last end?

Ia IIae q. 1 a. 7

Objection 1. It would seem that all men have not the same last end. For before all else the unchangeable good seems to be the last end of man. But some turn away from the unchangeable good, by sinning. Therefore all men have not the same last end.

Objection 2. Further, man's entire life is ruled according to his last end. If, therefore, all men had the same last end, they would not have various pursuits in life. Which is evidently false.

Objection 3. Further, the end is the term of action. But actions are of individuals. Now although men agree in their specific nature, yet they differ in things pertaining to individuals. Therefore all men have not the same last end.

On the contrary, Augustine says (*De Trin.* xiii, 3) that all men agree in desiring the last end, which is happiness.

I answer that, We can speak of the last end in two ways: first, considering only the aspect of last end; secondly, considering the thing in which the aspect of last end is realized. So, then, as to the aspect of last end, all agree in desiring the last end: since all desire the fulfilment of their perfection, and it is precisely this fulfilment in which the last end consists, as stated above (a. 5). But as to the thing in which this aspect is realized, all men are not agreed as to their last end: since some desire riches as their consummate good; some, pleasure; others, something else. Thus to every taste

the sweet is pleasant but to some, the sweetness of wine is most pleasant, to others, the sweetness of honey, or of something similar. Yet that sweet is absolutely the best of all pleasant things, in which he who has the best taste takes most pleasure. In like manner that good is most complete which the man with well disposed affections desires for his last end.

Reply to Objection 1. Those who sin turn from that in which their last end really consists: but they do not

turn away from the intention of the last end, which intention they mistakenly seek in other things.

Reply to Objection 2. Various pursuits in life are found among men by reason of the various things in which men seek to find their last end.

Reply to Objection 3. Although actions are of individuals, yet their first principle of action is nature, which tends to one thing, as stated above (a. 5).

Whether other creatures concur in that last end?

Ia IIae q. 1 a. 8

Objection 1. It would seem that all other creatures concur in man's last end. For the end corresponds to the beginning. But man's beginning—i.e. God—is also the beginning of all else. Therefore all other things concur in man's last end.

Objection 2. Further, Dionysius says (Div. Nom. iv) that "God turns all things to Himself as to their last end." But He is also man's last end; because He alone is to be enjoyed by man, as Augustine says (De Doctr. Christ. i, 5,22). Therefore other things, too, concur in man's last end.

Objection 3. Further, man's last end is the object of the will. But the object of the will is the universal good, which is the end of all. Therefore other things, too, concur in man's last end.

On the contrary, man's last end is happiness; which all men desire, as Augustine says (De Trin. xiii, 3,4). But "happiness is not possible for animals bereft of reason," as Augustine says (QQ. 83, qu. 5). Therefore other things do not concur in man's last end.

I answer that, As the Philosopher says (Phys. ii,

2), the end is twofold—the end "for which" and the end "by which"; viz. the thing itself in which is found the aspect of good, and the use or acquisition of that thing. Thus we say that the end of the movement of a weighty body is either a lower place as "thing," or to be in a lower place, as "use"; and the end of the miser is money as "thing," or possession of money as "use."

If, therefore, we speak of man's last end as of the thing which is the end, thus all other things concur in man's last end, since God is the last end of man and of all other things. If, however, we speak of man's last end, as of the acquisition of the end, then irrational creatures do not concur with man in this end. For man and other rational creatures attain to their last end by knowing and loving God: this is not possible to other creatures, which acquire their last end, in so far as they share in the Divine likeness, inasmuch as they are, or live, or even know.

Hence it is evident how the objections are solved: since happiness means the acquisition of the last end.

FIRST PART OF THE SECOND PART, QUESTION 10

Of the Manner in Which the Will Is Moved (In Four Articles)

We must now consider the manner in which the will is moved. Under this head there are four points of inquiry:

- (1) Whether the will is moved to anything naturally?
- (2) Whether it is moved of necessity by its object?
- (3) Whether it is moved of necessity by the lower appetite?
- (4) Whether it is moved of necessity by the exterior mover which is God?

Whether the will is moved to anything naturally?

Ia IIae q. 10 a. 1

Objection 1. It would seem that the will is not moved to anything naturally. For the natural agent is condivided with the voluntary agent, as stated at the beginning of Phys. ii, 1. Therefore the will is not moved to anything naturally.

Objection 2. Further, that which is natural is in a thing always: as “being hot” is in fire. But no movement is always in the will. Therefore no movement is natural to the will.

Objection 3. Further, nature is determinate to one thing: whereas the will is referred to opposites. Therefore the will wills nothing naturally.

On the contrary, The movement of the will follows the movement of the intellect. But the intellect understands some things naturally. Therefore the will, too, wills some things naturally.

I answer that, As Boethius says (De Duabus Nat.) and the Philosopher also (Metaph. v, 4) the word “nature” is used in a manifold sense. For sometimes it stands for the intrinsic principle in movable things. In this sense nature is either matter or the material form, as stated in Phys. ii, 1. In another sense nature stands for any substance, or even for any being. And in this sense, that is said to be natural to a thing which befits it in respect of its substance. And this is that which of itself is in a thing. Now all things that do not of themselves belong to the thing in which they are, are reduced to something which belongs of itself to that thing, as to their principle. Wherefore, taking nature in this sense, it is necessary that the principle of whatever belongs to a thing, be a natural principle. This is evident in regard to the intellect: for the principles of intellectual knowledge are naturally known. In like manner the principle of voluntary movements must be something naturally willed.

Now this is good in general, to which the will tends naturally, as does each power to its object; and again it is the last end, which stands in the same relation to things appetible, as the first principles of demonstrations to things intelligible: and, speaking generally, it is all those things which belong to the willer according to his nature. For it is not only things pertaining to the will that the will desires, but also that which pertains to

each power, and to the entire man. Wherefore man wills naturally not only the object of the will, but also other things that are appropriate to the other powers; such as the knowledge of truth, which befits the intellect; and to be and to live and other like things which regard the natural well-being; all of which are included in the object of the will, as so many particular goods.

Reply to Objection 1. The will is distinguished from nature as one kind of cause from another; for some things happen naturally and some are done voluntarily. There is, however, another manner of causing that is proper to the will, which is mistress of its act, besides the manner proper to nature, which is determinate to one thing. But since the will is founded on some nature, it is necessary that the movement proper to nature be shared by the will, to some extent: just as what belongs to a previous cause is shared by a subsequent cause. Because in every thing, being itself, which is from nature, precedes volition, which is from the will. And hence it is that the will wills something naturally.

Reply to Objection 2. In the case of natural things, that which is natural, as a result of the form only, is always in them actually, as heat is in fire. But that which is natural as a result of matter, is not always in them actually, but sometimes only in potentiality: because form is act, whereas matter is potentiality. Now movement is “the act of that which is in potentiality” (Aristotle, Phys. iii, 1). Wherefore that which belongs to, or results from, movement, in regard to natural things, is not always in them. Thus fire does not always move upwards, but only when it is outside its own place.* And in like manner it is not necessary that the will (which is reduced from potentiality to act, when it wills something), should always be in the act of volition; but only when it is in a certain determinate disposition. But God’s will, which is pure act, is always in the act of volition.

Reply to Objection 3. To every nature there is one thing corresponding, proportionate, however, to that nature. For to nature considered as a genus, there corresponds something one generically; and to nature as species there corresponds something one specifically; and to the individualized nature there corresponds some one individual. Since, therefore, the will is an imma-

* The Aristotelian theory was that fire’s proper place is the fiery heaven, i.e. the Empyrean.

terial power like the intellect, some one general thing corresponds to it, naturally which is the good; just as to the intellect there corresponds some one general thing,

which is the true, or being, or “what a thing is.” And under good in general are included many particular goods, to none of which is the will determined.

Whether the will is moved, of necessity, by its object?

Ia IIae q. 10 a. 2

Objection 1. It seems that the will is moved, of necessity, by its object. For the object of the will is compared to the will as mover to movable, as stated in *De Anima* iii, 10. But a mover, if it be sufficient, moves the movable of necessity. Therefore the will can be moved of necessity by its object.

Objection 2. Further, just as the will is an immaterial power, so is the intellect: and both powers are ordained to a universal object, as stated above (a. 1, ad 3). But the intellect is moved, of necessity, by its object: therefore the will also, by its object.

Objection 3. Further, whatever one wills, is either the end, or something ordained to an end. But, seemingly, one wills an end necessarily: because it is like the principle in speculative matters, to which principle one assents of necessity. Now the end is the reason for willing the means; and so it seems that we will the means also necessarily. Therefore the will is moved of necessity by its object.

On the contrary, The rational powers, according to the Philosopher (*Metaph.* ix, 2) are directed to opposites. But the will is a rational power, since it is in the reason, as stated in *De Anima* iii, 9. Therefore the will is directed to opposites. Therefore it is not moved, of necessity, to either of the opposites.

I answer that, The will is moved in two ways: first, as to the exercise of its act; secondly, as to the specification of its act, derived from the object. As to the first way, no object moves the will necessarily, for no matter what the object be, it is in man’s power not to think of it, and consequently not to will it actually. But as to the second manner of motion, the will is moved by one object necessarily, by another not. For in the movement of a power by its object, we must consider under what aspect the object moves the power. For the visible moves the sight, under the aspect of color actually visible. Wherefore if color be offered to the sight, it moves the sight necessarily: unless one turns one’s eyes away; which belongs to the exercise of the act. But if the sight were confronted with something not in all respects col-

ored actually, but only so in some respects, and in other respects not, the sight would not of necessity see such an object: for it might look at that part of the object which is not actually colored, and thus it would not see it. Now just as the actually colored is the object of sight, so is good the object of the will. Wherefore if the will be offered an object which is good universally and from every point of view, the will tends to it of necessity, if it wills anything at all; since it cannot will the opposite. If, on the other hand, the will is offered an object that is not good from every point of view, it will not tend to it of necessity. And since lack of any good whatever, is a non-good, consequently, that good alone which is perfect and lacking in nothing, is such a good that the will cannot not-will it: and this is Happiness. Whereas any other particular goods, in so far as they are lacking in some good, can be regarded as non-goods: and from this point of view, they can be set aside or approved by the will, which can tend to one and the same thing from various points of view.

Reply to Objection 1. The sufficient mover of a power is none but that object that in every respect presents the aspect of the mover of that power. If, on the other hand, it is lacking in any respect, it will not move of necessity, as stated above.

Reply to Objection 2. The intellect is moved, of necessity, by an object which is such as to be always and necessarily true: but not by that which may be either true or false—viz. by that which is contingent: as we have said of the good.

Reply to Objection 3. The last end moves the will necessarily, because it is the perfect good. In like manner whatever is ordained to that end, and without which the end cannot be attained, such as “to be” and “to live,” and the like. But other things without which the end can be gained, are not necessarily willed by one who wills the end: just as he who assents to the principle, does not necessarily assent to the conclusions, without which the principles can still be true.

Whether the will is moved, of necessity, by the lower appetite?

Ia IIae q. 10 a. 3

Objection 1. It would seem that the will is moved of necessity by a passion of the lower appetite. For the Apostle says (*Rom.* 7:19): “The good which I will I do not; but the evil which I will not, that I do”: and this is said by reason of concupiscence, which is a passion. Therefore the will is moved of necessity by a passion.

Objection 2. Further, as stated in *Ethic.* iii, 5, “according as a man is, such does the end seem to him.”

But it is not in man’s power to cast aside a passion once. Therefore it is not in man’s power not to will that to which the passion inclines him.

Objection 3. Further, a universal cause is not applied to a particular effect, except by means of a particular cause: wherefore the universal reason does not move save by means of a particular estimation, as stated in *De Anima* iii, 11. But as the universal reason is to the par-

ticular estimation, so is the will to the sensitive appetite. Therefore the will is not moved to will something particular, except through the sensitive appetite. Therefore, if the sensitive appetite happen to be disposed to something, by reason of a passion, the will cannot be moved in a contrary sense.

On the contrary, It is written (Gn. 4:7): “Thy lust [Vulg. ‘The lust thereof’] shall be under thee, and thou shalt have dominion over it.” Therefore man’s will is moved of necessity by the lower appetite.

I answer that, As stated above (q. 9, a. 2), the passion of the sensitive appetite moves the will, in so far as the will is moved by its object: inasmuch as, to wit, man through being disposed in such and such a way by a passion, judges something to be fitting and good, which he would not judge thus were it not for the passion. Now this influence of a passion on man occurs in two ways. First, so that his reason is wholly bound, so that he has not the use of reason: as happens in those who through a violent access of anger or concupiscence become furious or insane, just as they may from some other bodily disorder; since such like passions do not take place without some change in the body. And of such the same is to be said as of irrational animals, which follow, of necessity, the impulse of their passions: for in them there is neither movement of reason, nor, consequently, of will.

Sometimes, however, the reason is not entirely engrossed by the passion, so that the judgment of reason retains, to a certain extent, its freedom: and thus the movement of the will remains in a certain degree. Accordingly in so far as the reason remains free, and not subject to the passion, the will’s movement, which also remains, does not tend of necessity to that whereto

the passion inclines it. Consequently, either there is no movement of the will in that man, and the passion alone holds its sway: or if there be a movement of the will, it does not necessarily follow the passion.

Reply to Objection 1. Although the will cannot prevent the movement of concupiscence from arising, of which the Apostle says: “The evil which I will not, that I do—i.e. I desire”; yet it is in the power of the will not to will to desire or not to consent to concupiscence. And thus it does not necessarily follow the movement of concupiscence.

Reply to Objection 2. Since there is in man a twofold nature, intellectual and sensitive; sometimes man is such and such uniformly in respect of his whole soul: either because the sensitive part is wholly subject to this reason, as in the virtuous; or because reason is entirely engrossed by passion, as in a madman. But sometimes, although reason is clouded by passion, yet something of this reason remains free. And in respect of this, man can either repel the passion entirely, or at least hold himself in check so as not to be led away by the passion. For when thus disposed, since man is variously disposed according to the various parts of the soul, a thing appears to him otherwise according to his reason, than it does according to a passion.

Reply to Objection 3. The will is moved not only by the universal good apprehended by the reason, but also by good apprehended by sense. Wherefore he can be moved to some particular good independently of a passion of the sensitive appetite. For we will and do many things without passion, and through choice alone; as is most evident in those cases wherein reason resists passion.

Whether the will is moved of necessity by the exterior mover which is God?

Ia IIae q. 10 a. 4

Objection 1. It would seem that the will is moved of necessity by God. For every agent that cannot be resisted moves of necessity. But God cannot be resisted, because His power is infinite; wherefore it is written (Rom. 9:19): “Who resisteth His will?” Therefore God moves the will of necessity.

Objection 2. Further, the will is moved of necessity to whatever it wills naturally, as stated above (a. 2, ad 3). But “whatever God does in a thing is natural to it,” as Augustine says (Contra Faust. xxvi, 3). Therefore the will wills of necessity everything to which God moves it.

Objection 3. Further, a thing is possible, if nothing impossible follows from its being supposed. But something impossible follows from the supposition that the will does not will that to which God moves it: because in that case God’s operation would be ineffectual. Therefore it is not possible for the will not to will that to which God moves it. Therefore it wills it of necessity.

On the contrary, It is written (Ecclus. 15:14):

“God made man from the beginning, and left him in the hand of his own counsel.” Therefore He does not of necessity move man’s will.

I answer that, As Dionysius says (Div. Nom. iv) “it belongs to Divine providence, not to destroy but to preserve the nature of things.” Wherefore it moves all things in accordance with their conditions; so that from necessary causes through the Divine motion, effects follow of necessity; but from contingent causes, effects follow contingently. Since, therefore, the will is an active principle, not determinate to one thing, but having an indifferent relation to many things, God so moves it, that He does not determine it of necessity to one thing, but its movement remains contingent and not necessary, except in those things to which it is moved naturally.

Reply to Objection 1. The Divine will extends not only to the doing of something by the thing which He moves, but also to its being done in a way which is fitting to the nature of that thing. And therefore it would be more repugnant to the Divine motion, for the will to

be moved of necessity, which is not fitting to its nature; than for it to be moved freely, which is becoming to its nature.

Reply to Objection 2. That is natural to a thing, which God so works in it that it may be natural to it: for thus is something becoming to a thing, according as God wishes it to be becoming. Now He does not wish that whatever He works in things should be natural to

them, for instance, that the dead should rise again. But this He does wish to be natural to each thing—that it be subject to the Divine power.

Reply to Objection 3. If God moves the will to anything, it is incompatible with this supposition, that the will be not moved thereto. But it is not impossible simply. Consequently it does not follow that the will is moved by God necessarily.

FIRST PART OF THE SECOND PART, QUESTION 100

Of the Moral Precepts of the Old Law (In Twelve Articles)

We must now consider each kind of precept of the Old Law: and (1) the moral precepts, (2) the ceremonial precepts, (3) the judicial precepts. Under the first head there are twelve points of inquiry:

- (1) Whether all the moral precepts of the Old Law belong to the law of nature?
- (2) Whether the moral precepts of the Old Law are about the acts of all the virtues?
- (3) Whether all the moral precepts of the Old Law are reducible to the ten precepts of the decalogue?
- (4) How the precepts of the decalogue are distinguished from one another?
- (5) Their number;
- (6) Their order;
- (7) The manner in which they were given;
- (8) Whether they are dispensable?
- (9) Whether the mode of observing a virtue comes under the precept of the Law?
- (10) Whether the mode of charity comes under the precept?
- (11) The distinction of other moral precepts;
- (12) Whether the moral precepts of the Old Law justified man?

Whether all the moral precepts of the Old Law belong to the law of nature?

Ia IIae q. 100 a. 1

Objection 1. It would seem that not all the moral precepts belong to the law of nature. For it is written (Ecclus. 17:9): “Moreover He gave them instructions, and the law of life for an inheritance.” But instruction is in contradistinction to the law of nature; since the law of nature is not learnt, but instilled by natural instinct. Therefore not all the moral precepts belong to the natural law.

Objection 2. Further, the Divine law is more perfect than human law. But human law adds certain things concerning good morals, to those that belong to the law of nature: as is evidenced by the fact that the natural law is the same in all men, while these moral institutions are various for various people. Much more reason therefore was there why the Divine law should add to the law of nature, ordinances pertaining to good morals.

Objection 3. Further, just as natural reason leads to good morals in certain matters, so does faith: hence it is written (Gal. 5:6) that faith “worketh by charity.” But faith is not included in the law of nature; since that which is of faith is above nature. Therefore not all the moral precepts of the Divine law belong to the law of nature.

On the contrary, The Apostle says (Rom. 2:14) that “the Gentiles, who have not the Law, do by nature those things that are of the Law”: which must be understood of things pertaining to good morals. Therefore all the moral precepts of the Law belong to the law of nature.

I answer that, The moral precepts, distinct from the ceremonial and judicial precepts, are about things pertaining of their very nature to good morals. Now since human morals depend on their relation to reason, which is the proper principle of human acts, those morals are called good which accord with reason, and those are

called bad which are discordant from reason. And as every judgment of speculative reason proceeds from the natural knowledge of first principles, so every judgment of practical reason proceeds from principles known naturally, as stated above (q. 94, Aa. 2,4): from which principles one may proceed in various ways to judge of various matters. For some matters connected with human actions are so evident, that after very little consideration one is able at once to approve or disapprove of them by means of these general first principles: while some matters cannot be the subject of judgment without much consideration of the various circumstances, which all are not competent to do carefully, but only those who are wise: just as it is not possible for all to consider the particular conclusions of sciences, but only for those who are versed in philosophy: and lastly there are some matters of which man cannot judge unless he be helped by Divine instruction; such as the articles of faith.

It is therefore evident that since the moral precepts are about matters which concern good morals; and since good morals are those which are in accord with reason; and since also every judgment of human reason must needs be derived in some way from natural reason; it follows, of necessity, that all the moral precepts belong to the law of nature; but not all in the same way. For there are certain things which the natural reason of every man, of its own accord and at once, judges to be done or not to be done: e.g. “Honor thy father and thy mother;” and “Thou shalt not kill, Thou shalt not steal”: and these belong to the law of nature absolutely. And there are certain things which, after a more careful consideration, wise men deem obligatory. Such belong to the law of nature, yet so that they need to be inculcated, the wiser teaching the less wise: e.g. “Rise up before

the hoary head, and honor the person of the aged man," and the like. And there are some things, to judge of which, human reason needs Divine instruction, whereby we are taught about the things of God: e.g. "Thou shalt

not make to thyself a graven thing, nor the likeness of anything; Thou shalt not take the name of the Lord thy God in vain."

This suffices for the Replies to the Objections.

Whether the moral precepts of the Law are about all the acts of virtue?

Ia IIae q. 100 a. 2

Objection 1. It would seem that the moral precepts of the Law are not about all the acts of virtue. For observance of the precepts of the Old Law is called justification, according to Ps. 118:8: "I will keep Thy justifications." But justification is the execution of justice. Therefore the moral precepts are only about acts of justice.

Objection 2. Further, that which comes under a precept has the character of a duty. But the character of duty belongs to justice alone and to none of the other virtues, for the proper act of justice consists in rendering to each one his due. Therefore the precepts of the moral law are not about the acts of the other virtues, but only about the acts of justice.

Objection 3. Further, every law is made for the common good, as Isidore says (Etym. v, 21). But of all the virtues justice alone regards the common good, as the Philosopher says (Ethic. v, 1). Therefore the moral precepts are only about the acts of justice.

On the contrary, Ambrose says (De Paradiso viii) that "a sin is a transgression of the Divine law, and a disobedience to the commandments of heaven." But there are sins contrary to all the acts of virtue. Therefore it belongs to Divine law to direct all the acts of virtue.

I answer that, Since the precepts of the Law are ordained to the common good, as stated above (q. 90, a. 2), the precepts of the Law must needs be diversified according to the various kinds of community: hence the Philosopher (Polit. iv, 1) teaches that the laws which are made in a state which is ruled by a king must be different from the laws of a state which is ruled by the people, or by a few powerful men in the state. Now human law is ordained for one kind of community, and the Divine law for another kind. Because human law is ordained for the civil community, implying mutual duties of man and his fellows: and men are ordained to one another by outward acts, whereby men live in communion with one another. This life in common of man with man pertains to justice, whose proper function consists in directing

the human community. Wherefore human law makes precepts only about acts of justice; and if it commands acts of other virtues, this is only in so far as they assume the nature of justice, as the Philosopher explains (Ethic. v, 1).

But the community for which the Divine law is ordained, is that of men in relation to God, either in this life or in the life to come. And therefore the Divine law proposes precepts about all those matters whereby men are well ordered in their relations to God. Now man is united to God by his reason or mind, in which is God's image. Wherefore the Divine law proposes precepts about all those matters whereby human reason is well ordered. But this is effected by the acts of all the virtues: since the intellectual virtues set in good order the acts of the reason in themselves: while the moral virtues set in good order the acts of the reason in reference to the interior passions and exterior actions. It is therefore evident that the Divine law fittingly proposes precepts about the acts of all the virtues: yet so that certain matters, without which the order of virtue, which is the order of reason, cannot even exist, come under an obligation of precept; while other matters, which pertain to the well-being of perfect virtue, come under an admonition of counsel.

Reply to Objection 1. The fulfilment of the commandments of the Law, even of those which are about the acts of the other virtues, has the character of justification, inasmuch as it is just that man should obey God: or again, inasmuch as it is just that all that belongs to man should be subject to reason.

Reply to Objection 2. Justice properly so called regards the duty of one man to another: but all the other virtues regard the duty of the lower powers to reason. It is in relation to this latter duty that the Philosopher speaks (Ethic. v, 11) of a kind of metaphorical justice.

The Reply to the Third Objection is clear from what has been said about the different kinds of community.

Whether all the moral precepts of the Old Law are reducible to the ten precepts of the decalogue?

Ia IIae q. 100 a. 3

Objection 1. It would seem that not all the moral precepts of the Old Law are reducible to the ten precepts of the decalogue. For the first and principal precepts of the Law are, "Thou shalt love the Lord thy God," and "Thou shalt love thy neighbor," as stated in Mat. 22:37,39. But these two are not contained in the precepts of the decalogue. Therefore not all the moral pre-

cepts are contained in the precepts of the decalogue.

Objection 2. Further, the moral precepts are not reducible to the ceremonial precepts, but rather vice versa. But among the precepts of the decalogue, one is ceremonial, viz. "Remember that thou keep holy the Sabbath-day." Therefore the moral precepts are not reducible to all the precepts of the decalogue.

Objection 3. Further, the moral precepts are about all the acts of virtue. But among the precepts of the decalogue are only such as regard acts of justice; as may be seen by going through them all. Therefore the precepts of the decalogue do not include all the moral precepts.

On the contrary, The gloss on Mat. 5:11: “Blessed are ye when they shall revile you,” etc. says that “Moses, after propounding the ten precepts, set them out in detail.” Therefore all the precepts of the Law are so many parts of the precepts of the decalogue.

I answer that, The precepts of the decalogue differ from the other precepts of the Law, in the fact that God Himself is said to have given the precepts of the decalogue; whereas He gave the other precepts to the people through Moses. Wherefore the decalogue includes those precepts the knowledge of which man has immediately from God. Such are those which with but slight reflection can be gathered at once from the first general principles: and those also which become known to man immediately through divinely infused faith. Consequently two kinds of precepts are not reckoned among the precepts of the decalogue: viz. first general principles, for they need no further promulgation after being once imprinted on the natural reason to which they are self-evident; as, for instance, that one should do evil to no man, and other similar principles: and again those which the careful reflection of wise men shows to be

in accord with reason; since the people receive these principles from God, through being taught by wise men. Nevertheless both kinds of precepts are contained in the precepts of the decalogue; yet in different ways. For the first general principles are contained in them, as principles in their proximate conclusions; while those which are known through wise men are contained, conversely, as conclusions in their principles.

Reply to Objection 1. Those two principles are the first general principles of the natural law, and are self-evident to human reason, either through nature or through faith. Wherefore all the precepts of the decalogue are referred to these, as conclusions to general principles.

Reply to Objection 2. The precept of the Sabbath observance is moral in one respect, in so far as it commands man to give some time to the things of God, according to Ps. 45:11: “Be still and see that I am God.” In this respect it is placed among the precepts of the decalogue: but not as to the fixing of the time, in which respect it is a ceremonial precept.

Reply to Objection 3. The notion of duty is not so patent in the other virtues as it is in justice. Hence the precepts about the acts of the other virtues are not so well known to the people as are the precepts about acts of justice. Wherefore the acts of justice especially come under the precepts of the decalogue, which are the primary elements of the Law.

Whether the precepts of the decalogue are suitably distinguished from one another?

Ia IIae q. 100 a. 4

Objection 1. It would seem that the precepts of the decalogue are unsuitably distinguished from one another. For worship is a virtue distinct from faith. Now the precepts are about acts of virtue. But that which is said at the beginning of the decalogue, “Thou shalt not have strange gods before Me,” belongs to faith: and that which is added, “Thou shalt not make . . . any graven thing,” etc. belongs to worship. Therefore these are not one precept, as Augustine asserts (Qq. in Exod. qu. lxxi), but two.

Objection 2. Further, the affirmative precepts in the Law are distinct from the negative precepts; e.g. “Honor thy father and thy mother,” and, “Thou shalt not kill.” But this, “I am the Lord thy God,” is affirmative: and that which follows, “Thou shalt not have strange gods before Me,” is negative. Therefore these are two precepts, and do not, as Augustine says (Qq. in Exod. qu. lxxi), make one.

Objection 3. Further, the Apostle says (Rom. 7:7): “I had not known concupiscence, if the Law did not say: ‘Thou shalt not covet.’” Hence it seems that this precept, “Thou shalt not covet,” is one precept; and, therefore, should not be divided into two.

On the contrary, stands the authority of Augustine who, in commenting on Exodus (Qq. in Exod. qu. lxxi) distinguishes three precepts as referring to God,

and seven as referring to our neighbor.

I answer that, The precepts of the decalogue are differently divided by different authorities. For Hesychius commenting on Lev. 26:26, “Ten women shall bake your bread in one oven,” says that the precept of the Sabbath-day observance is not one of the ten precepts, because its observance, in the letter, is not binding for all time. But he distinguishes four precepts pertaining to God, the first being, “I am the Lord thy God”; the second, “Thou shalt not have strange gods before Me,” (thus also Jerome distinguishes these two precepts, in his commentary on Osee 10:10, “On thy” [Vulg.: “their”] “two iniquities”); the third precept according to him is, “Thou shalt not make to thyself any graven thing”; and the fourth, “Thou shalt not take the name of the Lord thy God in vain.” He states that there are six precepts pertaining to our neighbor; the first, “Honor thy father and thy mother”; the second, “Thou shalt not kill”; the third, “Thou shalt not commit adultery”; the fourth, “Thou shalt not steal”; the fifth, “Thou shalt not bear false witness”; the sixth, “Thou shalt not covet.”

But, in the first place, it seems unbecoming for the precept of the Sabbath-day observance to be put among the precepts of the decalogue, if it nowise belonged to the decalogue. Secondly, because, since it is written (Mat. 6:24), “No man can serve two masters,” the two

statements, “I am the Lord thy God,” and, “Thou shalt not have strange gods before Me” seem to be of the same nature and to form one precept. Hence Origen (Hom. viii in Exod.) who also distinguishes four precepts as referring to God, unites these two under one precept; and reckons in the second place, “Thou shalt not make... any graven thing”; as third, “Thou shalt not take the name of the Lord thy God in vain”; and as fourth, “Remember that thou keep holy the Sabbath-day.” The other six he reckons in the same way as Hesychius.

Since, however, the making of graven things or the likeness of anything is not forbidden except as to the point of their being worshipped as gods—for God commanded an image of the Seraphim [Vulg.: Cherubim] to be made and placed in the tabernacle, as related in Ex. 25:18—Augustine more fittingly unites these two, “Thou shalt not have strange gods before Me,” and, “Thou shalt not make... any graven thing,” into one precept. Likewise to covet another’s wife, for the purpose of carnal knowledge, belongs to the concupiscence of the flesh; whereas, to covet other things, which are desired for the purpose of possession, belongs to the concupiscence of the eyes; wherefore Augustine reckons as distinct precepts, that which forbids the coveting of another’s goods, and that which prohibits the coveting of another’s wife. Thus he distinguishes three precepts as referring to God, and seven as referring to our neighbor. And this is better.

Reply to Objection 1. Worship is merely a declaration of faith: wherefore the precepts about worship

should not be reckoned as distinct from those about faith. Nevertheless precepts should be given about worship rather than about faith, because the precept about faith is presupposed to the precepts of the decalogue, as is also the precept of charity. For just as the first general principles of the natural law are self-evident to a subject having natural reason, and need no promulgation; so also to believe in God is a first and self-evident principle to a subject possessed of faith: “for he that cometh to God, must believe that He is” (Heb. 11:6). Hence it needs no other promulgation than the infusion of faith.

Reply to Objection 2. The affirmative precepts are distinct from the negative, when one is not comprised in the other: thus that man should honor his parents does not include that he should not kill another man; nor does the latter include the former. But when an affirmative precept is included in a negative, or vice versa, we do not find that two distinct precepts are given: thus there is not one precept saying that “Thou shalt not steal,” and another binding one to keep another’s property intact, or to give it back to its owner. In the same way there are not different precepts about believing in God, and about not believing in strange gods.

Reply to Objection 3. All covetousness has one common ratio: and therefore the Apostle speaks of the commandment about covetousness as though it were one. But because there are various special kinds of covetousness, therefore Augustine distinguishes different prohibitions against coveting: for covetousness differs specifically in respect of the diversity of actions or things coveted, as the Philosopher says (Ethic. x, 5).

Whether the precepts of the decalogue are suitably set forth?

Ia IIae q. 100 a. 5

Objection 1. It would seem that the precepts of the decalogue are unsuitably set forth. Because sin, as stated by Ambrose (De Paradiso viii), is “a transgression of the Divine law and a disobedience to the commandments of heaven.” But sins are distinguished according as man sins against God, or his neighbor, or himself. Since, then, the decalogue does not include any precepts directing man in his relations to himself, but only such as direct him in his relations to God and himself, it seems that the precepts of the decalogue are insufficiently enumerated.

Objection 2. Further, just as the Sabbath-day observance pertained to the worship of God, so also did the observance of other solemnities, and the offering of sacrifices. But the decalogue contains a precept about the Sabbath-day observance. Therefore it should contain others also, pertaining to the other solemnities, and to the sacrificial rite.

Objection 3. Further, as sins against God include the sin of perjury, so also do they include blasphemy, or other ways of lying against the teaching of God. But there is a precept forbidding perjury, “Thou shalt not take the name of the Lord thy God in vain.” Therefore

there should be also a precept of the decalogue forbidding blasphemy and false doctrine.

Objection 4. Further, just as man has a natural affection for his parents, so has he also for his children. Moreover the commandment of charity extends to all our neighbors. Now the precepts of the decalogue are ordained unto charity, according to 1 Tim. 1:5: “The end of the commandment is charity.” Therefore as there is a precept referring to parents, so should there have been some precepts referring to children and other neighbors.

Objection 5. Further, in every kind of sin, it is possible to sin in thought or in deed. But in some kinds of sin, namely in theft and adultery, the prohibition of sins of deed, when it is said, “Thou shalt not commit adultery, Thou shalt not steal,” is distinct from the prohibition of the sin of thought, when it is said, “Thou shalt not covet thy neighbor’s goods,” and, “Thou shalt not covet thy neighbor’s wife.” Therefore the same should have been done in regard to the sins of homicide and false witness.

Objection 6. Further, just as sin happens through disorder of the concupiscible faculty, so does it arise

through disorder of the irascible part. But some precepts forbid inordinate concupiscence, when it is said, "Thou shalt not covet." Therefore the decalogue should have included some precepts forbidding the disorders of the irascible faculty. Therefore it seems that the ten precepts of the decalogue are unfittingly enumerated.

On the contrary, It is written (Dt. 4:13): "He shewed you His covenant, which He commanded you to do, and the ten words that He wrote in two tablets of stone."

I answer that, As stated above (a. 2), just as the precepts of human law direct man in his relations to the human community, so the precepts of the Divine law direct man in his relations to a community or commonwealth of men under God. Now in order that any man may dwell aright in a community, two things are required: the first is that he behave well to the head of the community; the other is that he behave well to those who are his fellows and partners in the community. It is therefore necessary that the Divine law should contain in the first place precepts ordering man in his relations to God; and in the second place, other precepts ordering man in his relations to other men who are his neighbors and live with him under God.

Now man owes three things to the head of the community: first, fidelity; secondly, reverence; thirdly, service. Fidelity to his master consists in his not giving sovereign honor to another: and this is the sense of the first commandment, in the words "Thou shalt not have strange gods." Reverence to his master requires that he should do nothing injurious to him: and this is conveyed by the second commandment, "Thou shalt not take the name of the Lord thy God in vain." Service is due to the master in return for the benefits which his subjects receive from him: and to this belongs the third commandment of the sanctification of the Sabbath in memory of the creation of all things.

To his neighbors a man behaves himself well both in particular and in general. In particular, as to those to whom he is indebted, by paying his debts: and in this sense is to be taken the commandment about honoring one's parents. In general, as to all men, by doing harm to none, either by deed, or by word, or by thought. By deed, harm is done to one's neighbor—sometimes in his person, i.e. as to his personal existence; and this is forbidden by the words, "Thou shalt not kill": sometimes in a person united to him, as to the propagation of offspring; and this is prohibited by the words, "Thou shalt not commit adultery": sometimes in his possessions, which are directed to both the aforesaid; and with this regard to this it is said, "Thou shalt not steal." Harm done by word is forbidden when it is said, "Thou shalt not bear false witness against thy neighbor": harm done by thought is forbidden in the words, "Thou shalt not covet."

The three precepts that direct man in his behavior towards God may also be differentiated in this same way. For the first refers to deeds; wherefore it is said, "Thou

shalt not make... a graven thing": the second, to words; wherefore it is said, "Thou shalt not take the name of the Lord thy God in vain": the third, to thoughts; because the sanctification of the Sabbath, as the subject of a moral precept, requires repose of the heart in God. Or, according to Augustine (In Ps. 32: Conc. 1), by the first commandment we reverence the unity of the First Principle; by the second, the Divine truth; by the third, His goodness whereby we are sanctified, and wherein we rest as in our last end.

Reply to Objection 1. This objection may be answered in two ways. First, because the precepts of the decalogue can be reduced to the precepts of charity. Now there was need for man to receive a precept about loving God and his neighbor, because in this respect the natural law had become obscured on account of sin: but not about the duty of loving oneself, because in this respect the natural law retained its vigor: or again, because love of oneself is contained in the love of God and of one's neighbor: since true self-love consists in directing oneself to God. And for this reason the decalogue includes those precepts only which refer to our neighbor and to God.

Secondly, it may be answered that the precepts of the decalogue are those which the people received from God immediately; wherefore it is written (Dt. 10:4): "He wrote in the tables, according as He had written before, the ten words, which the Lord spoke to you." Hence the precepts of the decalogue need to be such as the people can understand at once. Now a precept implies the notion of duty. But it is easy for a man, especially for a believer, to understand that, of necessity, he owes certain duties to God and to his neighbor. But that, in matters which regard himself and not another, man has, of necessity, certain duties to himself, is not so evident: for, at the first glance, it seems that everyone is free in matters that concern himself. And therefore the precepts which prohibit disorders of a man with regard to himself, reach the people through the instruction of men who are versed through the instruction of men who are versed in such matters; and, consequently, they are not contained in the decalogue.

Reply to Objection 2. All the solemnities of the Old Law were instituted in celebration of some Divine favor, either in memory of past favors, or in sign of some favor to come: in like manner all the sacrifices were offered up with the same purpose. Now of all the Divine favors to be commemorated the chief was that of the Creation, which was called to mind by the sanctification of the Sabbath; wherefore the reason for this precept is given in Ex. 20:11: "In six days the Lord made heaven and earth," etc. And of all future blessings, the chief and final was the repose of the mind in God, either, in the present life, by grace, or, in the future life, by glory; which repose was also foreshadowed in the Sabbath-day observance: wherefore it is written (Is. 58:13): "If thou turn away thy foot from the Sabbath, from doing thy own will in My holy day, and call the

Sabbath delightful, and the holy of the Lord glorious.” Because these favors first and chiefly are borne in mind by men, especially by the faithful. But other solemnities were celebrated on account of certain particular favors temporal and transitory, such as the celebration of the Passover in memory of the past favor of the delivery from Egypt, and as a sign of the future Passion of Christ, which though temporal and transitory, brought us to the repose of the spiritual Sabbath. Consequently, the Sabbath alone, and none of the other solemnities and sacrifices, is mentioned in the precepts of the decalogue.

Reply to Objection 3. As the Apostle says (Heb. 6:16), “men swear by one greater than themselves; and an oath for confirmation is the end of all their controversy.” Hence, since oaths are common to all, inordinate swearing is the matter of a special prohibition by a precept of the decalogue. According to one interpretation, however, the words, “Thou shalt not take the name of the Lord thy God in vain,” are a prohibition of false doctrine, for one gloss expounds them thus: “Thou shalt not say that Christ is a creature.”

Reply to Objection 4. That a man should not do harm to anyone is an immediate dictate of his natural reason: and therefore the precepts that forbid the doing of harm are binding on all men. But it is not an immediate dictate of natural reason that a man should do one thing in return for another, unless he happen to be indebted to someone. Now a son’s debt to his father is so evident that one cannot get away from it by deny-

ing it: since the father is the principle of generation and being, and also of upbringing and teaching. Wherefore the decalogue does not prescribe deeds of kindness or service to be done to anyone except to one’s parents. On the other hand parents do not seem to be indebted to their children for any favors received, but rather the reverse is the case. Again, a child is a part of his father; and “parents love their children as being a part of themselves,” as the Philosopher states (Ethic. viii, 12). Hence, just as the decalogue contains no ordinance as to man’s behavior towards himself, so, for the same reason, it includes no precept about loving one’s children.

Reply to Objection 5. The pleasure of adultery and the usefulness of wealth, in so far as they have the character of pleasurable or useful good, are of themselves, objects of appetite: and for this reason they needed to be forbidden not only in the deed but also in the desire. But murder and falsehood are, of themselves, objects of repulsion (since it is natural for man to love his neighbor and the truth): and are desired only for the sake of something else. Consequently with regard to sins of murder and false witness, it was necessary to proscribe, not sins of thought, but only sins of deed.

Reply to Objection 6. As stated above (q. 25, a. 1), all the passions of the irascible faculty arise from the passions of the concupiscible part. Hence, as the precepts of the decalogue are, as it were, the first elements of the Law, there was no need for mention of the irascible passions, but only of the concupiscible passions.

Whether the ten precepts of the decalogue are set in proper order?

Ia IIae q. 100 a. 6

Objection 1. It would seem that the ten precepts of the decalogue are not set in proper order. Because love of one’s neighbor is seemingly previous to love of God, since our neighbor is better known to us than God is; according to 1 Jn. 4:20: “He that loveth not his brother, whom he seeth, how can he love God, Whom he seeth not?” But the first three precepts belong to the love of God, while the other seven pertain to the love of our neighbor. Therefore the precepts of the decalogue are not set in proper order.

Objection 2. Further, the acts of virtue are prescribed by the affirmative precepts, and acts of vice are forbidden by the negative precepts. But according to Boethius in his commentary on the Categories*, vices should be uprooted before virtues are sown. Therefore among the precepts concerning our neighbor, the negative precepts should have preceded the affirmative.

Objection 3. Further, the precepts of the Law are about men’s actions. But actions of thought precede actions of word or outward deed. Therefore the precepts about not coveting, which regard our thoughts, are unsuitably placed last in order.

On the contrary, The Apostle says (Rom. 13:1): “The things that are of God, are well ordered” [Vulg.:

‘Those that are, are ordained of God’]. But the precepts of the decalogue were given immediately by God, as stated above (a. 3). Therefore they are arranged in becoming order.

I answer that, As stated above (Aa. 3,5, ad 1), the precepts of the decalogue are such as the mind of man is ready to grasp at once. Now it is evident that a thing is so much the more easily grasped by the reason, as its contrary is more grievous and repugnant to reason. Moreover, it is clear, since the order of reason begins with the end, that, for a man to be inordinately disposed towards his end, is supremely contrary to reason. Now the end of human life and society is God. Consequently it was necessary for the precepts of the decalogue, first of all, to direct man to God; since the contrary to this is most grievous. Thus also, in an army, which is ordained to the commander as to its end, it is requisite first that the soldier should be subject to the commander, and the opposite of this is most grievous; and secondly it is requisite that he should be in coordination with the other soldiers.

Now among those things whereby we are ordained to God, the first is that man should be subjected to Him faithfully, by having nothing in common with His ene-

* Lib. iv, cap. De Oppos.

mies. The second is that he should show Him reverence: the third that he should offer Him service. Thus, in an army, it is a greater sin for a soldier to act treacherously and make a compact with the foe, than to be insolent to his commander: and this last is more grievous than if he be found wanting in some point of service to him.

As to the precepts that direct man in his behavior towards his neighbor, it is evident that it is more repugnant to reason, and a more grievous sin, if man does not observe the due order as to those persons to whom he is most indebted. Consequently, among those precepts that direct man in his relations to his neighbor, the first place is given to that one which regards his parents. Among the other precepts we again find the order to be according to the gravity of sin. For it is more grave and more repugnant to reason, to sin by deed than by word; and by word than by thought. And among sins of deed, murder which destroys life in one already living is more grievous than adultery, which imperils the life of the unborn child; and adultery is more grave than theft, which regards external goods.

Reply to Objection 1. Although our neighbor is better known than God by the way of the senses, nevertheless the love of God is the reason for the love of our neighbor, as shall be declared later on (Ia IIae, q. 25,

a. 1; Ia IIae, q. 26, a. 2). Hence the precepts ordaining man to God demanded precedence of the others.

Reply to Objection 2. Just as God is the universal principle of being in respect of all things, so is a father a principle of being in respect of his son. Therefore the precept regarding parents was fittingly placed after the precepts regarding God. This argument holds in respect of affirmative and negative precepts about the same kind of deed: although even then it is not altogether cogent. For although in the order of execution, vices should be uprooted before virtues are sown, according to Ps. 33:15: "Turn away from evil, and do good," and Is. 1:16,17: "Cease to do perversely; learn to do well"; yet, in the order of knowledge, virtue precedes vice, because "the crooked line is known by the straight" (De Anima i): and "by the law is the knowledge of sin" (Rom. 3:20). Wherefore the affirmative precept demanded the first place. However, this is not the reason for the order, but that which is given above. Because in the precepts regarding God, which belongs to the first table, an affirmative precept is placed last, since its transgression implies a less grievous sin.

Reply to Objection 3. Although sin of thought stands first in the order of execution, yet its prohibition holds a later position in the order of reason.

Whether the precepts of the decalogue are suitably formulated?

Ia IIae q. 100 a. 7

Objection 1. It would seem that the precepts of the decalogue are unsuitably formulated. Because the affirmative precepts direct man to acts of virtue, while the negative precepts withdraw him from acts of vice. But in every matter there are virtues and vices opposed to one another. Therefore in whatever matter there is an ordinance of a precept of the decalogue, there should have been an affirmative and a negative precept. Therefore it was unfitting that affirmative precepts should be framed in some matters, and negative precepts in others.

Objection 2. Further, Isidore says (Etym. ii, 10) that every law is based on reason. But all the precepts of the decalogue belong to the Divine law. Therefore the reason should have been pointed out in each precept, and not only in the first and third.

Objection 3. Further, by observing the precepts man deserves to be rewarded by God. But the Divine promises concern the rewards of the precepts. Therefore the promise should have been included in each precept, and not only in the second and fourth.

Objection 4. Further, the Old Law is called "the law of fear," in so far as it induced men to observe the precepts, by means of the threat of punishments. But all the precepts of the decalogue belong to the Old Law. Therefore a threat of punishment should have been included in each, and not only in the first and second.

Objection 5. Further, all the commandments of God should be retained in the memory: for it is written (Prov. 3:3): "Write them in the tables of thy heart." Therefore

it was not fitting that mention of the memory should be made in the third commandment only. Consequently it seems that the precepts of the decalogue are unsuitably formulated.

On the contrary, It is written (Wis. 11:21) that "God made all things, in measure, number and weight." Much more therefore did He observe a suitable manner in formulating His Law.

I answer that, The highest wisdom is contained in the precepts of the Divine law: wherefore it is written (Dt. 4:6): "This is your wisdom and understanding in the sight of nations." Now it belongs to wisdom to arrange all things in due manner and order. Therefore it must be evident that the precepts of the Law are suitably set forth.

Reply to Objection 1. Affirmation of one thing always leads to the denial of its opposite: but the denial of one opposite does not always lead to the affirmation of the other. For it follows that if a thing is white, it is not black: but it does not follow that if it is not black, it is white: because negation extends further than affirmation. And hence too, that one ought not to do harm to another, which pertains to the negative precepts, extends to more persons, as a primary dictate of reason, than that one ought to do someone a service or kindness. Nevertheless it is a primary dictate of reason that man is a debtor in the point of rendering a service or kindness to those from whom he has received kindness, if he has not yet repaid the debt. Now there are two whose fa-

vors no man can sufficiently repay, viz. God and man's father, as stated in Ethic. viii, 14. Therefore it is that there are only two affirmative precepts; one about the honor due to parents, the other about the celebration of the Sabbath in memory of the Divine favor.

Reply to Objection 2. The reasons for the purely moral precepts are manifest; hence there was no need to add the reason. But some of the precepts include ceremonial matter, or a determination of a general moral precept; thus the first precept includes the determination, "Thou shalt not make a graven thing"; and in the third precept the Sabbath-day is fixed. Consequently there was need to state the reason in each case.

Reply to Objection 3. Generally speaking, men direct their actions to some point of utility. Consequently in those precepts in which it seemed that there would be no useful result, or that some utility might be hindered, it was necessary to add a promise of reward. And since parents are already on the way to depart from us, no benefit is expected from them: wherefore a promise of reward is added to the precept about honoring one's

parents. The same applies to the precept forbidding idolatry: since thereby it seemed that men were hindered from receiving the apparent benefit which they think they can get by entering into a compact with the demons.

Reply to Objection 4. Punishments are necessary against those who are prone to evil, as stated in Ethic. x, 9. Wherefore a threat of punishment is only affixed to those precepts of the law which forbade evils to which men were prone. Now men were prone to idolatry by reason of the general custom of the nations. Likewise men are prone to perjury on account of the frequent use of oaths. Hence it is that a threat is affixed to the first two precepts.

Reply to Objection 5. The commandment about the Sabbath was made in memory of a past blessing. Wherefore special mention of the memory is made therein. Or again, the commandment about the Sabbath has a determination affixed to it that does not belong to the natural law, wherefore this precept needed a special admonition.

Whether the precepts of the decalogue are dispensable?

Ia IIae q. 100 a. 8

Objection 1. It would seem that the precepts of the decalogue are dispensable. For the precepts of the decalogue belong to the natural law. But the natural law fails in some cases and is changeable, like human nature, as the Philosopher says (Ethic. v, 7). Now the failure of law to apply in certain particular cases is a reason for dispensation, as stated above (q. 96, a. 6; q. 97, a. 4). Therefore a dispensation can be granted in the precepts of the decalogue.

Objection 2. Further, man stands in the same relation to human law as God does to Divine law. But man can dispense with the precepts of a law made by man. Therefore, since the precepts of the decalogue are ordained by God, it seems that God can dispense with them. Now our superiors are God's viceregents on earth; for the Apostle says (2 Cor. 2:10): "For what I have pardoned, if I have pardoned anything, for your sakes have I done it in the person of Christ." Therefore superiors can dispense with the precepts of the decalogue.

Objection 3. Further, among the precepts of the decalogue is one forbidding murder. But it seems that a dispensation is given by men in this precept: for instance, when according to the prescription of human law, such as evil-doers or enemies are lawfully slain. Therefore the precepts of the decalogue are dispensable.

Objection 4. Further, the observance of the Sabbath is ordained by a precept of the decalogue. But a dispensation was granted in this precept; for it is written (1 Macc. 2:4): "And they determined in that day, saying: Whosoever shall come up to fight against us on the Sabbath-day, we will fight against him." Therefore the precepts of the decalogue are dispensable.

On the contrary, are the words of Is. 24:5, where some are reproved for that "they have changed the ordinance, they have broken the everlasting covenant"; which, seemingly, apply principally to the precepts of the decalogue. Therefore the precepts of the decalogue cannot be changed by dispensation.

I answer that, As stated above (q. 96, a. 6; q. 97, a. 4), precepts admit of dispensation, when there occurs a particular case in which, if the letter of the law be observed, the intention of the lawgiver is frustrated. Now the intention of every lawgiver is directed first and chiefly to the common good; secondly, to the order of justice and virtue, whereby the common good is preserved and attained. If therefore there be any precepts which contain the very preservation of the common good, or the very order of justice and virtue, such precepts contain the intention of the lawgiver, and therefore are indispensable. For instance, if in some community a law were enacted, such as this—that no man should work for the destruction of the commonwealth, or betray the state to its enemies, or that no man should do anything unjust or evil, such precepts would not admit of dispensation. But if other precepts were enacted, subordinate to the above, and determining certain special modes of procedure, these latter precepts would admit of dispensation, in so far as the omission of these precepts in certain cases would not be prejudicial to the former precepts which contain the intention of the lawgiver. For instance if, for the safeguarding of the commonwealth, it were enacted in some city that from each ward some men should keep watch as sentries in case of siege, some might be dispensed from this on account of some greater utility.

Now the precepts of the decalogue contain the very intention of the lawgiver, who is God. For the precepts of the first table, which direct us to God, contain the very order to the common and final good, which is God; while the precepts of the second table contain the order of justice to be observed among men, that nothing undue be done to anyone, and that each one be given his due; for it is in this sense that we are to take the precepts of the decalogue. Consequently the precepts of the decalogue admit of no dispensation whatever.

Reply to Objection 1. The Philosopher is not speaking of the natural law which contains the very order of justice: for it is a never-failing principle that “justice should be preserved.” But he is speaking in reference to certain fixed modes of observing justice, which fail to apply in certain cases.

Reply to Objection 2. As the Apostle says (2 Tim. 2:13), “God continueth faithful, He cannot deny Himself.” But He would deny Himself if He were to do away with the very order of His own justice, since He is justice itself. Wherefore God cannot dispense a man so that it be lawful for him not to direct himself to God, or not to be subject to His justice, even in those matters in which men are directed to one another.

Reply to Objection 3. The slaying of a man is forbidden in the decalogue, in so far as it bears the character of something undue: for in this sense the precept contains the very essence of justice. Human law cannot make it lawful for a man to be slain unduly. But it is not undue for evil-doers or foes of the common weal to be slain: hence this is not contrary to the precept of the decalogue; and such a killing is no murder as forbidden by that precept, as Augustine observes (De Lib. Arb. i, 4). In like manner when a man’s property is taken from

him, if it be due that he should lose it, this is not theft or robbery as forbidden by the decalogue.

Consequently when the children of Israel, by God’s command, took away the spoils of the Egyptians, this was not theft; since it was due to them by the sentence of God. Likewise when Abraham consented to slay his son, he did not consent to murder, because his son was due to be slain by the command of God, Who is Lord of life and death: for He it is Who inflicts the punishment of death on all men, both godly and ungodly, on account of the sin of our first parent, and if a man be the executor of that sentence by Divine authority, he will be no murderer any more than God would be. Again Osee, by taking unto himself a wife of fornications, or an adulterous woman, was not guilty either of adultery or of fornication: because he took unto himself one who was his by command of God, Who is the Author of the institution of marriage.

Accordingly, therefore, the precepts of the decalogue, as to the essence of justice which they contain, are unchangeable: but as to any determination by application to individual actions—for instance, that this or that be murder, theft or adultery, or not—in this point they admit of change; sometimes by Divine authority alone, namely, in such matters as are exclusively of Divine institution, as marriage and the like; sometimes also by human authority, namely in such matters as are subject to human jurisdiction: for in this respect men stand in the place of God: and yet not in all respects.

Reply to Objection 4. This determination was an interpretation rather than a dispensation. For a man is not taken to break the Sabbath, if he does something necessary for human welfare; as Our Lord proves (Mat. 12:3, seqq.).

Whether the mode of virtue falls under the precept of the law?

Ia IIae q. 100 a. 9

Objection 1. It would seem that the mode of virtue falls under the precept of the law. For the mode of virtue is that deeds of justice should be done justly, that deeds of fortitude should be done bravely, and in like manner as to the other virtues. But it is commanded (Dt. 26:20) that “thou shalt follow justly after that which is just.” Therefore the mode of virtue falls under the precept.

Objection 2. Further, that which belongs to the intention of the lawgiver comes chiefly under the precept. But the intention of the lawgiver is directed chiefly to make men virtuous, as stated in Ethic. ii: and it belongs to a virtuous man to act virtuously. Therefore the mode of virtue falls under the precept.

Objection 3. Further, the mode of virtue seems to consist properly in working willingly and with pleasure. But this falls under a precept of the Divine law, for it is written (Ps. 99:2): “Serve ye the Lord with gladness”; and (2 Cor. 9:7): “Not with sadness or necessity: for God loveth a cheerful giver”; whereupon the gloss says: “Whatever ye do, do gladly; and then you will do it

well; whereas if you do it sorrowfully, it is done in thee, not by thee.” Therefore the mode of virtue falls under the precept of the law.

On the contrary, No man can act as a virtuous man acts unless he has the habit of virtue, as the Philosopher explains (Ethic. ii, 4; v, 8). Now whoever transgresses a precept of the law, deserves to be punished. Hence it would follow that a man who has not the habit of virtue, would deserve to be punished, whatever he does. But this is contrary to the intention of the law, which aims at leading man to virtue, by habituating him to good works. Therefore the mode of virtue does not fall under the precept.

I answer that, As stated above (q. 90, a. 3, ad 2), a precept of law has compulsory power. Hence that on which the compulsion of the law is brought to bear, falls directly under the precept of the law. Now the law compels through fear of punishment, as stated in Ethic. x, 9, because that properly falls under the precept of the law, for which the penalty of the law is inflicted. But Di-

vine law and human law are differently situated as to the appointment of penalties; since the penalty of the law is inflicted only for those things which come under the judgment of the lawgiver; for the law punishes in accordance with the verdict given. Now man, the framer of human law, is competent to judge only of outward acts; because “man seeth those things that appear;” according to 1 Kings 16:7: while God alone, the framer of the Divine law, is competent to judge of the inward movements of wills, according to Ps. 7:10: “The searcher of hearts and reins is God.”

Accordingly, therefore, we must say that the mode of virtue is in some sort regarded both by human and by Divine law; in some respect it is regarded by the Divine, but not by the human law; and in another way, it is regarded neither by the human nor by the Divine law. Now the mode of virtue consists in three things, as the Philosopher states in *Ethic.* ii. The first is that man should act “knowingly”: and this is subject to the judgment of both Divine and human law; because what a man does in ignorance, he does accidentally. Hence according to both human and Divine law, certain things are judged in respect of ignorance to be punishable or pardonable.

The second point is that a man should act “deliberately,” i.e. “from choice, choosing that particular action for its own sake”; wherein a twofold internal movement is implied, of volition and of intention, about which we have spoken above (Qq. 8, 12): and concerning these two, Divine law alone, and not human law, is competent to judge. For human law does not punish the man who wishes to slay, and slays not: whereas the Divine law does, according to Mat. 5:22: “Whosoever is angry with his brother, shall be in danger of the judgment.”

The third point is that he should “act from a firm and immovable principle”: which firmness belongs properly to a habit, and implies that the action proceeds from a rooted habit. In this respect, the mode of virtue does not fall under the precept either of Divine or of human law, since neither by man nor by God is he punished as breaking the law, who gives due honor to his parents and yet has not the habit of filial piety.

Reply to Objection 1. The mode of doing acts of justice, which falls under the precept, is that they be done in accordance with right; but not that they be done from the habit of justice.

Reply to Objection 2. The intention of the lawgiver is twofold. His aim, in the first place, is to lead men to something by the precepts of the law: and this is virtue. Secondly, his intention is brought to bear on the matter itself of the precept: and this is something leading or disposing to virtue, viz. an act of virtue. For the end of the precept and the matter of the precept are not the same: just as neither in other things is the end the same as that which conduces to the end.

Reply to Objection 3. That works of virtue should be done without sadness, falls under the precept of the Divine law; for whoever works with sadness works unwillingly. But to work with pleasure, i.e. joyfully or cheerfully, in one respect falls under the precept, viz. in so far as pleasure ensues from the love of God and one’s neighbor (which love falls under the precept), and love causes pleasure: and in another respect does not fall under the precept, in so far as pleasure ensues from a habit; for “pleasure taken in a work proves the existence of a habit,” as stated in *Ethic.* ii, 3. For an act may give pleasure either on account of its end, or through its proceeding from a becoming habit.

Whether the mode of charity falls under the precept of the Divine law?

Ia IIae q. 100 a. 10

Objection 1. It would seem that the mode of charity falls under the precept of the Divine law. For it is written (Mat. 19:17): “If thou wilt enter into life, keep the commandments”: whence it seems to follow that the observance of the commandments suffices for entrance into life. But good works do not suffice for entrance into life, except they be done from charity: for it is written (1 Cor. 13:3): “If I should distribute all my goods to feed the poor, and if I should deliver my body to be burned, and have not charity, it profiteth me nothing.” Therefore the mode of charity is included in the commandment.

Objection 2. Further, the mode of charity consists properly speaking in doing all things for God. But this falls under the precept; for the Apostle says (1 Cor. 10:31): “Do all to the glory of God.” Therefore the mode of charity falls under the precept.

Objection 3. Further, if the mode of charity does not fall under the precept, it follows that one can fulfil the precepts of the law without having charity. Now what can be done without charity can be done without

grace, which is always united to charity. Therefore one can fulfil the precepts of the law without grace. But this is the error of Pelagius, as Augustine declares (*De Haeres.* lxxxviii). Therefore the mode of charity is included in the commandment.

On the contrary, Whoever breaks a commandment sins mortally. If therefore the mode of charity falls under the precept, it follows that whoever acts otherwise than from charity sins mortally. But whoever has not charity, acts otherwise than from charity. Therefore it follows that whoever has not charity, sins mortally in whatever he does, however good this may be in itself: which is absurd.

I answer that, Opinions have been contrary on this question. For some have said absolutely that the mode of charity comes under the precept; and yet that it is possible for one not having charity to fulfil this precept: because he can dispose himself to receive charity from God. Nor (say they) does it follow that a man not having charity sins mortally whenever he does something good

of its kind: because it is an affirmative precept that binds one to act from charity, and is binding not for all time, but only for such time as one is in a state of charity. On the other hand, some have said that the mode of charity is altogether outside the precept.

Both these opinions are true up to a certain point. Because the act of charity can be considered in two ways. First, as an act by itself: and thus it falls under the precept of the law which specially prescribes it, viz. "Thou shalt love the Lord thy God," and "Thou shalt love thy neighbor." In this sense, the first opinion is true. Because it is not impossible to observe this precept which regards the act of charity; since man can dispose himself to possess charity, and when he possesses it, he can use it. Secondly, the act of charity can be considered as being the mode of the acts of the other virtues, i.e. inasmuch as the acts of the other virtues are ordained to charity, which is "the end of the commandment," as stated in 1 Tim. i, 5: for it has been said above (q. 12, a. 4) that the intention of the end is a formal mode of the act ordained to that end. In this sense the second opinion is true in saying that the mode of charity does not fall under the precept, that is to say that this commandment, "Honor thy father," does not mean that a man must honor his father from charity, but merely that he must honor him. Wherefore he that honors his father, yet has not charity, does not break this precept: although he does break the precept concerning

the act of charity, for which reason he deserves to be punished.

Reply to Objection 1. Our Lord did not say, "If thou wilt enter into life, keep one commandment"; but "keep" all "the commandments": among which is included the commandment concerning the love of God and our neighbor.

Reply to Objection 2. The precept of charity contains the injunction that God should be loved from our whole heart, which means that all things would be referred to God. Consequently man cannot fulfil the precept of charity, unless he also refer all things to God. Wherefore he that honors his father and mother, is bound to honor them from charity, not in virtue of the precept, "Honor thy father and mother," but in virtue of the precept, "Thou shalt love the Lord thy God with thy whole heart." And since these are two affirmative precepts, not binding for all times, they can be binding, each one at a different time: so that it may happen that a man fulfils the precept of honoring his father and mother, without at the same time breaking the precept concerning the omission of the mode of charity.

Reply to Objection 3. Man cannot fulfil all the precepts of the law, unless he fulfil the precept of charity, which is impossible without charity. Consequently it is not possible, as Pelagius maintained, for man to fulfil the law without grace.

Whether it is right to distinguish other moral precepts of the law besides the decalogue? Ia IIae q. 100 a. 11

Objection 1. It would seem that it is wrong to distinguish other moral precepts of the law besides the decalogue. Because, as Our Lord declared (Mat. 22:40), "on these two commandments" of charity "dependeth the whole law and the prophets." But these two commandments are explained by the ten commandments of the decalogue. Therefore there is no need for other moral precepts.

Objection 2. Further, the moral precepts are distinct from the judicial and ceremonial precepts, as stated above (q. 99, Aa. 3,4). But the determinations of the general moral precepts belong to the judicial and ceremonial precepts: and the general moral precepts are contained in the decalogue, or are even presupposed to the decalogue, as stated above (a. 3). Therefore it was unsuitable to lay down other moral precepts besides the decalogue.

Objection 3. Further, the moral precepts are about the acts of all the virtues, as stated above (a. 2). Therefore, as the Law contains, besides the decalogue, moral precepts pertaining to religion, liberality, mercy, and chastity; so there should have been added some precepts pertaining to the other virtues, for instance, fortitude, sobriety, and so forth. And yet such is not the case. It is therefore unbecoming to distinguish other moral precepts in the Law besides those of the decalogue.

On the contrary, It is written (Ps. 18:8): "The law of the Lord is unspotted, converting souls." But man is preserved from the stain of sin, and his soul is converted to God by other moral precepts besides those of the decalogue. Therefore it was right for the Law to include other moral precepts.

I answer that, As is evident from what has been stated (q. 99, Aa. 3,4), the judicial and ceremonial precepts derive their force from their institution alone: since before they were instituted, it seemed of no consequence whether things were done in this or that way. But the moral precepts derive their efficacy from the very dictate of natural reason, even if they were never included in the Law. Now of these there are three grades: for some are most certain, and so evident as to need no promulgation; such as the commandments of the love of God and our neighbor, and others like these, as stated above (a. 3), which are, as it were, the ends of the commandments; wherefore no man can have an erroneous judgment about them. Some precepts are more detailed, the reason of which even an uneducated man can easily grasp; and yet they need to be promulgated, because human judgment, in a few instances, happens to be led astray concerning them: these are the precepts of the decalogue. Again, there are some precepts the reason of which is not so evident to everyone, but only

the wise; these are moral precepts added to the decalogue, and given to the people by God through Moses and Aaron.

But since the things that are evident are the principles whereby we know those that are not evident, these other moral precepts added to the decalogue are reducible to the precepts of the decalogue, as so many corollaries. Thus the first commandment of the decalogue forbids the worship of strange gods: and to this are added other precepts forbidding things relating to worship of idols: thus it is written (Dt. 18:10,11): "Neither let there be found among you anyone that shall expiate his son or daughter, making them to pass through the fire: . . . neither let there be any wizard nor charmer, nor anyone that consulteth pythonic spirits, or fortune-tellers, or that seeketh the truth from the dead." The second commandment forbids perjury. To this is added the prohibition of blasphemy (Lev. 24:15, seqq) and the prohibition of false doctrine (Dt. 13). To the third commandment are added all the ceremonial precepts. To the fourth commandment prescribing the honor due to parents, is added the precept about honoring the aged, according to Lev. 19:32: "Rise up before the hoary head, and honor the person of the aged man"; and likewise all the precepts prescribing the reverence to be observed towards our betters, or kindness towards our equals or inferiors. To the fifth commandment, which forbids murder, is added the prohibition of hatred and of any kind of violence inflicted on our neighbor, according to Lev. 19:16: "Thou shalt not stand against the blood of thy neighbor": likewise the prohibition against hating one's brother (Lev. 19:17): "Thou shalt not hate thy brother in thy heart." To the sixth commandment which forbids adultery, is added the prohibition about whoredom, according to Dt. 23:17: "There shall be no whore among the daughters of Israel, nor whoremonger among the sons of Israel"; and the prohibition against unnatural sins, according to Lev. 28:22,23: "Thou shalt not lie with mankind. . . thou shalt not copulate with any beast." To the seventh commandment which prohibits theft, is added the precept forbidding usury, according to Dt. 23:19: "Thou shalt not lend to thy brother money

to usury"; and the prohibition against fraud, according to Dt. 25:13: "Thou shalt not have divers weights in thy bag"; and universally all prohibitions relating to peculations and larceny. To the eighth commandment, forbidding false testimony, is added the prohibition against false judgment, according to Ex. 23:2: "Neither shalt thou yield in judgment, to the opinion of the most part, to stray from the truth"; and the prohibition against lying (Ex. 23:7): "Thou shalt fly lying," and the prohibition against detraction, according to Lev. 19:16: "Thou shalt not be a detractor, nor a whisperer among the people." To the other two commandments no further precepts are added, because thereby are forbidden all kinds of evil desires.

Reply to Objection 1. The precepts of the decalogue are ordained to the love of God and our neighbor as pertaining evidently to our duty towards them; but the other precepts are so ordained as pertaining thereto less evidently.

Reply to Objection 2. It is in virtue of their institution that the ceremonial and judicial precepts "are determinations of the precepts of the decalogue," not by reason of a natural instinct, as in the case of the super-added moral precepts.

Reply to Objection 3. The precepts of a law are ordained for the common good, as stated above (q. 90, a. 2). And since those virtues which direct our conduct towards others pertain directly to the common good, as also does the virtue of chastity, in so far as the generative act conduces to the common good of the species; hence precepts bearing directly on these virtues are given, both in the decalogue and in addition thereto. As to the act of fortitude there are the order to be given by the commanders in the war, which is undertaken for the common good: as is clear from Dt. 20:3, where the priest is commanded (to speak thus): "Be not afraid, do not give back." In like manner the prohibition of acts of gluttony is left to paternal admonition, since it is contrary to the good of the household; hence it is said (Dt. 21:20) in the person of parents: "He slighteth hearing our admonitions, he giveth himself to revelling, and to debauchery and banquetings."

Whether the moral precepts of the Old Law justified man?

Ia IIae q. 100 a. 12

Objection 1. It would seem that the moral precepts of the Old Law justified man. Because the Apostle says (Rom. 2:13): "For not the hearers of the Law are justified before God, but the doers of the Law shall be justified." But the doers of the Law are those who fulfil the precepts of the Law. Therefore the fulfilling of the precepts of the Law was a cause of justification.

Objection 2. Further, it is written (Lev. 18:5): "Keep My laws and My judgments, which if a man do, he shall live in them." But the spiritual life of man is through justice. Therefore the fulfilling of the precepts of the Law was a cause of justification.

Objection 3. Further, the Divine law is more efficacious than human law. But human law justifies man; since there is a kind of justice consisting in fulfilling the precepts of law. Therefore the precepts of the Law justified man.

On the contrary, The Apostle says (2 Cor. 3:6): "The letter killeth": which, according to Augustine (*De Spir. et Lit.* xiv), refers even to the moral precepts. Therefore the moral precepts did not cause justice.

I answer that, Just as "healthy" is said properly and first of that which is possessed of health, and secondarily of that which is a sign or a safeguard of health;

so justification means first and properly the causing of justice; while secondarily and improperly, as it were, it may denote a sign of justice or a disposition thereto. If justice be taken in the last two ways, it is evident that it was conferred by the precepts of the Law; in so far, to wit, as they disposed men to the justifying grace of Christ, which they also signified, because as Augustine says (*Contra Faust.* xxii, 24), “even the life of that people foretold and foreshadowed Christ.”

But if we speak of justification properly so called, then we must notice that it can be considered as in the habit or as in the act: so that accordingly justification may be taken in two ways. First, according as man is made just, by becoming possessed of the habit of justice: secondly, according as he does works of justice, so that in this sense justification is nothing else than the execution of justice. Now justice, like the other virtues, may denote either the acquired or the infused virtue, as is clear from what has been stated (q. 63, a. 4). The acquired virtue is caused by works; but the infused virtue is caused by God Himself through His grace. The latter is true justice, of which we are speaking now, and in this respect of which a man is said to be just before God, according to Rom. 4:2: “If Abraham were justified by works, he hath whereof to glory, but not before God.” Hence this justice could not be caused by moral precepts, which are about human actions: wherefore the moral precepts could not justify man by causing justice.

If, on the other hand, by justification we understand

the execution of justice, thus all the precepts of the Law justified man, but in various ways. Because the ceremonial precepts taken as a whole contained something just in itself, in so far as they aimed at offering worship to God; whereas taken individually they contained that which is just, not in itself, but by being a determination of the Divine law. Hence it is said of these precepts that they did not justify man save through the devotion and obedience of those who complied with them. On the other hand the moral and judicial precepts, either in general or also in particular, contained that which is just in itself: but the moral precepts contained that which is just in itself according to that “general justice” which is “every virtue” according to *Ethic.* v, 1: whereas the judicial precepts belonged to “special justice,” which is about contracts connected with the human mode of life, between one man and another.

Reply to Objection 1. The Apostle takes justification for the execution of justice.

Reply to Objection 2. The man who fulfilled the precepts of the Law is said to live in them, because he did not incur the penalty of death, which the Law inflicted on its transgressors: in this sense the Apostle quotes this passage (*Gal.* 3:12).

Reply to Objection 3. The precepts of human law justify man by acquired justice: it is not about this that we are inquiring now, but only about that justice which is before God.

Objection 1. It would seem that not all the moral precepts belong to the law of nature. For it is written (Ecclus. 17:9): “Moreover He gave them instructions, and the law of life for an inheritance.” But instruction is in contradistinction to the law of nature; since the law of nature is not learnt, but instilled by natural instinct. Therefore not all the moral precepts belong to the natural law.

Objection 2. Further, the Divine law is more perfect than human law. But human law adds certain things concerning good morals, to those that belong to the law of nature: as is evidenced by the fact that the natural law is the same in all men, while these moral institutions are various for various people. Much more reason therefore was there why the Divine law should add to the law of nature, ordinances pertaining to good morals.

Objection 3. Further, just as natural reason leads to good morals in certain matters, so does faith: hence it is written (Gal. 5:6) that faith “worketh by charity.” But faith is not included in the law of nature; since that which is of faith is above nature. Therefore not all the moral precepts of the Divine law belong to the law of nature.

On the contrary, The Apostle says (Rom. 2:14) that “the Gentiles, who have not the Law, do by nature those things that are of the Law”: which must be understood of things pertaining to good morals. Therefore all the moral precepts of the Law belong to the law of nature.

I answer that, The moral precepts, distinct from the ceremonial and judicial precepts, are about things pertaining of their very nature to good morals. Now since human morals depend on their relation to reason, which is the proper principle of human acts, those morals are called good which accord with reason, and those are called bad which are discordant from reason. And as every judgment of speculative reason proceeds from the natural knowledge of first principles, so every judgment of practical reason proceeds from principles known nat-

urally, as stated above (q. 94, Aa. 2,4): from which principles one may proceed in various ways to judge of various matters. For some matters connected with human actions are so evident, that after very little consideration one is able at once to approve or disapprove of them by means of these general first principles: while some matters cannot be the subject of judgment without much consideration of the various circumstances, which all are not competent to do carefully, but only those who are wise: just as it is not possible for all to consider the particular conclusions of sciences, but only for those who are versed in philosophy: and lastly there are some matters of which man cannot judge unless he be helped by Divine instruction; such as the articles of faith.

It is therefore evident that since the moral precepts are about matters which concern good morals; and since good morals are those which are in accord with reason; and since also every judgment of human reason must needs be derived in some way from natural reason; it follows, of necessity, that all the moral precepts belong to the law of nature; but not all in the same way. For there are certain things which the natural reason of every man, of its own accord and at once, judges to be done or not to be done: e.g. “Honor thy father and thy mother;” and “Thou shalt not kill, Thou shalt not steal;” and these belong to the law of nature absolutely. And there are certain things which, after a more careful consideration, wise men deem obligatory. Such belong to the law of nature, yet so that they need to be inculcated, the wiser teaching the less wise: e.g. “Rise up before the hoary head, and honor the person of the aged man;” and the like. And there are some things, to judge of which, human reason needs Divine instruction, whereby we are taught about the things of God: e.g. “Thou shalt not make to thyself a graven thing, nor the likeness of anything; Thou shalt not take the name of the Lord thy God in vain.”

This suffices for the Replies to the Objections.

Objection 1. It would seem that the mode of charity falls under the precept of the Divine law. For it is written (Mat. 19:17): “If thou wilt enter into life, keep the commandments”: whence it seems to follow that the observance of the commandments suffices for entrance into life. But good works do not suffice for entrance into life, except they be done from charity: for it is written (1 Cor. 13:3): “If I should distribute all my goods to feed the poor, and if I should deliver my body to be burned, and have not charity, it profiteth me nothing.” Therefore the mode of charity is included in the commandment.

Objection 2. Further, the mode of charity consists properly speaking in doing all things for God. But this falls under the precept; for the Apostle says (1 Cor. 10:31): “Do all to the glory of God.” Therefore the mode of charity falls under the precept.

Objection 3. Further, if the mode of charity does not fall under the precept, it follows that one can fulfil the precepts of the law without having charity. Now what can be done without charity can be done without grace, which is always united to charity. Therefore one can fulfil the precepts of the law without grace. But this is the error of Pelagius, as Augustine declares (De Haeres. lxxxviii). Therefore the mode of charity is included in the commandment.

On the contrary, Whoever breaks a commandment sins mortally. If therefore the mode of charity falls under the precept, it follows that whoever acts otherwise than from charity sins mortally. But whoever has not charity, acts otherwise than from charity. Therefore it follows that whoever has not charity, sins mortally in whatever he does, however good this may be in itself: which is absurd.

I answer that, Opinions have been contrary on this question. For some have said absolutely that the mode of charity comes under the precept; and yet that it is possible for one not having charity to fulfil this precept: because he can dispose himself to receive charity from God. Nor (say they) does it follow that a man not having charity sins mortally whenever he does something good of its kind: because it is an affirmative precept that binds one to act from charity, and is binding not for all time, but only for such time as one is in a state of charity. On the other hand, some have said that the mode of charity is altogether outside the precept.

Both these opinions are true up to a certain point. Because the act of charity can be considered in two ways. First, as an act by itself: and thus it falls un-

der the precept of the law which specially prescribes it, viz. “Thou shalt love the Lord thy God,” and “Thou shalt love thy neighbor.” In this sense, the first opinion is true. Because it is not impossible to observe this precept which regards the act of charity; since man can dispose himself to possess charity, and when he possesses it, he can use it. Secondly, the act of charity can be considered as being the mode of the acts of the other virtues, i.e. inasmuch as the acts of the other virtues are ordained to charity, which is “the end of the commandment,” as stated in 1 Tim. i, 5: for it has been said above (q. 12, a. 4) that the intention of the end is a formal mode of the act ordained to that end. In this sense the second opinion is true in saying that the mode of charity does not fall under the precept, that is to say that this commandment, “Honor thy father,” does not mean that a man must honor his father from charity, but merely that he must honor him. Wherefore he that honors his father, yet has not charity, does not break this precept: although he does break the precept concerning the act of charity, for which reason he deserves to be punished.

Reply to Objection 1. Our Lord did not say, “If thou wilt enter into life, keep one commandment”; but “keep” all “the commandments”: among which is included the commandment concerning the love of God and our neighbor.

Reply to Objection 2. The precept of charity contains the injunction that God should be loved from our whole heart, which means that all things would be referred to God. Consequently man cannot fulfil the precept of charity, unless he also refer all things to God. Wherefore he that honors his father and mother, is bound to honor them from charity, not in virtue of the precept, “Honor thy father and mother,” but in virtue of the precept, “Thou shalt love the Lord thy God with thy whole heart.” And since these are two affirmative precepts, not binding for all times, they can be binding, each one at a different time: so that it may happen that a man fulfils the precept of honoring his father and mother, without at the same time breaking the precept concerning the omission of the mode of charity.

Reply to Objection 3. Man cannot fulfil all the precepts of the law, unless he fulfil the precept of charity, which is impossible without charity. Consequently it is not possible, as Pelagius maintained, for man to fulfil the law without grace.

Objection 1. It would seem that it is wrong to distinguish other moral precepts of the law besides the decalogue. Because, as Our Lord declared (Mat. 22:40), “on these two commandments” of charity “dependeth the whole law and the prophets.” But these two commandments are explained by the ten commandments of the decalogue. Therefore there is no need for other moral precepts.

Objection 2. Further, the moral precepts are distinct from the judicial and ceremonial precepts, as stated above (q. 99, Aa. 3,4). But the determinations of the general moral precepts belong to the judicial and ceremonial precepts: and the general moral precepts are contained in the decalogue, or are even presupposed to the decalogue, as stated above (a. 3). Therefore it was unsuitable to lay down other moral precepts besides the decalogue.

Objection 3. Further, the moral precepts are about the acts of all the virtues, as stated above (a. 2). Therefore, as the Law contains, besides the decalogue, moral precepts pertaining to religion, liberality, mercy, and chastity; so there should have been added some precepts pertaining to the other virtues, for instance, fortitude, sobriety, and so forth. And yet such is not the case. It is therefore unbecoming to distinguish other moral precepts in the Law besides those of the decalogue.

On the contrary, It is written (Ps. 18:8): “The law of the Lord is unspotted, converting souls.” But man is preserved from the stain of sin, and his soul is converted to God by other moral precepts besides those of the decalogue. Therefore it was right for the Law to include other moral precepts.

I answer that, As is evident from what has been stated (q. 99, Aa. 3,4), the judicial and ceremonial precepts derive their force from their institution alone: since before they were instituted, it seemed of no consequence whether things were done in this or that way. But the moral precepts derive their efficacy from the very dictate of natural reason, even if they were never included in the Law. Now of these there are three grades: for some are most certain, and so evident as to need no promulgation; such as the commandments of the love of God and our neighbor, and others like these, as stated above (a. 3), which are, as it were, the ends of the commandments; wherefore no man can have an erroneous judgment about them. Some precepts are more detailed, the reason of which even an uneducated man can easily grasp; and yet they need to be promulgated, because human judgment, in a few instances, happens to be led astray concerning them: these are the precepts of the decalogue. Again, there are some precepts the reason of which is not so evident to everyone, but only the wise; these are moral precepts added to the decalogue, and given to the people by God through Moses and Aaron.

But since the things that are evident are the principles whereby we know those that are not evident, these other moral precepts added to the decalogue are reducible to the precepts of the decalogue, as so many corollaries. Thus the first commandment of the decalogue forbids the worship of strange gods: and to this are added other precepts forbidding things relating to worship of idols: thus it is written (Dt. 18:10,11): “Neither let there be found among you anyone that shall expiate his son or daughter, making them to pass through the fire: . . . neither let there be by any wizard nor charmer, nor anyone that consulteth pythonic spirits, or fortune-tellers, or that seeketh the truth from the dead.” The second commandment forbids perjury. To this is added the prohibition of blasphemy (Lev. 24:15, seqq) and the prohibition of false doctrine (Dt. 13). To the third commandment are added all the ceremonial precepts. To the fourth commandment prescribing the honor due to parents, is added the precept about honoring the aged, according to Lev. 19:32: “Rise up before the hoary head, and honor the person of the aged man”; and likewise all the precepts prescribing the reverence to be observed towards our betters, or kindness towards our equals or inferiors. To the fifth commandment, which forbids murder, is added the prohibition of hatred and of any kind of violence inflicted on our neighbor, according to Lev. 19:16: “Thou shalt not stand against the blood of thy neighbor”: likewise the prohibition against hating one’s brother (Lev. 19:17): “Thou shalt not hate thy brother in thy heart.” To the sixth commandment which forbids adultery, is added the prohibition about whoredom, according to Dt. 23:17: “There shall be no whore among the daughters of Israel, nor whoremonger among the sons of Israel”; and the prohibition against unnatural sins, according to Lev. 28:22,23: “Thou shalt not lie with mankind. . . thou shalt not copulate with any beast.” To the seventh commandment which prohibits theft, is added the precept forbidding usury, according to Dt. 23:19: “Thou shalt not lend to thy brother money to usury”; and the prohibition against fraud, according to Dt. 25:13: “Thou shalt not have divers weights in thy bag”; and universally all prohibitions relating to peculations and larceny. To the eighth commandment, forbidding false testimony, is added the prohibition against false judgment, according to Ex. 23:2: “Neither shalt thou yield in judgment, to the opinion of the most part, to stray from the truth”; and the prohibition against lying (Ex. 23:7): “Thou shalt fly lying,” and the prohibition against detraction, according to Lev. 19:16: “Thou shalt not be a detractor, nor a whisperer among the people.” To the other two commandments no further precepts are added, because thereby are forbidden all kinds of evil desires.

Reply to Objection 1. The precepts of the decalogue are ordained to the love of God and our neighbor

as pertaining evidently to our duty towards them; but the other precepts are so ordained as pertaining thereto less evidently.

Reply to Objection 2. It is in virtue of their institution that the ceremonial and judicial precepts “are determinations of the precepts of the decalogue,” not by reason of a natural instinct, as in the case of the super-added moral precepts.

Reply to Objection 3. The precepts of a law are ordained for the common good, as stated above (q. 90, a. 2). And since those virtues which direct our conduct towards others pertain directly to the common good, as also does the virtue of chastity, in so far as the genera-

tive act conduces to the common good of the species; hence precepts bearing directly on these virtues are given, both in the decalogue and in addition thereto. As to the act of fortitude there are the order to be given by the commanders in the war, which is undertaken for the common good: as is clear from Dt. 20:3, where the priest is commanded (to speak thus): “Be not afraid, do not give back.” In like manner the prohibition of acts of gluttony is left to paternal admonition, since it is contrary to the good of the household; hence it is said (Dt. 21:20) in the person of parents: “He slighteth hearing our admonitions, he giveth himself to revelling, and to debauchery and banquetings.”

Objection 1. It would seem that the moral precepts of the Old Law justified man. Because the Apostle says (Rom. 2:13): “For not the hearers of the Law are justified before God, but the doers of the Law shall be justified.” But the doers of the Law are those who fulfil the precepts of the Law. Therefore the fulfilling of the precepts of the Law was a cause of justification.

Objection 2. Further, it is written (Lev. 18:5): “Keep My laws and My judgments, which if a man do, he shall live in them.” But the spiritual life of man is through justice. Therefore the fulfilling of the precepts of the Law was a cause of justification.

Objection 3. Further, the Divine law is more efficacious than human law. But human law justifies man; since there is a kind of justice consisting in fulfilling the precepts of law. Therefore the precepts of the Law justified man.

On the contrary, The Apostle says (2 Cor. 3:6): “The letter killeth”: which, according to Augustine (*De Spir. et Lit.* xiv), refers even to the moral precepts. Therefore the moral precepts did not cause justice.

I answer that, Just as “healthy” is said properly and first of that which is possessed of health, and secondarily of that which is a sign or a safeguard of health; so justification means first and properly the causing of justice; while secondarily and improperly, as it were, it may denote a sign of justice or a disposition thereto. If justice be taken in the last two ways, it is evident that it was conferred by the precepts of the Law; in so far, to wit, as they disposed men to the justifying grace of Christ, which they also signified, because as Augustine says (*Contra Faust.* xxii, 24), “even the life of that people foretold and foreshadowed Christ.”

But if we speak of justification properly so called, then we must notice that it can be considered as in the habit or as in the act: so that accordingly justification may be taken in two ways. First, according as man is made just, by becoming possessed of the habit of justice: secondly, according as he does works of justice, so that in this sense justification is nothing else than the execution of justice. Now justice, like the other virtues,

may denote either the acquired or the infused virtue, as is clear from what has been stated (q. 63, a. 4). The acquired virtue is caused by works; but the infused virtue is caused by God Himself through His grace. The latter is true justice, of which we are speaking now, and in this respect of which a man is said to be just before God, according to Rom. 4:2: “If Abraham were justified by works, he hath whereof to glory, but not before God.” Hence this justice could not be caused by moral precepts, which are about human actions: wherefore the moral precepts could not justify man by causing justice.

If, on the other hand, by justification we understand the execution of justice, thus all the precepts of the Law justified man, but in various ways. Because the ceremonial precepts taken as a whole contained something just in itself, in so far as they aimed at offering worship to God; whereas taken individually they contained that which is just, not in itself, but by being a determination of the Divine law. Hence it is said of these precepts that they did not justify man save through the devotion and obedience of those who complied with them. On the other hand the moral and judicial precepts, either in general or also in particular, contained that which is just in itself: but the moral precepts contained that which is just in itself according to that “general justice” which is “every virtue” according to *Ethic.* v, 1: whereas the judicial precepts belonged to “special justice,” which is about contracts connected with the human mode of life, between one man and another.

Reply to Objection 1. The Apostle takes justification for the execution of justice.

Reply to Objection 2. The man who fulfilled the precepts of the Law is said to live in them, because he did not incur the penalty of death, which the Law inflicted on its transgressors: in this sense the Apostle quotes this passage (*Gal.* 3:12).

Reply to Objection 3. The precepts of human law justify man by acquired justice: it is not about this that we are inquiring now, but only about that justice which is before God.

Objection 1. It would seem that the moral precepts of the Law are not about all the acts of virtue. For observance of the precepts of the Old Law is called justification, according to Ps. 118:8: "I will keep Thy justifications." But justification is the execution of justice. Therefore the moral precepts are only about acts of justice.

Objection 2. Further, that which comes under a precept has the character of a duty. But the character of duty belongs to justice alone and to none of the other virtues, for the proper act of justice consists in rendering to each one his due. Therefore the precepts of the moral law are not about the acts of the other virtues, but only about the acts of justice.

Objection 3. Further, every law is made for the common good, as Isidore says (Etym. v, 21). But of all the virtues justice alone regards the common good, as the Philosopher says (Ethic. v, 1). Therefore the moral precepts are only about the acts of justice.

On the contrary, Ambrose says (De Paradiso viii) that "a sin is a transgression of the Divine law, and a disobedience to the commandments of heaven." But there are sins contrary to all the acts of virtue. Therefore it belongs to Divine law to direct all the acts of virtue.

I answer that, Since the precepts of the Law are ordained to the common good, as stated above (q. 90, a. 2), the precepts of the Law must needs be diversified according to the various kinds of community: hence the Philosopher (Polit. iv, 1) teaches that the laws which are made in a state which is ruled by a king must be different from the laws of a state which is ruled by the people, or by a few powerful men in the state. Now human law is ordained for one kind of community, and the Divine law for another kind. Because human law is ordained for the civil community, implying mutual duties of man and his fellows: and men are ordained to one another by outward acts, whereby men live in communion with one another. This life in common of man with man pertains to justice, whose proper function consists in directing

the human community. Wherefore human law makes precepts only about acts of justice; and if it commands acts of other virtues, this is only in so far as they assume the nature of justice, as the Philosopher explains (Ethic. v, 1).

But the community for which the Divine law is ordained, is that of men in relation to God, either in this life or in the life to come. And therefore the Divine law proposes precepts about all those matters whereby men are well ordered in their relations to God. Now man is united to God by his reason or mind, in which is God's image. Wherefore the Divine law proposes precepts about all those matters whereby human reason is well ordered. But this is effected by the acts of all the virtues: since the intellectual virtues set in good order the acts of the reason in themselves: while the moral virtues set in good order the acts of the reason in reference to the interior passions and exterior actions. It is therefore evident that the Divine law fittingly proposes precepts about the acts of all the virtues: yet so that certain matters, without which the order of virtue, which is the order of reason, cannot even exist, come under an obligation of precept; while other matters, which pertain to the well-being of perfect virtue, come under an admonition of counsel.

Reply to Objection 1. The fulfilment of the commandments of the Law, even of those which are about the acts of the other virtues, has the character of justification, inasmuch as it is just that man should obey God: or again, inasmuch as it is just that all that belongs to man should be subject to reason.

Reply to Objection 2. Justice properly so called regards the duty of one man to another: but all the other virtues regard the duty of the lower powers to reason. It is in relation to this latter duty that the Philosopher speaks (Ethic. v, 11) of a kind of metaphorical justice.

The Reply to the Third Objection is clear from what has been said about the different kinds of community.

Objection 1. It would seem that not all the moral precepts of the Old Law are reducible to the ten precepts of the decalogue. For the first and principal precepts of the Law are, “Thou shalt love the Lord thy God,” and “Thou shalt love thy neighbor,” as stated in Mat. 22:37,39. But these two are not contained in the precepts of the decalogue. Therefore not all the moral precepts are contained in the precepts of the decalogue.

Objection 2. Further, the moral precepts are not reducible to the ceremonial precepts, but rather vice versa. But among the precepts of the decalogue, one is ceremonial, viz. “Remember that thou keep holy the Sabbath-day.” Therefore the moral precepts are not reducible to all the precepts of the decalogue.

Objection 3. Further, the moral precepts are about all the acts of virtue. But among the precepts of the decalogue are only such as regard acts of justice; as may be seen by going through them all. Therefore the precepts of the decalogue do not include all the moral precepts.

On the contrary, The gloss on Mat. 5:11: “Blessed are ye when they shall revile you,” etc. says that “Moses, after propounding the ten precepts, set them out in detail.” Therefore all the precepts of the Law are so many parts of the precepts of the decalogue.

I answer that, The precepts of the decalogue differ from the other precepts of the Law, in the fact that God Himself is said to have given the precepts of the decalogue; whereas He gave the other precepts to the people through Moses. Wherefore the decalogue includes those precepts the knowledge of which man has immediately from God. Such are those which with but slight reflection can be gathered at once from the first general principles: and those also which become known to man immediately through divinely infused faith. Con-

sequently two kinds of precepts are not reckoned among the precepts of the decalogue: viz. first general principles, for they need no further promulgation after being once imprinted on the natural reason to which they are self-evident; as, for instance, that one should do evil to no man, and other similar principles: and again those which the careful reflection of wise men shows to be in accord with reason; since the people receive these principles from God, through being taught by wise men. Nevertheless both kinds of precepts are contained in the precepts of the decalogue; yet in different ways. For the first general principles are contained in them, as principles in their proximate conclusions; while those which are known through wise men are contained, conversely, as conclusions in their principles.

Reply to Objection 1. Those two principles are the first general principles of the natural law, and are self-evident to human reason, either through nature or through faith. Wherefore all the precepts of the decalogue are referred to these, as conclusions to general principles.

Reply to Objection 2. The precept of the Sabbath observance is moral in one respect, in so far as it commands man to give some time to the things of God, according to Ps. 45:11: “Be still and see that I am God.” In this respect it is placed among the precepts of the decalogue: but not as to the fixing of the time, in which respect it is a ceremonial precept.

Reply to Objection 3. The notion of duty is not so patent in the other virtues as it is in justice. Hence the precepts about the acts of the other virtues are not so well known to the people as are the precepts about acts of justice. Wherefore the acts of justice especially come under the precepts of the decalogue, which are the primary elements of the Law.

Objection 1. It would seem that the precepts of the decalogue are unsuitably distinguished from one another. For worship is a virtue distinct from faith. Now the precepts are about acts of virtue. But that which is said at the beginning of the decalogue, “Thou shalt not have strange gods before Me,” belongs to faith: and that which is added, “Thou shalt not make . . . any graven thing,” etc. belongs to worship. Therefore these are not one precept, as Augustine asserts (Qq. in Exod. qu. lxxi), but two.

Objection 2. Further, the affirmative precepts in the Law are distinct from the negative precepts; e.g. “Honor thy father and thy mother,” and, “Thou shalt not kill.” But this, “I am the Lord thy God,” is affirmative: and that which follows, “Thou shalt not have strange gods before Me,” is negative. Therefore these are two precepts, and do not, as Augustine says (Qq. in Exod. qu. lxxi), make one.

Objection 3. Further, the Apostle says (Rom. 7:7): “I had not known concupiscence, if the Law did not say: ‘Thou shalt not covet.’” Hence it seems that this precept, “Thou shalt not covet,” is one precept; and, therefore, should not be divided into two.

On the contrary, stands the authority of Augustine who, in commenting on Exodus (Qq. in Exod. qu. lxxi) distinguishes three precepts as referring to God, and seven as referring to our neighbor.

I answer that, The precepts of the decalogue are differently divided by different authorities. For Hesy-chius commenting on Lev. 26:26, “Ten women shall bake your bread in one oven,” says that the precept of the Sabbath-day observance is not one of the ten precepts, because its observance, in the letter, is not binding for all time. But he distinguishes four precepts pertaining to God, the first being, “I am the Lord thy God”; the second, “Thou shalt not have strange gods before Me,” (thus also Jerome distinguishes these two precepts, in his commentary on Osee 10:10, “On thy” [Vulg.: “their”] “two iniquities”); the third precept according to him is, “Thou shalt not make to thyself any graven thing”; and the fourth, “Thou shalt not take the name of the Lord thy God in vain.” He states that there are six precepts pertaining to our neighbor; the first, “Honor thy father and thy mother”; the second, “Thou shalt not kill”; the third, “Thou shalt not commit adultery”; the fourth, “Thou shalt not steal”; the fifth, “Thou shalt not bear false witness”; the sixth, “Thou shalt not covet.”

But, in the first place, it seems unbecoming for the precept of the Sabbath-day observance to be put among the precepts of the decalogue, if it nowise belonged to the decalogue. Secondly, because, since it is written (Mat. 6:24), “No man can serve two masters,” the two statements, “I am the Lord thy God,” and, “Thou shalt not have strange gods before Me” seem to be of the same nature and to form one precept. Hence Origen (Hom. viii in Exod.) who also distinguishes four pre-

cepts as referring to God, unites these two under one precept; and reckons in the second place, “Thou shalt not make . . . any graven thing”; as third, “Thou shalt not take the name of the Lord thy God in vain”; and as fourth, “Remember that thou keep holy the Sabbath-day.” The other six he reckons in the same way as Hesy-chius.

Since, however, the making of graven things or the likeness of anything is not forbidden except as to the point of their being worshipped as gods—for God commanded an image of the Seraphim [Vulg.: Cherubim] to be made and placed in the tabernacle, as related in Ex. 25:18—Augustine more fittingly unites these two, “Thou shalt not have strange gods before Me,” and, “Thou shalt not make . . . any graven thing,” into one precept. Likewise to covet another’s wife, for the purpose of carnal knowledge, belongs to the concupiscence of the flesh; whereas, to covet other things, which are desired for the purpose of possession, belongs to the concupiscence of the eyes; wherefore Augustine reckons as distinct precepts, that which forbids the coveting of another’s goods, and that which prohibits the coveting of another’s wife. Thus he distinguishes three precepts as referring to God, and seven as referring to our neighbor. And this is better.

Reply to Objection 1. Worship is merely a declaration of faith: wherefore the precepts about worship should not be reckoned as distinct from those about faith. Nevertheless precepts should be given about worship rather than about faith, because the precept about faith is presupposed to the precepts of the decalogue, as is also the precept of charity. For just as the first general principles of the natural law are self-evident to a subject having natural reason, and need no promulgation; so also to believe in God is a first and self-evident principle to a subject possessed of faith: “for he that cometh to God, must believe that He is” (Heb. 11:6). Hence it needs no other promulgation that the infusion of faith.

Reply to Objection 2. The affirmative precepts are distinct from the negative, when one is not comprised in the other: thus that man should honor his parents does not include that he should not kill another man; nor does the latter include the former. But when an affirmative precept is included in a negative, or vice versa, we do not find that two distinct precepts are given: thus there is not one precept saying that “Thou shalt not steal,” and another binding one to keep another’s property intact, or to give it back to its owner. In the same way there are not different precepts about believing in God, and about not believing in strange gods.

Reply to Objection 3. All covetousness has one common ratio: and therefore the Apostle speaks of the commandment about covetousness as though it were one. But because there are various special kinds of covetousness, therefore Augustine distinguishes different prohibitions against coveting: for covetousness dif-

fers specifically in respect of the diversity of actions or things coveted, as the Philosopher says (Ethic. x, 5).

Objection 1. It would seem that the precepts of the decalogue are unsuitably set forth. Because sin, as stated by Ambrose (*De Paradiso viii*), is “a transgression of the Divine law and a disobedience to the commandments of heaven.” But sins are distinguished according as man sins against God, or his neighbor, or himself. Since, then, the decalogue does not include any precepts directing man in his relations to himself, but only such as direct him in his relations to God and himself, it seems that the precepts of the decalogue are insufficiently enumerated.

Objection 2. Further, just as the Sabbath-day observance pertained to the worship of God, so also did the observance of other solemnities, and the offering of sacrifices. But the decalogue contains a precept about the Sabbath-day observance. Therefore it should contain others also, pertaining to the other solemnities, and to the sacrificial rite.

Objection 3. Further, as sins against God include the sin of perjury, so also do they include blasphemy, or other ways of lying against the teaching of God. But there is a precept forbidding perjury, “Thou shalt not take the name of the Lord thy God in vain.” Therefore there should be also a precept of the decalogue forbidding blasphemy and false doctrine.

Objection 4. Further, just as man has a natural affection for his parents, so has he also for his children. Moreover the commandment of charity extends to all our neighbors. Now the precepts of the decalogue are ordained unto charity, according to 1 Tim. 1:5: “The end of the commandment is charity.” Therefore as there is a precept referring to parents, so should there have been some precepts referring to children and other neighbors.

Objection 5. Further, in every kind of sin, it is possible to sin in thought or in deed. But in some kinds of sin, namely in theft and adultery, the prohibition of sins of deed, when it is said, “Thou shalt not commit adultery, Thou shalt not steal,” is distinct from the prohibition of the sin of thought, when it is said, “Thou shalt not covet thy neighbor’s goods,” and, “Thou shalt not covet thy neighbor’s wife.” Therefore the same should have been done in regard to the sins of homicide and false witness.

Objection 6. Further, just as sin happens through disorder of the concupiscible faculty, so does it arise through disorder of the irascible part. But some precepts forbid inordinate concupiscence, when it is said, “Thou shalt not covet.” Therefore the decalogue should have included some precepts forbidding the disorders of the irascible faculty. Therefore it seems that the ten precepts of the decalogue are unfittingly enumerated.

On the contrary, It is written (*Dt. 4:13*): “He shewed you His covenant, which He commanded you to do, and the ten words that He wrote in two tablets of stone.”

I answer that, As stated above (a. 2), just as the precepts of human law direct man in his relations to the human community, so the precepts of the Divine law direct man in his relations to a community or commonwealth of men under God. Now in order that any man may dwell aright in a community, two things are required: the first is that he behave well to the head of the community; the other is that he behave well to those who are his fellows and partners in the community. It is therefore necessary that the Divine law should contain in the first place precepts ordering man in his relations to God; and in the second place, other precepts ordering man in his relations to other men who are his neighbors and live with him under God.

Now man owes three things to the head of the community: first, fidelity; secondly, reverence; thirdly, service. Fidelity to his master consists in his not giving sovereign honor to another: and this is the sense of the first commandment, in the words “Thou shalt not have strange gods.” Reverence to his master requires that he should do nothing injurious to him: and this is conveyed by the second commandment, “Thou shalt not take the name of the Lord thy God in vain.” Service is due to the master in return for the benefits which his subjects receive from him: and to this belongs the third commandment of the sanctification of the Sabbath in memory of the creation of all things.

To his neighbors a man behaves himself well both in particular and in general. In particular, as to those to whom he is indebted, by paying his debts: and in this sense is to be taken the commandment about honoring one’s parents. In general, as to all men, by doing harm to none, either by deed, or by word, or by thought. By deed, harm is done to one’s neighbor—sometimes in his person, i.e. as to his personal existence; and this is forbidden by the words, “Thou shalt not kill”: sometimes in a person united to him, as to the propagation of offspring; and this is prohibited by the words, “Thou shalt not commit adultery”: sometimes in his possessions, which are directed to both the aforesaid; and with this regard to this it is said, “Thou shalt not steal.” Harm done by word is forbidden when it is said, “Thou shalt not bear false witness against thy neighbor”: harm done by thought is forbidden in the words, “Thou shalt not covet.”

The three precepts that direct man in his behavior towards God may also be differentiated in this same way. For the first refers to deeds; wherefore it is said, “Thou shalt not make . . . a graven thing”: the second, to words; wherefore it is said, “Thou shalt not take the name of the Lord thy God in vain”: the third, to thoughts; because the sanctification of the Sabbath, as the subject of a moral precept, requires repose of the heart in God. Or, according to Augustine (*In Ps. 32: Conc. 1*), by the first commandment we reverence the unity of the First Principle; by the second, the Divine truth; by the third,

His goodness whereby we are sanctified, and wherein we rest as in our last end.

Reply to Objection 1. This objection may be answered in two ways. First, because the precepts of the decalogue can be reduced to the precepts of charity. Now there was need for man to receive a precept about loving God and his neighbor, because in this respect the natural law had become obscured on account of sin: but not about the duty of loving oneself, because in this respect the natural law retained its vigor: or again, because love of oneself is contained in the love of God and of one's neighbor: since true self-love consists in directing oneself to God. And for this reason the decalogue includes those precepts only which refer to our neighbor and to God.

Secondly, it may be answered that the precepts of the decalogue are those which the people received from God immediately; wherefore it is written (Dt. 10:4): "He wrote in the tables, according as He had written before, the ten words, which the Lord spoke to you." Hence the precepts of the decalogue need to be such as the people can understand at once. Now a precept implies the notion of duty. But it is easy for a man, especially for a believer, to understand that, of necessity, he owes certain duties to God and to his neighbor. But that, in matters which regard himself and not another, man has, of necessity, certain duties to himself, is not so evident: for, at the first glance, it seems that everyone is free in matters that concern himself. And therefore the precepts which prohibit disorders of a man with regard to himself, reach the people through the instruction of men who are versed through the instruction of men who are versed in such matters; and, consequently, they are not contained in the decalogue.

Reply to Objection 2. All the solemnities of the Old Law were instituted in celebration of some Divine favor, either in memory of past favors, or in sign of some favor to come: in like manner all the sacrifices were offered up with the same purpose. Now of all the Divine favors to be commemorated the chief was that of the Creation, which was called to mind by the sanctification of the Sabbath; wherefore the reason for this precept is given in Ex. 20:11: "In six days the Lord made heaven and earth," etc. And of all future blessings, the chief and final was the repose of the mind in God, either, in the present life, by grace, or, in the future life, by glory; which repose was also foreshadowed in the Sabbath-day observance: wherefore it is written (Is. 58:13): "If thou turn away thy foot from the Sabbath, from doing thy own will in My holy day, and call the Sabbath delightful, and the holy of the Lord glorious." Because these favors first and chiefly are borne in mind by men, especially by the faithful. But other solemnities were celebrated on account of certain particular

favors temporal and transitory, such as the celebration of the Passover in memory of the past favor of the delivery from Egypt, and as a sign of the future Passion of Christ, which though temporal and transitory, brought us to the repose of the spiritual Sabbath. Consequently, the Sabbath alone, and none of the other solemnities and sacrifices, is mentioned in the precepts of the decalogue.

Reply to Objection 3. As the Apostle says (Heb. 6:16), "men swear by one greater than themselves; and an oath for confirmation is the end of all their controversy." Hence, since oaths are common to all, inordinate swearing is the matter of a special prohibition by a precept of the decalogue. According to one interpretation, however, the words, "Thou shalt not take the name of the Lord thy God in vain," are a prohibition of false doctrine, for one gloss expounds them thus: "Thou shalt not say that Christ is a creature."

Reply to Objection 4. That a man should not do harm to anyone is an immediate dictate of his natural reason: and therefore the precepts that forbid the doing of harm are binding on all men. But it is not an immediate dictate of natural reason that a man should do one thing in return for another, unless he happen to be indebted to someone. Now a son's debt to his father is so evident that one cannot get away from it by denying it: since the father is the principle of generation and being, and also of upbringing and teaching. Wherefore the decalogue does not prescribe deeds of kindness or service to be done to anyone except to one's parents. On the other hand parents do not seem to be indebted to their children for any favors received, but rather the reverse is the case. Again, a child is a part of his father; and "parents love their children as being a part of themselves," as the Philosopher states (Ethic. viii, 12). Hence, just as the decalogue contains no ordinance as to man's behavior towards himself, so, for the same reason, it includes no precept about loving one's children.

Reply to Objection 5. The pleasure of adultery and the usefulness of wealth, in so far as they have the character of pleasurable or useful good, are of themselves, objects of appetite: and for this reason they needed to be forbidden not only in the deed but also in the desire. But murder and falsehood are, of themselves, objects of repulsion (since it is natural for man to love his neighbor and the truth): and are desired only for the sake of something else. Consequently with regard to sins of murder and false witness, it was necessary to proscribe, not sins of thought, but only sins of deed.

Reply to Objection 6. As stated above (q. 25, a. 1), all the passions of the irascible faculty arise from the passions of the concupiscible part. Hence, as the precepts of the decalogue are, as it were, the first elements of the Law, there was no need for mention of the irascible passions, but only of the concupiscible passions.

Objection 1. It would seem that the ten precepts of the decalogue are not set in proper order. Because love of one's neighbor is seemingly previous to love of God, since our neighbor is better known to us than God is; according to 1 Jn. 4:20: "He that loveth not his brother, whom he seeth, how can he love God, Whom he seeth not?" But the first three precepts belong to the love of God, while the other seven pertain to the love of our neighbor. Therefore the precepts of the decalogue are not set in proper order.

Objection 2. Further, the acts of virtue are prescribed by the affirmative precepts, and acts of vice are forbidden by the negative precepts. But according to Boethius in his commentary on the *Categories**, vices should be uprooted before virtues are sown. Therefore among the precepts concerning our neighbor, the negative precepts should have preceded the affirmative.

Objection 3. Further, the precepts of the Law are about men's actions. But actions of thought precede actions of word or outward deed. Therefore the precepts about not coveting, which regard our thoughts, are unsuitably placed last in order.

On the contrary, The Apostle says (Rom. 13:1): "The things that are of God, are well ordered" [Vulg.: "Those that are, are ordained of God"]. But the precepts of the decalogue were given immediately by God, as stated above (a. 3). Therefore they are arranged in becoming order.

I answer that, As stated above (Aa. 3,5, ad 1), the precepts of the decalogue are such as the mind of man is ready to grasp at once. Now it is evident that a thing is so much the more easily grasped by the reason, as its contrary is more grievous and repugnant to reason. Moreover, it is clear, since the order of reason begins with the end, that, for a man to be inordinately disposed towards his end, is supremely contrary to reason. Now the end of human life and society is God. Consequently it was necessary for the precepts of the decalogue, first of all, to direct man to God; since the contrary to this is most grievous. Thus also, in an army, which is ordained to the commander as to its end, it is requisite first that the soldier should be subject to the commander, and the opposite of this is most grievous; and secondly it is requisite that he should be in coordination with the other soldiers.

Now among those things whereby we are ordained to God, the first is that man should be subjected to Him faithfully, by having nothing in common with His enemies. The second is that he should show Him reverence:

the third that he should offer Him service. Thus, in an army, it is a greater sin for a soldier to act treacherously and make a compact with the foe, than to be insolent to his commander: and this last is more grievous than if he be found wanting in some point of service to him.

As to the precepts that direct man in his behavior towards his neighbor, it is evident that it is more repugnant to reason, and a more grievous sin, if man does not observe the due order as to those persons to whom he is most indebted. Consequently, among those precepts that direct man in his relations to his neighbor, the first place is given to that one which regards his parents. Among the other precepts we again find the order to be according to the gravity of sin. For it is more grave and more repugnant to reason, to sin by deed than by word; and by word than by thought. And among sins of deed, murder which destroys life in one already living is more grievous than adultery, which imperils the life of the unborn child; and adultery is more grave than theft, which regards external goods.

Reply to Objection 1. Although our neighbor is better known than God by the way of the senses, nevertheless the love of God is the reason for the love of our neighbor, as shall be declared later on (IIa IIae, q. 25, a. 1; IIa IIae, q. 26, a. 2). Hence the precepts ordaining man to God demanded precedence of the others.

Reply to Objection 2. Just as God is the universal principle of being in respect of all things, so is a father a principle of being in respect of his son. Therefore the precept regarding parents was fittingly placed after the precepts regarding God. This argument holds in respect of affirmative and negative precepts about the same kind of deed: although even then it is not altogether cogent. For although in the order of execution, vices should be uprooted before virtues are sown, according to Ps. 33:15: "Turn away from evil, and do good," and Is. 1:16,17: "Cease to do perversely; learn to do well"; yet, in the order of knowledge, virtue precedes vice, because "the crooked line is known by the straight" (*De Anima* i): and "by the law is the knowledge of sin" (Rom. 3:20). Wherefore the affirmation precept demanded the first place. However, this is not the reason for the order, but that which is given above. Because in the precepts regarding God, which belongs to the first table, an affirmative precept is placed last, since its transgression implies a less grievous sin.

Reply to Objection 3. Although sin of thought stands first in the order of execution, yet its prohibition holds a later position in the order of reason.

* Lib. iv, cap. De Oppos.

Objection 1. It would seem that the precepts of the decalogue are unsuitably formulated. Because the affirmative precepts direct man to acts of virtue, while the negative precepts withdraw him from acts of vice. But in every matter there are virtues and vices opposed to one another. Therefore in whatever matter there is an ordinance of a precept of the decalogue, there should have been an affirmative and a negative precept. Therefore it was unfitting that affirmative precepts should be framed in some matters, and negative precepts in others.

Objection 2. Further, Isidore says (Ety. ii, 10) that every law is based on reason. But all the precepts of the decalogue belong to the Divine law. Therefore the reason should have been pointed out in each precept, and not only in the first and third.

Objection 3. Further, by observing the precepts man deserves to be rewarded by God. But the Divine promises concern the rewards of the precepts. Therefore the promise should have been included in each precept, and not only in the second and fourth.

Objection 4. Further, the Old Law is called “the law of fear,” in so far as it induced men to observe the precepts, by means of the threat of punishments. But all the precepts of the decalogue belong to the Old Law. Therefore a threat of punishment should have been included in each, and not only in the first and second.

Objection 5. Further, all the commandments of God should be retained in the memory: for it is written (Prov. 3:3): “Write them in the tables of thy heart.” Therefore it was not fitting that mention of the memory should be made in the third commandment only. Consequently it seems that the precepts of the decalogue are unsuitably formulated.

On the contrary, It is written (Wis. 11:21) that “God made all things, in measure, number and weight.” Much more therefore did He observe a suitable manner in formulating His Law.

I answer that, The highest wisdom is contained in the precepts of the Divine law: wherefore it is written (Dt. 4:6): “This is your wisdom and understanding in the sight of nations.” Now it belongs to wisdom to arrange all things in due manner and order. Therefore it must be evident that the precepts of the Law are suitably set forth.

Reply to Objection 1. Affirmation of one thing always leads to the denial of its opposite: but the denial of one opposite does not always lead to the affirmation of the other. For it follows that if a thing is white, it is not black: but it does not follow that if it is not black, it is white: because negation extends further than affir-

mation. And hence too, that one ought not to do harm to another, which pertains to the negative precepts, extends to more persons, as a primary dictate of reason, than that one ought to do someone a service or kindness. Nevertheless it is a primary dictate of reason that man is a debtor in the point of rendering a service or kindness to those from whom he has received kindness, if he has not yet repaid the debt. Now there are two whose favors no man can sufficiently repay, viz. God and man’s father, as stated in Ethic. viii, 14. Therefore it is that there are only two affirmative precepts; one about the honor due to parents, the other about the celebration of the Sabbath in memory of the Divine favor.

Reply to Objection 2. The reasons for the purely moral precepts are manifest; hence there was no need to add the reason. But some of the precepts include ceremonial matter, or a determination of a general moral precept; thus the first precept includes the determination, “Thou shalt not make a graven thing”; and in the third precept the Sabbath-day is fixed. Consequently there was need to state the reason in each case.

Reply to Objection 3. Generally speaking, men direct their actions to some point of utility. Consequently in those precepts in which it seemed that there would be no useful result, or that some utility might be hindered, it was necessary to add a promise of reward. And since parents are already on the way to depart from us, no benefit is expected from them: wherefore a promise of reward is added to the precept about honoring one’s parents. The same applies to the precept forbidding idolatry: since thereby it seemed that men were hindered from receiving the apparent benefit which they think they can get by entering into a compact with the demons.

Reply to Objection 4. Punishments are necessary against those who are prone to evil, as stated in Ethic. x, 9. Wherefore a threat of punishment is only affixed to those precepts of the law which forbade evils to which men were prone. Now men were prone to idolatry by reason of the general custom of the nations. Likewise men are prone to perjury on account of the frequent use of oaths. Hence it is that a threat is affixed to the first two precepts.

Reply to Objection 5. The commandment about the Sabbath was made in memory of a past blessing. Wherefore special mention of the memory is made therein. Or again, the commandment about the Sabbath has a determination affixed to it that does not belong to the natural law, wherefore this precept needed a special admonition.

Objection 1. It would seem that the precepts of the decalogue are dispensable. For the precepts of the decalogue belong to the natural law. But the natural law fails in some cases and is changeable, like human nature, as the Philosopher says (*Ethic.* v, 7). Now the failure of law to apply in certain particular cases is a reason for dispensation, as stated above (q. 96, a. 6; q. 97, a. 4). Therefore a dispensation can be granted in the precepts of the decalogue.

Objection 2. Further, man stands in the same relation to human law as God does to Divine law. But man can dispense with the precepts of a law made by man. Therefore, since the precepts of the decalogue are ordained by God, it seems that God can dispense with them. Now our superiors are God's viceregents on earth; for the Apostle says (2 Cor. 2:10): "For what I have pardoned, if I have pardoned anything, for your sakes have I done it in the person of Christ." Therefore superiors can dispense with the precepts of the decalogue.

Objection 3. Further, among the precepts of the decalogue is one forbidding murder. But it seems that a dispensation is given by men in this precept: for instance, when according to the prescription of human law, such as evil-doers or enemies are lawfully slain. Therefore the precepts of the decalogue are dispensable.

Objection 4. Further, the observance of the Sabbath is ordained by a precept of the decalogue. But a dispensation was granted in this precept; for it is written (1 Macc. 2:4): "And they determined in that day, saying: Whosoever shall come up to fight against us on the Sabbath-day, we will fight against him." Therefore the precepts of the decalogue are dispensable.

On the contrary, are the words of Is. 24:5, where some are reprov'd for that "they have changed the ordinance, they have broken the everlasting covenant"; which, seemingly, apply principally to the precepts of the decalogue. Therefore the precepts of the decalogue cannot be changed by dispensation.

I answer that, As stated above (q. 96, a. 6; q. 97, a. 4), precepts admit of dispensation, when there occurs a particular case in which, if the letter of the law be observed, the intention of the lawgiver is frustrated. Now the intention of every lawgiver is directed first and chiefly to the common good; secondly, to the order of justice and virtue, whereby the common good is preserved and attained. If therefore there be any precepts which contain the very preservation of the common good, or the very order of justice and virtue, such precepts contain the intention of the lawgiver, and therefore are indispensable. For instance, if in some community a law were enacted, such as this—that no man should work for the destruction of the commonwealth, or betray the state to its enemies, or that no man should do anything unjust or evil, such precepts would not admit of dispensation. But if other precepts were enacted,

subordinate to the above, and determining certain special modes of procedure, these latter precepts would admit of dispensation, in so far as the omission of these precepts in certain cases would not be prejudicial to the former precepts which contain the intention of the lawgiver. For instance if, for the safeguarding of the commonwealth, it were enacted in some city that from each ward some men should keep watch as sentries in case of siege, some might be dispensed from this on account of some greater utility.

Now the precepts of the decalogue contain the very intention of the lawgiver, who is God. For the precepts of the first table, which direct us to God, contain the very order to the common and final good, which is God; while the precepts of the second table contain the order of justice to be observed among men, that nothing undue be done to anyone, and that each one be given his due; for it is in this sense that we are to take the precepts of the decalogue. Consequently the precepts of the decalogue admit of no dispensation whatever.

Reply to Objection 1. The Philosopher is not speaking of the natural law which contains the very order of justice: for it is a never-failing principle that "justice should be preserved." But he is speaking in reference to certain fixed modes of observing justice, which fail to apply in certain cases.

Reply to Objection 2. As the Apostle says (2 Tim. 2:13), "God continueth faithful, He cannot deny Himself." But He would deny Himself if He were to do away with the very order of His own justice, since He is justice itself. Wherefore God cannot dispense a man so that it be lawful for him not to direct himself to God, or not to be subject to His justice, even in those matters in which men are directed to one another.

Reply to Objection 3. The slaying of a man is forbidden in the decalogue, in so far as it bears the character of something undue: for in this sense the precept contains the very essence of justice. Human law cannot make it lawful for a man to be slain unduly. But it is not undue for evil-doers or foes of the common weal to be slain: hence this is not contrary to the precept of the decalogue; and such a killing is no murder as forbidden by that precept, as Augustine observes (*De Lib. Arb.* i, 4). In like manner when a man's property is taken from him, if it be due that he should lose it, this is not theft or robbery as forbidden by the decalogue.

Consequently when the children of Israel, by God's command, took away the spoils of the Egyptians, this was not theft; since it was due to them by the sentence of God. Likewise when Abraham consented to slay his son, he did not consent to murder, because his son was due to be slain by the command of God, Who is Lord of life and death: for He it is Who inflicts the punishment of death on all men, both godly and ungodly, on account of the sin of our first parent, and if a man be the executor of that sentence by Divine authority, he will

be no murderer any more than God would be. Again Osee, by taking unto himself a wife of fornications, or an adulterous woman, was not guilty either of adultery or of fornication: because he took unto himself one who was his by command of God, Who is the Author of the institution of marriage.

Accordingly, therefore, the precepts of the decalogue, as to the essence of justice which they contain, are unchangeable: but as to any determination by application to individual actions—for instance, that this or that be murder, theft or adultery, or not—in this point

they admit of change; sometimes by Divine authority alone, namely, in such matters as are exclusively of Divine institution, as marriage and the like; sometimes also by human authority, namely in such matters as are subject to human jurisdiction: for in this respect men stand in the place of God: and yet not in all respects.

Reply to Objection 4. This determination was an interpretation rather than a dispensation. For a man is not taken to break the Sabbath, if he does something necessary for human welfare; as Our Lord proves (Mat. 12:3, seqq.).

Objection 1. It would seem that the mode of virtue falls under the precept of the law. For the mode of virtue is that deeds of justice should be done justly, that deeds of fortitude should be done bravely, and in like manner as to the other virtues. But it is commanded (Dt. 26:20) that “thou shalt follow justly after that which is just.” Therefore the mode of virtue falls under the precept.

Objection 2. Further, that which belongs to the intention of the lawgiver comes chiefly under the precept. But the intention of the lawgiver is directed chiefly to make men virtuous, as stated in Ethic. ii: and it belongs to a virtuous man to act virtuously. Therefore the mode of virtue falls under the precept.

Objection 3. Further, the mode of virtue seems to consist properly in working willingly and with pleasure. But this falls under a precept of the Divine law, for it is written (Ps. 99:2): “Serve ye the Lord with gladness”; and (2 Cor. 9:7): “Not with sadness or necessity: for God loveth a cheerful giver”; whereupon the gloss says: “Whatever ye do, do gladly; and then you will do it well; whereas if you do it sorrowfully, it is done in thee, not by thee.” Therefore the mode of virtue falls under the precept of the law.

On the contrary, No man can act as a virtuous man acts unless he has the habit of virtue, as the Philosopher explains (Ethic. ii, 4; v, 8). Now whoever transgresses a precept of the law, deserves to be punished. Hence it would follow that a man who has not the habit of virtue, would deserve to be punished, whatever he does. But this is contrary to the intention of the law, which aims at leading man to virtue, by habituating him to good works. Therefore the mode of virtue does not fall under the precept.

I answer that, As stated above (q. 90, a. 3, ad 2), a precept of law has compulsory power. Hence that on which the compulsion of the law is brought to bear, falls directly under the precept of the law. Now the law compels through fear of punishment, as stated in Ethic. x, 9, because that properly falls under the precept of the law, for which the penalty of the law is inflicted. But Divine law and human law are differently situated as to the appointment of penalties; since the penalty of the law is inflicted only for those things which come under the judgment of the lawgiver; for the law punishes in accordance with the verdict given. Now man, the framer of human law, is competent to judge only of outward acts; because “man seeth those things that appear,” according to 1 Kings 16:7: while God alone, the framer of the Divine law, is competent to judge of the inward movements of wills, according to Ps. 7:10: “The searcher of hearts and reins is God.”

Accordingly, therefore, we must say that the mode of virtue is in some sort regarded both by human and by Divine law; in some respect it is regarded by the Di-

vine, but not by the human law; and in another way, it is regarded neither by the human nor by the Divine law. Now the mode of virtue consists in three things, as the Philosopher states in Ethic. ii. The first is that man should act “knowingly”: and this is subject to the judgment of both Divine and human law; because what a man does in ignorance, he does accidentally. Hence according to both human and Divine law, certain things are judged in respect of ignorance to be punishable or pardonable.

The second point is that a man should act “deliberately,” i.e. “from choice, choosing that particular action for its own sake”; wherein a twofold internal movement is implied, of volition and of intention, about which we have spoken above (Qq. 8, 12): and concerning these two, Divine law alone, and not human law, is competent to judge. For human law does not punish the man who wishes to slay, and slays not: whereas the Divine law does, according to Mat. 5:22: “Whosoever is angry with his brother, shall be in danger of the judgment.”

The third point is that he should “act from a firm and immovable principle”: which firmness belongs properly to a habit, and implies that the action proceeds from a rooted habit. In this respect, the mode of virtue does not fall under the precept either of Divine or of human law, since neither by man nor by God is he punished as breaking the law, who gives due honor to his parents and yet has not the habit of filial piety.

Reply to Objection 1. The mode of doing acts of justice, which falls under the precept, is that they be done in accordance with right; but not that they be done from the habit of justice.

Reply to Objection 2. The intention of the lawgiver is twofold. His aim, in the first place, is to lead men to something by the precepts of the law: and this is virtue. Secondly, his intention is brought to bear on the matter itself of the precept: and this is something leading or disposing to virtue, viz. an act of virtue. For the end of the precept and the matter of the precept are not the same: just as neither in other things is the end the same as that which conduces to the end.

Reply to Objection 3. That works of virtue should be done without sadness, falls under the precept of the Divine law; for whoever works with sadness works unwillingly. But to work with pleasure, i.e. joyfully or cheerfully, in one respect falls under the precept, viz. in so far as pleasure ensues from the love of God and one’s neighbor (which love falls under the precept), and love causes pleasure: and in another respect does not fall under the precept, in so far as pleasure ensues from a habit; for “pleasure taken in a work proves the existence of a habit,” as stated in Ethic. ii, 3. For an act may give pleasure either on account of its end, or through its proceeding from a becoming habit.

FIRST PART OF THE SECOND PART, QUESTION 101

Of the Ceremonial Precepts in Themselves (In Four Articles)

We must now consider the ceremonial precepts: and first we must consider them in themselves; secondly, their cause; thirdly, their duration. Under the first head there are four points of inquiry:

- (1) The nature of the ceremonial precepts;
- (2) Whether they are figurative?
- (3) Whether there should have been many of them?
- (4) Of their various kinds.

Whether the nature of the ceremonial precepts consists in their pertaining to the worship of God? Ia IIae q. 101 a. 1

Objection 1. It would seem that the nature of the ceremonial precepts does not consist in their pertaining to the worship of God. Because, in the Old Law, the Jews were given certain precepts about abstinence from food (Lev. 11); and about refraining from certain kinds of clothes, e.g. (Lev. 19:19): “Thou shalt not wear a garment that is woven of two sorts”; and again (Num. 15:38): “To make to themselves fringes in the corners of their garments.” But these are not moral precepts; since they do not remain in the New Law. Nor are they judicial precepts; since they do not pertain to the pronouncing of judgment between man and man. Therefore they are ceremonial precepts. Yet they seem in no way to pertain to the worship of God. Therefore the nature of the ceremonial precepts does not consist in their pertaining to Divine worship.

Objection 2. Further, some state that the ceremonial precepts are those which pertain to solemnities; as though they were so called from the “cerei” [candles] which are lit up on those occasions. But many other things besides solemnities pertain to the worship of God. Therefore it does not seem that the ceremonial precepts are so called from their pertaining to the Divine worship.

Objection 3. Further, some say that the ceremonial precepts are patterns, i.e. rules, of salvation: because the Greek *chaire* is the same as the Latin “salve.” But all the precepts of the Law are rules of salvation, and not only those that pertain to the worship of God. Therefore not only those precepts which pertain to Divine worship are called ceremonial.

Objection 4. Further, Rabbi Moses says (Doct. Perplex. iii) that the ceremonial precepts are those for which there is no evident reason. But there is evident reason for many things pertaining to the worship of God; such as the observance of the Sabbath, the feasts of the Passover and of the Tabernacles, and many other things, the reason for which is set down in the Law. Therefore the ceremonial precepts are not those which pertain to the worship of God.

On the contrary, It is written (Ex. 18:19,20): “Be thou to the people in those things that pertain to

God...and...shew the people the ceremonies and the manner of worshipping.”

I answer that, As stated above (q. 99, a. 4), the ceremonial precepts are determinations of the moral precepts whereby man is directed to God, just as the judicial precepts are determinations of the moral precepts whereby he is directed to his neighbor. Now man is directed to God by the worship due to Him. Wherefore those precepts are properly called ceremonial, which pertain to the Divine worship. The reason for their being so called was given above (q. 99, a. 3), when we established the distinction between the ceremonial and the other precepts.

Reply to Objection 1. The Divine worship includes not only sacrifices and the like, which seem to be directed to God immediately, but also those things whereby His worshippers are duly prepared to worship Him: thus too in other matters, whatever is preparatory to the end comes under the science whose object is the end. Accordingly those precepts of the Law which regard the clothing and food of God’s worshippers, and other such matters, pertain to a certain preparation of the ministers, with the view of fitting them for the Divine worship: just as those who administer to a king make use of certain special observances. Consequently such are contained under the ceremonial precepts.

Reply to Objection 2. The alleged explanation of the name does not seem very probable: especially as the Law does not contain many instances of the lighting of candles in solemnities; since, even the lamps of the Candlestick were furnished with “oil of olives,” as stated in Lev. 24:2. Nevertheless we may say that all things pertaining to the Divine worship were more carefully observed on solemn festivals: so that all ceremonial precepts may be included under the observance of solemnities.

Reply to Objection 3. Neither does this explanation of the name appear to be very much to the point, since the word “ceremony” is not Greek but Latin. We may say, however, that, since man’s salvation is from God, those precepts above all seem to be rules of salvation, which direct man to God: and accordingly those which

refer to Divine worship are called ceremonial precepts.

Reply to Objection 4. This explanation of the ceremonial precepts has a certain amount of probability: not that they are called ceremonial precisely because there is no evident reason for them; this is a kind of conse-

quence. For, since the precepts referring to the Divine worship must needs be figurative, as we shall state further on (a. 2), the consequence is that the reason for them is not so very evident.

Whether the ceremonial precepts are figurative?

Ia IIae q. 101 a. 2

Objection 1. It would seem that the ceremonial precepts are not figurative. For it is the duty of every teacher to express himself in such a way as to be easily understood, as Augustine states (*De Doctr. Christ.* iv, 4,10) and this seems very necessary in the framing of a law: because precepts of law are proposed to the populace; for which reason a law should be manifest, as Isidore declares (*Etym.* v, 21). If therefore the precepts of the Law were given as figures of something, it seems unbecoming that Moses should have delivered these precepts without explaining what they signified.

Objection 2. Further, whatever is done for the worship of God, should be entirely free from unfitness. But the performance of actions in representation of others, seems to savor of the theatre or of the drama: because formerly the actions performed in theatres were done to represent the actions of others. Therefore it seems that such things should not be done for the worship of God. But the ceremonial precepts are ordained to the Divine worship, as stated above (a. 1). Therefore they should not be figurative.

Objection 3. Further, Augustine says (*Enchiridion* iii, iv) that "God is worshipped chiefly by faith, hope, and charity." But the precepts of faith, hope, and charity are not figurative. Therefore the ceremonial precepts should not be figurative.

Objection 4. Further, Our Lord said (*Jn.* 4:24): "God is a spirit, and they that adore Him, must adore Him in spirit and in truth." But a figure is not the very truth: in fact one is condivided with the other. Therefore the ceremonial precepts, which refer to the Divine worship, should not be figurative.

On the contrary, The Apostle says (*Col.* 2:16,17): "Let no man... judge you in meat or in drink, or in respect of a festival day, or of the new moon, or of the sabbaths, which are a shadow of things to come."

I answer that, As stated above (a. 1; q. 99, Aa. 3,4), the ceremonial precepts are those which refer to the worship of God. Now the Divine worship is twofold: internal, and external. For since man is composed of soul and body, each of these should be applied to the worship of God; the soul by an interior worship; the body by an outward worship: hence it is written (*Ps.* 83:3): "My heart and my flesh have rejoiced in the living God." And as the body is ordained to God through the soul, so the outward worship is ordained to the internal worship. Now interior worship consists in the soul being united to God by the intellect and affections. Wherefore according to the various ways in which the intellect and affec-

tions of the man who worships God are rightly united to God, his external actions are applied in various ways to the Divine worship.

For in the state of future bliss, the human intellect will gaze on the Divine Truth in Itself. Wherefore the external worship will not consist in anything figurative, but solely in the praise of God, proceeding from the inward knowledge and affection, according to *Is.* 51:3: "Joy and gladness shall be found therein, thanksgiving and the voice of praise."

But in the present state of life, we are unable to gaze on the Divine Truth in Itself, and we need the ray of Divine light to shine upon us under the form of certain sensible figures, as Dionysius states (*Coel. Hier.* i); in various ways, however, according to the various states of human knowledge. For under the Old Law, neither was the Divine Truth manifest in Itself, nor was the way leading to that manifestation as yet opened out, as the Apostle declares (*Heb.* 9:8). Hence the external worship of the Old Law needed to be figurative not only of the future truth to be manifested in our heavenly country, but also of Christ, Who is the way leading to that heavenly manifestation. But under the New Law this way is already revealed: and therefore it needs no longer to be foreshadowed as something future, but to be brought to our minds as something past or present: and the truth of the glory to come, which is not yet revealed, alone needs to be foreshadowed. This is what the Apostle says (*Heb.* 11:1): "The Law has [Vulg.: 'having'] a shadow of the good things to come, not the very image of the things": for a shadow is less than an image; so that the image belongs to the New Law, but the shadow to the Old.

Reply to Objection 1. The things of God are not to be revealed to man except in proportion to his capacity: else he would be in danger of downfall, were he to despise what he cannot grasp. Hence it was more beneficial that the Divine mysteries should be revealed to uncultured people under a veil of figures, that thus they might know them at least implicitly by using those figures to the honor of God.

Reply to Objection 2. Just as human reason fails to grasp poetical expressions on account of their being lacking in truth, so does it fail to grasp Divine things perfectly, on account of the sublimity of the truth they contain: and therefore in both cases there is need of signs by means of sensible figures.

Reply to Objection 3. Augustine is speaking there of internal worship; to which, however, external wor-

ship should be ordained, as stated above.

The same answer applies to the Fourth Objection:

because men were taught by Him to practice more perfectly the spiritual worship of God.

Whether there should have been man ceremonial precepts?

Ia IIae q. 101 a. 3

Objection 1. It would seem that there should not have been many ceremonial precepts. For those things which conduce to an end should be proportionate to that end. But the ceremonial precepts, as stated above (Aa. 1,2), are ordained to the worship of God, and to the foreshadowing of Christ. Now “there is but one God, of Whom are all things... and one Lord Jesus Christ, by Whom are all things” (1 Cor. 8:6). Therefore there should not have been many ceremonial precepts.

Objection 2. Further, the great number of the ceremonial precepts was an occasion of transgression, according to the words of Peter (Acts 15:10): “Why tempt you God, to put a yoke upon the necks of the disciples, which neither our fathers nor we have been able to bear?” Now the transgression of the Divine precepts is an obstacle to man’s salvation. Since, therefore, every law should conduce to man’s salvation, as Isidore says (Etym. v, 3), it seems that the ceremonial precepts should not have been given in great number.

Objection 3. Further, the ceremonial precepts referred to the outward and bodily worship of God, as stated above (a. 2). But the Law should have lessened this bodily worship: since it directed men to Christ, Who taught them to worship God “in spirit and in truth,” as stated in Jn. 4:23. Therefore there should not have been many ceremonial precepts.

On the contrary, (Osee 8:12): “I shall write to them [Vulg.: ‘him’] My manifold laws”; and (Job 11:6): “That He might show thee the secrets of His wisdom, and that His Law is manifold.”

I answer that, As stated above (q. 96, a. 1), every law is given to a people. Now a people contains two kinds of men: some, prone to evil, who have to be coerced by the precepts of the law, as stated above (q. 95, a. 1); some, inclined to good, either from nature or from custom, or rather from grace; and the like have to be taught and improved by means of the precepts of the law. Accordingly, with regard to both kinds of the law. Accordingly, with regard to both kinds of men it was expedient that the Old Law should contain many ceremonial precepts. For in that people there were many prone to idolatry; wherefore it was necessary to recall them by means of ceremonial precepts from the worship of idols to the worship of God. And since men served idols in many ways, it was necessary on the other hand

to devise many means of repressing every single one: and again, to lay many obligations on such like men, in order that being burdened, as it were, by their duties to the Divine worship, they might have no time for the service of idols. As to those who were inclined to good, it was again necessary that there should be many ceremonial precepts; both because thus their mind turned to God in many ways, and more continually; and because the mystery of Christ, which was foreshadowed by these ceremonial precepts, brought many boons to the world, and afforded men many considerations, which needed to be signified by various ceremonies.

Reply to Objection 1. When that which conduces to an end is sufficient to conduce thereto, then one such thing suffices for one end: thus one remedy, if it be efficacious, suffices sometimes to restore men to health, and then the remedy needs not to be repeated. But when that which conduces to an end is weak and imperfect, it needs to be multiplied: thus many remedies are given to a sick man, when one is not enough to heal him. Now the ceremonies of the Old Law were weak and imperfect, both for representing the mystery of Christ, on account of its surpassing excellence; and for subjugating men’s minds to God. Hence the Apostle says (Heb. 7:18,19): “There is a setting aside of the former commandment because of the weakness and unprofitableness thereof, for the law brought nothing to perfection.” Consequently these ceremonies needed to be in great number.

Reply to Objection 2. A wise lawgiver should suffer lesser transgressions, that the greater may be avoided. And therefore, in order to avoid the sin of idolatry, and the pride which would arise in the hearts of the Jews, were they to fulfil all the precepts of the Law, the fact that they would in consequence find many occasions of disobedience did not prevent God from giving them many ceremonial precepts.

Reply to Objection 3. The Old Law lessened bodily worship in many ways. Thus it forbade sacrifices to be offered in every place and by any person. Many such like things did it enact for the lessening of bodily worship; as Rabbi Moses, the Egyptian testifies (Doct. Perplex. iii). Nevertheless it behooved not to attenuate the bodily worship of God so much as to allow men to fall away into the worship of idols.

Objection 1. It would seem that the ceremonies of the Old Law are unsuitably divided into “sacrifices, sacred things, sacraments, and observances.” For the ceremonies of the Old Law foreshadowed Christ. But this was done only by the sacrifices, which foreshadowed the sacrifice in which Christ “delivered Himself an oblation and a sacrifice to God” (Eph. 5:2). Therefore none but the sacrifices were ceremonies.

Objection 2. Further, the Old Law was ordained to the New. But in the New Law the sacrifice is the Sacrament of the Altar. Therefore in the Old Law there should be no distinction between “sacrifices” and “sacraments.”

Objection 3. Further, a “sacred thing” is something dedicated to God: in which sense the tabernacle and its vessels were said to be consecrated. But all the ceremonial precepts were ordained to the worship of God, as stated above (a. 1). Therefore all ceremonies were sacred things. Therefore “sacred things” should not be taken as a part of the ceremonies.

Objection 4. Further, “observances” are so called from having to be observed. But all the precepts of the Law had to be observed: for it is written (Dt. 8:11): “Observe [Douay: ‘Take heed’] and beware lest at any time thou forget the Lord thy God, and neglect His commandments and judgments and ceremonies.” Therefore the “observances” should not be considered as a part of the ceremonies.

Objection 5. Further, the solemn festivals are reckoned as part of the ceremonial: since they were a shadow of things to come (Col. 2:16,17): and the same may be said of the oblations and gifts, as appears from the words of the Apostle (Heb. 9:9): and yet these do not seem to be inclined in any of those mentioned above. Therefore the above division of ceremonies is unsuitable.

On the contrary, In the Old Law each of the above is called a ceremony. For the sacrifices are called ceremonies (Num. 15:24): “They shall offer a calf. . . and the sacrifices and libations thereof, as the ceremonies require.” Of the sacrament of Order it is written (Lev. 7:35): “This is the anointing of Aaron and his sons in the ceremonies.” Of sacred things also it is written (Ex. 38:21): “These are the instruments of the tabernacle of the testimony. . . in the ceremonies of the Levites.” And again of the observances it is written (3 Kings 9:6): “If you. . . shall turn away from following Me, and will not observe [Douay: ‘keep’] My. . . ceremonies which I have set before you.”

I answer that, As stated above (Aa. 1,2), the ceremonial precepts are ordained to the Divine worship. Now in this worship we may consider the worship itself, the worshippers, and the instruments of worship. The worship consists specially in “sacrifices,” which are

offered up in honor of God. The instruments of worship refer to the “sacred things,” such as the tabernacle, the vessels and so forth. With regard to the worshippers two points may be considered. The first point is their preparation for Divine worship, which is effected by a sort of consecration either of the people or of the ministers; and to this the “sacraments” refer. The second point is their particular mode of life, whereby they are distinguished from those who do not worship God: and to this pertain the “observances,” for instance, in matters of food, clothing, and so forth.

Reply to Objection 1. It was necessary for the sacrifices to be offered both in some certain place and by some certain men: and all this pertained to the worship of God. Wherefore just as their sacrifices signified Christ the victim, so too their sacraments and sacred things of the New Law; while their observances foreshadowed the mode of life of the people under the New Law: all of which things pertain to Christ.

Reply to Objection 2. The sacrifice of the New Law, viz. the Eucharist, contains Christ Himself, the Author of our Sanctification: for He sanctified “the people by His own blood” (Heb. 13:12). Hence this Sacrifice is also a sacrament. But the sacrifices of the Old Law did not contain Christ, but foreshadowed Him; hence they are not called sacraments. In order to signify this there were certain sacraments apart from the sacrifices of the Old Law, which sacraments were figures of the sanctification to come. Nevertheless to certain consecrations certain sacrifices were united.

Reply to Objection 3. The sacrifices and sacraments were of course sacred things. But certain things were sacred, through being dedicated to the Divine worship, and yet were not sacrifices or sacraments: wherefore they retained the common designation of sacred things.

Reply to Objection 4. Those things which pertained to the mode of life of the people who worshipped God, retained the common designation of observances, in so far as they fell short of the above. For they were not called sacred things, because they had no immediate connection with the worship of God, such as the tabernacle and its vessels had. But by a sort of consequence they were matters of ceremony, in so far as they affected the fitness of the people who worshipped God.

Reply to Objection 5. Just as the sacrifices were offered in a fixed place, so were they offered at fixed times: for which reason the solemn festivals seem to be reckoned among the sacred things. The oblations and gifts are counted together with the sacrifices; hence the Apostle says (Heb. 5:1): “Every high-priest taken from among men, is ordained for men in things that appertain to God, that he may offer up gifts and sacrifices.”

Objection 1. It would seem that the nature of the ceremonial precepts does not consist in their pertaining to the worship of God. Because, in the Old Law, the Jews were given certain precepts about abstinence from food (Lev. 11); and about refraining from certain kinds of clothes, e.g. (Lev. 19:19): “Thou shalt not wear a garment that is woven of two sorts”; and again (Num. 15:38): “To make to themselves fringes in the corners of their garments.” But these are not moral precepts; since they do not remain in the New Law. Nor are they judicial precepts; since they do not pertain to the pronouncing of judgment between man and man. Therefore they are ceremonial precepts. Yet they seem in no way to pertain to the worship of God. Therefore the nature of the ceremonial precepts does not consist in their pertaining to Divine worship.

Objection 2. Further, some state that the ceremonial precepts are those which pertain to solemnities; as though they were so called from the “cerei” [candles] which are lit up on those occasions. But many other things besides solemnities pertain to the worship of God. Therefore it does not seem that the ceremonial precepts are so called from their pertaining to the Divine worship.

Objection 3. Further, some say that the ceremonial precepts are patterns, i.e. rules, of salvation: because the Greek *chaire* is the same as the Latin “salve.” But all the precepts of the Law are rules of salvation, and not only those that pertain to the worship of God. Therefore not only those precepts which pertain to Divine worship are called ceremonial.

Objection 4. Further, Rabbi Moses says (Doct. Perplex. iii) that the ceremonial precepts are those for which there is no evident reason. But there is evident reason for many things pertaining to the worship of God; such as the observance of the Sabbath, the feasts of the Passover and of the Tabernacles, and many other things, the reason for which is set down in the Law. Therefore the ceremonial precepts are not those which pertain to the worship of God.

On the contrary, It is written (Ex. 18:19,20): “Be thou to the people in those things that pertain to God...and...shew the people the ceremonies and the manner of worshipping.”

I answer that, As stated above (q. 99, a. 4), the ceremonial precepts are determinations of the moral precepts whereby man is directed to God, just as the judi-

cial precepts are determinations of the moral precepts whereby he is directed to his neighbor. Now man is directed to God by the worship due to Him. Wherefore those precepts are properly called ceremonial, which pertain to the Divine worship. The reason for their being so called was given above (q. 99, a. 3), when we established the distinction between the ceremonial and the other precepts.

Reply to Objection 1. The Divine worship includes not only sacrifices and the like, which seem to be directed to God immediately, but also those things whereby His worshippers are duly prepared to worship Him: thus too in other matters, whatever is preparatory to the end comes under the science whose object is the end. Accordingly those precepts of the Law which regard the clothing and food of God’s worshippers, and other such matters, pertain to a certain preparation of the ministers, with the view of fitting them for the Divine worship: just as those who administer to a king make use of certain special observances. Consequently such are contained under the ceremonial precepts.

Reply to Objection 2. The alleged explanation of the name does not seem very probable: especially as the Law does not contain many instances of the lighting of candles in solemnities; since, even the lamps of the Candlestick were furnished with “oil of olives,” as stated in Lev. 24:2. Nevertheless we may say that all things pertaining to the Divine worship were more carefully observed on solemn festivals: so that all ceremonial precepts may be included under the observance of solemnities.

Reply to Objection 3. Neither does this explanation of the name appear to be very much to the point, since the word “ceremony” is not Greek but Latin. We may say, however, that, since man’s salvation is from God, those precepts above all seem to be rules of salvation, which direct man to God: and accordingly those which refer to Divine worship are called ceremonial precepts.

Reply to Objection 4. This explanation of the ceremonial precepts has a certain amount of probability: not that they are called ceremonial precisely because there is no evident reason for them; this is a kind of consequence. For, since the precepts referring to the Divine worship must needs be figurative, as we shall state further on (a. 2), the consequence is that the reason for them is not so very evident.

Objection 1. It would seem that the ceremonial precepts are not figurative. For it is the duty of every teacher to express himself in such a way as to be easily understood, as Augustine states (*De Doctr. Christ.* iv, 4,10) and this seems very necessary in the framing of a law: because precepts of law are proposed to the populace; for which reason a law should be manifest, as Isidore declares (*Etym.* v, 21). If therefore the precepts of the Law were given as figures of something, it seems unbecoming that Moses should have delivered these precepts without explaining what they signified.

Objection 2. Further, whatever is done for the worship of God, should be entirely free from unfitness. But the performance of actions in representation of others, seems to savor of the theatre or of the drama: because formerly the actions performed in theatres were done to represent the actions of others. Therefore it seems that such things should not be done for the worship of God. But the ceremonial precepts are ordained to the Divine worship, as stated above (a. 1). Therefore they should not be figurative.

Objection 3. Further, Augustine says (*Enchiridion* iii, iv) that “God is worshipped chiefly by faith, hope, and charity.” But the precepts of faith, hope, and charity are not figurative. Therefore the ceremonial precepts should not be figurative.

Objection 4. Further, Our Lord said (*Jn.* 4:24): “God is a spirit, and they that adore Him, must adore Him in spirit and in truth.” But a figure is not the very truth: in fact one is condivided with the other. Therefore the ceremonial precepts, which refer to the Divine worship, should not be figurative.

On the contrary, The Apostle says (*Col.* 2:16,17): “Let no man . . . judge you in meat or in drink, or in respect of a festival day, or of the new moon, or of the sabbaths, which are a shadow of things to come.”

I answer that, As stated above (a. 1; q. 99, Aa. 3,4), the ceremonial precepts are those which refer to the worship of God. Now the Divine worship is twofold: internal, and external. For since man is composed of soul and body, each of these should be applied to the worship of God; the soul by an interior worship; the body by an outward worship: hence it is written (*Ps.* 83:3): “My heart and my flesh have rejoiced in the living God.” And as the body is ordained to God through the soul, so the outward worship is ordained to the internal worship. Now interior worship consists in the soul being united to God by the intellect and affections. Wherefore according to the various ways in which the intellect and affections of the man who worships God are rightly united to God, his external actions are applied in various ways to

the Divine worship.

For in the state of future bliss, the human intellect will gaze on the Divine Truth in Itself. Wherefore the external worship will not consist in anything figurative, but solely in the praise of God, proceeding from the inward knowledge and affection, according to *Is.* 51:3: “Joy and gladness shall be found therein, thanksgiving and the voice of praise.”

But in the present state of life, we are unable to gaze on the Divine Truth in Itself, and we need the ray of Divine light to shine upon us under the form of certain sensible figures, as Dionysius states (*Coel. Hier.* i); in various ways, however, according to the various states of human knowledge. For under the Old Law, neither was the Divine Truth manifest in Itself, nor was the way leading to that manifestation as yet opened out, as the Apostle declares (*Heb.* 9:8). Hence the external worship of the Old Law needed to be figurative not only of the future truth to be manifested in our heavenly country, but also of Christ, Who is the way leading to that heavenly manifestation. But under the New Law this way is already revealed: and therefore it needs no longer to be foreshadowed as something future, but to be brought to our minds as something past or present: and the truth of the glory to come, which is not yet revealed, alone needs to be foreshadowed. This is what the Apostle says (*Heb.* 11:1): “The Law has [Vulg.: ‘having’] a shadow of the good things to come, not the very image of the things”: for a shadow is less than an image; so that the image belongs to the New Law, but the shadow to the Old.

Reply to Objection 1. The things of God are not to be revealed to man except in proportion to his capacity: else he would be in danger of downfall, were he to despise what he cannot grasp. Hence it was more beneficial that the Divine mysteries should be revealed to uncultured people under a veil of figures, that thus they might know them at least implicitly by using those figures to the honor of God.

Reply to Objection 2. Just as human reason fails to grasp poetical expressions on account of their being lacking in truth, so does it fail to grasp Divine things perfectly, on account of the sublimity of the truth they contain: and therefore in both cases there is need of signs by means of sensible figures.

Reply to Objection 3. Augustine is speaking there of internal worship; to which, however, external worship should be ordained, as stated above.

The same answer applies to the Fourth Objection: because men were taught by Him to practice more perfectly the spiritual worship of God.

Objection 1. It would seem that there should not have been many ceremonial precepts. For those things which conduce to an end should be proportionate to that end. But the ceremonial precepts, as stated above (Aa. 1,2), are ordained to the worship of God, and to the foreshadowing of Christ. Now “there is but one God, of Whom are all things... and one Lord Jesus Christ, by Whom are all things” (1 Cor. 8:6). Therefore there should not have been many ceremonial precepts.

Objection 2. Further, the great number of the ceremonial precepts was an occasion of transgression, according to the words of Peter (Acts 15:10): “Why tempt you God, to put a yoke upon the necks of the disciples, which neither our fathers nor we have been able to bear?” Now the transgression of the Divine precepts is an obstacle to man’s salvation. Since, therefore, every law should conduce to man’s salvation, as Isidore says (Etym. v, 3), it seems that the ceremonial precepts should not have been given in great number.

Objection 3. Further, the ceremonial precepts referred to the outward and bodily worship of God, as stated above (a. 2). But the Law should have lessened this bodily worship: since it directed men to Christ, Who taught them to worship God “in spirit and in truth,” as stated in Jn. 4:23. Therefore there should not have been many ceremonial precepts.

On the contrary, (Osee 8:12): “I shall write to them [Vulg.: ‘him’] My manifold laws”; and (Job 11:6): “That He might show thee the secrets of His wisdom, and that His Law is manifold.”

I answer that, As stated above (q. 96, a. 1), every law is given to a people. Now a people contains two kinds of men: some, prone to evil, who have to be coerced by the precepts of the law, as stated above (q. 95, a. 1); some, inclined to good, either from nature or from custom, or rather from grace; and the like have to be taught and improved by means of the precepts of the law. Accordingly, with regard to both kinds of the law. Accordingly, with regard to both kinds of men it was expedient that the Old Law should contain many ceremonial precepts. For in that people there were many prone to idolatry; wherefore it was necessary to recall them by means of ceremonial precepts from the worship of idols to the worship of God. And since men served idols in many ways, it was necessary on the other hand

to devise many means of repressing every single one: and again, to lay many obligations on such like men, in order that being burdened, as it were, by their duties to the Divine worship, they might have no time for the service of idols. As to those who were inclined to good, it was again necessary that there should be many ceremonial precepts; both because thus their mind turned to God in many ways, and more continually; and because the mystery of Christ, which was foreshadowed by these ceremonial precepts, brought many boons to the world, and afforded men many considerations, which needed to be signified by various ceremonies.

Reply to Objection 1. When that which conduces to an end is sufficient to conduce thereto, then one such thing suffices for one end: thus one remedy, if it be efficacious, suffices sometimes to restore men to health, and then the remedy needs not to be repeated. But when that which conduces to an end is weak and imperfect, it needs to be multiplied: thus many remedies are given to a sick man, when one is not enough to heal him. Now the ceremonies of the Old Law were weak and imperfect, both for representing the mystery of Christ, on account of its surpassing excellence; and for subjugating men’s minds to God. Hence the Apostle says (Heb. 7:18,19): “There is a setting aside of the former commandment because of the weakness and unprofitableness thereof, for the law brought nothing to perfection.” Consequently these ceremonies needed to be in great number.

Reply to Objection 2. A wise lawgiver should suffer lesser transgressions, that the greater may be avoided. And therefore, in order to avoid the sin of idolatry, and the pride which would arise in the hearts of the Jews, were they to fulfil all the precepts of the Law, the fact that they would in consequence find many occasions of disobedience did not prevent God from giving them many ceremonial precepts.

Reply to Objection 3. The Old Law lessened bodily worship in many ways. Thus it forbade sacrifices to be offered in every place and by any person. Many such like things did it enact for the lessening of bodily worship; as Rabbi Moses, the Egyptian testifies (Doct. Perplex. iii). Nevertheless it behooved not to attenuate the bodily worship of God so much as to allow men to fall away into the worship of idols.

Objection 1. It would seem that the ceremonies of the Old Law are unsuitably divided into “sacrifices, sacred things, sacraments, and observances.” For the ceremonies of the Old Law foreshadowed Christ. But this was done only by the sacrifices, which foreshadowed the sacrifice in which Christ “delivered Himself an oblation and a sacrifice to God” (Eph. 5:2). Therefore none but the sacrifices were ceremonies.

Objection 2. Further, the Old Law was ordained to the New. But in the New Law the sacrifice is the Sacrament of the Altar. Therefore in the Old Law there should be no distinction between “sacrifices” and “sacraments.”

Objection 3. Further, a “sacred thing” is something dedicated to God: in which sense the tabernacle and its vessels were said to be consecrated. But all the ceremonial precepts were ordained to the worship of God, as stated above (a. 1). Therefore all ceremonies were sacred things. Therefore “sacred things” should not be taken as a part of the ceremonies.

Objection 4. Further, “observances” are so called from having to be observed. But all the precepts of the Law had to be observed: for it is written (Dt. 8:11): “Observe [Douay: ‘Take heed’] and beware lest at any time thou forget the Lord thy God, and neglect His commandments and judgments and ceremonies.” Therefore the “observances” should not be considered as a part of the ceremonies.

Objection 5. Further, the solemn festivals are reckoned as part of the ceremonial: since they were a shadow of things to come (Col. 2:16,17): and the same may be said of the oblations and gifts, as appears from the words of the Apostle (Heb. 9:9): and yet these do not seem to be inclined in any of those mentioned above. Therefore the above division of ceremonies is unsuitable.

On the contrary, In the Old Law each of the above is called a ceremony. For the sacrifices are called ceremonies (Num. 15:24): “They shall offer a calf. . . and the sacrifices and libations thereof, as the ceremonies require.” Of the sacrament of Order it is written (Lev. 7:35): “This is the anointing of Aaron and his sons in the ceremonies.” Of sacred things also it is written (Ex. 38:21): “These are the instruments of the tabernacle of the testimony. . . in the ceremonies of the Levites.” And again of the observances it is written (3 Kings 9:6): “If you. . . shall turn away from following Me, and will not observe [Douay: ‘keep’] My. . . ceremonies which I have set before you.”

I answer that, As stated above (Aa. 1,2), the ceremonial precepts are ordained to the Divine worship. Now in this worship we may consider the worship itself, the worshippers, and the instruments of worship. The worship consists specially in “sacrifices,” which are

offered up in honor of God. The instruments of worship refer to the “sacred things,” such as the tabernacle, the vessels and so forth. With regard to the worshippers two points may be considered. The first point is their preparation for Divine worship, which is effected by a sort of consecration either of the people or of the ministers; and to this the “sacraments” refer. The second point is their particular mode of life, whereby they are distinguished from those who do not worship God: and to this pertain the “observances,” for instance, in matters of food, clothing, and so forth.

Reply to Objection 1. It was necessary for the sacrifices to be offered both in some certain place and by some certain men: and all this pertained to the worship of God. Wherefore just as their sacrifices signified Christ the victim, so too their sacraments and sacred things of the New Law; while their observances foreshadowed the mode of life of the people under the New Law: all of which things pertain to Christ.

Reply to Objection 2. The sacrifice of the New Law, viz. the Eucharist, contains Christ Himself, the Author of our Sanctification: for He sanctified “the people by His own blood” (Heb. 13:12). Hence this Sacrifice is also a sacrament. But the sacrifices of the Old Law did not contain Christ, but foreshadowed Him; hence they are not called sacraments. In order to signify this there were certain sacraments apart from the sacrifices of the Old Law, which sacraments were figures of the sanctification to come. Nevertheless to certain consecrations certain sacrifices were united.

Reply to Objection 3. The sacrifices and sacraments were of course sacred things. But certain things were sacred, through being dedicated to the Divine worship, and yet were not sacrifices or sacraments: wherefore they retained the common designation of sacred things.

Reply to Objection 4. Those things which pertained to the mode of life of the people who worshipped God, retained the common designation of observances, in so far as they fell short of the above. For they were not called sacred things, because they had no immediate connection with the worship of God, such as the tabernacle and its vessels had. But by a sort of consequence they were matters of ceremony, in so far as they affected the fitness of the people who worshipped God.

Reply to Objection 5. Just as the sacrifices were offered in a fixed place, so were they offered at fixed times: for which reason the solemn festivals seem to be reckoned among the sacred things. The oblations and gifts are counted together with the sacrifices; hence the Apostle says (Heb. 5:1): “Every high-priest taken from among men, is ordained for men in things that appertain to God, that he may offer up gifts and sacrifices.”

FIRST PART OF THE SECOND PART, QUESTION 102

Of the Causes of the Ceremonial Precepts (In Six Articles)

We must now consider the causes of the ceremonial precepts: under which head there are six points of inquiry:

- (1) Whether there was any cause for the ceremonial precepts?
- (2) Whether the cause of the ceremonial precepts was literal or figurative?
- (3) The causes of the sacrifices;
- (4) The causes of the sacrifices;
- (5) The causes of the sacred things;
- (6) The causes of the observances.

Whether there was any cause for the ceremonial precepts?

Ia IIae q. 102 a. 1

Objection 1. It would seem that there was no cause for the ceremonial precepts. Because on Eph. 2:15, "Making void the law of the commandments," the gloss says, (i.e.) "making void the Old Law as to the carnal observances, by substituting decrees, i.e. evangelical precepts, which are based on reason." But if the observances of the Old Law were based on reason, it would have been useless to void them by the reasonable decrees of the New Law. Therefore there was no reason for the ceremonial observances of the Old Law.

Objection 2. Further, the Old Law succeeded the law of nature. But in the law of nature there was a precept for which there was no reason save that man's obedience might be tested; as Augustine says (Gen. ad lit. viii, 6,13), concerning the prohibition about the tree of life. Therefore in the Old Law there should have been some precepts for the purpose of testing man's obedience, having no reason in themselves.

Objection 3. Further, man's works are called moral according as they proceed from reason. If therefore there is any reason for the ceremonial precepts, they would not differ from the moral precepts. It seems therefore that there was no cause for the ceremonial precepts: for the reason of a precept is taken from some cause.

On the contrary, It is written (Ps. 18:9): "The commandment of the Lord is lightsome, enlightening the eyes." But the ceremonial precepts are commandments of God. Therefore they are lightsome: and yet they would not be so, if they had no reasonable cause. Therefore the ceremonial precepts have a reasonable cause.

I answer that, Since, according to the Philosopher (Metaph. i, 2), it is the function of a "wise man to do everything in order," those things which proceed from the Divine wisdom must needs be well ordered, as the Apostle states (Rom. 13:1). Now there are two conditions required for things to be well ordered. First, that they be ordained to their due end, which is the princi-

ple of the whole order in matters of action: since those things that happen by chance outside the intention of the end, or which are not done seriously but for fun, are said to be inordinate. Secondly, that which is done in view of the end should be proportionate to the end. From this it follows that the reason for whatever conduces to the end is taken from the end: thus the reason for the disposition of a saw is taken from cutting, which is its end, as stated in Phys. ii, 9. Now it is evident that the ceremonial precepts, like all the other precepts of the Law, were institutions of Divine wisdom: hence it is written (Dt. 4:6): "This is your wisdom and understanding in the sight of nations." Consequently we must needs say that the ceremonial precepts were ordained to a certain end, wherefrom their reasonable causes can be gathered.

Reply to Objection 1. It may be said there was no reason for the observances of the Old Law, in the sense that there was no reason in the very nature of the thing done: for instance that a garment should not be made of wool and linen. But there could be a reason for them in relation to something else: namely, in so far as something was signified or excluded thereby. On the other hand, the decrees of the New Law, which refer chiefly to faith and the love of God, are reasonable from the very nature of the act.

Reply to Objection 2. The reason for the prohibition concerning the tree of knowledge of good and evil was not that this tree was naturally evil: and yet this prohibition was reasonable in its relation to something else, in as much as it signified something. And so also the ceremonial precepts of the Old Law were reasonable on account of their relation to something else.

Reply to Objection 3. The moral precepts in their very nature have reasonable causes: as for instance, "Thou shalt not kill, Thou shalt not steal." But the ceremonial precepts have a reasonable cause in their relation to something else, as stated above.

Objection 1. It would seem that the ceremonial precepts have not a literal, but merely a figurative cause. For among the ceremonial precepts, the chief was circumcision and the sacrifice of the paschal lamb. But neither of these had any but a figurative cause: because each was given as a sign. For it is written (Gn. 17:11): “You shall circumcise the flesh of your foreskin, that it may be a sign of the covenant between Me and you”: and of the celebration of the Passover it is written (Ex. 13:9): “It shall be as a sign in thy hand, and as a memorial before thy eyes.” Therefore much more did the other ceremonial precepts have none but a figurative reason.

Objection 2. Further, an effect is proportionate to its cause. But all the ceremonial precepts are figurative, as stated above (q. 101, a. 2). Therefore they have no other than a figurative cause.

Objection 3. Further, if it be a matter of indifference whether a certain thing, considered in itself, be done in a particular way or not, it seems that it has not a literal cause. Now there are certain points in the ceremonial precepts, which appear to be a matter of indifference, as to whether they be done in one way or in another: for instance, the number of animals to be offered, and other such particular circumstances. Therefore there is no literal cause for the precepts of the Old Law.

On the contrary, Just as the ceremonial precepts foreshadowed Christ, so did the stories of the Old Testament: for it is written (1 Cor. 10:11) that “all (these things) happened to them in figure.” Now in the stories of the Old Testament, besides the mystical or figurative, there is the literal sense. Therefore the ceremonial precepts had also literal, besides their figurative causes.

I answer that, As stated above (a. 1), the reason for whatever conduces to an end must be taken from that end. Now the end of the ceremonial precepts was twofold: for they were ordained to the Divine worship, for that particular time, and to the foreshadowing of Christ; just as the words of the prophets regarded the time being in such a way as to be utterances figurative of the time to come, as Jerome says on Osee 1:3. Accord-

ingly the reasons for the ceremonial precepts of the Old Law can be taken in two ways. First, in respect of the Divine worship which was to be observed for that particular time: and these reasons are literal: whether they refer to the shunning of idolatry; or recall certain Divine benefits; or remind men of the Divine excellence; or point out the disposition of mind which was then required in those who worshipped God. Secondly, their reasons can be gathered from the point of view of their being ordained to foreshadow Christ: and thus their reasons are figurative and mystical: whether they be taken from Christ Himself and the Church, which pertains to the allegorical sense; or to the morals of the Christian people, which pertains to the moral sense; or to the state of future glory, in as much as we are brought thereto by Christ, which refers to the anagogical sense.

Reply to Objection 1. Just as the use of metaphorical expressions in Scripture belongs to the literal sense, because the words are employed in order to convey that particular meaning; so also the meaning of those legal ceremonies which commemorated certain Divine benefits, on account of which they were instituted, and of others similar which belonged to that time, does not go beyond the order of literal causes. Consequently when we assert that the cause of the celebration of the Passover was its signification of the delivery from Egypt, or that circumcision was a sign of God’s covenant with Abraham, we assign the literal cause.

Reply to Objection 2. This argument would avail if the ceremonial precepts had been given merely as figures of things to come, and not for the purpose of worshipping God then and there.

Reply to Objection 3. As we have stated when speaking of human laws (q. 96, Aa. 1, 6), there is a reason for them in the abstract, but not in regard to particular conditions, which depend on the judgment of those who frame them; so also many particular determinations in the ceremonies of the Old Law have no literal cause, but only a figurative cause; whereas in the abstract they have a literal cause.

Objection 1. It would seem that no suitable cause can be assigned for the ceremonies pertaining to sacrifices. For those things which were offered in sacrifice, are those which are necessary for sustaining human life: such as certain animals and certain loaves. But God needs no such sustenance; according to Ps. 49:13: “Shall I eat the flesh of bullocks? Or shall I drink the blood of goats?” Therefore such sacrifices were unfittingly offered to God.

Objection 2. Further, only three kinds of quadrupeds were offered in sacrifice to God, viz. oxen,

sheep and goats; of birds, generally the turtledove and the dove; but specially, in the cleansing of a leper, an offering was made of sparrows. Now many other animals are more noble than these. Since therefore whatever is best should be offered to God, it seems that not only of these three should sacrifices have been offered to Him.

Objection 3. Further, just as man has received from God the dominion over birds and beasts, so also has he received dominion over fishes. Consequently it was unfitting for fishes to be excluded from the divine sacrifices.

Objection 4. Further, turtledoves and doves indifferently are commanded to be offered up. Since then the young of the dove are commanded to be offered, so also should the young of the turtledove.

Objection 5. Further, God is the Author of life, not only of men, but also of animals, as is clear from Gn. 1:20, seqq. Now death is opposed to life. Therefore it was fitting that living animals rather than slain animals should be offered to God, especially as the Apostle admonishes us (Rom. 12:1), to present our bodies “a living sacrifice, holy, pleasing unto God.”

Objection 6. Further, if none but slain animals were offered in sacrifice to God, it seems that it mattered not how they were slain. Therefore it was unfitting that the manner of immolation should be determined, especially as regards birds (Lev. 1:15, seqq.).

Objection 7. Further, every defect in an animal is a step towards corruption and death. If therefore slain animals were offered to God, it was unreasonable to forbid the offering of an imperfect animal, e.g. a lame, or a blind, or otherwise defective animal.

Objection 8. Further, those who offer victims to God should partake thereof, according to the words of the Apostle (1 Cor. 10:18): “Are not they that eat of the sacrifices partakers of the altar?” It was therefore unbecoming for the offerers to be denied certain parts of the victims, namely, the blood, the fat, the breastbone and the right shoulder.

Objection 9. Further, just as holocausts were offered up in honor of God, so also were the peace-offerings and sin-offerings. But no female animals was offered up to God as a holocaust, although holocausts were offered of both quadrupeds and birds. Therefore it was inconsistent that female animals should be offered up in peace-offerings and sin-offerings, and that nevertheless birds should not be offered up in peace-offerings.

Objection 10. Further, all the peace-offerings seem to be of one kind. Therefore it was unfitting to make a distinction among them, so that it was forbidden to eat the flesh of certain peace-offerings on the following day, while it was allowed to eat the flesh of other peace-offerings, as laid down in Lev. 7:15, seqq.

Objection 11. Further, all sins agree in turning us from God. Therefore, in order to reconcile us to God, one kind of sacrifice should have been offered up for all sins.

Objection 12. Further, all animals that were offered up in sacrifice, were offered up in one way, viz. slain. Therefore it does not seem to be suitable that products of the soil should be offered up in various ways; for sometimes an offering was made of ears of corn, sometimes of flour, sometimes of bread, this being baked sometimes in an oven, sometimes in a pan, sometimes on a gridiron.

Objection 13. Further, whatever things are serviceable to us should be recognized as coming from God. It was therefore unbecoming that besides animals, nothing

but bread, wine, oil, incense, and salt should be offered to God.

Objection 14. Further, bodily sacrifices denote the inward sacrifice of the heart, whereby man offers his soul to God. But in the inward sacrifice, the sweetness, which is denoted by honey, surpasses the pungency which salt represents; for it is written (Ecclus. 24:27): “My spirit is sweet above honey.” Therefore it was unbecoming that the use of honey, and of leaven which makes bread savory, should be forbidden in a sacrifice; while the use was prescribed, of salt which is pungent, and of incense which has a bitter taste. Consequently it seems that things pertaining to the ceremonies of the sacrifices have no reasonable cause.

On the contrary, It is written (Lev. 1:13): “The priest shall offer it all and burn it all upon the altar, for a holocaust, and most sweet savor to the Lord.” Now according to Wis. 7:28, “God loveth none but him that dwelleth with wisdom”: whence it seems to follow that whatever is acceptable to God is wisely done. Therefore these ceremonies of the sacrifices were wisely done, as having reasonable causes.

I answer that, As stated above (a. 2), the ceremonies of the Old Law had a twofold cause, viz. a literal cause, according as they were intended for Divine worship; and a figurative or mystical cause, according as they were intended to foreshadow Christ: and on either hand the ceremonies pertaining to the sacrifices can be assigned to a fitting cause.

For, according as the ceremonies of the sacrifices were intended for the divine worship, the causes of the sacrifices can be taken in two ways. First, in so far as the sacrifice represented the directing of the mind to God, to which the offerer of the sacrifice was stimulated. Now in order to direct his mind to God aright, man must recognize that whatever he has is from God as from its first principle, and direct it to God as its last end. This was denoted in the offerings and sacrifices, by the fact that man offered some of his own belongings in honor of God, as though in recognition of his having received them from God, according to the saying of David (1 Paral. xxix, 14): “All things are Thine: and we have given Thee what we received of Thy hand.” Wherefore in offering up sacrifices man made protestation that God is the first principle of the creation of all things, and their last end, to which all things must be directed. And since, for the human mind to be directed to God aright, it must recognize no first author of things other than God, nor place its end in any other; for this reason it was forbidden in the Law to offer sacrifice to any other but God, according to Ex. 22:20: “He that sacrificeth to gods, shall be put to death, save only to the Lord.” Wherefore another reasonable cause may be assigned to the ceremonies of the sacrifices, from the fact that thereby men were withdrawn from offering sacrifices to idols. Hence too it is that the precepts about the sacrifices were not given to the Jewish people until after they had fallen into idolatry, by worshipping the

molten calf: as though those sacrifices were instituted, that the people, being ready to offer sacrifices, might offer those sacrifices to God rather than to idols. Thus it is written (Jer. 7:22): "I spake not to your fathers and I commanded them not, in the day that I brought them out of the land of Egypt, concerning the matter of burnt-offerings and sacrifices."

Now of all the gifts which God vouchsafed to mankind after they had fallen away by sin, the chief is that He gave His Son; wherefore it is written (Jn. 3:16): "God so loved the world, as to give His only-begotten Son; that whosoever believeth in Him, may not perish, but may have life everlasting." Consequently the chief sacrifice is that whereby Christ Himself "delivered Himself. . . to God for an odor of sweetness" (Eph. 5:2). And for this reason all the other sacrifices of the Old Law were offered up in order to foreshadow this one individual and paramount sacrifice—the imperfect forecasting the perfect. Hence the Apostle says (Heb. 10:11) that the priest of the Old Law "often" offered "the same sacrifices, which can never take away sins: but" Christ offered "one sacrifice for sins, for ever." And since the reason of the figure is taken from that which the figure represents, therefore the reasons of the figurative sacrifices of the Old Law should be taken from the true sacrifice of Christ.

Reply to Objection 1. God did not wish these sacrifices to be offered to Him on account of the things themselves that were offered, as though He stood in need of them: wherefore it is written (Is. 1:11): "I desire not holocausts of rams, and fat of fatlings, and blood of calves and lambs and buckgoats." But, as stated above, He wished them to be offered to Him, in order to prevent idolatry; in order to signify the right ordering of man's mind to God; and in order to represent the mystery of the Redemption of man by Christ.

Reply to Objection 2. In all the respects mentioned above (ad 1), there was a suitable reason for these animals, rather than others, being offered in sacrifice to God. First, in order to prevent idolatry. Because idolaters offered all other animals to their gods, or made use of them in their sorceries: while the Egyptians (among whom the people had been dwelling) considered it abominable to slay these animals, wherefore they used not to offer them in sacrifice to their gods. Hence it is written (Ex. 8:26): "We shall sacrifice the abominations of the Egyptians to the Lord our God." For they worshipped the sheep; they revered the ram (because demons appeared under the form thereof); while they employed oxen for agriculture, which was reckoned by them as something sacred.

Secondly, this was suitable for the aforesaid right ordering of man's mind to God: and in two ways. First, because it is chiefly by means of these animals that human life is sustained: and moreover they are most clean, and partake of a most clean food: whereas other animals are either wild, and not deputed to ordinary use among

men: or, if they be tame, they have unclean food, as pigs and geese: and nothing but what is clean should be offered to God. These birds especially were offered in sacrifice because there were plenty of them in the land of promise. Secondly, because the sacrificing of these animals represented purity of heart. Because as the gloss says on Lev. 1, "We offer a calf, when we overcome the pride of the flesh; a lamb, when we restrain our unreasonable motions; a goat, when we conquer wantonness; a turtledove, when we keep chaste; unleavened bread, when we feast on the unleavened bread of sincerity." And it is evident that the dove denotes charity and simplicity of heart.

Thirdly, it was fitting that these animals should be offered, that they might foreshadow Christ. Because, as the gloss observes, "Christ is offered in the calf, to denote the strength of the cross; in the lamb, to signify His innocence; in the ram, to foreshadow His headship; and in the goat, to signify the likeness of 'sinful flesh'*. The turtledove and dove denoted the union of the two natures"; or else the turtledove signified chastity; while the dove was a figure of charity. "The wheat-flour foreshadowed the sprinkling of believers with the water of Baptism."

Reply to Objection 3. Fish through living in water are further removed from man than other animals, which, like man, live in the air. Again, fish die as soon as they are taken out of water; hence they could not be offered in the temple like other animals.

Reply to Objection 4. Among turtledoves the older ones are better than the young; while with doves the case is the reverse. Wherefore, as Rabbi Moses observes (Doct. Perplex. iii), turtledoves and young doves are commanded to be offered, because nothing should be offered to God but what is best.

Reply to Objection 5. The animals which were offered in sacrifice were slain, because it is by being killed that they become useful to man, forasmuch as God gave them to man for food. Wherefore also they were burnt with fire: because it is by being cooked that they are made fit for human consumption. Moreover the slaying of the animals signified the destruction of sins: and also that man deserved death on account of his sins; as though those animals were slain in man's stead, in order to betoken the expiation of sins. Again the slaying of these animals signified the slaying of Christ.

Reply to Objection 6. The Law fixed the special manner of slaying the sacrificial animals in order to exclude other ways of killing, whereby idolaters sacrificed animals to idols. Or again, as Rabbi Moses says (Doct. Perplex. iii), "the Law chose that manner of slaying which was least painful to the slain animal." This excluded cruelty on the part of the offerers, and any mangling of the animals slain.

Reply to Objection 7. It is because unclean animals are wont to be held in contempt among men, that it was forbidden to offer them in sacrifice to God: and for this

* An allusion to Col. 2:11 (Textus Receptus)

reason too they were forbidden (Dt. 23:18) to offer “the hire of a strumpet or the price of a dog in the house of . . . God.” For the same reason they did not offer animals before the seventh day, because such were abortive as it were, the flesh being not yet firm on account of its exceeding softness.

Reply to Objection 8. There were three kinds of sacrifices. There was one in which the victim was entirely consumed by fire: this was called “a holocaust, i.e. all burnt.” For this kind of sacrifice was offered to God specially to show reverence to His majesty, and love of His goodness: and typified the state of perfection as regards the fulfilment of the counsels. Wherefore the whole was burnt up: so that as the whole animal by being dissolved into vapor soared aloft, so it might denote that the whole man, and whatever belongs to him, are subject to the authority of God, and should be offered to Him.

Another sacrifice was the “sin-offering,” which was offered to God on account of man’s need for the forgiveness of sin: and this typifies the state of penitents in satisfying for sins. It was divided into two parts: for one part was burnt; while the other was granted to the use of the priests to signify that remission of sins is granted by God through the ministry of His priests. When, however, this sacrifice was offered for the sins of the whole people, or specially for the sin of the priest, the whole victim was burnt up. For it was not fitting that the priests should have the use of that which was offered for their own sins, to signify that nothing sinful should remain in them. Moreover, this would not be satisfaction for sin: for if the offering were granted to the use of those for whose sins it was offered, it would seem to be the same as if it had not been offered.

The third kind of sacrifice was called the “peace-offering,” which was offered to God, either in thanksgiving, or for the welfare and prosperity of the offerers, in acknowledgment of benefits already received or yet to be received: and this typifies the state of those who are proficient in the observance of the commandments. These sacrifices were divided into three parts: for one part was burnt in honor of God; another part was allotted to the use of the priests; and the third part to the use of the offerers; in order to signify that man’s salvation is from God, by the direction of God’s ministers, and through the cooperation of those who are saved.

But it was the universal rule that the blood and fat were not allotted to the use either of the priests or of the offerers: the blood being poured out at the foot of the altar, in honor of God, while the fat was burnt upon the altar (Lev. 9:9,10). The reason for this was, first, in order to prevent idolatry: because idolaters used to drink the blood and eat the fat of the victims, according to Dt. 32:38: “Of whose victims they eat the fat, and drank the wine of their drink-offerings.” Secondly, in order to form them to a right way of living. For they were forbidden the use of the blood that they might abhor the shedding of human blood; wherefore it is written

(Gn. 9:4,5): “Flesh with blood you shall not eat: for I will require the blood of your lives”: and they were forbidden to eat the fat, in order to withdraw them from lasciviousness; hence it is written (Ezech. 34:3): “You have killed that which was fat.” Thirdly, on account of the reverence due to God: because blood is most necessary for life, for which reason “life” is said to be “in the blood” (Lev. 17:11,14): while fat is a sign of abundant nourishment. Wherefore, in order to show that to God we owe both life and a sufficiency of all good things, the blood was poured out, and the fat burnt up in His honor. Fourthly, in order to foreshadow the shedding of Christ’s blood, and the abundance of His charity, whereby He offered Himself to God for us.

In the peace-offerings, the breast-bone and the right shoulder were allotted to the use of the priest, in order to prevent a certain kind of divination which is known as “spatulamantia,” so called because it was customary in divining to use the shoulder-blade [spatula], and the breast-bone of the animals offered in sacrifice; wherefore these things were taken away from the offerers. This is also denoted the priest’s need of wisdom in the heart, to instruct the people—this was signified by the breast-bone, which covers the heart; and his need of fortitude, in order to bear with human frailty—and this was signified by the right shoulder.

Reply to Objection 9. Because the holocaust was the most perfect kind of sacrifice, therefore none but a male was offered for a holocaust: because the female is an imperfect animal. The offering of turtledoves and doves was on account of the poverty of the offerers, who were unable to offer bigger animals. And since peace-victims were offered freely, and no one was bound to offer them against his will, hence these birds were offered not among the peace-victims, but among the holocausts and victims for sin, which man was obliged to offer at times. Moreover these birds, on account of their lofty flight, while befitting the perfection of the holocausts: and were suitable for sin-offerings because their song is doleful.

Reply to Objection 10. The holocaust was the chief of all the sacrifices: because all were burnt in honor of God, and nothing of it was eaten. The second place in holiness, belongs to the sacrifice for sins, which was eaten in the court only, and on the very day of the sacrifice (Lev. 7:6,15). The third place must be given to the peace-offerings of thanksgiving, which were eaten on the same day, but anywhere in Jerusalem. Fourth in order were the “ex-voto” peace-offerings, the flesh of which could be eaten even on the morrow. The reason for this order is that man is bound to God, chiefly on account of His majesty; secondly, on account of the sins he has committed; thirdly, because of the benefits he has already received from Him; fourthly, by reason of the benefits he hopes to receive from Him.

Reply to Objection 11. Sins are more grievous by reason of the state of the sinner, as stated above (q. 73, a. 10): wherefore different victims are commanded to

be offered for the sin of a priest, or of a prince, or of some other private individual. "But," as Rabbi Moses says (Doct. Perplex. iii), "we must take note that the more grievous the sin, the lower the species of animals offered for it. Wherefore the goat, which is a very base animal, was offered for idolatry; while a calf was offered for a priest's ignorance, and a ram for the negligence of a prince."

Reply to Objection 12. In the matter of sacrifices the Law had in view the poverty of the offerers; so that those who could not have a four-footed animal at their disposal, might at least offer a bird; and that he who could not have a bird might at least offer bread; and that if a man had not even bread he might offer flour or ears of corn.

The figurative cause is that the bread signifies Christ Who is the "living bread" (Jn. 6:41,51). He was indeed an ear of corn, as it were, during the state of the law of nature, in the faith of the patriarchs; He was like flour in the doctrine of the Law of the prophets; and He was like perfect bread after He had taken human nature; baked in the fire, i.e. formed by the Holy Ghost in the oven of the virginal womb; baked again in a pan by the toils which He suffered in the world; and consumed by fire on the cross as on a gridiron.

Reply to Objection 13. The products of the soil are useful to man, either as food, and of these bread was of-

fered; or as drink, and of these wine was offered; or as seasoning, and of these oil and salt were offered; or as healing, and of these they offered incense, which both smells sweetly and binds easily together.

Now the bread foreshadowed the flesh of Christ; and the wine, His blood, whereby we were redeemed; oil betokens the grace of Christ; salt, His knowledge; incense, His prayer.

Reply to Objection 14. Honey was not offered in the sacrifices to God, both because it was wont to be offered in the sacrifices to idols; and in order to denote the absence of all carnal sweetness and pleasure from those who intend to sacrifice to God. Leaven was not offered, to denote the exclusion of corruption. Perhaps too, it was wont to be offered in the sacrifices to idols.

Salt, however, was offered, because it wards off the corruption of putrefaction: for sacrifices offered to God should be incorrupt. Moreover, salt signifies the discretion of wisdom, or again, mortification of the flesh.

Incense was offered to denote devotion of the heart, which is necessary in the offerer; and again, to signify the odor of a good name: for incense is composed of matter, both rich and fragrant. And since the sacrifice "of jealousy" did not proceed from devotion, but rather from suspicion, therefore incense was not offered therein (Num. 5:15).

Whether sufficient reason can be assigned for the ceremonies pertaining to holy things? Ia IIae q. 102 a. 4

Objection 1. It would seem that no sufficient reason can be assigned for the ceremonies of the Old Law that pertain to holy things. For Paul said (Acts 17:24): "God Who made the world and all things therein; He being Lord of heaven and earth, dwelleth not in temples made by hands." It was therefore unfitting that in the Old Law a tabernacle or temple should be set up for the worship of God.

Objection 2. Further, the state of the Old Law was not changed except by Christ. But the tabernacle denoted the state of the Old Law. Therefore it should not have been changed by the building of a temple.

Objection 3. Further, the Divine Law, more than any other indeed, should lead man to the worship of God. But an increase of divine worship requires multiplication of altars and temples; as is evident in regard to the New Law. Therefore it seems that also under the Old Law there should have been not only one tabernacle or temple, but many.

Objection 4. Further, the tabernacle or temple was ordained to the worship of God. But in God we should worship above all His unity and simplicity. Therefore it seems unbecoming for the tabernacle or temple to be divided by means of veils.

Objection 5. Further, the power of the First Mover, i.e. God, appears first of all in the east, for it is in that quarter that the first movement begins. But the taber-

nacle was set up for the worship of God. Therefore it should have been built so as to point to the east rather than the west.

Objection 6. Further, the Lord commanded (Ex. 20:4) that they should "not make... a graven thing, nor the likeness of anything." It was therefore unfitting for graven images of the cherubim to be set up in the tabernacle or temple. In like manner, the ark, the propitiatory, the candlestick, the table, the two altars, seem to have been placed there without reasonable cause.

Objection 7. Further, the Lord commanded (Ex. 20:24): "You shall make an altar of earth unto Me"; and again (Ex. 20:26): "Thou shalt not go up by steps unto My altar." It was therefore unfitting that subsequently they should be commanded to make an altar of wood laid over with gold or brass; and of such a height that it was impossible to go up to it except by steps. For it is written (Ex. 27:1,2): "Thou shalt make also an altar of setim wood, which shall be five cubits long, and as many broad... and three cubits high... and thou shalt cover it with brass"; and (Ex. 30:1,3): "Thou shalt make... an altar to burn incense, of setim wood... and thou shalt overlay it with the purest gold."

Objection 8. Further, in God's works nothing should be superfluous; for not even in the works of nature is anything superfluous to be found. But one cover suffices for one tabernacle or house. Therefore it was

unbecoming to furnish the tabernacle with many coverings, viz. curtains, curtains of goats' hair, rams' skins dyed red, and violet-colored skins (Ex. 26).

Objection 9. Further, exterior consecration signifies interior holiness, the subject of which is the soul. It was therefore unsuitable for the tabernacle and its vessels to be consecrated, since they were inanimate things.

Objection 10. Further, it is written (Ps. 33:2): "I will bless the Lord at all times, His praise shall always be in my mouth." But the solemn festivals were instituted for the praise of God. Therefore it was not fitting that certain days should be fixed for keeping solemn festivals; so that it seems that there was no suitable cause for the ceremonies relating to holy things.

On the contrary, The Apostle says (Heb. 8:4) that those who "offer gifts according to the law. . . serve unto the example and shadow of heavenly things. As it was answered to Moses, when he was to finish the tabernacle: See, says He, that thou make all things according to the pattern which was shown thee on the mount." But that is most reasonable, which presents a likeness to heavenly things. Therefore the ceremonies relating to holy things had a reasonable cause.

I answer that, The chief purpose of the whole external worship is that man may give worship to God. Now man's tendency is to reverence less those things which are common, and indistinct from other things; whereas he admires and reveres those things which are distinct from others in some point of excellence. Hence too it is customary among men for kings and princes, who ought to be revered by their subjects, to be clothed in more precious garments, and to possess vaster and more beautiful abodes. And for this reason it behooved special times, a special abode, special vessels, and special ministers to be appointed for the divine worship, so that thereby the soul of man might be brought to greater reverence for God.

In like manner the state of the Old Law, as observed above (a. 2; q. 100, a. 12; q. 101, a. 2), was instituted that it might foreshadow the mystery of Christ. Now that which foreshadows something should be determinate, so that it may present some likeness thereto. Consequently, certain special points had to be observed in matters pertaining to the worship of God.

Reply to Objection 1. The divine worship regards two things: namely, God Who is worshipped; and men, who worship Him. Accordingly God, Who is worshipped, is confined to no bodily place: wherefore there was no need, on His part, for a tabernacle or temple to be set up. But men, who worship Him, are corporeal beings: and for their sake there was need for a special tabernacle or temple to be set up for the worship of God, for two reasons. First, that through coming together with the thought that the place was set aside for the worship of God, they might approach thither with greater reverence. Secondly, that certain things relating to the excellence of Christ's Divine or human nature might be signified by the arrangement of various details

in such temple or tabernacle.

To this Solomon refers (3 Kings 8:27) when he says: "If heaven and the heavens of heavens cannot contain Thee, how much less this house which I have built" for Thee? And further on (3 Kings 8:29,20) he adds: "That Thy eyes may be open upon this house. . . of which Thou hast said: My name shall be there;. . . that Thou mayest hearken to the supplication of Thy servant and of Thy people Israel." From this it is evident that the house of the sanctuary was set up, not in order to contain God, as abiding therein locally, but that God might be made known there by means of things done and said there; and that those who prayed there might, through reverence for the place, pray more devoutly, so as to be heard more readily.

Reply to Objection 2. Before the coming of Christ, the state of the Old Law was not changed as regards the fulfilment of the Law, which was effected in Christ alone: but it was changed as regards the condition of the people that were under the Law. Because, at first, the people were in the desert, having no fixed abode: afterwards they were engaged in various wars with the neighboring nations; and lastly, at the time of David and Solomon, the state of that people was one of great peace. And then for the first time the temple was built in the place which Abraham, instructed by God, had chosen for the purpose of sacrifice. For it is written (Gn. 22:2) that the Lord commanded Abraham to "offer" his son "for a holocaust upon one of the mountains which I will show thee": and it is related further on (Gn. 22:14) that "he calleth the name of that place, The Lord seeth," as though, according to the Divine provision, that place were chosen for the worship of God. Hence it is written (Dt. 12:5,6): "You shall come to the place which the Lord your God shall choose. . . and you shall offer. . . your holocausts and victims."

Now it was not meet for that place to be pointed out by the building of the temple before the aforesaid time; for three reasons assigned by Rabbi Moses. First, lest the Gentiles might seize hold of that place. Secondly, lest the Gentiles might destroy it. The third reason is lest each tribe might wish that place to fall to their lot, and strifes and quarrels be the result. Hence the temple was not built until they had a king who would be able to quell such quarrels. Until that time a portable tabernacle was employed for divine worship, no place being as yet fixed for the worship of God. This is the literal reason for the distinction between the tabernacle and the temple.

The figurative reason may be assigned to the fact that they signify a twofold state. For the tabernacle, which was changeable, signifies the state of the present changeable life: whereas the temple, which was fixed and stable, signifies the state of future life which is altogether unchangeable. For this reason it is said that in the building of the temple no sound was heard of hammer or saw, to signify that all movements of disturbance will be far removed from the future state. Or else the tabernacle

signifies the state of the Old Law; while the temple built by Solomon betokens the state of the New Law. Hence the Jews alone worked at the building of the tabernacle; whereas the temple was built with the cooperation of the Gentiles, viz. the Tyrians and Sidonians.

Reply to Objection 3. The reason for the unity of the temple or tabernacle may be either literal or figurative. The literal reason was the exclusion of idolatry. For the Gentiles put up various times to various gods; and so, to strengthen in the minds of men their belief in the unity of the Godhead, God wished sacrifices to be offered to Him in one place only. Another reason was in order to show that bodily worship is not acceptable of itself: and so they restrained from offering sacrifices anywhere and everywhere. But the worship of the New Law, in the sacrifice whereof spiritual grace is contained, is of itself acceptable to God; and consequently the multiplication of altars and temples is permitted in the New Law.

As to those matters that regarded the spiritual worship of God, consisting in the teaching of the Law and the Prophets, there were, even under the Old Law, various places, called synagogues, appointed for the people to gather together for the praise of God; just as now there are places called churches in which the Christian people gather together for the divine worship. Thus our church takes the place of both temple and synagogue: since the very sacrifice of the Church is spiritual; wherefore with us the place of sacrifice is not distinct from the place of teaching. The figurative reason may be that hereby is signified the unity of the Church, whether militant or triumphant.

Reply to Objection 4. Just as the unity of the temple or tabernacle betokened the unity of God, or the unity of the Church, so also the division of the tabernacle or temple signified the distinction of those things that are subject to God, and from which we arise to the worship of God. Now the tabernacle was divided into two parts: one was called the "Holy of Holies," and was placed to the west; the other was called the "Holy Place"*², which was situated to the east. Moreover there was a court facing the tabernacle. Accordingly there are two reasons for this distinction. One is in respect of the tabernacle being ordained to the worship of God. Because the different parts of the world are thus betokened by the division of the tabernacle. For that part which was called the Holy of Holies signified the higher world, which is that of spiritual substances: while that part which is called the Holy Place signified the corporeal world. Hence the Holy Place was separated from the Holy of Holies by a veil, which was of four different colors (denoting the four elements), viz. of linen, signifying earth, because linen, i.e. flax, grows out of the earth; purple, signifying water, because the purple tint was made from certain shells found in the sea; violet, signifying air, because it has the color of the air; and scarlet twice dyed, signifying fire: and this because

matter composed of the four elements is a veil between us and incorporeal substances. Hence the high-priest alone, and that once a year, entered into the inner tabernacle, i.e. the Holy of Holies: whereby we are taught that man's final perfection consists in his entering into that (higher) world: whereas into the outward tabernacle, i.e. the Holy Place, the priests entered every day: whereas the people were only admitted to the court; because the people were able to perceive material things, the inner nature of which only wise men by dint of study are able to discover.

But regard to the figurative reason, the outward tabernacle, which was called the Holy Place, betokened the state of the Old Law, as the Apostle says (Heb. 9:6, seqq.): because into that tabernacle "the priests always entered accomplishing the offices of sacrifices." But the inner tabernacle, which was called the Holy of Holies, signified either the glory of heaven or the spiritual state of the New Law to come. To the latter state Christ brought us; and this was signified by the high-priest entering alone, once a year, into the Holy of Holies. The veil betokened the concealing of the spiritual sacrifices under the sacrifices of old. This veil was adorned with four colors: viz. that of linen, to designate purity of the flesh; purple, to denote the sufferings which the saints underwent for God; scarlet twice dyed, signifying the twofold love of God and our neighbor; and violet, in token of heavenly contemplation. With regard to the state of the Old Law the people and the priests were situated differently from one another. For the people saw the mere corporeal sacrifices which were offered in the court: whereas the priests were intent on the inner meaning of the sacrifices, because their faith in the mysteries of Christ was more explicit. Hence they entered into the outer tabernacle. This outer tabernacle was divided from the court by a veil; because some matters relating to the mystery of Christ were hidden from the people, while they were known to the priests: though they were not fully revealed to them, as they were subsequently in the New Testament (cf. Eph. 3:5).

Reply to Objection 5. Worship towards the west was introduced in the Law to the exclusion of idolatry: because all the Gentiles, in reverence to the sun, worshipped towards the east; hence it is written (Ezech. 8:16) that certain men "had their backs towards the temple of the Lord, and their faces to the east, and they adored towards the rising of the sun." Accordingly, in order to prevent this, the tabernacle had the Holy of Holies to westward, that they might adore toward the west. A figurative reason may also be found in the fact that the whole state of the first tabernacle was ordained to foreshadow the death of Christ, which is signified by the west, according to Ps. 67:5: "Who ascendeth unto the west; the Lord is His name."

Reply to Objection 6. Both literal and figurative reasons may be assigned for the things contained in the tabernacle. The literal reason is in connection with the

* Or 'Sanctuary'. The Douay version uses both expressions

divine worship. And because, as already observed (ad 4), the inner tabernacle, called the Holy of Holies, signified the higher world of spiritual substances, hence that tabernacle contained three things, viz. “the ark of the testament in which was a golden pot that had manna, and the rod of Aaron that had blossomed, and the tables” (Heb. 9:4) on which were written the ten commandments of the Law. Now the ark stood between two “cherubim” that looked one towards the other: and over the ark was a table, called the “propitiatory,” raised above the wings of the cherubim, as though it were held up by them; and appearing, to the imagination, to be the very seat of God. For this reason it was called the “propitiatory,” as though the people received propitiation thence at the prayers of the high-priest. And so it was held up, so to speak, by the cherubim, in obedience, as it were, to God: while the ark of the testament was like the foot-stool to Him that sat on the propitiatory. These three things denote three things in that higher world: namely, God Who is above all, and incomprehensible to any creature. Hence no likeness of Him was set up; to denote His invisibility. But there was something to represent his seat; since, to wit, the creature, which is beneath God, as the seat under the sitter, is comprehensible. Again in that higher world there are spiritual substances called angels. These are signified by the two cherubim, looking one towards the other, to show that they are at peace with one another, according to Job 25:2: “Who maketh peace in . . . high places.” For this reason, too, there was more than one cherub, to betoken the multitude of heavenly spirits, and to prevent their receiving worship from those who had been commanded to worship but one God. Moreover there are, enclosed as it were in that spiritual world, the intelligible types of whatsoever takes place in this world, just as in every cause are enclosed the types of its effects, and in the craftsman the types of the works of his craft. This was betokened by the ark, which represented, by means of the three things it contained, the three things of greatest import in human affairs. These are wisdom, signified by the tables of the testament; the power of governing, betokened by the rod of Aaron; and life, betokened by the manna which was the means of sustenance. Or else these three things signified the three Divine attributes, viz. wisdom, in the tables; power, in the rod; goodness, in the manna—both by reason of its sweetness, and because it was through the goodness of God that it was granted to man, wherefore it was preserved as a memorial of the Divine mercy. Again, these three things were represented in Isaias’ vision. For he “saw the Lord sitting upon a throne high and elevated”; and the seraphim standing by; and that the house was filled with the glory of the Lord; wherefrom the seraphim cried out: “All the earth is full of His glory” (Is. 6:1,3). And so the images of the seraphim were set up, not to be worshipped, for this was forbidden by the first commandment; but as a sign of their function, as stated above.

The outer tabernacle, which denotes this present

world, also contained three things, viz. the “altar of incense,” which was directly opposite the ark; the “table of proposition,” with the twelve loaves of proposition on it, which stood on the northern side; and the “candlestick,” which was placed towards the south. These three things seem to correspond to the three which were enclosed in the ark; and they represented the same things as the latter, but more clearly: because, in order that wise men, denoted by the priests entering the temple, might grasp the meaning of these types, it was necessary to express them more manifestly than they are in the Divine or angelic mind. Accordingly the candlestick betokened, as a sensible sign thereof, the wisdom which was expressed on the tables (of the Law) in intelligible words. The altar of incense signified the office of the priest, whose duty it was to bring the people to God: and this was signified also by the rod: because on that altar the sweet-smelling incense was burnt, signifying the holiness of the people acceptable to God: for it is written (Apoc. 8:3) that the smoke of the sweet-smelling spices signifies the “justifications of the saints” (cf. Apoc. 19:8). Moreover it was fitting that the dignity of the priesthood should be denoted, in the ark, by the rod, and, in the outer tabernacle, by the altar of incense: because the priest is the mediator between God and the people, governing the people by Divine power, denoted by the rod; and offering to God the fruit of His government, i.e. the holiness of the people, on the altar of incense, so to speak. The table signified the sustenance of life, just as the manna did: but the former, a more general and a coarser kind of nourishment; the latter, a sweeter and more delicate. Again, the candlestick was fittingly placed on the southern side, while the table was placed to the north: because the south is the right-hand side of the world, while the north is the left-hand side, as stated in *De Coelo et Mundo* ii; and wisdom, like other spiritual goods, belongs to the right hand, while temporal nourishment belongs on the left, according to Prov. 3:16: “In her left hand (are) riches and glory.” And the priestly power is midway between temporal goods and spiritual wisdom; because thereby both spiritual wisdom and temporal goods are dispensed.

Another literal signification may be assigned. For the ark contained the tables of the Law, in order to prevent forgetfulness of the Law, wherefore it is written (Ex. 24:12): “I will give thee two tables of stone, and the Law, and the commandments which I have written: that thou mayest teach them” to the children of Israel. The rod of Aaron was placed there to restrain the people from insubordination to the priesthood of Aaron; wherefore it is written (Num. 17:10): “Carry back the rod of Aaron into the tabernacle of the testimony, that it may be kept there for a token of the rebellious children of Israel.” The manna was kept in the ark to remind them of the benefit conferred by God on the children of Israel in the desert; wherefore it is written (Ex. 16:32): “Fill a gomor of it, and let it be kept unto generations

to come hereafter, that they may know the bread wherewith I fed you in the wilderness.” The candlestick was set up to enhance the beauty of the temple, for the magnificence of a house depends on its being well lighted. Now the candlestick had seven branches, as Josephus observes (*Antiquit.* iii, 7,8), to signify the seven planets, wherewith the whole world is illuminated. Hence the candlestick was placed towards the south; because for us the course of the planets is from that quarter. The altar of incense was instituted that there might always be in the tabernacle a sweet-smelling smoke; both through respect for the tabernacle, and as a remedy for the stench arising from the shedding of blood and the slaying of animals. For men despise evil-smelling things as being vile, whereas sweet-smelling things are much appreciated. The table was placed there to signify that the priests who served the temple should take their food in the temple: wherefore, as stated in *Mat.* 12:4, it was lawful for none but the priests to eat the twelve loaves which were put on the table in memory of the twelve tribes. And the table was not placed in the middle directly in front of the propitiatory, in order to exclude an idolatrous rite: for the Gentiles, on the feasts of the moon, set up a table in front of the idol of the moon, wherefore it is written (*Jer.* 7:18): “The women knead the dough, to make cakes to the queen of heaven.”

In the court outside the tabernacle was the altar of holocausts, on which sacrifices of those things which the people possessed were offered to God: and consequently the people who offered these sacrifices to God by the hands of the priest could be present in the court. But the priests alone, whose function it was to offer the people to God, could approach the inner altar, whereon the very devotion and holiness of the people was offered to God. And this altar was put up outside the tabernacle and in the court, to the exclusion of idolatrous worship: for the Gentiles placed altars inside the temples to offer up sacrifices thereon to idols.

The figurative reason for all these things may be taken from the relation of the tabernacle to Christ, who was foreshadowed therein. Now it must be observed that to show the imperfection of the figures of the Law, various figures were instituted in the temple to betoken Christ. For He was foreshadowed by the “propitiatory,” since He is “a propitiation for our sins” (*1 Jn.* 2:2). This propitiatory was fittingly carried by cherubim, since of Him it is written (*Heb.* 1:6): “Let all the angels of God adore Him.” He is also signified by the ark: because just as the ark was made of setim-wood, so was Christ’s body composed of most pure members. Moreover it was gilded: for Christ was full of wisdom and charity, which are betokened by gold. And in the ark was a golden pot, i.e. His holy soul, having manna, i.e. “all the fulness of the Godhead” (*Col.* 2:9). Also there was a rod in the ark, i.e. His priestly power: for “He was made a . . . priest for ever” (*Heb.* 6:20). And therein were the tables of the Testament, to denote that Christ Himself is a lawgiver. Again, Christ was signi-

fied by the candlestick, for He said Himself (*Jn.* 8:12): “I am the Light of the world”; while the seven lamps denoted the seven gifts of the Holy Ghost. He is also betokened in the table, because He is our spiritual food, according to *Jn.* 6:41,51: “I am the living bread”: and the twelve loaves signified the twelve apostles, or their teaching. Or again, the candlestick and table may signify the Church’s teaching, and faith, which also enlightens and refreshes. Again, Christ is signified by the two altars of holocausts and incense. Because all works of virtue must be offered to us to God through Him; both those whereby we afflict the body, which are offered, as it were, on the altar of holocausts; and those which, with greater perfection of mind, are offered to God in Christ, by the spiritual desires of the perfect, on the altar of incense, as it were, according to *Heb.* 13:15: “By Him therefore let us offer the sacrifice of praise always to God.”

Reply to Objection 7. The Lord commanded an altar to be made for the offering of sacrifices and gifts, in honor of God, and for the upkeep of the ministers who served the tabernacle. Now concerning the construction of the altar the Lord issued a twofold precept. One was at the beginning of the Law (*Ex.* 20:24, seqq.) when the Lord commanded them to make “an altar of earth,” or at least “not of hewn stones”; and again, not to make the altar high, so as to make it necessary to “go up” to it “by steps.” This was in detestation of idolatrous worship: for the Gentiles made their altars ornate and high, thinking that there was something holy and divine in such things. For this reason, too, the Lord commanded (*Dt.* 16:21): “Thou shalt plant no grove, nor any tree near the altar of the Lord thy God”: since idolaters were wont to offer sacrifices beneath trees, on account of the pleasantness and shade afforded by them. There was also a figurative reason for these precepts. Because we must confess that in Christ, Who is our altar, there is the true nature of flesh, as regards His humanity—and this is to make an altar of earth; and again, in regard to His Godhead, we must confess His equality with the Father—and this is “not to go up” to the altar by steps. Moreover we should not couple the doctrine of Christ to that of the Gentiles, which provokes men to lewdness.

But when once the tabernacle had been constructed to the honor of God, there was no longer reason to fear these occasions of idolatry. Wherefore the Lord commanded the altar of holocausts to be made of brass, and to be conspicuous to all the people; and the altar of incense, which was visible to none but the priests. Nor was brass so precious as to give the people an occasion for idolatry.

Since, however, the reason for the precept, “Thou shalt not go up by steps unto My altar” (*Ex.* 20:26) is stated to have been “lest thy nakedness be discovered,” it should be observed that this too was instituted with the purpose of preventing idolatry, for in the feasts of Priapus the Gentiles uncovered their nakedness before the people. But later on the priests were prescribed the

use of loin-cloths for the sake of decency: so that without any danger the altar could be placed so high that the priests when offering sacrifices would go up by steps of wood, not fixed but movable.

Reply to Objection 8. The body of the tabernacle consisted of boards placed on end, and covered on the inside with curtains of four different colors, viz. twisted linen, violet, purple, and scarlet twice dyed. These curtains, however, covered the sides only of the tabernacle; and the roof of the tabernacle was covered with violet-colored skins; and over this there was another covering of rams' skins dyed red; and over this there was a third curtain made of goats' hair, which covered not only the roof of the tabernacle, but also reached to the ground and covered the boards of the tabernacle on the outside. The literal reason of these coverings taken altogether was the adornment and protection of the tabernacle, that it might be an object of respect. Taken singly, according to some, the curtains denoted the starry heaven, which is adorned with various stars; the curtain (of goats' skin) signified the waters which are above the firmament; the skins dyed red denoted the empyrean heaven, where the angels are; the violet skins, the heaven of the Blessed Trinity.

The figurative meaning of these things is that the boards of which the tabernacle was constructed signify the faithful of Christ, who compose the Church. The boards were covered on the inner side by curtains of four colors: because the faithful are inwardly adorned with the four virtues: for "the twisted linen," as the gloss observes, "signifies the flesh refulgent with purity; violet signifies the mind desirous of heavenly things; purple denotes the flesh subject to passions; the twice dyed scarlet betokens the mind in the midst of the passions enlightened by the love of God and our neighbor." The coverings of the building designate prelates and doctors, who ought to be conspicuous for their heavenly manner of life, signified by the violet colored skins: and who should also be ready to suffer martyrdom, denoted by the skins dyed red; and austere of life and patient in adversity, betokened by the curtains of goats' hair, which were exposed to wind and rain, as the gloss observes.

Reply to Objection 9. The literal reason for the sanctification of the tabernacle and vessels was that they might be treated with greater reverence, being deputed, as it were, to the divine worship by this consecration. The figurative reason is that this sanctification signified the sanctification of the living tabernacle, i.e. the faithful of whom the Church of Christ is composed.

Reply to Objection 10. Under the Old Law there were seven temporal solemnities, and one continual solemnity, as may be gathered from Num. 28,29. There was a continual feast, since the lamb was sacrificed every day, morning and evening: and this continual feast of an abiding sacrifice signified the perpetuity of Divine bliss. Of the temporal feasts the first was that which was repeated every week. This was the solemnity of the

"Sabbath," celebrated in memory of the work of the creation of the universe. Another solemnity, viz. the "New Moon," was repeated every month, and was observed in memory of the work of the Divine government. For the things of this lower world owe their variety chiefly to the movement of the moon; wherefore this feast was kept at the new moon: and not at the full moon, to avoid the worship of idolaters who used to offer sacrifices to the moon at that particular time. And these two blessings are bestowed in common on the whole human race; and hence they were repeated more frequently.

The other five feasts were celebrated once a year: and they commemorated the benefits which had been conferred especially on that people. For there was the feast of the "Passover" in the first month to commemorate the blessing of being delivered out of Egypt. The feast of "Pentecost" was celebrated fifty days later, to recall the blessing of the giving of the Law. The other three feasts were kept in the seventh month, nearly the whole of which was solemnized by them, just as the seventh day. For on the first of the seventh month was the feast of "Trumpets," in memory of the delivery of Isaac, when Abraham found the ram caught by its horns, which they represented by the horns which they blew. The feast of Trumpets was a kind of invitation whereby they prepared themselves to keep the following feast which was kept on the tenth day. This was the feast of "Expiation," in memory of the blessing whereby, at the prayer of Moses, God forgave the people's sin of worshipping the calf. After this was the feast of "Scenopegia" or of "Tents," which was kept for seven days, to commemorate the blessing of being protected and led by God through the desert, where they lived in tents. Hence during this feast they had to take "the fruits of the fairest tree," i.e. the citron, "and the trees of dense foliage"*, i.e. the myrtle, which is fragrant, "and the branches of palm-trees, and willows of the brook," which retain their greenness a long time; and these are to be found in the Land of promise; to signify that God had brought them through the arid land of the wilderness to a land of delights. On the eighth day another feast was observed, of "Assembly and Congregation," on which the people collected the expenses necessary for the divine worship: and it signified the uniting of the people and the peace granted to them in the Land of promise.

The figurative reason for these feasts was that the continual sacrifice of the lamb foreshadowed the perpetuity of Christ, Who is the "Lamb of God," according to Heb. 13:8: "Jesus Christ yesterday and today, and the same for ever." The Sabbath signified the spiritual rest bestowed by Christ, as stated in Heb. 4. The Neomenia, which is the beginning of the new moon, signified the enlightening of the primitive Church by Christ's preaching and miracles. The feast of Pentecost signified the Descent of the Holy Ghost on the apostles. The feast of Trumpets signified the preaching of the apos-

* Douay and A. V. and R. V. read: 'Boughs of thick trees'

bles. The feast of Expiation signified the cleansing of the Christian people from sins: and the feast of Tabernacles signified their pilgrimage in this world, wherein they walk by advancing in virtue. The feast of Assembly or Congregation foreshadowed the assembly of the

faithful in the kingdom of heaven: wherefore this feast is described as “most holy” (Lev. 23:36). These three feasts followed immediately on one another, because those who expiate their vices should advance in virtue, until they come to see God, as stated in Ps. 83:8.

Whether there can be any suitable cause for the sacraments of the Old Law?

Ia IIae q. 102 a. 5

Objection 1. It would seem that there can be no suitable cause for the sacraments of the Old Law. Because those things that are done for the purpose of divine worship should not be like the observances of idolaters: since it is written (Dt. 12:31): “Thou shalt not do in like manner to the Lord thy God: for they have done to their gods all the abominations which the Lord abhorreth.” Now worshippers of idols used to knife themselves to the shedding of blood: for it is related (3 Kings 18:28) that they “cut themselves after their manner with knives and lancets, till they were all covered with blood.” For this reason the Lord commanded (Dt. 14:1): “You shall not cut yourselves nor make any baldness for the dead.” Therefore it was unfitting for circumcision to be prescribed by the Law (Lev. 12:3).

Objection 2. Further, those things which are done for the worship of God should be marked with decorum and gravity; according to Ps. 34:18: “I will praise Thee in a grave [Douay: ‘strong’] people.” But it seems to savor of levity for a man to eat with haste. Therefore it was unfittingly commanded (Ex. 12:11) that they should eat the Paschal lamb “in haste.” Other things too relative to the eating of the lamb were prescribed, which seem altogether unreasonable.

Objection 3. Further, the sacraments of the Old Law were figures of the sacraments of the New Law. Now the Paschal lamb signified the sacrament of the Eucharist, according to 1 Cor. 5:7: “Christ our Pasch is sacrificed.” Therefore there should also have been some sacraments of the Old Law to foreshadow the other sacraments of the New Law, such as Confirmation, Extreme Unction, and Matrimony, and so forth.

Objection 4. Further, purification can scarcely be done except by removing something impure. But as far as God is concerned, no bodily thing is reputed impure, because all bodies are God’s creatures; and “every creature of God is good, and nothing to be rejected that is received with thanksgiving” (1 Tim. 4:4). It was therefore unfitting for them to be purified after contact with a corpse, or any similar corporeal infection.

Objection 5. Further, it is written (Ecclus. 34:4): “What can be made clean by the unclean?” But the ashes of the red heifer* which was burnt, were unclean, since they made a man unclean: for it is stated (Num. 19:7, seqq.) that the priest who immolated her was rendered unclean “until the evening”; likewise he that burnt her; and he that gathered up her ashes. Therefore it was unfittingly prescribed there that the unclean should be

purified by being sprinkled with those cinders.

Objection 6. Further, sins are not something corporeal that can be carried from one place to another: nor can man be cleansed from sin by means of something unclean. It was therefore unfitting for the purpose of expiating the sins of the people that the priest should confess the sins of the children of Israel on one of the buck-goats, that it might carry them away into the wilderness: while they were rendered unclean by the other, which they used for the purpose of purification, by burning it together with the calf outside the camp; so that they had to wash their clothes and their bodies with water (Lev. 16).

Objection 7. Further, what is already cleansed should not be cleansed again. It was therefore unfitting to apply a second purification to a man cleansed from leprosy, or to a house; as laid down in Lev. 14.

Objection 8. Further, spiritual uncleanness cannot be cleansed by material water or by shaving the hair. Therefore it seems unreasonable that the Lord ordered (Ex. 30:18, seqq.) the making of a brazen laver with its foot, that the priests might wash their hands and feet before entering the temple; and that He commanded (Num. 8:7) the Levites to be sprinkled with the water of purification, and to shave all the hairs of their flesh.

Objection 9. Further, that which is greater cannot be cleansed by that which is less. Therefore it was unfitting that, in the Law, the higher and lower priests, as stated in Lev. 8[†], and the Levites, according to Num. 8, should be consecrated with any bodily anointing, bodily sacrifices, and bodily oblations.

Objection 10. Further, as stated in 1 Kings 16:7, “Man seeth those things that appear, but the Lord beholdeth the heart.” But those things that appear outwardly in man are the dispositions of his body and his clothes. Therefore it was unfitting for certain special garments to be appointed to the higher and lower priests, as related in Ex. 28[‡]. It seems, moreover, unreasonable that anyone should be debarred from the priesthood on account of defects in the body, as stated in Lev. 21:17, seqq.: “Whosoever of thy seed throughout their families, hath a blemish, he shall not offer bread to his God. . . if he be blind, if he be lame,” etc. It seems, therefore, that the sacraments of the Old Law were unreasonable.

On the contrary, It is written (Lev. 20:8): “I am the Lord that sanctify you.” But nothing unreasonable is done by God, for it is written (Ps. 103:24): “Thou

* Cf. Heb. 9:13 † Cf. Ex. 29 ‡ Cf. Lev. 8:7, seqq.

hast made all things in wisdom.” Therefore there was nothing without a reasonable cause in the sacraments of the Old Law, which were ordained to the sanctification of man.

I answer that, As stated above (q. 101, a. 4), the sacraments are, properly speaking, things applied to the worshippers of God for their consecration so as, in some way, to depute them to the worship of God. Now the worship of God belonged in a general way to the whole people; but in a special way, it belonged to the priests and Levites, who were the ministers of divine worship. Consequently, in these sacraments of the Old Law, certain things concerned the whole people in general; while others belonged to the ministers.

In regard to both, three things were necessary. The first was to be established in the state of worshipping God: and this institution was brought about—for all in general, by circumcision, without which no one was admitted to any of the legal observances—and for the priests, by their consecration. The second thing required was the use of those things that pertain to divine worship. And thus, as to the people, there was the partaking of the paschal banquet, to which no uncircumcised man was admitted, as is clear from Ex. 12:43, seqq.: and, as to the priests, the offering of the victims, and the eating of the loaves of proposition and of other things that were allotted to the use of the priests. The third thing required was the removal of all impediments to divine worship, viz. of uncleannesses. And then, as to the people, certain purifications were instituted for the removal of certain external uncleannesses; and also expiations from sins; while, as to the priests and Levites, the washing of hands and feet and the shaving of the hair were instituted.

And all these things had reasonable causes, both literal, in so far as they were ordained to the worship of God for the time being, and figurative, in so far as they were ordained to foreshadow Christ: as we shall see by taking them one by one.

Reply to Objection 1. The chief literal reason for circumcision was in order that man might profess his belief in one God. And because Abraham was the first to sever himself from the infidels, by going out from his house and kindred, for this reason he was the first to receive circumcision. This reason is set forth by the Apostle (Rom. 4:9, seqq.) thus: “He received the sign of circumcision, a seal of the justice of the faith which he had, being uncircumcised”; because, to wit, we are told that “unto Abraham faith was reputed to justice,” for the reason that “against hope he believed in hope,” i.e. against the hope that is of nature he believed in the hope that is of grace, “that he might be made the father of many nations,” when he was an old man, and his wife an old and barren woman. And in order that this declaration, and imitation of Abraham’s faith, might be fixed firmly in the hearts of the Jews, they received in their flesh such a sign as they could not forget, wherefore it is written (Gn. 17:13): “My covenant shall be in

your flesh for a perpetual covenant.” This was done on the eighth day, because until then a child is very tender, and so might be seriously injured; and is considered as something not yet consolidated: wherefore neither are animals offered before the eighth day. And it was not delayed after that time, lest some might refuse the sign of circumcision on account of the pain: and also lest the parents, whose love for their children increases as they become used to their presence and as they grow older, should withdraw their children from circumcision. A second reason may have been the weakening of concupiscence in that member. A third motive may have been to revile the worship of Venus and Priapus, which gave honor to that part of the body. The Lord’s prohibition extended only to the cutting of oneself in honor of idols: and such was not the circumcision of which we have been speaking.

The figurative reason for circumcision was that it foreshadowed the removal of corruption, which was to be brought about by Christ, and will be perfectly fulfilled in the eighth age, which is the age of those who rise from the dead. And since all corruption of guilt and punishment comes to us through our carnal origin, from the sin of our first parent, therefore circumcision was applied to the generative member. Hence the Apostle says (Col. 2:11): “You are circumcised” in Christ “with circumcision not made by hand in despoiling of the body of the flesh, but in the circumcision of” Our Lord Jesus “Christ.”

Reply to Objection 2. The literal reason of the paschal banquet was to commemorate the blessing of being led by God out of Egypt. Hence by celebrating this banquet they declared that they belonged to that people which God had taken to Himself out of Egypt. For when they were delivered from Egypt, they were commanded to sprinkle the lamb’s blood on the transoms of their house doors, as though declaring that they were averse to the rites of the Egyptians who worshipped the ram. Wherefore they were delivered by the sprinkling or rubbing of the blood of the lamb on the door-posts, from the danger of extermination which threatened the Egyptians.

Now two things are to be observed in their departure from Egypt: namely, their haste in going, for the Egyptians pressed them to go forth speedily, as related in Ex. 12:33; and there was danger that anyone who did not hasten to go with the crowd might be slain by the Egyptians. Their haste was shown in two ways. First by what they ate. For they were commanded to eat unleavened bread, as a sign “that it could not be leavened, the Egyptians pressing them to depart”; and to eat roast meat, for this took less time to prepare; and that they should not break a bone thereof, because in their haste there was no time to break bones. Secondly, as to the manner of eating. For it is written: “You shall gird your reins, and you shall have shoes on your feet, holding staves in your hands, and you shall eat in haste”: which clearly designates men at the point of starting on a jour-

ney. To this also is to be referred the command: "In one house shall it be eaten, neither shall you carry forth of the flesh thereof out of the house": because, to wit, on account of their haste, they could not send any gifts of it.

The stress they suffered while in Egypt was denoted by the wild lettuces. The figurative reason is evident, because the sacrifice of the paschal lamb signified the sacrifice of Christ according to 1 Cor. 5:7: "Christ our pasch is sacrificed." The blood of the lamb, which ensured deliverance from the destroyer, by being sprinkled on the transoms, signified faith in Christ's Passion, in the hearts and on the lips of the faithful, by which same Passion we are delivered from sin and death, according to 1 Pet. 1:18: "You were...redeemed...with the precious blood...of a lamb unspotted." The partaking of its flesh signified the eating of Christ's body in the Sacrament; and the flesh was roasted at the fire to signify Christ's Passion or charity. And it was eaten with unleavened bread to signify the blameless life of the faithful who partake of Christ's body, according to 1 Cor. 5:8: "Let us feast...with the unleavened bread of sincerity and truth." The wild lettuces were added to denote repentance for sins, which is required of those who receive the body of Christ. Their loins were girt in sign of chastity: and the shoes of their feet are the examples of our dead ancestors. The staves they were to hold in their hands denoted pastoral authority: and it was commanded that the paschal lamb should be eaten in one house, i.e. in a catholic church, and not in the conventicles of heretics.

Reply to Objection 3. Some of the sacraments of the New Law had corresponding figurative sacraments in the Old Law. For Baptism, which is the sacrament of Faith, corresponds to circumcision. Hence it is written (Col. 2:11,12): "You are circumcised...in the circumcision of" Our Lord Jesus "Christ: buried with Him in Baptism." In the New Law the sacrament of the Eucharist corresponds to the banquet of the paschal lamb. The sacrament of Penance in the New Law corresponds to all the purifications of the Old Law. The sacrament of Orders corresponds to the consecration of the pontiff and of the priests. To the sacrament of Confirmation, which is the sacrament of the fulness of grace, there would be no corresponding sacrament of the Old Law, because the time of fulness had not yet come, since "the Law brought no man [Vulg.: 'nothing'] to perfection" (Heb. 7:19). The same applies to the sacrament of Extreme Unction, which is an immediate preparation for entrance into glory, to which the way was not yet opened out in the Old Law, since the price had not yet been paid. Matrimony did indeed exist under the Old Law, as a function of nature, but not as the sacrament of the union of Christ with the Church, for that union was not as yet brought about. Hence under the Old Law it was allowable to give a bill of divorce, which is contrary to the nature of the sacrament.

Reply to Objection 4. As already stated, the pu-

rifications of the Old Law were ordained for the removal of impediments to the divine worship: which worship is twofold; viz. spiritual, consisting in devotion of the mind to God; and corporal, consisting in sacrifices, oblations, and so forth. Now men are hindered in the spiritual worship by sins, whereby men were said to be polluted, for instance, by idolatry, murder, adultery, or incest. From such pollutions men were purified by certain sacrifices, offered either for the whole community in general, or also for the sins of individuals; not that those carnal sacrifices had of themselves the power of expiating sin; but that they signified that expiation of sins which was to be effected by Christ, and of which those of old became partakers by protesting their faith in the Redeemer, while taking part in the figurative sacrifices.

The impediments to external worship consisted in certain bodily uncleannesses; which were considered in the first place as existing in man, and consequently in other animals also, and in man's clothes, dwelling-place, and vessels. In man himself uncleanness was considered as arising partly from himself and partly from contact with unclean things. Anything proceeding from man was reputed unclean that was already subject to corruption, or exposed thereto: and consequently since death is a kind of corruption, the human corpse was considered unclean. In like manner, since leprosy arises from corruption of the humors, which break out externally and infect other persons, therefore were lepers also considered unclean; and, again, women suffering from a flow of blood, whether from weakness, or from nature (either at the monthly course or at the time of conception); and, for the same reason, men were reputed unclean if they suffered from a flow of seed, whether due to weakness, to nocturnal pollution, or to sexual intercourse. Because every humor issuing from man in the aforesaid ways involves some unclean infection. Again, man contracted uncleanness by touching any unclean thing whatever.

Now there was both a literal and a figurative reason for these uncleannesses. The literal reason was taken from the reverence due to those things that belong to the divine worship: both because men are not wont, when unclean, to touch precious things: and in order that by rarely approaching sacred things they might have greater respect for them. For since man could seldom avoid all the aforesaid uncleannesses, the result was that men could seldom approach to touch things belonging to the worship of God, so that when they did approach, they did so with greater reverence and humility. Moreover, in some of these the literal reason was that men should not be kept away from worshipping God through fear of coming in contact with lepers and others similarly afflicted with loathsome and contagious diseases. In others, again, the reason was to avoid idolatrous worship: because in their sacrificial rites the Gentiles sometimes employed human blood and seed. All these bodily uncleannesses were purified either by

the mere sprinkling of water, or, in the case of those which were more grievous, by some sacrifice of expiation for the sin which was the occasion of the uncleanness in question.

The figurative reason for these uncleannesses was that they were figures of various sins. For the uncleanness of any corpse signifies the uncleanness of sin, which is the death of the soul. The uncleanness of leprosy betokened the uncleanness of heretical doctrine: both because heretical doctrine is contagious just as leprosy is, and because no doctrine is so false as not to have some truth mingled with error, just as on the surface of a leprous body one may distinguish the healthy parts from those that are infected. The uncleanness of a woman suffering from a flow of blood denotes the uncleanness of idolatry, on account of the blood which is offered up. The uncleanness of the man who has suffered seminal loss signifies the uncleanness of empty words, for "the seed is the word of God." The uncleanness of sexual intercourse and of the woman in child-birth signifies the uncleanness of original sin. The uncleanness of the woman in her periods signifies the uncleanness of a mind that is sensualized by pleasure. Speaking generally, the uncleanness contracted by touching an unclean thing denotes the uncleanness arising from consent in another's sin, according to 2 Cor. 6:17: "Go out from among them, and be ye separate. . . and touch not the unclean thing."

Moreover, this uncleanness arising from the touch was contracted even by inanimate objects; for whatever was touched in any way by an unclean man, became itself unclean. Wherein the Law attenuated the superstition of the Gentiles, who held that uncleanness was contracted not only by touch, but also by speech or looks, as Rabbi Moses states (Doct. Perplex. iii) of a woman in her periods. The mystical sense of this was that "to God the wicked and his wickedness are hateful alike" (Wis. 14:9).

There was also an uncleanness of inanimate things considered in themselves, such as the uncleanness of leprosy in a house or in clothes. For just as leprosy occurs in men through a corrupt humor causing putrefaction and corruption in the flesh; so, too, through some corruption and excess of humidity or dryness, there arises sometimes a kind of corruption in the stones with which a house is built, or in clothes. Hence the Law called this corruption by the name of leprosy, whereby a house or a garment was deemed to be unclean: both because all corruption savored of uncleanness, as stated above, and because the Gentiles worshipped their household gods as a preservative against this corruption. Hence the Law prescribed such houses, where this kind of corruption was of a lasting nature, to be destroyed; and such garments to be burnt, in order to avoid all occasion of idolatry. There was also an uncleanness of vessels, of which it is written (Num. 19:15): "The vessel that hath no cover, and binding over it, shall be unclean." The cause of this uncleanness was

that anything unclean might easily drop into such vessels, so as to render them unclean. Moreover, this command aimed at the prevention of idolatry. For idolaters believed that if mice, lizards, or the like, which they used to sacrifice to the idols, fell into the vessels or into the water, these became more pleasing to the gods. Even now some women let down uncovered vessels in honor of the nocturnal deities which they call "Janae."

The figurative reason of these uncleannesses is that the leprosy of a house signified the uncleanness of the assembly of heretics; the leprosy of a linen garment signified an evil life arising from bitterness of mind; the leprosy of a woolen garment denoted the wickedness of flatterers; leprosy in the warp signified the vices of the soul; leprosy on the woof denoted sins of the flesh, for as the warp is in the woof, so is the soul in the body. The vessel that has neither cover nor binding, betokens a man who lacks the veil of taciturnity, and who is unrestrained by any severity of discipline.

Reply to Objection 5. As stated above (ad 4), there was a twofold uncleanness in the Law; one by way of corruption in the mind or in the body; and this was the graver uncleanness; the other was by mere contact with an unclean thing, and this was less grave, and was more easily expiated. Because the former uncleanness was expiated by sacrifices for sins, since all corruption is due to sin, and signifies sin: whereas the latter uncleanness was expiated by the mere sprinkling of a certain water, of which water we read in Num. 19. For there God commanded them to take a red cow in memory of the sin they had committed in worshipping a calf. And a cow is mentioned rather than a calf, because it was thus that the Lord was wont to designate the synagogue, according to Osee 4:16: "Israel hath gone astray like a wanton heifer": and this was, perhaps, because they worshipped heifers after the custom of Egypt, according to Osee 10:5: "(They) have worshipped the kine of Bethaven." And in detestation of the sin of idolatry it was sacrificed outside the camp; in fact, whenever sacrifice was offered up in expiation of the multitude of sins, it was all burnt outside the camp. Moreover, in order to show that this sacrifice cleansed the people from all their sins, "the priest" dipped "his finger in her blood," and sprinkled "it over against the door of the tabernacle seven times"; for the number seven signified universality. Further, the very sprinkling of blood pertained to the detestation of idolatry, in which the blood that was offered up was not poured out, but was collected together, and men gathered round it to eat in honor of the idols. Likewise it was burnt by fire, either because God appeared to Moses in a fire, and the Law was given from the midst of fire; or to denote that idolatry, together with all that was connected therewith, was to be extirpated altogether; just as the cow was burnt "with her skin and her flesh, her blood and dung being delivered to the flames." To this burning were added "cedar-wood, and hyssop, and scarlet twice dyed," to signify that just as cedar-wood is not liable to putrefaction, and scarlet

twice dyed does not easily lose its color, and hyssop retains its odor after it has been dried; so also was this sacrifice for the preservation of the whole people, and for their good behavior and devotion. Hence it is said of the ashes of the cow: "That they may be reserved for the multitude of the children of Israel." Or, according to Josephus (Antiq. iii, 8,9,10), the four elements are indicated here: for "cedar-wood" was added to the fire, to signify the earth, on account of its earthiness; "hyssop," to signify the air, on account of its smell; "scarlet twice dyed," to signify water, for the same reason as purple, on account of the dyes which are taken out of the water: thus denoting the fact that this sacrifice was offered to the Creator of the four elements. And since this sacrifice was offered for the sin of idolatry, both "he that burned her," and "he that gathered up the ashes," and "he that sprinkled the water" in which the ashes were placed, were deemed unclean in detestation of that sin, in order to show that whatever was in any way connected with idolatry should be cast aside as being unclean. From this uncleanness they were purified by the mere washing of their clothes; nor did they need to be sprinkled with the water on account of this kind of uncleanness, because otherwise the process would have been unending, since he that sprinkled the water became unclean, so that if he were to sprinkle himself he would remain unclean; and if another were to sprinkle him, that one would have become unclean, and in like manner, whoever might sprinkle him, and so on indefinitely.

The figurative reason of this sacrifice was that the red cow signified Christ in respect his assumed weakness, denoted by the female sex; while the color of the cow designated the blood of His Passion. And the "red cow was of full age," because all Christ's works are perfect, "in which there" was "no blemish"; "and which" had "not carried the yoke," because Christ was innocent, nor did He carry the yoke of sin. It was commanded to be taken to Moses, because they blamed Him for transgressing the law of Moses by breaking the Sabbath. And it was commanded to be delivered "to Eleazar the priest," because Christ was delivered into the hands of the priests to be slain. It was immolated "without the camp," because Christ "suffered outside the gate" (Heb. 13:12). And the priest dipped "his finger in her blood," because the mystery of Christ's Passion should be considered and imitated.

It was sprinkled "over against... the tabernacle," which denotes the synagogue, to signify either the condemnation of the unbelieving Jews, or the purification of believers; and this "seven times," in token either of the seven gifts of the Holy Ghost, or of the seven days wherein all time is comprised. Again, all things that pertain to the Incarnation of Christ should be burnt with fire, i.e. they should be understood spiritually; for the "skin" and "flesh" signified Christ's outward works; the "blood" denoted the subtle inward force which quickened His external deeds; the "dung" betokened His weariness, His thirst, and all such like things pertaining

to His weakness. Three things were added, viz. "cedar-wood," which denotes the height of hope or contemplation; "hyssop," in token of humility or faith; "scarlet twice dyed," which denotes twofold charity; for it is by these three that we should cling to Christ suffering. The ashes of this burning were gathered by "a man that is clean," because the relics of the Passion came into the possession of the Gentiles, who were not guilty of Christ's death. The ashes were put into water for the purpose of expiation, because Baptism receives from Christ's Passion the power of washing away sins. The priest who immolated and burned the cow, and he who burned, and he who gathered together the ashes, were unclean, as also he that sprinkled the water: either because the Jews became unclean through putting Christ to death, whereby our sins are expiated; and this, until the evening, i.e. until the end of the world, when the remnants of Israel will be converted; or else because they who handle sacred things with a view to the cleansing of others contract certain uncleannesses, as Gregory says (Pastor. ii, 5); and this until the evening, i.e. until the end of this life.

Reply to Objection 6. As stated above (ad 5), an uncleanness which was caused by corruption either of mind or of body was expiated by sin-offerings. Now special sacrifices were wont to be offered for the sins of individuals: but since some were neglectful about expiating such sins and uncleannesses; or, through ignorance, failed to offer this expiation; it was laid down that once a year, on the tenth day of the seventh month, a sacrifice of expiation should be offered for the whole people. And because, as the Apostle says (Heb. 7:28), "the Law maketh men priests, who have infirmity," it behooved the priest first of all to offer a calf for his own sins, in memory of Aaron's sin in fashioning the molten calf; and besides, to offer a ram for a holocaust, which signified that the priestly sovereignty denoted by the ram, who is the head of the flock, was to be ordained to the glory of God. Then he offered two he-goats for the people: one of which was offered in expiation of the sins of the multitude. For the he-goat is an evil-smelling animal; and from its skin clothes are made having a pungent odor; to signify the stench, uncleanness and the sting of sin. After this he-goat had been immolated, its blood was taken, together with the blood of the calf, into the Holy of Holies, and the entire sanctuary was sprinkled with it; to signify that the tabernacle was cleansed from the uncleanness of the children of Israel. But the corpses of the he-goat and calf which had been offered up for sin had to be burnt, to denote the destruction of sins. They were not, however, burnt on the altar: since none but holocausts were burnt thereon; but it was prescribed that they should be burnt without the camp, in detestation of sin: for this was done whenever sacrifice was offered for a grievous sin, or for the multitude of sins. The other goat was let loose into the wilderness: not indeed to offer it to the demons, whom the Gentiles worshipped in desert places, because it was unlawful to

offer ought to them; but in order to point out the effect of the sacrifice which had been offered up. Hence the priest put his hand on its head, while confessing the sins of the children of Israel: as though that goat were to carry them away into the wilderness, where it would be devoured by wild beasts, because it bore the punishment of the people's sins. And it was said to bear the sins of the people, either because the forgiveness of the people's sins was signified by its being let loose, or because on its head written lists of sins were fastened.

The figurative reason of these things was that Christ was foreshadowed both by the calf, on account of His power; and by the ram, because He is the Head of the faithful; and by the he-goat, on account of "the likeness of sinful flesh" (Rom. 8:3). Moreover, Christ was sacrificed for the sins of both priests and people: since both those of high and those of low degree are cleansed from sin by His Passion. The blood of the calf and of the goat was brought into the Holies by the priest, because the entrance to the kingdom of heaven was opened to us by the blood of Christ's Passion. Their bodies were burnt without the camp, because "Christ suffered without the gate," as the Apostle declares (Heb. 13:12). The scape-goat may denote either Christ's Godhead Which went away into solitude when the Man Christ suffered, not by going to another place, but by restraining His power: or it may signify the base concupiscence which we ought to cast away from ourselves, while we offer up to Our Lord acts of virtue.

With regard to the uncleanness contracted by those who burnt these sacrifices, the reason is the same as that which we assigned (ad 5) to the sacrifice of the red heifer.

Reply to Objection 7. The legal rite did not cleanse the leper of his deformity, but declared him to be cleansed. This is shown by the words of Lev. 14:3, seqq., where it was said that the priest, "when he shall find that the leprosy is cleansed," shall command "him that is to be purified": consequently, the leper was already healed: but he was said to be purified in so far as the verdict of the priest restored him to the society of men and to the worship of God. It happened sometimes, however, that bodily leprosy was miraculously cured by the legal rite, when the priest erred in his judgment.

Now this purification of a leper was twofold: for, in the first place, he was declared to be clean; and, secondly, he was restored, as clean, to the society of men and to the worship of God, to wit, after seven days. At the first purification the leper who sought to be cleansed offered for himself "two living sparrows. . . cedar-wood, and scarlet, and hyssop," in such wise that a sparrow and the hyssop should be tied to the cedar-wood with a scarlet thread, so that the cedar-wood was like the handle of an aspersory: while the hyssop and sparrow were that part of the aspersory which was dipped into the blood of the other sparrow which was "immolated. . . over living waters." These things he offered as an antidote to the four defects of leprosy: for cedar-wood, which is

not subject to putrefaction, was offered against the putrefaction; hyssop, which is a sweet-smelling herb, was offered up against the stench; a living sparrow was offered up against numbness; and scarlet, which has a vivid color, was offered up against the repulsive color of leprosy. The living sparrow was let loose to fly away into the plain, because the leper was restored to his former liberty.

On the eighth day he was admitted to divine worship, and was restored to the society of men; but only after having shaved all the hair of his body, and washed his clothes, because leprosy rots the hair, infects the clothes, and gives them an evil smell. Afterwards a sacrifice was offered for his sin, since leprosy was frequently a result of sin: and some of the blood of the sacrifice was put on the tip of the ear of the man that was to be cleansed, "and on the thumb of his right hand, and the great toe of his right foot"; because it is in these parts that leprosy is first diagnosed and felt. In this rite, moreover, three liquids were employed: viz. blood, against the corruption of the blood; oil, to denote the healing of the disease; and living waters, to wash away the filth.

The figurative reason was that the Divine and human natures in Christ were denoted by the two sparrows, one of which, in likeness of His human nature, was offered up in an earthen vessel over living waters, because the waters of Baptism are sanctified by Christ's Passion. The other sparrow, in token of His impassible Godhead, remained living, because the Godhead cannot die: hence it flew away, for the Godhead could not be encompassed by the Passion. Now this living sparrow, together with the cedar-wood and scarlet or cochineal, and hyssop, i.e. faith, hope and charity, as stated above (ad 5), was put into the water for the purpose of sprinkling, because we are baptized in the faith of the God-Man. By the waters of Baptism or of his tears man washes his clothes, i.e. his works, and all his hair, i.e. his thoughts. The tip of the right ear of the man to be cleansed is moistened with some the blood and oil, in order to strengthen his hearing against harmful words; and the thumb and toe of his right hand and foot are moistened that his deeds may be holy. Other matters pertaining to this purification, or to that also of any other uncleanness, call for no special remark, beyond what applies to other sacrifices, whether for sins or for trespasses.

Reply obj. 8 and 9: Just as the people were initiated by circumcision to the divine worship, so were the ministers by some special purification or consecration: wherefore they are commanded to be separated from other men, as being specially deputed, rather than others, to the ministry of the divine worship. And all that was done touching them in their consecration or institution, was with a view to show that they were in possession of a prerogative of purity, power and dignity. Hence three things were done in the institution of ministers: for first, they were purified; secondly, they

were adorned* and consecrated; thirdly, they were employed in the ministry. All in general used to be purified by washing in water, and by certain sacrifices; but the Levites in particular shaved all the hair of their bodies, as stated in Lev. 8 (cf. Num. 8).

With regard to the high-priests and priests the consecration was performed as follows. First, when they had been washed, they were clothed with certain special garments in designation of their dignity. In particular, the high-priest was anointed on the head with the oil of unction: to denote that the power of consecration was poured forth by him on to others, just as oil flows from the head on to the lower parts of the body; according to Ps. 132:2: "Like the precious ointment on the head that ran down upon the beard, the beard of Aaron." But the Levites received no other consecration besides being offered to the Lord by the children of Israel through the hands of the high-priest, who prayed for them. The lesser priests were consecrated on the hands only, which were to be employed in the sacrifices. The tip of their right ear and the thumb of their right hand, and the great toe of their right foot were tinged with the blood of the sacrificial animal, to denote that they should be obedient to God's law in offering the sacrifices (this is denoted by touching their right ear); and that they should be careful and ready in performing the sacrifices (this is signified by the moistening of the right foot and hand). They themselves and their garments were sprinkled with the blood of the animal that had been sacrificed, in memory of the blood of the lamb by which they had been delivered in Egypt. At their consecration the following sacrifices were offered: a calf, for sin, in memory of Aaron's sin in fashioning the molten calf; a ram, for a holocaust, in memory of the sacrifice of Abraham, whose obedience it behooved the high-priest to imitate; again, a ram of consecration, which was a peace-offering, in memory of the delivery from Egypt through the blood of the lamb; and a basket of bread, in memory of the manna vouchsafed to the people.

In reference to their being destined to the ministry, the fat of the ram, one roll of bread, and the right shoulder were placed on their hands, to show that they received the power of offering these things to the Lord: while the Levites were initiated to the ministry by being brought into the tabernacle of the covenant, as being destined to the ministry touching the vessels of the sanctuary.

The figurative reason of these things was that those who are to be consecrated to the spiritual ministry of Christ, should be first of all purified by the waters of Baptism, and by the waters of tears, in their faith in Christ's Passion, which is a sacrifice both of expiation and of purification. They have also to shave all the hair of their body, i.e. all evil thoughts. They should, moreover, be decked with virtues, and be consecrated with the oil of the Holy Ghost, and with the sprinkling of

Christ's blood. And thus they should be intent on the fulfilment of their spiritual ministry.

Reply to Objection 10. As already stated (a. 4), the purpose of the Law was to induce men to have reverence for the divine worship: and this in two ways; first, by excluding from the worship of God whatever might be an object of contempt; secondly, by introducing into the divine worship all that seemed to savor of reverence. And, indeed, if this was observed in regard to the tabernacle and its vessels, and in the animals to be sacrificed, much more was it to be observed in the very ministers. Wherefore, in order to obviate contempt for the ministers, it was prescribed that they should have no bodily stain or defect: since men so deformed are wont to be despised by others. For the same reason it was also commanded that the choice of those who were to be destined to the service of God was not to be made in a broadcast manner from any family, but according to their descent from one particular stock, thus giving them distinction and nobility.

In order that they might be revered, special ornate vestments were appointed for their use, and a special form of consecration. This indeed is the general reason of ornate garments. But the high-priest in particular had eight vestments. First, he had a linen tunic. Secondly, he had a purple tunic; round the bottom of which were placed "little bells" and "pomegranates of violet, and purple, and scarlet twice dyed." Thirdly, he had the ephod, which covered his shoulders and his breast down to the girdle; and it was made of gold, and violet and purple, and scarlet twice dyed and twisted linen: and on his shoulders he bore two onyx stones, on which were graven the names of the children of Israel. Fourthly, he had the rational, made of the same material; it was square in shape, and was worn on the breast, and was fastened to the ephod. On this rational there were twelve precious stones set in four rows, on which also were graven the names of the children of Israel, in token that the priest bore the burden of the whole people, since he bore their names on his shoulders; and that it was his duty ever to think of their welfare, since he wore them on his breast, bearing them in his heart, so to speak. And the Lord commanded the "Doctrine and Truth" to be put in the rational: for certain matters regarding moral and dogmatic truth were written on it. The Jews indeed pretend that on the rational was placed a stone which changed color according to the various things which were about to happen to the children of Israel: and this they call the "Truth and Doctrine." Fifthly, he wore a belt or girdle made of the four colors mentioned above. Sixthly, there was the tiara or mitre which was made of linen. Seventhly, there was the golden plate which hung over his forehead; on it was inscribed the Lord's name. Eighthly, there were "the linen breeches to cover the flesh of their nakedness," when they went up to the sanctuary or altar. Of

* 'Ornabantur.' Some editions have 'ordinabantur'—'were ordained': the former reading is a reference to Lev. 8:7-9

these eight vestments the lesser priests had four, viz. the linen tunic and breeches, the belt and the tiara.

According to some, the literal reason for these vestments was that they denoted the disposition of the terrestrial globe; as though the high-priest confessed himself to be the minister of the Creator of the world, wherefore it is written (Wis. 18:24): "In the robe" of Aaron "was the whole world" described. For the linen breeches signified the earth out of which the flax grows. The surrounding belt signified the ocean which surrounds the earth. The violet tunic denoted the air by its color: its little bells betoken the thunder; the pomegranates, the lightning. The ephod, by its many colors, signified the starry heaven; the two onyx stones denoted the two hemispheres, or the sun and moon. The twelve precious stones on the breast are the twelve signs of the zodiac: and they are said to have been placed on the rational because in heaven, are the types [rationes] of earthly things, according to Job 38:33: "Dost thou know the order of heaven, and canst thou set down the reason [rationem] thereof on the earth?" The turban or tiara signified the empyrean: the golden plate was a token of God, the governor of the universe.

The figurative reason is evident. Because bodily stains or defects wherefrom the priests had to be immune, signify the various vices and sins from which they should be free. Thus it is forbidden that he should be blind, i.e. he ought not to be ignorant: he must not be lame, i.e. vacillating and uncertain of purpose: that he must have "a little, or a great, or a crooked nose," i.e. that he should not, from lack of discretion, exceed in one direction or in another, or even exercise some base occupation: for the nose signifies discretion, because it discerns odors. It is forbidden that he should have "a broken foot" or "hand," i.e. he should not lose the power of doing good works or of advancing in virtue. He is rejected, too, if he have a swelling either in front or behind [Vulg.: 'if he be crook-backed']: by which is

signified too much love of earthly things: if he be bleary-eyed, i.e. if his mind is darkened by carnal affections: for running of the eyes is caused by a flow of matter. He is also rejected if he had "a pearl in his eye," i.e. if he presumes in his own estimation that he is clothed in the white robe of righteousness. Again, he is rejected "if he have a continued scab," i.e. lustfulness of the flesh: also, if he have "a dry scurf," which covers the body without giving pain, and is a blemish on the comeliness of the members; which denotes avarice. Lastly, he is rejected "if he have a rupture" or hernia; through baseness rending his heart, though it appear not in his deeds.

The vestments denote the virtues of God's ministers. Now there are four things that are necessary to all His ministers, viz. chastity denoted by the breeches; a pure life, signified by the linen tunic; the moderation of discretion, betokened by the girdle; and rectitude of purpose, denoted by the mitre covering the head. But the high-priests needed four other things in addition to these. First, a continual recollection of God in their thoughts; and this was signified by the golden plate worn over the forehead, with the name of God engraved thereon. Secondly, they had to bear with the shortcomings of the people: this was denoted by the ephod which they bore on their shoulders. Thirdly, they had to carry the people in their mind and heart by the solicitude of charity, in token of which they wore the rational. Fourthly, they had to lead a godly life by performing works of perfection; and this was signified by the violet tunic. Hence little golden bells were fixed to the bottom of the violet tunic, which bells signified the teaching of divine things united in the high-priest to his godly mode of life. In addition to these were the pomegranates, signifying unity of faith and concord in good morals: because his doctrine should hold together in such a way that it should not rend asunder the unity of faith and peace.

Whether there was any reasonable cause for the ceremonial observances?

Ia IIae q. 102 a. 6

Objection 1. It would seem that there was no reasonable cause for the ceremonial observances. Because, as the Apostle says (1 Tim. 4:4), "every creature of God is good, and nothing to be rejected that is received with thanksgiving." It was therefore unfitting that they should be forbidden to eat certain foods, as being unclean according to Lev. 11*.

Objection 2. Further, just as animals are given to man for food, so also are herbs: wherefore it is written (Gn. 9:3): "As the green herbs have I delivered all" flesh "to you." But the Law did not distinguish any herbs from the rest as being unclean, although some are most harmful, for instance, those that are poisonous. Therefore it seems that neither should any animals have been prohibited as being unclean.

Objection 3. Further, if the matter from which a

thing is generated be unclean, it seems that likewise the thing generated therefrom is unclean. But flesh is generated from blood. Since therefore all flesh was not prohibited as unclean, it seems that in like manner neither should blood have been forbidden as unclean; nor the fat which is engendered from blood.

Objection 4. Further, Our Lord said (Mat. 10:28; cf. Lk. 12:4), that those should not be feared "that kill the body," since after death they "have no more that they can do": which would not be true if after death harm might come to man through anything done with his body. Much less therefore does it matter to an animal already dead how its flesh be cooked. Consequently there seems to be no reason in what is said, Ex. 23:19: "Thou shalt not boil a kid in the milk of its dam."

Objection 5. Further, all that is first brought forth

* Cf. Dt. 14

of man and beast, as being most perfect, is commanded to be offered to the Lord (Ex. 13). Therefore it is an unfitting command that is set forth in Lev. 19:23: “when you shall be come into the land, and shall have planted in it fruit trees, you shall take away the uncircumcision[†] of them,” i.e. the first crops, and they “shall be unclean to you, neither shall you eat of them.”

Objection 6. Further, clothing is something extraneous to man’s body. Therefore certain kinds of garments should not have been forbidden to the Jews: for instance (Lev. 19:19): “Thou shalt not wear a garment that is woven of two sorts”: and (Dt. 22:5): “A woman shall not be clothed with man’s apparel, neither shall a man use woman’s apparel”: and further on (Dt. 22:11): “Thou shalt not wear a garment that is woven of woolen and linen together.”

Objection 7. Further, to be mindful of God’s commandments concerns not the body but the heart. Therefore it is unsuitably prescribed (Dt. 6:8, seqq.) that they should “bind” the commandments of God “as a sign” on their hands; and that they should “write them in the entry”; and (Num. 15:38, seqq.) that they should “make to themselves fringes in the corners of their garments, putting in them ribands of blue... they may remember... the commandments of the Lord.”

Objection 8. Further, the Apostle says (1 Cor. 9:9) that God does not “take care for oxen,” and, therefore, neither of other irrational animals. Therefore without reason is it commanded (Dt. 22:6): “If thou find, as thou walkest by the way, a bird’s nest in a tree... thou shalt not take the dam with her young”; and (Dt. 25:4): “Thou shalt not muzzle the ox that treadeth out thy corn”; and (Lev. 19:19): “Thou shalt not make thy cattle to gender with beasts of any other kind.”

Objection 9. Further, no distinction was made between clean and unclean plants. Much less therefore should any distinction have been made about the cultivation of plants. Therefore it was unfittingly prescribed (Lev. 19:19): “Thou shalt not sow thy field with different seeds”; and (Dt. 22:9, seqq.): “Thou shalt sow thy vineyard with divers seeds”; and: “Thou shalt not plough with an ox and an ass together.”

Objection 10. Further, it is apparent that inanimate things are most of all subject to the power of man. Therefore it was unfitting to debar man from taking silver and gold of which idols were made, or anything they found in the houses of idols, as expressed in the commandment of the Law (Dt. 7:25, seqq.). It also seems an absurd commandment set forth in Dt. 23:13, that they should “dig round about and... cover with earth that which they were eased of.”

Objection 11. Further, piety is required especially in priests. But it seems to be an act of piety to assist at the burial of one’s friends: wherefore Tobias is commended for so doing (Tob. 1:20, seqq.). In like manner it is sometimes an act of piety to marry a loose woman, because she is thereby delivered from sin and infamy.

Therefore it seems inconsistent for these things to be forbidden to priests (Lev. 21).

On the contrary, It is written (Dt. 18:14): “But thou art otherwise instructed by the Lord thy God”: from which words we may gather that these observances were instituted by God to be a special prerogative of that people. Therefore they are not without reason or cause.

I answer that, The Jewish people, as stated above (a. 5), were specially chosen for the worship of God, and among them the priests themselves were specially set apart for that purpose. And just as other things that are applied to the divine worship, need to be marked in some particular way so that they be worthy of the worship of God; so too in that people’s, and especially the priests’, mode of life, there needed to be certain special things befitting the divine worship, whether spiritual or corporal. Now the worship prescribed by the Law foreshadowed the mystery of Christ: so that whatever they did was a figure of things pertaining to Christ, according to 1 Cor. 10:11: “All these things happened to them in figures.” Consequently the reasons for these observances may be taken in two ways, first according to their fittingness to the worship of God; secondly, according as they foreshadow something touching the Christian mode of life.

Reply to Objection 1. As stated above (a. 5, ad 4,5), the Law distinguished a twofold pollution or uncleanness; one, that of sin, whereby the soul was defiled; and another consisting in some kind of corruption, whereby the body was in some way infected. Speaking then of the first-mentioned uncleanness, no kind of food is unclean, or can defile a man, by reason of its nature; wherefore we read (Mat. 15:11): “Not that which goeth into the mouth defileth a man; but what cometh out of the mouth, this defileth a man”: which words are explained (Mat. 15:17) as referring to sins. Yet certain foods can defile the soul accidentally; in so far as man partakes of them against obedience or a vow, or from excessive concupiscence; or through their being an incentive to lust, for which reason some refrain from wine and flesh-meat.

If, however, we speak of bodily uncleanness, consisting in some kind of corruption, the flesh of certain animals is unclean, either because like the pig they feed on unclean things; or because their life is among unclean surroundings: thus certain animals, like moles and mice and such like, live underground, whence they contract a certain unpleasant smell; or because their flesh, through being too moist or too dry, engenders corrupt humors in the human body. Hence they were forbidden to eat the flesh of flat-footed animals, i.e. animals having an unclown hoof, on account of their earthiness; and in like manner they were forbidden to eat the flesh of animals that have many clefts in their feet, because such are very fierce and their flesh is very dry, such as the flesh of lions and the like. For the same reason they were forbidden to eat certain birds of prey the flesh of

[†] ‘Praeputia,’ which Douay version renders ‘first fruits’

which is very dry, and certain water-fowl on account of their exceeding humidity. In like manner certain fish lacking fins and scales were prohibited on account of their excessive moisture; such as eels and the like. They were, however, allowed to eat ruminants and animals with a divided hoof, because in such animals the humors are well absorbed, and their nature well balanced: for neither are they too moist, as is indicated by the hoof; nor are they too earthly, which is shown by their having not a flat but a cloven hoof. Of fishes they were allowed to partake of the drier kinds, of which the fins and scales are an indication, because thereby the moist nature of the fish is tempered. Of birds they were allowed to eat the tamer kinds, such as hens, partridges, and the like. Another reason was detestation of idolatry: because the Gentiles, and especially the Egyptians, among whom they had grown up, offered up these forbidden animals to their idols, or employed them for the purpose of sorcery: whereas they did not eat those animals which the Jews were allowed to eat, but worshipped them as gods, or abstained, for some other motive, from eating them, as stated above (a. 3, ad 2). The third reason was to prevent excessive care about food: wherefore they were allowed to eat those animals which could be procured easily and promptly.

With regard to blood and fat, they were forbidden to partake of those of any animals whatever without exception. Blood was forbidden, both in order to avoid cruelty, that they might abhor the shedding of human blood, as stated above (a. 3, ad 8); and in order to shun idolatrous rite whereby it was customary for men to collect the blood and to gather together around it for a banquet in honor of the idols, to whom they held the blood to be most acceptable. Hence the Lord commanded the blood to be poured out and to be covered with earth (Lev. 17:13). For the same reason they were forbidden to eat animals that had been suffocated or strangled: because the blood of these animals would not be separated from the body: or because this form of death is very painful to the victim; and the Lord wished to withdraw them from cruelty even in regard to irrational animals, so as to be less inclined to be cruel to other men, through being used to be kind to beasts. They were forbidden to eat the fat: both because idolaters ate it in honor of their gods; and because it used to be burnt in honor of God; and, again, because blood and fat are not nutritious, which is the cause assigned by Rabbi Moses (Doct. Perplex. iii). The reason why they were forbidden to eat the sinews is given in Gn. 32:32, where it is stated that “the children of Israel. . . eat not the sinew. . . because he touched the sinew of” Jacob’s “thing and it shrank.”

The figurative reason for these things is that all these animals signified certain sins, in token of which those animals were prohibited. Hence Augustine says (Contra Faustum iv, 7): “If the swine and lamb be called in question, both are clean by nature, because all God’s creatures are good: yet the lamb is clean, and the pig is unclean in a certain signification. Thus if you speak of

a foolish, and of a wise man, each of these expressions is clean considered in the nature of the sound, letters and syllables of which it is composed: but in signification, the one is clean, the other unclean.” The animal that chews the cud and has a divided hoof, is clean in signification. Because division of the hoof is a figure of the two Testaments: or of the Father and Son: or of the two natures in Christ: of the distinction of good and evil. While chewing the cud signifies meditation on the Scriptures and a sound understanding thereof; and whoever lacks either of these is spiritually unclean. In like manner those fish that have scales and fins are clean in signification. Because fins signify the heavenly or contemplative life; while scales signify a life of trials, each of which is required for spiritual cleanness. Of birds certain kinds were forbidden. In the eagle which flies at a great height, pride is forbidden: in the griffon which is hostile to horses and men, cruelty of powerful men is prohibited. The osprey, which feeds on very small birds, signifies those who oppress the poor. The kite, which is full of cunning, denotes those who are fraudulent in their dealings. The vulture, which follows an army, expecting to feed on the carcasses of the slain, signifies those who like others to die or to fight among themselves that they may gain thereby. Birds of the raven kind signify those who are blackened by their lusts; or those who lack kindly feelings, for the raven did not return when once it had been let loose from the ark. The ostrich which, though a bird, cannot fly, and is always on the ground, signifies those who fight God’s cause, and at the same time are taken up with worldly business. The owl, which sees clearly at night, but cannot see in the daytime, denotes those who are clever in temporal affairs, but dull in spiritual matters. The gull, which flies both in the air and swims in the water, signifies those who are partial both to Circumcision and to Baptism: or else it denotes those who would fly by contemplation, yet dwell in the waters of sensual delights. The hawk, which helps men to seize the prey, is a figure of those who assist the strong to prey on the poor. The screech-owl, which seeks its food by night but hides by day, signifies the lustful man who seeks to lie hidden in his deeds of darkness. The cormorant, so constituted that it can stay a long time under water, denotes the glutton who plunges into the waters of pleasure. The ibis is an African bird with a long beak, and feeds on snakes; and perhaps it is the same as the stork: it signifies the envious man, who refreshes himself with the ills of others, as with snakes. The swan is bright in color, and by the aid of its long neck extracts its food from deep places on land or water: it may denote those who seek earthly profit though an external brightness of virtue. The bittern is a bird of the East: it has a long beak, and its jaws are furnished with follicles, wherein it stores its food at first, after a time proceeding to digest it: it is a figure of the miser, who is excessively careful

in hoarding up the necessities of life. The coot* has this peculiarity apart from other birds, that it has a webbed foot for swimming, and a cloven foot for walking: for it swims like a duck in the water, and walks like a partridge on land: it drinks only when it bites, since it dips all its food in water: it is a figure of a man who will not take advice, and does nothing but what is soaked in the water of his own will. The heron†, commonly called a falcon, signifies those whose “feet are swift to shed blood” (Ps. 13:3). The plover‡, which is a garrulous bird, signifies the gossip. The hoopoe, which builds its nest on dung, feeds on foetid ordure, and whose song is like a groan, denotes worldly grief which works death in those who are unclean. The bat, which flies near the ground, signifies those who being gifted with worldly knowledge, seek none but earthly things. Of fowls and quadrupeds those alone were permitted which have the hind-legs longer than the forelegs, so that they can leap: whereas those were forbidden which cling rather to the earth: because those who abuse the doctrine of the four Evangelists, so that they are not lifted up thereby, are reputed unclean. By the prohibition of blood, fat and nerves, we are to understand the forbidding of cruelty, lust, and bravery in committing sin.

Reply to Objection 2. Men were wont to eat plants and other products of the soil even before the deluge: but the eating of flesh seems to have been introduced after the deluge; for it is written (Gn. 9:3): “Even as the green herbs have I delivered. . . all” flesh “to you.” The reason for this was that the eating of the products of the soil savors rather of a simple life; whereas the eating of flesh savors of delicate and over-careful living. For the soil gives birth to the herb of its own accord; and such like products of the earth may be had in great quantities with very little effort: whereas no small trouble is necessary either to rear or to catch an animal. Consequently God being wishful to bring His people back to a more simple way of living, forbade them to eat many kinds of animals, but not those things that are produced by the soil. Another reason may be that animals were offered to idols, while the products of the soil were not.

The Reply to the Third Objection is clear from what has been said (ad 1).

Reply to Objection 4. Although the kid that is slain has no perception of the manner in which its flesh is cooked, yet it would seem to savor of heartlessness if the dam’s milk, which was intended for the nourishment of her offspring, were served up on the same dish. It might also be said that the Gentiles in celebrating the feasts of their idols prepared the flesh of kids in this manner, for the purpose of sacrifice or banquet: hence (Ex. 23) after the solemnities to be celebrated under the Law had been foretold, it is added: “Thou shalt not boil a kid in the milk of its dam.” The figurative reason for this prohibition is this: the kid, signifying Christ, on ac-

count of “the likeness of sinful flesh” (Rom. 8:3), was not to be seethed, i.e. slain, by the Jews, “in the milk of its dam,” i.e. during His infancy. Or else it signifies that the kid, i.e. the sinner, should not be boiled in the milk of its dam, i.e. should not be cajoled by flattery.

Reply to Objection 5. The Gentiles offered their gods the first-fruits, which they held to bring them good luck: or they burnt them for the purpose of secrecy. Consequently (the Israelites) were commanded to look upon the fruits of the first three years as unclean: for in that country nearly all the trees bear fruit in three years’ time; those trees, to wit, that are cultivated either from seed, or from a graft, or from a cutting: but it seldom happens that the fruit-stones or seeds encased in a pod are sown: since it would take a longer time for these to bear fruit: and the Law considered what happened most frequently. The fruits, however, of the fourth year, as being the firstlings of clean fruits, were offered to God: and from the fifth year onward they were eaten.

The figurative reason was that this foreshadowed the fact that after the three states of the Law (the first lasting from Abraham to David, the second, until they were carried away to Babylon, the third until the time of Christ), the Fruit of the Law, i.e. Christ, was to be offered to God. Or again, that we must mistrust our first efforts, on account of their imperfection.

Reply to Objection 6. It is said of a man in Ecclus. 19:27, that “the attire of the body. . .” shows “what he is.” Hence the Lord wished His people to be distinguished from other nations, not only by the sign of the circumcision, which was in the flesh, but also by a certain difference of attire. Wherefore they were forbidden to wear garments woven of woolen and linen together, and for a woman to be clothed with man’s apparel, or vice versa, for two reasons. First, to avoid idolatrous worship. Because the Gentiles, in their religious rites, used garments of this sort, made of various materials. Moreover in the worship of Mars, women put on men’s armor; while, conversely, in the worship of Venus men donned women’s attire. The second reason was to preserve them from lust: because the employment of various materials in the making of garments signified inordinate union of sexes, while the use of male attire by a woman, or vice versa, has an incentive to evil desires, and offers an occasion of lust. The figurative reason is that the prohibition of wearing a garment woven of woolen and linen signified that it was forbidden to unite the simplicity of innocence, denoted by wool, with the duplicity of malice, betokened by linen. It also signifies that woman is forbidden to presume to teach, or perform other duties of men: or that man should not adopt the effeminate manners of a woman.

Reply to Objection 7. As Jerome says on Mat. 23:6, “the Lord commanded them to make violet-colored fringes in the four corners of their garments,

* Douay: ‘porphyryon.’ St. Thomas’ description tallies with the coot or moorhen: though of course he is mistaken about the feet differing from one another. † Vulg.: ‘herodionem’ ‡ Here, again, the Douay translators transcribed from the Vulgate: ‘charadrius’: ‘charadrius’ is the generic name for all plovers.

so that the Israelites might be distinguished from other nations.” Hence, in this way, they professed to be Jews: and consequently the very sight of this sign reminded them of their law.

When we read: “Thou shalt bind them on thy hand, and they shall be ever before thy eyes [Vulg.: ‘they shall be and shall move between thy eyes’], the Pharisees gave a false interpretation to these words, and wrote the decalogue of Moses on a parchment, and tied it on their foreheads like a wreath, so that it moved in front of their eyes”: whereas the intention of the Lord in giving this commandment was that they should be bound in their hands, i.e. in their works; and that they should be before their eyes, i.e. in their thoughts. The violet-colored fillets which were inserted in their cloaks signify the godly intention which should accompany our every deed. It may, however, be said that, because they were a carnal-minded and stiff-necked people, it was necessary for them to be stirred by these sensible things to the observance of the Law.

Reply to Objection 8. Affection in man is twofold: it may be an affection of reason, or it may be an affection of passion. If a man’s affection be one of reason, it matters not how man behaves to animals, because God has subjected all things to man’s power, according to Ps. 8:8: “Thou hast subjected all things under his feet”: and it is in this sense that the Apostle says that “God has no care for oxen”; because God does not ask of man what he does with oxen or other animals.

But if man’s affection be one of passion, then it is moved also in regard to other animals: for since the passion of pity is caused by the afflictions of others; and since it happens that even irrational animals are sensible to pain, it is possible for the affection of pity to arise in a man with regard to the sufferings of animals. Now it is evident that if a man practice a pitiful affection for animals, he is all the more disposed to take pity on his fellow-men: wherefore it is written (Prov. 11:10): “The just regardeth the lives of his beasts: but the bowels of the wicked are cruel.” Consequently the Lord, in order to inculcate pity to the Jewish people, who were prone to cruelty, wished them to practice pity even with regard to dumb animals, and forbade them to do certain things savoring of cruelty to animals. Hence He prohibited them to “boil a kid in the milk of its dam”; and to “muzzle the ox that treadeth out the corn”; and to slay “the dam with her young.” It may, nevertheless, be also said that these prohibitions were made in hatred of idolatry. For the Egyptians held it to be wicked to allow the ox to eat of the grain while threshing the corn. Moreover certain sorcerers were wont to ensnare the mother bird with her young during incubation, and to employ them for the purpose of securing fruitfulness and good luck in bringing up children: also because it was held to be a good omen to find the mother sitting on her young.

As to the mingling of animals of divers species, the

literal reason may have been threefold. The first was to show detestation for the idolatry of the Egyptians, who employed various mixtures in worshipping the planets, which produce various effects, and on various kinds of things according to their various conjunctions. The second reason was in condemnation of unnatural sins. The third reason was the entire removal of all occasions of concupiscence. Because animals of different species do not easily breed, unless this be brought about by man; and movements of lust are aroused by seeing such things. Wherefore in the Jewish traditions we find it prescribed as stated by Rabbi Moses that men shall turn away their eyes from such sights.

The figurative reason for these things is that the necessities of life should not be withdrawn from the ox that treadeth the corn, i.e. from the preacher bearing the sheaves of doctrine, as the Apostle states (1 Cor. 9:4, seqq.). Again, we should not take the dam with her young: because in certain things we have to keep the spiritual senses, i.e. the offspring, and set aside the observance of the letter, i.e. the mother, for instance, in all the ceremonies of the Law. It is also forbidden that beast of burden, i.e. any of the common people, should be allowed to engender, i.e. to have any connection, with animals of another kind, i.e. with Gentiles or Jews.

Reply to Objection 9. All these minglings were forbidden in agriculture; literally, in detestation of idolatry. For the Egyptians in worshipping the stars employed various combinations of seeds, animals and garments, in order to represent the various connections of the stars. Or else all these minglings were forbidden in detestation of the unnatural vice.

They have, however, a figurative reason. For the prohibition: “Thou shalt not sow thy field with different seeds,” is to be understood, in the spiritual sense, of the prohibition to sow strange doctrine in the Church, which is a spiritual vineyard. Likewise “the field,” i.e. the Church, must not be sown “with different seeds,” i.e. with Catholic and heretical doctrines. Neither is it allowed to plough “with an ox and an ass together”; thus a fool should not accompany a wise man in preaching, for one would hinder the other.

Reply to Objection 10.* Silver and gold were reasonably forbidden (Dt. 7) not as though they were not subject to the power of man, but because, like the idols themselves, all materials out of which idols were made, were anathematized as hateful in God’s sight. This is clear from the same chapter, where we read further on (Dt. 7:26): “Neither shalt thou bring anything of the idol into thy house, lest thou become an anathema like it.” Another reason was lest, by taking silver and gold, they should be led by avarice into idolatry to which the Jews were inclined. The other precept (Dt. 23) about covering up excretions, was just and becoming, both for the sake of bodily cleanliness; and in order to

* The Reply to the Tenth Objection is lacking in the codices. The solution given here is found in some editions, and was supplied by Nicolai.

keep the air wholesome; and by reason of the respect due to the tabernacle of the covenant which stood in the midst of the camp, wherein the Lord was said to dwell; as is clearly set forth in the same passage, where after expressing the command, the reason thereof is at once added, to wit: "For the Lord thy God walketh in the midst of thy camp, to deliver thee, and to give up thy enemies to thee, and let thy camp be holy [i.e. clean], and let no uncleanness appear therein." The figurative reason for this precept, according to Gregory (Moral. xxxi), is that sins which are the fetid excretions of the mind should be covered over by repentance, that we may become acceptable to God, according to Ps. 31:1: "Blessed are they whose iniquities are forgiven, and whose sins are covered." Or else according to a gloss, that we should recognize the unhappy condition of human nature, and humbly cover and purify the stains of a puffed-up and proud spirit in the deep furrow of self-examination.

Reply to Objection 11. Sorcerers and idolatrous priests made use, in their rites, of the bones and flesh of dead men. Wherefore, in order to extirpate the customs of idolatrous worship, the Lord commanded that the priests of inferior degree, who at fixed times served in the temple, should not "incur an uncleanness at the death" of anyone except of those who were closely related to them, viz. their father or mother, and others

thus near of kin to them. But the high-priest had always to be ready for the service of the sanctuary; wherefore he was absolutely forbidden to approach the dead, however nearly related to him. They were also forbidden to marry a "harlot" or "one that has been put away," or any other than a virgin: both on account of the reverence due to the priesthood, the honor of which would seem to be tarnished by such a marriage: and for the sake of the children who would be disgraced by the mother's shame: which was most of all to be avoided when the priestly dignity was passed on from father to son. Again, they were commanded to shave neither head nor beard, and not to make incisions in their flesh, in order to exclude the rites of idolatry. For the priests of the Gentiles shaved both head and beard, wherefore it is written (Bar 6:30): "Priests sit in their temples having their garments rent, and their heads and beards shaven." Moreover, in worshipping their idols "they cut themselves with knives and lancets" (3 Kings 18:28). For this reason the priests of the Old Law were commanded to do the contrary.

The spiritual reason for these things is that priests should be entirely free from dead works, i.e. sins. And they should not shave their heads, i.e. set wisdom aside; nor should they shave their beards, i.e. set aside the perfection of wisdom; nor rend their garments or cut their flesh, i.e. they should not incur the sin of schism.

Objection 1. It would seem that there was no cause for the ceremonial precepts. Because on Eph. 2:15, “Making void the law of the commandments,” the gloss says, (i.e.) “making void the Old Law as to the carnal observances, by substituting decrees, i.e. evangelical precepts, which are based on reason.” But if the observances of the Old Law were based on reason, it would have been useless to void them by the reasonable decrees of the New Law. Therefore there was no reason for the ceremonial observances of the Old Law.

Objection 2. Further, the Old Law succeeded the law of nature. But in the law of nature there was a precept for which there was no reason save that man’s obedience might be tested; as Augustine says (Gen. ad lit. viii, 6,13), concerning the prohibition about the tree of life. Therefore in the Old Law there should have been some precepts for the purpose of testing man’s obedience, having no reason in themselves.

Objection 3. Further, man’s works are called moral according as they proceed from reason. If therefore there is any reason for the ceremonial precepts, they would not differ from the moral precepts. It seems therefore that there was no cause for the ceremonial precepts: for the reason of a precept is taken from some cause.

On the contrary, It is written (Ps. 18:9): “The commandment of the Lord is lightsome, enlightening the eyes.” But the ceremonial precepts are commandments of God. Therefore they are lightsome: and yet they would not be so, if they had no reasonable cause. Therefore the ceremonial precepts have a reasonable cause.

I answer that, Since, according to the Philosopher (Metaph. i, 2), it is the function of a “wise man to do everything in order,” those things which proceed from the Divine wisdom must needs be well ordered, as the Apostle states (Rom. 13:1). Now there are two conditions required for things to be well ordered. First, that they be ordained to their due end, which is the princi-

ple of the whole order in matters of action: since those things that happen by chance outside the intention of the end, or which are not done seriously but for fun, are said to be inordinate. Secondly, that which is done in view of the end should be proportionate to the end. From this it follows that the reason for whatever conduces to the end is taken from the end: thus the reason for the disposition of a saw is taken from cutting, which is its end, as stated in Phys. ii, 9. Now it is evident that the ceremonial precepts, like all the other precepts of the Law, were institutions of Divine wisdom: hence it is written (Dt. 4:6): “This is your wisdom and understanding in the sight of nations.” Consequently we must needs say that the ceremonial precepts were ordained to a certain end, wherefrom their reasonable causes can be gathered.

Reply to Objection 1. It may be said there was no reason for the observances of the Old Law, in the sense that there was no reason in the very nature of the thing done: for instance that a garment should not be made of wool and linen. But there could be a reason for them in relation to something else: namely, in so far as something was signified or excluded thereby. On the other hand, the decrees of the New Law, which refer chiefly to faith and the love of God, are reasonable from the very nature of the act.

Reply to Objection 2. The reason for the prohibition concerning the tree of knowledge of good and evil was not that this tree was naturally evil: and yet this prohibition was reasonable in its relation to something else, in as much as it signified something. And so also the ceremonial precepts of the Old Law were reasonable on account of their relation to something else.

Reply to Objection 3. The moral precepts in their very nature have reasonable causes: as for instance, “Thou shalt not kill, Thou shalt not steal.” But the ceremonial precepts have a reasonable cause in their relation to something else, as stated above.

Objection 1. It would seem that the ceremonial precepts have not a literal, but merely a figurative cause. For among the ceremonial precepts, the chief was circumcision and the sacrifice of the paschal lamb. But neither of these had any but a figurative cause: because each was given as a sign. For it is written (Gn. 17:11): “You shall circumcise the flesh of your foreskin, that it may be a sign of the covenant between Me and you”: and of the celebration of the Passover it is written (Ex. 13:9): “It shall be as a sign in thy hand, and as a memorial before thy eyes.” Therefore much more did the other ceremonial precepts have none but a figurative reason.

Objection 2. Further, an effect is proportionate to its cause. But all the ceremonial precepts are figurative, as stated above (q. 101, a. 2). Therefore they have no other than a figurative cause.

Objection 3. Further, if it be a matter of indifference whether a certain thing, considered in itself, be done in a particular way or not, it seems that it has not a literal cause. Now there are certain points in the ceremonial precepts, which appear to be a matter of indifference, as to whether they be done in one way or in another: for instance, the number of animals to be offered, and other such particular circumstances. Therefore there is no literal cause for the precepts of the Old Law.

On the contrary, Just as the ceremonial precepts foreshadowed Christ, so did the stories of the Old Testament: for it is written (1 Cor. 10:11) that “all (these things) happened to them in figure.” Now in the stories of the Old Testament, besides the mystical or figurative, there is the literal sense. Therefore the ceremonial precepts had also literal, besides their figurative causes.

I answer that, As stated above (a. 1), the reason for whatever conduces to an end must be taken from that end. Now the end of the ceremonial precepts was twofold: for they were ordained to the Divine worship, for that particular time, and to the foreshadowing of Christ; just as the words of the prophets regarded the time being in such a way as to be utterances figurative of the time to come, as Jerome says on Osee 1:3. Accord-

ingly the reasons for the ceremonial precepts of the Old Law can be taken in two ways. First, in respect of the Divine worship which was to be observed for that particular time: and these reasons are literal: whether they refer to the shunning of idolatry; or recall certain Divine benefits; or remind men of the Divine excellence; or point out the disposition of mind which was then required in those who worshipped God. Secondly, their reasons can be gathered from the point of view of their being ordained to foreshadow Christ: and thus their reasons are figurative and mystical: whether they be taken from Christ Himself and the Church, which pertains to the allegorical sense; or to the morals of the Christian people, which pertains to the moral sense; or to the state of future glory, in as much as we are brought thereto by Christ, which refers to the anagogical sense.

Reply to Objection 1. Just as the use of metaphorical expressions in Scripture belongs to the literal sense, because the words are employed in order to convey that particular meaning; so also the meaning of those legal ceremonies which commemorated certain Divine benefits, on account of which they were instituted, and of others similar which belonged to that time, does not go beyond the order of literal causes. Consequently when we assert that the cause of the celebration of the Passover was its signification of the delivery from Egypt, or that circumcision was a sign of God’s covenant with Abraham, we assign the literal cause.

Reply to Objection 2. This argument would avail if the ceremonial precepts had been given merely as figures of things to come, and not for the purpose of worshipping God then and there.

Reply to Objection 3. As we have stated when speaking of human laws (q. 96, Aa. 1, 6), there is a reason for them in the abstract, but not in regard to particular conditions, which depend on the judgment of those who frame them; so also many particular determinations in the ceremonies of the Old Law have no literal cause, but only a figurative cause; whereas in the abstract they have a literal cause.

Objection 1. It would seem that no suitable cause can be assigned for the ceremonies pertaining to sacrifices. For those things which were offered in sacrifice, are those which are necessary for sustaining human life: such as certain animals and certain loaves. But God needs no such sustenance; according to Ps. 49:13: "Shall I eat the flesh of bullocks? Or shall I drink the blood of goats?" Therefore such sacrifices were unfittingly offered to God.

Objection 2. Further, only three kinds of quadrupeds were offered in sacrifice to God, viz. oxen, sheep and goats; of birds, generally the turtledove and the dove; but specially, in the cleansing of a leper, an offering was made of sparrows. Now many other animals are more noble than these. Since therefore whatever is best should be offered to God, it seems that not only of these three should sacrifices have been offered to Him.

Objection 3. Further, just as man has received from God the dominion over birds and beasts, so also has he received dominion over fishes. Consequently it was unfitting for fishes to be excluded from the divine sacrifices.

Objection 4. Further, turtledoves and doves indifferently are commanded to be offered up. Since then the young of the dove are commanded to be offered, so also should the young of the turtledove.

Objection 5. Further, God is the Author of life, not only of men, but also of animals, as is clear from Gn. 1:20, seqq. Now death is opposed to life. Therefore it was fitting that living animals rather than slain animals should be offered to God, especially as the Apostle admonishes us (Rom. 12:1), to present our bodies "a living sacrifice, holy, pleasing unto God."

Objection 6. Further, if none but slain animals were offered in sacrifice to God, it seems that it mattered not how they were slain. Therefore it was unfitting that the manner of immolation should be determined, especially as regards birds (Lev. 1:15, seqq.).

Objection 7. Further, every defect in an animal is a step towards corruption and death. If therefore slain animals were offered to God, it was unreasonable to forbid the offering of an imperfect animal, e.g. a lame, or a blind, or otherwise defective animal.

Objection 8. Further, those who offer victims to God should partake thereof, according to the words of the Apostle (1 Cor. 10:18): "Are not they that eat of the sacrifices partakers of the altar?" It was therefore unbecoming for the offerers to be denied certain parts of the victims, namely, the blood, the fat, the breastbone and the right shoulder.

Objection 9. Further, just as holocausts were offered up in honor of God, so also were the peace-offerings and sin-offerings. But no female animals was offered up to God as a holocaust, although holocausts were offered of both quadrupeds and birds. Therefore

it was inconsistent that female animals should be offered up in peace-offerings and sin-offerings, and that nevertheless birds should not be offered up in peace-offerings.

Objection 10. Further, all the peace-offerings seem to be of one kind. Therefore it was unfitting to make a distinction among them, so that it was forbidden to eat the flesh of certain peace-offerings on the following day, while it was allowed to eat the flesh of other peace-offerings, as laid down in Lev. 7:15, seqq.

Objection 11. Further, all sins agree in turning us from God. Therefore, in order to reconcile us to God, one kind of sacrifice should have been offered up for all sins.

Objection 12. Further, all animals that were offered up in sacrifice, were offered up in one way, viz. slain. Therefore it does not seem to be suitable that products of the soil should be offered up in various ways; for sometimes an offering was made of ears of corn, sometimes of flour, sometimes of bread, this being baked sometimes in an oven, sometimes in a pan, sometimes on a gridiron.

Objection 13. Further, whatever things are serviceable to us should be recognized as coming from God. It was therefore unbecoming that besides animals, nothing but bread, wine, oil, incense, and salt should be offered to God.

Objection 14. Further, bodily sacrifices denote the inward sacrifice of the heart, whereby man offers his soul to God. But in the inward sacrifice, the sweetness, which is denoted by honey, surpasses the pungency which salt represents; for it is written (Ecclus. 24:27): "My spirit is sweet above honey." Therefore it was unbecoming that the use of honey, and of leaven which makes bread savory, should be forbidden in a sacrifice; while the use was prescribed, of salt which is pungent, and of incense which has a bitter taste. Consequently it seems that things pertaining to the ceremonies of the sacrifices have no reasonable cause.

On the contrary, It is written (Lev. 1:13): "The priest shall offer it all and burn it all upon the altar, for a holocaust, and most sweet savor to the Lord." Now according to Wis. 7:28, "God loveth none but him that dwelleth with wisdom": whence it seems to follow that whatever is acceptable to God is wisely done. Therefore these ceremonies of the sacrifices were wisely done, as having reasonable causes.

I answer that, As stated above (a. 2), the ceremonies of the Old Law had a twofold cause, viz. a literal cause, according as they were intended for Divine worship; and a figurative or mystical cause, according as they were intended to foreshadow Christ: and on either hand the ceremonies pertaining to the sacrifices can be assigned to a fitting cause.

For, according as the ceremonies of the sacrifices

were intended for the divine worship, the causes of the sacrifices can be taken in two ways. First, in so far as the sacrifice represented the directing of the mind to God, to which the offerer of the sacrifice was stimulated. Now in order to direct his mind to God aright, man must recognize that whatever he has is from God as from its first principle, and direct it to God as its last end. This was denoted in the offerings and sacrifices, by the fact that man offered some of his own belongings in honor of God, as though in recognition of his having received them from God, according to the saying of David (1 Paral. xxix, 14): "All things are Thine: and we have given Thee what we received of Thy hand." Wherefore in offering up sacrifices man made protestation that God is the first principle of the creation of all things, and their last end, to which all things must be directed. And since, for the human mind to be directed to God aright, it must recognize no first author of things other than God, nor place its end in any other; for this reason it was forbidden in the Law to offer sacrifice to any other but God, according to Ex. 22:20: "He that sacrificeth to gods, shall be put to death, save only to the Lord." Wherefore another reasonable cause may be assigned to the ceremonies of the sacrifices, from the fact that thereby men were withdrawn from offering sacrifices to idols. Hence too it is that the precepts about the sacrifices were not given to the Jewish people until after they had fallen into idolatry, by worshipping the molten calf: as though those sacrifices were instituted, that the people, being ready to offer sacrifices, might offer those sacrifices to God rather than to idols. Thus it is written (Jer. 7:22): "I spake not to your fathers and I commanded them not, in the day that I brought them out of the land of Egypt, concerning the matter of burnt-offerings and sacrifices."

Now of all the gifts which God vouchsafed to mankind after they had fallen away by sin, the chief is that He gave His Son; wherefore it is written (Jn. 3:16): "God so loved the world, as to give His only-begotten Son; that whosoever believeth in Him, may not perish, but may have life everlasting." Consequently the chief sacrifice is that whereby Christ Himself "delivered Himself. . . to God for an odor of sweetness" (Eph. 5:2). And for this reason all the other sacrifices of the Old Law were offered up in order to foreshadow this one individual and paramount sacrifice—the imperfect forecasting the perfect. Hence the Apostle says (Heb. 10:11) that the priest of the Old Law "often" offered "the same sacrifices, which can never take away sins: but" Christ offered "one sacrifice for sins, for ever." And since the reason of the figure is taken from that which the figure represents, therefore the reasons of the figurative sacrifices of the Old Law should be taken from the true sacrifice of Christ.

Reply to Objection 1. God did not wish these sacrifices to be offered to Him on account of the things themselves that were offered, as though He stood in need

of them: wherefore it is written (Is. 1:11): "I desire not holocausts of rams, and fat of fatlings, and blood of calves and lambs and buckgoats." But, as stated above, He wished them to be offered to Him, in order to prevent idolatry; in order to signify the right ordering of man's mind to God; and in order to represent the mystery of the Redemption of man by Christ.

Reply to Objection 2. In all the respects mentioned above (ad 1), there was a suitable reason for these animals, rather than others, being offered in sacrifice to God. First, in order to prevent idolatry. Because idolaters offered all other animals to their gods, or made use of them in their sorceries: while the Egyptians (among whom the people had been dwelling) considered it abominable to slay these animals, wherefore they used not to offer them in sacrifice to their gods. Hence it is written (Ex. 8:26): "We shall sacrifice the abominations of the Egyptians to the Lord our God." For they worshipped the sheep; they revered the ram (because demons appeared under the form thereof); while they employed oxen for agriculture, which was reckoned by them as something sacred.

Secondly, this was suitable for the aforesaid right ordering of man's mind to God: and in two ways. First, because it is chiefly by means of these animals that human life is sustained: and moreover they are most clean, and partake of a most clean food: whereas other animals are either wild, and not deputed to ordinary use among men: or, if they be tame, they have unclean food, as pigs and geese: and nothing but what is clean should be offered to God. These birds especially were offered in sacrifice because there were plenty of them in the land of promise. Secondly, because the sacrificing of these animals represented purity of heart. Because as the gloss says on Lev. 1, "We offer a calf, when we overcome the pride of the flesh; a lamb, when we restrain our unreasonable motions; a goat, when we conquer wantonness; a turtledove, when we keep chaste; unleavened bread, when we feast on the unleavened bread of sincerity." And it is evident that the dove denotes charity and simplicity of heart.

Thirdly, it was fitting that these animals should be offered, that they might foreshadow Christ. Because, as the gloss observes, "Christ is offered in the calf, to denote the strength of the cross; in the lamb, to signify His innocence; in the ram, to foreshadow His headship; and in the goat, to signify the likeness of 'sinful flesh'*. The turtledove and dove denoted the union of the two natures"; or else the turtledove signified chastity; while the dove was a figure of charity. "The wheat-flour foreshadowed the sprinkling of believers with the water of Baptism."

Reply to Objection 3. Fish through living in water are further removed from man than other animals, which, like man, live in the air. Again, fish die as soon as they are taken out of water; hence they could not be offered in the temple like other animals.

* An allusion to Col. 2:11 (Textus Receptus)

Reply to Objection 4. Among turtledoves the older ones are better than the young; while with doves the case is the reverse. Wherefore, as Rabbi Moses observes (Doct. Perplex. iii), turtledoves and young doves are commanded to be offered, because nothing should be offered to God but what is best.

Reply to Objection 5. The animals which were offered in sacrifice were slain, because it is by being killed that they become useful to man, forasmuch as God gave them to man for food. Wherefore also they were burnt with fire: because it is by being cooked that they are made fit for human consumption. Moreover the slaying of the animals signified the destruction of sins: and also that man deserved death on account of his sins; as though those animals were slain in man's stead, in order to betoken the expiation of sins. Again the slaying of these animals signified the slaying of Christ.

Reply to Objection 6. The Law fixed the special manner of slaying the sacrificial animals in order to exclude other ways of killing, whereby idolaters sacrificed animals to idols. Or again, as Rabbi Moses says (Doct. Perplex. iii), "the Law chose that manner of slaying which was least painful to the slain animal." This excluded cruelty on the part of the offerers, and any mangling of the animals slain.

Reply to Objection 7. It is because unclean animals are wont to be held in contempt among men, that it was forbidden to offer them in sacrifice to God: and for this reason too they were forbidden (Dt. 23:18) to offer "the hire of a strumpet or the price of a dog in the house of... God." For the same reason they did not offer animals before the seventh day, because such were abortive as it were, the flesh being not yet firm on account of its exceeding softness.

Reply to Objection 8. There were three kinds of sacrifices. There was one in which the victim was entirely consumed by fire: this was called "a holocaust, i.e. all burnt." For this kind of sacrifice was offered to God specially to show reverence to His majesty, and love of His goodness: and typified the state of perfection as regards the fulfilment of the counsels. Wherefore the whole was burnt up: so that as the whole animal by being dissolved into vapor soared aloft, so it might denote that the whole man, and whatever belongs to him, are subject to the authority of God, and should be offered to Him.

Another sacrifice was the "sin-offering," which was offered to God on account of man's need for the forgiveness of sin: and this typifies the state of penitents in satisfying for sins. It was divided into two parts: for one part was burnt; while the other was granted to the use of the priests to signify that remission of sins is granted by God through the ministry of His priests. When, however, this sacrifice was offered for the sins of the whole people, or specially for the sin of the priest, the whole victim was burnt up. For it was not fitting that the priests should have the use of that which was offered for their own sins, to signify that nothing sinful should remain in

them. Moreover, this would not be satisfaction for sin: for if the offering were granted to the use of those for whose sins it was offered, it would seem to be the same as if it had not been offered.

The third kind of sacrifice was called the "peace-offering," which was offered to God, either in thanksgiving, or for the welfare and prosperity of the offerers, in acknowledgment of benefits already received or yet to be received: and this typifies the state of those who are proficient in the observance of the commandments. These sacrifices were divided into three parts: for one part was burnt in honor of God; another part was allotted to the use of the priests; and the third part to the use of the offerers; in order to signify that man's salvation is from God, by the direction of God's ministers, and through the cooperation of those who are saved.

But it was the universal rule that the blood and fat were not allotted to the use either of the priests or of the offerers: the blood being poured out at the foot of the altar, in honor of God, while the fat was burnt upon the altar (Lev. 9:9,10). The reason for this was, first, in order to prevent idolatry: because idolaters used to drink the blood and eat the fat of the victims, according to Dt. 32:38: "Of whose victims they eat the fat, and drank the wine of their drink-offerings." Secondly, in order to form them to a right way of living. For they were forbidden the use of the blood that they might abhor the shedding of human blood; wherefore it is written (Gn. 9:4,5): "Flesh with blood you shall not eat: for I will require the blood of your lives": and they were forbidden to eat the fat, in order to withdraw them from lasciviousness; hence it is written (Ezech. 34:3): "You have killed that which was fat." Thirdly, on account of the reverence due to God: because blood is most necessary for life, for which reason "life" is said to be "in the blood" (Lev. 17:11,14): while fat is a sign of abundant nourishment. Wherefore, in order to show that to God we owe both life and a sufficiency of all good things, the blood was poured out, and the fat burnt up in His honor. Fourthly, in order to foreshadow the shedding of Christ's blood, and the abundance of His charity, whereby He offered Himself to God for us.

In the peace-offerings, the breast-bone and the right shoulder were allotted to the use of the priest, in order to prevent a certain kind of divination which is known as "spatulamantia," so called because it was customary in divining to use the shoulder-blade [spatula], and the breast-bone of the animals offered in sacrifice; wherefore these things were taken away from the offerers. This is also denoted the priest's need of wisdom in the heart, to instruct the people—this was signified by the breast-bone, which covers the heart; and his need of fortitude, in order to bear with human frailty—and this was signified by the right shoulder.

Reply to Objection 9. Because the holocaust was the most perfect kind of sacrifice, therefore none but a male was offered for a holocaust: because the female is an imperfect animal. The offering of turtledoves and

doves was on account of the poverty of the offerers, who were unable to offer bigger animals. And since peace-victims were offered freely, and no one was bound to offer them against his will, hence these birds were offered not among the peace-victims, but among the holocausts and victims for sin, which man was obliged to offer at times. Moreover these birds, on account of their lofty flight, while befitting the perfection of the holocausts; and were suitable for sin-offerings because their song is doleful.

Reply to Objection 10. The holocaust was the chief of all the sacrifices: because all were burnt in honor of God, and nothing of it was eaten. The second place in holiness, belongs to the sacrifice for sins, which was eaten in the court only, and on the very day of the sacrifice (Lev. 7:6,15). The third place must be given to the peace-offerings of thanksgiving, which were eaten on the same day, but anywhere in Jerusalem. Fourth in order were the “ex-voto” peace-offerings, the flesh of which could be eaten even on the morrow. The reason for this order is that man is bound to God, chiefly on account of His majesty; secondly, on account of the sins he has committed; thirdly, because of the benefits he has already received from Him; fourthly, by reason of the benefits he hopes to receive from Him.

Reply to Objection 11. Sins are more grievous by reason of the state of the sinner, as stated above (q. 73, a. 10): wherefore different victims are commanded to be offered for the sin of a priest, or of a prince, or of some other private individual. “But,” as Rabbi Moses says (Doct. Perplex. iii), “we must take note that the more grievous the sin, the lower the species of animals offered for it. Wherefore the goat, which is a very base animal, was offered for idolatry; while a calf was offered for a priest’s ignorance, and a ram for the negligence of a prince.”

Reply to Objection 12. In the matter of sacrifices the Law had in view the poverty of the offerers; so that those who could not have a four-footed animal at their disposal, might at least offer a bird; and that he who could not have a bird might at least offer bread; and that

if a man had not even bread he might offer flour or ears of corn.

The figurative cause is that the bread signifies Christ Who is the “living bread” (Jn. 6:41,51). He was indeed an ear of corn, as it were, during the state of the law of nature, in the faith of the patriarchs; He was like flour in the doctrine of the Law of the prophets; and He was like perfect bread after He had taken human nature; baked in the fire, i.e. formed by the Holy Ghost in the oven of the virginal womb; baked again in a pan by the toils which He suffered in the world; and consumed by fire on the cross as on a gridiron.

Reply to Objection 13. The products of the soil are useful to man, either as food, and of these bread was offered; or as drink, and of these wine was offered; or as seasoning, and of these oil and salt were offered; or as healing, and of these they offered incense, which both smells sweetly and binds easily together.

Now the bread foreshadowed the flesh of Christ; and the wine, His blood, whereby we were redeemed; oil betokens the grace of Christ; salt, His knowledge; incense, His prayer.

Reply to Objection 14. Honey was not offered in the sacrifices to God, both because it was wont to be offered in the sacrifices to idols; and in order to denote the absence of all carnal sweetness and pleasure from those who intend to sacrifice to God. Leaven was not offered, to denote the exclusion of corruption. Perhaps too, it was wont to be offered in the sacrifices to idols.

Salt, however, was offered, because it wards off the corruption of putrefaction: for sacrifices offered to God should be incorrupt. Moreover, salt signifies the discretion of wisdom, or again, mortification of the flesh.

Incense was offered to denote devotion of the heart, which is necessary in the offerer; and again, to signify the odor of a good name: for incense is composed of matter, both rich and fragrant. And since the sacrifice “of jealousy” did not proceed from devotion, but rather from suspicion, therefore incense was not offered therein (Num. 5:15).

Objection 1. It would seem that no sufficient reason can be assigned for the ceremonies of the Old Law that pertain to holy things. For Paul said (Acts 17:24): “God Who made the world and all things therein; He being Lord of heaven and earth, dwelleth not in temples made by hands.” It was therefore unfitting that in the Old Law a tabernacle or temple should be set up for the worship of God.

Objection 2. Further, the state of the Old Law was not changed except by Christ. But the tabernacle denoted the state of the Old Law. Therefore it should not have been changed by the building of a temple.

Objection 3. Further, the Divine Law, more than any other indeed, should lead man to the worship of God. But an increase of divine worship requires multiplication of altars and temples; as is evident in regard to the New Law. Therefore it seems that also under the Old Law there should have been not only one tabernacle or temple, but many.

Objection 4. Further, the tabernacle or temple was ordained to the worship of God. But in God we should worship above all His unity and simplicity. Therefore it seems unbecoming for the tabernacle or temple to be divided by means of veils.

Objection 5. Further, the power of the First Mover, i.e. God, appears first of all in the east, for it is in that quarter that the first movement begins. But the tabernacle was set up for the worship of God. Therefore it should have been built so as to point to the east rather than the west.

Objection 6. Further, the Lord commanded (Ex. 20:4) that they should “not make... a graven thing, nor the likeness of anything.” It was therefore unfitting for graven images of the cherubim to be set up in the tabernacle or temple. In like manner, the ark, the propitiatory, the candlestick, the table, the two altars, seem to have been placed there without reasonable cause.

Objection 7. Further, the Lord commanded (Ex. 20:24): “You shall make an altar of earth unto Me”: and again (Ex. 20:26): “Thou shalt not go up by steps unto My altar.” It was therefore unfitting that subsequently they should be commanded to make an altar of wood laid over with gold or brass; and of such a height that it was impossible to go up to it except by steps. For it is written (Ex. 27:1,2): “Thou shalt make also an altar of setim wood, which shall be five cubits long, and as many broad... and three cubits high... and thou shalt cover it with brass”: and (Ex. 30:1,3): “Thou shalt make... an altar to burn incense, of setim wood... and thou shalt overlay it with the purest gold.”

Objection 8. Further, in God’s works nothing should be superfluous; for not even in the works of nature is anything superfluous to be found. But one cover suffices for one tabernacle or house. Therefore it was unbecoming to furnish the tabernacle with many cover-

ings, viz. curtains, curtains of goats’ hair, rams’ skins dyed red, and violet-colored skins (Ex. 26).

Objection 9. Further, exterior consecration signifies interior holiness, the subject of which is the soul. It was therefore unsuitable for the tabernacle and its vessels to be consecrated, since they were inanimate things.

Objection 10. Further, it is written (Ps. 33:2): “I will bless the Lord at all times, His praise shall always be in my mouth.” But the solemn festivals were instituted for the praise of God. Therefore it was not fitting that certain days should be fixed for keeping solemn festivals; so that it seems that there was no suitable cause for the ceremonies relating to holy things.

On the contrary, The Apostle says (Heb. 8:4) that those who “offer gifts according to the law... serve unto the example and shadow of heavenly things. As it was answered to Moses, when he was to finish the tabernacle: See, says He, that thou make all things according to the pattern which was shown thee on the mount.” But that is most reasonable, which presents a likeness to heavenly things. Therefore the ceremonies relating to holy things had a reasonable cause.

Answer that, The chief purpose of the whole external worship is that man may give worship to God. Now man’s tendency is to reverence less those things which are common, and indistinct from other things; whereas he admires and reveres those things which are distinct from others in some point of excellence. Hence too it is customary among men for kings and princes, who ought to be revered by their subjects, to be clothed in more precious garments, and to possess vaster and more beautiful abodes. And for this reason it behooved special times, a special abode, special vessels, and special ministers to be appointed for the divine worship, so that thereby the soul of man might be brought to greater reverence for God.

In like manner the state of the Old Law, as observed above (a. 2; q. 100, a. 12; q. 101, a. 2), was instituted that it might foreshadow the mystery of Christ. Now that which foreshadows something should be determinate, so that it may present some likeness thereto. Consequently, certain special points had to be observed in matters pertaining to the worship of God.

Reply to Objection 1. The divine worship regards two things: namely, God Who is worshipped; and men, who worship Him. Accordingly God, Who is worshipped, is confined to no bodily place: wherefore there was no need, on His part, for a tabernacle or temple to be set up. But men, who worship Him, are corporeal beings: and for their sake there was need for a special tabernacle or temple to be set up for the worship of God, for two reasons. First, that through coming together with the thought that the place was set aside for the worship of God, they might approach thither with greater reverence. Secondly, that certain things relat-

ing to the excellence of Christ's Divine or human nature might be signified by the arrangement of various details in such temple or tabernacle.

To this Solomon refers (3 Kings 8:27) when he says: "If heaven and the heavens of heavens cannot contain Thee, how much less this house which I have built" for Thee? And further on (3 Kings 8:29,20) he adds: "That Thy eyes may be open upon this house. . . of which Thou hast said: My name shall be there;. . . that Thou mayest hearken to the supplication of Thy servant and of Thy people Israel." From this it is evident that the house of the sanctuary was set up, not in order to contain God, as abiding therein locally, but that God might be made known there by means of things done and said there; and that those who prayed there might, through reverence for the place, pray more devoutly, so as to be heard more readily.

Reply to Objection 2. Before the coming of Christ, the state of the Old Law was not changed as regards the fulfilment of the Law, which was effected in Christ alone: but it was changed as regards the condition of the people that were under the Law. Because, at first, the people were in the desert, having no fixed abode: afterwards they were engaged in various wars with the neighboring nations; and lastly, at the time of David and Solomon, the state of that people was one of great peace. And then for the first time the temple was built in the place which Abraham, instructed by God, had chosen for the purpose of sacrifice. For it is written (Gn. 22:2) that the Lord commanded Abraham to "offer" his son "for a holocaust upon one of the mountains which I will show thee": and it is related further on (Gn. 22:14) that "he calleth the name of that place, The Lord seeth," as though, according to the Divine provision, that place were chosen for the worship of God. Hence it is written (Dt. 12:5,6): "You shall come to the place which the Lord your God shall choose. . . and you shall offer. . . your holocausts and victims."

Now it was not meet for that place to be pointed out by the building of the temple before the aforesaid time; for three reasons assigned by Rabbi Moses. First, lest the Gentiles might seize hold of that place. Secondly, lest the Gentiles might destroy it. The third reason is lest each tribe might wish that place to fall to their lot, and strifes and quarrels be the result. Hence the temple was not built until they had a king who would be able to quell such quarrels. Until that time a portable tabernacle was employed for divine worship, no place being as yet fixed for the worship of God. This is the literal reason for the distinction between the tabernacle and the temple.

The figurative reason may be assigned to the fact that they signify a twofold state. For the tabernacle, which was changeable, signifies the state of the present changeable life: whereas the temple, which was fixed and stable, signifies the state of future life which is altogether unchangeable. For this reason it is said that in the

building of the temple no sound was heard of hammer or saw, to signify that all movements of disturbance will be far removed from the future state. Or else the tabernacle signifies the state of the Old Law; while the temple built by Solomon betokens the state of the New Law. Hence the Jews alone worked at the building of the tabernacle; whereas the temple was built with the cooperation of the Gentiles, viz. the Tyrians and Sidonians.

Reply to Objection 3. The reason for the unity of the temple or tabernacle may be either literal or figurative. The literal reason was the exclusion of idolatry. For the Gentiles put up various times to various gods: and so, to strengthen in the minds of men their belief in the unity of the Godhead, God wished sacrifices to be offered to Him in one place only. Another reason was in order to show that bodily worship is not acceptable of itself: and so they restrained from offering sacrifices anywhere and everywhere. But the worship of the New Law, in the sacrifice whereof spiritual grace is contained, is of itself acceptable to God; and consequently the multiplication of altars and temples is permitted in the New Law.

As to those matters that regarded the spiritual worship of God, consisting in the teaching of the Law and the Prophets, there were, even under the Old Law, various places, called synagogues, appointed for the people to gather together for the praise of God; just as now there are places called churches in which the Christian people gather together for the divine worship. Thus our church takes the place of both temple and synagogue: since the very sacrifice of the Church is spiritual; wherefore with us the place of sacrifice is not distinct from the place of teaching. The figurative reason may be that hereby is signified the unity of the Church, whether militant or triumphant.

Reply to Objection 4. Just as the unity of the temple or tabernacle betokened the unity of God, or the unity of the Church, so also the division of the tabernacle or temple signified the distinction of those things that are subject to God, and from which we arise to the worship of God. Now the tabernacle was divided into two parts: one was called the "Holy of Holies," and was placed to the west; the other was called the "Holy Place"* , which was situated to the east. Moreover there was a court facing the tabernacle. Accordingly there are two reasons for this distinction. One is in respect of the tabernacle being ordained to the worship of God. Because the different parts of the world are thus betokened by the division of the tabernacle. For that part which was called the Holy of Holies signified the higher world, which is that of spiritual substances: while that part which is called the Holy Place signified the corporeal world. Hence the Holy Place was separated from the Holy of Holies by a veil, which was of four different colors (denoting the four elements), viz. of linen, signifying earth, because linen, i.e. flax, grows out of the earth; purple, signifying water, because the purple

* Or 'Sanctuary'. The Douay version uses both expressions

tint was made from certain shells found in the sea; violet, signifying air, because it has the color of the air; and scarlet twice dyed, signifying fire: and this because matter composed of the four elements is a veil between us and incorporeal substances. Hence the high-priest alone, and that once a year, entered into the inner tabernacle, i.e. the Holy of Holies: whereby we are taught that man's final perfection consists in his entering into that (higher) world: whereas into the outward tabernacle, i.e. the Holy Place, the priests entered every day: whereas the people were only admitted to the court; because the people were able to perceived material things, the inner nature of which only wise men by dint of study are able to discover.

But regard to the figurative reason, the outward tabernacle, which was called the Holy Place, betokened the state of the Old Law, as the Apostle says (Heb. 9:6, seqq.): because into that tabernacle "the priests always entered accomplishing the offices of sacrifices." But the inner tabernacle, which was called the Holy of Holies, signified either the glory of heaven or the spiritual state of the New Law to come. To the latter state Christ brought us; and this was signified by the high-priest entering alone, once a year, into the Holy of Holies. The veil betokened the concealing of the spiritual sacrifices under the sacrifices of old. This veil was adorned with four colors: viz. that of linen, to designate purity of the flesh; purple, to denote the sufferings which the saints underwent for God; scarlet twice dyed, signifying the twofold love of God and our neighbor; and violet, in token of heavenly contemplation. With regard to the state of the Old Law the people and the priests were situated differently from one another. For the people saw the mere corporeal sacrifices which were offered in the court: whereas the priests were intent on the inner meaning of the sacrifices, because their faith in the mysteries of Christ was more explicit. Hence they entered into the outer tabernacle. This outer tabernacle was divided from the court by a veil; because some matters relating to the mystery of Christ were hidden from the people, while they were known to the priests: though they were not fully revealed to them, as they were subsequently in the New Testament (cf. Eph. 3:5).

Reply to Objection 5. Worship towards the west was introduced in the Law to the exclusion of idolatry: because all the Gentiles, in reverence to the sun, worshipped towards the east; hence it is written (Ezech. 8:16) that certain men "had their backs towards the temple of the Lord, and their faces to the east, and they adored towards the rising of the sun." Accordingly, in order to prevent this, the tabernacle had the Holy of Holies to westward, that they might adore toward the west. A figurative reason may also be found in the fact that the whole state of the first tabernacle was ordained to foreshadow the death of Christ, which is signified by the west, according to Ps. 67:5: "Who ascendeth unto the west; the Lord is His name."

Reply to Objection 6. Both literal and figurative

reasons may be assigned for the things contained in the tabernacle. The literal reason is in connection with the divine worship. And because, as already observed (ad 4), the inner tabernacle, called the Holy of Holies, signified the higher world of spiritual substances, hence that tabernacle contained three things, viz. "the ark of the testament in which was a golden pot that had manna, and the rod of Aaron that had blossomed, and the tables" (Heb. 9:4) on which were written the ten commandments of the Law. Now the ark stood between two "cherubim" that looked one towards the other: and over the ark was a table, called the "propitiatory," raised above the wings of the cherubim, as though it were held up by them; and appearing, to the imagination, to be the very seat of God. For this reason it was called the "propitiatory," as though the people received propitiation thence at the prayers of the high-priest. And so it was held up, so to speak, by the cherubim, in obedience, as it were, to God: while the ark of the testament was like the foot-stool to Him that sat on the propitiatory. These three things denote three things in that higher world: namely, God Who is above all, and incomprehensible to any creature. Hence no likeness of Him was set up; to denote His invisibility. But there was something to represent his seat; since, to wit, the creature, which is beneath God, as the seat under the sitter, is comprehensible. Again in that higher world there are spiritual substances called angels. These are signified by the two cherubim, looking one towards the other, to show that they are at peace with one another, according to Job 25:2: "Who maketh peace in... high places." For this reason, too, there was more than one cherub, to betoken the multitude of heavenly spirits, and to prevent their receiving worship from those who had been commanded to worship but one God. Moreover there are, enclosed as it were in that spiritual world, the intelligible types of whatsoever takes place in this world, just as in every cause are enclosed the types of its effects, and in the craftsman the types of the works of his craft. This was betokened by the ark, which represented, by means of the three things it contained, the three things of greatest import in human affairs. These are wisdom, signified by the tables of the testament; the power of governing, betokened by the rod of Aaron; and life, betokened by the manna which was the means of sustenance. Or else these three things signified the three Divine attributes, viz. wisdom, in the tables; power, in the rod; goodness, in the manna—both by reason of its sweetness, and because it was through the goodness of God that it was granted to man, wherefore it was preserved as a memorial of the Divine mercy. Again, these three things were represented in Isaias' vision. For he "saw the Lord sitting upon a throne high and elevated"; and the seraphim standing by; and that the house was filled with the glory of the Lord; wherefrom the seraphim cried out: "All the earth is full of His glory" (Is. 6:1,3). And so the images of the seraphim were set up, not to be worshipped, for this was forbidden by the first commandment; but as a

sign of their function, as stated above.

The outer tabernacle, which denotes this present world, also contained three things, viz. the “altar of incense,” which was directly opposite the ark; the “table of proposition,” with the twelve loaves of proposition on it, which stood on the northern side; and the “candlestick,” which was placed towards the south. These three things seem to correspond to the three which were enclosed in the ark; and they represented the same things as the latter, but more clearly: because, in order that wise men, denoted by the priests entering the temple, might grasp the meaning of these types, it was necessary to express them more manifestly than they are in the Divine or angelic mind. Accordingly the candlestick betokened, as a sensible sign thereof, the wisdom which was expressed on the tables (of the Law) in intelligible words. The altar of incense signified the office of the priest, whose duty it was to bring the people to God: and this was signified also by the rod: because on that altar the sweet-smelling incense was burnt, signifying the holiness of the people acceptable to God: for it is written (Apoc. 8:3) that the smoke of the sweet-smelling spices signifies the “justifications of the saints” (cf. Apoc. 19:8). Moreover it was fitting that the dignity of the priesthood should be denoted, in the ark, by the rod, and, in the outer tabernacle, by the altar of incense: because the priest is the mediator between God and the people, governing the people by Divine power, denoted by the rod; and offering to God the fruit of His government, i.e. the holiness of the people, on the altar of incense, so to speak. The table signified the sustenance of life, just as the manna did: but the former, a more general and a coarser kind of nourishment; the latter, a sweeter and more delicate. Again, the candlestick was fittingly placed on the southern side, while the table was placed to the north: because the south is the right-hand side of the world, while the north is the left-hand side, as stated in *De Coelo et Mundo* ii; and wisdom, like other spiritual goods, belongs to the right hand, while temporal nourishment belongs on the left, according to Prov. 3:16: “In her left hand (are) riches and glory.” And the priestly power is midway between temporal goods and spiritual wisdom; because thereby both spiritual wisdom and temporal goods are dispensed.

Another literal signification may be assigned. For the ark contained the tables of the Law, in order to prevent forgetfulness of the Law, wherefore it is written (Ex. 24:12): “I will give thee two tables of stone, and the Law, and the commandments which I have written: that thou mayest teach them” to the children of Israel. The rod of Aaron was placed there to restrain the people from insubordination to the priesthood of Aaron; wherefore it is written (Num. 17:10): “Carry back the rod of Aaron into the tabernacle of the testimony, that it may be kept there for a token of the rebellious children of Israel.” The manna was kept in the ark to remind them of the benefit conferred by God on the children of

Israel in the desert; wherefore it is written (Ex. 16:32): “Fill a gomor of it, and let it be kept unto generations to come hereafter, that they may know the bread wherewith I fed you in the wilderness.” The candlestick was set up to enhance the beauty of the temple, for the magnificence of a house depends on its being well lighted. Now the candlestick had seven branches, as Josephus observes (*Antiquit.* iii, 7,8), to signify the seven planets, wherewith the whole world is illuminated. Hence the candlestick was placed towards the south; because for us the course of the planets is from that quarter. The altar of incense was instituted that there might always be in the tabernacle a sweet-smelling smoke; both through respect for the tabernacle, and as a remedy for the stenches arising from the shedding of blood and the slaying of animals. For men despise evil-smelling things as being vile, whereas sweet-smelling things are much appreciated. The table was placed there to signify that the priests who served the temple should take their food in the temple: wherefore, as stated in Mat. 12:4, it was lawful for none but the priests to eat the twelve loaves which were put on the table in memory of the twelve tribes. And the table was not placed in the middle directly in front of the propitiatory, in order to exclude an idolatrous rite: for the Gentiles, on the feasts of the moon, set up a table in front of the idol of the moon, wherefore it is written (Jer. 7:18): “The women knead the dough, to make cakes to the queen of heaven.”

In the court outside the tabernacle was the altar of holocausts, on which sacrifices of those things which the people possessed were offered to God: and consequently the people who offered these sacrifices to God by the hands of the priest could be present in the court. But the priests alone, whose function it was to offer the people to God, could approach the inner altar, whereon the very devotion and holiness of the people was offered to God. And this altar was put up outside the tabernacle and in the court, to the exclusion of idolatrous worship: for the Gentiles placed altars inside the temples to offer up sacrifices thereon to idols.

The figurative reason for all these things may be taken from the relation of the tabernacle to Christ, who was foreshadowed therein. Now it must be observed that to show the imperfection of the figures of the Law, various figures were instituted in the temple to betoken Christ. For He was foreshadowed by the “propitiatory,” since He is “a propitiation for our sins” (1 Jn. 2:2). This propitiatory was fittingly carried by cherubim, since of Him it is written (Heb. 1:6): “Let all the angels of God adore Him.” He is also signified by the ark: because just as the ark was made of setim-wood, so was Christ’s body composed of most pure members. Moreover it was gilded: for Christ was full of wisdom and charity, which are betokened by gold. And in the ark was a golden pot, i.e. His holy soul, having manna, i.e. “all the fulness of the Godhead” (Col. 2:9). Also there was a rod in the ark, i.e. His priestly power: for “He was made a . . . priest for ever” (Heb. 6:20). And

therein were the tables of the Testament, to denote that Christ Himself is a lawgiver. Again, Christ was signified by the candlestick, for He said Himself (Jn. 8:12): "I am the Light of the world"; while the seven lamps denoted the seven gifts of the Holy Ghost. He is also betokened in the table, because He is our spiritual food, according to Jn. 6:41,51: "I am the living bread": and the twelve loaves signified the twelve apostles, or their teaching. Or again, the candlestick and table may signify the Church's teaching, and faith, which also enlightens and refreshes. Again, Christ is signified by the two altars of holocausts and incense. Because all works of virtue must be offered to us to God through Him; both those whereby we afflict the body, which are offered, as it were, on the altar of holocausts; and those which, with greater perfection of mind, are offered to God in Christ, by the spiritual desires of the perfect, on the altar of incense, as it were, according to Heb. 13:15: "By Him therefore let us offer the sacrifice of praise always to God."

Reply to Objection 7. The Lord commanded an altar to be made for the offering of sacrifices and gifts, in honor of God, and for the upkeep of the ministers who served the tabernacle. Now concerning the construction of the altar the Lord issued a twofold precept. One was at the beginning of the Law (Ex. 20:24, seqq.) when the Lord commanded them to make "an altar of earth," or at least "not of hewn stones"; and again, not to make the altar high, so as to make it necessary to "go up" to it "by steps." This was in detestation of idolatrous worship: for the Gentiles made their altars ornate and high, thinking that there was something holy and divine in such things. For this reason, too, the Lord commanded (Dt. 16:21): "Thou shalt plant no grove, nor any tree near the altar of the Lord thy God": since idolaters were wont to offer sacrifices beneath trees, on account of the pleasantness and shade afforded by them. There was also a figurative reason for these precepts. Because we must confess that in Christ, Who is our altar, there is the true nature of flesh, as regards His humanity—and this is to make an altar of earth; and again, in regard to His Godhead, we must confess His equality with the Father—and this is "not to go up" to the altar by steps. Moreover we should not couple the doctrine of Christ to that of the Gentiles, which provokes men to lewdness.

But when once the tabernacle had been constructed to the honor of God, there was no longer reason to fear these occasions of idolatry. Wherefore the Lord commanded the altar of holocausts to be made of brass, and to be conspicuous to all the people; and the altar of incense, which was visible to none but the priests. Nor was brass so precious as to give the people an occasion for idolatry.

Since, however, the reason for the precept, "Thou shalt not go up by steps unto My altar" (Ex. 20:26) is stated to have been "lest thy nakedness be discovered," it should be observed that this too was instituted with the purpose of preventing idolatry, for in the feasts of

Priapus the Gentiles uncovered their nakedness before the people. But later on the priests were prescribed the use of loin-cloths for the sake of decency: so that without any danger the altar could be placed so high that the priests when offering sacrifices would go up by steps of wood, not fixed but movable.

Reply to Objection 8. The body of the tabernacle consisted of boards placed on end, and covered on the inside with curtains of four different colors, viz. twisted linen, violet, purple, and scarlet twice dyed. These curtains, however, covered the sides only of the tabernacle; and the roof of the tabernacle was covered with violet-colored skins; and over this there was another covering of rams' skins dyed red; and over this there was a third curtain made of goats' hair, which covered not only the roof of the tabernacle, but also reached to the ground and covered the boards of the tabernacle on the outside. The literal reason of these coverings taken altogether was the adornment and protection of the tabernacle, that it might be an object of respect. Taken singly, according to some, the curtains denoted the starry heaven, which is adorned with various stars; the curtain (of goats' skin) signified the waters which are above the firmament; the skins dyed red denoted the empyrean heaven, where the angels are; the violet skins, the heaven of the Blessed Trinity.

The figurative meaning of these things is that the boards of which the tabernacle was constructed signify the faithful of Christ, who compose the Church. The boards were covered on the inner side by curtains of four colors: because the faithful are inwardly adorned with the four virtues: for "the twisted linen," as the gloss observes, "signifies the flesh refulgent with purity; violet signifies the mind desirous of heavenly things; purple denotes the flesh subject to passions; the twice dyed scarlet betokens the mind in the midst of the passions enlightened by the love of God and our neighbor." The coverings of the building designate prelates and doctors, who ought to be conspicuous for their heavenly manner of life, signified by the violet colored skins: and who should also be ready to suffer martyrdom, denoted by the skins dyed red; and austere of life and patient in adversity, betokened by the curtains of goats' hair, which were exposed to wind and rain, as the gloss observes.

Reply to Objection 9. The literal reason for the sanctification of the tabernacle and vessels was that they might be treated with greater reverence, being deputed, as it were, to the divine worship by this consecration. The figurative reason is that this sanctification signified the sanctification of the living tabernacle, i.e. the faithful of whom the Church of Christ is composed.

Reply to Objection 10. Under the Old Law there were seven temporal solemnities, and one continual solemnity, as may be gathered from Num. 28,29. There was a continual feast, since the lamb was sacrificed every day, morning and evening: and this continual feast of an abiding sacrifice signified the perpetuity of Divine bliss. Of the temporal feasts the first was that which

was repeated every week. This was the solemnity of the "Sabbath," celebrated in memory of the work of the creation of the universe. Another solemnity, viz. the "New Moon," was repeated every month, and was observed in memory of the work of the Divine government. For the things of this lower world owe their variety chiefly to the movement of the moon; wherefore this feast was kept at the new moon: and not at the full moon, to avoid the worship of idolaters who used to offer sacrifices to the moon at that particular time. And these two blessings are bestowed in common on the whole human race; and hence they were repeated more frequently.

The other five feasts were celebrated once a year: and they commemorated the benefits which had been conferred especially on that people. For there was the feast of the "Passover" in the first month to commemorate the blessing of being delivered out of Egypt. The feast of "Pentecost" was celebrated fifty days later, to recall the blessing of the giving of the Law. The other three feasts were kept in the seventh month, nearly the whole of which was solemnized by them, just as the seventh day. For on the first of the seventh month was the feast of "Trumpets," in memory of the delivery of Isaac, when Abraham found the ram caught by its horns, which they represented by the horns which they blew. The feast of Trumpets was a kind of invitation whereby they prepared themselves to keep the following feast which was kept on the tenth day. This was the feast of "Expiation," in memory of the blessing whereby, at the prayer of Moses, God forgave the people's sin of worshipping the calf. After this was the feast of "Scenopegia" or of "Tents," which was kept for seven days, to commemorate the blessing of being protected and led by God through the desert, where they

lived in tents. Hence during this feast they had to take "the fruits of the fairest tree," i.e. the citron, "and the trees of dense foliage"*, i.e. the myrtle, which is fragrant, "and the branches of palm-trees, and willows of the brook," which retain their greenness a long time; and these are to be found in the Land of promise; to signify that God had brought them through the arid land of the wilderness to a land of delights. On the eighth day another feast was observed, of "Assembly and Congregation," on which the people collected the expenses necessary for the divine worship: and it signified the uniting of the people and the peace granted to them in the Land of promise.

The figurative reason for these feasts was that the continual sacrifice of the lamb foreshadowed the perpetuity of Christ, Who is the "Lamb of God," according to Heb. 13:8: "Jesus Christ yesterday and today, and the same for ever." The Sabbath signified the spiritual rest bestowed by Christ, as stated in Heb. 4. The Neomenia, which is the beginning of the new moon, signified the enlightening of the primitive Church by Christ's preaching and miracles. The feast of Pentecost signified the Descent of the Holy Ghost on the apostles. The feast of Trumpets signified the preaching of the apostles. The feast of Expiation signified the cleansing of the Christian people from sins: and the feast of Tabernacles signified their pilgrimage in this world, wherein they walk by advancing in virtue. The feast of Assembly or Congregation foreshadowed the assembly of the faithful in the kingdom of heaven: wherefore this feast is described as "most holy" (Lev. 23:36). These three feasts followed immediately on one another, because those who expiate their vices should advance in virtue, until they come to see God, as stated in Ps. 83:8.

* Douay and A. V. and R. V. read: 'Boughs of thick trees'

Objection 1. It would seem that there can be no suitable cause for the sacraments of the Old Law. Because those things that are done for the purpose of divine worship should not be like the observances of idolaters: since it is written (Dt. 12:31): “Thou shalt not do in like manner to the Lord thy God: for they have done to their gods all the abominations which the Lord abhorreth.” Now worshippers of idols used to knife themselves to the shedding of blood: for it is related (3 Kings 18:28) that they “cut themselves after their manner with knives and lancets, till they were all covered with blood.” For this reason the Lord commanded (Dt. 14:1): “You shall not cut yourselves nor make any baldness for the dead.” Therefore it was unfitting for circumcision to be prescribed by the Law (Lev. 12:3).

Objection 2. Further, those things which are done for the worship of God should be marked with decorum and gravity; according to Ps. 34:18: “I will praise Thee in a grave [Douay: ‘strong’] people.” But it seems to savor of levity for a man to eat with haste. Therefore it was unfittingly commanded (Ex. 12:11) that they should eat the Paschal lamb “in haste.” Other things too relative to the eating of the lamb were prescribed, which seem altogether unreasonable.

Objection 3. Further, the sacraments of the Old Law were figures of the sacraments of the New Law. Now the Paschal lamb signified the sacrament of the Eucharist, according to 1 Cor. 5:7: “Christ our Pasch is sacrificed.” Therefore there should also have been some sacraments of the Old Law to foreshadow the other sacraments of the New Law, such as Confirmation, Extreme Unction, and Matrimony, and so forth.

Objection 4. Further, purification can scarcely be done except by removing something impure. But as far as God is concerned, no bodily thing is reputed impure, because all bodies are God’s creatures; and “every creature of God is good, and nothing to be rejected that is received with thanksgiving” (1 Tim. 4:4). It was therefore unfitting for them to be purified after contact with a corpse, or any similar corporeal infection.

Objection 5. Further, it is written (Ecclus. 34:4): “What can be made clean by the unclean?” But the ashes of the red heifer* which was burnt, were unclean, since they made a man unclean: for it is stated (Num. 19:7, seqq.) that the priest who immolated her was rendered unclean “until the evening”; likewise he that burnt her; and he that gathered up her ashes. Therefore it was unfittingly prescribed there that the unclean should be purified by being sprinkled with those cinders.

Objection 6. Further, sins are not something corporeal that can be carried from one place to another: nor can man be cleansed from sin by means of something unclean. It was therefore unfitting for the purpose of expiating the sins of the people that the priest should con-

fess the sins of the children of Israel on one of the buck-goats, that it might carry them away into the wilderness: while they were rendered unclean by the other, which they used for the purpose of purification, by burning it together with the calf outside the camp; so that they had to wash their clothes and their bodies with water (Lev. 16).

Objection 7. Further, what is already cleansed should not be cleansed again. It was therefore unfitting to apply a second purification to a man cleansed from leprosy, or to a house; as laid down in Lev. 14.

Objection 8. Further, spiritual uncleanness cannot be cleansed by material water or by shaving the hair. Therefore it seems unreasonable that the Lord ordered (Ex. 30:18, seqq.) the making of a brazen laver with its foot, that the priests might wash their hands and feet before entering the temple; and that He commanded (Num. 8:7) the Levites to be sprinkled with the water of purification, and to shave all the hairs of their flesh.

Objection 9. Further, that which is greater cannot be cleansed by that which is less. Therefore it was unfitting that, in the Law, the higher and lower priests, as stated in Lev. 8[†], and the Levites, according to Num. 8, should be consecrated with any bodily anointing, bodily sacrifices, and bodily oblations.

Objection 10. Further, as stated in 1 Kings 16:7, “Man seeth those things that appear, but the Lord beholdeth the heart.” But those things that appear outwardly in man are the dispositions of his body and his clothes. Therefore it was unfitting for certain special garments to be appointed to the higher and lower priests, as related in Ex. 28[‡]. It seems, moreover, unreasonable that anyone should be debarred from the priesthood on account of defects in the body, as stated in Lev. 21:17, seqq.: “Whosoever of thy seed throughout their families, hath a blemish, he shall not offer bread to his God. . . if he be blind, if he be lame,” etc. It seems, therefore, that the sacraments of the Old Law were unreasonable.

On the contrary, It is written (Lev. 20:8): “I am the Lord that sanctify you.” But nothing unreasonable is done by God, for it is written (Ps. 103:24): “Thou hast made all things in wisdom.” Therefore there was nothing without a reasonable cause in the sacraments of the Old Law, which were ordained to the sanctification of man.

I answer that, As stated above (q. 101, a. 4), the sacraments are, properly speaking, things applied to the worshippers of God for their consecration so as, in some way, to depute them to the worship of God. Now the worship of God belonged in a general way to the whole people; but in a special way, it belonged to the priests and Levites, who were the ministers of divine worship. Consequently, in these sacraments of the Old Law, cer-

* Cf. Heb. 9:13 † Cf. Ex. 29 ‡ Cf. Lev. 8:7, seqq.

tain things concerned the whole people in general; while others belonged to the ministers.

In regard to both, three things were necessary. The first was to be established in the state of worshipping God: and this institution was brought about—for all in general, by circumcision, without which no one was admitted to any of the legal observances—and for the priests, by their consecration. The second thing required was the use of those things that pertain to divine worship. And thus, as to the people, there was the partaking of the paschal banquet, to which no uncircumcised man was admitted, as is clear from Ex. 12:43, seqq.: and, as to the priests, the offering of the victims, and the eating of the loaves of proposition and of other things that were allotted to the use of the priests. The third thing required was the removal of all impediments to divine worship, viz. of uncleannesses. And then, as to the people, certain purifications were instituted for the removal of certain external uncleannesses; and also expiations from sins; while, as to the priests and Levites, the washing of hands and feet and the shaving of the hair were instituted.

And all these things had reasonable causes, both literal, in so far as they were ordained to the worship of God for the time being, and figurative, in so far as they were ordained to foreshadow Christ: as we shall see by taking them one by one.

Reply to Objection 1. The chief literal reason for circumcision was in order that man might profess his belief in one God. And because Abraham was the first to sever himself from the infidels, by going out from his house and kindred, for this reason he was the first to receive circumcision. This reason is set forth by the Apostle (Rom. 4:9, seqq.) thus: “He received the sign of circumcision, a seal of the justice of the faith which he had, being uncircumcised”; because, to wit, we are told that “unto Abraham faith was reputed to justice,” for the reason that “against hope he believed in hope,” i.e. against the hope that is of nature he believed in the hope that is of grace, “that he might be made the father of many nations,” when he was an old man, and his wife an old and barren woman. And in order that this declaration, and imitation of Abraham’s faith, might be fixed firmly in the hearts of the Jews, they received in their flesh such a sign as they could not forget, wherefore it is written (Gn. 17:13): “My covenant shall be in your flesh for a perpetual covenant.” This was done on the eighth day, because until then a child is very tender, and so might be seriously injured; and is considered as something not yet consolidated: wherefore neither are animals offered before the eighth day. And it was not delayed after that time, lest some might refuse the sign of circumcision on account of the pain: and also lest the parents, whose love for their children increases as they become used to their presence and as they grow older, should withdraw their children from circumcision. A second reason may have been the weakening of concupiscence in that member. A third motive may have

been to revile the worship of Venus and Priapus, which gave honor to that part of the body. The Lord’s prohibition extended only to the cutting of oneself in honor of idols: and such was not the circumcision of which we have been speaking.

The figurative reason for circumcision was that it foreshadowed the removal of corruption, which was to be brought about by Christ, and will be perfectly fulfilled in the eighth age, which is the age of those who rise from the dead. And since all corruption of guilt and punishment comes to us through our carnal origin, from the sin of our first parent, therefore circumcision was applied to the generative member. Hence the Apostle says (Col. 2:11): “You are circumcised” in Christ “with circumcision not made by hand in despoiling of the body of the flesh, but in the circumcision of” Our Lord Jesus “Christ.”

Reply to Objection 2. The literal reason of the paschal banquet was to commemorate the blessing of being led by God out of Egypt. Hence by celebrating this banquet they declared that they belonged to that people which God had taken to Himself out of Egypt. For when they were delivered from Egypt, they were commanded to sprinkle the lamb’s blood on the transoms of their house doors, as though declaring that they were averse to the rites of the Egyptians who worshipped the ram. Wherefore they were delivered by the sprinkling or rubbing of the blood of the lamb on the door-posts, from the danger of extermination which threatened the Egyptians.

Now two things are to be observed in their departure from Egypt: namely, their haste in going, for the Egyptians pressed them to go forth speedily, as related in Ex. 12:33; and there was danger that anyone who did not hasten to go with the crowd might be slain by the Egyptians. Their haste was shown in two ways. First by what they ate. For they were commanded to eat unleavened bread, as a sign “that it could not be leavened, the Egyptians pressing them to depart”; and to eat roast meat, for this took less time to prepare; and that they should not break a bone thereof, because in their haste there was no time to break bones. Secondly, as to the manner of eating. For it is written: “You shall gird your reins, and you shall have shoes on your feet, holding staves in your hands, and you shall eat in haste”: which clearly designates men at the point of starting on a journey. To this also is to be referred the command: “In one house shall it be eaten, neither shall you carry forth of the flesh thereof out of the house”: because, to wit, on account of their haste, they could not send any gifts of it.

The stress they suffered while in Egypt was denoted by the wild lettuces. The figurative reason is evident, because the sacrifice of the paschal lamb signified the sacrifice of Christ according to 1 Cor. 5:7: “Christ our pasch is sacrificed.” The blood of the lamb, which ensured deliverance from the destroyer, by being sprinkled on the transoms, signified faith in Christ’s Passion,

in the hearts and on the lips of the faithful, by which same Passion we are delivered from sin and death, according to 1 Pet. 1:18: "You were...redeemed...with the precious blood...of a lamb unspotted." The partaking of its flesh signified the eating of Christ's body in the Sacrament; and the flesh was roasted at the fire to signify Christ's Passion or charity. And it was eaten with unleavened bread to signify the blameless life of the faithful who partake of Christ's body, according to 1 Cor. 5:8: "Let us feast...with the unleavened bread of sincerity and truth." The wild lettuces were added to denote repentance for sins, which is required of those who receive the body of Christ. Their loins were girt in sign of chastity: and the shoes of their feet are the examples of our dead ancestors. The staves they were to hold in their hands denoted pastoral authority: and it was commanded that the paschal lamb should be eaten in one house, i.e. in a catholic church, and not in the conventicles of heretics.

Reply to Objection 3. Some of the sacraments of the New Law had corresponding figurative sacraments in the Old Law. For Baptism, which is the sacrament of Faith, corresponds to circumcision. Hence it is written (Col. 2:11,12): "You are circumcised...in the circumcision of" Our Lord Jesus "Christ: buried with Him in Baptism." In the New Law the sacrament of the Eucharist corresponds to the banquet of the paschal lamb. The sacrament of Penance in the New Law corresponds to all the purifications of the Old Law. The sacrament of Orders corresponds to the consecration of the pontiff and of the priests. To the sacrament of Confirmation, which is the sacrament of the fulness of grace, there would be no corresponding sacrament of the Old Law, because the time of fulness had not yet come, since "the Law brought no man [Vulg.: 'nothing'] to perfection" (Heb. 7:19). The same applies to the sacrament of Extreme Unction, which is an immediate preparation for entrance into glory, to which the way was not yet opened out in the Old Law, since the price had not yet been paid. Matrimony did indeed exist under the Old Law, as a function of nature, but not as the sacrament of the union of Christ with the Church, for that union was not as yet brought about. Hence under the Old Law it was allowable to give a bill of divorce, which is contrary to the nature of the sacrament.

Reply to Objection 4. As already stated, the purifications of the Old Law were ordained for the removal of impediments to the divine worship: which worship is twofold; viz. spiritual, consisting in devotion of the mind to God; and corporal, consisting in sacrifices, oblations, and so forth. Now men are hindered in the spiritual worship by sins, whereby men were said to be polluted, for instance, by idolatry, murder, adultery, or incest. From such pollutions men were purified by certain sacrifices, offered either for the whole community in general, or also for the sins of individuals; not that those carnal sacrifices had of themselves the power of expiating sin; but that they signified that expiation of

sins which was to be effected by Christ, and of which those of old became partakers by protesting their faith in the Redeemer, while taking part in the figurative sacrifices.

The impediments to external worship consisted in certain bodily uncleannesses; which were considered in the first place as existing in man, and consequently in other animals also, and in man's clothes, dwelling-place, and vessels. In man himself uncleanness was considered as arising partly from himself and partly from contact with unclean things. Anything proceeding from man was reputed unclean that was already subject to corruption, or exposed thereto: and consequently since death is a kind of corruption, the human corpse was considered unclean. In like manner, since leprosy arises from corruption of the humors, which break out externally and infect other persons, therefore were lepers also considered unclean; and, again, women suffering from a flow of blood, whether from weakness, or from nature (either at the monthly course or at the time of conception); and, for the same reason, men were reputed unclean if they suffered from a flow of seed, whether due to weakness, to nocturnal pollution, or to sexual intercourse. Because every humor issuing from man in the aforesaid ways involves some unclean infection. Again, man contracted uncleanness by touching any unclean thing whatever.

Now there was both a literal and a figurative reason for these uncleannesses. The literal reason was taken from the reverence due to those things that belong to the divine worship: both because men are not wont, when unclean, to touch precious things: and in order that by rarely approaching sacred things they might have greater respect for them. For since man could seldom avoid all the aforesaid uncleannesses, the result was that men could seldom approach to touch things belonging to the worship of God, so that when they did approach, they did so with greater reverence and humility. Moreover, in some of these the literal reason was that men should not be kept away from worshipping God through fear of coming in contact with lepers and others similarly afflicted with loathsome and contagious diseases. In others, again, the reason was to avoid idolatrous worship: because in their sacrificial rites the Gentiles sometimes employed human blood and seed. All these bodily uncleannesses were purified either by the mere sprinkling of water, or, in the case of those which were more grievous, by some sacrifice of expiation for the sin which was the occasion of the uncleanness in question.

The figurative reason for these uncleannesses was that they were figures of various sins. For the uncleanness of any corpse signifies the uncleanness of sin, which is the death of the soul. The uncleanness of leprosy betokened the uncleanness of heretical doctrine: both because heretical doctrine is contagious just as leprosy is, and because no doctrine is so false as not to have some truth mingled with error, just as on the surface of a

leprous body one may distinguish the healthy parts from those that are infected. The uncleanness of a woman suffering from a flow of blood denotes the uncleanness of idolatry, on account of the blood which is offered up. The uncleanness of the man who has suffered seminal loss signifies the uncleanness of empty words, for "the seed is the word of God." The uncleanness of sexual intercourse and of the woman in child-birth signifies the uncleanness of original sin. The uncleanness of the woman in her periods signifies the uncleanness of a mind that is sensualized by pleasure. Speaking generally, the uncleanness contracted by touching an unclean thing denotes the uncleanness arising from consent in another's sin, according to 2 Cor. 6:17: "Go out from among them, and be ye separate. . . and touch not the unclean thing."

Moreover, this uncleanness arising from the touch was contracted even by inanimate objects; for whatever was touched in any way by an unclean man, became itself unclean. Wherein the Law attenuated the superstition of the Gentiles, who held that uncleanness was contracted not only by touch, but also by speech or looks, as Rabbi Moses states (Doct. Perplex. iii) of a woman in her periods. The mystical sense of this was that "to God the wicked and his wickedness are hateful alike" (Wis. 14:9).

There was also an uncleanness of inanimate things considered in themselves, such as the uncleanness of leprosy in a house or in clothes. For just as leprosy occurs in men through a corrupt humor causing putrefaction and corruption in the flesh; so, too, through some corruption and excess of humidity or dryness, there arises sometimes a kind of corruption in the stones with which a house is built, or in clothes. Hence the Law called this corruption by the name of leprosy, whereby a house or a garment was deemed to be unclean: both because all corruption savored of uncleanness, as stated above, and because the Gentiles worshipped their household gods as a preservative against this corruption. Hence the Law prescribed such houses, where this kind of corruption was of a lasting nature, to be destroyed; and such garments to be burnt, in order to avoid all occasion of idolatry. There was also an uncleanness of vessels, of which it is written (Num. 19:15): "The vessel that hath no cover, and binding over it, shall be unclean." The cause of this uncleanness was that anything unclean might easily drop into such vessels, so as to render them unclean. Moreover, this command aimed at the prevention of idolatry. For idolaters believed that if mice, lizards, or the like, which they used to sacrifice to the idols, fell into the vessels or into the water, these became more pleasing to the gods. Even now some women let down uncovered vessels in honor of the nocturnal deities which they call "Janae."

The figurative reason of these uncleannesses is that the leprosy of a house signified the uncleanness of the assembly of heretics; the leprosy of a linen garment signified an evil life arising from bitterness of mind; the

leprosy of a woollen garment denoted the wickedness of flatterers; leprosy in the warp signified the vices of the soul; leprosy on the woof denoted sins of the flesh, for as the warp is in the woof, so is the soul in the body. The vessel that has neither cover nor binding, betokens a man who lacks the veil of taciturnity, and who is unrestrained by any severity of discipline.

Reply to Objection 5. As stated above (ad 4), there was a twofold uncleanness in the Law; one by way of corruption in the mind or in the body; and this was the graver uncleanness; the other was by mere contact with an unclean thing, and this was less grave, and was more easily expiated. Because the former uncleanness was expiated by sacrifices for sins, since all corruption is due to sin, and signifies sin: whereas the latter uncleanness was expiated by the mere sprinkling of a certain water, of which water we read in Num. 19. For there God commanded them to take a red cow in memory of the sin they had committed in worshipping a calf. And a cow is mentioned rather than a calf, because it was thus that the Lord was wont to designate the synagogue, according to Osee 4:16: "Israel hath gone astray like a wanton heifer": and this was, perhaps, because they worshipped heifers after the custom of Egypt, according to Osee 10:5: "(They) have worshipped the kine of Bethaven." And in detestation of the sin of idolatry it was sacrificed outside the camp; in fact, whenever sacrifice was offered up in expiation of the multitude of sins, it was all burnt outside the camp. Moreover, in order to show that this sacrifice cleansed the people from all their sins, "the priest" dipped "his finger in her blood," and sprinkled "it over against the door of the tabernacle seven times"; for the number seven signified universality. Further, the very sprinkling of blood pertained to the detestation of idolatry, in which the blood that was offered up was not poured out, but was collected together, and men gathered round it to eat in honor of the idols. Likewise it was burnt by fire, either because God appeared to Moses in a fire, and the Law was given from the midst of fire; or to denote that idolatry, together with all that was connected therewith, was to be extirpated altogether; just as the cow was burnt "with her skin and her flesh, her blood and dung being delivered to the flames." To this burning were added "cedar-wood, and hyssop, and scarlet twice dyed," to signify that just as cedar-wood is not liable to putrefaction, and scarlet twice dyed does not easily lose its color, and hyssop retains its odor after it has been dried; so also was this sacrifice for the preservation of the whole people, and for their good behavior and devotion. Hence it is said of the ashes of the cow: "That they may be reserved for the multitude of the children of Israel." Or, according to Josephus (Antiq. iii, 8,9,10), the four elements are indicated here: for "cedar-wood" was added to the fire, to signify the earth, on account of its earthiness; "hyssop," to signify the air, on account of its smell; "scarlet twice dyed," to signify water, for the same reason as purple, on account of the dyes which are taken out of the water:

thus denoting the fact that this sacrifice was offered to the Creator of the four elements. And since this sacrifice was offered for the sin of idolatry, both “he that burned her,” and “he that gathered up the ashes,” and “he that sprinkled the water” in which the ashes were placed, were deemed unclean in detestation of that sin, in order to show that whatever was in any way connected with idolatry should be cast aside as being unclean. From this uncleanness they were purified by the mere washing of their clothes; nor did they need to be sprinkled with the water on account of this kind of uncleanness, because otherwise the process would have been unending, since he that sprinkled the water became unclean, so that if he were to sprinkle himself he would remain unclean; and if another were to sprinkle him, that one would have become unclean, and in like manner, whoever might sprinkle him, and so on indefinitely.

The figurative reason of this sacrifice was that the red cow signified Christ in respect his assumed weakness, denoted by the female sex; while the color of the cow designated the blood of His Passion. And the “red cow was of full age,” because all Christ’s works are perfect, “in which there” was “no blemish”; “and which” had “not carried the yoke,” because Christ was innocent, nor did He carry the yoke of sin. It was commanded to be taken to Moses, because they blamed Him for transgressing the law of Moses by breaking the Sabbath. And it was commanded to be delivered “to Eleazar the priest,” because Christ was delivered into the hands of the priests to be slain. It was immolated “without the camp,” because Christ “suffered outside the gate” (Heb. 13:12). And the priest dipped “his finger in her blood,” because the mystery of Christ’s Passion should be considered and imitated.

It was sprinkled “over against...the tabernacle,” which denotes the synagogue, to signify either the condemnation of the unbelieving Jews, or the purification of believers; and this “seven times,” in token either of the seven gifts of the Holy Ghost, or of the seven days wherein all time is comprised. Again, all things that pertain to the Incarnation of Christ should be burnt with fire, i.e. they should be understood spiritually; for the “skin” and “flesh” signified Christ’s outward works; the “blood” denoted the subtle inward force which quickened His external deeds; the “dung” betokened His weariness, His thirst, and all such like things pertaining to His weakness. Three things were added, viz. “cedarwood,” which denotes the height of hope or contemplation; “hyssop,” in token of humility or faith; “scarlet twice dyed,” which denotes twofold charity; for it is by these three that we should cling to Christ suffering. The ashes of this burning were gathered by “a man that is clean,” because the relics of the Passion came into the possession of the Gentiles, who were not guilty of Christ’s death. The ashes were put into water for the purpose of expiation, because Baptism receives from Christ’s Passion the power of washing away sins. The priest who immolated and burned the cow, and he who

burned, and he who gathered together the ashes, were unclean, as also he that sprinkled the water: either because the Jews became unclean through putting Christ to death, whereby our sins are expiated; and this, until the evening, i.e. until the end of the world, when the remnants of Israel will be converted; or else because they who handle sacred things with a view to the cleansing of others contract certain uncleannesses, as Gregory says (Pastor. ii, 5); and this until the evening, i.e. until the end of this life.

Reply to Objection 6. As stated above (ad 5), an uncleanness which was caused by corruption either of mind or of body was expiated by sin-offerings. Now special sacrifices were wont to be offered for the sins of individuals: but since some were neglectful about expiating such sins and uncleannesses; or, through ignorance, failed to offer this expiation; it was laid down that once a year, on the tenth day of the seventh month, a sacrifice of expiation should be offered for the whole people. And because, as the Apostle says (Heb. 7:28), “the Law maketh men priests, who have infirmity,” it behooved the priest first of all to offer a calf for his own sins, in memory of Aaron’s sin in fashioning the molten calf; and besides, to offer a ram for a holocaust, which signified that the priestly sovereignty denoted by the ram, who is the head of the flock, was to be ordained to the glory of God. Then he offered two he-goats for the people: one of which was offered in expiation of the sins of the multitude. For the he-goat is an evil-smelling animal; and from its skin clothes are made having a pungent odor; to signify the stench, uncleanness and the sting of sin. After this he-goat had been immolated, its blood was taken, together with the blood of the calf, into the Holy of Holies, and the entire sanctuary was sprinkled with it; to signify that the tabernacle was cleansed from the uncleanness of the children of Israel. But the corpses of the he-goat and calf which had been offered up for sin had to be burnt, to denote the destruction of sins. They were not, however, burnt on the altar: since none but holocausts were burnt thereon; but it was prescribed that they should be burnt without the camp, in detestation of sin: for this was done whenever sacrifice was offered for a grievous sin, or for the multitude of sins. The other goat was let loose into the wilderness: not indeed to offer it to the demons, whom the Gentiles worshipped in desert places, because it was unlawful to offer aught to them; but in order to point out the effect of the sacrifice which had been offered up. Hence the priest put his hand on its head, while confessing the sins of the children of Israel: as though that goat were to carry them away into the wilderness, where it would be devoured by wild beasts, because it bore the punishment of the people’s sins. And it was said to bear the sins of the people, either because the forgiveness of the people’s sins was signified by its being let loose, or because on its head written lists of sins were fastened.

The figurative reason of these things was that Christ was foreshadowed both by the calf, on account of His

power; and by the ram, because He is the Head of the faithful; and by the he-goat, on account of “the likeness of sinful flesh” (Rom. 8:3). Moreover, Christ was sacrificed for the sins of both priests and people: since both those of high and those of low degree are cleansed from sin by His Passion. The blood of the calf and of the goat was brought into the Holies by the priest, because the entrance to the kingdom of heaven was opened to us by the blood of Christ’s Passion. Their bodies were burnt without the camp, because “Christ suffered without the gate,” as the Apostle declares (Heb. 13:12). The scape-goat may denote either Christ’s Godhead Which went away into solitude when the Man Christ suffered, not by going to another place, but by restraining His power: or it may signify the base concupiscence which we ought to cast away from ourselves, while we offer up to Our Lord acts of virtue.

With regard to the uncleanness contracted by those who burnt these sacrifices, the reason is the same as that which we assigned (ad 5) to the sacrifice of the red heifer.

Reply to Objection 7. The legal rite did not cleanse the leper of his deformity, but declared him to be cleansed. This is shown by the words of Lev. 14:3, seqq., where it was said that the priest, “when he shall find that the leprosy is cleansed,” shall command “him that is to be purified”: consequently, the leper was already healed: but he was said to be purified in so far as the verdict of the priest restored him to the society of men and to the worship of God. It happened sometimes, however, that bodily leprosy was miraculously cured by the legal rite, when the priest erred in his judgment.

Now this purification of a leper was twofold: for, in the first place, he was declared to be clean; and, secondly, he was restored, as clean, to the society of men and to the worship of God, to wit, after seven days. At the first purification the leper who sought to be cleansed offered for himself “two living sparrows. . . cedar-wood, and scarlet, and hyssop,” in such wise that a sparrow and the hyssop should be tied to the cedar-wood with a scarlet thread, so that the cedar-wood was like the handle of an aspersory: while the hyssop and sparrow were that part of the aspersory which was dipped into the blood of the other sparrow which was “immolated. . . over living waters.” These things he offered as an antidote to the four defects of leprosy: for cedar-wood, which is not subject to putrefaction, was offered against the putrefaction; hyssop, which is a sweet-smelling herb, was offered up against the stench; a living sparrow was offered up against numbness; and scarlet, which has a vivid color, was offered up against the repulsive color of leprosy. The living sparrow was let loose to fly away into the plain, because the leper was restored to his former liberty.

On the eighth day he was admitted to divine worship, and was restored to the society of men; but only

after having shaved all the hair of his body, and washed his clothes, because leprosy rots the hair, infects the clothes, and gives them an evil smell. Afterwards a sacrifice was offered for his sin, since leprosy was frequently a result of sin: and some of the blood of the sacrifice was put on the tip of the ear of the man that was to be cleansed, “and on the thumb of his right hand, and the great toe of his right foot”; because it is in these parts that leprosy is first diagnosed and felt. In this rite, moreover, three liquids were employed: viz. blood, against the corruption of the blood; oil, to denote the healing of the disease; and living waters, to wash away the filth.

The figurative reason was that the Divine and human natures in Christ were denoted by the two sparrows, one of which, in likeness of His human nature, was offered up in an earthen vessel over living waters, because the waters of Baptism are sanctified by Christ’s Passion. The other sparrow, in token of His impassible Godhead, remained living, because the Godhead cannot die: hence it flew away, for the Godhead could not be encompassed by the Passion. Now this living sparrow, together with the cedar-wood and scarlet or cochineal, and hyssop, i.e. faith, hope and charity, as stated above (ad 5), was put into the water for the purpose of sprinkling, because we are baptized in the faith of the God-Man. By the waters of Baptism or of his tears man washes his clothes, i.e. his works, and all his hair, i.e. his thoughts. The tip of the right ear of the man to be cleansed is moistened with some the blood and oil, in order to strengthen his hearing against harmful words; and the thumb and toe of his right hand and foot are moistened that his deeds may be holy. Other matters pertaining to this purification, or to that also of any other uncleannesses, call for no special remark, beyond what applies to other sacrifices, whether for sins or for trespasses.

Reply obj. 8 and 9: Just as the people were initiated by circumcision to the divine worship, so were the ministers by some special purification or consecration: wherefore they are commanded to be separated from other men, as being specially deputed, rather than others, to the ministry of the divine worship. And all that was done touching them in their consecration or institution, was with a view to show that they were in possession of a prerogative of purity, power and dignity. Hence three things were done in the institution of ministers: for first, they were purified; secondly, they were adorned* and consecrated; thirdly, they were employed in the ministry. All in general used to be purified by washing in water, and by certain sacrifices; but the Levites in particular shaved all the hair of their bodies, as stated in Lev. 8 (cf. Num. 8).

With regard to the high-priests and priests the consecration was performed as follows. First, when they had been washed, they were clothed with certain special garments in designation of their dignity. In particu-

* ‘Ornabantur.’ Some editions have ‘ordinabantur’—‘were ordained’: the former reading is a reference to Lev. 8:7-9

lar, the high-priest was anointed on the head with the oil of unction: to denote that the power of consecration was poured forth by him on to others, just as oil flows from the head on to the lower parts of the body; according to Ps. 132:2: "Like the precious ointment on the head that ran down upon the beard, the beard of Aaron." But the Levites received no other consecration besides being offered to the Lord by the children of Israel through the hands of the high-priest, who prayed for them. The lesser priests were consecrated on the hands only, which were to be employed in the sacrifices. The tip of their right ear and the thumb of their right hand, and the great toe of their right foot were tinged with the blood of the sacrificial animal, to denote that they should be obedient to God's law in offering the sacrifices (this is denoted by touching their right ear); and that they should be careful and ready in performing the sacrifices (this is signified by the moistening of the right foot and hand). They themselves and their garments were sprinkled with the blood of the animal that had been sacrificed, in memory of the blood of the lamb by which they had been delivered in Egypt. At their consecration the following sacrifices were offered: a calf, for sin, in memory of Aaron's sin in fashioning the molten calf; a ram, for a holocaust, in memory of the sacrifice of Abraham, whose obedience it behooved the high-priest to imitate; again, a ram of consecration, which was a peace-offering, in memory of the delivery from Egypt through the blood of the lamb; and a basket of bread, in memory of the manna vouchsafed to the people.

In reference to their being destined to the ministry, the fat of the ram, one roll of bread, and the right shoulder were placed on their hands, to show that they received the power of offering these things to the Lord: while the Levites were initiated to the ministry by being brought into the tabernacle of the covenant, as being destined to the ministry touching the vessels of the sanctuary.

The figurative reason of these things was that those who are to be consecrated to the spiritual ministry of Christ, should be first of all purified by the waters of Baptism, and by the waters of tears, in their faith in Christ's Passion, which is a sacrifice both of expiation and of purification. They have also to shave all the hair of their body, i.e. all evil thoughts. They should, moreover, be decked with virtues, and be consecrated with the oil of the Holy Ghost, and with the sprinkling of Christ's blood. And thus they should be intent on the fulfilment of their spiritual ministry.

Reply to Objection 10. As already stated (a. 4), the purpose of the Law was to induce men to have reverence for the divine worship: and this in two ways; first, by excluding from the worship of God whatever might be an object of contempt; secondly, by introducing into the divine worship all that seemed to savor of reverence. And, indeed, if this was observed in regard to the tabernacle and its vessels, and in the animals to be sacrificed, much more was it to be observed in the very

ministers. Wherefore, in order to obviate contempt for the ministers, it was prescribed that they should have no bodily stain or defect: since men so deformed are wont to be despised by others. For the same reason it was also commanded that the choice of those who were to be destined to the service of God was not to be made in a broadcast manner from any family, but according to their descent from one particular stock, thus giving them distinction and nobility.

In order that they might be revered, special ornate vestments were appointed for their use, and a special form of consecration. This indeed is the general reason of ornate garments. But the high-priest in particular had eight vestments. First, he had a linen tunic. Secondly, he had a purple tunic; round the bottom of which were placed "little bells" and "pomegranates of violet, and purple, and scarlet twice dyed." Thirdly, he had the ephod, which covered his shoulders and his breast down to the girdle; and it was made of gold, and violet and purple, and scarlet twice dyed and twisted linen: and on his shoulders he bore two onyx stones, on which were graven the names of the children of Israel. Fourthly, he had the rational, made of the same material; it was square in shape, and was worn on the breast, and was fastened to the ephod. On this rational there were twelve precious stones set in four rows, on which also were graven the names of the children of Israel, in token that the priest bore the burden of the whole people, since he bore their names on his shoulders; and that it was his duty ever to think of their welfare, since he wore them on his breast, bearing them in his heart, so to speak. And the Lord commanded the "Doctrine and Truth" to be put in the rational: for certain matters regarding moral and dogmatic truth were written on it. The Jews indeed pretend that on the rational was placed a stone which changed color according to the various things which were about to happen to the children of Israel: and this they call the "Truth and Doctrine." Fifthly, he wore a belt or girdle made of the four colors mentioned above. Sixthly, there was the tiara or mitre which was made of linen. Seventhly, there was the golden plate which hung over his forehead; on it was inscribed the Lord's name. Eighthly, there were "the linen breeches to cover the flesh of their nakedness," when they went up to the sanctuary or altar. Of these eight vestments the lesser priests had four, viz. the linen tunic and breeches, the belt and the tiara.

According to some, the literal reason for these vestments was that they denoted the disposition of the terrestrial globe; as though the high-priest confessed himself to be the minister of the Creator of the world, wherefore it is written (Wis. 18:24): "In the robe" of Aaron "was the whole world" described. For the linen breeches signified the earth out of which the flax grows. The surrounding belt signified the ocean which surrounds the earth. The violet tunic denoted the air by its color: its little bells betoken the thunder; the pomegranates, the lightning. The ephod, by its many

colors, signified the starry heaven; the two onyx stones denoted the two hemispheres, or the sun and moon. The twelve precious stones on the breast are the twelve signs of the zodiac: and they are said to have been placed on the rational because in heaven, are the types [rationes] of earthly things, according to Job 38:33: "Dost thou know the order of heaven, and canst thou set down the reason [rationem] thereof on the earth?" The turban or tiara signified the empyrean: the golden plate was a token of God, the governor of the universe.

The figurative reason is evident. Because bodily stains or defects wherefrom the priests had to be immune, signify the various vices and sins from which they should be free. Thus it is forbidden that he should be blind, i.e. he ought not to be ignorant: he must not be lame, i.e. vacillating and uncertain of purpose: that he must have "a little, or a great, or a crooked nose," i.e. that he should not, from lack of discretion, exceed in one direction or in another, or even exercise some base occupation: for the nose signifies discretion, because it discerns odors. It is forbidden that he should have "a broken foot" or "hand," i.e. he should not lose the power of doing good works or of advancing in virtue. He is rejected, too, if he have a swelling either in front or behind [Vulg.: 'if he be crook-backed']: by which is signified too much love of earthly things: if he be bleary-eyed, i.e. if his mind is darkened by carnal affections: for running of the eyes is caused by a flow of matter. He is also rejected if he had "a pearl in his eye," i.e. if he presumes in his own estimation that he is clothed in the white robe of righteousness. Again, he is rejected "if

he have a continued scab," i.e. lustfulness of the flesh: also, if he have "a dry scurf," which covers the body without giving pain, and is a blemish on the comeliness of the members; which denotes avarice. Lastly, he is rejected "if he have a rupture" or hernia; through baseness rending his heart, though it appear not in his deeds.

The vestments denote the virtues of God's ministers. Now there are four things that are necessary to all His ministers, viz. chastity denoted by the breeches; a pure life, signified by the linen tunic; the moderation of discretion, betokened by the girdle; and rectitude of purpose, denoted by the mitre covering the head. But the high-priests needed four other things in addition to these. First, a continual recollection of God in their thoughts; and this was signified by the golden plate worn over the forehead, with the name of God engraved thereon. Secondly, they had to bear with the shortcomings of the people: this was denoted by the ephod which they bore on their shoulders. Thirdly, they had to carry the people in their mind and heart by the solicitude of charity, in token of which they wore the rational. Fourthly, they had to lead a godly life by performing works of perfection; and this was signified by the violet tunic. Hence little golden bells were fixed to the bottom of the violet tunic, which bells signified the teaching of divine things united in the high-priest to his godly mode of life. In addition to these were the pomegranates, signifying unity of faith and concord in good morals: because his doctrine should hold together in such a way that it should not rend asunder the unity of faith and peace.

Objection 1. It would seem that there was no reasonable cause for the ceremonial observances. Because, as the Apostle says (1 Tim. 4:4), “every creature of God is good, and nothing to be rejected that is received with thanksgiving.” It was therefore unfitting that they should be forbidden to eat certain foods, as being unclean according to Lev. 11*.

Objection 2. Further, just as animals are given to man for food, so also are herbs: wherefore it is written (Gn. 9:3): “As the green herbs have I delivered all” flesh “to you.” But the Law did not distinguish any herbs from the rest as being unclean, although some are most harmful, for instance, those that are poisonous. Therefore it seems that neither should any animals have been prohibited as being unclean.

Objection 3. Further, if the matter from which a thing is generated be unclean, it seems that likewise the thing generated therefrom is unclean. But flesh is generated from blood. Since therefore all flesh was not prohibited as unclean, it seems that in like manner neither should blood have been forbidden as unclean; nor the fat which is engendered from blood.

Objection 4. Further, Our Lord said (Mat. 10:28; cf. Lk. 12:4), that those should not be feared “that kill the body;” since after death they “have no more that they can do”: which would not be true if after death harm might come to man through anything done with his body. Much less therefore does it matter to an animal already dead how its flesh be cooked. Consequently there seems to be no reason in what is said, Ex. 23:19: “Thou shalt not boil a kid in the milk of its dam.”

Objection 5. Further, all that is first brought forth of man and beast, as being most perfect, is commanded to be offered to the Lord (Ex. 13). Therefore it is an unfitting command that is set forth in Lev. 19:23: “when you shall be come into the land, and shall have planted in it fruit trees, you shall take away the uncircumcision[†] of them,” i.e. the first crops, and they “shall be unclean to you, neither shall you eat of them.”

Objection 6. Further, clothing is something extraneous to man’s body. Therefore certain kinds of garments should not have been forbidden to the Jews: for instance (Lev. 19:19): “Thou shalt not wear a garment that is woven of two sorts”: and (Dt. 22:5): “A woman shall not be clothed with man’s apparel, neither shall a man use woman’s apparel”: and further on (Dt. 22:11): “Thou shalt not wear a garment that is woven of woolen and linen together.”

Objection 7. Further, to be mindful of God’s commandments concerns not the body but the heart. Therefore it is unsuitably prescribed (Dt. 6:8, seqq.) that they should “bind” the commandments of God “as a sign” on their hands; and that they should “write them in the entry”; and (Num. 15:38, seqq.) that they should

“make to themselves fringes in the corners of their garments, putting in them ribands of blue. . . they may remember. . . the commandments of the Lord.”

Objection 8. Further, the Apostle says (1 Cor. 9:9) that God does not “take care for oxen,” and, therefore, neither of other irrational animals. Therefore without reason is it commanded (Dt. 22:6): “If thou find, as thou walkest by the way, a bird’s nest in a tree. . . thou shalt not take the dam with her young”; and (Dt. 25:4): “Thou shalt not muzzle the ox that treadeth out thy corn”; and (Lev. 19:19): “Thou shalt not make thy cattle to gender with beasts of any other kind.”

Objection 9. Further, no distinction was made between clean and unclean plants. Much less therefore should any distinction have been made about the cultivation of plants. Therefore it was unfittingly prescribed (Lev. 19:19): “Thou shalt not sow thy field with different seeds”; and (Dt. 22:9, seqq.): “Thou shalt sow thy vineyard with divers seeds”; and: “Thou shalt not plough with an ox and an ass together.”

Objection 10. Further, it is apparent that inanimate things are most of all subject to the power of man. Therefore it was unfitting to debar man from taking silver and gold of which idols were made, or anything they found in the houses of idols, as expressed in the commandment of the Law (Dt. 7:25, seqq.). It also seems an absurd commandment set forth in Dt. 23:13, that they should “dig round about and. . . cover with earth that which they were eased of.”

Objection 11. Further, piety is required especially in priests. But it seems to be an act of piety to assist at the burial of one’s friends: wherefore Tobias is commended for so doing (Tob. 1:20, seqq.). In like manner it is sometimes an act of piety to marry a loose woman, because she is thereby delivered from sin and infamy. Therefore it seems inconsistent for these things to be forbidden to priests (Lev. 21).

On the contrary, It is written (Dt. 18:14): “But thou art otherwise instructed by the Lord thy God”: from which words we may gather that these observances were instituted by God to be a special prerogative of that people. Therefore they are not without reason or cause.

I answer that, The Jewish people, as stated above (a. 5), were specially chosen for the worship of God, and among them the priests themselves were specially set apart for that purpose. And just as other things that are applied to the divine worship, need to be marked in some particular way so that they be worthy of the worship of God; so too in that people’s, and especially the priests’, mode of life, there needed to be certain special things befitting the divine worship, whether spiritual or corporal. Now the worship prescribed by the Law foreshadowed the mystery of Christ: so that whatever they did was a figure of things pertaining to Christ, accord-

* Cf. Dt. 14 † ‘Praeputia,’ which Douay version renders ‘first fruits’

ing to 1 Cor. 10:11: "All these things happened to them in figures." Consequently the reasons for these observances may be taken in two ways, first according to their fittingness to the worship of God; secondly, according as they foreshadow something touching the Christian mode of life.

Reply to Objection 1. As stated above (a. 5, ad 4,5), the Law distinguished a twofold pollution or uncleanness; one, that of sin, whereby the soul was defiled; and another consisting in some kind of corruption, whereby the body was in some way infected. Speaking then of the first-mentioned uncleanness, no kind of food is unclean, or can defile a man, by reason of its nature; wherefore we read (Mat. 15:11): "Not that which goeth into the mouth defileth a man; but what cometh out of the mouth, this defileth a man": which words are explained (Mat. 15:17) as referring to sins. Yet certain foods can defile the soul accidentally; in so far as man partakes of them against obedience or a vow, or from excessive concupiscence; or through their being an incentive to lust, for which reason some refrain from wine and flesh-meat.

If, however, we speak of bodily uncleanness, consisting in some kind of corruption, the flesh of certain animals is unclean, either because like the pig they feed on unclean things; or because their life is among unclean surroundings: thus certain animals, like moles and mice and such like, live underground, whence they contract a certain unpleasant smell; or because their flesh, through being too moist or too dry, engenders corrupt humors in the human body. Hence they were forbidden to eat the flesh of flat-footed animals, i.e. animals having an unclown hoof, on account of their earthiness; and in like manner they were forbidden to eat the flesh of animals that have many clefts in their feet, because such are very fierce and their flesh is very dry, such as the flesh of lions and the like. For the same reason they were forbidden to eat certain birds of prey the flesh of which is very dry, and certain water-fowl on account of their exceeding humidity. In like manner certain fish lacking fins and scales were prohibited on account of their excessive moisture; such as eels and the like. They were, however, allowed to eat ruminants and animals with a divided hoof, because in such animals the humors are well absorbed, and their nature well balanced: for neither are they too moist, as is indicated by the hoof; nor are they too earthly, which is shown by their having not a flat but a cloven hoof. Of fishes they were allowed to partake of the drier kinds, of which the fins and scales are an indication, because thereby the moist nature of the fish is tempered. Of birds they were allowed to eat the tamer kinds, such as hens, partridges, and the like. Another reason was detestation of idolatry: because the Gentiles, and especially the Egyptians, among whom they had grown up, offered up these forbidden animals to their idols, or employed them for the purpose of sorcery: whereas they did not eat those animals which the Jews were allowed to eat, but worshipped them as gods,

or abstained, for some other motive, from eating them, as stated above (a. 3, ad 2). The third reason was to prevent excessive care about food: wherefore they were allowed to eat those animals which could be procured easily and promptly.

With regard to blood and fat, they were forbidden to partake of those of any animals whatever without exception. Blood was forbidden, both in order to avoid cruelty, that they might abhor the shedding of human blood, as stated above (a. 3, ad 8); and in order to shun idolatrous rite whereby it was customary for men to collect the blood and to gather together around it for a banquet in honor of the idols, to whom they held the blood to be most acceptable. Hence the Lord commanded the blood to be poured out and to be covered with earth (Lev. 17:13). For the same reason they were forbidden to eat animals that had been suffocated or strangled: because the blood of these animals would not be separated from the body: or because this form of death is very painful to the victim; and the Lord wished to withdraw them from cruelty even in regard to irrational animals, so as to be less inclined to be cruel to other men, through being used to be kind to beasts. They were forbidden to eat the fat: both because idolaters ate it in honor of their gods; and because it used to be burnt in honor of God; and, again, because blood and fat are not nutritious, which is the cause assigned by Rabbi Moses (Doct. Perplex. iii). The reason why they were forbidden to eat the sinews is given in Gn. 32:32, where it is stated that "the children of Israel... eat not the sinew... because he touched the sinew of" Jacob's "thing and it shrank."

The figurative reason for these things is that all these animals signified certain sins, in token of which those animals were prohibited. Hence Augustine says (Contra Faustum iv, 7): "If the swine and lamb be called in question, both are clean by nature, because all God's creatures are good: yet the lamb is clean, and the pig is unclean in a certain signification. Thus if you speak of a foolish, and of a wise man, each of these expressions is clean considered in the nature of the sound, letters and syllables of which it is composed: but in signification, the one is clean, the other unclean." The animal that chews the cud and has a divided hoof, is clean in signification. Because division of the hoof is a figure of the two Testaments: or of the Father and Son: or of the two natures in Christ: of the distinction of good and evil. While chewing the cud signifies meditation on the Scriptures and a sound understanding thereof; and whoever lacks either of these is spiritually unclean. In like manner those fish that have scales and fins are clean in signification. Because fins signify the heavenly or contemplative life; while scales signify a life of trials, each of which is required for spiritual cleanness. Of birds certain kinds were forbidden. In the eagle which flies at a great height, pride is forbidden: in the griffon which is hostile to horses and men, cruelty of powerful men is prohibited. The osprey, which feeds on very small birds, signifies those who oppress the poor.

The kite, which is full of cunning, denotes those who are fraudulent in their dealings. The vulture, which follows an army, expecting to feed on the carcasses of the slain, signifies those who like others to die or to fight among themselves that they may gain thereby. Birds of the raven kind signify those who are blackened by their lusts; or those who lack kindly feelings, for the raven did not return when once it had been let loose from the ark. The ostrich which, though a bird, cannot fly, and is always on the ground, signifies those who fight God's cause, and at the same time are taken up with worldly business. The owl, which sees clearly at night, but cannot see in the daytime, denotes those who are clever in temporal affairs, but dull in spiritual matters. The gull, which flies both in the air and swims in the water, signifies those who are partial both to Circumcision and to Baptism: or else it denotes those who would fly by contemplation, yet dwell in the waters of sensual delights. The hawk, which helps men to seize the prey, is a figure of those who assist the strong to prey on the poor. The screech-owl, which seeks its food by night but hides by day, signifies the lustful man who seeks to lie hidden in his deeds of darkness. The cormorant, so constituted that it can stay a long time under water, denotes the glutton who plunges into the waters of pleasure. The ibis is an African bird with a long beak, and feeds on snakes; and perhaps it is the same as the stork: it signifies the envious man, who refreshes himself with the ills of others, as with snakes. The swan is bright in color, and by the aid of its long neck extracts its food from deep places on land or water: it may denote those who seek earthly profit though an external brightness of virtue. The bittern is a bird of the East: it has a long beak, and its jaws are furnished with follicles, wherein it stores its food at first, after a time proceeding to digest it: it is a figure of the miser, who is excessively careful in hoarding up the necessaries of life. The coot* has this peculiarity apart from other birds, that it has a webbed foot for swimming, and a cloven foot for walking: for it swims like a duck in the water, and walks like a partridge on land: it drinks only when it bites, since it dips all its food in water: it is a figure of a man who will not take advice, and does nothing but what is soaked in the water of his own will. The heron†, commonly called a falcon, signifies those whose "feet are swift to shed blood" (Ps. 13:3). The plover‡, which is a garrulous bird, signifies the gossip. The hoopoe, which builds its nest on dung, feeds on foetid ordure, and whose song is like a groan, denotes worldly grief which works death in those who are unclean. The bat, which flies near the ground, signifies those who being gifted with worldly knowledge, seek none but earthly things. Of fowls and quadrupeds those alone were permitted which have the hind-legs longer than the forelegs, so that they can leap: whereas those were forbidden which cling rather to the

earth: because those who abuse the doctrine of the four Evangelists, so that they are not lifted up thereby, are reputed unclean. By the prohibition of blood, fat and nerves, we are to understand the forbidding of cruelty, lust, and bravery in committing sin.

Reply to Objection 2. Men were wont to eat plants and other products of the soil even before the deluge: but the eating of flesh seems to have been introduced after the deluge; for it is written (Gn. 9:3): "Even as the green herbs have I delivered. . . all" flesh "to you." The reason for this was that the eating of the products of the soil savors rather of a simple life; whereas the eating of flesh savors of delicate and over-careful living. For the soil gives birth to the herb of its own accord; and such like products of the earth may be had in great quantities with very little effort: whereas no small trouble is necessary either to rear or to catch an animal. Consequently God being wishful to bring His people back to a more simple way of living, forbade them to eat many kinds of animals, but not those things that are produced by the soil. Another reason may be that animals were offered to idols, while the products of the soil were not.

The Reply to the Third Objection is clear from what has been said (ad 1).

Reply to Objection 4. Although the kid that is slain has no perception of the manner in which its flesh is cooked, yet it would seem to savor of heartlessness if the dam's milk, which was intended for the nourishment of her offspring, were served up on the same dish. It might also be said that the Gentiles in celebrating the feasts of their idols prepared the flesh of kids in this manner, for the purpose of sacrifice or banquet: hence (Ex. 23) after the solemnities to be celebrated under the Law had been foretold, it is added: "Thou shalt not boil a kid in the milk of its dam." The figurative reason for this prohibition is this: the kid, signifying Christ, on account of "the likeness of sinful flesh" (Rom. 8:3), was not to be seethed, i.e. slain, by the Jews, "in the milk of its dam," i.e. during His infancy. Or else it signifies that the kid, i.e. the sinner, should not be boiled in the milk of its dam, i.e. should not be cajoled by flattery.

Reply to Objection 5. The Gentiles offered their gods the first-fruits, which they held to bring them good luck: or they burnt them for the purpose of secrecy. Consequently (the Israelites) were commanded to look upon the fruits of the first three years as unclean: for in that country nearly all the trees bear fruit in three years' time; those trees, to wit, that are cultivated either from seed, or from a graft, or from a cutting: but it seldom happens that the fruit-stones or seeds encased in a pod are sown: since it would take a longer time for these to bear fruit: and the Law considered what happened most frequently. The fruits, however, of the fourth year, as being the firstlings of clean fruits, were offered to God: and from the fifth year onward they were eaten.

* Douay: 'porphyryon.' St. Thomas' description tallies with the coot or moorhen: though of course he is mistaken about the feet differing from one another. † Vulg.: 'herodionem' ‡ Here, again, the Douay translators transcribed from the Vulgate: 'charadrius'; 'charadrius' is the generic name for all plovers.

The figurative reason was that this foreshadowed the fact that after the three states of the Law (the first lasting from Abraham to David, the second, until they were carried away to Babylon, the third until the time of Christ), the Fruit of the Law, i.e. Christ, was to be offered to God. Or again, that we must mistrust our first efforts, on account of their imperfection.

Reply to Objection 6. It is said of a man in Ecclus. 19:27, that “the attire of the body...” shows “what he is.” Hence the Lord wished His people to be distinguished from other nations, not only by the sign of the circumcision, which was in the flesh, but also by a certain difference of attire. Wherefore they were forbidden to wear garments woven of woolen and linen together, and for a woman to be clothed with man’s apparel, or vice versa, for two reasons. First, to avoid idolatrous worship. Because the Gentiles, in their religious rites, used garments of this sort, made of various materials. Moreover in the worship of Mars, women put on men’s armor; while, conversely, in the worship of Venus men donned women’s attire. The second reason was to preserve them from lust: because the employment of various materials in the making of garments signified inordinate union of sexes, while the use of male attire by a woman, or vice versa, has an incentive to evil desires, and offers an occasion of lust. The figurative reason is that the prohibition of wearing a garment woven of woolen and linen signified that it was forbidden to unite the simplicity of innocence, denoted by wool, with the duplicity of malice, betokened by linen. It also signifies that woman is forbidden to presume to teach, or perform other duties of men: or that man should not adopt the effeminate manners of a woman.

Reply to Objection 7. As Jerome says on Mat. 23:6, “the Lord commanded them to make violet-colored fringes in the four corners of their garments, so that the Israelites might be distinguished from other nations.” Hence, in this way, they professed to be Jews: and consequently the very sight of this sign reminded them of their law.

When we read: “Thou shalt bind them on thy hand, and they shall be ever before thy eyes [Vulg.: ‘they shall be and shall move between thy eyes’], the Pharisees gave a false interpretation to these words, and wrote the decalogue of Moses on a parchment, and tied it on their foreheads like a wreath, so that it moved in front of their eyes”: whereas the intention of the Lord in giving this commandment was that they should be bound in their hands, i.e. in their works; and that they should be before their eyes, i.e. in their thoughts. The violet-colored fillets which were inserted in their cloaks signify the godly intention which should accompany our every deed. It may, however, be said that, because they were a carnal-minded and stiff-necked people, it was necessary for them to be stirred by these sensible things to the observance of the Law.

Reply to Objection 8. Affection in man is twofold: it may be an affection of reason, or it may be an affec-

tion of passion. If a man’s affection be one of reason, it matters not how man behaves to animals, because God has subjected all things to man’s power, according to Ps. 8:8: “Thou hast subjected all things under his feet”: and it is in this sense that the Apostle says that “God has no care for oxen”; because God does not ask of man what he does with oxen or other animals.

But if man’s affection be one of passion, then it is moved also in regard to other animals: for since the passion of pity is caused by the afflictions of others; and since it happens that even irrational animals are sensible to pain, it is possible for the affection of pity to arise in a man with regard to the sufferings of animals. Now it is evident that if a man practice a pitiful affection for animals, he is all the more disposed to take pity on his fellow-men: wherefore it is written (Prov. 11:10): “The just regardeth the lives of his beasts: but the bowels of the wicked are cruel.” Consequently the Lord, in order to inculcate pity to the Jewish people, who were prone to cruelty, wished them to practice pity even with regard to dumb animals, and forbade them to do certain things savoring of cruelty to animals. Hence He prohibited them to “boil a kid in the milk of its dam”; and to “muzzle the ox that treadeth out the corn”; and to slay “the dam with her young.” It may, nevertheless, be also said that these prohibitions were made in hatred of idolatry. For the Egyptians held it to be wicked to allow the ox to eat of the grain while threshing the corn. Moreover certain sorcerers were wont to ensnare the mother bird with her young during incubation, and to employ them for the purpose of securing fruitfulness and good luck in bringing up children: also because it was held to be a good omen to find the mother sitting on her young.

As to the mingling of animals of divers species, the literal reason may have been threefold. The first was to show detestation for the idolatry of the Egyptians, who employed various mixtures in worshipping the planets, which produce various effects, and on various kinds of things according to their various conjunctions. The second reason was in condemnation of unnatural sins. The third reason was the entire removal of all occasions of concupiscence. Because animals of different species do not easily breed, unless this be brought about by man; and movements of lust are aroused by seeing such things. Wherefore in the Jewish traditions we find it prescribed as stated by Rabbi Moses that men shall turn away their eyes from such sights.

The figurative reason for these things is that the necessities of life should not be withdrawn from the ox that treadeth the corn, i.e. from the preacher bearing the sheaves of doctrine, as the Apostle states (1 Cor. 9:4, seqq.). Again, we should not take the dam with her young: because in certain things we have to keep the spiritual senses, i.e. the offspring, and set aside the observance of the letter, i.e. the mother, for instance, in all the ceremonies of the Law. It is also forbidden that beast of burden, i.e. any of the common people, should be allowed to engender, i.e. to have any connec-

tion, with animals of another kind, i.e. with Gentiles or Jews.

Reply to Objection 9. All these minglings were forbidden in agriculture; literally, in detestation of idolatry. For the Egyptians in worshipping the stars employed various combinations of seeds, animals and garments, in order to represent the various connections of the stars. Or else all these minglings were forbidden in detestation of the unnatural vice.

They have, however, a figurative reason. For the prohibition: "Thou shalt not sow thy field with different seeds," is to be understood, in the spiritual sense, of the prohibition to sow strange doctrine in the Church, which is a spiritual vineyard. Likewise "the field," i.e. the Church, must not be sown "with different seeds," i.e. with Catholic and heretical doctrines. Neither is it allowed to plough "with an ox and an ass together"; thus a fool should not accompany a wise man in preaching, for one would hinder the other.

Reply to Objection 10.* Silver and gold were reasonably forbidden (Dt. 7) not as though they were not subject to the power of man, but because, like the idols themselves, all materials out of which idols were made, were anathematized as hateful in God's sight. This is clear from the same chapter, where we read further on (Dt. 7:26): "Neither shalt thou bring anything of the idol into thy house, lest thou become an anathema like it." Another reason was lest, by taking silver and gold, they should be led by avarice into idolatry to which the Jews were inclined. The other precept (Dt. 23) about covering up excretions, was just and becoming, both for the sake of bodily cleanliness; and in order to keep the air wholesome; and by reason of the respect due to the tabernacle of the covenant which stood in the midst of the camp, wherein the Lord was said to dwell; as is clearly set forth in the same passage, where after expressing the command, the reason thereof is at once added, to wit: "For the Lord thy God walketh in the midst of thy camp, to deliver thee, and to give up thy enemies to thee, and let thy camp be holy [i.e. clean], and let no uncleanness appear therein." The figurative reason for this precept, according to Gregory (Moral. xxxi), is that sins which are the fetid excre-

tions of the mind should be covered over by repentance, that we may become acceptable to God, according to Ps. 31:1: "Blessed are they whose iniquities are forgiven, and whose sins are covered." Or else according to a gloss, that we should recognize the unhappy condition of human nature, and humbly cover and purify the stains of a puffed-up and proud spirit in the deep furrow of self-examination.

Reply to Objection 11. Sorcerers and idolatrous priests made use, in their rites, of the bones and flesh of dead men. Wherefore, in order to extirpate the customs of idolatrous worship, the Lord commanded that the priests of inferior degree, who at fixed times served in the temple, should not "incur an uncleanness at the death" of anyone except of those who were closely related to them, viz. their father or mother, and others thus near of kin to them. But the high-priest had always to be ready for the service of the sanctuary; wherefore he was absolutely forbidden to approach the dead, however nearly related to him. They were also forbidden to marry a "harlot" or "one that has been put away," or any other than a virgin: both on account of the reverence due to the priesthood, the honor of which would seem to be tarnished by such a marriage: and for the sake of the children who would be disgraced by the mother's shame: which was most of all to be avoided when the priestly dignity was passed on from father to son. Again, they were commanded to shave neither head nor beard, and not to make incisions in their flesh, in order to exclude the rites of idolatry. For the priests of the Gentiles shaved both head and beard, wherefore it is written (Bar 6:30): "Priests sit in their temples having their garments rent, and their heads and beards shaven." Moreover, in worshipping their idols "they cut themselves with knives and lancets" (3 Kings 18:28). For this reason the priests of the Old Law were commanded to do the contrary.

The spiritual reason for these things is that priests should be entirely free from dead works, i.e. sins. And they should not shave their heads, i.e. set wisdom aside; nor should they shave their beards, i.e. set aside the perfection of wisdom; nor rend their garments or cut their flesh, i.e. they should not incur the sin of schism.

* The Reply to the Tenth Objection is lacking in the codices. The solution given here is found in some editions, and was supplied by Nicolai.

FIRST PART OF THE SECOND PART, QUESTION 103

Of the Duration of the Ceremonial Precepts

(In Four Articles)

We must now consider the duration of the ceremonial precepts: under which head there are four points of inquiry:

- (1) Whether the ceremonial precepts were in existence before the Law?
- (2) Whether at the time of the Law the ceremonies of the Old Law had any power of justification?
- (3) Whether they ceased at the coming of Christ?
- (4) Whether it is a mortal sin to observe them after the coming of Christ?

Whether the ceremonies of the Law were in existence before the Law?

Ia IIae q. 103 a. 1

Objection 1. It would seem that the ceremonies of the Law were in existence before the Law. For sacrifices and holocausts were ceremonies of the Old Law, as stated above (q. 101, a. 4). But sacrifices and holocausts preceded the Law: for it is written (Gn. 4:3,4) that “Cain offered, of the fruits of the earth, gifts to the Lord,” and that “Abel offered of the firstlings of his flock, and of their fat.” Noe also “offered holocausts” to the Lord (Gn. 18:20), and Abraham did in like manner (Gn. 22:13). Therefore the ceremonies of the Old Law preceded the Law.

Objection 2. Further, the erecting and consecrating of the altar were part of the ceremonies relating to holy things. But these preceded the Law. For we read (Gn. 13:18) that “Abraham . . . built . . . an altar to the Lord”; and (Gn. 28:18) that “Jacob . . . took the stone . . . and set it up for a title, pouring oil upon the top of it.” Therefore the legal ceremonies preceded the Law.

Objection 3. Further, the first of the legal sacraments seems to have been circumcision. But circumcision preceded the Law, as appears from Gn. 17. In like manner the priesthood preceded the Law; for it is written (Gn. 14:18) that “Melchisedech . . . was the priest of the most high God.” Therefore the sacramental ceremonies preceded the Law.

Objection 4. Further, the distinction of clean from unclean animals belongs to the ceremonies of observances, as stated above (q. 100, 2, a. 6, ad 1). But this distinction preceded the Law; for it is written (Gn. 7:2,3): “Of all clean beasts take seven and seven . . . but of the beasts that are unclean, two and two.” Therefore the legal ceremonies preceded the Law.

On the contrary, It is written (Dt. 6:1): “These are the precepts and ceremonies . . . which the Lord your God commanded that I should teach you.” But they would not have needed to be taught about these things, if the aforesaid ceremonies had been already in existence. Therefore the legal ceremonies did not precede the Law.

I answer that, As is clear from what has been said (q. 101, a. 2; q. 102, a. 2), the legal ceremonies were ordained for a double purpose; the worship of God, and the foreshadowing of Christ. Now whoever worships

God must needs worship Him by means of certain fixed things pertaining to external worship. But the fixing of the divine worship belongs to the ceremonies; just as the determining of our relations with our neighbor is a matter determined by the judicial precepts, as stated above (q. 99, a. 4). Consequently, as among men in general there were certain judicial precepts, not indeed established by Divine authority, but ordained by human reason; so also there were some ceremonies fixed, not by the authority of any law, but according to the will and devotion of those that worship God. Since, however, even before the Law some of the leading men were gifted with the spirit of prophecy, it is to be believed that a heavenly instinct, like a private law, prompted them to worship God in a certain definite way, which would be both in keeping with the interior worship, and a suitable token of Christ’s mysteries, which were foreshadowed also by other things that they did, according to 1 Cor. 10:11: “All . . . things happened to them in figure.” Therefore there were some ceremonies before the Law, but they were not legal ceremonies, because they were not as yet established by legislation.

Reply to Objection 1. The patriarchs offered up these oblations, sacrifices and holocausts previously to the Law, out of a certain devotion of their own will, according as it seemed proper to them to offer up in honor of God those things which they had received from Him, and thus to testify that they worshipped God Who is the beginning and end of all.

Reply to Objection 2. They also established certain sacred things, because they thought that the honor due to God demanded that certain places should be set apart from others for the purpose of divine worship.

Reply to Objection 3. The sacrament of circumcision was established by command of God before the Law. Hence it cannot be called a sacrament of the Law as though it were an institution of the Law, but only as an observance included in the Law. Hence Our Lord said (Jn. 7:20) that circumcision was “not of Moses, but of his fathers.” Again, among those who worshipped God, the priesthood was in existence before the Law by human appointment, for the Law allotted the priestly dignity to the firstborn.

Reply to Objection 4. The distinction of clean from unclean animals was in vogue before the Law, not with regard to eating them, since it is written (Gn. 9:3): “Everything that moveth and liveth shall be meat for you”: but only as to the offering of sacrifices because they used only certain animals for that purpose. If, however,

they did make any distinction in regard to eating; it was not that it was considered illegal to eat such animals, since this was not forbidden by any law, but from dislike or custom: thus even now we see that certain foods are looked upon with disgust in some countries, while people partake of them in others.

Whether, at the time of the Law, the ceremonies of the Old Law had any power of justification? Ia IIae q. 103 a. 2

Objection 1. It would seem that the ceremonies of the Old Law had the power of justification at the time of the Law. Because expiation from sin and consecration pertains to justification. But it is written (Ex. 39:21) that the priests and their apparel were consecrated by the sprinkling of blood and the anointing of oil; and (Lev. 16:16) that, by sprinkling the blood of the calf, the priest expiated “the sanctuary from the uncleanness of the children of Israel, and from their transgressions and... their sins.” Therefore the ceremonies of the Old Law had the power of justification.

Objection 2. Further, that by which man pleases God pertains to justification, according to Ps. 10:8: “The Lord is just and hath loved justice.” But some pleased God by means of ceremonies, according to Lev. 10:19: “How could I... please the Lord in the ceremonies, having a sorrowful heart?” Therefore the ceremonies of the Old Law had the power of justification.

Objection 3. Further, things relating to the divine worship regard the soul rather than the body, according to Ps. 18:8: “The Law of the Lord is unspotted, converting souls.” But the leper was cleansed by means of the ceremonies of the Old Law, as stated in Lev. 14. Much more therefore could the ceremonies of the Old Law cleanse the soul by justifying it.

On the contrary, The Apostle says (Gal. 2)*: “If there had been a law given which could justify [Vulg.: ‘give life’], Christ died in vain,” i.e. without cause. But this is inadmissible. Therefore the ceremonies of the Old Law did not confer justice.

I answer that, As stated above (q. 102, a. 5, ad 4), a twofold uncleanness was distinguished in the Old Law. One was spiritual and is the uncleanness of sin. The other was corporal, which rendered a man unfit for divine worship; thus a leper, or anyone that touched carrion, was said to be unclean: and thus uncleanness was nothing but a kind of irregularity. From this uncleanness, then, the ceremonies of the Old Law had the power to cleanse: because they were ordered by the Law to be employed as remedies for the removal of the aforesaid uncleannesses which were contracted in consequence of the prescription of the Law. Hence the Apostle says (Heb. 9:13) that “the blood of goats and of oxen, and the ashes of a heifer, being sprinkled, sanctify such as are defiled, to the cleansing of the flesh.” And just as

this uncleanness which was washed away by such like ceremonies, affected the flesh rather than the soul, so also the ceremonies themselves are called by the Apostle shortly before (Heb. 9:10) justices of the flesh: “justices of the flesh,” says he, “being laid on them until the time of correction.”

On the other hand, they had no power of cleansing from uncleanness of the soul, i.e. from the uncleanness of sin. The reason of this was that at no time could there be expiation from sin, except through Christ, “Who taketh away the sins [Vulg.: ‘sin’] of the world” (Jn. 1:29). And since the mystery of Christ’s Incarnation and Passion had not yet really taken place, those ceremonies of the Old Law could not really contain in themselves a power flowing from Christ already incarnate and crucified, such as the sacraments of the New Law contain. Consequently they could not cleanse from sin: thus the Apostle says (Heb. 10:4) that “it is impossible that with the blood of oxen and goats sin should be taken away”; and for this reason he calls them (Gal. 4:9) “weak and needy elements”: weak indeed, because they cannot take away sin; but this weakness results from their being needy, i.e. from the fact that they do not contain grace within themselves.

However, it was possible at the time of the Law, for the minds of the faithful, to be united by faith to Christ incarnate and crucified; so that they were justified by faith in Christ: of which faith the observance of these ceremonies was a sort of profession, inasmuch as they foreshadowed Christ. Hence in the Old Law certain sacrifices were offered up for sins, not as though the sacrifices themselves washed sins away, but because they were professions of faith which cleansed from sin. In fact, the Law itself implies this in the terms employed: for it is written (Lev. 4:26; 5:16) that in offering the sacrifice for sin “the priest shall pray for him... and it shall be forgiven him,” as though the sin were forgiven, not in virtue of the sacrifices, but through the faith and devotion of those who offered them. It must be observed, however, that the very fact that the ceremonies of the Old Law washed away uncleanness of the body, was a figure of that expiation from sins which was effected by Christ.

It is therefore evident that under the state of the Old Law the ceremonies had no power of justification.

* The first words of the quotation are from 3:21: St. Thomas probably quoting from memory, substituted them for 2:21, which runs thus: ‘If justice be by the Law, then Christ died in vain.’

Reply to Objection 1. That sanctification of priests and their sons, and of their apparel or of anything else belonging to them, by sprinkling them with blood, had no other effect but to appoint them to the divine worship, and to remove impediments from them, “to the cleansing of the flesh,” as the Apostle states (Heb. 9:13) in token of that sanctification whereby “Jesus” sanctified “the people by His own blood” (Heb. 13:12). Moreover, the expiation must be understood as referring to the removal of these bodily uncleannesses, not to the forgiveness of sin. Hence even the sanctuary which could not be the subject of sin is stated to be expiated.

Reply to Objection 2. The priests pleased God in the ceremonies by their obedience and devotion, and by their faith in the reality foreshadowed; not by reason of the things considered in themselves.

Reply to Objection 3. Those ceremonies which were prescribed in the cleansing of a leper, were not

ordained for the purpose of taking away the defilement of leprosy. This is clear from the fact that these ceremonies were not applied to a man until he was already healed: hence it is written (Lev. 14:3,4) that the priest, “going out of the camp, when he shall find that the leprosy is cleansed, shall command him that is to be purified to offer,” etc.; whence it is evident that the priest was appointed the judge of leprosy, not before, but after cleansing. But these ceremonies were employed for the purpose of taking away the uncleanness of irregularity. They do say, however, that if a priest were to err in his judgment, the leper would be cleansed miraculously by the power of God, but not in virtue of the sacrifice. Thus also it was by miracle that the thigh of the adulterous woman rotted, when she had drunk the water “on which” the priest had “heaped curses,” as stated in Num. 5:19-27.

Whether the ceremonies of the Old Law ceased at the coming of Christ?

Ia IIae q. 103 a. 3

Objection 1. It would seem that the ceremonies of the Old Law did not cease at the coming of Christ. For it is written (Bar 4:1): “This is the book of the commandments of God, and the law that is for ever.” But the legal ceremonies were part of the Law. Therefore the legal ceremonies were to last for ever.

Objection 2. Further, the offering made by a leper after being cleansed was a ceremony of the Law. But the Gospel commands the leper, who has been cleansed, to make this offering (Mat. 8:4). Therefore the ceremonies of the Old Law did not cease at Christ’s coming.

Objection 3. Further, as long as the cause remains, the effect remains. But the ceremonies of the Old Law had certain reasonable causes, inasmuch as they were ordained to the worship of God, besides the fact that they were intended to be figures of Christ. Therefore the ceremonies of the Old Law should not have ceased.

Objection 4. Further, circumcision was instituted as a sign of Abraham’s faith: the observance of the sabbath, to recall the blessing of creation: and other solemnities, in memory of other Divine favors, as state above (q. 102, a. 4, ad 10; a. 5, ad 1). But Abraham’s faith is ever to be imitated even by us: and the blessing of creation and other Divine favors should never be forgotten. Therefore at least circumcision and the other legal solemnities should not have ceased.

On the contrary, The Apostle says (Col. 2:16,17): “Let no man... judge you in meat or in drink, or in respect of a festival day, or of the new moon, or of the sabbaths, which are a shadow of things to come”: and (Heb. 8:13): “In saying a new (testament), he hath made the former old: and that which decayeth and groweth old, is near its end.”

I answer that, All the ceremonial precepts of the Old Law were ordained to the worship of God as stated above (q. 101, Aa. 1,2). Now external worship should

be in proportion to the internal worship, which consists in faith, hope and charity. Consequently exterior worship had to be subject to variations according to the variations in the internal worship, in which a threefold state may be distinguished. One state was in respect of faith and hope, both in heavenly goods, and in the means of obtaining them—in both of these considered as things to come. Such was the state of faith and hope in the Old Law. Another state of interior worship is that in which we have faith and hope in heavenly goods as things to come; but in the means of obtaining heavenly goods, as in things present or past. Such is the state of the New Law. The third state is that in which both are possessed as present; wherein nothing is believed in as lacking, nothing hoped for as being yet to come. Such is the state of the Blessed.

In this state of the Blessed, then, nothing in regard to worship of God will be figurative; there will be naught but “thanksgiving and voice of praise” (Is. 51:3). Hence it is written concerning the city of the Blessed (Apoc. 21:22): “I saw no temple therein: for the Lord God Almighty is the temple thereof, and the Lamb.” Proportionately, therefore, the ceremonies of the first-mentioned state which foreshadowed the second and third states, had need to cease at the advent of the second state; and other ceremonies had to be introduced which would be in keeping with the state of divine worship for that particular time, wherein heavenly goods are a thing of the future, but the Divine favors whereby we obtain the heavenly boons are a thing of the present.

Reply to Objection 1. The Old Law is said to be “for ever” simply and absolutely, as regards its moral precepts; but as regards the ceremonial precepts it lasts for even in respect of the reality which those ceremonies foreshadowed.

Reply to Objection 2. The mystery of the redemption of the human race was fulfilled in Christ's Passion: hence Our Lord said then: "It is consummated" (Jn. 19:30). Consequently the prescriptions of the Law must have ceased then altogether through their reality being fulfilled. As a sign of this, we read that at the Passion of Christ "the veil of the temple was rent" (Mat. 27:51). Hence, before Christ's Passion, while Christ was preaching and working miracles, the Law and the Gospel were concurrent, since the mystery of Christ had already begun, but was not as yet consummated. And for this reason Our Lord, before His Passion, commanded the leper to observe the legal ceremonies.

Reply to Objection 3. The literal reasons already given (q. 102) for the ceremonies refer to the divine worship, which was founded on faith in that which was to come. Hence, at the advent of Him Who was to come, both that worship ceased, and all the reasons referring thereto.

Reply to Objection 4. The faith of Abraham was commended in that he believed in God's promise concerning his seed to come, in which all nations were to be blessed. Wherefore, as long as this seed was yet to come, it was necessary to make profession of Abraham's faith by means of circumcision. But now that

it is consummated, the same thing needs to be declared by means of another sign, viz. Baptism, which, in this respect, took the place of circumcision, according to the saying of the Apostle (Col. 2:11, 12): "You are circumcised with circumcision not made by hand, in despoiling of the body of the flesh, but in the circumcision of Christ, buried with Him in Baptism."

As to the sabbath, which was a sign recalling the first creation, its place is taken by the "Lord's Day," which recalls the beginning of the new creature in the Resurrection of Christ. In like manner other solemnities of the Old Law are supplanted by new solemnities: because the blessings vouchsafed to that people, foreshadowed the favors granted us by Christ. Hence the feast of the Passover gave place to the feast of Christ's Passion and Resurrection: the feast of Pentecost when the Old Law was given, to the feast of Pentecost on which was given the Law of the living spirit: the feast of the New Moon, to Lady Day, when appeared the first rays of the sun, i.e. Christ, by the fulness of grace: the feast of Trumpets, to the feasts of the Apostles: the feast of Expiation, to the feasts of Martyrs and Confessors: the feast of Tabernacles, to the feast of the Church Dedication: the feast of the Assembly and Collection, to feast of the Angels, or else to the feast of All Hallows.

Whether since Christ's Passion the legal ceremonies can be observed without committing mortal sin?

Ia IIae q. 103 a. 4

Objection 1. It would seem that since Christ's Passion the legal ceremonies can be observed without committing mortal sin. For we must not believe that the apostles committed mortal sin after receiving the Holy Ghost: since by His fulness they were "endued with power from on high" (Lk. 24:49). But the apostles observed the legal ceremonies after the coming of the Holy Ghost: for it is stated (Acts 16:3) that Paul circumcised Timothy: and (Acts 21:26) that Paul, at the advice of James, "took the men, and... being purified with them, entered into the temple, giving notice of the accomplishment of the days of purification, until an oblation should be offered for every one of them." Therefore the legal ceremonies can be observed since the Passion of Christ without mortal sin.

Objection 2. Further, one of the legal ceremonies consisted in shunning the fellowship of Gentiles. But the first Pastor of the Church complied with this observance; for it is stated (Gal. 2:12) that, "when" certain men "had come" to Antioch, Peter "withdrew and separated himself" from the Gentiles. Therefore the legal ceremonies can be observed since Christ's Passion without committing mortal sin.

Objection 3. Further, the commands of the apostles did not lead men into sin. But it was commanded by apostolic decree that the Gentiles should observe certain ceremonies of the Law: for it is written (Acts 15:28,29): "It hath seemed good to the Holy Ghost and to us, to lay

no further burden upon you than these necessary things: that you abstain from things sacrificed to idols, and from blood, and from things strangled, and from fornication." Therefore the legal ceremonies can be observed since Christ's Passion without committing mortal sin.

On the contrary, The Apostle says (Gal. 5:2): "If you be circumcised, Christ shall profit you nothing." But nothing save mortal sin hinders us from receiving Christ's fruit. Therefore since Christ's Passion it is a mortal sin to be circumcised, or to observe the other legal ceremonies.

I answer that, All ceremonies are professions of faith, in which the interior worship of God consists. Now man can make profession of his inward faith, by deeds as well as by words: and in either profession, if he make a false declaration, he sins mortally. Now, though our faith in Christ is the same as that of the fathers of old; yet, since they came before Christ, whereas we come after Him, the same faith is expressed in different words, by us and by them. For by them was it said: "Behold a virgin shall conceive and bear a son," where the verbs are in the future tense: whereas we express the same by means of verbs in the past tense, and say that she "conceived and bore." In like manner the ceremonies of the Old Law betokened Christ as having yet to be born and to suffer: whereas our sacraments signify Him as already born and having suffered. Consequently, just as it would be a mortal sin now for any-

one, in making a profession of faith, to say that Christ is yet to be born, which the fathers of old said devoutly and truthfully; so too it would be a mortal sin now to observe those ceremonies which the fathers of old fulfilled with devotion and fidelity. Such is the teaching Augustine (*Contra Faust.* xix, 16), who says: "It is no longer promised that He shall be born, shall suffer and rise again, truths of which their sacraments were a kind of image: but it is declared that He is already born, has suffered and risen again; of which our sacraments, in which Christians share, are the actual representation."

Reply to Objection 1. On this point there seems to have been a difference of opinion between Jerome and Augustine. For Jerome (*Super Galat.* ii, 11, seqq.) distinguished two periods of time. One was the time previous to Christ's Passion, during which the legal ceremonies were neither dead, since they were obligatory, and did expiate in their own fashion; nor deadly, because it was not sinful to observe them. But immediately after Christ's Passion they began to be not only dead, so as no longer to be either effectual or binding; but also deadly, so that whoever observed them was guilty of mortal sin. Hence he maintained that after the Passion the apostles never observed the legal ceremonies in real earnest; but only by a kind of pious pretense, lest, to wit, they should scandalize the Jews and hinder their conversion. This pretense, however, is to be understood, not as though they did not in reality perform those actions, but in the sense that they performed them without the mind to observe the ceremonies of the Law: thus a man might cut away his foreskin for health's sake, not with the intention of observing legal circumcision.

But since it seems unbecoming that the apostles, in order to avoid scandal, should have hidden things pertaining to the truth of life and doctrine, and that they should have made use of pretense, in things pertaining to the salvation of the faithful; therefore Augustine (*Epist.* lxxxii) more fittingly distinguished three periods of time. One was the time that preceded the Passion of Christ, during which the legal ceremonies were neither deadly nor dead: another period was after the publication of the Gospel, during which the legal ceremonies are both dead and deadly. The third is a middle period, viz. from the Passion of Christ until the publication of the Gospel, during which the legal ceremonies were dead indeed, because they had neither effect nor binding force; but were not deadly, because it was lawful for the Jewish converts to Christianity to observe them, provided they did not put their trust in them so as to hold them to be necessary unto salvation, as though faith in Christ could not justify without the legal observances. On the other hand, there was no reason why those who were converted from heathendom to Christianity should observe them. Hence Paul circumcised Timothy, who was born of a Jewish mother; but was unwilling to circumcise Titus, who was of heathen nationality.

The reason why the Holy Ghost did not wish the converted Jews to be debarred at once from observing

the legal ceremonies, while converted heathens were forbidden to observe the rites of heathendom, was in order to show that there is a difference between these rites. For heathenish ceremonial was rejected as absolutely unlawful, and as prohibited by God for all time; whereas the legal ceremonial ceased as being fulfilled through Christ's Passion, being instituted by God as a figure of Christ.

Reply to Objection 2. According to Jerome, Peter withdrew himself from the Gentiles by pretense, in order to avoid giving scandal to the Jews, of whom he was the Apostle. Hence he did not sin at all in acting thus. On the other hand, Paul in like manner made a pretense of blaming him, in order to avoid scandalizing the Gentiles, whose Apostle he was. But Augustine disapproves of this solution: because in the canonical Scripture (*viz.* *Gal.* 2:11), wherein we must not hold anything to be false, Paul says that Peter "was to be blamed." Consequently it is true that Peter was at fault: and Paul blamed him in very truth and not with pretense. Peter, however, did not sin, by observing the legal ceremonial for the time being; because this was lawful for him who was a converted Jew. But he did sin by excessive minuteness in the observance of the legal rites lest he should scandalize the Jews, the result being that he gave scandal to the Gentiles.

Reply to Objection 3. Some have held that this prohibition of the apostles is not to be taken literally, but spiritually: namely, that the prohibition of blood signifies the prohibition of murder; the prohibition of things strangled, that of violence and rapine; the prohibition of things offered to idols, that of idolatry; while fornication is forbidden as being evil in itself: which opinion they gathered from certain glosses, which expound these prohibitions in a mystical sense. Since, however, murder and rapine were held to be unlawful even by the Gentiles, there would have been no need to give this special commandment to those who were converted to Christ from heathendom. Hence others maintain that those foods were forbidden literally, not to prevent the observance of legal ceremonies, but in order to prevent gluttony. Thus Jerome says on *Ezech.* 44:31 ("The priest shall not eat of anything that is dead"): "He condemns those priests who from gluttony did not keep these precepts."

But since certain foods are more delicate than these and more conducive to gluttony, there seems no reason why these should have been forbidden more than the others.

We must therefore follow the third opinion, and hold that these foods were forbidden literally, not with the purpose of enforcing compliance with the legal ceremonies, but in order to further the union of Gentiles and Jews living side by side. Because blood and things strangled were loathsome to the Jews by ancient custom; while the Jews might have suspected the Gentiles of relapse into idolatry if the latter had partaken of things offered to idols. Hence these things were prohib-

ited for the time being, during which the Gentiles and Jews were to become united together. But as time went on, with the lapse of the cause, the effect lapsed also, when the truth of the Gospel teaching was divulged, wherein Our Lord taught that “not that which entereth into the mouth defileth a man” (Mat. 15:11); and that “nothing is to be rejected that is received with thanksgiving” (1 Tim. 4:4). With regard to fornication a special prohibition was made, because the Gentiles did not hold it to be sinful.

Objection 1. It would seem that the ceremonies of the Law were in existence before the Law. For sacrifices and holocausts were ceremonies of the Old Law, as stated above (q. 101, a. 4). But sacrifices and holocausts preceded the Law: for it is written (Gn. 4:3,4) that “Cain offered, of the fruits of the earth, gifts to the Lord,” and that “Abel offered of the firstlings of his flock, and of their fat.” Noe also “offered holocausts” to the Lord (Gn. 18:20), and Abraham did in like manner (Gn. 22:13). Therefore the ceremonies of the Old Law preceded the Law.

Objection 2. Further, the erecting and consecrating of the altar were part of the ceremonies relating to holy things. But these preceded the Law. For we read (Gn. 13:18) that “Abraham... built... an altar to the Lord”; and (Gn. 28:18) that “Jacob... took the stone... and set it up for a title, pouring oil upon the top of it.” Therefore the legal ceremonies preceded the Law.

Objection 3. Further, the first of the legal sacraments seems to have been circumcision. But circumcision preceded the Law, as appears from Gn. 17. In like manner the priesthood preceded the Law; for it is written (Gn. 14:18) that “Melchisedech... was the priest of the most high God.” Therefore the sacramental ceremonies preceded the Law.

Objection 4. Further, the distinction of clean from unclean animals belongs to the ceremonies of observances, as stated above (q. 100, 2, a. 6, ad 1). But this distinction preceded the Law; for it is written (Gn. 7:2,3): “Of all clean beasts take seven and seven... but of the beasts that are unclean, two and two.” Therefore the legal ceremonies preceded the Law.

On the contrary, It is written (Dt. 6:1): “These are the precepts and ceremonies... which the Lord your God commanded that I should teach you.” But they would not have needed to be taught about these things, if the aforesaid ceremonies had been already in existence. Therefore the legal ceremonies did not precede the Law.

I answer that, As is clear from what has been said (q. 101, a. 2; q. 102, a. 2), the legal ceremonies were ordained for a double purpose; the worship of God, and the foreshadowing of Christ. Now whoever worships God must needs worship Him by means of certain fixed things pertaining to external worship. But the fixing of the divine worship belongs to the ceremonies; just as the determining of our relations with our neighbor is a matter determined by the judicial precepts, as stated above (q. 99, a. 4). Consequently, as among men in

general there were certain judicial precepts, not indeed established by Divine authority, but ordained by human reason; so also there were some ceremonies fixed, not by the authority of any law, but according to the will and devotion of those that worship God. Since, however, even before the Law some of the leading men were gifted with the spirit of prophecy, it is to be believed that a heavenly instinct, like a private law, prompted them to worship God in a certain definite way, which would be both in keeping with the interior worship, and a suitable token of Christ’s mysteries, which were foreshadowed also by other things that they did, according to 1 Cor. 10:11: “All... things happened to them in figure.” Therefore there were some ceremonies before the Law, but they were not legal ceremonies, because they were not as yet established by legislation.

Reply to Objection 1. The patriarchs offered up these oblations, sacrifices and holocausts previously to the Law, out of a certain devotion of their own will, according as it seemed proper to them to offer up in honor of God those things which they had received from Him, and thus to testify that they worshipped God Who is the beginning and end of all.

Reply to Objection 2. They also established certain sacred things, because they thought that the honor due to God demanded that certain places should be set apart from others for the purpose of divine worship.

Reply to Objection 3. The sacrament of circumcision was established by command of God before the Law. Hence it cannot be called a sacrament of the Law as though it were an institution of the Law, but only as an observance included in the Law. Hence Our Lord said (Jn. 7:20) that circumcision was “not of Moses, but of his fathers.” Again, among those who worshipped God, the priesthood was in existence before the Law by human appointment, for the Law allotted the priestly dignity to the firstborn.

Reply to Objection 4. The distinction of clean from unclean animals was in vogue before the Law, not with regard to eating them, since it is written (Gn. 9:3): “Everything that moveth and liveth shall be meat for you”: but only as to the offering of sacrifices because they used only certain animals for that purpose. If, however, they did make any distinction in regard to eating; it was not that it was considered illegal to eat such animals, since this was not forbidden by any law, but from dislike or custom: thus even now we see that certain foods are looked upon with disgust in some countries, while people partake of them in others.

Objection 1. It would seem that the ceremonies of the Old Law had the power of justification at the time of the Law. Because expiation from sin and consecration pertains to justification. But it is written (Ex. 39:21) that the priests and their apparel were consecrated by the sprinkling of blood and the anointing of oil; and (Lev. 16:16) that, by sprinkling the blood of the calf, the priest expiated “the sanctuary from the uncleanness of the children of Israel, and from their transgressions and . . . their sins.” Therefore the ceremonies of the Old Law had the power of justification.

Objection 2. Further, that by which man pleases God pertains to justification, according to Ps. 10:8: “The Lord is just and hath loved justice.” But some pleased God by means of ceremonies, according to Lev. 10:19: “How could I . . . please the Lord in the ceremonies, having a sorrowful heart?” Therefore the ceremonies of the Old Law had the power of justification.

Objection 3. Further, things relating to the divine worship regard the soul rather than the body, according to Ps. 18:8: “The Law of the Lord is unspotted, converting souls.” But the leper was cleansed by means of the ceremonies of the Old Law, as stated in Lev. 14. Much more therefore could the ceremonies of the Old Law cleanse the soul by justifying it.

On the contrary, The Apostle says (Gal. 2)*: “If there had been a law given which could justify [Vulg.: ‘give life’], Christ died in vain,” i.e. without cause. But this is inadmissible. Therefore the ceremonies of the Old Law did not confer justice.

I answer that, As stated above (q. 102, a. 5, ad 4), a twofold uncleanness was distinguished in the Old Law. One was spiritual and is the uncleanness of sin. The other was corporal, which rendered a man unfit for divine worship; thus a leper, or anyone that touched carion, was said to be unclean: and thus uncleanness was nothing but a kind of irregularity. From this uncleanness, then, the ceremonies of the Old Law had the power to cleanse: because they were ordered by the Law to be employed as remedies for the removal of the aforesaid uncleannesses which were contracted in consequence of the prescription of the Law. Hence the Apostle says (Heb. 9:13) that “the blood of goats and of oxen, and the ashes of a heifer, being sprinkled, sanctify such as are defiled, to the cleansing of the flesh.” And just as this uncleanness which was washed away by such like ceremonies, affected the flesh rather than the soul, so also the ceremonies themselves are called by the Apostle shortly before (Heb. 9:10) justices of the flesh: “justices of the flesh,” says he, “being laid on them until the time of correction.”

On the other hand, they had no power of cleansing from uncleanness of the soul, i.e. from the un-

cleanness of sin. The reason of this was that at no time could there be expiation from sin, except through Christ, “Who taketh away the sins [Vulg.: ‘sin’] of the world” (Jn. 1:29). And since the mystery of Christ’s Incarnation and Passion had not yet really taken place, those ceremonies of the Old Law could not really contain in themselves a power flowing from Christ already incarnate and crucified, such as the sacraments of the New Law contain. Consequently they could not cleanse from sin: thus the Apostle says (Heb. 10:4) that “it is impossible that with the blood of oxen and goats sin should be taken away”; and for this reason he calls them (Gal. 4:9) “weak and needy elements”: weak indeed, because they cannot take away sin; but this weakness results from their being needy, i.e. from the fact that they do not contain grace within themselves.

However, it was possible at the time of the Law, for the minds of the faithful, to be united by faith to Christ incarnate and crucified; so that they were justified by faith in Christ: of which faith the observance of these ceremonies was a sort of profession, inasmuch as they foreshadowed Christ. Hence in the Old Law certain sacrifices were offered up for sins, not as though the sacrifices themselves washed sins away, but because they were professions of faith which cleansed from sin. In fact, the Law itself implies this in the terms employed: for it is written (Lev. 4:26; 5:16) that in offering the sacrifice for sin “the priest shall pray for him. . . and it shall be forgiven him,” as though the sin were forgiven, not in virtue of the sacrifices, but through the faith and devotion of those who offered them. It must be observed, however, that the very fact that the ceremonies of the Old Law washed away uncleanness of the body, was a figure of that expiation from sins which was effected by Christ.

It is therefore evident that under the state of the Old Law the ceremonies had no power of justification.

Reply to Objection 1. That sanctification of priests and their sons, and of their apparel or of anything else belonging to them, by sprinkling them with blood, had no other effect but to appoint them to the divine worship, and to remove impediments from them, “to the cleansing of the flesh,” as the Apostle states (Heb. 9:13) in token of that sanctification whereby “Jesus” sanctified “the people by His own blood” (Heb. 13:12). Moreover, the expiation must be understood as referring to the removal of these bodily uncleannesses, not to the forgiveness of sin. Hence even the sanctuary which could not be the subject of sin is stated to be expiated.

Reply to Objection 2. The priests pleased God in the ceremonies by their obedience and devotion, and by their faith in the reality foreshadowed; not by reason of the things considered in themselves.

* The first words of the quotation are from 3:21: St. Thomas probably quoting from memory, substituted them for 2:21, which runs thus: ‘If justice be by the Law, then Christ died in vain.’

Reply to Objection 3. Those ceremonies which were prescribed in the cleansing of a leper, were not ordained for the purpose of taking away the defilement of leprosy. This is clear from the fact that these ceremonies were not applied to a man until he was already healed: hence it is written (Lev. 14:3,4) that the priest, "going out of the camp, when he shall find that the leprosy is cleansed, shall command him that is to be purified to offer," etc.; whence it is evident that the priest was appointed the judge of leprosy, not before, but af-

ter cleansing. But these ceremonies were employed for the purpose of taking away the uncleanness of irregularity. They do say, however, that if a priest were to err in his judgment, the leper would be cleansed miraculously by the power of God, but not in virtue of the sacrifice. Thus also it was by miracle that the thigh of the adulterous woman rotted, when she had drunk the water "on which" the priest had "heaped curses," as stated in Num. 5:19-27.

Objection 1. It would seem that the ceremonies of the Old Law did not cease at the coming of Christ. For it is written (Bar 4:1): “This is the book of the commandments of God, and the law that is for ever.” But the legal ceremonies were part of the Law. Therefore the legal ceremonies were to last for ever.

Objection 2. Further, the offering made by a leper after being cleansed was a ceremony of the Law. But the Gospel commands the leper, who has been cleansed, to make this offering (Mat. 8:4). Therefore the ceremonies of the Old Law did not cease at Christ’s coming.

Objection 3. Further, as long as the cause remains, the effect remains. But the ceremonies of the Old Law had certain reasonable causes, inasmuch as they were ordained to the worship of God, besides the fact that they were intended to be figures of Christ. Therefore the ceremonies of the Old Law should not have ceased.

Objection 4. Further, circumcision was instituted as a sign of Abraham’s faith: the observance of the sabbath, to recall the blessing of creation: and other solemnities, in memory of other Divine favors, as state above (q. 102, a. 4, ad 10; a. 5, ad 1). But Abraham’s faith is ever to be imitated even by us: and the blessing of creation and other Divine favors should never be forgotten. Therefore at least circumcision and the other legal solemnities should not have ceased.

On the contrary, The Apostle says (Col. 2:16,17): “Let no man . . . judge you in meat or in drink, or in respect of a festival day, or of the new moon, or of the sabbaths, which are a shadow of things to come”: and (Heb. 8:13): “In saying a new (testament), he hath made the former old: and that which decayeth and groweth old, is near its end.”

I answer that, All the ceremonial precepts of the Old Law were ordained to the worship of God as stated above (q. 101, Aa. 1,2). Now external worship should be in proportion to the internal worship, which consists in faith, hope and charity. Consequently exterior worship had to be subject to variations according to the variations in the internal worship, in which a threefold state may be distinguished. One state was in respect of faith and hope, both in heavenly goods, and in the means of obtaining them—in both of these considered as things to come. Such was the state of faith and hope in the Old Law. Another state of interior worship is that in which we have faith and hope in heavenly goods as things to come; but in the means of obtaining heavenly goods, as in things present or past. Such is the state of the New Law. The third state is that in which both are possessed as present; wherein nothing is believed in as lacking, nothing hoped for as being yet to come. Such is the state of the Blessed.

In this state of the Blessed, then, nothing in regard to worship of God will be figurative; there will be naught but “thanksgiving and voice of praise” (Is. 51:3). Hence it is written concerning the city of the

Blessed (Apoc. 21:22): “I saw no temple therein: for the Lord God Almighty is the temple thereof, and the Lamb.” Proportionately, therefore, the ceremonies of the first-mentioned state which foreshadowed the second and third states, had need to cease at the advent of the second state; and other ceremonies had to be introduced which would be in keeping with the state of divine worship for that particular time, wherein heavenly goods are a thing of the future, but the Divine favors whereby we obtain the heavenly boons are a thing of the present.

Reply to Objection 1. The Old Law is said to be “for ever” simply and absolutely, as regards its moral precepts; but as regards the ceremonial precepts it lasts for ever in respect of the reality which those ceremonies foreshadowed.

Reply to Objection 2. The mystery of the redemption of the human race was fulfilled in Christ’s Passion: hence Our Lord said then: “It is consummated” (Jn. 19:30). Consequently the prescriptions of the Law must have ceased then altogether through their reality being fulfilled. As a sign of this, we read that at the Passion of Christ “the veil of the temple was rent” (Mat. 27:51). Hence, before Christ’s Passion, while Christ was preaching and working miracles, the Law and the Gospel were concurrent, since the mystery of Christ had already begun, but was not as yet consummated. And for this reason Our Lord, before His Passion, commanded the leper to observe the legal ceremonies.

Reply to Objection 3. The literal reasons already given (q. 102) for the ceremonies refer to the divine worship, which was founded on faith in that which was to come. Hence, at the advent of Him Who was to come, both that worship ceased, and all the reasons referring thereto.

Reply to Objection 4. The faith of Abraham was commended in that he believed in God’s promise concerning his seed to come, in which all nations were to be blessed. Wherefore, as long as this seed was yet to come, it was necessary to make profession of Abraham’s faith by means of circumcision. But now that it is consummated, the same thing needs to be declared by means of another sign, viz. Baptism, which, in this respect, took the place of circumcision, according to the saying of the Apostle (Col. 2:11, 12): “You are circumcised with circumcision not made by hand, in despoiling of the body of the flesh, but in the circumcision of Christ, buried with Him in Baptism.”

As to the sabbath, which was a sign recalling the first creation, its place is taken by the “Lord’s Day,” which recalls the beginning of the new creature in the Resurrection of Christ. In like manner other solemnities of the Old Law are supplanted by new solemnities: because the blessings vouchsafed to that people, foreshadowed the favors granted us by Christ. Hence the feast of the Passover gave place to the feast of Christ’s Pas-

sion and Resurrection: the feast of Pentecost when the Old Law was given, to the feast of Pentecost on which was given the Law of the living spirit: the feast of the New Moon, to Lady Day, when appeared the first rays of the sun, i.e. Christ, by the fulness of grace: the feast of Trumpets, to the feasts of the Apostles: the feast of Expiation, to the feasts of Martyrs and Confessors: the feast of Tabernacles, to the feast of the Church Dedication: the feast of the Assembly and Collection, to feast of the Angels, or else to the feast of All Hallows.

Objection 1. It would seem that since Christ's Passion the legal ceremonies can be observed without committing mortal sin. For we must not believe that the apostles committed mortal sin after receiving the Holy Ghost: since by His fulness they were "endued with power from on high" (Lk. 24:49). But the apostles observed the legal ceremonies after the coming of the Holy Ghost: for it is stated (Acts 16:3) that Paul circumcised Timothy: and (Acts 21:26) that Paul, at the advice of James, "took the men, and . . . being purified with them, entered into the temple, giving notice of the accomplishment of the days of purification, until an oblation should be offered for every one of them." Therefore the legal ceremonies can be observed since the Passion of Christ without mortal sin.

Objection 2. Further, one of the legal ceremonies consisted in shunning the fellowship of Gentiles. But the first Pastor of the Church complied with this observance; for it is stated (Gal. 2:12) that, "when" certain men "had come" to Antioch, Peter "withdrew and separated himself" from the Gentiles. Therefore the legal ceremonies can be observed since Christ's Passion without committing mortal sin.

Objection 3. Further, the commands of the apostles did not lead men into sin. But it was commanded by apostolic decree that the Gentiles should observe certain ceremonies of the Law: for it is written (Acts 15:28,29): "It hath seemed good to the Holy Ghost and to us, to lay no further burden upon you than these necessary things: that you abstain from things sacrificed to idols, and from blood, and from things strangled, and from fornication." Therefore the legal ceremonies can be observed since Christ's Passion without committing mortal sin.

On the contrary, The Apostle says (Gal. 5:2): "If you be circumcised, Christ shall profit you nothing." But nothing save mortal sin hinders us from receiving Christ's fruit. Therefore since Christ's Passion it is a mortal sin to be circumcised, or to observe the other legal ceremonies.

I answer that, All ceremonies are professions of faith, in which the interior worship of God consists. Now man can make profession of his inward faith, by deeds as well as by words: and in either profession, if he make a false declaration, he sins mortally. Now, though our faith in Christ is the same as that of the fathers of old; yet, since they came before Christ, whereas we come after Him, the same faith is expressed in different words, by us and by them. For by them was it said: "Behold a virgin shall conceive and bear a son," where the verbs are in the future tense: whereas we express the same by means of verbs in the past tense, and say that she "conceived and bore." In like manner the ceremonies of the Old Law betokened Christ as having yet to be born and to suffer: whereas our sacraments signify Him as already born and having suffered. Con-

sequently, just as it would be a mortal sin now for anyone, in making a profession of faith, to say that Christ is yet to be born, which the fathers of old said devoutly and truthfully; so too it would be a mortal sin now to observe those ceremonies which the fathers of old fulfilled with devotion and fidelity. Such is the teaching Augustine (*Contra Faust.* xix, 16), who says: "It is no longer promised that He shall be born, shall suffer and rise again, truths of which their sacraments were a kind of image: but it is declared that He is already born, has suffered and risen again; of which our sacraments, in which Christians share, are the actual representation."

Reply to Objection 1. On this point there seems to have been a difference of opinion between Jerome and Augustine. For Jerome (*Super Galat.* ii, 11, seqq.) distinguished two periods of time. One was the time previous to Christ's Passion, during which the legal ceremonies were neither dead, since they were obligatory, and did expiate in their own fashion; nor deadly, because it was not sinful to observe them. But immediately after Christ's Passion they began to be not only dead, so as no longer to be either effectual or binding; but also deadly, so that whoever observed them was guilty of mortal sin. Hence he maintained that after the Passion the apostles never observed the legal ceremonies in real earnest; but only by a kind of pious pretense, lest, to wit, they should scandalize the Jews and hinder their conversion. This pretense, however, is to be understood, not as though they did not in reality perform those actions, but in the sense that they performed them without the mind to observe the ceremonies of the Law: thus a man might cut away his foreskin for health's sake, not with the intention of observing legal circumcision.

But since it seems unbecoming that the apostles, in order to avoid scandal, should have hidden things pertaining to the truth of life and doctrine, and that they should have made use of pretense, in things pertaining to the salvation of the faithful; therefore Augustine (*Epist.* lxxxii) more fittingly distinguished three periods of time. One was the time that preceded the Passion of Christ, during which the legal ceremonies were neither deadly nor dead: another period was after the publication of the Gospel, during which the legal ceremonies are both dead and deadly. The third is a middle period, viz. from the Passion of Christ until the publication of the Gospel, during which the legal ceremonies were dead indeed, because they had neither effect nor binding force; but were not deadly, because it was lawful for the Jewish converts to Christianity to observe them, provided they did not put their trust in them so as to hold them to be necessary unto salvation, as though faith in Christ could not justify without the legal observances. On the other hand, there was no reason why those who were converted from heathendom to Christianity should observe them. Hence Paul circumcised Timothy, who

was born of a Jewish mother; but was unwilling to circumcise Titus, who was of heathen nationality.

The reason why the Holy Ghost did not wish the converted Jews to be debarred at once from observing the legal ceremonies, while converted heathens were forbidden to observe the rites of heathendom, was in order to show that there is a difference between these rites. For heathenish ceremonial was rejected as absolutely unlawful, and as prohibited by God for all time; whereas the legal ceremonial ceased as being fulfilled through Christ's Passion, being instituted by God as a figure of Christ.

Reply to Objection 2. According to Jerome, Peter withdrew himself from the Gentiles by pretense, in order to avoid giving scandal to the Jews, of whom he was the Apostle. Hence he did not sin at all in acting thus. On the other hand, Paul in like manner made a pretense of blaming him, in order to avoid scandalizing the Gentiles, whose Apostle he was. But Augustine disapproves of this solution: because in the canonical Scripture (viz. Gal. 2:11), wherein we must not hold anything to be false, Paul says that Peter "was to be blamed." Consequently it is true that Peter was at fault: and Paul blamed him in very truth and not with pretense. Peter, however, did not sin, by observing the legal ceremonial for the time being; because this was lawful for him who was a converted Jew. But he did sin by excessive minuteness in the observance of the legal rites lest he should scandalize the Jews, the result being that he gave scandal to the Gentiles.

Reply to Objection 3. Some have held that this prohibition of the apostles is not to be taken literally, but spiritually: namely, that the prohibition of blood signifies the prohibition of murder; the prohibition of things strangled, that of violence and rapine; the prohibition of things offered to idols, that of idolatry; while

fornication is forbidden as being evil in itself: which opinion they gathered from certain glosses, which expound these prohibitions in a mystical sense. Since, however, murder and rapine were held to be unlawful even by the Gentiles, there would have been no need to give this special commandment to those who were converted to Christ from heathendom. Hence others maintain that those foods were forbidden literally, not to prevent the observance of legal ceremonies, but in order to prevent gluttony. Thus Jerome says on Ezech. 44:31 ("The priest shall not eat of anything that is dead"): "He condemns those priests who from gluttony did not keep these precepts."

But since certain foods are more delicate than these and more conducive to gluttony, there seems no reason why these should have been forbidden more than the others.

We must therefore follow the third opinion, and hold that these foods were forbidden literally, not with the purpose of enforcing compliance with the legal ceremonies, but in order to further the union of Gentiles and Jews living side by side. Because blood and things strangled were loathsome to the Jews by ancient custom; while the Jews might have suspected the Gentiles of relapse into idolatry if the latter had partaken of things offered to idols. Hence these things were prohibited for the time being, during which the Gentiles and Jews were to become united together. But as time went on, with the lapse of the cause, the effect lapsed also, when the truth of the Gospel teaching was divulged, wherein Our Lord taught that "not that which entereth into the mouth defileth a man" (Mat. 15:11); and that "nothing is to be rejected that is received with thanksgiving" (1 Tim. 4:4). With regard to fornication a special prohibition was made, because the Gentiles did not hold it to be sinful.

FIRST PART OF THE SECOND PART, QUESTION 104

Of the Judicial Precepts (In Four Articles)

We must now consider the judicial precepts: and first of all we shall consider them in general; in the second place we shall consider their reasons. Under the first head there are four points of inquiry:

- (1) What is meant by the judicial precepts?
- (2) Whether they are figurative?
- (3) Their duration;
- (4) Their division.

Whether the judicial precepts were those which directed man in relation to his neighbor? Ia IIae q. 104 a. 1

Objection 1. It would seem that the judicial precepts were not those which directed man in his relations to his neighbor. For judicial precepts take their name from “judgment.” But there are many things that direct man as to his neighbor, which are not subordinate to judgment. Therefore the judicial precepts were not those which directed man in his relations to his neighbor.

Objection 2. Further, the judicial precepts are distinct from the moral precepts, as stated above (q. 99, a. 4). But there are many moral precepts which direct man as to his neighbor: as is evidently the case with the seven precepts of the second table. Therefore the judicial precepts are not so called from directing man as to his neighbor.

Objection 3. Further, as the ceremonial precepts relate to God, so do the judicial precepts relate to one’s neighbor, as stated above (q. 99, a. 4; q. 101, a. 1). But among the ceremonial precepts there are some which concern man himself, such as observances in matter of food and apparel, of which we have already spoken (q. 102, a. 6, ad 1,6). Therefore the judicial precepts are not so called from directing man as to his neighbor.

On the contrary, It is reckoned (Ezech. 18:8) among other works of a good and just man, that “he hath executed true judgment between man and man.” But judicial precepts are so called from “judgment.” Therefore it seems that the judicial precepts were those which directed the relations between man and man.

I answer that, As is evident from what we have stated above (q. 95, a. 2 ; q. 99, a. 4), in every law, some precepts derive their binding force from the dictate of reason itself, because natural reason dictates that something ought to be done or to be avoided. These are called “moral” precepts: since human morals are based on reason. At the same time there are other precepts which derive their binding force, not from the very dictate of reason (because, considered in themselves, they do not imply an obligation of something due or undue); but from some institution, Divine or human: and such are certain determinations of the moral precepts. When therefore the moral precepts are fixed by Divine institu-

tion in matters relating to man’s subordination to God, they are called “ceremonial” precepts: but when they refer to man’s relations to other men, they are called “judicial” precepts. Hence there are two conditions attached to the judicial precepts: viz. first, that they refer to man’s relations to other men; secondly, that they derive their binding force not from reason alone, but in virtue of their institution.

Reply to Objection 1. Judgments emanate through the official pronouncement of certain men who are at the head of affairs, and in whom the judicial power is vested. Now it belongs to those who are at the head of affairs to regulate not only litigious matters, but also voluntary contracts which are concluded between man and man, and whatever matters concern the community at large and the government thereof. Consequently the judicial precepts are not only those which concern actions at law; but also all those that are directed to the ordering of one man in relation to another, which ordering is subject to the direction of the sovereign as supreme judge.

Reply to Objection 2. This argument holds in respect of those precepts which direct man in his relations to his neighbor, and derive their binding force from the mere dictate of reason.

Reply to Objection 3. Even in those precepts which direct us to God, some are moral precepts, which the reason itself dictates when it is quickened by faith; such as that God is to be loved and worshipped. There are also ceremonial precepts, which have no binding force except in virtue of their Divine institution. Now God is concerned not only with the sacrifices that are offered to Him, but also with whatever relates to the fitness of those who offer sacrifices to Him and worship Him. Because men are ordained to God as to their end; wherefore it concerns God and, consequently, is a matter of ceremonial precept, that man should show some fitness for the divine worship. On the other hand, man is not ordained to his neighbor as to his end, so as to need to be disposed in himself with regard to his neighbor, for such is the relationship of a slave to his master, since a slave “is his master’s in all that he is,” as the Philosopher

says (Polit. i, 2). Hence there are no judicial precepts ordaining man in himself; all such precepts are moral: because the reason, which is the principal in moral matters, holds the same position, in man, with regard to things that concern him, as a prince or judge holds in the state. Nevertheless we must take note that, since

the relations of man to his neighbor are more subject to reason than the relations of man to God, there are more precepts whereby man is directed in his relations to his neighbor, than whereby he is directed to God. For the same reason there had to be more ceremonial than judicial precepts in the Law.

Whether the judicial precepts were figurative?

Ia IIae q. 104 a. 2

Objection 1. It would seem that the judicial precepts were not figurative. Because it seems proper to the ceremonial precepts to be instituted as figures of something else. Therefore, if the judicial precepts are figurative, there will be no difference between the judicial and ceremonial precepts.

Objection 2. Further, just as certain judicial precepts were given to the Jewish people, so also were some given to other heathen peoples. But the judicial precepts given to other peoples were not figurative, but stated what had to be done. Therefore it seems that neither were the judicial precepts of the Old Law figures of anything.

Objection 3. Further, those things which relate to the divine worship had to be taught under certain figures, because the things of God are above our reason, as stated above (q. 101, a. 2, ad 2). But things concerning our neighbor are not above our reason. Therefore the judicial precepts which direct us in relation to our neighbor should not have been figurative.

On the contrary, The judicial precepts are expounded both in the allegorical and in the moral sense (Ex. 21).

I answer that, A precept may be figurative in two ways. First, primarily and in itself: because, to wit, it is instituted principally that it may be the figure of something. In this way the ceremonial precepts are figurative; since they were instituted for the very purpose that they might foreshadow something relating to the worship of God and the mystery of Christ. But some

precepts are figurative, not primarily and in themselves, but consequently. In this way the judicial precepts of the Old Law are figurative. For they were not instituted for the purpose of being figurative, but in order that they might regulate the state of that people according to justice and equity. Nevertheless they did foreshadow something consequently: since, to wit, the entire state of that people, who were directed by these precepts, was figurative, according to 1 Cor. 10:11: "All... things happened to them in figure."

Reply to Objection 1. The ceremonial precepts are not figurative in the same way as the judicial precepts, as explained above.

Reply to Objection 2. The Jewish people were chosen by God that Christ might be born of them. Consequently the entire state of that people had to be prophetic and figurative, as Augustine states (Contra Faust. xxii, 24). For this reason even the judicial precepts that were given to this people were more figurative than those which were given to other nations. Thus, too, the wars and deeds of this people are expounded in the mystical sense: but not the wars and deeds of the Assyrians or Romans, although the latter are more famous in the eyes of men.

Reply to Objection 3. In this people the direction of man in regard to his neighbor, considered in itself, was subject to reason. But in so far as it was referred to the worship of God, it was above reason: and in this respect it was figurative.

Whether the judicial precepts of the Old Law bind for ever?

Ia IIae q. 104 a. 3

Objection 1. It would seem that the judicial precepts of the Old Law bind for ever. Because the judicial precepts relate to the virtue of justice: since a judgment is an execution of the virtue of justice. Now "justice is perpetual and immortal" (Wis. 1:15). Therefore the judicial precepts bind for ever.

Objection 2. Further, Divine institutions are more enduring than human institutions. But the judicial precepts of human laws bind for ever. Therefore much more do the judicial precepts of the Divine Law.

Objection 3. Further, the Apostle says (Heb. 7:18) that "there is a setting aside of the former commandment, because of the weakness and unprofitableness thereof." Now this is true of the ceremonial precept, which "could [Vulg.: 'can'] not, as to the conscience,

make him perfect that serveth only in meats and in drinks, and divers washings and justices of the flesh," as the Apostle declares (Heb. 9:9,10). On the other hand, the judicial precepts were useful and efficacious in respect of the purpose for which they were instituted, viz. to establish justice and equity among men. Therefore the judicial precepts of the Old Law are not set aside, but still retain their efficacy.

On the contrary, The Apostle says (Heb. 7:12) that "the priesthood being translated it is necessary that a translation also be made of the Law." But the priesthood was transferred from Aaron to Christ. Therefore the entire Law was also transferred. Therefore the judicial precepts are no longer in force.

I answer that, The judicial precepts did not bind for

ever, but were annulled by the coming of Christ: yet not in the same way as the ceremonial precepts. For the ceremonial precepts were annulled so far as to be not only “dead,” but also deadly to those who observe them since the coming of Christ, especially since the promulgation of the Gospel. On the other hand, the judicial precepts are dead indeed, because they have no binding force: but they are not deadly. For if a sovereign were to order these judicial precepts to be observed in his kingdom, he would not sin: unless perchance they were observed, or ordered to be observed, as though they derived their binding force through being institutions of the Old Law: for it would be a deadly sin to intend to observe them thus.

The reason for this difference may be gathered from what has been said above (a. 2). For it has been stated that the ceremonial precepts are figurative primarily and in themselves, as being instituted chiefly for the purpose of foreshadowing the mysteries of Christ to come. On the other hand, the judicial precepts were not instituted that they might be figures, but that they might shape the state of that people who were directed to Christ. Consequently, when the state of that people changed with the coming of Christ, the judicial precepts lost their binding force: for the Law was a pedagogue, leading men to Christ, as stated in Gal. 3:24. Since, however, these judicial precepts are instituted, not for the purpose of being figures, but for the performance of certain deeds,

the observance thereof is not prejudicial to the truth of faith. But the intention of observing them, as though one were bound by the Law, is prejudicial to the truth of faith: because it would follow that the former state of the people still lasts, and that Christ has not yet come.

Reply to Objection 1. The obligation of observing justice is indeed perpetual. But the determination of those things that are just, according to human or Divine institution, must needs be different, according to the different states of mankind.

Reply to Objection 2. The judicial precepts established by men retain their binding force for ever, so long as the state of government remains the same. But if the state or nation pass to another form of government, the laws must needs be changed. For democracy, which is government by the people, demands different laws from those of oligarchy, which is government by the rich, as the Philosopher shows (Polit. iv, 1). Consequently when the state of that people changed, the judicial precepts had to be changed also.

Reply to Objection 3. Those judicial precepts directed the people to justice and equity, in keeping with the demands of that state. But after the coming of Christ, there had to be a change in the state of that people, so that in Christ there was no distinction between Gentile and Jew, as there had been before. For this reason the judicial precepts needed to be changed also.

Whether it is possible to assign a distinct division of the judicial precepts?

Ia IIae q. 104 a. 4

Objection 1. It would seem that it is impossible to assign a distinct division of the judicial precepts. Because the judicial precepts direct men in their relations to one another. But those things which need to be directed, as pertaining to the relationship between man and man, and which are made use of by men, are not subject to division, since they are infinite in number. Therefore it is not possible to assign a distinct division of the judicial precepts.

Objection 2. Further, the judicial precepts are decisions on moral matters. But moral precepts do not seem to be capable of division, except in so far as they are reducible to the precepts of the decalogue. Therefore there is no distinct division of the judicial precepts.

Objection 3. Further, because there is a distinct division of the ceremonial precepts, the Law alludes to this division, by describing some as “sacrifices,” others as “observances.” But the Law contains no allusion to a division of the judicial precepts. Therefore it seems that they have no distinct division.

On the contrary, Wherever there is order there must needs be division. But the notion of order is chiefly applicable to the judicial precepts, since thereby that people was ordained. Therefore it is most necessary that they should have a distinct division.

I answer that, Since law is the art, as it were, of

directing or ordering the life of man, as in every art there is a distinct division in the rules of art, so, in every law, there must be a distinct division of precepts: else the law would be rendered useless by confusion. We must therefore say that the judicial precepts of the Old Law, whereby men were directed in their relations to one another, are subject to division according to the divers ways in which man is directed.

Now in every people a fourfold order is to be found: one, of the people’s sovereign to his subjects; a second of the subjects among themselves; a third, of the citizens to foreigners; a fourth, of members of the same household, such as the order of the father to his son; of the wife to her husband; of the master to his servant: and according to these four orders we may distinguish different kinds of judicial precepts in the Old Law. For certain precepts are laid down concerning the institution of the sovereign and relating to his office, and about the respect due to him: this is one part of the judicial precepts. Again, certain precepts are given in respect of a man to his fellow citizens: for instance, about buying and selling, judgments and penalties: this is the second part of the judicial precepts. Again, certain precepts are enjoined with regard to foreigners: for instance, about wars waged against their foes, and about the way to receive travelers and strangers: this is the third part of the

judicial precepts. Lastly, certain precepts are given relating to home life: for instance, about servants, wives and children: this is the fourth part of the judicial precepts.

Reply to Objection 1. Things pertaining to the ordering of relations between one man and another are indeed infinite in number: yet they are reducible to certain distinct heads, according to the different relations in which one man stands to another, as stated above.

Reply to Objection 2. The precepts of the decalogue held the first place in the moral order, as stated

above (q. 100, a. 3): and consequently it is fitting that other moral precepts should be distinguished in relation to them. But the judicial and ceremonial precepts have a different binding force, derived, not from natural reason, but from their institution alone. Hence there is a distinct reason for distinguishing them.

Reply to Objection 3. The Law alludes to the division of the judicial precepts in the very things themselves which are prescribed by the judicial precepts of the Law.

Objection 1. It would seem that the judicial precepts were not those which directed man in his relations to his neighbor. For judicial precepts take their name from “judgment.” But there are many things that direct man as to his neighbor, which are not subordinate to judgment. Therefore the judicial precepts were not those which directed man in his relations to his neighbor.

Objection 2. Further, the judicial precepts are distinct from the moral precepts, as stated above (q. 99, a. 4). But there are many moral precepts which direct man as to his neighbor: as is evidently the case with the seven precepts of the second table. Therefore the judicial precepts are not so called from directing man as to his neighbor.

Objection 3. Further, as the ceremonial precepts relate to God, so do the judicial precepts relate to one’s neighbor, as stated above (q. 99, a. 4; q. 101, a. 1). But among the ceremonial precepts there are some which concern man himself, such as observances in matter of food and apparel, of which we have already spoken (q. 102, a. 6, ad 1,6). Therefore the judicial precepts are not so called from directing man as to his neighbor.

On the contrary, It is reckoned (Ezech. 18:8) among other works of a good and just man, that “he hath executed true judgment between man and man.” But judicial precepts are so called from “judgment.” Therefore it seems that the judicial precepts were those which directed the relations between man and man.

I answer that, As is evident from what we have stated above (q. 95, a. 2 ; q. 99, a. 4), in every law, some precepts derive their binding force from the dictate of reason itself, because natural reason dictates that something ought to be done or to be avoided. These are called “moral” precepts: since human morals are based on reason. At the same time there are other precepts which derive their binding force, not from the very dictate of reason (because, considered in themselves, they do not imply an obligation of something due or undue); but from some institution, Divine or human: and such are certain determinations of the moral precepts. When therefore the moral precepts are fixed by Divine institution in matters relating to man’s subordination to God, they are called “ceremonial” precepts: but when they refer to man’s relations to other men, they are called “judicial” precepts. Hence there are two conditions attached to the judicial precepts: viz. first, that they refer to man’s relations to other men; secondly, that they de-

rive their binding force not from reason alone, but in virtue of their institution.

Reply to Objection 1. Judgments emanate through the official pronouncement of certain men who are at the head of affairs, and in whom the judicial power is vested. Now it belongs to those who are at the head of affairs to regulate not only litigious matters, but also voluntary contracts which are concluded between man and man, and whatever matters concern the community at large and the government thereof. Consequently the judicial precepts are not only those which concern actions at law; but also all those that are directed to the ordering of one man in relation to another, which ordering is subject to the direction of the sovereign as supreme judge.

Reply to Objection 2. This argument holds in respect of those precepts which direct man in his relations to his neighbor, and derive their binding force from the mere dictate of reason.

Reply to Objection 3. Even in those precepts which direct us to God, some are moral precepts, which the reason itself dictates when it is quickened by faith; such as that God is to be loved and worshipped. There are also ceremonial precepts, which have no binding force except in virtue of their Divine institution. Now God is concerned not only with the sacrifices that are offered to Him, but also with whatever relates to the fitness of those who offer sacrifices to Him and worship Him. Because men are ordained to God as to their end; wherefore it concerns God and, consequently, is a matter of ceremonial precept, that man should show some fitness for the divine worship. On the other hand, man is not ordained to his neighbor as to his end, so as to need to be disposed in himself with regard to his neighbor, for such is the relationship of a slave to his master, since a slave “is his master’s in all that he is,” as the Philosopher says (Polit. i, 2). Hence there are no judicial precepts ordaining man in himself; all such precepts are moral: because the reason, which is the principal in moral matters, holds the same position, in man, with regard to things that concern him, as a prince or judge holds in the state. Nevertheless we must take note that, since the relations of man to his neighbor are more subject to reason than the relations of man to God, there are more precepts whereby man is directed in his relations to his neighbor, than whereby he is directed to God. For the same reason there had to be more ceremonial than judicial precepts in the Law.

Objection 1. It would seem that the judicial precepts were not figurative. Because it seems proper to the ceremonial precepts to be instituted as figures of something else. Therefore, if the judicial precepts are figurative, there will be no difference between the judicial and ceremonial precepts.

Objection 2. Further, just as certain judicial precepts were given to the Jewish people, so also were some given to other heathen peoples. But the judicial precepts given to other peoples were not figurative, but stated what had to be done. Therefore it seems that neither were the judicial precepts of the Old Law figures of anything.

Objection 3. Further, those things which relate to the divine worship had to be taught under certain figures, because the things of God are above our reason, as stated above (q. 101, a. 2, ad 2). But things concerning our neighbor are not above our reason. Therefore the judicial precepts which direct us in relation to our neighbor should not have been figurative.

On the contrary, The judicial precepts are expounded both in the allegorical and in the moral sense (Ex. 21).

I answer that, A precept may be figurative in two ways. First, primarily and in itself: because, to wit, it is instituted principally that it may be the figure of something. In this way the ceremonial precepts are figurative; since they were instituted for the very purpose that they might foreshadow something relating to the worship of God and the mystery of Christ. But some

precepts are figurative, not primarily and in themselves, but consequently. In this way the judicial precepts of the Old Law are figurative. For they were not instituted for the purpose of being figurative, but in order that they might regulate the state of that people according to justice and equity. Nevertheless they did foreshadow something consequently: since, to wit, the entire state of that people, who were directed by these precepts, was figurative, according to 1 Cor. 10:11: "All... things happened to them in figure."

Reply to Objection 1. The ceremonial precepts are not figurative in the same way as the judicial precepts, as explained above.

Reply to Objection 2. The Jewish people were chosen by God that Christ might be born of them. Consequently the entire state of that people had to be prophetic and figurative, as Augustine states (*Contra Faust.* xxii, 24). For this reason even the judicial precepts that were given to this people were more figurative than those which were given to other nations. Thus, too, the wars and deeds of this people are expounded in the mystical sense: but not the wars and deeds of the Assyrians or Romans, although the latter are more famous in the eyes of men.

Reply to Objection 3. In this people the direction of man in regard to his neighbor, considered in itself, was subject to reason. But in so far as it was referred to the worship of God, it was above reason: and in this respect it was figurative.

Objection 1. It would seem that the judicial precepts of the Old Law bind for ever. Because the judicial precepts relate to the virtue of justice: since a judgment is an execution of the virtue of justice. Now “justice is perpetual and immortal” (Wis. 1:15). Therefore the judicial precepts bind for ever.

Objection 2. Further, Divine institutions are more enduring than human institutions. But the judicial precepts of human laws bind for ever. Therefore much more do the judicial precepts of the Divine Law.

Objection 3. Further, the Apostle says (Heb. 7:18) that “there is a setting aside of the former commandment, because of the weakness and unprofitableness thereof.” Now this is true of the ceremonial precept, which “could [Vulg.: ‘can’] not, as to the conscience, make him perfect that serveth only in meats and in drinks, and divers washings and justices of the flesh,” as the Apostle declares (Heb. 9:9,10). On the other hand, the judicial precepts were useful and efficacious in respect of the purpose for which they were instituted, viz. to establish justice and equity among men. Therefore the judicial precepts of the Old Law are not set aside, but still retain their efficacy.

On the contrary, The Apostle says (Heb. 7:12) that “the priesthood being translated it is necessary that a translation also be made of the Law.” But the priesthood was transferred from Aaron to Christ. Therefore the entire Law was also transferred. Therefore the judicial precepts are no longer in force.

I answer that, The judicial precepts did not bind for ever, but were annulled by the coming of Christ: yet not in the same way as the ceremonial precepts. For the ceremonial precepts were annulled so far as to be not only “dead,” but also deadly to those who observe them since the coming of Christ, especially since the promulgation of the Gospel. On the other hand, the judicial precepts are dead indeed, because they have no binding force: but they are not deadly. For if a sovereign were to order these judicial precepts to be observed in his kingdom, he would not sin: unless perchance they were observed, or ordered to be observed, as though they derived their binding force through being institutions of the Old Law: for it would be a deadly sin to intend to observe them

thus.

The reason for this difference may be gathered from what has been said above (a. 2). For it has been stated that the ceremonial precepts are figurative primarily and in themselves, as being instituted chiefly for the purpose of foreshadowing the mysteries of Christ to come. On the other hand, the judicial precepts were not instituted that they might be figures, but that they might shape the state of that people who were directed to Christ. Consequently, when the state of that people changed with the coming of Christ, the judicial precepts lost their binding force: for the Law was a pedagogue, leading men to Christ, as stated in Gal. 3:24. Since, however, these judicial precepts are instituted, not for the purpose of being figures, but for the performance of certain deeds, the observance thereof is not prejudicial to the truth of faith. But the intention of observing them, as though one were bound by the Law, is prejudicial to the truth of faith: because it would follow that the former state of the people still lasts, and that Christ has not yet come.

Reply to Objection 1. The obligation of observing justice is indeed perpetual. But the determination of those things that are just, according to human or Divine institution, must needs be different, according to the different states of mankind.

Reply to Objection 2. The judicial precepts established by men retain their binding force for ever, so long as the state of government remains the same. But if the state or nation pass to another form of government, the laws must needs be changed. For democracy, which is government by the people, demands different laws from those of oligarchy, which is government by the rich, as the Philosopher shows (Polit. iv, 1). Consequently when the state of that people changed, the judicial precepts had to be changed also.

Reply to Objection 3. Those judicial precepts directed the people to justice and equity, in keeping with the demands of that state. But after the coming of Christ, there had to be a change in the state of that people, so that in Christ there was no distinction between Gentile and Jew, as there had been before. For this reason the judicial precepts needed to be changed also.

Objection 1. It would seem that it is impossible to assign a distinct division of the judicial precepts. Because the judicial precepts direct men in their relations to one another. But those things which need to be directed, as pertaining to the relationship between man and man, and which are made use of by men, are not subject to division, since they are infinite in number. Therefore it is not possible to assign a distinct division of the judicial precepts.

Objection 2. Further, the judicial precepts are decisions on moral matters. But moral precepts do not seem to be capable of division, except in so far as they are reducible to the precepts of the decalogue. Therefore there is no distinct division of the judicial precepts.

Objection 3. Further, because there is a distinct division of the ceremonial precepts, the Law alludes to this division, by describing some as “sacrifices,” others as “observances.” But the Law contains no allusion to a division of the judicial precepts. Therefore it seems that they have no distinct division.

On the contrary, Wherever there is order there must needs be division. But the notion of order is chiefly applicable to the judicial precepts, since thereby that people was ordained. Therefore it is most necessary that they should have a distinct division.

I answer that, Since law is the art, as it were, of directing or ordering the life of man, as in every art there is a distinct division in the rules of art, so, in every law, there must be a distinct division of precepts: else the law would be rendered useless by confusion. We must therefore say that the judicial precepts of the Old Law, whereby men were directed in their relations to one another, are subject to division according to the divers ways in which man is directed.

Now in every people a fourfold order is to be found: one, of the people’s sovereign to his subjects; a second of the subjects among themselves; a third, of the cit-

izens to foreigners; a fourth, of members of the same household, such as the order of the father to his son; of the wife to her husband; of the master to his servant: and according to these four orders we may distinguish different kinds of judicial precepts in the Old Law. For certain precepts are laid down concerning the institution of the sovereign and relating to his office, and about the respect due to him: this is one part of the judicial precepts. Again, certain precepts are given in respect of a man to his fellow citizens: for instance, about buying and selling, judgments and penalties: this is the second part of the judicial precepts. Again, certain precepts are enjoined with regard to foreigners: for instance, about wars waged against their foes, and about the way to receive travelers and strangers: this is the third part of the judicial precepts. Lastly, certain precepts are given relating to home life: for instance, about servants, wives and children: this is the fourth part of the judicial precepts.

Reply to Objection 1. Things pertaining to the ordering of relations between one man and another are indeed infinite in number: yet they are reducible to certain distinct heads, according to the different relations in which one man stands to another, as stated above.

Reply to Objection 2. The precepts of the decalogue held the first place in the moral order, as stated above (q. 100, a. 3): and consequently it is fitting that other moral precepts should be distinguished in relation to them. But the judicial and ceremonial precepts have a different binding force, derived, not from natural reason, but from their institution alone. Hence there is a distinct reason for distinguishing them.

Reply to Objection 3. The Law alludes to the division of the judicial precepts in the very things themselves which are prescribed by the judicial precepts of the Law.

FIRST PART OF THE SECOND PART, QUESTION 105

Of the Reason for the Judicial Precepts

(In Four Articles)

We must now consider the reason for the judicial precepts: under which head there are four points of inquiry:

- (1) Concerning the reason for the judicial precepts relating to the rulers;
- (2) Concerning the fellowship of one man with another;
- (3) Concerning matters relating to foreigners;
- (4) Concerning things relating to domestic matters.

Whether the Old Law enjoined fitting precepts concerning rulers?

Ia IIae q. 105 a. 1

Objection 1. It would seem that the Old Law made unfitting precepts concerning rulers. Because, as the Philosopher says (Polit. iii, 4), “the ordering of the people depends mostly on the chief ruler.” But the Law contains no precept relating to the institution of the chief ruler; and yet we find therein prescriptions concerning the inferior rulers: firstly (Ex. 18:21): “Provide out of all the people wise [Vulg.: ‘able’] men,” etc.; again (Num. 11:16): “Gather unto Me seventy men of the ancients of Israel”; and again (Dt. 1:13): “Let Me have from among you wise and understanding men,” etc. Therefore the Law provided insufficiently in regard to the rulers of the people.

Objection 2. Further, “The best gives of the best,” as Plato states (Tim. ii). Now the best ordering of a state or of any nation is to be ruled by a king: because this kind of government approaches nearest in resemblance to the Divine government, whereby God rules the world from the beginning. Therefore the Law should have set a king over the people, and they should not have been allowed a choice in the matter, as indeed they were allowed (Dt. 17:14,15): “When thou . . . shalt say: I will set a king over me . . . thou shalt set him,” etc.

Objection 3. Further, according to Mat. 12:25: “Every kingdom divided against itself shall be made desolate”: a saying which was verified in the Jewish people, whose destruction was brought about by the division of the kingdom. But the Law should aim chiefly at things pertaining to the general well-being of the people. Therefore it should have forbidden the kingdom to be divided under two kings: nor should this have been introduced even by Divine authority; as we read of its being introduced by the authority of the prophet Ahias the Silonite (3 Kings 11:29, seqq.).

Objection 4. Further, just as priests are instituted for the benefit of the people in things concerning God, as stated in Heb. 5:1; so are rulers set up for the benefit of the people in human affairs. But certain things were allotted as a means of livelihood for the priests and Levites of the Law: such as the tithes and first-fruits, and many like things. Therefore in like manner certain things should have been determined for the livelihood of the rulers of the people: the more that they were forbidden to accept presents, as is clearly stated in Ex. 23:8:

“You shall not [Vulg.: ‘Neither shalt thou’] take bribes, which even blind the wise, and pervert the words of the just.”

Objection 5. Further, as a kingdom is the best form of government, so is tyranny the most corrupt. But when the Lord appointed the king, He established a tyrannical law; for it is written (1 Kings 8:11): “This will be the right of the king, that shall reign over you: He will take your sons,” etc. Therefore the Law made unfitting provision with regard to the institution of rulers.

On the contrary, The people of Israel is commended for the beauty of its order (Num. 24:5): “How beautiful are thy tabernacles, O Jacob, and thy tents.” But the beautiful ordering of a people depends on the right establishment of its rulers. Therefore the Law made right provision for the people with regard to its rulers.

I answer that, Two points are to be observed concerning the right ordering of rulers in a state or nation. One is that all should take some share in the government: for this form of constitution ensures peace among the people, commends itself to all, and is most enduring, as stated in Polit. ii, 6. The other point is to be observed in respect of the kinds of government, or the different ways in which the constitutions are established. For whereas these differ in kind, as the Philosopher states (Polit. iii, 5), nevertheless the first place is held by the “kingdom,” where the power of government is vested in one; and “aristocracy,” which signifies government by the best, where the power of government is vested in a few. Accordingly, the best form of government is in a state or kingdom, where one is given the power to preside over all; while under him are others having governing powers: and yet a government of this kind is shared by all, both because all are eligible to govern, and because the rules are chosen by all. For this is the best form of polity, being partly kingdom, since there is one at the head of all; partly aristocracy, in so far as a number of persons are set in authority; partly democracy, i.e. government by the people, in so far as the rulers can be chosen from the people, and the people have the right to choose their rulers.

Such was the form of government established by the

Divine Law. For Moses and his successors governed the people in such a way that each of them was ruler over all; so that there was a kind of kingdom. Moreover, seventy-two men were chosen, who were elders in virtue: for it is written (Dt. 1:15): “I took out of your tribes wise and honorable, and appointed them rulers”: so that there was an element of aristocracy. But it was a democratical government in so far as the rulers were chosen from all the people; for it is written (Ex. 18:21): “Provide out of all the people wise [Vulg.: ‘able’] men,” etc.; and, again, in so far as they were chosen by the people; wherefore it is written (Dt. 1:13): “Let me have from among you wise [Vulg.: ‘able’] men,” etc. Consequently it is evident that the ordering of the rulers was well provided for by the Law.

Reply to Objection 1. This people was governed under the special care of God: wherefore it is written (Dt. 7:6): “The Lord thy God hath chosen thee to be His peculiar people”: and this is why the Lord reserved to Himself the institution of the chief ruler. For this too did Moses pray (Num. 27:16): “May the Lord the God of the spirits of all the flesh provide a man, that may be over this multitude.” Thus by God’s orders Josue was set at the head in place of Moses; and we read about each of the judges who succeeded Josue that God “raised. . . up a saviour” for the people, and that “the spirit of the Lord was” in them (Judges 3:9,10,15). Hence the Lord did not leave the choice of a king to the people; but reserved this to Himself, as appears from Dt. 17:15: “Thou shalt set him whom the Lord thy God shall choose.”

Reply to Objection 2. A kingdom is the best form of government of the people, so long as it is not corrupt. But since the power granted to a king is so great, it easily degenerates into tyranny, unless he to whom this power is given be a very virtuous man: for it is only the virtuous man that conducts himself well in the midst of prosperity, as the Philosopher observes (Ethic. iv, 3). Now perfect virtue is to be found in few: and especially were the Jews inclined to cruelty and avarice, which vices above all turn men into tyrants. Hence from the very first the Lord did not set up the kingly authority with full power, but gave them judges and governors to rule them. But afterwards when the people asked Him to do so, being indignant with them, so to speak, He granted them a king, as is clear from His words to Samuel (1 Kings 8:7): “They have not rejected thee, but Me, that I should not reign over them.”

Nevertheless, as regards the appointment of a king, He did establish the manner of election from the very beginning (Dt. 17:14, seqq.): and then He determined two points: first, that in choosing a king they should wait for the Lord’s decision; and that they should not make a man of another nation king, because such kings are wont to take little interest in the people they are set over, and consequently to have no care for their wel-

fare: secondly, He prescribed how the king after his appointment should behave, in regard to himself; namely, that he should not accumulate chariots and horses, nor wives, nor immense wealth: because through craving for such things princes become tyrants and forsake justice. He also appointed the manner in which they were to conduct themselves towards God: namely, that they should continually read and ponder on God’s Law, and should ever fear and obey God. Moreover, He decided how they should behave towards their subjects: namely, that they should not proudly despise them, or ill-treat them, and that they should not depart from the paths of justice.

Reply to Objection 3. The division of the kingdom, and a number of kings, was rather a punishment inflicted on that people for their many dissensions, specially against the just rule of David, than a benefit conferred on them for their profit. Hence it is written (Osee 13:11): “I will give thee a king in My wrath”; and (Osee 8:4): “They have reigned, but not by Me: they have been princes, and I knew not.”

Reply to Objection 4. The priestly office was bequeathed by succession from father to son: and this, in order that it might be held in greater respect, if not any man from the people could become a priest: since honor was given to them out of reverence for the divine worship. Hence it was necessary to put aside certain things for them both as to tithes and as to first-fruits, and, again, as to oblations and sacrifices, that they might be afforded a means of livelihood. On the other hand, the rulers, as stated above, were chosen from the whole people; wherefore they had their own possessions, from which to derive a living: and so much the more, since the Lord forbade even a king to have superabundant wealth to make too much show of magnificence: both because he could scarcely avoid the excesses of pride and tyranny, arising from such things, and because, if the rulers were not very rich, and if their office involved much work and anxiety, it would not tempt the ambition of the common people; and would not become an occasion of sedition.

Reply to Objection 5. That right was not given to the king by Divine institution: rather was it foretold that kings would usurp that right, by framing unjust laws, and by degenerating into tyrants who preyed on their subjects. This is clear from the context that follows: “And you shall be his slaves [Douay: ‘servants’]”: which is significative of tyranny, since a tyrant rules his subjects as though they were his slaves. Hence Samuel spoke these words to deter them from asking for a king; since the narrative continues: “But the people would not hear the voice of Samuel.” It may happen, however, that even a good king, without being a tyrant, may take away the sons, and make them tribunes and centurions; and may take many things from his subjects in order to secure the common weal.

Objection 1. It would seem that the judicial precepts were not suitably framed as regards the relations of one man with another. Because men cannot live together in peace, if one man takes what belongs to another. But this seems to have been approved by the Law: since it is written (Dt. 23:24): “Going into thy neighbor’s vineyard, thou mayest eat as many grapes as thou pleasest.” Therefore the Old Law did not make suitable provisions for man’s peace.

Objection 2. Further, one of the chief causes of the downfall of states has been the holding of property by women, as the Philosopher says (Polit. ii, 6). But this was introduced by the Old Law; for it is written (Num. 27:8): “When a man dieth without a son, his inheritance shall pass to his daughter.” Therefore the Law made unsuitable provision for the welfare of the people.

Objection 3. Further, it is most conducive to the preservation of human society that men may provide themselves with necessaries by buying and selling, as stated in Polit. i. But the Old Law took away the force of sales; since it prescribes that in the 50th year of the jubilee all that is sold shall return to the vendor (Lev. 25:28). Therefore in this matter the Law gave the people an unfitting command.

Objection 4. Further, man’s needs require that men should be ready to lend: which readiness ceases if the creditors do not return the pledges: hence it is written (Ecclus. 29:10): “Many have refused to lend, not out of wickedness, but they were afraid to be defrauded without cause.” And yet this was encouraged by the Law. First, because it prescribed (Dt. 15:2): “He to whom any thing is owing from his friend or neighbor or brother, cannot demand it again, because it is the year of remission of the Lord”; and (Ex. 22:15) it is stated that if a borrowed animal should die while the owner is present, the borrower is not bound to make restitution. Secondly, because the security acquired through the pledge is lost: for it is written (Dt. 24:10): “When thou shalt demand of thy neighbor any thing that he oweth thee, thou shalt not go into his house to take away a pledge”; and again (Dt. 24:12,13): “The pledge shall not lodge with thee that night, but thou shalt restore it to him presently.” Therefore the Law made insufficient provision in the matter of loans.

Objection 5. Further, considerable risk attaches to goods deposited with a fraudulent depositary: wherefore great caution should be observed in such matters: hence it is stated in 2 Mac. 3:15 that “the priests. . . called upon Him from heaven, Who made the law concerning things given to be kept, that He would preserve them safe, for them that had deposited them.” But the precepts of the Old Law observed little caution in regard to deposits: since it is prescribed (Ex. 22:10,11) that when goods deposited are lost, the owner is to stand by the oath of the depositary. Therefore the

Law made unsuitable provision in this matter.

Objection 6. Further, just as a workman offers his work for hire, so do men let houses and so forth. But there is no need for the tenant to pay his rent as soon as he takes a house. Therefore it seems an unnecessarily hard prescription (Lev. 19:13) that “the wages of him that hath been hired by thee shall not abide with thee until morning.”

Objection 7. Further, since there is often pressing need for a judge, it should be easy to gain access to one. It was therefore unfitting that the Law (Dt. 17:8,9) should command them to go to a fixed place to ask for judgment on doubtful matters.

Objection 8. Further, it is possible that not only two, but three or more, should agree to tell a lie. Therefore it is unreasonably stated (Dt. 19:15) that “in the mouth of two or three witnesses every word shall stand.”

Objection 9. Further, punishment should be fixed according to the gravity of the fault: for which reason also it is written (Dt. 25:2): “According to the measure of the sin, shall the measure also of the stripes be.” Yet the Law fixed unequal punishments for certain faults: for it is written (Ex. 22:1) that the thief “shall restore five oxen for one ox, and four sheep for one sheep.” Moreover, certain slight offenses are severely punished: thus (Num. 15:32, seqq.) a man is stoned for gathering sticks on the sabbath day: and (Dt. 21:18, seqq.) the unruly son is commanded to be stoned on account of certain small transgressions, viz. because “he gave himself to revelling. . . and banquetings.” Therefore the Law prescribed punishments in an unreasonable manner.

Objection 10. Further, as Augustine says (De Civ. Dei xxi, 11), “Tully writes that the laws recognize eight forms of punishment, indemnity, prison, stripes, retaliation, public disgrace, exile, death, slavery.” Now some of these were prescribed by the Law. “Indemnity,” as when a thief was condemned to make restitution fivefold or fourfold. “Prison,” as when (Num. 15:34) a certain man is ordered to be imprisoned. “Stripes”; thus (Dt. 25:2), “if they see that the offender be worthy of stripes; they shall lay him down, and shall cause him to be beaten before them.” “Public disgrace” was brought on to him who refused to take to himself the wife of his deceased brother, for she took “off his shoe from his foot, and” did “spit in his face” (Dt. 25:9). It prescribed the “death” penalty, as is clear from (Lev. 20:9): “He that curseth his father, or mother, dying let him die.” The Law also recognized the “lex talionis,” by prescribing (Ex. 21:24): “Eye for eye, tooth for tooth.” Therefore it seems unreasonable that the Law should not have inflicted the two other punishments, viz. “exile” and “slavery.”

Objection 11. Further, no punishment is due except for a fault. But dumb animals cannot commit a fault.

Therefore the Law is unreasonable in punishing them (Ex. 21:29): “If the ox... shall kill a man or a woman,” it “shall be stoned”: and (Lev. 20:16): “The woman that shall lie under any beast, shall be killed together with the same.” Therefore it seems that matters pertaining to the relations of one man with another were unsuitably regulated by the Law.

Objection 12. Further, the Lord commanded (Ex. 21:12) a murderer to be punished with death. But the death of a dumb animal is reckoned of much less account than the slaying of a man. Hence murder cannot be sufficiently punished by the slaying of a dumb animal. Therefore it is unfittingly prescribed (Dt. 21:1,4) that “when there shall be found... the corpse of a man slain, and it is not known who is guilty of the murder... the ancients” of the nearest city “shall take a heifer of the herd, that hath not drawn in the yoke, nor ploughed the ground, and they shall bring her into a rough and stony valley, that never was ploughed, nor sown; and there they shall strike off the head of the heifer.”

On the contrary, It is recalled as a special blessing (Ps. 147:20) that “He hath not done in like manner to every nation; and His judgments He hath not made manifest to them.”

I answer that, As Augustine says (De Civ. Dei ii, 21), quoting Tully, “a nation is a body of men united together by consent to the law and by community of welfare.” Consequently it is of the essence of a nation that the mutual relations of the citizens be ordered by just laws. Now the relations of one man with another are twofold: some are effected under the guidance of those in authority: others are effected by the will of private individuals. And since whatever is subject to the power of an individual can be disposed of according to his will, hence it is that the decision of matters between one man and another, and the punishment of evildoers, depend on the direction of those in authority, to whom men are subject. On the other hand, the power of private persons is exercised over the things they possess: and consequently their dealings with one another, as regards such things, depend on their own will, for instance in buying, selling, giving, and so forth. Now the Law provided sufficiently in respect of each of these relations between one man and another. For it established judges, as is clearly indicated in Dt. 16:18: “Thou shalt appoint judges and magistrates in all its [Vulg.: ‘thy’] gates... that they may judge the people with just judgment.” It is also directed the manner of pronouncing just judgments, according to Dt. 1:16,17: “Judge that which is just, whether he be one of your own country or a stranger: there shall be no difference of persons.” It also removed an occasion of pronouncing unjust judgment, by forbidding judges to accept bribes (Ex. 23:8; Dt. 16:19). It prescribed the number of witnesses, viz. two or three: and it appointed certain punishments to certain crimes, as we shall state farther on (ad 10).

But with regard to possessions, it is a very good

thing, says the Philosopher (Polit. ii, 2) that the things possessed should be distinct, and the use thereof should be partly common, and partly granted to others by the will of the possessors. These three points were provided for by the Law. Because, in the first place, the possessions themselves were divided among individuals: for it is written (Num. 33:53,54): “I have given you” the land “for a possession: and you shall divide it among you by lot.” And since many states have been ruined through want of regulations in the matter of possessions, as the Philosopher observes (Polit. ii, 6); therefore the Law provided a threefold remedy against the regularity of possessions. The first was that they should be divided equally, wherefore it is written (Num. 33:54): “To the more you shall give a larger part, and to the fewer, a lesser.” A second remedy was that possessions could not be alienated for ever, but after a certain lapse of time should return to their former owner, so as to avoid confusion of possessions (cf. ad 3). The third remedy aimed at the removal of this confusion, and provided that the dead should be succeeded by their next of kin: in the first place, the son; secondly, the daughter; thirdly, the brother; fourthly, the father’s brother; fifthly, any other next of kin. Furthermore, in order to preserve the distinction of property, the Law enacted that heiresses should marry within their own tribe, as recorded in Num. 36:6.

Secondly, the Law commanded that, in some respects, the use of things should belong to all in common. Firstly, as regards the care of them; for it was prescribed (Dt. 22:1-4): “Thou shalt not pass by, if thou seest thy brother’s ox or his sheep go astray; but thou shalt bring them back to thy brother;” and in like manner as to other things. Secondly, as regards fruits. For all alike were allowed on entering a friend’s vineyard to eat of the fruit, but not to take any away. And, specially, with respect to the poor, it was prescribed that the forgotten sheaves, and the bunches of grapes and fruit, should be left behind for them (Lev. 19:9; Dt. 24:19). Moreover, whatever grew in the seventh year was common property, as stated in Ex. 23:11 and Lev. 25:4.

Thirdly, the law recognized the transference of goods by the owner. There was a purely gratuitous transfer: thus it is written (Dt. 14:28,29): “The third day thou shalt separate another tithe... and the Levite... and the stranger, and the fatherless, and the widow... shall come and shall eat and be filled.” And there was a transfer for a consideration, for instance, by selling and buying, by letting out and hiring, by loan and also by deposit, concerning all of which we find that the Law made ample provision. Consequently it is clear that the Old Law provided sufficiently concerning the mutual relations of one man with another.

Reply to Objection 1. As the Apostle says (Rom. 13:8), “he that loveth his neighbor hath fulfilled the Law”: because, to wit, all the precepts of the Law, chiefly those concerning our neighbor, seem to aim at the end that men should love one another. Now it is an

effect of love that men give their own goods to others: because, as stated in 1 Jn. 3:17: "He that... shall see his brother in need, and shall shut up his bowels from him: how doth the charity of God abide in him?" Hence the purpose of the Law was to accustom men to give of their own to others readily: thus the Apostle (1 Tim. 6:18) commands the rich "to give easily and to communicate to others." Now a man does not give easily to others if he will not suffer another man to take some little thing from him without any great injury to him. And so the Law laid down that it should be lawful for a man, on entering his neighbor's vineyard, to eat of the fruit there: but not to carry any away, lest this should lead to the infliction of a grievous harm, and cause a disturbance of the peace: for among well-behaved people, the taking of a little does not disturb the peace; in fact, it rather strengthens friendship and accustoms men to give things to one another.

Reply to Objection 2. The Law did not prescribe that women should succeed to their father's estate except in default of male issue: failing which it was necessary that succession should be granted to the female line in order to comfort the father, who would have been sad to think that his estate would pass to strangers. Nevertheless the Law observed due caution in the matter, by providing that those women who succeeded to their father's estate, should marry within their own tribe, in order to avoid confusion of tribal possessions, as stated in Num. 36:7,8.

Reply to Objection 3. As the Philosopher says (Polit. ii, 4), the regulation of possessions conduces much to the preservation of a state or nation. Consequently, as he himself observes, it was forbidden by the law in some of the heathen states, "that anyone should sell his possessions, except to avoid a manifest loss." For if possessions were to be sold indiscriminately, they might happen to come into the hands of a few: so that it might become necessary for a state or country to become void of inhabitants. Hence the Old Law, in order to remove this danger, ordered things in such a way that while provision was made for men's needs, by allowing the sale of possessions to avail for a certain period, at the same time the said danger was removed, by prescribing the return of those possessions after that period had elapsed. The reason for this law was to prevent confusion of possessions, and to ensure the continuance of a definite distinction among the tribes.

But as the town houses were not allotted to distinct estates, therefore the Law allowed them to be sold in perpetuity, like movable goods. Because the number of houses in a town was not fixed, whereas there was a fixed limit to the amount of estates, which could not be exceeded, while the number of houses in a town could be increased. On the other hand, houses situated not in a town, but "in a village that hath no walls," could not be sold in perpetuity: because such houses are built merely with a view to the cultivation and care of possessions; wherefore the Law rightly made the same prescription

in regard to both (Lev. 25).

Reply to Objection 4. As stated above (ad 1), the purpose of the Law was to accustom men to its precepts, so as to be ready to come to one another's assistance: because this is a very great incentive to friendship. The Law granted these facilities for helping others in the matter not only of gratuitous and absolute donations, but also of mutual transfers: because the latter kind of succor is more frequent and benefits the greater number: and it granted facilities for this purpose in many ways. First of all by prescribing that men should be ready to lend, and that they should not be less inclined to do so as the year of remission drew nigh, as stated in Dt. 15:7, seqq. Secondly, by forbidding them to burden a man to whom they might grant a loan, either by exacting usury, or by accepting necessities of life in security; and by prescribing that when this had been done they should be restored at once. For it is written (Dt. 23:19): "Thou shalt not lend to thy brother money to usury": and (Dt. 24:6): "Thou shalt not take the nether nor the upper millstone to pledge; for he hath pledged his life to thee": and (Ex. 22:26): "If thou take of thy neighbor a garment in pledge, thou shalt give it him again before sunset." Thirdly, by forbidding them to be importunate in exacting payment. Hence it is written (Ex. 22:25): "If thou lend money to any of my people that is poor that dwelleth with thee, thou shalt not be hard upon them as an extortioner." For this reason, too, it is enacted (Dt. 24:10,11): "When thou shalt demand of thy neighbor anything that he oweth thee, thou shalt not go into his house to take away a pledge, but thou shalt stand without, and he shall bring out to thee what he hath": both because a man's house is his surest refuge, wherefore it is offensive to a man to be set upon in his own house; and because the Law does not allow the creditor to take away whatever he likes in security, but rather permits the debtor to give what he needs least. Fourthly, the Law prescribed that debts should cease together after the lapse of seven years. For it was probable that those who could conveniently pay their debts, would do so before the seventh year, and would not defraud the lender without cause. But if they were altogether insolvent, there was the same reason for remitting the debt from love for them, as there was for renewing the loan on account of their need.

As regards animals granted in loan, the Law enacted that if, through the neglect of the person to whom they were lent, they perished or deteriorated in his absence, he was bound to make restitution. But if they perished or deteriorated while he was present and taking proper care of them, he was not bound to make restitution, especially if they were hired for a consideration: because they might have died or deteriorated in the same way if they had remained in possession of the lender, so that if the animal had been saved through being lent, the lender would have gained something by the loan which would no longer have been gratuitous. And especially was this to be observed when animals were hired for a consider-

ation: because then the owner received a certain price for the use of the animals; wherefore he had no right to any profit, by receiving indemnity for the animal, unless the person who had charge of it were negligent. In the case, however, of animals not hired for a consideration, equity demanded that he should receive something by way of restitution at least to the value of the hire of the animal that had perished or deteriorated.

Reply to Objection 5. The difference between a loan and a deposit is that a loan is in respect of goods transferred for the use of the person to whom they are transferred, whereas a deposit is for the benefit of the depositor. Hence in certain cases there was a stricter obligation of returning a loan than of restoring goods held in deposit. Because the latter might be lost in two ways. First, unavoidably: i.e. either through a natural cause, for instance if an animal held in deposit were to die or depreciate in value; or through an extrinsic cause, for instance, if it were taken by an enemy, or devoured by a beast (in which case, however, a man was bound to restore to the owner what was left of the animal thus slain): whereas in the other cases mentioned above, he was not bound to make restitution; but only to take an oath in order to clear himself of suspicion. Secondly, the goods deposited might be lost through an avoidable cause, for instance by theft: and then the depositary was bound to restitution on account of his neglect. But, as stated above (ad 4), he who held an animal on loan, was bound to restitution, even if he were absent when it depreciated or died: because he was held responsible for less negligence than a depositary, who was only held responsible in case of theft.

Reply to Objection 6. Workmen who offer their labor for hire, are poor men who toil for their daily bread: and therefore the Law commanded wisely that they should be paid at once, lest they should lack food. But they who offer other commodities for hire, are wont to be rich: nor are they in such need of their price in order to gain a livelihood: and consequently the comparison does not hold.

Reply to Objection 7. The purpose for which judges are appointed among men, is that they may decide doubtful points in matters of justice. Now a matter may be doubtful in two ways. First, among simple-minded people: and in order to remove doubts of this kind, it was prescribed (Dt. 16:18) that “judges and magistrates” should be appointed in each tribe, “to judge the people with just judgment.” Secondly, a matter may be doubtful even among experts: and therefore, in order to remove doubts of this kind, the Law prescribed that all should foregather in some chief place chosen by God, where there would be both the high-priest, who would decide doubtful matters relating to the ceremonies of divine worship; and the chief judge of the people, who would decide matters relating to the judgments of men: just as even now cases are taken from a lower to a higher court either by appeal or by consultation. Hence it is written (Dt. 17:8,9): “If thou

perceive that there be among you a hard and doubtful matter in judgment. . . and thou see that the words of the judges within thy gates do vary; arise and go up to the place, which the Lord thy God shall choose; and thou shalt come to the priests of the Levitical race, and to the judge that shall be at that time.” But such like doubtful matters did not often occur for judgment: wherefore the people were not burdened on this account.

Reply to Objection 8. In the business affairs of men, there is no such thing as demonstrative and infallible proof, and we must be content with a certain conjectural probability, such as that which an orator employs to persuade. Consequently, although it is quite possible for two or three witnesses to agree to a falsehood, yet it is neither easy nor probable that they succeed in so doing: wherefore their testimony is taken as being true, especially if they do not waver in giving it, or are not otherwise suspect. Moreover, in order that witnesses might not easily depart from the truth, the Law commanded that they should be most carefully examined, and that those who were found untruthful should be severely punished, as stated in Dt. 19:16, seqq.

There was, however, a reason for fixing on this particular number, in token of the unerring truth of the Divine Persons, Who are sometimes mentioned as two, because the Holy Ghost is the bond of the other two Persons; and sometimes as three: as Augustine observes on Jn. 8:17: “In your law it is written that the testimony of two men is true.”

Reply to Objection 9. A severe punishment is inflicted not only on account of the gravity of a fault, but also for other reasons. First, on account of the greatness of the sin, because a greater sin, other things being equal, deserves a greater punishment. Secondly, on account of a habitual sin, since men are not easily cured of habitual sin except by severe punishments. Thirdly, on account of a great desire for or a great pleasure in the sin: for men are not easily deterred from such sins unless they be severely punished. Fourthly, on account of the facility of committing a sin and of concealing it: for such like sins, when discovered, should be more severely punished in order to deter others from committing them.

Again, with regard to the greatness of a sin, four degrees may be observed, even in respect of one single deed. The first is when a sin is committed unwillingly; because then, if the sin be altogether involuntary, man is altogether excused from punishment; for it is written (Dt. 22:25, seqq.) that a damsel who suffers violence in a field is not guilty of death, because “she cried, and there was no man to help her.” But if a man sinned in any way voluntarily, and yet through weakness, as for instance when a man sins from passion, the sin is diminished: and the punishment, according to true judgment, should be diminished also; unless perchance the common weal requires that the sin be severely punished in order to deter others from committing such sins, as stated above. The second degree is when a man sins

through ignorance: and then he was held to be guilty to a certain extent, on account of his negligence in acquiring knowledge: yet he was not punished by the judges but expiated his sin by sacrifices. Hence it is written (Lev. 4:2): “The soul that sinneth through ignorance,” etc. This is, however, to be taken as applying to ignorance of fact; and not to ignorance of the Divine precept, which all were bound to know. The third degree was when a man sinned from pride, i.e. through deliberate choice or malice: and then he was punished according to the greatness of the sin*. The fourth degree was when a man sinned from stubbornness or obstinacy: and then he was to be utterly cut off as a rebel and a destroyer of the commandment of the Law†.

Accordingly we must say that, in appointing the punishment for theft, the Law considered what would be likely to happen most frequently (Ex. 22:1-9): wherefore, as regards theft of other things which can easily be safeguarded from a thief, the thief restored only twice their value. But sheep cannot be easily safeguarded from a thief, because they graze in the fields: wherefore it happened more frequently that sheep were stolen in the fields. Consequently the Law inflicted a heavier penalty, by ordering four sheep to be restored for the theft of one. As to cattle, they were yet more difficult to safeguard, because they are kept in the fields, and do not graze in flocks as sheep do; wherefore a yet more heavy penalty was inflicted in their regard, so that five oxen were to be restored for one ox. And this I say, unless perchance the animal itself were discovered in the thief’s possession: because in that case he had to restore only twice the number, as in the case of other thefts: for there was reason to presume that he intended to restore the animal, since he kept it alive. Again, we might say, according to a gloss, that “a cow is useful in five ways: it may be used for sacrifice, for ploughing, for food, for milk, and its hide is employed for various purposes”: and therefore for one cow five had to be restored. But the sheep was useful in four ways: “for sacrifice, for meat, for milk, and for its wool.” The unruly son was slain, not because he ate and drank: but on account of his stubbornness and rebellion, which was always punished by death, as stated above. As to the man who gathered sticks on the sabbath, he was stoned as a breaker of the Law, which commanded the sabbath to be observed, to testify the belief in the newness of the world, as stated above (q. 100, a. 5): wherefore he was slain as an unbeliever.

Reply to Objection 10. The Old Law inflicted the death penalty for the more grievous crimes, viz. for those which are committed against God, and for murder, for stealing a man, irreverence towards one’s parents, adultery and incest. In the case of thief of other things it inflicted punishment by indemnification: while in the case of blows and mutilation it authorized punishment by retaliation; and likewise for the sin of bearing false witness. In other faults of less degree it prescribed

the punishment of stripes or of public disgrace.

The punishment of slavery was prescribed by the Law in two cases. First, in the case of a slave who was unwilling to avail himself of the privilege granted by the Law, whereby he was free to depart in the seventh year of remission: wherefore he was punished by remaining a slave for ever. Secondly, in the case of a thief, who had not wherewith to make restitution, as stated in Ex. 22:3.

The punishment of absolute exile was not prescribed by the Law: because God was worshipped by that people alone, whereas all other nations were given to idolatry: wherefore if any man were exiled from that people absolutely, he would be in danger of falling into idolatry. For this reason it is related (1 Kings 26:19) that David said to Saul: “They are cursed in the sight of the Lord, who have cast me out this day, that I should not dwell in the inheritance of the Lord, saying: Go, serve strange gods.” There was, however, a restricted sort of exile: for it is written in Dt. 19:4* that “he that striketh [Vulg.: ‘killeth’] his neighbor ignorantly, and is proved to have had no hatred against him, shall flee to one of the cities” of refuge and “abide there until the death of the high-priest.” For then it became lawful for him to return home, because when the whole people thus suffered a loss they forgot their private quarrels, so that the next of kin of the slain were not so eager to kill the slayer.

Reply to Objection 11. Dumb animals were ordered to be slain, not on account of any fault of theirs; but as a punishment to their owners, who had not safeguarded their beasts from these offenses. Hence the owner was more severely punished if his ox had butted anyone “yesterday or the day before” (in which case steps might have been taken to butting suddenly). Or again, the animal was slain in detestation of the sin; and lest men should be horrified at the sight thereof.

Reply to Objection 12. The literal reason for this commandment, as Rabbi Moses declares (Doct. Perplex. iii), was because the slayer was frequently from the nearest city: wherefore the slaying of the calf was a means of investigating the hidden murder. This was brought about in three ways. In the first place the elders of the city swore that they had taken every measure for safeguarding the roads. Secondly, the owner of the heifer was indemnified for the slaying of his beast, and if the murder was previously discovered, the beast was not slain. Thirdly, the place, where the heifer was slain, remained uncultivated. Wherefore, in order to avoid this twofold loss, the men of the city would readily make known the murderer, if they knew who he was: and it would seldom happen but that some word or sign would escape about the matter. Or again, this was done in order to frighten people, in detestation of murder. Because the slaying of a heifer, which is a useful animal and full of strength, especially before it has been put under the yoke, signified that whoever committed murder, how-

* Cf. Dt. 25:2 † Cf. Num. 15:30,31 * Cf. Num. 35:25

ever useful and strong he might be, was to forfeit his life; and that, by a cruel death, which was implied by the striking off of its head; and that the murderer, as vile and abject, was to be cut off from the fellowship of men, which was betokened by the fact that the heifer after being slain was left to rot in a rough and uncultivated place.

Mystically, the heifer taken from the herd signifies the flesh of Christ; which had not drawn a yoke, since it had done no sin; nor did it plough the ground, i.e. it never knew the stain of revolt. The fact of the heifer being killed in an uncultivated valley signified the despised death of Christ, whereby all sins are washed away, and the devil is shown to be the arch-murderer.

Whether the judicial precepts regarding foreigners were framed in a suitable manner? Ia IIae q. 105 a. 3

Objection 1. It would seem that the judicial precepts regarding foreigners were not suitably framed. For Peter said (Acts 10:34,35): "In very deed I perceive that God is not a respecter of persons, but in every nation, he that feareth Him and worketh justice is acceptable to Him." But those who are acceptable to God should not be excluded from the Church of God. Therefore it is unsuitably commanded (Dt. 23:3) that "the Ammonite and the Moabite, even after the tenth generation, shall not enter into the church of the Lord for ever": whereas, on the other hand, it is prescribed (Dt. 23:7) to be observed with regard to certain other nations: "Thou shalt not abhor the Edomite, because he is thy brother; nor the Egyptian because thou wast a stranger in his land."

Objection 2. Further, we do not deserve to be punished for those things which are not in our power. But it is not in man's power to be an eunuch, or born of a prostitute. Therefore it is unsuitably commanded (Dt. 23:1,2) that "an eunuch and one born of a prostitute shalt not enter into the church of the Lord."

Objection 3. Further, the Old Law mercifully forbade strangers to be molested: for it is written (Ex. 22:21): "Thou shalt not molest a stranger, nor afflict him; for yourselves also were strangers in the land of Egypt": and (Ex. 23:9): "Thou shalt not molest a stranger, for you know the hearts of strangers, for you also were strangers in the land of Egypt." But it is an affliction to be burdened with usury. Therefore the Law unsuitably permitted them (Dt. 23:19,20) to lend money to the stranger for usury.

Objection 4. Further, men are much more akin to us than trees. But we should show greater care and love for these things that are nearest to us, according to Eccles. 13:19: "Every beast loveth its like: so also every man him that is nearest to himself." Therefore the Lord unsuitably commanded (Dt. 20:13-19) that all the inhabitants of a captured hostile city were to be slain, but that the fruit-trees should not be cut down.

Objection 5. Further, every one should prefer the common good of virtue to the good of the individual. But the common good is sought in a war which men fight against their enemies. Therefore it is unsuitably commanded (Dt. 20:5-7) that certain men should be sent home, for instance a man that had built a new house, or who had planted a vineyard, or who had married a wife.

Objection 6. Further, no man should profit by his own fault. But it is a man's fault if he be timid or faint-hearted: since this is contrary to the virtue of fortitude. Therefore the timid and faint-hearted are unfittingly excluded from the toil of battle (Dt. 20:8).

On the contrary, Divine Wisdom declares (Prov. 8:8): "All my words are just, there is nothing wicked nor perverse in them."

I answer that, Man's relations with foreigners are twofold: peaceful, and hostile: and in directing both kinds of relation the Law contained suitable precepts. For the Jews were offered three opportunities of peaceful relations with foreigners. First, when foreigners passed through their land as travelers. Secondly, when they came to dwell in their land as newcomers. And in both these respects the Law made kind provision in its precepts: for it is written (Ex. 22:21): "Thou shalt not molest a stranger [advenam]"; and again (Ex. 22:9): "Thou shalt not molest a stranger [peregrino]." Thirdly, when any foreigners wished to be admitted entirely to their fellowship and mode of worship. With regard to these a certain order was observed. For they were not at once admitted to citizenship: just as it was law with some nations that no one was deemed a citizen except after two or three generations, as the Philosopher says (Polit. iii, 1). The reason for this was that if foreigners were allowed to meddle with the affairs of a nation as soon as they settled down in its midst, many dangers might occur, since the foreigners not yet having the common good firmly at heart might attempt something hurtful to the people. Hence it was that the Law prescribed in respect of certain nations that had close relations with the Jews (viz., the Egyptians among whom they were born and educated, and the Idumeans, the children of Esau, Jacob's brother), that they should be admitted to the fellowship of the people after the third generation; whereas others (with whom their relations had been hostile, such as the Ammonites and Moabites) were never to be admitted to citizenship; while the Amalekites, who were yet more hostile to them, and had no fellowship of kindred with them, were to be held as foes in perpetuity: for it is written (Ex. 17:16): "The war of the Lord shall be against Amalec from generation to generation."

In like manner with regard to hostile relations with foreigners, the Law contained suitable precepts. For, in the first place, it commanded that war should be de-

clared for a just cause: thus it is commanded (Dt. 20:10) that when they advanced to besiege a city, they should at first make an offer of peace. Secondly, it enjoined that when once they had entered on a war they should undauntedly persevere in it, putting their trust in God. And in order that they might be the more heedful of this command, it ordered that on the approach of battle the priest should hearten them by promising them God's aid. Thirdly, it prescribed the removal of whatever might prove an obstacle to the fight, and that certain men, who might be in the way, should be sent home. Fourthly, it enjoined that they should use moderation in pursuing the advantage of victory, by sparing women and children, and by not cutting down fruit-trees of that country.

Reply to Objection 1. The Law excluded the men of no nation from the worship of God and from things pertaining to the welfare of the soul: for it is written (Ex. 12:48): "If any stranger be willing to dwell among you, and to keep the Phase of the Lord; all his males shall first be circumcised, and then shall he celebrate it according to the manner, and he shall be as that which is born in the land." But in temporal matters concerning the public life of the people, admission was not granted to everyone at once, for the reason given above: but to some, i.e. the Egyptians and Idumeans, in the third generation; while others were excluded in perpetuity, in detestation of their past offense, i.e. the peoples of Moab, Ammon, and Amalec. For just as one man is punished for a sin committed by him, in order that others seeing this may be deterred and refrain from sinning; so too may one nation or city be punished for a crime, that others may refrain from similar crimes.

Nevertheless it was possible by dispensation for a man to be admitted to citizenship on account of some act of virtue: thus it is related (Judith 14:6) that Achior, the captain of the children of Ammon, "was joined to the people of Israel, with all the succession of his kindred." The same applies to Ruth the Moabite who was "a virtuous woman" (Ruth 3:11): although it may be said that this prohibition regarded men and not women, who are not competent to be citizens absolutely speaking.

Reply to Objection 2. As the Philosopher says (Polit. iii, 3), a man is said to be a citizen in two ways: first, simply; secondly, in a restricted sense. A man is a citizen simply if he has all the rights of citizenship, for instance, the right of debating or voting in the popular assembly. On the other hand, any man may be called citizen, only in a restricted sense, if he dwells within the state, even common people or children or old men, who are not fit to enjoy power in matters pertaining to the common weal. For this reason bastards, by reason of their base origin, were excluded from the "ecclesia," i.e. from the popular assembly, down to the tenth generation. The same applies to eunuchs, who were not com-

petent to receive the honor due to a father, especially among the Jews, where the divine worship was continued through carnal generation: for even among the heathens, those who had many children were marked with special honor, as the Philosopher remarks (Polit. ii, 6). Nevertheless, in matters pertaining to the grace of God, eunuchs were not discriminated from others, as neither were strangers, as already stated: for it is written (Isa. 56:3): "Let not the son of the stranger that adhereth to the Lord speak, saying: The Lord will divide and separate me from His people. And let not the eunuch say: Behold I am a dry tree."

Reply to Objection 3. It was not the intention of the Law to sanction the acceptance of usury from strangers, but only to tolerate it on account of the proneness of the Jews to avarice; and in order to promote an amicable feeling towards those out of whom they made a profit.

Reply to Objection 4. A distinction was observed with regard to hostile cities. For some of them were far distant, and were not among those which had been promised to them. When they had taken these cities, they killed all the men who had fought against God's people; whereas the women and children were spared. But in the neighboring cities which had been promised to them, all were ordered to be slain, on account of their former crimes, to punish which God sent the Israelites as executor of Divine justice: for it is written (Dt. 9:5) "because they have done wickedly, they are destroyed at thy coming in." The fruit-trees were commanded to be left untouched, for the use of the people themselves, to whom the city with its territory was destined to be subjected.

Reply to Objection 5. The builder of a new house, the planter of a vineyard, the newly married husband, were excluded from fighting, for two reasons. First, because man is wont to give all his affection to those things which he has lately acquired, or is on the point of having, and consequently he is apt to dread the loss of these above other things. Wherefore it was likely enough that on account of this affection they would fear death all the more, and be so much the less brave in battle. Secondly, because, as the Philosopher says (Phys. ii, 5), "it is a misfortune for a man if he is prevented from obtaining something good when it is within his grasp." And so lest the surviving relations should be the more grieved at the death of these men who had not entered into the possession of the good things prepared for them; and also lest the people should be horror-stricken at the sight of their misfortune: these men were taken away from the danger of death by being removed from the battle.

Reply to Objection 6. The timid were sent back home, not that they might be the gainers thereby; but lest the people might be the losers by their presence, since their timidity and flight might cause others to be afraid and run away.

Objection 1. It would seem that the Old Law set forth unsuitable precepts about the members of the household. For a slave “is in every respect his master’s property,” as the Philosopher states (Polit. i, 2). But that which is a man’s property should be his always. Therefore it was unfitting for the Law to command (Ex. 21:2) that slaves should “go out free” in the seventh year.

Objection 2. Further, a slave is his master’s property, just as an animal, e.g. an ass or an ox. But it is commanded (Dt. 22:1-3) with regard to animals, that they should be brought back to the owner if they be found going astray. Therefore it was unsuitably commanded (Dt. 23:15): “Thou shalt not deliver to his master the servant that is fled to thee.”

Objection 3. Further, the Divine Law should encourage mercy more even than the human law. But according to human laws those who ill-treat their servants and maidservants are severely punished: and the worse treatment of all seems to be that which results in death. Therefore it is unfittingly commanded (Ex. 21:20,21) that “he that striketh his bondman or bondwoman with a rod, and they die under his hands. . . if the party remain alive a day. . . he shall not be subject to the punishment, because it is his money.”

Objection 4. Further, the dominion of a master over his slave differs from that of the father over his son (Polit. i, 3). But the dominion of master over slave gives the former the right to sell his servant or maidservant. Therefore it was unfitting for the Law to allow a man to sell his daughter to be a servant or handmaid (Ex. 21:7).

Objection 5. Further, a father has power over his son. But he who has power over the sinner has the right to punish him for his offenses. Therefore it is unfittingly commanded (Dt. 21:18, seqq.) that a father should bring his son to the ancients of the city for punishment.

Objection 6. Further, the Lord forbade them (Dt. 7:3, seqq.) to make marriages with strange nations; and commanded the dissolution of such as had been contracted (1 Esdras 10). Therefore it was unfitting to allow them to marry captive women from strange nations (Dt. 21:10, seqq.).

Objection 7. Further, the Lord forbade them to marry within certain degrees of consanguinity and affinity, according to Lev. 18. Therefore it was unsuitably commanded (Dt. 25:5) that if any man died without issue, his brother should marry his wife.

Objection 8. Further, as there is the greatest familiarity between man and wife, so should there be the staunchest fidelity. But this is impossible if the marriage bond can be sundered. Therefore it was unfitting for the Lord to allow (Dt. 24:1-4) a man to put his wife away, by writing a bill of divorce; and besides, that he could not take her again to wife.

Objection 9. Further, just as a wife can be faithless to her husband, so can a slave be to his master, and a

son to his father. But the Law did not command any sacrifice to be offered in order to investigate the injury done by a servant to his master, or by a son to his father. Therefore it seems to have been superfluous for the Law to prescribe the “sacrifice of jealousy” in order to investigate a wife’s adultery (Num. 5:12, seqq.). Consequently it seems that the Law put forth unsuitable judicial precepts about the members of the household.

On the contrary, It is written (Ps. 18:10): “The judgments of the Lord are true, justified in themselves.”

I answer that, The mutual relations of the members of a household regard everyday actions directed to the necessities of life, as the Philosopher states (Polit. i, 1). Now the preservation of man’s life may be considered from two points of view. First, from the point of view of the individual, i.e. in so far as man preserves his individuality: and for the purpose of the preservation of life, considered from this standpoint, man has at his service external goods, by means of which he provides himself with food and clothing and other such necessities of life: in the handling of which he has need of servants. Secondly man’s life is preserved from the point of view of the species, by means of generation, for which purpose man needs a wife, that she may bear him children. Accordingly the mutual relations of the members of a household admit of a threefold combination: viz. those of master and servant, those of husband and wife, and those of father and son: and in respect of all these relationships the Old Law contained fitting precepts. Thus, with regard to servants, it commanded them to be treated with moderation—both as to their work, lest, to wit, they should be burdened with excessive labor, wherefore the Lord commanded (Dt. 5:14) that on the Sabbath day “thy manservant and thy maidservant” should “rest even as thyself”—and also as to the infliction of punishment, for it ordered those who maimed their servants, to set them free (Ex. 21:26,27). Similar provision was made in favor of a maidservant when married to anyone (Ex. 21:7, seqq.). Moreover, with regard to those servants in particular who were taken from among the people, the Law prescribed that they should go out free in the seventh year taking whatever they brought with them, even their clothes (Ex. 21:2, seqq.): and furthermore it was commanded (Dt. 15:13) that they should be given provision for the journey.

With regard to wives the Law made certain prescriptions as to those who were to be taken in marriage: for instance, that they should marry a wife from their own tribe (Num. 36:6): and this lest confusion should ensue in the property of various tribes. Also that a man should marry the wife of his deceased brother when the latter died without issue, as prescribed in Dt. 25:5,6: and this in order that he who could not have successors according to carnal origin, might at least have them by a kind of adoption, and that thus the deceased might not

be entirely forgotten. It also forbade them to marry certain women; to wit, women of strange nations, through fear of their losing their faith; and those of their near kindred, on account of the natural respect due to them. Furthermore it prescribed in what way wives were to be treated after marriage. To wit, that they should not be slandered without grave reason: wherefore it ordered punishment to be inflicted on the man who falsely accused his wife of a crime (Dt. 22:13, seqq.). Also that a man's hatred of his wife should not be detrimental to his son (Dt. 21:15, seqq.). Again, that a man should not ill-use his wife through hatred of her, but rather that he should write a bill of divorce and send her away (Dt. 24:1). Furthermore, in order to foster conjugal love from the very outset, it was prescribed that no public duties should be laid on a recently married man, so that he might be free to rejoice with his wife.

With regard to children, the Law commanded parents to educate them by instructing them in the faith: hence it is written (Ex. 12:26, seqq.): "When your children shall say to you: What is the meaning of this service? You shall say to them: It is the victim of the passage of the Lord." Moreover, they are commanded to teach them the rules of right conduct: wherefore it is written (Dt. 21:20) that the parents had to say: "He slighteth hearing our admonitions, he giveth himself to revelling and to debauchery."

Reply to Objection 1. As the children of Israel had been delivered by the Lord from slavery, and for this reason were bound to the service of God, He did not wish them to be slaves in perpetuity. Hence it is written (Lev. 25:39, seqq.): "If thy brother, constrained by poverty, sell himself to thee, thou shalt not oppress him with the service of bondservants: but he shall be as a hireling and a sojourner. . . for they are My servants, and I brought them out of the land of Egypt: let them not be sold as bondmen": and consequently, since they were slaves, not absolutely but in a restricted sense, after a lapse of time they were set free.

Reply to Objection 2. This commandment is to be understood as referring to a servant whom his master seeks to kill, or to help him in committing some sin.

Reply to Objection 3. With regard to the ill-treatment of servants, the Law seems to have taken into consideration whether it was certain or not: since if it were certain, the Law fixed a penalty: for maiming, the penalty was forfeiture of the servant, who was ordered to be given his liberty: while for slaying, the punishment was that of a murderer, when the slave died under the blow of his master. If, however, the hurt was not certain, but only probable, the Law did not impose any penalty as regards a man's own servant: for instance if the servant did not die at once after being struck, but after some days: for it would be uncertain whether he died as a result of the blows he received. For when a man struck a free man, yet so that he did not die at once, but "walked abroad again upon his staff," he that struck him was quit of murder, even though afterwards he died.

Nevertheless he was bound to pay the doctor's fees incurred by the victim of his assault. But this was not the case if a man killed his own servant: because whatever the servant had, even his very person, was the property of his master. Hence the reason for his not being subject to a pecuniary penalty is set down as being "because it is his money."

Reply to Objection 4. As stated above (ad 1), no Jew could own a Jew as a slave absolutely: but only in a restricted sense, as a hireling for a fixed time. And in this way the Law permitted that through stress of poverty a man might sell his son or daughter. This is shown by the very words of the Law, where we read: "If any man sell his daughter to be a servant, she shall not go out as bondwomen are wont to go out." Moreover, in this way a man might sell not only his son, but even himself, rather as a hireling than as a slave, according to Lev. 25:39,40: "If thy brother, constrained by poverty, sell himself to thee, thou shalt not oppress him with the service of bondservants: but he shall be as a hireling and a sojourner."

Reply to Objection 5. As the Philosopher says (Ethic. x, 9), the paternal authority has the power only of admonition; but not that of coercion, whereby rebellious and headstrong persons can be compelled. Hence in this case the Lord commanded the stubborn son to be punished by the rulers of the city.

Reply to Objection 6. The Lord forbade them to marry strange women on account of the danger of seduction, lest they should be led astray into idolatry. And specially did this prohibition apply with respect to those nations who dwelt near them, because it was more probable that they would adopt their religious practices. When, however, the woman was willing to renounce idolatry, and become an adherent of the Law, it was lawful to take her in marriage: as was the case with Ruth whom Booz married. Wherefore she said to her mother-in-law (Ruth 1:16): "Thy people shall be my people, and thy God my God." Accordingly it was not permitted to marry a captive woman unless she first shaved her hair, and pared her nails, and put off the raiment wherein she was taken, and mourned for her father and mother, in token that she renounced idolatry for ever.

Reply to Objection 7. As Chrysostom says (Hom. xlviii super Matth.), "because death was an unmitigated evil for the Jews, who did everything with a view to the present life, it was ordained that children should be born to the dead man through his brother: thus affording a certain mitigation to his death. It was not, however, ordained that any other than his brother or one next of kin should marry the wife of the deceased, because" the offspring of this union "would not be looked upon as that of the deceased: and moreover, a stranger would not be under the obligation to support the household of the deceased, as his brother would be bound to do from motives of justice on account of his relationship." Hence it is evident that in marrying the wife of his dead brother, he took his dead brother's place.

Reply to Objection 8. The Law permitted a wife to be divorced, not as though it were just absolutely speaking, but on account of the Jews' hardness of heart, as Our Lord declared (Mat. 19:8). Of this, however, we must speak more fully in the treatise on Matrimony (Suppl., q. 67).

Reply to Objection 9. Wives break their conjugal

faith by adultery, both easily, for motives of pleasure, and hiddenly, since "the eye of the adulterer observeth darkness" (Job 24:15). But this does not apply to a son in respect of his father, or to a servant in respect of his master: because the latter infidelity is not the result of the lust of pleasure, but rather of malice: nor can it remain hidden like the infidelity of an adulterous woman.

Objection 1. It would seem that the Old Law made unfitting precepts concerning rulers. Because, as the Philosopher says (Polit. iii, 4), “the ordering of the people depends mostly on the chief ruler.” But the Law contains no precept relating to the institution of the chief ruler; and yet we find therein prescriptions concerning the inferior rulers: firstly (Ex. 18:21): “Provide out of all the people wise [Vulg.: ‘able’] men,” etc.; again (Num. 11:16): “Gather unto Me seventy men of the ancients of Israel”; and again (Dt. 1:13): “Let Me have from among you wise and understanding men,” etc. Therefore the Law provided insufficiently in regard to the rulers of the people.

Objection 2. Further, “The best gives of the best,” as Plato states (Tim. ii). Now the best ordering of a state or of any nation is to be ruled by a king: because this kind of government approaches nearest in resemblance to the Divine government, whereby God rules the world from the beginning. Therefore the Law should have set a king over the people, and they should not have been allowed a choice in the matter, as indeed they were allowed (Dt. 17:14,15): “When thou... shalt say: I will set a king over me... thou shalt set him,” etc.

Objection 3. Further, according to Mat. 12:25: “Every kingdom divided against itself shall be made desolate”: a saying which was verified in the Jewish people, whose destruction was brought about by the division of the kingdom. But the Law should aim chiefly at things pertaining to the general well-being of the people. Therefore it should have forbidden the kingdom to be divided under two kings: nor should this have been introduced even by Divine authority; as we read of its being introduced by the authority of the prophet Ahias the Silonite (3 Kings 11:29, seqq.).

Objection 4. Further, just as priests are instituted for the benefit of the people in things concerning God, as stated in Heb. 5:1; so are rulers set up for the benefit of the people in human affairs. But certain things were allotted as a means of livelihood for the priests and Levites of the Law: such as the tithes and first-fruits, and many like things. Therefore in like manner certain things should have been determined for the livelihood of the rulers of the people: the more that they were forbidden to accept presents, as is clearly stated in Ex. 23:8: “You shall not [Vulg.: ‘Neither shalt thou’] take bribes, which even blind the wise, and pervert the words of the just.”

Objection 5. Further, as a kingdom is the best form of government, so is tyranny the most corrupt. But when the Lord appointed the king, He established a tyrannical law; for it is written (1 Kings 8:11): “This will be the right of the king, that shall reign over you: He will take your sons,” etc. Therefore the Law made unfitting provision with regard to the institution of rulers.

On the contrary, The people of Israel is com-

mended for the beauty of its order (Num. 24:5): “How beautiful are thy tabernacles, O Jacob, and thy tents.” But the beautiful ordering of a people depends on the right establishment of its rulers. Therefore the Law made right provision for the people with regard to its rulers.

I answer that, Two points are to be observed concerning the right ordering of rulers in a state or nation. One is that all should take some share in the government: for this form of constitution ensures peace among the people, commends itself to all, and is most enduring, as stated in Polit. ii, 6. The other point is to be observed in respect of the kinds of government, or the different ways in which the constitutions are established. For whereas these differ in kind, as the Philosopher states (Polit. iii, 5), nevertheless the first place is held by the “kingdom,” where the power of government is vested in one; and “aristocracy,” which signifies government by the best, where the power of government is vested in a few. Accordingly, the best form of government is in a state or kingdom, where one is given the power to preside over all; while under him are others having governing powers: and yet a government of this kind is shared by all, both because all are eligible to govern, and because the rules are chosen by all. For this is the best form of polity, being partly kingdom, since there is one at the head of all; partly aristocracy, in so far as a number of persons are set in authority; partly democracy, i.e. government by the people, in so far as the rulers can be chosen from the people, and the people have the right to choose their rulers.

Such was the form of government established by the Divine Law. For Moses and his successors governed the people in such a way that each of them was ruler over all; so that there was a kind of kingdom. Moreover, seventy-two men were chosen, who were elders in virtue: for it is written (Dt. 1:15): “I took out of your tribes wise and honorable, and appointed them rulers”: so that there was an element of aristocracy. But it was a democratical government in so far as the rulers were chosen from all the people; for it is written (Ex. 18:21): “Provide out of all the people wise [Vulg.: ‘able’] men,” etc.; and, again, in so far as they were chosen by the people; wherefore it is written (Dt. 1:13): “Let me have from among you wise [Vulg.: ‘able’] men,” etc. Consequently it is evident that the ordering of the rulers was well provided for by the Law.

Reply to Objection 1. This people was governed under the special care of God: wherefore it is written (Dt. 7:6): “The Lord thy God hath chosen thee to be His peculiar people”: and this is why the Lord reserved to Himself the institution of the chief ruler. For this too did Moses pray (Num. 27:16): “May the Lord the God of the spirits of all the flesh provide a man, that may be over this multitude.” Thus by God’s orders Josue was set at the head in place of Moses; and

we read about each of the judges who succeeded Josue that God “raised. . . up a saviour” for the people, and that “the spirit of the Lord was” in them (Judges 3:9,10,15). Hence the Lord did not leave the choice of a king to the people; but reserved this to Himself, as appears from Dt. 17:15: “Thou shalt set him whom the Lord thy God shall choose.”

Reply to Objection 2. A kingdom is the best form of government of the people, so long as it is not corrupt. But since the power granted to a king is so great, it easily degenerates into tyranny, unless he to whom this power is given be a very virtuous man: for it is only the virtuous man that conducts himself well in the midst of prosperity, as the Philosopher observes (Ethic. iv, 3). Now perfect virtue is to be found in few: and especially were the Jews inclined to cruelty and avarice, which vices above all turn men into tyrants. Hence from the very first the Lord did not set up the kingly authority with full power, but gave them judges and governors to rule them. But afterwards when the people asked Him to do so, being indignant with them, so to speak, He granted them a king, as is clear from His words to Samuel (1 Kings 8:7): “They have not rejected thee, but Me, that I should not reign over them.”

Nevertheless, as regards the appointment of a king, He did establish the manner of election from the very beginning (Dt. 17:14, seqq.): and then He determined two points: first, that in choosing a king they should wait for the Lord’s decision; and that they should not make a man of another nation king, because such kings are wont to take little interest in the people they are set over, and consequently to have no care for their welfare: secondly, He prescribed how the king after his appointment should behave, in regard to himself; namely, that he should not accumulate chariots and horses, nor wives, nor immense wealth: because through craving for such things princes become tyrants and forsake justice. He also appointed the manner in which they were to conduct themselves towards God: namely, that they should continually read and ponder on God’s Law, and should ever fear and obey God. Moreover, He decided how they should behave towards their subjects: namely, that they should not proudly despise them, or ill-treat them, and that they should not depart from the paths of

justice.

Reply to Objection 3. The division of the kingdom, and a number of kings, was rather a punishment inflicted on that people for their many dissensions, specially against the just rule of David, than a benefit conferred on them for their profit. Hence it is written (Osee 13:11): “I will give thee a king in My wrath”; and (Osee 8:4): “They have reigned, but not by Me: they have been princes, and I knew not.”

Reply to Objection 4. The priestly office was bequeathed by succession from father to son: and this, in order that it might be held in greater respect, if not any man from the people could become a priest: since honor was given to them out of reverence for the divine worship. Hence it was necessary to put aside certain things for them both as to tithes and as to first-fruits, and, again, as to oblations and sacrifices, that they might be afforded a means of livelihood. On the other hand, the rulers, as stated above, were chosen from the whole people; wherefore they had their own possessions, from which to derive a living: and so much the more, since the Lord forbade even a king to have superabundant wealth to make too much show of magnificence: both because he could scarcely avoid the excesses of pride and tyranny, arising from such things, and because, if the rulers were not very rich, and if their office involved much work and anxiety, it would not tempt the ambition of the common people; and would not become an occasion of sedition.

Reply to Objection 5. That right was not given to the king by Divine institution: rather was it foretold that kings would usurp that right, by framing unjust laws, and by degenerating into tyrants who preyed on their subjects. This is clear from the context that follows: “And you shall be his slaves [Douay: ‘servants’]”: which is significative of tyranny, since a tyrant rules his subjects as though they were his slaves. Hence Samuel spoke these words to deter them from asking for a king; since the narrative continues: “But the people would not hear the voice of Samuel.” It may happen, however, that even a good king, without being a tyrant, may take away the sons, and make them tribunes and centurions; and may take many things from his subjects in order to secure the common weal.

Objection 1. It would seem that the judicial precepts were not suitably framed as regards the relations of one man with another. Because men cannot live together in peace, if one man takes what belongs to another. But this seems to have been approved by the Law: since it is written (Dt. 23:24): “Going into thy neighbor’s vineyard, thou mayest eat as many grapes as thou pleasest.” Therefore the Old Law did not make suitable provisions for man’s peace.

Objection 2. Further, one of the chief causes of the downfall of states has been the holding of property by women, as the Philosopher says (Polit. ii, 6). But this was introduced by the Old Law; for it is written (Num. 27:8): “When a man dieth without a son, his inheritance shall pass to his daughter.” Therefore the Law made unsuitable provision for the welfare of the people.

Objection 3. Further, it is most conducive to the preservation of human society that men may provide themselves with necessaries by buying and selling, as stated in Polit. i. But the Old Law took away the force of sales; since it prescribes that in the 50th year of the jubilee all that is sold shall return to the vendor (Lev. 25:28). Therefore in this matter the Law gave the people an unfitting command.

Objection 4. Further, man’s needs require that men should be ready to lend: which readiness ceases if the creditors do not return the pledges: hence it is written (Ecclus. 29:10): “Many have refused to lend, not out of wickedness, but they were afraid to be defrauded without cause.” And yet this was encouraged by the Law. First, because it prescribed (Dt. 15:2): “He to whom any thing is owing from his friend or neighbor or brother, cannot demand it again, because it is the year of remission of the Lord”; and (Ex. 22:15) it is stated that if a borrowed animal should die while the owner is present, the borrower is not bound to make restitution. Secondly, because the security acquired through the pledge is lost: for it is written (Dt. 24:10): “When thou shalt demand of thy neighbor any thing that he oweth thee, thou shalt not go into his house to take away a pledge”; and again (Dt. 24:12,13): “The pledge shall not lodge with thee that night, but thou shalt restore it to him presently.” Therefore the Law made insufficient provision in the matter of loans.

Objection 5. Further, considerable risk attaches to goods deposited with a fraudulent depositary: wherefore great caution should be observed in such matters: hence it is stated in 2 Mac. 3:15 that “the priests. . . called upon Him from heaven, Who made the law concerning things given to be kept, that He would preserve them safe, for them that had deposited them.” But the precepts of the Old Law observed little caution in regard to deposits: since it is prescribed (Ex. 22:10,11) that when goods deposited are lost, the owner is to stand by the oath of the depositary. Therefore the

Law made unsuitable provision in this matter.

Objection 6. Further, just as a workman offers his work for hire, so do men let houses and so forth. But there is no need for the tenant to pay his rent as soon as he takes a house. Therefore it seems an unnecessarily hard prescription (Lev. 19:13) that “the wages of him that hath been hired by thee shall not abide with thee until morning.”

Objection 7. Further, since there is often pressing need for a judge, it should be easy to gain access to one. It was therefore unfitting that the Law (Dt. 17:8,9) should command them to go to a fixed place to ask for judgment on doubtful matters.

Objection 8. Further, it is possible that not only two, but three or more, should agree to tell a lie. Therefore it is unreasonably stated (Dt. 19:15) that “in the mouth of two or three witnesses every word shall stand.”

Objection 9. Further, punishment should be fixed according to the gravity of the fault: for which reason also it is written (Dt. 25:2): “According to the measure of the sin, shall the measure also of the stripes be.” Yet the Law fixed unequal punishments for certain faults: for it is written (Ex. 22:1) that the thief “shall restore five oxen for one ox, and four sheep for one sheep.” Moreover, certain slight offenses are severely punished: thus (Num. 15:32, seqq.) a man is stoned for gathering sticks on the sabbath day: and (Dt. 21:18, seqq.) the unruly son is commanded to be stoned on account of certain small transgressions, viz. because “he gave himself to revelling. . . and banquetings.” Therefore the Law prescribed punishments in an unreasonable manner.

Objection 10. Further, as Augustine says (De Civ. Dei xxi, 11), “Tully writes that the laws recognize eight forms of punishment, indemnity, prison, stripes, retaliation, public disgrace, exile, death, slavery.” Now some of these were prescribed by the Law. “Indemnity,” as when a thief was condemned to make restitution fivefold or fourfold. “Prison,” as when (Num. 15:34) a certain man is ordered to be imprisoned. “Stripes”; thus (Dt. 25:2), “if they see that the offender be worthy of stripes; they shall lay him down, and shall cause him to be beaten before them.” “Public disgrace” was brought on to him who refused to take to himself the wife of his deceased brother, for she took “off his shoe from his foot, and” did “spit in his face” (Dt. 25:9). It prescribed the “death” penalty, as is clear from (Lev. 20:9): “He that curseth his father, or mother, dying let him die.” The Law also recognized the “lex talionis,” by prescribing (Ex. 21:24): “Eye for eye, tooth for tooth.” Therefore it seems unreasonable that the Law should not have inflicted the two other punishments, viz. “exile” and “slavery.”

Objection 11. Further, no punishment is due except for a fault. But dumb animals cannot commit a fault.

Therefore the Law is unreasonable in punishing them (Ex. 21:29): “If the ox... shall kill a man or a woman,” it “shall be stoned”: and (Lev. 20:16): “The woman that shall lie under any beast, shall be killed together with the same.” Therefore it seems that matters pertaining to the relations of one man with another were unsuitably regulated by the Law.

Objection 12. Further, the Lord commanded (Ex. 21:12) a murderer to be punished with death. But the death of a dumb animal is reckoned of much less account than the slaying of a man. Hence murder cannot be sufficiently punished by the slaying of a dumb animal. Therefore it is unfittingly prescribed (Dt. 21:1,4) that “when there shall be found... the corpse of a man slain, and it is not known who is guilty of the murder... the ancients” of the nearest city “shall take a heifer of the herd, that hath not drawn in the yoke, nor ploughed the ground, and they shall bring her into a rough and stony valley, that never was ploughed, nor sown; and there they shall strike off the head of the heifer.”

On the contrary, It is recalled as a special blessing (Ps. 147:20) that “He hath not done in like manner to every nation; and His judgments He hath not made manifest to them.”

I answer that, As Augustine says (De Civ. Dei ii, 21), quoting Tully, “a nation is a body of men united together by consent to the law and by community of welfare.” Consequently it is of the essence of a nation that the mutual relations of the citizens be ordered by just laws. Now the relations of one man with another are twofold: some are effected under the guidance of those in authority: others are effected by the will of private individuals. And since whatever is subject to the power of an individual can be disposed of according to his will, hence it is that the decision of matters between one man and another, and the punishment of evildoers, depend on the direction of those in authority, to whom men are subject. On the other hand, the power of private persons is exercised over the things they possess: and consequently their dealings with one another, as regards such things, depend on their own will, for instance in buying, selling, giving, and so forth. Now the Law provided sufficiently in respect of each of these relations between one man and another. For it established judges, as is clearly indicated in Dt. 16:18: “Thou shalt appoint judges and magistrates in all its [Vulg.: ‘thy’] gates... that they may judge the people with just judgment.” It is also directed the manner of pronouncing just judgments, according to Dt. 1:16,17: “Judge that which is just, whether he be one of your own country or a stranger: there shall be no difference of persons.” It also removed an occasion of pronouncing unjust judgment, by forbidding judges to accept bribes (Ex. 23:8; Dt. 16:19). It prescribed the number of witnesses, viz. two or three: and it appointed certain punishments to certain crimes, as we shall state farther on (ad 10).

But with regard to possessions, it is a very good

thing, says the Philosopher (Polit. ii, 2) that the things possessed should be distinct, and the use thereof should be partly common, and partly granted to others by the will of the possessors. These three points were provided for by the Law. Because, in the first place, the possessions themselves were divided among individuals: for it is written (Num. 33:53,54): “I have given you” the land “for a possession: and you shall divide it among you by lot.” And since many states have been ruined through want of regulations in the matter of possessions, as the Philosopher observes (Polit. ii, 6); therefore the Law provided a threefold remedy against the regularity of possessions. The first was that they should be divided equally, wherefore it is written (Num. 33:54): “To the more you shall give a larger part, and to the fewer, a lesser.” A second remedy was that possessions could not be alienated for ever, but after a certain lapse of time should return to their former owner, so as to avoid confusion of possessions (cf. ad 3). The third remedy aimed at the removal of this confusion, and provided that the dead should be succeeded by their next of kin: in the first place, the son; secondly, the daughter; thirdly, the brother; fourthly, the father’s brother; fifthly, any other next of kin. Furthermore, in order to preserve the distinction of property, the Law enacted that heiresses should marry within their own tribe, as recorded in Num. 36:6.

Secondly, the Law commanded that, in some respects, the use of things should belong to all in common. Firstly, as regards the care of them; for it was prescribed (Dt. 22:1-4): “Thou shalt not pass by, if thou seest thy brother’s ox or his sheep go astray; but thou shalt bring them back to thy brother;” and in like manner as to other things. Secondly, as regards fruits. For all alike were allowed on entering a friend’s vineyard to eat of the fruit, but not to take any away. And, specially, with respect to the poor, it was prescribed that the forgotten sheaves, and the bunches of grapes and fruit, should be left behind for them (Lev. 19:9; Dt. 24:19). Moreover, whatever grew in the seventh year was common property, as stated in Ex. 23:11 and Lev. 25:4.

Thirdly, the law recognized the transference of goods by the owner. There was a purely gratuitous transfer: thus it is written (Dt. 14:28,29): “The third day thou shalt separate another tithe... and the Levite... and the stranger, and the fatherless, and the widow... shall come and shall eat and be filled.” And there was a transfer for a consideration, for instance, by selling and buying, by letting out and hiring, by loan and also by deposit, concerning all of which we find that the Law made ample provision. Consequently it is clear that the Old Law provided sufficiently concerning the mutual relations of one man with another.

Reply to Objection 1. As the Apostle says (Rom. 13:8), “he that loveth his neighbor hath fulfilled the Law”: because, to wit, all the precepts of the Law, chiefly those concerning our neighbor, seem to aim at the end that men should love one another. Now it is an

effect of love that men give their own goods to others: because, as stated in 1 Jn. 3:17: "He that... shall see his brother in need, and shall shut up his bowels from him: how doth the charity of God abide in him?" Hence the purpose of the Law was to accustom men to give of their own to others readily: thus the Apostle (1 Tim. 6:18) commands the rich "to give easily and to communicate to others." Now a man does not give easily to others if he will not suffer another man to take some little thing from him without any great injury to him. And so the Law laid down that it should be lawful for a man, on entering his neighbor's vineyard, to eat of the fruit there: but not to carry any away, lest this should lead to the infliction of a grievous harm, and cause a disturbance of the peace: for among well-behaved people, the taking of a little does not disturb the peace; in fact, it rather strengthens friendship and accustoms men to give things to one another.

Reply to Objection 2. The Law did not prescribe that women should succeed to their father's estate except in default of male issue: failing which it was necessary that succession should be granted to the female line in order to comfort the father, who would have been sad to think that his estate would pass to strangers. Nevertheless the Law observed due caution in the matter, by providing that those women who succeeded to their father's estate, should marry within their own tribe, in order to avoid confusion of tribal possessions, as stated in Num. 36:7,8.

Reply to Objection 3. As the Philosopher says (Polit. ii, 4), the regulation of possessions conduces much to the preservation of a state or nation. Consequently, as he himself observes, it was forbidden by the law in some of the heathen states, "that anyone should sell his possessions, except to avoid a manifest loss." For if possessions were to be sold indiscriminately, they might happen to come into the hands of a few: so that it might become necessary for a state or country to become void of inhabitants. Hence the Old Law, in order to remove this danger, ordered things in such a way that while provision was made for men's needs, by allowing the sale of possessions to avail for a certain period, at the same time the said danger was removed, by prescribing the return of those possessions after that period had elapsed. The reason for this law was to prevent confusion of possessions, and to ensure the continuance of a definite distinction among the tribes.

But as the town houses were not allotted to distinct estates, therefore the Law allowed them to be sold in perpetuity, like movable goods. Because the number of houses in a town was not fixed, whereas there was a fixed limit to the amount of estates, which could not be exceeded, while the number of houses in a town could be increased. On the other hand, houses situated not in a town, but "in a village that hath no walls," could not be sold in perpetuity: because such houses are built merely with a view to the cultivation and care of possessions; wherefore the Law rightly made the same prescription

in regard to both (Lev. 25).

Reply to Objection 4. As stated above (ad 1), the purpose of the Law was to accustom men to its precepts, so as to be ready to come to one another's assistance: because this is a very great incentive to friendship. The Law granted these facilities for helping others in the matter not only of gratuitous and absolute donations, but also of mutual transfers: because the latter kind of succor is more frequent and benefits the greater number: and it granted facilities for this purpose in many ways. First of all by prescribing that men should be ready to lend, and that they should not be less inclined to do so as the year of remission drew nigh, as stated in Dt. 15:7, seqq. Secondly, by forbidding them to burden a man to whom they might grant a loan, either by exacting usury, or by accepting necessities of life in security; and by prescribing that when this had been done they should be restored at once. For it is written (Dt. 23:19): "Thou shalt not lend to thy brother money to usury"; and (Dt. 24:6): "Thou shalt not take the nether nor the upper millstone to pledge; for he hath pledged his life to thee": and (Ex. 22:26): "If thou take of thy neighbor a garment in pledge, thou shalt give it him again before sunset." Thirdly, by forbidding them to be importunate in exacting payment. Hence it is written (Ex. 22:25): "If thou lend money to any of my people that is poor that dwelleth with thee, thou shalt not be hard upon them as an extortioner." For this reason, too, it is enacted (Dt. 24:10,11): "When thou shalt demand of thy neighbor anything that he oweth thee, thou shalt not go into his house to take away a pledge, but thou shalt stand without, and he shall bring out to thee what he hath": both because a man's house is his surest refuge, wherefore it is offensive to a man to be set upon in his own house; and because the Law does not allow the creditor to take away whatever he likes in security, but rather permits the debtor to give what he needs least. Fourthly, the Law prescribed that debts should cease together after the lapse of seven years. For it was probable that those who could conveniently pay their debts, would do so before the seventh year, and would not defraud the lender without cause. But if they were altogether insolvent, there was the same reason for remitting the debt from love for them, as there was for renewing the loan on account of their need.

As regards animals granted in loan, the Law enacted that if, through the neglect of the person to whom they were lent, they perished or deteriorated in his absence, he was bound to make restitution. But if they perished or deteriorated while he was present and taking proper care of them, he was not bound to make restitution, especially if they were hired for a consideration: because they might have died or deteriorated in the same way if they had remained in possession of the lender, so that if the animal had been saved through being lent, the lender would have gained something by the loan which would no longer have been gratuitous. And especially was this to be observed when animals were hired for a consider-

ation: because then the owner received a certain price for the use of the animals; wherefore he had no right to any profit, by receiving indemnity for the animal, unless the person who had charge of it were negligent. In the case, however, of animals not hired for a consideration, equity demanded that he should receive something by way of restitution at least to the value of the hire of the animal that had perished or deteriorated.

Reply to Objection 5. The difference between a loan and a deposit is that a loan is in respect of goods transferred for the use of the person to whom they are transferred, whereas a deposit is for the benefit of the depositor. Hence in certain cases there was a stricter obligation of returning a loan than of restoring goods held in deposit. Because the latter might be lost in two ways. First, unavoidably: i.e. either through a natural cause, for instance if an animal held in deposit were to die or depreciate in value; or through an extrinsic cause, for instance, if it were taken by an enemy, or devoured by a beast (in which case, however, a man was bound to restore to the owner what was left of the animal thus slain): whereas in the other cases mentioned above, he was not bound to make restitution; but only to take an oath in order to clear himself of suspicion. Secondly, the goods deposited might be lost through an avoidable cause, for instance by theft: and then the depositary was bound to restitution on account of his neglect. But, as stated above (ad 4), he who held an animal on loan, was bound to restitution, even if he were absent when it depreciated or died: because he was held responsible for less negligence than a depositary, who was only held responsible in case of theft.

Reply to Objection 6. Workmen who offer their labor for hire, are poor men who toil for their daily bread: and therefore the Law commanded wisely that they should be paid at once, lest they should lack food. But they who offer other commodities for hire, are wont to be rich: nor are they in such need of their price in order to gain a livelihood: and consequently the comparison does not hold.

Reply to Objection 7. The purpose for which judges are appointed among men, is that they may decide doubtful points in matters of justice. Now a matter may be doubtful in two ways. First, among simple-minded people: and in order to remove doubts of this kind, it was prescribed (Dt. 16:18) that “judges and magistrates” should be appointed in each tribe, “to judge the people with just judgment.” Secondly, a matter may be doubtful even among experts: and therefore, in order to remove doubts of this kind, the Law prescribed that all should foregather in some chief place chosen by God, where there would be both the high-priest, who would decide doubtful matters relating to the ceremonies of divine worship; and the chief judge of the people, who would decide matters relating to the judgments of men: just as even now cases are taken from a lower to a higher court either by appeal or by consultation. Hence it is written (Dt. 17:8,9): “If thou

perceive that there be among you a hard and doubtful matter in judgment. . . and thou see that the words of the judges within thy gates do vary; arise and go up to the place, which the Lord thy God shall choose; and thou shalt come to the priests of the Levitical race, and to the judge that shall be at that time.” But such like doubtful matters did not often occur for judgment: wherefore the people were not burdened on this account.

Reply to Objection 8. In the business affairs of men, there is no such thing as demonstrative and infallible proof, and we must be content with a certain conjectural probability, such as that which an orator employs to persuade. Consequently, although it is quite possible for two or three witnesses to agree to a falsehood, yet it is neither easy nor probable that they succeed in so doing: wherefore their testimony is taken as being true, especially if they do not waver in giving it, or are not otherwise suspect. Moreover, in order that witnesses might not easily depart from the truth, the Law commanded that they should be most carefully examined, and that those who were found untruthful should be severely punished, as stated in Dt. 19:16, seqq.

There was, however, a reason for fixing on this particular number, in token of the unerring truth of the Divine Persons, Who are sometimes mentioned as two, because the Holy Ghost is the bond of the other two Persons; and sometimes as three: as Augustine observes on Jn. 8:17: “In your law it is written that the testimony of two men is true.”

Reply to Objection 9. A severe punishment is inflicted not only on account of the gravity of a fault, but also for other reasons. First, on account of the greatness of the sin, because a greater sin, other things being equal, deserves a greater punishment. Secondly, on account of a habitual sin, since men are not easily cured of habitual sin except by severe punishments. Thirdly, on account of a great desire for or a great pleasure in the sin: for men are not easily deterred from such sins unless they be severely punished. Fourthly, on account of the facility of committing a sin and of concealing it: for such like sins, when discovered, should be more severely punished in order to deter others from committing them.

Again, with regard to the greatness of a sin, four degrees may be observed, even in respect of one single deed. The first is when a sin is committed unwillingly; because then, if the sin be altogether involuntary, man is altogether excused from punishment; for it is written (Dt. 22:25, seqq.) that a damsel who suffers violence in a field is not guilty of death, because “she cried, and there was no man to help her.” But if a man sinned in any way voluntarily, and yet through weakness, as for instance when a man sins from passion, the sin is diminished: and the punishment, according to true judgment, should be diminished also; unless perchance the common weal requires that the sin be severely punished in order to deter others from committing such sins, as stated above. The second degree is when a man sins

through ignorance: and then he was held to be guilty to a certain extent, on account of his negligence in acquiring knowledge: yet he was not punished by the judges but expiated his sin by sacrifices. Hence it is written (Lev. 4:2): “The soul that sinneth through ignorance,” etc. This is, however, to be taken as applying to ignorance of fact; and not to ignorance of the Divine precept, which all were bound to know. The third degree was when a man sinned from pride, i.e. through deliberate choice or malice: and then he was punished according to the greatness of the sin*. The fourth degree was when a man sinned from stubbornness or obstinacy: and then he was to be utterly cut off as a rebel and a destroyer of the commandment of the Law†.

Accordingly we must say that, in appointing the punishment for theft, the Law considered what would be likely to happen most frequently (Ex. 22:1-9): wherefore, as regards theft of other things which can easily be safeguarded from a thief, the thief restored only twice their value. But sheep cannot be easily safeguarded from a thief, because they graze in the fields: wherefore it happened more frequently that sheep were stolen in the fields. Consequently the Law inflicted a heavier penalty, by ordering four sheep to be restored for the theft of one. As to cattle, they were yet more difficult to safeguard, because they are kept in the fields, and do not graze in flocks as sheep do; wherefore a yet more heavy penalty was inflicted in their regard, so that five oxen were to be restored for one ox. And this I say, unless perchance the animal itself were discovered in the thief’s possession: because in that case he had to restore only twice the number, as in the case of other thefts: for there was reason to presume that he intended to restore the animal, since he kept it alive. Again, we might say, according to a gloss, that “a cow is useful in five ways: it may be used for sacrifice, for ploughing, for food, for milk, and its hide is employed for various purposes”: and therefore for one cow five had to be restored. But the sheep was useful in four ways: “for sacrifice, for meat, for milk, and for its wool.” The unruly son was slain, not because he ate and drank: but on account of his stubbornness and rebellion, which was always punished by death, as stated above. As to the man who gathered sticks on the sabbath, he was stoned as a breaker of the Law, which commanded the sabbath to be observed, to testify the belief in the newness of the world, as stated above (q. 100, a. 5): wherefore he was slain as an unbeliever.

Reply to Objection 10. The Old Law inflicted the death penalty for the more grievous crimes, viz. for those which are committed against God, and for murder, for stealing a man, irreverence towards one’s parents, adultery and incest. In the case of thief of other things it inflicted punishment by indemnification: while in the case of blows and mutilation it authorized punishment by retaliation; and likewise for the sin of bearing false witness. In other faults of less degree it prescribed

the punishment of stripes or of public disgrace.

The punishment of slavery was prescribed by the Law in two cases. First, in the case of a slave who was unwilling to avail himself of the privilege granted by the Law, whereby he was free to depart in the seventh year of remission: wherefore he was punished by remaining a slave for ever. Secondly, in the case of a thief, who had not wherewith to make restitution, as stated in Ex. 22:3.

The punishment of absolute exile was not prescribed by the Law: because God was worshipped by that people alone, whereas all other nations were given to idolatry: wherefore if any man were exiled from that people absolutely, he would be in danger of falling into idolatry. For this reason it is related (1 Kings 26:19) that David said to Saul: “They are cursed in the sight of the Lord, who have cast me out this day, that I should not dwell in the inheritance of the Lord, saying: Go, serve strange gods.” There was, however, a restricted sort of exile: for it is written in Dt. 19:4* that “he that striketh [Vulg.: ‘killeth’] his neighbor ignorantly, and is proved to have had no hatred against him, shall flee to one of the cities” of refuge and “abide there until the death of the high-priest.” For then it became lawful for him to return home, because when the whole people thus suffered a loss they forgot their private quarrels, so that the next of kin of the slain were not so eager to kill the slayer.

Reply to Objection 11. Dumb animals were ordered to be slain, not on account of any fault of theirs; but as a punishment to their owners, who had not safeguarded their beasts from these offenses. Hence the owner was more severely punished if his ox had butted anyone “yesterday or the day before” (in which case steps might have been taken to butting suddenly). Or again, the animal was slain in detestation of the sin; and lest men should be horrified at the sight thereof.

Reply to Objection 12. The literal reason for this commandment, as Rabbi Moses declares (Doct. Perplex. iii), was because the slayer was frequently from the nearest city: wherefore the slaying of the calf was a means of investigating the hidden murder. This was brought about in three ways. In the first place the elders of the city swore that they had taken every measure for safeguarding the roads. Secondly, the owner of the heifer was indemnified for the slaying of his beast, and if the murder was previously discovered, the beast was not slain. Thirdly, the place, where the heifer was slain, remained uncultivated. Wherefore, in order to avoid this twofold loss, the men of the city would readily make known the murderer, if they knew who he was: and it would seldom happen but that some word or sign would escape about the matter. Or again, this was done in order to frighten people, in detestation of murder. Because the slaying of a heifer, which is a useful animal and full of strength, especially before it has been put under the yoke, signified that whoever committed murder, how-

* Cf. Dt. 25:2 † Cf. Num. 15:30,31 * Cf. Num. 35:25

ever useful and strong he might be, was to forfeit his life; and that, by a cruel death, which was implied by the striking off of its head; and that the murderer, as vile and abject, was to be cut off from the fellowship of men, which was betokened by the fact that the heifer after being slain was left to rot in a rough and uncultivated place.

Mystically, the heifer taken from the herd signifies the flesh of Christ; which had not drawn a yoke, since it had done no sin; nor did it plough the ground, i.e. it never knew the stain of revolt. The fact of the heifer being killed in an uncultivated valley signified the despised death of Christ, whereby all sins are washed away, and the devil is shown to be the arch-murderer.

Objection 1. It would seem that the judicial precepts regarding foreigners were not suitably framed. For Peter said (Acts 10:34,35): “In very deed I perceive that God is not a respecter of persons, but in every nation, he that feareth Him and worketh justice is acceptable to Him.” But those who are acceptable to God should not be excluded from the Church of God. Therefore it is unsuitably commanded (Dt. 23:3) that “the Ammonite and the Moabite, even after the tenth generation, shall not enter into the church of the Lord for ever”: whereas, on the other hand, it is prescribed (Dt. 23:7) to be observed with regard to certain other nations: “Thou shalt not abhor the Edomite, because he is thy brother; nor the Egyptian because thou wast a stranger in his land.”

Objection 2. Further, we do not deserve to be punished for those things which are not in our power. But it is not in man’s power to be an eunuch, or born of a prostitute. Therefore it is unsuitably commanded (Dt. 23:1,2) that “an eunuch and one born of a prostitute shalt not enter into the church of the Lord.”

Objection 3. Further, the Old Law mercifully forbade strangers to be molested: for it is written (Ex. 22:21): “Thou shalt not molest a stranger, nor afflict him; for yourselves also were strangers in the land of Egypt”: and (Ex. 23:9): “Thou shalt not molest a stranger, for you know the hearts of strangers, for you also were strangers in the land of Egypt.” But it is an affliction to be burdened with usury. Therefore the Law unsuitably permitted them (Dt. 23:19,20) to lend money to the stranger for usury.

Objection 4. Further, men are much more akin to us than trees. But we should show greater care and love for these things that are nearest to us, according to Eccles. 13:19: “Every beast loveth its like: so also every man him that is nearest to himself.” Therefore the Lord unsuitably commanded (Dt. 20:13-19) that all the inhabitants of a captured hostile city were to be slain, but that the fruit-trees should not be cut down.

Objection 5. Further, every one should prefer the common good of virtue to the good of the individual. But the common good is sought in a war which men fight against their enemies. Therefore it is unsuitably commanded (Dt. 20:5-7) that certain men should be sent home, for instance a man that had built a new house, or who had planted a vineyard, or who had married a wife.

Objection 6. Further, no man should profit by his own fault. But it is a man’s fault if he be timid or faint-hearted: since this is contrary to the virtue of fortitude. Therefore the timid and faint-hearted are unfittingly excused from the toil of battle (Dt. 20:8).

On the contrary, Divine Wisdom declares (Prov. 8:8): “All my words are just, there is nothing wicked nor perverse in them.”

I answer that, Man’s relations with foreigners are twofold: peaceful, and hostile: and in directing both kinds of relation the Law contained suitable precepts. For the Jews were offered three opportunities of peaceful relations with foreigners. First, when foreigners passed through their land as travelers. Secondly, when they came to dwell in their land as newcomers. And in both these respects the Law made kind provision in its precepts: for it is written (Ex. 22:21): “Thou shalt not molest a stranger [advenam]”; and again (Ex. 22:9): “Thou shalt not molest a stranger [peregrino].” Thirdly, when any foreigners wished to be admitted entirely to their fellowship and mode of worship. With regard to these a certain order was observed. For they were not at once admitted to citizenship: just as it was law with some nations that no one was deemed a citizen except after two or three generations, as the Philosopher says (Polit. iii, 1). The reason for this was that if foreigners were allowed to meddle with the affairs of a nation as soon as they settled down in its midst, many dangers might occur, since the foreigners not yet having the common good firmly at heart might attempt something hurtful to the people. Hence it was that the Law prescribed in respect of certain nations that had close relations with the Jews (viz., the Egyptians among whom they were born and educated, and the Idumeans, the children of Esau, Jacob’s brother), that they should be admitted to the fellowship of the people after the third generation; whereas others (with whom their relations had been hostile, such as the Ammonites and Moabites) were never to be admitted to citizenship; while the Amalekites, who were yet more hostile to them, and had no fellowship of kindred with them, were to be held as foes in perpetuity: for it is written (Ex. 17:16): “The war of the Lord shall be against Amalec from generation to generation.”

In like manner with regard to hostile relations with foreigners, the Law contained suitable precepts. For, in the first place, it commanded that war should be declared for a just cause: thus it is commanded (Dt. 20:10) that when they advanced to besiege a city, they should at first make an offer of peace. Secondly, it enjoined that when once they had entered on a war they should undauntedly persevere in it, putting their trust in God. And in order that they might be the more heedful of this command, it ordered that on the approach of battle the priest should hearten them by promising them God’s aid. Thirdly, it prescribed the removal of whatever might prove an obstacle to the fight, and that certain men, who might be in the way, should be sent home. Fourthly, it enjoined that they should use moderation in pursuing the advantage of victory, by sparing women and children, and by not cutting down fruit-trees of that country.

Reply to Objection 1. The Law excluded the men

of no nation from the worship of God and from things pertaining to the welfare of the soul: for it is written (Ex. 12:48): "If any stranger be willing to dwell among you, and to keep the Phase of the Lord; all his males shall first be circumcised, and then shall he celebrate it according to the manner, and he shall be as that which is born in the land." But in temporal matters concerning the public life of the people, admission was not granted to everyone at once, for the reason given above: but to some, i.e. the Egyptians and Idumeans, in the third generation; while others were excluded in perpetuity, in detestation of their past offense, i.e. the peoples of Moab, Ammon, and Amalec. For just as one man is punished for a sin committed by him, in order that others seeing this may be deterred and refrain from sinning; so too may one nation or city be punished for a crime, that others may refrain from similar crimes.

Nevertheless it was possible by dispensation for a man to be admitted to citizenship on account of some act of virtue: thus it is related (Judith 14:6) that Achior, the captain of the children of Ammon, "was joined to the people of Israel, with all the succession of his kindred." The same applies to Ruth the Moabite who was "a virtuous woman" (Ruth 3:11): although it may be said that this prohibition regarded men and not women, who are not competent to be citizens absolutely speaking.

Reply to Objection 2. As the Philosopher says (Polit. iii, 3), a man is said to be a citizen in two ways: first, simply; secondly, in a restricted sense. A man is a citizen simply if he has all the rights of citizenship, for instance, the right of debating or voting in the popular assembly. On the other hand, any man may be called citizen, only in a restricted sense, if he dwells within the state, even common people or children or old men, who are not fit to enjoy power in matters pertaining to the common weal. For this reason bastards, by reason of their base origin, were excluded from the "ecclesia," i.e. from the popular assembly, down to the tenth generation. The same applies to eunuchs, who were not competent to receive the honor due to a father, especially among the Jews, where the divine worship was continued through carnal generation: for even among the heathens, those who had many children were marked with special honor, as the Philosopher remarks (Polit. ii, 6). Nevertheless, in matters pertaining to the grace of God, eunuchs were not discriminated from others, as neither were strangers, as already stated: for it is written (Isa.

56:3): "Let not the son of the stranger that adhereth to the Lord speak, saying: The Lord will divide and separate me from His people. And let not the eunuch say: Behold I am a dry tree."

Reply to Objection 3. It was not the intention of the Law to sanction the acceptance of usury from strangers, but only to tolerate it on account of the proneness of the Jews to avarice; and in order to promote an amicable feeling towards those out of whom they made a profit.

Reply to Objection 4. A distinction was observed with regard to hostile cities. For some of them were far distant, and were not among those which had been promised to them. When they had taken these cities, they killed all the men who had fought against God's people; whereas the women and children were spared. But in the neighboring cities which had been promised to them, all were ordered to be slain, on account of their former crimes, to punish which God sent the Israelites as executor of Divine justice: for it is written (Dt. 9:5) "because they have done wickedly, they are destroyed at thy coming in." The fruit-trees were commanded to be left untouched, for the use of the people themselves, to whom the city with its territory was destined to be subjected.

Reply to Objection 5. The builder of a new house, the planter of a vineyard, the newly married husband, were excluded from fighting, for two reasons. First, because man is wont to give all his affection to those things which he has lately acquired, or is on the point of having, and consequently he is apt to dread the loss of these above other things. Wherefore it was likely enough that on account of this affection they would fear death all the more, and be so much the less brave in battle. Secondly, because, as the Philosopher says (Phys. ii, 5), "it is a misfortune for a man if he is prevented from obtaining something good when it is within his grasp." And so lest the surviving relations should be the more grieved at the death of these men who had not entered into the possession of the good things prepared for them; and also lest the people should be horror-stricken at the sight of their misfortune: these men were taken away from the danger of death by being removed from the battle.

Reply to Objection 6. The timid were sent back home, not that they might be the gainers thereby; but lest the people might be the losers by their presence, since their timidity and flight might cause others to be afraid and run away.

Objection 1. It would seem that the Old Law set forth unsuitable precepts about the members of the household. For a slave “is in every respect his master’s property,” as the Philosopher states (Polit. i, 2). But that which is a man’s property should be his always. Therefore it was unfitting for the Law to command (Ex. 21:2) that slaves should “go out free” in the seventh year.

Objection 2. Further, a slave is his master’s property, just as an animal, e.g. an ass or an ox. But it is commanded (Dt. 22:1-3) with regard to animals, that they should be brought back to the owner if they be found going astray. Therefore it was unsuitably commanded (Dt. 23:15): “Thou shalt not deliver to his master the servant that is fled to thee.”

Objection 3. Further, the Divine Law should encourage mercy more even than the human law. But according to human laws those who ill-treat their servants and maidservants are severely punished: and the worse treatment of all seems to be that which results in death. Therefore it is unfittingly commanded (Ex. 21:20,21) that “he that striketh his bondman or bondwoman with a rod, and they die under his hands. . . if the party remain alive a day. . . he shall not be subject to the punishment, because it is his money.”

Objection 4. Further, the dominion of a master over his slave differs from that of the father over his son (Polit. i, 3). But the dominion of master over slave gives the former the right to sell his servant or maidservant. Therefore it was unfitting for the Law to allow a man to sell his daughter to be a servant or handmaid (Ex. 21:7).

Objection 5. Further, a father has power over his son. But he who has power over the sinner has the right to punish him for his offenses. Therefore it is unfittingly commanded (Dt. 21:18, seqq.) that a father should bring his son to the ancients of the city for punishment.

Objection 6. Further, the Lord forbade them (Dt. 7:3, seqq.) to make marriages with strange nations; and commanded the dissolution of such as had been contracted (1 Esdras 10). Therefore it was unfitting to allow them to marry captive women from strange nations (Dt. 21:10, seqq.).

Objection 7. Further, the Lord forbade them to marry within certain degrees of consanguinity and affinity, according to Lev. 18. Therefore it was unsuitably commanded (Dt. 25:5) that if any man died without issue, his brother should marry his wife.

Objection 8. Further, as there is the greatest familiarity between man and wife, so should there be the staunchest fidelity. But this is impossible if the marriage bond can be sundered. Therefore it was unfitting for the Lord to allow (Dt. 24:1-4) a man to put his wife away, by writing a bill of divorce; and besides, that he could not take her again to wife.

Objection 9. Further, just as a wife can be faithless to her husband, so can a slave be to his master, and a

son to his father. But the Law did not command any sacrifice to be offered in order to investigate the injury done by a servant to his master, or by a son to his father. Therefore it seems to have been superfluous for the Law to prescribe the “sacrifice of jealousy” in order to investigate a wife’s adultery (Num. 5:12, seqq.). Consequently it seems that the Law put forth unsuitable judicial precepts about the members of the household.

On the contrary, It is written (Ps. 18:10): “The judgments of the Lord are true, justified in themselves.”

I answer that, The mutual relations of the members of a household regard everyday actions directed to the necessities of life, as the Philosopher states (Polit. i, 1). Now the preservation of man’s life may be considered from two points of view. First, from the point of view of the individual, i.e. in so far as man preserves his individuality: and for the purpose of the preservation of life, considered from this standpoint, man has at his service external goods, by means of which he provides himself with food and clothing and other such necessities of life: in the handling of which he has need of servants. Secondly man’s life is preserved from the point of view of the species, by means of generation, for which purpose man needs a wife, that she may bear him children. Accordingly the mutual relations of the members of a household admit of a threefold combination: viz. those of master and servant, those of husband and wife, and those of father and son: and in respect of all these relationships the Old Law contained fitting precepts. Thus, with regard to servants, it commanded them to be treated with moderation—both as to their work, lest, to wit, they should be burdened with excessive labor, wherefore the Lord commanded (Dt. 5:14) that on the Sabbath day “thy manservant and thy maidservant” should “rest even as thyself”—and also as to the infliction of punishment, for it ordered those who maimed their servants, to set them free (Ex. 21:26,27). Similar provision was made in favor of a maidservant when married to anyone (Ex. 21:7, seqq.). Moreover, with regard to those servants in particular who were taken from among the people, the Law prescribed that they should go out free in the seventh year taking whatever they brought with them, even their clothes (Ex. 21:2, seqq.): and furthermore it was commanded (Dt. 15:13) that they should be given provision for the journey.

With regard to wives the Law made certain prescriptions as to those who were to be taken in marriage: for instance, that they should marry a wife from their own tribe (Num. 36:6): and this lest confusion should ensue in the property of various tribes. Also that a man should marry the wife of his deceased brother when the latter died without issue, as prescribed in Dt. 25:5,6: and this in order that he who could not have successors according to carnal origin, might at least have them by a kind of adoption, and that thus the deceased might not

be entirely forgotten. It also forbade them to marry certain women; to wit, women of strange nations, through fear of their losing their faith; and those of their near kindred, on account of the natural respect due to them. Furthermore it prescribed in what way wives were to be treated after marriage. To wit, that they should not be slandered without grave reason: wherefore it ordered punishment to be inflicted on the man who falsely accused his wife of a crime (Dt. 22:13, seqq.). Also that a man's hatred of his wife should not be detrimental to his son (Dt. 21:15, seqq.). Again, that a man should not ill-use his wife through hatred of her, but rather that he should write a bill of divorce and send her away (Dt. 24:1). Furthermore, in order to foster conjugal love from the very outset, it was prescribed that no public duties should be laid on a recently married man, so that he might be free to rejoice with his wife.

With regard to children, the Law commanded parents to educate them by instructing them in the faith: hence it is written (Ex. 12:26, seqq.): "When your children shall say to you: What is the meaning of this service? You shall say to them: It is the victim of the passage of the Lord." Moreover, they are commanded to teach them the rules of right conduct: wherefore it is written (Dt. 21:20) that the parents had to say: "He slighteth hearing our admonitions, he giveth himself to revelling and to debauchery."

Reply to Objection 1. As the children of Israel had been delivered by the Lord from slavery, and for this reason were bound to the service of God, He did not wish them to be slaves in perpetuity. Hence it is written (Lev. 25:39, seqq.): "If thy brother, constrained by poverty, sell himself to thee, thou shalt not oppress him with the service of bondservants: but he shall be as a hireling and a sojourner. . . for they are My servants, and I brought them out of the land of Egypt: let them not be sold as bondmen": and consequently, since they were slaves, not absolutely but in a restricted sense, after a lapse of time they were set free.

Reply to Objection 2. This commandment is to be understood as referring to a servant whom his master seeks to kill, or to help him in committing some sin.

Reply to Objection 3. With regard to the ill-treatment of servants, the Law seems to have taken into consideration whether it was certain or not: since if it were certain, the Law fixed a penalty: for maiming, the penalty was forfeiture of the servant, who was ordered to be given his liberty: while for slaying, the punishment was that of a murderer, when the slave died under the blow of his master. If, however, the hurt was not certain, but only probable, the Law did not impose any penalty as regards a man's own servant: for instance if the servant did not die at once after being struck, but after some days: for it would be uncertain whether he died as a result of the blows he received. For when a man struck a free man, yet so that he did not die at once, but "walked abroad again upon his staff," he that struck him was quit of murder, even though afterwards he died.

Nevertheless he was bound to pay the doctor's fees incurred by the victim of his assault. But this was not the case if a man killed his own servant: because whatever the servant had, even his very person, was the property of his master. Hence the reason for his not being subject to a pecuniary penalty is set down as being "because it is his money."

Reply to Objection 4. As stated above (ad 1), no Jew could own a Jew as a slave absolutely: but only in a restricted sense, as a hireling for a fixed time. And in this way the Law permitted that through stress of poverty a man might sell his son or daughter. This is shown by the very words of the Law, where we read: "If any man sell his daughter to be a servant, she shall not go out as bondwomen are wont to go out." Moreover, in this way a man might sell not only his son, but even himself, rather as a hireling than as a slave, according to Lev. 25:39,40: "If thy brother, constrained by poverty, sell himself to thee, thou shalt not oppress him with the service of bondservants: but he shall be as a hireling and a sojourner."

Reply to Objection 5. As the Philosopher says (Ethic. x, 9), the paternal authority has the power only of admonition; but not that of coercion, whereby rebellious and headstrong persons can be compelled. Hence in this case the Lord commanded the stubborn son to be punished by the rulers of the city.

Reply to Objection 6. The Lord forbade them to marry strange women on account of the danger of seduction, lest they should be led astray into idolatry. And specially did this prohibition apply with respect to those nations who dwelt near them, because it was more probable that they would adopt their religious practices. When, however, the woman was willing to renounce idolatry, and become an adherent of the Law, it was lawful to take her in marriage: as was the case with Ruth whom Booz married. Wherefore she said to her mother-in-law (Ruth 1:16): "Thy people shall be my people, and thy God my God." Accordingly it was not permitted to marry a captive woman unless she first shaved her hair, and pared her nails, and put off the raiment wherein she was taken, and mourned for her father and mother, in token that she renounced idolatry for ever.

Reply to Objection 7. As Chrysostom says (Hom. xlviii super Matth.), "because death was an unmitigated evil for the Jews, who did everything with a view to the present life, it was ordained that children should be born to the dead man through his brother: thus affording a certain mitigation to his death. It was not, however, ordained that any other than his brother or one next of kin should marry the wife of the deceased, because" the offspring of this union "would not be looked upon as that of the deceased: and moreover, a stranger would not be under the obligation to support the household of the deceased, as his brother would be bound to do from motives of justice on account of his relationship." Hence it is evident that in marrying the wife of his dead brother, he took his dead brother's place.

Reply to Objection 8. The Law permitted a wife to be divorced, not as though it were just absolutely speaking, but on account of the Jews' hardness of heart, as Our Lord declared (Mat. 19:8). Of this, however, we must speak more fully in the treatise on Matrimony (Suppl., q. 67).

Reply to Objection 9. Wives break their conjugal

faith by adultery, both easily, for motives of pleasure, and hiddenly, since "the eye of the adulterer observeth darkness" (Job 24:15). But this does not apply to a son in respect of his father, or to a servant in respect of his master: because the latter infidelity is not the result of the lust of pleasure, but rather of malice: nor can it remain hidden like the infidelity of an adulterous woman.

FIRST PART OF THE SECOND PART, QUESTION 106
Of the Law of the Gospel, Called the New Law, Considered in Itself
(In Four Articles)

In proper sequence we have to consider now the Law of the Gospel which is called the New Law: and in the first place we must consider it in itself; secondly, in comparison with the Old Law; thirdly, we shall treat of those things that are contained in the New Law. Under the first head there are four points of inquiry:

- (1) What kind of law is it? i.e. Is it a written law or is it instilled in the heart?
- (2) Of its efficacy, i.e. does it justify?
- (3) Of its beginning: should it have been given at the beginning of the world?
- (4) Of its end: i.e. whether it will last until the end, or will another law take its place?

Whether the New Law is a written law?

Ia IIae q. 106 a. 1

Objection 1. It would seem that the New Law is a written law. For the New Law is just the same as the Gospel. But the Gospel is set forth in writing, according to Jn. 20:31: "But these are written that you may believe." Therefore the New Law is a written law.

Objection 2. Further, the law that is instilled in the heart is the natural law, according to Rom. 2:14,15: "(The Gentiles) do by nature those things that are of the law... who have [Vulg.: 'show'] the work of the law written in their hearts." If therefore the law of the Gospel were instilled in our hearts, it would not be distinct from the law of nature.

Objection 3. Further, the law of the Gospel is proper to those who are in the state of the New Testament. But the law that is instilled in the heart is common to those who are in the New Testament and to those who are in the Old Testament: for it is written (Wis. 7:27) that Divine Wisdom "through nations conveyeth herself into holy souls, she maketh the friends of God and prophets." Therefore the New Law is not instilled in our hearts.

On the contrary, The New Law is the law of the New Testament. But the law of the New Testament is instilled in our hearts. For the Apostle, quoting the authority of Jeremiah 31:31,33: "Behold the days shall come, saith the Lord; and I will perfect unto the house of Israel, and unto the house of Judah, a new testament," says, explaining what this statement is (Heb. 8:8,10): "For this is the testament which I will make to the house of Israel... by giving [Vulg.: 'I will give'] My laws into their mind, and in their heart will I write them." Therefore the New Law is instilled in our hearts.

I answer that, "Each thing appears to be that which preponderates in it," as the Philosopher states (Ethic. ix, 8). Now that which is preponderant in the law of the New Testament, and whereon all its efficacy is based, is the grace of the Holy Ghost, which is given through faith in Christ. Consequently the New Law is chiefly the grace itself of the Holy Ghost, which is given to those who believe in Christ. This is manifestly stated by the Apostle who says (Rom. 3:27): "Where is... thy boasting? It is excluded. By what law? Of works? No, but

by the law of faith": for he calls the grace itself of faith "a law." And still more clearly it is written (Rom. 8:2): "The law of the spirit of life, in Christ Jesus, hath delivered me from the law of sin and of death." Hence Augustine says (De Spir. et Lit. xxiv) that "as the law of deeds was written on tables of stone, so is the law of faith inscribed on the hearts of the faithful": and elsewhere, in the same book (xxi): "What else are the Divine laws written by God Himself on our hearts, but the very presence of His Holy Spirit?"

Nevertheless the New Law contains certain things that dispose us to receive the grace of the Holy Ghost, and pertaining to the use of that grace: such things are of secondary importance, so to speak, in the New Law; and the faithful need to be instructed concerning them, both by word and writing, both as to what they should believe and as to what they should do. Consequently we must say that the New Law is in the first place a law that is inscribed on our hearts, but that secondarily it is a written law.

Reply to Objection 1. The Gospel writings contain only such things as pertain to the grace of the Holy Ghost, either by disposing us thereto, or by directing us to the use thereof. Thus with regard to the intellect, the Gospel contains certain matters pertaining to the manifestation of Christ's Godhead or humanity, which dispose us by means of faith through which we receive the grace of the Holy Ghost: and with regard to the affections, it contains matters touching the contempt of the world, whereby man is rendered fit to receive the grace of the Holy Ghost: for "the world," i.e. worldly men, "cannot receive" the Holy Ghost (Jn. 14:17). As to the use of spiritual grace, this consists in works of virtue to which the writings of the New Testament exhort men in divers ways.

Reply to Objection 2. There are two ways in which a thing may be instilled into man. First, through being part of his nature, and thus the natural law is instilled into man. Secondly, a thing is instilled into man by being, as it were, added on to his nature by a gift of grace. In this way the New Law is instilled into man, not only by indicating to him what he should do, but

also by helping him to accomplish it.

Reply to Objection 3. No man ever had the grace of the Holy Ghost except through faith in Christ either explicit or implicit: and by faith in Christ man belongs

to the New Testament. Consequently whoever had the law of grace instilled into them belonged to the New Testament.

Whether the New Law justifies?

Ia IIae q. 106 a. 2

Objection 1. It would seem that the New Law does not justify. For no man is justified unless he obeys God's law, according to Heb. 5:9: "He," i.e. Christ, "became to all that obey Him the cause of eternal salvation." But the Gospel does not always cause men to believe in it: for it is written (Rom. 10:16): "All do not obey the Gospel." Therefore the New Law does not justify.

Objection 2. Further, the Apostle proves in his epistle to the Romans that the Old Law did not justify, because transgression increased at its advent: for it is stated (Rom. 4:15): "The Law worketh wrath: for where there is no law, neither is there transgression." But much more did the New Law increase transgression: since he who sins after the giving of the New Law deserves greater punishment, according to Heb. 10:28,29: "A man making void the Law of Moses dieth without any mercy under two or three witnesses. How much more, do you think, he deserveth worse punishments, who hath trodden underfoot the Son of God," etc.? Therefore the New Law, like the Old Law, does not justify.

Objection 3. Further, justification is an effect proper to God, according to Rom. 8:33: "God that justifieth." But the Old Law was from God just as the New Law. Therefore the New Law does not justify any more than the Old Law.

On the contrary, The Apostle says (Rom. 1:16): "I am not ashamed of the Gospel: for it is in the power of God unto salvation to everyone that believeth." But there is no salvation but to those who are justified. Therefore the Law of the Gospel justifies.

I answer that, As stated above (a. 1), there is a twofold element in the Law of the Gospel. There is the chief element, viz. the grace of the Holy Ghost bestowed inwardly. And as to this, the New Law justifies. Hence Augustine says (De Spir. et Lit. xvii): "There," i.e. in the Old Testament, "the Law was set forth in an outward fashion, that the ungodly might be afraid"; "here," i.e. in the New Testament, "it is given in an

inward manner, that they may be justified." The other element of the Evangelical Law is secondary: namely, the teachings of faith, and those commandments which direct human affections and human actions. And as to this, the New Law does not justify. Hence the Apostle says (2 Cor. 3:6) "The letter killeth, but the spirit quickeneth": and Augustine explains this (De Spir. et Lit. xiv, xvii) by saying that the letter denotes any writing external to man, even that of the moral precepts such as are contained in the Gospel. Wherefore the letter, even of the Gospel would kill, unless there were the inward presence of the healing grace of faith.

Reply to Objection 1. This argument holds true of the New Law, not as to its principal, but as to its secondary element: i.e. as to the dogmas and precepts outwardly put before man either in words or in writing.

Reply to Objection 2. Although the grace of the New Testament helps man to avoid sin, yet it does not so confirm man in good that he cannot sin: for this belongs to the state of glory. Hence if a man sin after receiving the grace of the New Testament, he deserves greater punishment, as being ungrateful for greater benefits, and as not using the help given to him. And this is why the New Law is not said to "work wrath": because as far as it is concerned it gives man sufficient help to avoid sin.

Reply to Objection 3. The same God gave both the New and the Old Law, but in different ways. For He gave the Old Law written on tables of stone: whereas He gave the New Law written "in the fleshly tables of the heart," as the Apostle expresses it (2 Cor. 3:3). Wherefore, as Augustine says (De Spir. et Lit. xviii), "the Apostle calls this letter which is written outside man, a ministration of death and a ministration of condemnation: whereas he calls the other letter, i.e. the Law of the New Testament, the ministration of the spirit and the ministration of justice: because through the gift of the Spirit we work justice, and are delivered from the condemnation due to transgression."

Whether the New Law should have been given from the beginning of the world?

Ia IIae q. 106 a. 3

Objection 1. It would seem that the New Law should have been given from the beginning of the world. "For there is no respect of persons with God" (Rom. 2:11). But "all" men "have sinned and do need the glory of God" (Rom. 3:23). Therefore the Law of the Gospel should have been given from the beginning of the world, in order that it might bring succor to all.

Objection 2. Further, as men dwell in various places, so do they live in various times. But God, "Who will have all men to be saved" (1 Tim. 2:4), commanded the Gospel to be preached in all places, as may be seen in the last chapters of Matthew and Mark. Therefore the Law of the Gospel should have been at hand for all times, so as to be given from the beginning of the world.

Objection 3. Further, man needs to save his soul, which is for all eternity, more than to save his body, which is a temporal matter. But God provided man from the beginning of the world with things that are necessary for the health of his body, by subjecting to his power whatever was created for the sake of man (Gn. 1:26-29). Therefore the New Law also, which is very necessary for the health of the soul, should have been given to man from the beginning of the world.

On the contrary, The Apostle says (1 Cor. 15:46): “That was not first which is spiritual, but that which is natural.” But the New Law is highly spiritual. Therefore it was not fitting for it to be given from the beginning of the world.

I answer that, Three reasons may be assigned why it was not fitting for the New Law to be given from the beginning of the world. The first is because the New Law, as stated above (a. 1), consists chiefly in the grace of the Holy Ghost: which it behoved not to be given abundantly until sin, which is an obstacle to grace, had been cast out of man through the accomplishment of his redemption by Christ: wherefore it is written (Jn. 7:39): “As yet the Spirit was not given, because Jesus was not yet glorified.” This reason the Apostle states clearly (Rom. 8:2, seqq.) where, after speaking of “the Law of the Spirit of life,” he adds: “God sending His own Son, in the likeness of sinful flesh, of sin* hath condemned sin in the flesh, that the justification of the Law might be fulfilled in us.”

A second reason may be taken from the perfection of the New Law. Because a thing is not brought to perfection at once from the outset, but through an orderly succession of time; thus one is at first a boy, and then a man. And this reason is stated by the Apostle (Gal.

3:24,25): “The Law was our pedagogue in Christ that we might be justified by faith. But after the faith is come, we are no longer under a pedagogue.”

The third reason is found in the fact that the New Law is the law of grace: wherefore it behoved man first of all to be left to himself under the state of the Old Law, so that through falling into sin, he might realize his weakness, and acknowledge his need of grace. This reason is set down by the Apostle (Rom. 5:20): “The Law entered in, that sin might abound: and when sin abounded grace did more abound.”

Reply to Objection 1. Mankind on account of the sin of our first parents deserved to be deprived of the aid of grace: and so “from whom it is withheld it is justly withheld, and to whom it is given, it is mercifully given,” as Augustine states (De Perfect. Justit. iv)[†]. Consequently it does not follow that there is respect of persons with God, from the fact that He did not offer the Law of grace to all from the beginning of the world, which Law was to be published in due course of time, as stated above.

Reply to Objection 2. The state of mankind does not vary according to diversity of place, but according to succession of time. Hence the New Law avails for all places, but not for all times: although at all times there have been some persons belonging to the New Testament, as stated above (a. 1, ad 3).

Reply to Objection 3. Things pertaining to the health of the body are of service to man as regards his nature, which sin does not destroy: whereas things pertaining to the health of the soul are ordained to grace, which is forfeit through sin. Consequently the comparison will not hold.

Whether the New Law will last till the end of the world?

Ia IIae q. 106 a. 4

Objection 1. It would seem that the New Law will not last until the end of the world. Because, as the Apostle says (1 Cor. 13:10), “when that which is perfect is come, that which is in part shall be done away.” But the New Law is “in part,” since the Apostle says (1 Cor. 13:9): “We know in part and we prophesy in part.” Therefore the New Law is to be done away, and will be succeeded by a more perfect state.

Objection 2. Further, Our Lord (Jn. 16:13) promised His disciples the knowledge of all truth when the Holy Ghost, the Comforter, should come. But the Church knows not yet all truth in the state of the New Testament. Therefore we must look forward to another state, wherein all truth will be revealed by the Holy Ghost.

Objection 3. Further, just as the Father is distinct from the Son and the Son from the Father, so is the Holy Ghost distinct from the Father and the Son. But

there was a state corresponding with the Person of the Father, viz. the state of the Old Law, wherein men were intent on begetting children: and likewise there is a state corresponding to the Person of the Son: viz. the state of the New Law, wherein the clergy who are intent on wisdom (which is appropriated to the Son) hold a prominent place. Therefore there will be a third state corresponding to the Holy Ghost, wherein spiritual men will hold the first place.

Objection 4. Further, Our Lord said (Mat. 24:14): “This Gospel of the kingdom shall be preached in the whole world. . . and then shall the consummation come.” But the Gospel of Christ is already preached throughout the whole world: and yet the consummation has not yet come. Therefore the Gospel of Christ is not the Gospel of the kingdom, but another Gospel, that of the Holy Ghost, is to come yet, like unto another Law.

On the contrary, Our Lord said (Mat. 24:34): “I

* St. Thomas, quoting perhaps from memory, omits the “et” (and), after “sinful flesh.” The text quoted should read thus: “in the likeness of sinful flesh, and a sin offering (*peri hamartias*), hath,” etc. † Cf. Ep. ccvii; De Pecc. Mer. et Rem. ii, 19

say to you that this generation shall not pass till all (these) things be done”: which passage Chrysostom (Hom. lxxvii) explains as referring to “the generation of those that believe in Christ.” Therefore the state of those who believe in Christ will last until the consummation of the world.

I answer that, The state of the world may change in two ways. In one way, according to a change of law: and thus no other state will succeed this state of the New Law. Because the state of the New Law succeeded the state of the Old Law, as a more perfect law a less perfect one. Now no state of the present life can be more perfect than the state of the New Law: since nothing can approach nearer to the last end than that which is the immediate cause of our being brought to the last end. But the New Law does this: wherefore the Apostle says (Heb. 10:19-22): “Having therefore, brethren, a confidence in the entering into the Holies by the blood of Christ, a new . . . way which He hath dedicated for us . . . let us draw near.” Therefore no state of the present life can be more perfect than that of the New Law, since the nearer a thing is to the last end the more perfect it is.

In another way the state of mankind may change according as man stands in relation to one and the same law more or less perfectly. And thus the state of the Old Law underwent frequent changes, since at times the laws were very well kept, and at other times were altogether unheeded. Thus, too, the state of the New Law is subject to change with regard to various places, times, and persons, according as the grace of the Holy Ghost dwells in man more or less perfectly. Nevertheless we are not to look forward to a state wherein man is to possess the grace of the Holy Ghost more perfectly than he has possessed it hitherto, especially the apostles who “received the firstfruits of the Spirit, i.e. sooner and more abundantly than others,” as a gloss expounds on Rom. 8:23.

Reply to Objection 1. As Dionysius says (Eccl. Hier. v), there is a threefold state of mankind; the first was under the Old Law; the second is that of the New Law; the third will take place not in this life, but in heaven. But as the first state is figurative and imperfect in comparison with the state of the Gospel; so is the present state figurative and imperfect in comparison with the heavenly state, with the advent of which the present state will be done away as expressed in that very passage (1 Cor. 13:12): “We see now through a glass in a dark manner; but then face to face.”

Reply to Objection 2. As Augustine says (Contra Faust. xix, 31), Montanus and Priscilla pretended that Our Lord’s promise to give the Holy Ghost was fulfilled,

not in the apostles, but in themselves. In like manner the Manicheans maintained that it was fulfilled in Manes whom they held to be the Paraclete. Hence none of the above received the Acts of the Apostles, where it is clearly shown that the aforesaid promise was fulfilled in the apostles: just as Our Lord promised them a second time (Acts 1:5): “You shall be baptized with the Holy Ghost, not many days hence”: which we read as having been fulfilled in Acts 2. However, these foolish notions are refuted by the statement (Jn. 7:39) that “as yet the Spirit was not given, because Jesus was not yet glorified”; from which we gather that the Holy Ghost was given as soon as Christ was glorified in His Resurrection and Ascension. Moreover, this puts out of court the senseless idea that the Holy Ghost is to be expected to come at some other time.

Now the Holy Ghost taught the apostles all truth in respect of matters necessary for salvation; those things, to wit, that we are bound to believe and to do. But He did not teach them about all future events: for this did not regard them according to Acts 1:7: “It is not for you to know the times or moments which the Father hath put in His own power.”

Reply to Objection 3. The Old Law corresponded not only to the Father, but also to the Son: because Christ was foreshadowed in the Old Law. Hence Our Lord said (Jn. 5:46): “If you did believe Moses, you would perhaps believe me also; for he wrote of Me.” In like manner the New Law corresponds not only to Christ, but also to the Holy Ghost; according to Rom. 8:2: “The Law of the Spirit of life in Christ Jesus,” etc. Hence we are not to look forward to another law corresponding to the Holy Ghost.

Reply to Objection 4. Since Christ said at the very outset of the preaching of the Gospel: “The kingdom of heaven is at hand” (Mat. 4:17), it is most absurd to say that the Gospel of Christ is not the Gospel of the kingdom. But the preaching of the Gospel of Christ may be understood in two ways. First, as denoting the spreading abroad of the knowledge of Christ: and thus the Gospel was preached throughout the world even at the time of the apostles, as Chrysostom states (Hom. lxxv in Matth.). And in this sense the words that follow— “and then shall the consummation come,” refer to the destruction of Jerusalem, of which He was speaking literally. Secondly, the preaching of the Gospel may be understood as extending throughout the world and producing its full effect, so that, to wit, the Church would be founded in every nation. And in these sense, as Augustine writes to Hesychius (Epist. cxcix), the Gospel is not preached to the whole world yet, but, when it is, the consummation of the world will come.

Objection 1. It would seem that the New Law is a written law. For the New Law is just the same as the Gospel. But the Gospel is set forth in writing, according to Jn. 20:31: “But these are written that you may believe.” Therefore the New Law is a written law.

Objection 2. Further, the law that is instilled in the heart is the natural law, according to Rom. 2:14,15: “(The Gentiles) do by nature those things that are of the law... who have [Vulg.: ‘show’] the work of the law written in their hearts.” If therefore the law of the Gospel were instilled in our hearts, it would not be distinct from the law of nature.

Objection 3. Further, the law of the Gospel is proper to those who are in the state of the New Testament. But the law that is instilled in the heart is common to those who are in the New Testament and to those who are in the Old Testament: for it is written (Wis. 7:27) that Divine Wisdom “through nations conveyeth herself into holy souls, she maketh the friends of God and prophets.” Therefore the New Law is not instilled in our hearts.

On the contrary, The New Law is the law of the New Testament. But the law of the New Testament is instilled in our hearts. For the Apostle, quoting the authority of Jeremiah 31:31,33: “Behold the days shall come, saith the Lord; and I will perfect unto the house of Israel, and unto the house of Judah, a new testament,” says, explaining what this statement is (Heb. 8:8,10): “For this is the testament which I will make to the house of Israel... by giving [Vulg.: ‘I will give’] My laws into their mind, and in their heart will I write them.” Therefore the New Law is instilled in our hearts.

I answer that, “Each thing appears to be that which preponderates in it,” as the Philosopher states (Ethic. ix, 8). Now that which is preponderant in the law of the New Testament, and whereon all its efficacy is based, is the grace of the Holy Ghost, which is given through faith in Christ. Consequently the New Law is chiefly the grace itself of the Holy Ghost, which is given to those who believe in Christ. This is manifestly stated by the Apostle who says (Rom. 3:27): “Where is... thy boasting? It is excluded. By what law? Of works? No, but by the law of faith”: for he calls the grace itself of faith “a law.” And still more clearly it is written (Rom. 8:2): “The law of the spirit of life, in Christ Jesus, hath delivered me from the law of sin and of death.” Hence

Augustine says (De Spir. et Lit. xxiv) that “as the law of deeds was written on tables of stone, so is the law of faith inscribed on the hearts of the faithful”: and elsewhere, in the same book (xxi): “What else are the Divine laws written by God Himself on our hearts, but the very presence of His Holy Spirit?”

Nevertheless the New Law contains certain things that dispose us to receive the grace of the Holy Ghost, and pertaining to the use of that grace: such things are of secondary importance, so to speak, in the New Law; and the faithful need to be instructed concerning them, both by word and writing, both as to what they should believe and as to what they should do. Consequently we must say that the New Law is in the first place a law that is inscribed on our hearts, but that secondarily it is a written law.

Reply to Objection 1. The Gospel writings contain only such things as pertain to the grace of the Holy Ghost, either by disposing us thereto, or by directing us to the use thereof. Thus with regard to the intellect, the Gospel contains certain matters pertaining to the manifestation of Christ’s Godhead or humanity, which dispose us by means of faith through which we receive the grace of the Holy Ghost: and with regard to the affections, it contains matters touching the contempt of the world, whereby man is rendered fit to receive the grace of the Holy Ghost: for “the world,” i.e. worldly men, “cannot receive” the Holy Ghost (Jn. 14:17). As to the use of spiritual grace, this consists in works of virtue to which the writings of the New Testament exhort men in divers ways.

Reply to Objection 2. There are two ways in which a thing may be instilled into man. First, through being part of his nature, and thus the natural law is instilled into man. Secondly, a thing is instilled into man by being, as it were, added on to his nature by a gift of grace. In this way the New Law is instilled into man, not only by indicating to him what he should do, but also by helping him to accomplish it.

Reply to Objection 3. No man ever had the grace of the Holy Ghost except through faith in Christ either explicit or implicit: and by faith in Christ man belongs to the New Testament. Consequently whoever had the law of grace instilled into them belonged to the New Testament.

Objection 1. It would seem that the New Law does not justify. For no man is justified unless he obeys God's law, according to Heb. 5:9: "He," i.e. Christ, "became to all that obey Him the cause of eternal salvation." But the Gospel does not always cause men to believe in it: for it is written (Rom. 10:16): "All do not obey the Gospel." Therefore the New Law does not justify.

Objection 2. Further, the Apostle proves in his epistle to the Romans that the Old Law did not justify, because transgression increased at its advent: for it is stated (Rom. 4:15): "The Law worketh wrath: for where there is no law, neither is there transgression." But much more did the New Law increase transgression: since he who sins after the giving of the New Law deserves greater punishment, according to Heb. 10:28,29: "A man making void the Law of Moses dieth without any mercy under two or three witnesses. How much more, do you think, he deserveth worse punishments, who hath trodden underfoot the Son of God," etc.? Therefore the New Law, like the Old Law, does not justify.

Objection 3. Further, justification is an effect proper to God, according to Rom. 8:33: "God that justifieth." But the Old Law was from God just as the New Law. Therefore the New Law does not justify any more than the Old Law.

On the contrary, The Apostle says (Rom. 1:16): "I am not ashamed of the Gospel: for it is in the power of God unto salvation to everyone that believeth." But there is no salvation but to those who are justified. Therefore the Law of the Gospel justifies.

I answer that, As stated above (a. 1), there is a twofold element in the Law of the Gospel. There is the chief element, viz. the grace of the Holy Ghost bestowed inwardly. And as to this, the New Law justifies. Hence Augustine says (De Spir. et Lit. xvii): "There," i.e. in the Old Testament, "the Law was set forth in an outward fashion, that the ungodly might be afraid"; "here," i.e. in the New Testament, "it is given in an

inward manner, that they may be justified." The other element of the Evangelical Law is secondary: namely, the teachings of faith, and those commandments which direct human affections and human actions. And as to this, the New Law does not justify. Hence the Apostle says (2 Cor. 3:6) "The letter killeth, but the spirit quickeneth": and Augustine explains this (De Spir. et Lit. xiv, xvii) by saying that the letter denotes any writing external to man, even that of the moral precepts such as are contained in the Gospel. Wherefore the letter, even of the Gospel would kill, unless there were the inward presence of the healing grace of faith.

Reply to Objection 1. This argument holds true of the New Law, not as to its principal, but as to its secondary element: i.e. as to the dogmas and precepts outwardly put before man either in words or in writing.

Reply to Objection 2. Although the grace of the New Testament helps man to avoid sin, yet it does not so confirm man in good that he cannot sin: for this belongs to the state of glory. Hence if a man sin after receiving the grace of the New Testament, he deserves greater punishment, as being ungrateful for greater benefits, and as not using the help given to him. And this is why the New Law is not said to "work wrath": because as far as it is concerned it gives man sufficient help to avoid sin.

Reply to Objection 3. The same God gave both the New and the Old Law, but in different ways. For He gave the Old Law written on tables of stone: whereas He gave the New Law written "in the fleshly tables of the heart," as the Apostle expresses it (2 Cor. 3:3). Wherefore, as Augustine says (De Spir. et Lit. xviii), "the Apostle calls this letter which is written outside man, a ministration of death and a ministration of condemnation: whereas he calls the other letter, i.e. the Law of the New Testament, the ministration of the spirit and the ministration of justice: because through the gift of the Spirit we work justice, and are delivered from the condemnation due to transgression."

Objection 1. It would seem that the New Law should have been given from the beginning of the world. “For there is no respect of persons with God” (Rom. 2:11). But “all” men “have sinned and do need the glory of God” (Rom. 3:23). Therefore the Law of the Gospel should have been given from the beginning of the world, in order that it might bring succor to all.

Objection 2. Further, as men dwell in various places, so do they live in various times. But God, “Who will have all men to be saved” (1 Tim. 2:4), commanded the Gospel to be preached in all places, as may be seen in the last chapters of Matthew and Mark. Therefore the Law of the Gospel should have been at hand for all times, so as to be given from the beginning of the world.

Objection 3. Further, man needs to save his soul, which is for all eternity, more than to save his body, which is a temporal matter. But God provided man from the beginning of the world with things that are necessary for the health of his body, by subjecting to his power whatever was created for the sake of man (Gn. 1:26-29). Therefore the New Law also, which is very necessary for the health of the soul, should have been given to man from the beginning of the world.

On the contrary, The Apostle says (1 Cor. 15:46): “That was not first which is spiritual, but that which is natural.” But the New Law is highly spiritual. Therefore it was not fitting for it to be given from the beginning of the world.

I answer that, Three reasons may be assigned why it was not fitting for the New Law to be given from the beginning of the world. The first is because the New Law, as stated above (a. 1), consists chiefly in the grace of the Holy Ghost: which it behoved not to be given abundantly until sin, which is an obstacle to grace, had been cast out of man through the accomplishment of his redemption by Christ: wherefore it is written (Jn. 7:39): “As yet the Spirit was not given, because Jesus was not yet glorified.” This reason the Apostle states clearly (Rom. 8:2, seqq.) where, after speaking of “the Law of the Spirit of life,” he adds: “God sending His own Son, in the likeness of sinful flesh, of sin* hath

condemned sin in the flesh, that the justification of the Law might be fulfilled in us.”

A second reason may be taken from the perfection of the New Law. Because a thing is not brought to perfection at once from the outset, but through an orderly succession of time; thus one is at first a boy, and then a man. And this reason is stated by the Apostle (Gal. 3:24,25): “The Law was our pedagogue in Christ that we might be justified by faith. But after the faith is come, we are no longer under a pedagogue.”

The third reason is found in the fact that the New Law is the law of grace: wherefore it behoved man first of all to be left to himself under the state of the Old Law, so that through falling into sin, he might realize his weakness, and acknowledge his need of grace. This reason is set down by the Apostle (Rom. 5:20): “The Law entered in, that sin might abound: and when sin abounded grace did more abound.”

Reply to Objection 1. Mankind on account of the sin of our first parents deserved to be deprived of the aid of grace: and so “from whom it is withheld it is justly withheld, and to whom it is given, it is mercifully given,” as Augustine states (*De Perfect. Justit.* iv)[†]. Consequently it does not follow that there is respect of persons with God, from the fact that He did not offer the Law of grace to all from the beginning of the world, which Law was to be published in due course of time, as stated above.

Reply to Objection 2. The state of mankind does not vary according to diversity of place, but according to succession of time. Hence the New Law avails for all places, but not for all times: although at all times there have been some persons belonging to the New Testament, as stated above (a. 1, ad 3).

Reply to Objection 3. Things pertaining to the health of the body are of service to man as regards his nature, which sin does not destroy: whereas things pertaining to the health of the soul are ordained to grace, which is forfeit through sin. Consequently the comparison will not hold.

* St. Thomas, quoting perhaps from memory, omits the “et” (and), after “sinful flesh.” The text quoted should read thus: “in the likeness of sinful flesh, and a sin offering (*peri hamartias*), hath,” etc. † Cf. Ep. ccvii; *De Pecc. Mer. et Rem.* ii, 19

Objection 1. It would seem that the New Law will not last until the end of the world. Because, as the Apostle says (1 Cor. 13:10), “when that which is perfect is come, that which is in part shall be done away.” But the New Law is “in part,” since the Apostle says (1 Cor. 13:9): “We know in part and we prophesy in part.” Therefore the New Law is to be done away, and will be succeeded by a more perfect state.

Objection 2. Further, Our Lord (Jn. 16:13) promised His disciples the knowledge of all truth when the Holy Ghost, the Comforter, should come. But the Church knows not yet all truth in the state of the New Testament. Therefore we must look forward to another state, wherein all truth will be revealed by the Holy Ghost.

Objection 3. Further, just as the Father is distinct from the Son and the Son from the Father, so is the Holy Ghost distinct from the Father and the Son. But there was a state corresponding with the Person of the Father, viz. the state of the Old Law, wherein men were intent on begetting children: and likewise there is a state corresponding to the Person of the Son: viz. the state of the New Law, wherein the clergy who are intent on wisdom (which is appropriated to the Son) hold a prominent place. Therefore there will be a third state corresponding to the Holy Ghost, wherein spiritual men will hold the first place.

Objection 4. Further, Our Lord said (Mat. 24:14): “This Gospel of the kingdom shall be preached in the whole world. . . and then shall the consummation come.” But the Gospel of Christ is already preached throughout the whole world: and yet the consummation has not yet come. Therefore the Gospel of Christ is not the Gospel of the kingdom, but another Gospel, that of the Holy Ghost, is to come yet, like unto another Law.

On the contrary, Our Lord said (Mat. 24:34): “I say to you that this generation shall not pass till all (these) things be done”: which passage Chrysostom (Hom. lxxvii) explains as referring to “the generation of those that believe in Christ.” Therefore the state of those who believe in Christ will last until the consummation of the world.

I answer that, The state of the world may change in two ways. In one way, according to a change of law: and thus no other state will succeed this state of the New Law. Because the state of the New Law succeeded the state of the Old Law, as a more perfect law a less perfect one. Now no state of the present life can be more perfect than the state of the New Law: since nothing can approach nearer to the last end than that which is the immediate cause of our being brought to the last end. But the New Law does this: wherefore the Apostle says (Heb. 10:19-22): “Having therefore, brethren, a confidence in the entering into the Holies by the blood of Christ, a new. . . way which He hath dedicated for us. . . let us draw near.” Therefore no state of

the present life can be more perfect than that of the New Law, since the nearer a thing is to the last end the more perfect it is.

In another way the state of mankind may change according as man stands in relation to one and the same law more or less perfectly. And thus the state of the Old Law underwent frequent changes, since at times the laws were very well kept, and at other times were altogether unheeded. Thus, too, the state of the New Law is subject to change with regard to various places, times, and persons, according as the grace of the Holy Ghost dwells in man more or less perfectly. Nevertheless we are not to look forward to a state wherein man is to possess the grace of the Holy Ghost more perfectly than he has possessed it hitherto, especially the apostles who “received the firstfruits of the Spirit, i.e. sooner and more abundantly than others,” as a gloss expounds on Rom. 8:23.

Reply to Objection 1. As Dionysius says (Eccl. Hier. v), there is a threefold state of mankind; the first was under the Old Law; the second is that of the New Law; the third will take place not in this life, but in heaven. But as the first state is figurative and imperfect in comparison with the state of the Gospel; so is the present state figurative and imperfect in comparison with the heavenly state, with the advent of which the present state will be done away as expressed in that very passage (1 Cor. 13:12): “We see now through a glass in a dark manner; but then face to face.”

Reply to Objection 2. As Augustine says (Contra Faust. xix, 31), Montanus and Priscilla pretended that Our Lord’s promise to give the Holy Ghost was fulfilled, not in the apostles, but in themselves. In like manner the Manicheans maintained that it was fulfilled in Manes whom they held to be the Paraclete. Hence none of the above received the Acts of the Apostles, where it is clearly shown that the aforesaid promise was fulfilled in the apostles: just as Our Lord promised them a second time (Acts 1:5): “You shall be baptized with the Holy Ghost, not many days hence”: which we read as having been fulfilled in Acts 2. However, these foolish notions are refuted by the statement (Jn. 7:39) that “as yet the Spirit was not given, because Jesus was not yet glorified”; from which we gather that the Holy Ghost was given as soon as Christ was glorified in His Resurrection and Ascension. Moreover, this puts out of court the senseless idea that the Holy Ghost is to be expected to come at some other time.

Now the Holy Ghost taught the apostles all truth in respect of matters necessary for salvation; those things, to wit, that we are bound to believe and to do. But He did not teach them about all future events: for this did not regard them according to Acts 1:7: “It is not for you to know the times or moments which the Father hath put in His own power.”

Reply to Objection 3. The Old Law corresponded

not only to the Father, but also to the Son: because Christ was foreshadowed in the Old Law. Hence Our Lord said (Jn. 5:46): “If you did believe Moses, you would perhaps believe me also; for he wrote of Me.” In like manner the New Law corresponds not only to Christ, but also to the Holy Ghost; according to Rom. 8:2: “The Law of the Spirit of life in Christ Jesus,” etc. Hence we are not to look forward to another law corresponding to the Holy Ghost.

Reply to Objection 4. Since Christ said at the very outset of the preaching of the Gospel: “The kingdom of heaven is at hand” (Mat. 4:17), it is most absurd to say that the Gospel of Christ is not the Gospel of the kingdom. But the preaching of the Gospel of Christ may be

understood in two ways. First, as denoting the spreading abroad of the knowledge of Christ: and thus the Gospel was preached throughout the world even at the time of the apostles, as Chrysostom states (Hom. lxxv in Matth.). And in this sense the words that follow—“and then shall the consummation come,” refer to the destruction of Jerusalem, of which He was speaking literally. Secondly, the preaching of the Gospel may be understood as extending throughout the world and producing its full effect, so that, to wit, the Church would be founded in every nation. And in these sense, as Augustine writes to Hesychius (Epist. cxcix), the Gospel is not preached to the whole world yet, but, when it is, the consummation of the world will come.

FIRST PART OF THE SECOND PART, QUESTION 107

Of the New Law As Compared with the Old (In Four Articles)

We must now consider the New Law as compared with the Old: under which head there are four points of inquiry:

- (1) Whether the New Law is distinct from the Old Law?
- (2) Whether the New Law fulfils the Old?
- (3) Whether the New Law is contained in the Old?
- (4) Which is the more burdensome, the New or the Old Law?

Whether the New Law is distinct from the Old Law?

Ia IIae q. 107 a. 1

Objection 1. It would seem that the New Law is not distinct from the Old. Because both these laws were given to those who believe in God: since “without faith it is impossible to please God,” according to Heb. 11:6. But the faith of olden times and of nowadays is the same, as the gloss says on Mat. 21:9. Therefore the law is the same also.

Objection 2. Further, Augustine says (Contra Adamant. Manich. discip. xvii) that “there is little difference between the Law and Gospel”—“fear and love.” But the New and Old Laws cannot be differentiated in respect of these two things: since even the Old Law comprised precepts of charity: “Thou shalt love thy neighbor” (Lev. 19:18), and: “Thou shalt love the Lord thy God” (Dt. 6:5). In like manner neither can they differ according to the other difference which Augustine assigns (Contra Faust. iv, 2), viz. that “the Old Testament contained temporal promises, whereas the New Testament contains spiritual and eternal promises”: since even the New Testament contains temporal promises, according to Mk. 10:30: He shall receive “a hundred times as much. . . in this time, houses and brethren,” etc.: while in the Old Testament they hoped in promises spiritual and eternal, according to Heb. 11:16: “But now they desire a better, that is to say, a heavenly country,” which is said of the patriarchs. Therefore it seems that the New Law is not distinct from the Old.

Objection 3. Further, the Apostle seems to distinguish both laws by calling the Old Law “a law of works,” and the New Law “a law of faith” (Rom. 3:27). But the Old Law was also a law of faith, according to Heb. 11:39: “All were [Vulg.: ‘All these being’] approved by the testimony of faith,” which he says of the fathers of the Old Testament. In like manner the New Law is a law of works: since it is written (Mat. 5:44): “Do good to them that hate you”; and (Lk. 22:19): “Do this for a commemoration of Me.” Therefore the New Law is not distinct from the Old.

On the contrary, the Apostle says (Heb. 7:12): “The priesthood being translated it is necessary that a translation also be made of the Law.” But the priest-

hood of the New Testament is distinct from that of the Old, as the Apostle shows in the same place. Therefore the Law is also distinct.

I answer that, As stated above (q. 90, a. 2; q. 91, a. 4), every law ordains human conduct to some end. Now things ordained to an end may be divided in two ways, considered from the point of view of the end. First, through being ordained to different ends: and this difference will be specific, especially if such ends are proximate. Secondly, by reason of being closely or remotely connected with the end. Thus it is clear that movements differ in species through being directed to different terms: while according as one part of a movement is nearer to the term than another part, the difference of perfect and imperfect movement is assessed.

Accordingly then two laws may be distinguished from one another in two ways. First, through being altogether diverse, from the fact that they are ordained to diverse ends: thus a state-law ordained to democratic government, would differ specifically from a law ordained to government by the aristocracy. Secondly, two laws may be distinguished from one another, through one of them being more closely connected with the end, and the other more remotely: thus in one and the same state there is one law enjoined on men of mature age, who can forthwith accomplish that which pertains to the common good; and another law regulating the education of children who need to be taught how they are to achieve manly deeds later on.

We must therefore say that, according to the first way, the New Law is not distinct from the Old Law: because they both have the same end, namely, man’s subjection to God; and there is but one God of the New and of the Old Testament, according to Rom. 3:30: “It is one God that justifieth circumcision by faith, and uncircumcision through faith.” According to the second way, the New Law is distinct from the Old Law: because the Old Law is like a pedagogue of children, as the Apostle says (Gal. 3:24), whereas the New Law is the law of perfection, since it is the law of charity, of which the Apostle says (Col. 3:14) that it is “the bond of perfection.”

* The ‘little difference’ refers to the Latin words ‘timor’ and ‘amor’

Reply to Objection 1. The unity of faith under both Testaments witnesses to the unity of end: for it has been stated above (q. 62, a. 2) that the object of the theological virtues, among which is faith, is the last end. Yet faith had a different state in the Old and in the New Law: since what they believed as future, we believe as fact.

Reply to Objection 2. All the differences assigned between the Old and New Laws are gathered from their relative perfection and imperfection. For the precepts of every law prescribe acts of virtue. Now the imperfect, who as yet are not possessed of a virtuous habit, are directed in one way to perform virtuous acts, while those who are perfected by the possession of virtuous habits are directed in another way. For those who as yet are not endowed with virtuous habits, are directed to the performance of virtuous acts by reason of some outward cause: for instance, by the threat of punishment, or the promise of some extrinsic rewards, such as honor, riches, or the like. Hence the Old Law, which was given to men who were imperfect, that is, who had not yet received spiritual grace, was called the “law of fear;” inasmuch as it induced men to observe its commandments by threatening them with penalties; and is spoken of as containing temporal promises. On the other hand, those who are possessed of virtue, are inclined to do virtuous deeds through love of virtue, not on account of some extrinsic punishment or reward. Hence the New Law which derives its pre-eminence from the spiritual grace instilled into our hearts, is called the “Law of love”: and it is described as containing spiritual and eternal promises, which are objects of the virtues, chiefly of charity. Accordingly such persons are inclined of themselves to those objects, not as to something foreign but as to something of their own. For this reason, too, the Old Law is described as “restraining the hand, not

the will”*; since when a man refrains from some sins through fear of being punished, his will does not shrink simply from sin, as does the will of a man who refrains from sin through love of righteousness: and hence the New Law, which is the Law of love, is said to restrain the will.

Nevertheless there were some in the state of the Old Testament who, having charity and the grace of the Holy Ghost, looked chiefly to spiritual and eternal promises: and in this respect they belonged to the New Law. In like manner in the New Testament there are some carnal men who have not yet attained to the perfection of the New Law; and these it was necessary, even under the New Testament, to lead to virtuous action by the fear of punishment and by temporal promises.

But although the Old Law contained precepts of charity, nevertheless it did not confer the Holy Ghost by Whom “charity. . . is spread abroad in our hearts” (Rom. 5:5).

Reply to Objection 3. As stated above (q. 106, Aa. 1,2), the New Law is called the law of faith, in so far as its pre-eminence is derived from that very grace which is given inwardly to believers, and for this reason is called the grace of faith. Nevertheless it consists secondarily in certain deeds, moral and sacramental: but the New Law does not consist chiefly in these latter things, as did the Old Law. As to those under the Old Testament who through faith were acceptable to God, in this respect they belonged to the New Testament: for they were not justified except through faith in Christ, Who is the Author of the New Testament. Hence of Moses the Apostle says (Heb. 11:26) that he esteemed “the reproach of Christ greater riches than the treasure of the Egyptians.”

Whether the New Law fulfils the Old?

Ia IIae q. 107 a. 2

Objection 1. It would seem that the New Law does not fulfil the Old. Because to fulfil and to void are contrary. But the New Law voids or excludes the observances of the Old Law: for the Apostle says (Gal. 5:2): “If you be circumcised, Christ shall profit you nothing.” Therefore the New Law is not a fulfilment of the Old.

Objection 2. Further, one contrary is not the fulfilment of another. But Our Lord propounded in the New Law precepts that were contrary to precepts of the Old Law. For we read (Mat. 5:27-32): You have heard that it was said to them of old: . . . “Whosoever shall put away his wife, let him give her a bill of divorce. But I say to you that whosoever shall put away his wife. . . maketh her to commit adultery.” Furthermore, the same evidently applies to the prohibition against swearing, against retaliation, and against hating one’s enemies. In like manner Our Lord seems to have done

away with the precepts of the Old Law relating to the different kinds of foods (Mat. 15:11): “Not that which goeth into the mouth defileth the man: but what cometh out of the mouth, this defileth a man.” Therefore the New Law is not a fulfilment of the Old.

Objection 3. Further, whoever acts against a law does not fulfil the law. But Christ in certain cases acted against the Law. For He touched the leper (Mat. 8:3), which was contrary to the Law. Likewise He seems to have frequently broken the sabbath; since the Jews used to say of Him (Jn. 9:16): “This man is not of God, who keepeth not the sabbath.” Therefore Christ did not fulfil the Law: and so the New Law given by Christ is not a fulfilment of the Old.

Objection 4. Further, the Old Law contained precepts, moral, ceremonial, and judicial, as stated above (q. 99, a. 4). But Our Lord (Mat. 5) fulfilled the Law in

* Peter Lombard, Sent. iii, D, 40

some respects, but without mentioning the judicial and ceremonial precepts. Therefore it seems that the New Law is not a complete fulfilment of the Old.

On the contrary, Our Lord said (Mat. 5:17): “I am not come to destroy, but to fulfil”: and went on to say (Mat. 5:18): “One jot or one tittle shall not pass of the Law till all be fulfilled.”

I answer that, As stated above (a. 1), the New Law is compared to the Old as the perfect to the imperfect. Now everything perfect fulfils that which is lacking in the imperfect. And accordingly the New Law fulfils the Old by supplying that which was lacking in the Old Law.

Now two things of every law is to make men righteous and virtuous, as was stated above (q. 92, a. 1): and consequently the end of the Old Law was the justification of men. The Law, however, could not accomplish this: but foreshadowed it by certain ceremonial actions, and promised it in words. And in this respect, the New Law fulfils the Old by justifying men through the power of Christ’s Passion. This is what the Apostle says (Rom. 8:3,4): “What the Law could not do. . . God sending His own Son in the likeness of sinful flesh. . . hath condemned sin in the flesh, that the justification of the Law might be fulfilled in us.” And in this respect, the New Law gives what the Old Law promised, according to 2 Cor. 1:20: “Whatever are the promises of God, in Him,” i.e. in Christ, “they are ‘Yea’.”* Again, in this respect, it also fulfils what the Old Law foreshadowed. Hence it is written (Col. 2:17) concerning the ceremonial precepts that they were “a shadow of things to come, but the body is of Christ”; in other words, the reality is found in Christ. Wherefore the New Law is called the law of reality; whereas the Old Law is called the law of shadow or of figure.

Now Christ fulfilled the precepts of the Old Law both in His works and in His doctrine. In His works, because He was willing to be circumcised and to fulfil the other legal observances, which were binding for the time being; according to Gal. 4:4: “Made under the Law.” In His doctrine He fulfilled the precepts of the Law in three ways. First, by explaining the true sense of the Law. This is clear in the case of murder and adultery, the prohibition of which the Scribes and Pharisees thought to refer only to the exterior act: wherefore Our Lord fulfilled the Law by showing that the prohibition extended also to the interior acts of sins. Secondly, Our Lord fulfilled the precepts of the Law by prescribing the safest way of complying with the statutes of the Old Law. Thus the Old Law forbade perjury: and this is more safely avoided, by abstaining altogether from swearing, save in cases of urgency. Thirdly, Our Lord fulfilled the precepts of the Law, by adding some counsels of perfection: this is clearly seen in Mat. 19:21, where Our Lord said to the man who affirmed that he had kept all the precepts of the Old Law: “One thing is

wanting to thee: If thou wilt be perfect, go, sell whatsoever thou hast,” etc.†.

Reply to Objection 1. The New Law does not void observance of the Old Law except in the point of ceremonial precepts, as stated above (q. 103, Aa. 3,4). Now the latter were figurative of something to come. Wherefore from the very fact that the ceremonial precepts were fulfilled when those things were accomplished which they foreshadowed, it follows that they are no longer to be observed: for if they were to be observed, this would mean that something is still to be accomplished and is not yet fulfilled. Thus the promise of a future gift holds no longer when it has been fulfilled by the presentation of the gift. In this way the legal ceremonies are abolished by being fulfilled.

Reply to Objection 2. As Augustine says (Contra Faust. xix, 26), those precepts of Our Lord are not contrary to the precepts of the Old Law. For what Our Lord commanded about a man not putting away his wife, is not contrary to what the Law prescribed. “For the Law did not say: ‘Let him that wills, put his wife away’: the contrary of which would be not to put her away. On the contrary, the Law was unwilling that a man should put away his wife, since it prescribed a delay, so that excessive eagerness for divorce might cease through being weakened during the writing of the bill. Hence Our Lord, in order to impress the fact that a wife ought not easily to be put away, allowed no exception save in the case of fornication.” The same applies to the prohibition about swearing, as stated above. The same is also clear with respect to the prohibition of retaliation. For the Law fixed a limit to revenge, by forbidding men to seek vengeance unreasonably: whereas Our Lord deprived them of vengeance more completely by commanding them to abstain from it altogether. With regard to the hatred of one’s enemies, He dispelled the false interpretation of the Pharisees, by admonishing us to hate, not the person, but his sin. As to discriminating between various foods, which was a ceremonial matter, Our Lord did not forbid this to be observed: but He showed that no foods are naturally unclean, but only in token of something else, as stated above (q. 102, a. 6, ad 1).

Reply to Objection 3. It was forbidden by the Law to touch a leper; because by doing so, man incurred a certain uncleanness of irregularity, as also by touching the dead, as stated above (q. 102, a. 5, ad 4). But Our Lord, Who healed the leper, could not contract an uncleanness. By those things which He did on the sabbath, He did not break the sabbath in reality, as the Master Himself shows in the Gospel: both because He worked miracles by His Divine power, which is ever active among things; and because He worked miracles by His Divine power, which is ever active among things; and because His works were concerned with the salvation of man, while the Pharisees were concerned for the

* The Douay version reads thus: “All the promises of God are in Him, ‘It is’.” † St. Thomas combines Mat. 19:21 with Mk. 10:21

well-being of animals even on the sabbath; and again because on account of urgency He excused His disciples for gathering the ears of corn on the sabbath. But He did seem to break the sabbath according to the superstitious interpretation of the Pharisees, who thought that man ought to abstain from doing even works of kindness on the sabbath; which was contrary to the intention of the Law.

Reply to Objection 4. The reason why the ceremonial precepts of the Law are not mentioned in Mat. 5

is because, as stated above (ad 1), their observance was abolished by their fulfilment. But of the judicial precepts He mentioned that of retaliation: so that what He said about it should refer to all the others. With regard to this precept, He taught that the intention of the Law was that retaliation should be sought out of love of justice, and not as a punishment out of revengeful spite, which He forbade, admonishing man to be ready to suffer yet greater insults; and this remains still in the New Law.

Whether the New Law is contained in the Old?

Ia IIae q. 107 a. 3

Objection 1. It would seem that the New Law is not contained in the Old. Because the New Law consists chiefly in faith: wherefore it is called the “law of faith” (Rom. 3:27). But many points of faith are set forth in the New Law, which are not contained in the Old. Therefore the New Law is not contained in the Old.

Objection 2. Further, a gloss says on Mat. 5:19, “He that shall break one of these least commandments,” that the lesser commandments are those of the Law, and the greater commandments, those contained in the Gospel. Now the greater cannot be contained in the lesser. Therefore the New Law is not contained in the Old.

Objection 3. Further, who holds the container holds the contents. If, therefore, the New Law is contained in the Old, it follows that whoever had the Old Law had the New: so that it was superfluous to give men a New Law when once they had the Old. Therefore the New Law is not contained in the Old.

On the contrary, As expressed in Ezech. 1:16, there was “a wheel in the midst of a wheel,” i.e. “the New Testament within the Old,” according to Gregory’s exposition.

I answer that, One thing may be contained in another in two ways. First, actually; as a located thing is in a place. Secondly, virtually; as an effect in its cause, or as the complement in that which is incomplete; thus a genus contains its species, and a seed contains the whole tree, virtually. It is in this way that the New Law is contained in the Old: for it has been stated (a. 1) that the New Law is compared to the Old as perfect to imperfect. Hence Chrysostom, expounding Mk. 4:28, “The earth of itself bringeth forth fruit, first the blade, then

the ear, afterwards the full corn in the ear,” expresses himself as follows: “He brought forth first the blade, i.e. the Law of Nature; then the ear, i.e. the Law of Moses; lastly, the full corn, i.e. the Law of the Gospel.” Hence then the New Law is in the Old as the corn in the ear.

Reply to Objection 1. Whatsoever is set down in the New Testament explicitly and openly as a point of faith, is contained in the Old Testament as a matter of belief, but implicitly, under a figure. And accordingly, even as to those things which we are bound to believe, the New Law is contained in the Old.

Reply to Objection 2. The precepts of the New Law are said to be greater than those of the Old Law, in the point of their being set forth explicitly. But as to the substance itself of the precepts of the New Testament, they are all contained in the Old. Hence Augustine says (Contra Faust. xix, 23,28) that “nearly all Our Lord’s admonitions or precepts, where He expressed Himself by saying: ‘But I say unto you,’ are to be found also in those ancient books. Yet, since they thought that murder was only the slaying of the human body, Our Lord declared to them that every wicked impulse to hurt our brother is to be looked on as a kind of murder.” And it is in the point of declarations of this kind that the precepts of the New Law are said to be greater than those of the Old. Nothing, however, prevents the greater from being contained in the lesser virtually; just as a tree is contained in the seed.

Reply to Objection 3. What is set forth implicitly needs to be declared explicitly. Hence after the publishing of the Old Law, a New Law also had to be given.

Whether the New Law is more burdensome than the Old?

Ia IIae q. 107 a. 4

Objection 1. It would seem that the New Law is more burdensome than the Old. For Chrysostom (Opus Imp. in Matth., Hom. x*) say: “The commandments given to Moses are easy to obey: Thou shalt not kill; Thou shalt not commit adultery: but the commandments of Christ are difficult to accomplish, for instance: Thou shalt not give way to anger, or to lust.” Therefore the

New Law is more burdensome than the Old.

Objection 2. Further, it is easier to make use of earthly prosperity than to suffer tribulations. But in the Old Testament observance of the Law was followed by temporal prosperity, as may be gathered from Dt. 28:1-14; whereas many kinds of trouble ensue to those who observe the New Law, as stated in 2 Cor. 6:4-10: “Let us

* The work of an unknown author

exhibit ourselves as the ministers of God, in much patience, in tribulation, in necessities, in distresses,” etc. Therefore the New Law is more burdensome than the Old.

Objection 3. The more one has to do, the more difficult it is. But the New Law is something added to the Old. For the Old Law forbade perjury, while the New Law proscribed even swearing: the Old Law forbade a man to cast off his wife without a bill of divorce, while the New Law forbade divorce altogether; as is clearly stated in Mat. 5:31, seqq., according to Augustine’s expounding. Therefore the New Law is more burdensome than the Old.

On the contrary, It is written (Mat. 11:28): “Come to Me, all you that labor and are burdened”: which words are expounded by Hilary thus: “He calls to Himself all those that labor under the difficulty of observing the Law, and are burdened with the sins of this world.” And further on He says of the yoke of the Gospel: “For My yoke is sweet and My burden light.” Therefore the New Law is a lighter burden than the Old.

I answer that, A twofold difficulty may attach to works of virtue with which the precepts of the Law are concerned. One is on the part of the outward works, which of themselves are, in a way, difficult and burdensome. And in this respect the Old Law is a much heavier burden than the New: since the Old Law by its numerous ceremonies prescribed many more outward acts than the New Law, which, in the teaching of Christ and the apostles, added very few precepts to those of the natural law; although afterwards some were added, through being instituted by the holy Fathers. Even in these Augustine says that moderation should be observed, lest good conduct should become a burden to the faithful. For he says in reply to the queries of Januarius (Ep. lv) that, “whereas God in His mercy wished religion to be a free service rendered by the public solemnization of a small number of most manifest sacraments, certain persons make it a slave’s burden; so much so that the state

of the Jews who were subject to the sacraments of the Law, and not to the presumptuous devices of man, was more tolerable.”

The other difficulty attaches to works of virtue as to interior acts: for instance, that a virtuous deed be done with promptitude and pleasure. It is this difficulty that virtue solves: because to act thus is difficult for a man without virtue: but through virtue it becomes easy for him. In this respect the precepts of the New Law are more burdensome than those of the Old; because the New Law prohibits certain interior movements of the soul, which were not expressly forbidden in the Old Law in all cases, although they were forbidden in some, without, however, any punishment being attached to the prohibition. Now this is very difficult to a man without virtue: thus even the Philosopher states (Ethic. v, 9) that it is easy to do what a righteous man does; but that to do it in the same way, viz. with pleasure and promptitude, is difficult to a man who is not righteous. Accordingly we read also (1 Jn. 5:3) that “His commandments are not heavy”: which words Augustine expounds by saying that “they are not heavy to the man that loveth; whereas they are a burden to him that loveth not.”

Reply to Objection 1. The passage quoted speaks expressly of the difficulty of the New Law as to the deliberate curbing of interior movements.

Reply to Objection 2. The tribulations suffered by those who observe the New Law are not imposed by the Law itself. Moreover they are easily borne, on account of the love in which the same Law consists: since, as Augustine says (De Verb. Dom., Serm. lxx), “love makes light and nothing of things that seem arduous and beyond our power.”

Reply to Objection 3. The object of these additions to the precepts of the Old Law was to render it easier to do what it prescribed, as Augustine states*. Accordingly this does not prove that the New Law is more burdensome, but rather that it is a lighter burden.

* De Serm. Dom. in Monte i, 17,21; xix, 23,26

Objection 1. It would seem that the New Law is not distinct from the Old. Because both these laws were given to those who believe in God: since “without faith it is impossible to please God,” according to Heb. 11:6. But the faith of olden times and of nowadays is the same, as the gloss says on Mat. 21:9. Therefore the law is the same also.

Objection 2. Further, Augustine says (*Contra Adamant. Manich. discip. xvii*) that “there is little difference between the Law and Gospel”^{*}—“fear and love.” But the New and Old Laws cannot be differentiated in respect of these two things: since even the Old Law comprised precepts of charity: “Thou shalt love thy neighbor” (Lev. 19:18), and: “Thou shalt love the Lord thy God” (Dt. 6:5). In like manner neither can they differ according to the other difference which Augustine assigns (*Contra Faust. iv, 2*), viz. that “the Old Testament contained temporal promises, whereas the New Testament contains spiritual and eternal promises”: since even the New Testament contains temporal promises, according to Mk. 10:30: He shall receive “a hundred times as much. . . in this time, houses and brethren,” etc.: while in the Old Testament they hoped in promises spiritual and eternal, according to Heb. 11:16: “But now they desire a better, that is to say, a heavenly country,” which is said of the patriarchs. Therefore it seems that the New Law is not distinct from the Old.

Objection 3. Further, the Apostle seems to distinguish both laws by calling the Old Law “a law of works,” and the New Law “a law of faith” (Rom. 3:27). But the Old Law was also a law of faith, according to Heb. 11:39: “All were [Vulg.: ‘All these being’] approved by the testimony of faith,” which he says of the fathers of the Old Testament. In like manner the New Law is a law of works: since it is written (Mat. 5:44): “Do good to them that hate you”; and (Lk. 22:19): “Do this for a commemoration of Me.” Therefore the New Law is not distinct from the Old.

On the contrary, the Apostle says (Heb. 7:12): “The priesthood being translated it is necessary that a translation also be made of the Law.” But the priesthood of the New Testament is distinct from that of the Old, as the Apostle shows in the same place. Therefore the Law is also distinct.

I answer that, As stated above (q. 90, a. 2; q. 91, a. 4), every law ordains human conduct to some end. Now things ordained to an end may be divided in two ways, considered from the point of view of the end. First, through being ordained to different ends: and this difference will be specific, especially if such ends are proximate. Secondly, by reason of being closely or remotely connected with the end. Thus it is clear that movements differ in species through being directed to

different terms: while according as one part of a movement is nearer to the term than another part, the difference of perfect and imperfect movement is assessed.

Accordingly then two laws may be distinguished from one another in two ways. First, through being altogether diverse, from the fact that they are ordained to diverse ends: thus a state-law ordained to democratic government, would differ specifically from a law ordained to government by the aristocracy. Secondly, two laws may be distinguished from one another, through one of them being more closely connected with the end, and the other more remotely: thus in one and the same state there is one law enjoined on men of mature age, who can forthwith accomplish that which pertains to the common good; and another law regulating the education of children who need to be taught how they are to achieve manly deeds later on.

We must therefore say that, according to the first way, the New Law is not distinct from the Old Law: because they both have the same end, namely, man’s subjection to God; and there is but one God of the New and of the Old Testament, according to Rom. 3:30: “It is one God that justifieth circumcision by faith, and uncircumcision through faith.” According to the second way, the New Law is distinct from the Old Law: because the Old Law is like a pedagogue of children, as the Apostle says (Gal. 3:24), whereas the New Law is the law of perfection, since it is the law of charity, of which the Apostle says (Col. 3:14) that it is “the bond of perfection.”

Reply to Objection 1. The unity of faith under both Testaments witnesses to the unity of end: for it has been stated above (q. 62, a. 2) that the object of the theological virtues, among which is faith, is the last end. Yet faith had a different state in the Old and in the New Law: since what they believed as future, we believe as fact.

Reply to Objection 2. All the differences assigned between the Old and New Laws are gathered from their relative perfection and imperfection. For the precepts of every law prescribe acts of virtue. Now the imperfect, who as yet are not possessed of a virtuous habit, are directed in one way to perform virtuous acts, while those who are perfected by the possession of virtuous habits are directed in another way. For those who as yet are not endowed with virtuous habits, are directed to the performance of virtuous acts by reason of some outward cause: for instance, by the threat of punishment, or the promise of some extrinsic rewards, such as honor, riches, or the like. Hence the Old Law, which was given to men who were imperfect, that is, who had not yet received spiritual grace, was called the “law of fear,” inasmuch as it induced men to observe its commandments by threatening them with penalties; and is spoken of as

* The ‘little difference’ refers to the Latin words ‘timor’ and ‘amor’

containing temporal promises. On the other hand, those who are possessed of virtue, are inclined to do virtuous deeds through love of virtue, not on account of some extrinsic punishment or reward. Hence the New Law which derives its pre-eminence from the spiritual grace instilled into our hearts, is called the “Law of love”: and it is described as containing spiritual and eternal promises, which are objects of the virtues, chiefly of charity. Accordingly such persons are inclined of themselves to those objects, not as to something foreign but as to something of their own. For this reason, too, the Old Law is described as “restraining the hand, not the will”[†]; since when a man refrains from some sins through fear of being punished, his will does not shrink simply from sin, as does the will of a man who refrains from sin through love of righteousness: and hence the New Law, which is the Law of love, is said to restrain the will.

Nevertheless there were some in the state of the Old Testament who, having charity and the grace of the Holy Ghost, looked chiefly to spiritual and eternal promises: and in this respect they belonged to the New Law. In like manner in the New Testament there are some carnal men who have not yet attained to the

perfection of the New Law; and these it was necessary, even under the New Testament, to lead to virtuous action by the fear of punishment and by temporal promises.

But although the Old Law contained precepts of charity, nevertheless it did not confer the Holy Ghost by Whom “charity... is spread abroad in our hearts” (Rom. 5:5).

Reply to Objection 3. As stated above (q. 106, Aa. 1,2), the New Law is called the law of faith, in so far as its pre-eminence is derived from that very grace which is given inwardly to believers, and for this reason is called the grace of faith. Nevertheless it consists secondarily in certain deeds, moral and sacramental: but the New Law does not consist chiefly in these latter things, as did the Old Law. As to those under the Old Testament who through faith were acceptable to God, in this respect they belonged to the New Testament: for they were not justified except through faith in Christ, Who is the Author of the New Testament. Hence of Moses the Apostle says (Heb. 11:26) that he esteemed “the reproach of Christ greater riches than the treasure of the Egyptians.”

[†] Peter Lombard, Sent. iii, D, 40

Objection 1. It would seem that the New Law does not fulfil the Old. Because to fulfil and to void are contrary. But the New Law voids or excludes the observances of the Old Law: for the Apostle says (Gal. 5:2): “If you be circumcised, Christ shall profit you nothing.” Therefore the New Law is not a fulfilment of the Old.

Objection 2. Further, one contrary is not the fulfilment of another. But Our Lord propounded in the New Law precepts that were contrary to precepts of the Old Law. For we read (Mat. 5:27-32): You have heard that it was said to them of old: . . . “Whosoever shall put away his wife, let him give her a bill of divorce. But I say to you that whosoever shall put away his wife. . . maketh her to commit adultery.” Furthermore, the same evidently applies to the prohibition against swearing, against retaliation, and against hating one’s enemies. In like manner Our Lord seems to have done away with the precepts of the Old Law relating to the different kinds of foods (Mat. 15:11): “Not that which goeth into the mouth defileth the man: but what cometh out of the mouth, this defileth a man.” Therefore the New Law is not a fulfilment of the Old.

Objection 3. Further, whoever acts against a law does not fulfil the law. But Christ in certain cases acted against the Law. For He touched the leper (Mat. 8:3), which was contrary to the Law. Likewise He seems to have frequently broken the sabbath; since the Jews used to say of Him (Jn. 9:16): “This man is not of God, who keepeth not the sabbath.” Therefore Christ did not fulfil the Law: and so the New Law given by Christ is not a fulfilment of the Old.

Objection 4. Further, the Old Law contained precepts, moral, ceremonial, and judicial, as stated above (q. 99, a. 4). But Our Lord (Mat. 5) fulfilled the Law in some respects, but without mentioning the judicial and ceremonial precepts. Therefore it seems that the New Law is not a complete fulfilment of the Old.

On the contrary, Our Lord said (Mat. 5:17): “I am not come to destroy, but to fulfil”: and went on to say (Mat. 5:18): “One jot or one tittle shall not pass of the Law till all be fulfilled.”

I answer that, As stated above (a. 1), the New Law is compared to the Old as the perfect to the imperfect. Now everything perfect fulfils that which is lacking in the imperfect. And accordingly the New Law fulfils the Old by supplying that which was lacking in the Old Law.

Now two things of every law is to make men righteous and virtuous, as was stated above (q. 92, a. 1): and consequently the end of the Old Law was the justification of men. The Law, however, could not accomplish this: but foreshadowed it by certain ceremonial actions, and promised it in words. And in this respect, the New Law fulfils the Old by justifying men through the

power of Christ’s Passion. This is what the Apostle says (Rom. 8:3,4): “What the Law could not do. . . God sending His own Son in the likeness of sinful flesh. . . hath condemned sin in the flesh, that the justification of the Law might be fulfilled in us.” And in this respect, the New Law gives what the Old Law promised, according to 2 Cor. 1:20: “Whatever are the promises of God, in Him,” i.e. in Christ, “they are ‘Yea’.”* Again, in this respect, it also fulfils what the Old Law foreshadowed. Hence it is written (Col. 2:17) concerning the ceremonial precepts that they were “a shadow of things to come, but the body is of Christ”; in other words, the reality is found in Christ. Wherefore the New Law is called the law of reality; whereas the Old Law is called the law of shadow or of figure.

Now Christ fulfilled the precepts of the Old Law both in His works and in His doctrine. In His works, because He was willing to be circumcised and to fulfil the other legal observances, which were binding for the time being; according to Gal. 4:4: “Made under the Law.” In His doctrine He fulfilled the precepts of the Law in three ways. First, by explaining the true sense of the Law. This is clear in the case of murder and adultery, the prohibition of which the Scribes and Pharisees thought to refer only to the exterior act: wherefore Our Lord fulfilled the Law by showing that the prohibition extended also to the interior acts of sins. Secondly, Our Lord fulfilled the precepts of the Law by prescribing the safest way of complying with the statutes of the Old Law. Thus the Old Law forbade perjury: and this is more safely avoided, by abstaining altogether from swearing, save in cases of urgency. Thirdly, Our Lord fulfilled the precepts of the Law, by adding some counsels of perfection: this is clearly seen in Mat. 19:21, where Our Lord said to the man who affirmed that he had kept all the precepts of the Old Law: “One thing is wanting to thee: If thou wilt be perfect, go, sell whatsoever thou hast,” etc.†.

Reply to Objection 1. The New Law does not void observance of the Old Law except in the point of ceremonial precepts, as stated above (q. 103, Aa. 3,4). Now the latter were figurative of something to come. Wherefore from the very fact that the ceremonial precepts were fulfilled when those things were accomplished which they foreshadowed, it follows that they are no longer to be observed: for it they were to be observed, this would mean that something is still to be accomplished and is not yet fulfilled. Thus the promise of a future gift holds no longer when it has been fulfilled by the presentation of the gift. In this way the legal ceremonies are abolished by being fulfilled.

Reply to Objection 2. As Augustine says (Contra Faust. xix, 26), those precepts of Our Lord are not contrary to the precepts of the Old Law. For what Our Lord

* The Douay version reads thus: “All the promises of God are in Him, ‘It is!’” † St. Thomas combines Mat. 19:21 with Mk. 10:21

commanded about a man not putting away his wife, is not contrary to what the Law prescribed. "For the Law did not say: 'Let him that wills, put his wife away': the contrary of which would be not to put her away. On the contrary, the Law was unwilling that a man should put away his wife, since it prescribed a delay, so that excessive eagerness for divorce might cease through being weakened during the writing of the bill. Hence Our Lord, in order to impress the fact that a wife ought not easily to be put away, allowed no exception save in the case of fornication." The same applies to the prohibition about swearing, as stated above. The same is also clear with respect to the prohibition of retaliation. For the Law fixed a limit to revenge, by forbidding men to seek vengeance unreasonably: whereas Our Lord deprived them of vengeance more completely by commanding them to abstain from it altogether. With regard to the hatred of one's enemies, He dispelled the false interpretation of the Pharisees, by admonishing us to hate, not the person, but his sin. As to discriminating between various foods, which was a ceremonial matter, Our Lord did not forbid this to be observed: but He showed that no foods are naturally unclean, but only in token of something else, as stated above (q. 102, a. 6, ad 1).

Reply to Objection 3. It was forbidden by the Law to touch a leper; because by doing so, man incurred a certain uncleanness of irregularity, as also by touching the dead, as stated above (q. 102, a. 5, ad 4). But Our

Lord, Who healed the leper, could not contract an uncleanness. By those things which He did on the sabbath, He did not break the sabbath in reality, as the Master Himself shows in the Gospel: both because He worked miracles by His Divine power, which is ever active among things; and because He worked miracles by His Divine power, which is ever active among things; and because His works were concerned with the salvation of man, while the Pharisees were concerned for the well-being of animals even on the sabbath; and again because on account of urgency He excused His disciples for gathering the ears of corn on the sabbath. But He did seem to break the sabbath according to the superstitious interpretation of the Pharisees, who thought that man ought to abstain from doing even works of kindness on the sabbath; which was contrary to the intention of the Law.

Reply to Objection 4. The reason why the ceremonial precepts of the Law are not mentioned in Mat. 5 is because, as stated above (ad 1), their observance was abolished by their fulfilment. But of the judicial precepts He mentioned that of retaliation: so that what He said about it should refer to all the others. With regard to this precept, He taught that the intention of the Law was that retaliation should be sought out of love of justice, and not as a punishment out of revengeful spite, which He forbade, admonishing man to be ready to suffer yet greater insults; and this remains still in the New Law.

Objection 1. It would seem that the New Law is not contained in the Old. Because the New Law consists chiefly in faith: wherefore it is called the “law of faith” (Rom. 3:27). But many points of faith are set forth in the New Law, which are not contained in the Old. Therefore the New Law is not contained in the Old.

Objection 2. Further, a gloss says on Mat. 5:19, “He that shall break one of these least commandments,” that the lesser commandments are those of the Law, and the greater commandments, those contained in the Gospel. Now the greater cannot be contained in the lesser. Therefore the New Law is not contained in the Old.

Objection 3. Further, who holds the container holds the contents. If, therefore, the New Law is contained in the Old, it follows that whoever had the Old Law had the New: so that it was superfluous to give men a New Law when once they had the Old. Therefore the New Law is not contained in the Old.

On the contrary, As expressed in Ezech. 1:16, there was “a wheel in the midst of a wheel,” i.e. “the New Testament within the Old,” according to Gregory’s exposition.

I answer that, One thing may be contained in another in two ways. First, actually; as a located thing is in a place. Secondly, virtually; as an effect in its cause, or as the complement in that which is incomplete; thus a genus contains its species, and a seed contains the whole tree, virtually. It is in this way that the New Law is contained in the Old: for it has been stated (a. 1) that the New Law is compared to the Old as perfect to imperfect. Hence Chrysostom, expounding Mk. 4:28, “The earth of itself bringeth forth fruit, first the blade, then

the ear, afterwards the full corn in the ear,” expresses himself as follows: “He brought forth first the blade, i.e. the Law of Nature; then the ear, i.e. the Law of Moses; lastly, the full corn, i.e. the Law of the Gospel.” Hence then the New Law is in the Old as the corn in the ear.

Reply to Objection 1. Whatsoever is set down in the New Testament explicitly and openly as a point of faith, is contained in the Old Testament as a matter of belief, but implicitly, under a figure. And accordingly, even as to those things which we are bound to believe, the New Law is contained in the Old.

Reply to Objection 2. The precepts of the New Law are said to be greater than those of the Old Law, in the point of their being set forth explicitly. But as to the substance itself of the precepts of the New Testament, they are all contained in the Old. Hence Augustine says (Contra Faust. xix, 23,28) that “nearly all Our Lord’s admonitions or precepts, where He expressed Himself by saying: ‘But I say unto you,’ are to be found also in those ancient books. Yet, since they thought that murder was only the slaying of the human body, Our Lord declared to them that every wicked impulse to hurt our brother is to be looked on as a kind of murder.” And it is in the point of declarations of this kind that the precepts of the New Law are said to be greater than those of the Old. Nothing, however, prevents the greater from being contained in the lesser virtually; just as a tree is contained in the seed.

Reply to Objection 3. What is set forth implicitly needs to be declared explicitly. Hence after the publishing of the Old Law, a New Law also had to be given.

Objection 1. It would seem that the New Law is more burdensome than the Old. For Chrysostom (Opus Imp. in Matth., Hom. x*) say: “The commandments given to Moses are easy to obey: Thou shalt not kill; Thou shalt not commit adultery: but the commandments of Christ are difficult to accomplish, for instance: Thou shalt not give way to anger, or to lust.” Therefore the New Law is more burdensome than the Old.

Objection 2. Further, it is easier to make use of earthly prosperity than to suffer tribulations. But in the Old Testament observance of the Law was followed by temporal prosperity, as may be gathered from Dt. 28:1-14; whereas many kinds of trouble ensue to those who observe the New Law, as stated in 2 Cor. 6:4-10: “Let us exhibit ourselves as the ministers of God, in much patience, in tribulation, in necessities, in distresses,” etc. Therefore the New Law is more burdensome than the Old.

Objection 3. The more one has to do, the more difficult it is. But the New Law is something added to the Old. For the Old Law forbade perjury, while the New Law proscribed even swearing: the Old Law forbade a man to cast off his wife without a bill of divorce, while the New Law forbade divorce altogether; as is clearly stated in Mat. 5:31, seqq., according to Augustine’s expounding. Therefore the New Law is more burdensome than the Old.

On the contrary, It is written (Mat. 11:28): “Come to Me, all you that labor and are burdened”: which words are expounded by Hilary thus: “He calls to Himself all those that labor under the difficulty of observing the Law, and are burdened with the sins of this world.” And further on He says of the yoke of the Gospel: “For My yoke is sweet and My burden light.” Therefore the New Law is a lighter burden than the Old.

I answer that, A twofold difficulty may attach to works of virtue with which the precepts of the Law are concerned. One is on the part of the outward works, which of themselves are, in a way, difficult and burdensome. And in this respect the Old Law is a much heavier burden than the New: since the Old Law by its numerous ceremonies prescribed many more outward acts than the New Law, which, in the teaching of Christ and the apostles, added very few precepts to those of the natural law; although afterwards some were added, through being instituted by the holy Fathers. Even in these Au-

gustine says that moderation should be observed, lest good conduct should become a burden to the faithful. For he says in reply to the queries of Januarius (Ep. lv) that, “whereas God in His mercy wished religion to be a free service rendered by the public solemnization of a small number of most manifest sacraments, certain persons make it a slave’s burden; so much so that the state of the Jews who were subject to the sacraments of the Law, and not to the presumptuous devices of man, was more tolerable.”

The other difficulty attaches to works of virtue as to interior acts: for instance, that a virtuous deed be done with promptitude and pleasure. It is this difficulty that virtue solves: because to act thus is difficult for a man without virtue: but through virtue it becomes easy for him. In this respect the precepts of the New Law are more burdensome than those of the Old; because the New Law prohibits certain interior movements of the soul, which were not expressly forbidden in the Old Law in all cases, although they were forbidden in some, without, however, any punishment being attached to the prohibition. Now this is very difficult to a man without virtue: thus even the Philosopher states (Ethic. v, 9) that it is easy to do what a righteous man does; but that to do it in the same way, viz. with pleasure and promptitude, is difficult to a man who is not righteous. Accordingly we read also (1 Jn. 5:3) that “His commandments are not heavy”: which words Augustine expounds by saying that “they are not heavy to the man that loveth; whereas they are a burden to him that loveth not.”

Reply to Objection 1. The passage quoted speaks expressly of the difficulty of the New Law as to the deliberate curbing of interior movements.

Reply to Objection 2. The tribulations suffered by those who observe the New Law are not imposed by the Law itself. Moreover they are easily borne, on account of the love in which the same Law consists: since, as Augustine says (De Verb. Dom., Serm. lxx), “love makes light and nothing of things that seem arduous and beyond our power.”

Reply to Objection 3. The object of these additions to the precepts of the Old Law was to render it easier to do what it prescribed, as Augustine states[†]. Accordingly this does not prove that the New Law is more burdensome, but rather that it is a lighter burden.

* The work of an unknown author † De Serm. Dom. in Monte i, 17,21; xix, 23,26

FIRST PART OF THE SECOND PART, QUESTION 108

Of Those Things That Are Contained in the New Law (In Four Articles)

We must now consider those things that are contained in the New Law: under which head there are four points of inquiry:

- (1) Whether the New Law ought to prescribe or to forbid any outward works?
- (2) Whether the New Law makes sufficient provision in prescribing and forbidding external acts?
- (3) Whether in the matter of internal acts it directs man sufficiently?
- (4) Whether it fittingly adds counsels to precepts?

Whether the New Law ought to prescribe or prohibit any external acts?

Ia IIae q. 108 a. 1

Objection 1. It would seem that the New Law should not prescribe or prohibit any external acts. For the New Law is the Gospel of the kingdom, according to Mat. 24:14: "This Gospel of the kingdom shall be preached in the whole world." But the kingdom of God consists not in exterior, but only in interior acts, according to Lk. 17:21: "The kingdom of God is within you"; and Rom. 14:17: "The kingdom of God is not meat and drink; but justice and peace and joy in the Holy Ghost." Therefore the New Law should not prescribe or forbid any external acts.

Objection 2. Further, the New Law is "the law of the Spirit" (Rom. 8:2). But "where the Spirit of the Lord is, there is liberty" (2 Cor. 3:17). Now there is no liberty when man is bound to do or avoid certain external acts. Therefore the New Law does not prescribe or forbid any external acts.

Objection 3. Further, all external acts are understood as referable to the hand, just as interior acts belong to the mind. But this is assigned as the difference between the New and Old Laws that the "Old Law restrains the hand, whereas the New Law curbs the will"*.

Therefore the New Law should not contain prohibitions and commands about exterior deeds, but only about interior acts.

On the contrary, Through the New Law, men are made "children of light": wherefore it is written (Jn. 12:36): "Believe in the light that you may be the children of light." Now it is becoming that children of the light should do deeds of light and cast aside deeds of darkness, according to Eph. 5:8: "You were heretofore darkness, but now light in the Lord. Walk. . . as children of the light." Therefore the New Law had to forbid certain external acts and prescribe others.

I answer that, As stated above (q. 106, Aa. 1,2), the New Law consists chiefly in the grace of the Holy Ghost, which is shown forth by faith that worketh through love. Now men become receivers of this grace through God's Son made man, Whose humanity grace filled first, and thence flowed forth to us. Hence it is written (Jn. 1:14): "The Word was made flesh," and afterwards: "full of grace and truth"; and further on: "Of

His fulness we all have received, and grace for grace." Hence it is added that "grace and truth came by Jesus Christ." Consequently it was becoming that the grace flows from the incarnate Word should be given to us by means of certain external sensible objects; and that from this inward grace, whereby the flesh is subjected to the Spirit, certain external works should ensue.

Accordingly external acts may have a twofold connection with grace. In the first place, as leading in some way to grace. Such are the sacramental acts which are instituted in the New Law, e.g. Baptism, the Eucharist, and the like.

In the second place there are those external acts which ensue from the promptings of grace: and herein we must observe a difference. For there are some which are necessarily in keeping with, or in opposition to inward grace consisting in faith that worketh through love. Such external works are prescribed or forbidden in the New Law; thus confession of faith is prescribed, and denial of faith is forbidden; for it is written (Mat. 10:32,33) "(Every one) that shall confess Me before men, I will also confess him before My Father. . . But he that shall deny Me before men, I will also deny him before My Father." On the other hand, there are works which are not necessarily opposed to, or in keeping with faith that worketh through love. Such works are not prescribed or forbidden in the New Law, by virtue of its primitive institution; but have been left by the Lawgiver, i.e. Christ, to the discretion of each individual. And so to each one it is free to decide what he should do or avoid; and to each superior, to direct his subjects in such matters as regards what they must do or avoid. Wherefore also in this respect the Gospel is called the "law of liberty"†: since the Old Law decided many points and left few to man to decide as he chose.

Reply to Objection 1. The kingdom of God consists chiefly in internal acts: but as a consequence all things that are essential to internal acts belong also to the kingdom of God. Thus if the kingdom of God is internal righteousness, peace, and spiritual joy, all external acts that are incompatible with righteousness, peace, and spiritual joy, are in opposition to the king-

* Peter Lombard, Sent. iii, D, 40 † Cf. Reply obj. 2

dom of God; and consequently should be forbidden in the Gospel of the kingdom. On the other hand, those things that are indifferent as regards the aforesaid, for instance, to eat of this or that food, are not part of the kingdom of God; wherefore the Apostle says before the words quoted: "The kingdom of God is not meat and drink."

Reply to Objection 2. According to the Philosopher (Metaph. i, 2), what is "free is cause of itself." Therefore he acts freely, who acts of his own accord. Now man does of his own accord that which he does from a habit that is suitable to his nature: since a habit inclines one as a second nature. If, however, a habit be in opposition to nature, man would not act according to his nature, but according to some corruption affecting that nature. Since then the grace of the Holy Ghost is like an interior habit bestowed on us and inclining us

to act aright, it makes us do freely those things that are becoming to grace, and shun what is opposed to it.

Accordingly the New Law is called the law of liberty in two respects. First, because it does not bind us to do or avoid certain things, except such as are of themselves necessary or opposed to salvation, and come under the prescription or prohibition of the law. Secondly, because it also makes us comply freely with these precepts and prohibitions, inasmuch as we do so through the promptings of grace. It is for these two reasons that the New Law is called "the law of perfect liberty" (James 1:25).

Reply to Objection 3. The New Law, by restraining the mind from inordinate movements, must needs also restrain the hand from inordinate acts, which ensue from inward movements.

Whether the New Law made sufficient ordinations about external acts?

Ia IIae q. 108 a. 2

Objection 1. It would seem that the New Law made insufficient ordinations about external acts. Because faith that worketh through charity seems chiefly to belong to the New Law, according to Gal. 5:6: "In Christ Jesus neither circumcision availeth anything, nor uncircumcision: but faith that worketh through charity." But the New Law declared explicitly certain points of faith which were not set forth explicitly in the Old Law; for instance, belief in the Trinity. Therefore it should also have added certain outward moral deeds, which were not fixed in the Old Law.

Objection 2. Further, in the Old Law not only were sacraments instituted, but also certain sacred things, as stated above (q. 101, a. 4; q. 102, a. 4). But in the New Law, although certain sacraments are instituted by Our Lord; for instance, pertaining either to the sanctification of a temple or of the vessels, or to the celebration of some particular feast. Therefore the New Law made insufficient ordinations about external matters.

Objection 3. Further, in the Old Law, just as there were certain observances pertaining to God's ministers, so also were there certain observances pertaining to the people: as was stated above when we were treating of the ceremonial of the Old Law (q. 101, a. 4; q. 102, a. 6). Now in the New Law certain observances seem to have been prescribed to the ministers of God; as may be gathered from Mat. 10:9: "Do not possess gold, nor silver, nor money in your purses," nor other things which are mentioned here and Lk. 9,10. Therefore certain observances pertaining to the faithful should also have been instituted in the New Law.

Objection 4. Further, in the Old Law, besides moral and ceremonial precepts, there were certain judicial precepts. But in the New Law there are no judicial precepts. Therefore the New Law made insufficient ordinations about external works.

On the contrary, Our Lord said (Mat. 7:24): "Ev-

ery one. . . that heareth these My words, and doth them, shall be likened to a wise man that built his house upon a rock." But a wise builder leaves out nothing that is necessary to the building. Therefore Christ's words contain all things necessary for man's salvation.

I answer that, as stated above (a. 1), the New Law had to make such prescriptions or prohibitions alone as are essential for the reception or right use of grace. And since we cannot of ourselves obtain grace, but through Christ alone, hence Christ of Himself instituted the sacraments whereby we obtain grace: viz. Baptism, Eucharist, Orders of the ministers of the New Law, by the institution of the apostles and seventy-two disciples, Penance, and indissoluble Matrimony. He promised Confirmation through the sending of the Holy Ghost: and we read that by His institution the apostles healed the sick by anointing them with oil (Mk. 6:13). These are the sacraments of the New Law.

The right use of grace is by means of works of charity. These, in so far as they are essential to virtue, pertain to the moral precepts, which also formed part of the Old Law. Hence, in this respect, the New Law had nothing to add as regards external action. The determination of these works in their relation to the divine worship, belongs to the ceremonial precepts of the Law; and, in relation to our neighbor, to the judicial precepts, as stated above (q. 99, a. 4). And therefore, since these determinations are not in themselves necessarily connected with inward grace wherein the Law consists, they do not come under a precept of the New Law, but are left to the decision of man; some relating to inferiors—as when a precept is given to an individual; others, relating to superiors, temporal or spiritual, referring, namely, to the common good.

Accordingly the New Law had no other external works to determine, by prescribing or forbidding, except the sacraments, and those moral precepts which

have a necessary connection with virtue, for instance, that one must not kill, or steal, and so forth.

Reply to Objection 1. Matters of faith are above human reason, and so we cannot attain to them except through grace. Consequently, when grace came to be bestowed more abundantly, the result was an increase in the number of explicit points of faith. On the other hand, it is through human reason that we are directed to works of virtue, for it is the rule of human action, as stated above (q. 19, a. 3; q. 63, a. 2). Wherefore in such matters as these there was no need for any precepts to be given besides the moral precepts of the Law, which proceed from the dictate of reason.

Reply to Objection 2. In the sacraments of the New Law grace is bestowed, which cannot be received except through Christ: consequently they had to be instituted by Him. But in the sacred things no grace is given: for instance, in the consecration of a temple, an altar or the like, or, again, in the celebration of feasts. Wherefore Our Lord left the institution of such things to the discretion of the faithful, since they have not of themselves any necessary connection with inward grace.

Reply to Objection 3. Our Lord gave the apostles those precepts not as ceremonial observances, but as moral statutes: and they can be understood in two ways. First, following Augustine (*De Consensu Evang.* 30), as being not commands but permissions. For He permitted them to set forth to preach without scrip or stick, and so on, since they were empowered to accept their livelihood from those to whom they preached: wherefore He goes on to say: "For the laborer is worthy of his hire." Nor is it a sin, but a work of supererogation for a preacher to take means of livelihood with him, without accepting supplies from those to whom he preaches; as

Paul did (1 Cor. 9:4, seqq.).

Secondly, according to the explanation of other holy men, they may be considered as temporal commands laid upon the apostles for the time during which they were sent to preach in Judea before Christ's Passion. For the disciples, being yet as little children under Christ's care, needed to receive some special commands from Christ, such as all subjects receive from their superiors: and especially so, since they were to be accustomed little by little to renounce the care of temporalities, so as to become fitted for the preaching of the Gospel throughout the whole world. Nor must we wonder if He established certain fixed modes of life, as long as the state of the Old Law endured and the people had not as yet achieved the perfect liberty of the Spirit. These statutes He abolished shortly before His Passion, as though the disciples had by their means become sufficiently practiced. Hence He said (Lk. 22:35,36) "When I sent you without purse and scrip and shoes, did you want anything? But they said: Nothing. Then said He unto them: But now, he that hath a purse, let him take it, and likewise a scrip." Because the time of perfect liberty was already at hand, when they would be left entirely to their own judgment in matters not necessarily connected with virtue.

Reply to Objection 4. Judicial precepts also, are not essential to virtue in respect of any particular determination, but only in regard to the common notion of justice. Consequently Our Lord left the judicial precepts to the discretion of those who were to have spiritual or temporal charge of others. But as regards the judicial precepts of the Old Law, some of them He explained, because they were misunderstood by the Pharisees, as we shall state later on (a. 3, ad 2).

Whether the New Law directed man sufficiently as regards interior actions?

Ia IIae q. 108 a. 3

Objection 1. It would seem that the New Law directed man insufficiently as regards interior actions. For there are ten commandments of the decalogue directing man to God and his neighbor. But Our Lord partly fulfilled only three of them: as regards, namely, the prohibition of murder, of adultery, and of perjury. Therefore it seems that, by omitting to fulfil the other precepts, He directed man insufficiently.

Objection 2. Further, as regards the judicial precepts, Our Lord ordained nothing in the Gospel, except in the matter of divorcing of wife, of punishment by retaliation, and of persecuting one's enemies. But there are many other judicial precepts of the Old Law, as stated above (q. 104, a. 4; q. 105). Therefore, in this respect, He directed human life insufficiently.

Objection 3. Further, in the Old Law, besides moral and judicial, there were ceremonial precepts about which Our Lord made no ordination. Therefore it seems that He ordained insufficiently.

Objection 4. Further, in order that the mind be

inwardly well disposed, man should do no good deed for any temporal whatever. But there are many other temporal goods besides the favor of man: and there are many other good works besides fasting, alms-deeds, and prayer. Therefore Our Lord unbecomingly taught that only in respect of these three works, and of no other earthly goods ought we to shun the glory of human favor.

Objection 5. Further, solicitude for the necessary means of livelihood is by nature instilled into man, and this solicitude even other animals share with man: wherefore it is written (Prov. 6:6,8): "Go to the ant, O sluggard, and consider her ways. . . she provideth her meat for herself in the summer, and gathereth her food in the harvest." But every command issued against the inclination of nature is an unjust command, forasmuch as it is contrary to the law of nature. Therefore it seems that Our Lord unbecomingly forbade solicitude about food and raiment.

Objection 6. Further, no act of virtue should be the

subject of a prohibition. Now judgment is an act of justice, according to Ps. 18:15: "Until justice be turned into judgment." Therefore it seems that Our Lord unbecomingly forbade judgment: and consequently that the New Law directed man insufficiently in the matter of interior acts.

On the contrary, Augustine says (De Serm. Dom. in Monte i, 1): We should take note that, when He said: "He that heareth these My words," He indicates clearly that this sermon of the Lord is replete with all the precepts whereby a Christian's life is formed."

I answer that, As is evident from Augustine's words just quoted, the sermon, contains the whole process of forming the life of a Christian. Therein man's interior movements are ordered. Because after declaring that his end is Beatitude; and after commending the authority of the apostles, through whom the teaching of the Gospel was to be promulgated, He orders man's interior movements, first in regard to man himself, secondly in regard to his neighbor.

This he does in regard to man himself, in two ways, corresponding to man's two interior movements in respect of any prospective action, viz. volition of what has to be done, and intention of the end. Wherefore, in the first place, He directs man's will in respect of the various precepts of the Law: by prescribing that man should refrain not merely from those external works that are evil in themselves, but also from internal acts, and from the occasions of evil deeds. In the second place He directs man's intention, by teaching that in our good works, we should seek neither human praise, nor worldly riches, which is to lay up treasures on earth.

Afterwards He directs man's interior movement in respect of his neighbor, by forbidding us, on the one hand, to judge him rashly, unjustly, or presumptuously; and, on the other, to entrust him too readily with sacred things if he be unworthy.

Lastly, He teaches us how to fulfil the teaching of the Gospel; viz. by imploring the help of God; by striving to enter by the narrow door of perfect virtue; and by being wary lest we be led astray by evil influences. Moreover, He declares that we must observe His commandments, and that it is not enough to make profession of faith, or to work miracles, or merely to hear His words.

Reply to Objection 1. Our Lord explained the manner of fulfilling those precepts which the Scribes and Pharisees did not rightly understand: and this affected chiefly those precepts of the decalogue. For they thought that the prohibition of adultery and murder covered the external act only, and not the internal desire. And they held this opinion about murder and adultery rather than about theft and false witness, because the movement of anger tending to murder, and the movement of desire tending to adultery, seem to be in us from nature somewhat, but not the desire of stealing or bearing false witness. They held a false opinion about perjury, for they thought that perjury indeed was a sin;

but that oaths were of themselves to be desired and to be taken frequently, since they seem to proceed from reverence to God. Hence Our Lord shows that an oath is not desirable as a good thing; and that it is better to speak without oaths, unless necessity forces us to have recourse to them.

Reply to Objection 2. The Scribes and Pharisees erred about the judicial precepts in two ways. First, because they considered certain matters contained in the Law of Moses by way of permission, to be right in themselves: namely, divorce of a wife, and the taking of usury from strangers. Wherefore Our Lord forbade a man to divorce his wife (Mat. 5:32); and to receive usury (Lk. 6:35), when He said: "Lend, hoping for nothing thereby."

In another way they erred by thinking that certain things which the Old Law commanded to be done for justice's sake, should be done out of desire for revenge, or out of lust for temporal goods, or out of hatred of one's enemies; and this in respect of three precepts. For they thought that desire for revenge was lawful, on account of the precept concerning punishment by retaliation: whereas this precept was given that justice might be safeguarded, not that man might seek revenge. Wherefore, in order to do away with this, Our Lord teaches that man should be prepared in his mind to suffer yet more if necessary. They thought that movements of covetousness were lawful on account of those judicial precepts which prescribed restitution of what had been purloined, together with something added thereto, as stated above (q. 105, a. 2, ad 9); whereas the Law commanded this to be done in order to safeguard justice, not to encourage covetousness. Wherefore Our Lord teaches that we should not demand our goods from motives of cupidity, and that we should be ready to give yet more if necessary. They thought that the movement of hatred was lawful, on account of the commandments of the Law about the slaying of one's enemies: whereas the Law ordered this for the fulfilment of justice, as stated above (q. 105, a. 3, ad 4), not to satisfy hatred. Wherefore Our Lord teaches us that we ought to love our enemies, and to be ready to do good to them if necessary. For these precepts are to be taken as binding "the mind to be prepared to fulfil them," as Augustine says (De Serm. Dom. in Monte i, 19).

Reply to Objection 3. The moral precepts necessarily retained their force under the New Law, because they are of themselves essential to virtue: whereas the judicial precepts did not necessarily continue to bind in exactly the same way as had been fixed by the Law: this was left to man to decide in one way or another. Hence Our Lord directed us becomingly with regard to these two kinds of precepts. On the other hand, the observance of the ceremonial precepts was totally abolished by the advent of the reality; wherefore in regard to these precepts He commanded nothing on this occasion when He was giving the general points of His doctrine. Elsewhere, however, He makes it clear that the entire bodily

worship which was fixed by the Law, was to be changed into spiritual worship: as is evident from Jn. 4:21,23, where He says: “The hour cometh when you shall neither on this mountain, nor in Jerusalem adore the Father...but...the true adorers shall adore the Father in spirit and in truth.”

Reply to Objection 4. All worldly goods may be reduced to three—honors, riches, and pleasures; according to 1 Jn. 2:16: “All that is in the world is the concupiscence of the flesh,” which refers to pleasures of the flesh, “and the concupiscence of the eyes,” which refers to riches, “and the pride of life,” which refers to ambition for renown and honor. Now the Law did not promise an abundance of carnal pleasures; on the contrary, it forbade them. But it did promise exalted honors and abundant riches; for it is written in reference to the former (Dt. 28:1): “If thou wilt hear the voice of the Lord thy God...He will make thee higher than all the nations”; and in reference to the latter, we read a little further on (Dt. 28:11): “He will make thee abound with all goods.” But the Jews so distorted the true meaning of these promises, as to think that we ought to serve God, with these things as the end in view. Wherefore Our Lord set this aside by teaching, first of all, that works of virtue should not be done for human glory. And He mentions three works, to which all others may be reduced: since whatever a man does in order to curb his desires, comes under the head of fasting; and whatever a man does for the love of his neighbor, comes under the

head of alms-deeds; and whatever a man does for the worship of God, comes under the head of prayer. And He mentions these three specifically, as they hold the principal place, and are most often used by men in order to gain glory. In the second place He taught us that we must not place our end in riches, when He said: “Lay not up to yourselves treasures on earth” (Mat. 6:19).

Reply to Objection 5. Our Lord forbade, not necessary, but inordinate solicitude. Now there is a fourfold solicitude to be avoided in temporal matters. First, we must not place our end in them, nor serve God for the sake of the necessities of food and raiment. Wherefore He says: “Lay not up for yourselves,” etc. Secondly, we must not be so anxious about temporal things, as to despair of God’s help: wherefore Our Lord says (Mat. 6:32): “Your Father knoweth that you have need of all these things.” Thirdly, we must not add presumption to our solicitude; in other words, we must not be confident of getting the necessities of life by our own efforts without God’s help: such solicitude Our Lord sets aside by saying that a man cannot add anything to his stature (Mat. 6:27). We must not anticipate the time for anxiety; namely, by being solicitous now, for the needs, not of the present, but of a future time: wherefore He says (Mat. 6:34): “Be not...solicitous for tomorrow.”

Reply to Objection 6. Our Lord did not forbid the judgment of justice, without which holy things could not be withdrawn from the unworthy. But he forbade inordinate judgment, as stated above.

Whether certain definite counsels are fittingly proposed in the New Law?

Ia IIae q. 108 a. 4

Objection 1. It would seem that certain definite counsels are not fittingly proposed in the New Law. For counsels are given about that which is expedient for an end, as we stated above, when treating of counsel (q. 14, a. 2). But the same things are not expedient for all. Therefore certain definite counsels should not be proposed to all.

Objection 2. Further, counsels regard a greater good. But there are no definite degrees to the greater good. Therefore definite counsels should not be given.

Objection 3. Further, counsels pertain to the life of perfection. But obedience pertains to the life of perfection. Therefore it was unfitting that no counsel of obedience should be contained in the Gospel.

Objection 4. Further, many matters pertaining to the life of perfection are found among the commandments, as, for instance, “Love your enemies” (Mat. 5:44), and those precepts which Our Lord gave His apostles (Mat. 10). Therefore the counsels are unfittingly given in the New Law: both because they are not all mentioned; and because they are not distinguished from the commandments.

On the contrary, The counsels of a wise friend are of great use, according to Prov. (27:9): “Ointment and perfumes rejoice the heart: and the good counsels of a

friend rejoice the soul.” But Christ is our wisest and greatest friend. Therefore His counsels are supremely useful and becoming.

I answer that, The difference between a counsel and a commandment is that a commandment implies obligation, whereas a counsel is left to the option of the one to whom it is given. Consequently in the New Law, which is the law of liberty, counsels are added to the commandments, and not in the Old Law, which is the law of bondage. We must therefore understand the commandments of the New Law to have been given about matters that are necessary to gain the end of eternal bliss, to which end the New Law brings us forthwith: but that the counsels are about matters that render the gaining of this end more assured and expeditious.

Now man is placed between the things of this world, and spiritual goods wherein eternal happiness consists: so that the more he cleaves to the one, the more he withdraws from the other, and conversely. Wherefore he that cleaves wholly to the things of this world, so as to make them his end, and to look upon them as the reason and rule of all he does, falls away altogether from spiritual goods. Hence this disorder is removed by the commandments. Nevertheless, for man to gain the end aforesaid, he does not need to renounce the things of the

world altogether: since he can, while using the things of this world, attain to eternal happiness, provided he does not place his end in them: but he will attain more speedily thereto by giving up the goods of this world entirely: wherefore the evangelical counsels are given for this purpose.

Now the goods of this world which come into use in human life, consist in three things: viz. in external wealth pertaining to the “concupiscence of the eyes”; carnal pleasures pertaining to the “concupiscence of the flesh”; and honors, which pertain to the “pride of life,” according to 1 Jn. 2:16: and it is in renouncing these altogether, as far as possible, that the evangelical counsels consist. Moreover, every form of the religious life that professes the state of perfection is based on these three: since riches are renounced by poverty; carnal pleasures by perpetual chastity; and the pride of life by the bondage of obedience.

Now if a man observe these absolutely, this is in accordance with the counsels as they stand. But if a man observe any one of them in a particular case, this is taking that counsel in a restricted sense, namely, as applying to that particular case. For instance, when anyone gives an alms to a poor man, not being bound so to do, he follows the counsels in that particular case. In like manner, when a man for some fixed time refrains from carnal pleasures that he may give himself to prayer, he follows the counsel for that particular time. And again, when a man follows not his will as to some deed which he might do lawfully, he follows the counsel in that particular case: for instance, if he do good to his enemies when he is not bound to, or if he forgive an injury of which he might justly seek to be avenged. In this way, too, all particular counsels may be reduced to these three general and perfect counsels.

Reply to Objection 1. The aforesaid counsels, considered in themselves, are expedient to all; but owing to some people being ill-disposed, it happens that some of them are inexpedient, because their disposition is not

inclined to such things. Hence Our Lord, in proposing the evangelical counsels, always makes mention of man’s fitness for observing the counsels. For in giving the counsel of perpetual poverty (Mat. 19:21), He begins with the words: “If thou wilt be perfect,” and then He adds: “Go, sell all [Vulg.: ‘what’] thou hast.” In like manner when He gave the counsel of perpetual chastity, saying (Mat. 19:12): “There are eunuchs who have made themselves eunuchs for the kingdom of heaven,” He adds straightway: “He that can take, let him take it.” And again, the Apostle (1 Cor. 7:35), after giving the counsel of virginity, says: “And this I speak for your profit; not to cast a snare upon you.”

Reply to Objection 2. The greater goods are not definitely fixed in the individual; but those which are simply and absolutely the greater good in general are fixed: and to these all the above particular goods may be reduced, as stated above.

Reply to Objection 3. Even the counsel of obedience is understood to have been given by Our Lord in the words: “And [let him] follow Me.” For we follow Him not only by imitating His works, but also by obeying His commandments, according to Jn. 10:27: “My sheep hear My voice... and they follow Me.”

Reply to Objection 4. Those things which Our Lord prescribed about the true love of our enemies, and other similar sayings (Mat. 5; Lk. 6), may be referred to the preparation of the mind, and then they are necessary for salvation; for instance, that man be prepared to do good to his enemies, and other similar actions, when there is need. Hence these things are placed among the precepts. But that anyone should actually and promptly behave thus towards an enemy when there is no special need, is to be referred to the particular counsels, as stated above. As to those matters which are set down in Mat. 10 and Lk. 9 and 10, they were either disciplinary commands for that particular time, or concessions, as stated above (a. 2, ad 3). Hence they are not set down among the counsels.

Objection 1. It would seem that the New Law should not prescribe or prohibit any external acts. For the New Law is the Gospel of the kingdom, according to Mat. 24:14: "This Gospel of the kingdom shall be preached in the whole world." But the kingdom of God consists not in exterior, but only in interior acts, according to Lk. 17:21: "The kingdom of God is within you"; and Rom. 14:17: "The kingdom of God is not meat and drink; but justice and peace and joy in the Holy Ghost." Therefore the New Law should not prescribe or forbid any external acts.

Objection 2. Further, the New Law is "the law of the Spirit" (Rom. 8:2). But "where the Spirit of the Lord is, there is liberty" (2 Cor. 3:17). Now there is no liberty when man is bound to do or avoid certain external acts. Therefore the New Law does not prescribe or forbid any external acts.

Objection 3. Further, all external acts are understood as referable to the hand, just as interior acts belong to the mind. But this is assigned as the difference between the New and Old Laws that the "Old Law restrains the hand, whereas the New Law curbs the will"* . Therefore the New Law should not contain prohibitions and commands about exterior deeds, but only about interior acts.

On the contrary, Through the New Law, men are made "children of light": wherefore it is written (Jn. 12:36): "Believe in the light that you may be the children of light." Now it is becoming that children of the light should do deeds of light and cast aside deeds of darkness, according to Eph. 5:8: "You were heretofore darkness, but now light in the Lord. Walk . . . as children of the light." Therefore the New Law had to forbid certain external acts and prescribe others.

I answer that, As stated above (q. 106, Aa. 1,2), the New Law consists chiefly in the grace of the Holy Ghost, which is shown forth by faith that worketh through love. Now men become receivers of this grace through God's Son made man, Whose humanity grace filled first, and thence flowed forth to us. Hence it is written (Jn. 1:14): "The Word was made flesh," and afterwards: "full of grace and truth"; and further on: "Of His fulness we all have received, and grace for grace." Hence it is added that "grace and truth came by Jesus Christ." Consequently it was becoming that the grace flows from the incarnate Word should be given to us by means of certain external sensible objects; and that from this inward grace, whereby the flesh is subjected to the Spirit, certain external works should ensue.

Accordingly external acts may have a twofold connection with grace. In the first place, as leading in some way to grace. Such are the sacramental acts which are instituted in the New Law, e.g. Baptism, the Eucharist, and the like.

In the second place there are those external acts

which ensue from the promptings of grace: and herein we must observe a difference. For there are some which are necessarily in keeping with, or in opposition to inward grace consisting in faith that worketh through love. Such external works are prescribed or forbidden in the New Law; thus confession of faith is prescribed, and denial of faith is forbidden; for it is written (Mat. 10:32,33) "(Every one) that shall confess Me before men, I will also confess him before My Father. . . But he that shall deny Me before men, I will also deny him before My Father." On the other hand, there are works which are not necessarily opposed to, or in keeping with faith that worketh through love. Such works are not prescribed or forbidden in the New Law, by virtue of its primitive institution; but have been left by the Lawgiver, i.e. Christ, to the discretion of each individual. And so to each one it is free to decide what he should do or avoid; and to each superior, to direct his subjects in such matters as regards what they must do or avoid. Wherefore also in this respect the Gospel is called the "law of liberty"[†]: since the Old Law decided many points and left few to man to decide as he chose.

Reply to Objection 1. The kingdom of God consists chiefly in internal acts: but as a consequence all things that are essential to internal acts belong also to the kingdom of God. Thus if the kingdom of God is internal righteousness, peace, and spiritual joy, all external acts that are incompatible with righteousness, peace, and spiritual joy, are in opposition to the kingdom of God; and consequently should be forbidden in the Gospel of the kingdom. On the other hand, those things that are indifferent as regards the aforesaid, for instance, to eat of this or that food, are not part of the kingdom of God; wherefore the Apostle says before the words quoted: "The kingdom of God is not meat and drink."

Reply to Objection 2. According to the Philosopher (Metaph. i, 2), what is "free is cause of itself." Therefore he acts freely, who acts of his own accord. Now man does of his own accord that which he does from a habit that is suitable to his nature: since a habit inclines one as a second nature. If, however, a habit be in opposition to nature, man would not act according to his nature, but according to some corruption affecting that nature. Since then the grace of the Holy Ghost is like an interior habit bestowed on us and inclining us to act aright, it makes us do freely those things that are becoming to grace, and shun what is opposed to it.

Accordingly the New Law is called the law of liberty in two respects. First, because it does not bind us to do or avoid certain things, except such as are of themselves necessary or opposed to salvation, and come under the prescription or prohibition of the law. Secondly, because it also makes us comply freely with these precepts and prohibitions, inasmuch as we do so through

* Peter Lombard, Sent. iii, D, 40 † Cf. Reply obj. 2

the promptings of grace. It is for these two reasons that the New Law is called “the law of perfect liberty” (James 1:25).

Reply to Objection 3. The New Law, by restrain-

ing the mind from inordinate movements, must needs also restrain the hand from inordinate acts, which ensue from inward movements.

Objection 1. It would seem that the New Law made insufficient ordinations about external acts. Because faith that worketh through charity seems chiefly to belong to the New Law, according to Gal. 5:6: “In Christ Jesus neither circumcision availeth anything, nor uncircumcision: but faith that worketh through charity.” But the New Law declared explicitly certain points of faith which were not set forth explicitly in the Old Law; for instance, belief in the Trinity. Therefore it should also have added certain outward moral deeds, which were not fixed in the Old Law.

Objection 2. Further, in the Old Law not only were sacraments instituted, but also certain sacred things, as stated above (q. 101, a. 4; q. 102, a. 4). But in the New Law, although certain sacraments are instituted by Our Lord; for instance, pertaining either to the sanctification of a temple or of the vessels, or to the celebration of some particular feast. Therefore the New Law made insufficient ordinations about external matters.

Objection 3. Further, in the Old Law, just as there were certain observances pertaining to God’s ministers, so also were there certain observances pertaining to the people: as was stated above when we were treating of the ceremonial of the Old Law (q. 101, a. 4; q. 102, a. 6). Now in the New Law certain observances seem to have been prescribed to the ministers of God; as may be gathered from Mat. 10:9: “Do not possess gold, nor silver, nor money in your purses,” nor other things which are mentioned here and Lk. 9,10. Therefore certain observances pertaining to the faithful should also have been instituted in the New Law.

Objection 4. Further, in the Old Law, besides moral and ceremonial precepts, there were certain judicial precepts. But in the New Law there are no judicial precepts. Therefore the New Law made insufficient ordinations about external works.

On the contrary, Our Lord said (Mat. 7:24): “Every one . . . that heareth these My words, and doth them, shall be likened to a wise man that built his house upon a rock.” But a wise builder leaves out nothing that is necessary to the building. Therefore Christ’s words contain all things necessary for man’s salvation.

I answer that, as stated above (a. 1), the New Law had to make such prescriptions or prohibitions alone as are essential for the reception or right use of grace. And since we cannot of ourselves obtain grace, but through Christ alone, hence Christ of Himself instituted the sacraments whereby we obtain grace: viz. Baptism, Eucharist, Orders of the ministers of the New Law, by the institution of the apostles and seventy-two disciples, Penance, and indissoluble Matrimony. He promised Confirmation through the sending of the Holy Ghost: and we read that by His institution the apostles healed the sick by anointing them with oil (Mk. 6:13). These are the sacraments of the New Law.

The right use of grace is by means of works of char-

ity. These, in so far as they are essential to virtue, pertain to the moral precepts, which also formed part of the Old Law. Hence, in this respect, the New Law had nothing to add as regards external action. The determination of these works in their relation to the divine worship, belongs to the ceremonial precepts of the Law; and, in relation to our neighbor, to the judicial precepts, as stated above (q. 99, a. 4). And therefore, since these determinations are not in themselves necessarily connected with inward grace wherein the Law consists, they do not come under a precept of the New Law, but are left to the decision of man; some relating to inferiors—as when a precept is given to an individual; others, relating to superiors, temporal or spiritual, referring, namely, to the common good.

Accordingly the New Law had no other external works to determine, by prescribing or forbidding, except the sacraments, and those moral precepts which have a necessary connection with virtue, for instance, that one must not kill, or steal, and so forth.

Reply to Objection 1. Matters of faith are above human reason, and so we cannot attain to them except through grace. Consequently, when grace came to be bestowed more abundantly, the result was an increase in the number of explicit points of faith. On the other hand, it is through human reason that we are directed to works of virtue, for it is the rule of human action, as stated above (q. 19, a. 3; q. 63, a. 2). Wherefore in such matters as these there was no need for any precepts to be given besides the moral precepts of the Law, which proceed from the dictate of reason.

Reply to Objection 2. In the sacraments of the New Law grace is bestowed, which cannot be received except through Christ: consequently they had to be instituted by Him. But in the sacred things no grace is given: for instance, in the consecration of a temple, an altar or the like, or, again, in the celebration of feasts. Wherefore Our Lord left the institution of such things to the discretion of the faithful, since they have not of themselves any necessary connection with inward grace.

Reply to Objection 3. Our Lord gave the apostles those precepts not as ceremonial observances, but as moral statutes: and they can be understood in two ways. First, following Augustine (*De Consensu Evang.* 30), as being not commands but permissions. For He permitted them to set forth to preach without scrip or stick, and so on, since they were empowered to accept their livelihood from those to whom they preached: wherefore He goes on to say: “For the laborer is worthy of his hire.” Nor is it a sin, but a work of supererogation for a preacher to take means of livelihood with him, without accepting supplies from those to whom he preaches; as Paul did (1 Cor. 9:4, seq.).

Secondly, according to the explanation of other holy men, they may be considered as temporal commands laid upon the apostles for the time during which they

were sent to preach in Judea before Christ's Passion. For the disciples, being yet as little children under Christ's care, needed to receive some special commands from Christ, such as all subjects receive from their superiors: and especially so, since they were to be accustomed little by little to renounce the care of temporalities, so as to become fitted for the preaching of the Gospel throughout the whole world. Nor must we wonder if He established certain fixed modes of life, as long as the state of the Old Law endured and the people had not as yet achieved the perfect liberty of the Spirit. These statutes He abolished shortly before His Passion, as though the disciples had by their means become sufficiently practiced. Hence He said (Lk. 22:35,36) "When I sent you without purse and scrip and shoes, did you

want anything? But they said: Nothing. Then said He unto them: But now, he that hath a purse, let him take it, and likewise a scrip." Because the time of perfect liberty was already at hand, when they would be left entirely to their own judgment in matters not necessarily connected with virtue.

Reply to Objection 4. Judicial precepts also, are not essential to virtue in respect of any particular determination, but only in regard to the common notion of justice. Consequently Our Lord left the judicial precepts to the discretion of those who were to have spiritual or temporal charge of others. But as regards the judicial precepts of the Old Law, some of them He explained, because they were misunderstood by the Pharisees, as we shall state later on (a. 3, ad 2).

Objection 1. It would seem that the New Law directed man insufficiently as regards interior actions. For there are ten commandments of the decalogue directing man to God and his neighbor. But Our Lord partly fulfilled only three of them: as regards, namely, the prohibition of murder, of adultery, and of perjury. Therefore it seems that, by omitting to fulfil the other precepts, He directed man insufficiently.

Objection 2. Further, as regards the judicial precepts, Our Lord ordained nothing in the Gospel, except in the matter of divorcing of wife, of punishment by retaliation, and of persecuting one's enemies. But there are many other judicial precepts of the Old Law, as stated above (q. 104, a. 4; q. 105). Therefore, in this respect, He directed human life insufficiently.

Objection 3. Further, in the Old Law, besides moral and judicial, there were ceremonial precepts about which Our Lord made no ordination. Therefore it seems that He ordained insufficiently.

Objection 4. Further, in order that the mind be inwardly well disposed, man should do no good deed for any temporal whatever. But there are many other temporal goods besides the favor of man: and there are many other good works besides fasting, alms-deeds, and prayer. Therefore Our Lord unbecomingly taught that only in respect of these three works, and of no other earthly goods ought we to shun the glory of human favor.

Objection 5. Further, solicitude for the necessary means of livelihood is by nature instilled into man, and this solicitude even other animals share with man: wherefore it is written (Prov. 6:6,8): "Go to the ant, O sluggard, and consider her ways. . . she provideth her meat for herself in the summer, and gathereth her food in the harvest." But every command issued against the inclination of nature is an unjust command, forasmuch as it is contrary to the law of nature. Therefore it seems that Our Lord unbecomingly forbade solicitude about food and raiment.

Objection 6. Further, no act of virtue should be the subject of a prohibition. Now judgment is an act of justice, according to Ps. 18:15: "Until justice be turned into judgment." Therefore it seems that Our Lord unbecomingly forbade judgment: and consequently that the New Law directed man insufficiently in the matter of interior acts.

On the contrary, Augustine says (De Serm. Dom. in Monte i, 1): We should take note that, when He said: "He that heareth these My words," He indicates clearly that this sermon of the Lord is replete with all the precepts whereby a Christian's life is formed."

I answer that, As is evident from Augustine's words just quoted, the sermon, contains the whole process of forming the life of a Christian. Therein man's interior movements are ordered. Because after declaring that his end is Beatitude; and after commending the

authority of the apostles, through whom the teaching of the Gospel was to be promulgated, He orders man's interior movements, first in regard to man himself, secondly in regard to his neighbor.

This he does in regard to man himself, in two ways, corresponding to man's two interior movements in respect of any prospective action, viz. volition of what has to be done, and intention of the end. Wherefore, in the first place, He directs man's will in respect of the various precepts of the Law: by prescribing that man should refrain not merely from those external works that are evil in themselves, but also from internal acts, and from the occasions of evil deeds. In the second place He directs man's intention, by teaching that in our good works, we should seek neither human praise, nor worldly riches, which is to lay up treasures on earth.

Afterwards He directs man's interior movement in respect of his neighbor, by forbidding us, on the one hand, to judge him rashly, unjustly, or presumptuously; and, on the other, to entrust him too readily with sacred things if he be unworthy.

Lastly, He teaches us how to fulfil the teaching of the Gospel; viz. by imploring the help of God; by striving to enter by the narrow door of perfect virtue; and by being wary lest we be led astray by evil influences. Moreover, He declares that we must observe His commandments, and that it is not enough to make profession of faith, or to work miracles, or merely to hear His words.

Reply to Objection 1. Our Lord explained the manner of fulfilling those precepts which the Scribes and Pharisees did not rightly understand: and this affected chiefly those precepts of the decalogue. For they thought that the prohibition of adultery and murder covered the external act only, and not the internal desire. And they held this opinion about murder and adultery rather than about theft and false witness, because the movement of anger tending to murder, and the movement of desire tending to adultery, seem to be in us from nature somewhat, but not the desire of stealing or bearing false witness. They held a false opinion about perjury, for they thought that perjury indeed was a sin; but that oaths were of themselves to be desired and to be taken frequently, since they seem to proceed from reverence to God. Hence Our Lord shows that an oath is not desirable as a good thing; and that it is better to speak without oaths, unless necessity forces us to have recourse to them.

Reply to Objection 2. The Scribes and Pharisees erred about the judicial precepts in two ways. First, because they considered certain matters contained in the Law of Moses by way of permission, to be right in themselves: namely, divorce of a wife, and the taking of usury from strangers. Wherefore Our Lord forbade a man to divorce his wife (Mat. 5:32); and to receive usury (Lk. 6:35), when He said: "Lend, hoping for

nothing thereby.”

In another way they erred by thinking that certain things which the Old Law commanded to be done for justice’s sake, should be done out of desire for revenge, or out of lust for temporal goods, or out of hatred of one’s enemies; and this in respect of three precepts. For they thought that desire for revenge was lawful, on account of the precept concerning punishment by retaliation: whereas this precept was given that justice might be safeguarded, not that man might seek revenge. Wherefore, in order to do away with this, Our Lord teaches that man should be prepared in his mind to suffer yet more if necessary. They thought that movements of covetousness were lawful on account of those judicial precepts which prescribed restitution of what had been purloined, together with something added thereto, as stated above (q. 105, a. 2, ad 9); whereas the Law commanded this to be done in order to safeguard justice, not to encourage covetousness. Wherefore Our Lord teaches that we should not demand our goods from motives of cupidity, and that we should be ready to give yet more if necessary. They thought that the movement of hatred was lawful, on account of the commandments of the Law about the slaying of one’s enemies: whereas the Law ordered this for the fulfilment of justice, as stated above (q. 105, a. 3, ad 4), not to satisfy hatred. Wherefore Our Lord teaches us that we ought to love our enemies, and to be ready to do good to them if necessary. For these precepts are to be taken as binding “the mind to be prepared to fulfil them,” as Augustine says (De Serm. Dom. in Monte i, 19).

Reply to Objection 3. The moral precepts necessarily retained their force under the New Law, because they are of themselves essential to virtue: whereas the judicial precepts did not necessarily continue to bind in exactly the same way as had been fixed by the Law: this was left to man to decide in one way or another. Hence Our Lord directed us becomingly with regard to these two kinds of precepts. On the other hand, the observance of the ceremonial precepts was totally abolished by the advent of the reality; wherefore in regard to these precepts He commanded nothing on this occasion when He was giving the general points of His doctrine. Elsewhere, however, He makes it clear that the entire bodily worship which was fixed by the Law, was to be changed into spiritual worship: as is evident from Jn. 4:21,23, where He says: “The hour cometh when you shall neither on this mountain, nor in Jerusalem adore the Father...but...the true adorers shall adore the Father in spirit and in truth.”

Reply to Objection 4. All worldly goods may be re-

duced to three—honors, riches, and pleasures; according to 1 Jn. 2:16: “All that is in the world is the concupiscence of the flesh,” which refers to pleasures of the flesh, “and the concupiscence of the eyes,” which refers to riches, “and the pride of life,” which refers to ambition for renown and honor. Now the Law did not promise an abundance of carnal pleasures; on the contrary, it forbade them. But it did promise exalted honors and abundant riches; for it is written in reference to the former (Dt. 28:1): “If thou wilt hear the voice of the Lord thy God...He will make thee higher than all the nations”; and in reference to the latter, we read a little further on (Dt. 28:11): “He will make thee abound with all goods.” But the Jews so distorted the true meaning of these promises, as to think that we ought to serve God, with these things as the end in view. Wherefore Our Lord set this aside by teaching, first of all, that works of virtue should not be done for human glory. And He mentions three works, to which all others may be reduced: since whatever a man does in order to curb his desires, comes under the head of fasting; and whatever a man does for the love of his neighbor, comes under the head of alms-deeds; and whatever a man does for the worship of God, comes under the head of prayer. And He mentions these three specifically, as they hold the principal place, and are most often used by men in order to gain glory. In the second place He taught us that we must not place our end in riches, when He said: “Lay not up to yourselves treasures on earth” (Mat. 6:19).

Reply to Objection 5. Our Lord forbade, not necessary, but inordinate solicitude. Now there is a fourfold solicitude to be avoided in temporal matters. First, we must not place our end in them, nor serve God for the sake of the necessities of food and raiment. Wherefore He says: “Lay not up for yourselves,” etc. Secondly, we must not be so anxious about temporal things, as to despair of God’s help: wherefore Our Lord says (Mat. 6:32): “Your Father knoweth that you have need of all these things.” Thirdly, we must not add presumption to our solicitude; in other words, we must not be confident of getting the necessities of life by our own efforts without God’s help: such solicitude Our Lord sets aside by saying that a man cannot add anything to his stature (Mat. 6:27). We must not anticipate the time for anxiety; namely, by being solicitous now, for the needs, not of the present, but of a future time: wherefore He says (Mat. 6:34): “Be not...solicitous for tomorrow.”

Reply to Objection 6. Our Lord did not forbid the judgment of justice, without which holy things could not be withdrawn from the unworthy. But he forbade inordinate judgment, as stated above.

Objection 1. It would seem that certain definite counsels are not fittingly proposed in the New Law. For counsels are given about that which is expedient for an end, as we stated above, when treating of counsel (q. 14, a. 2). But the same things are not expedient for all. Therefore certain definite counsels should not be proposed to all.

Objection 2. Further, counsels regard a greater good. But there are no definite degrees to the greater good. Therefore definite counsels should not be given.

Objection 3. Further, counsels pertain to the life of perfection. But obedience pertains to the life of perfection. Therefore it was unfitting that no counsel of obedience should be contained in the Gospel.

Objection 4. Further, many matters pertaining to the life of perfection are found among the commandments, as, for instance, "Love your enemies" (Mat. 5:44), and those precepts which Our Lord gave His apostles (Mat. 10). Therefore the counsels are unfittingly given in the New Law: both because they are not all mentioned; and because they are not distinguished from the commandments.

On the contrary, The counsels of a wise friend are of great use, according to Prov. (27:9): "Ointment and perfumes rejoice the heart: and the good counsels of a friend rejoice the soul." But Christ is our wisest and greatest friend. Therefore His counsels are supremely useful and becoming.

I answer that, The difference between a counsel and a commandment is that a commandment implies obligation, whereas a counsel is left to the option of the one to whom it is given. Consequently in the New Law, which is the law of liberty, counsels are added to the commandments, and not in the Old Law, which is the law of bondage. We must therefore understand the commandments of the New Law to have been given about matters that are necessary to gain the end of eternal bliss, to which end the New Law brings us forthwith: but that the counsels are about matters that render the gaining of this end more assured and expeditious.

Now man is placed between the things of this world, and spiritual goods wherein eternal happiness consists: so that the more he cleaves to the one, the more he withdraws from the other, and conversely. Wherefore he that cleaves wholly to the things of this world, so as to make them his end, and to look upon them as the reason and rule of all he does, falls away altogether from spiritual goods. Hence this disorder is removed by the commandments. Nevertheless, for man to gain the end aforesaid, he does not need to renounce the things of the world altogether: since he can, while using the things of this world, attain to eternal happiness, provided he does not place his end in them: but he will attain more speedily thereto by giving up the goods of this world entirely: wherefore the evangelical counsels are given for this purpose.

Now the goods of this world which come into use in human life, consist in three things: viz. in external wealth pertaining to the "concupiscence of the eyes"; carnal pleasures pertaining to the "concupiscence of the flesh"; and honors, which pertain to the "pride of life," according to 1 Jn. 2:16: and it is in renouncing these altogether, as far as possible, that the evangelical counsels consist. Moreover, every form of the religious life that professes the state of perfection is based on these three: since riches are renounced by poverty; carnal pleasures by perpetual chastity; and the pride of life by the bondage of obedience.

Now if a man observe these absolutely, this is in accordance with the counsels as they stand. But if a man observe any one of them in a particular case, this is taking that counsel in a restricted sense, namely, as applying to that particular case. For instance, when anyone gives an alms to a poor man, not being bound so to do, he follows the counsels in that particular case. In like manner, when a man for some fixed time refrains from carnal pleasures that he may give himself to prayer, he follows the counsel for that particular time. And again, when a man follows not his will as to some deed which he might do lawfully, he follows the counsel in that particular case: for instance, if he do good to his enemies when he is not bound to, or if he forgive an injury of which he might justly seek to be avenged. In this way, too, all particular counsels may be reduced to these three general and perfect counsels.

Reply to Objection 1. The aforesaid counsels, considered in themselves, are expedient to all; but owing to some people being ill-disposed, it happens that some of them are inexpedient, because their disposition is not inclined to such things. Hence Our Lord, in proposing the evangelical counsels, always makes mention of man's fitness for observing the counsels. For in giving the counsel of perpetual poverty (Mat. 19:21), He begins with the words: "If thou wilt be perfect," and then He adds: "Go, sell all [Vulg.: 'what'] thou hast." In like manner when He gave the counsel of perpetual chastity, saying (Mat. 19:12): "There are eunuchs who have made themselves eunuchs for the kingdom of heaven," He adds straightway: "He that can take, let him take it." And again, the Apostle (1 Cor. 7:35), after giving the counsel of virginity, says: "And this I speak for your profit; not to cast a snare upon you."

Reply to Objection 2. The greater goods are not definitely fixed in the individual; but those which are simply and absolutely the greater good in general are fixed: and to these all the above particular goods may be reduced, as stated above.

Reply to Objection 3. Even the counsel of obedience is understood to have been given by Our Lord in the words: "And [let him] follow Me." For we follow Him not only by imitating His works, but also by obeying His commandments, according to Jn. 10:27: "My

sheep hear My voice. . . and they follow Me.”

Reply to Objection 4. Those things which Our Lord prescribed about the true love of our enemies, and other similar sayings (Mat. 5; Lk. 6), may be referred to the preparation of the mind, and then they are necessary for salvation; for instance, that man be prepared to do good to his enemies, and other similar actions, when there is need. Hence these things are placed among the

precepts. But that anyone should actually and promptly behave thus towards an enemy when there is no special need, is to be referred to the particular counsels, as stated above. As to those matters which are set down in Mat. 10 and Lk. 9 and 10, they were either disciplinary commands for that particular time, or concessions, as stated above (a. 2, ad 3). Hence they are not set down among the counsels.

FIRST PART OF THE SECOND PART, QUESTION 109

Of the Necessity of Grace

(In Ten Articles)

We must now consider the exterior principle of human acts, i.e. God, in so far as, through grace, we are helped by Him to do right: and, first, we must consider the grace of God; secondly, its cause; thirdly, its effects.

The first point of consideration will be threefold: for we shall consider (1) The necessity of grace; (2) grace itself, as to its essence; (3) its division.

Under the first head there are ten points of inquiry:

- (1) Whether without grace man can know anything?
- (2) Whether without God's grace man can do or wish any good?
- (3) Whether without grace man can love God above all things?
- (4) Whether without grace man can keep the commandments of the Law?
- (5) Whether without grace he can merit eternal life?
- (6) Whether without grace man can prepare himself for grace?
- (7) Whether without grace he can rise from sin?
- (8) Whether without grace man can avoid sin?
- (9) Whether man having received grace can do good and avoid sin without any further Divine help?
- (10) Whether he can of himself persevere in good?

Whether without grace man can know any truth?

Ia IIae q. 109 a. 1

Objection 1. It would seem that without grace man can know no truth. For, on 1 Cor. 12:3: "No man can say, the Lord Jesus, but by the Holy Ghost," a gloss says: "Every truth, by whomsoever spoken is from the Holy Ghost." Now the Holy Ghost dwells in us by grace. Therefore we cannot know truth without grace.

Objection 2. Further, Augustine says (Solil. i, 6) that "the most certain sciences are like things lit up by the sun so as to be seen. Now God Himself is He Whom sheds the light. And reason is in the mind as sight is in the eye. And the eyes of the mind are the senses of the soul." Now the bodily senses, however pure, cannot see any visible object, without the sun's light. Therefore the human mind, however perfect, cannot, by reasoning, know any truth without Divine light: and this pertains to the aid of grace.

Objection 3. Further, the human mind can only understand truth by thinking, as is clear from Augustine (De Trin. xiv, 7). But the Apostle says (2 Cor. 3:5): "Not that we are sufficient to think anything of ourselves, as of ourselves; but our sufficiency is from God." Therefore man cannot, of himself, know truth without the help of grace.

On the contrary, Augustine says (Retract. i, 4): "I do not approve having said in the prayer, O God, Who dost wish the sinless alone to know the truth; for it may be answered that many who are not sinless know many truths." Now man is cleansed from sin by grace, according to Ps. 50:12: "Create a clean heart in me, O God, and renew a right spirit within my bowels." Therefore without grace man of himself can know truth.

I answer that, To know truth is a use or act of intellectual light, since, according to the Apostle (Eph. 5:13): "All that is made manifest is light." Now every

use implies movement, taking movement broadly, so as to call thinking and willing movements, as is clear from the Philosopher (De Anima iii, 4). Now in corporeal things we see that for movement there is required not merely the form which is the principle of the movement or action, but there is also required the motion of the first mover. Now the first mover in the order of corporeal things is the heavenly body. Hence no matter how perfectly fire has heat, it would not bring about alteration, except by the motion of the heavenly body. But it is clear that as all corporeal movements are reduced to the motion of the heavenly body as to the first corporeal mover, so all movements, both corporeal and spiritual, are reduced to the simple First Mover, Who is God. And hence no matter how perfect a corporeal or spiritual nature is supposed to be, it cannot proceed to its act unless it be moved by God; but this motion is according to the plan of His providence, and not by necessity of nature, as the motion of the heavenly body. Now not only is every motion from God as from the First Mover, but all formal perfection is from Him as from the First Act. And thus the act of the intellect or of any created being whatsoever depends upon God in two ways: first, inasmuch as it is from Him that it has the form whereby it acts; secondly, inasmuch as it is moved by Him to act.

Now every form bestowed on created things by God has power for a determined act, which it can bring about in proportion to its own proper endowment; and beyond which it is powerless, except by a superadded form, as water can only heat when heated by the fire. And thus the human understanding has a form, viz. intelligible light, which of itself is sufficient for knowing certain intelligible things, viz. those we can come to know through the senses. Higher intelligible things of the hu-

man intellect cannot know, unless it be perfected by a stronger light, viz. the light of faith or prophecy which is called the "light of grace," inasmuch as it is added to nature.

Hence we must say that for the knowledge of any truth whatsoever man needs Divine help, that the intellect may be moved by God to its act. But he does not need a new light added to his natural light, in order to know the truth in all things, but only in some that surpass his natural knowledge. And yet at times God miraculously instructs some by His grace in things that can be known by natural reason, even as He sometimes brings about miraculously what nature can do.

Reply to Objection 1. Every truth by whomsoever spoken is from the Holy Ghost as bestowing the natural light, and moving us to understand and speak the truth,

but not as dwelling in us by sanctifying grace, or as bestowing any habitual gift superadded to nature. For this only takes place with regard to certain truths that are known and spoken, and especially in regard to such as pertain to faith, of which the Apostle speaks.

Reply to Objection 2. The material sun sheds its light outside us; but the intelligible Sun, Who is God, shines within us. Hence the natural light bestowed upon the soul is God's enlightenment, whereby we are enlightened to see what pertains to natural knowledge; and for this there is required no further knowledge, but only for such things as surpass natural knowledge.

Reply to Objection 3. We always need God's help for every thought, inasmuch as He moves the understanding to act; for actually to understand anything is to think, as is clear from Augustine (De Trin. xiv, 7).

Whether man can wish or do any good without grace?

Ia IIae q. 109 a. 2

Objection 1. It would seem that man can wish and do good without grace. For that is in man's power, whereof he is master. Now man is master of his acts, and especially of his willing, as stated above (q. 1, a. 1; q. 13, a. 6). Hence man, of himself, can wish and do good without the help of grace.

Objection 2. Further, man has more power over what is according to his nature than over what is beyond his nature. Now sin is against his nature, as Damascene says (De Fide Orth. ii, 30); whereas deeds of virtue are according to his nature, as stated above (q. 71, a. 1). Therefore since man can sin of himself he can wish and do good.

Objection 3. Further, the understanding's good is truth, as the Philosopher says (Ethic. vi, 2). Now the intellect can of itself know truth, even as every other thing can work its own operation of itself. Therefore, much more can man, of himself, do and wish good.

On the contrary, The Apostle says (Rom. 9:16): "It is not of him that willeth," namely, to will, "nor of him that runneth," namely to run, "but of God that showeth mercy." And Augustine says (De Corrept. et Gratia ii) that "without grace men do nothing good when they either think or wish or love or act."

I answer that, Man's nature may be looked at in two ways: first, in its integrity, as it was in our first parent before sin; secondly, as it is corrupted in us after the sin of our first parent. Now in both states human nature needs the help of God as First Mover, to do or wish any good whatsoever, as stated above (a. 1). But in the state of integrity, as regards the sufficiency of the operative power, man by his natural endowments could wish and do the good proportionate to his nature, such as the good of acquired virtue; but not surpassing good, as the good of infused virtue. But in the state of corrupt nature, man falls short of what he could do by his nature, so that he is unable to fulfil it by his own natural powers. Yet because human nature is not altogether corrupted by

sin, so as to be shorn of every natural good, even in the state of corrupted nature it can, by virtue of its natural endowments, work some particular good, as to build dwellings, plant vineyards, and the like; yet it cannot do all the good natural to it, so as to fall short in nothing; just as a sick man can of himself make some movements, yet he cannot be perfectly moved with the movements of one in health, unless by the help of medicine he be cured.

And thus in the state of perfect nature man needs a gratuitous strength superadded to natural strength for one reason, viz. in order to do and wish supernatural good; but for two reasons, in the state of corrupt nature, viz. in order to be healed, and furthermore in order to carry out works of supernatural virtue, which are meritorious. Beyond this, in both states man needs the Divine help, that he may be moved to act well.

Reply to Objection 1. Man is master of his acts and of his willing or not willing, because of his deliberate reason, which can be bent to one side or another. And although he is master of his deliberating or not deliberating, yet this can only be by a previous deliberation; and since it cannot go on to infinity, we must come at length to this, that man's free-will is moved by an extrinsic principle, which is above the human mind, to wit by God, as the Philosopher proves in the chapter "On Good Fortune" (Ethic. Eudem. vii). Hence the mind of man still unweakened is not so much master of its act that it does not need to be moved by God; and much more the free-will of man weakened by sin, whereby it is hindered from good by the corruption of the nature.

Reply to Objection 2. To sin is nothing else than to fail in the good which belongs to any being according to its nature. Now as every created thing has its being from another, and, considered in itself, is nothing, so does it need to be preserved by another in the good which pertains to its nature. For it can of itself fail in good, even as of itself it can fall into non-existence, unless it is up-

held by God.

Reply to Objection 3. Man cannot even know truth without Divine help, as stated above (a. 1). And yet hu-

man nature is more corrupt by sin in regard to the desire for good, than in regard to the knowledge of truth.

Whether by his own natural powers and without grace man can love God above all things? Ia IIae q. 109 a. 3

Objection 1. It would seem that without grace man cannot love God above all things by his own natural powers. For to love God above all things is the proper and principal act of charity. Now man cannot of himself possess charity, since the “charity of God is poured forth in our hearts by the Holy Ghost Who is given to us,” as is said Rom. 5:5. Therefore man by his natural powers alone cannot love God above all things.

Objection 2. Further, no nature can rise above itself. But to love God above all things is to tend above oneself. Therefore without the help of grace no created nature can love God above itself.

Objection 3. Further, to God, Who is the Highest Good, is due the best love, which is that He be loved above all things. Now without grace man is not capable of giving God the best love, which is His due; otherwise it would be useless to add grace. Hence man, without grace and with his natural powers alone, cannot love God above all things.

On the contrary, As some maintain, man was first made with only natural endowments; and in this state it is manifest that he loved God to some extent. But he did not love God equally with himself, or less than himself, otherwise he would have sinned. Therefore he loved God above himself. Therefore man, by his natural powers alone, can love God more than himself and above all things.

I answer that, As was said above (Ia, q. 60, a. 5), where the various opinions concerning the natural love of the angels were set forth, man in a state of perfect nature, could by his natural power, do the good natural to him without the addition of any gratuitous gift, though not without the help of God moving him. Now to love God above all things is natural to man and to every nature, not only rational but irrational, and even to inanimate nature according to the manner of love which can belong to each creature. And the reason of this is that it is natural to all to seek and love things according as they are naturally fit (to be sought and loved) since “all things act according as they are naturally fit” as stated in Phys. ii, 8. Now it is manifest that the good of the part is for the good of the whole; hence everything, by its natural

appetite and love, loves its own proper good on account of the common good of the whole universe, which is God. Hence Dionysius says (Div. Nom. iv) that “God leads everything to love of Himself.” Hence in the state of perfect nature man referred the love of himself and of all other things to the love of God as to its end; and thus he loved God more than himself and above all things. But in the state of corrupt nature man falls short of this in the appetite of his rational will, which, unless it is cured by God’s grace, follows its private good, on account of the corruption of nature. And hence we must say that in the state of perfect nature man did not need the gift of grace added to his natural endowments, in order to love God above all things naturally, although he needed God’s help to move him to it; but in the state of corrupt nature man needs, even for this, the help of grace to heal his nature.

Reply to Objection 1. Charity loves God above all things in a higher way than nature does. For nature loves God above all things inasmuch as He is the beginning and the end of natural good; whereas charity loves Him, as He is the object of beatitude, and inasmuch as man has a spiritual fellowship with God. Moreover charity adds to natural love of God a certain quickness and joy, in the same way that every habit of virtue adds to the good act which is done merely by the natural reason of a man who has not the habit of virtue.

Reply to Objection 2. When it is said that nature cannot rise above itself, we must not understand this as if it could not be drawn to any object above itself, for it is clear that our intellect by its natural knowledge can know things above itself, as is shown in our natural knowledge of God. But we are to understand that nature cannot rise to an act exceeding the proportion of its strength. Now to love God above all things is not such an act; for it is natural to every creature, as was said above.

Reply to Objection 3. Love is said to be best, both with respect to degree of love, and with regard to the motive of loving, and the mode of love. And thus the highest degree of love is that whereby charity loves God as the giver of beatitude, as was said above.

Whether man without grace and by his own natural powers can fulfil the commandments of the Law? Ia IIae q. 109 a. 4

Objection 1. It would seem that man without grace, and by his own natural powers, can fulfil the commandments of the Law. For the Apostle says (Rom. 2:14) that “the Gentiles who have not the law, do by nature

those things that are of the Law.” Now what a man does naturally he can do of himself without grace. Hence a man can fulfil the commandments of the Law without grace.

Objection 2. Further, Jerome says (Expos. Cathol. Fide*) that “they are anathema who say God has laid impossibilities upon man.” Now what a man cannot fulfil by himself is impossible to him. Therefore a man can fulfil all the commandments of himself.

Objection 3. Further, of all the commandments of the Law, the greatest is this, “Thou shalt love the Lord thy God with thy whole heart” (Mat. 27:37). Now man with his natural endowments can fulfil this command by loving God above all things, as stated above (a. 3). Therefore man can fulfil all the commandments of the Law without grace.

On the contrary, Augustine says (De Haeres. lxxxviii) that it is part of the Pelagian heresy that “they believe that without grace man can fulfil all the Divine commandments.”

I answer that, There are two ways of fulfilling the commandments of the Law. The first regards the substance of the works, as when a man does works of justice, fortitude, and of other virtues. And in this way man in the state of perfect nature could fulfil all the commandments of the Law; otherwise he would have been unable to sin in that state, since to sin is nothing else than to transgress the Divine commandments. But in the state of corrupted nature man cannot fulfil all the Divine commandments without healing grace. Secondly, the commandments of the law can be fulfilled, not merely

as regards the substance of the act, but also as regards the mode of acting, i.e. their being done out of charity. And in this way, neither in the state of perfect nature, nor in the state of corrupt nature can man fulfil the commandments of the law without grace. Hence, Augustine (De Corrupt. et Grat. ii) having stated that “without grace men can do no good whatever,” adds: “Not only do they know by its light what to do, but by its help they do lovingly what they know.” Beyond this, in both states they need the help of God’s motion in order to fulfil the commandments, as stated above (Aa. 2,3).

Reply to Objection 1. As Augustine says (De Spir. et Lit. xxvii), “do not be disturbed at his saying that they do by nature those things that are of the Law; for the Spirit of grace works this, in order to restore in us the image of God, after which we were naturally made.”

Reply to Objection 2. What we can do with the Divine assistance is not altogether impossible to us; according to the Philosopher (Ethic. iii, 3): “What we can do through our friends, we can do, in some sense, by ourselves.” Hence Jerome* concedes that “our will is in such a way free that we must confess we still require God’s help.”

Reply to Objection 3. Man cannot, with his purely natural endowments, fulfil the precept of the love of God, as stated above (a. 3).

Whether man can merit everlasting life without grace?

Ia IIae q. 109 a. 5

Objection 1. It would seem that man can merit everlasting life without grace. For Our Lord says (Mat. 19:17): “If thou wilt enter into life, keep the commandments”; from which it would seem that to enter into everlasting life rests with man’s will. But what rests with our will, we can do of ourselves. Hence it seems that man can merit everlasting life of himself.

Objection 2. Further, eternal life is the wage of reward bestowed by God on men, according to Mat. 5:12: “Your reward is very great in heaven.” But wage or reward is meted by God to everyone according to his works, according to Ps. 61:12: “Thou wilt render to every man according to his works.” Hence, since man is master of his works, it seems that it is within his power to reach everlasting life.

Objection 3. Further, everlasting life is the last end of human life. Now every natural thing by its natural endowments can attain its end. Much more, therefore, may man attain to life everlasting by his natural endowments, without grace.

On the contrary, The Apostle says (Rom. 6:23): “The grace of God is life everlasting.” And as a gloss says, this is said “that we may understand that God, of His own mercy, leads us to everlasting life.”

I answer that, Acts conducing to an end must be

proportioned to the end. But no act exceeds the proportion of its active principle; and hence we see in natural things, that nothing can by its operation bring about an effect which exceeds its active force, but only such as is proportionate to its power. Now everlasting life is an end exceeding the proportion of human nature, as is clear from what we have said above (q. 5, a. 5). Hence man, by his natural endowments, cannot produce meritorious works proportionate to everlasting life; and for this a higher force is needed, viz. the force of grace. And thus without grace man cannot merit everlasting life; yet he can perform works conducing to a good which is natural to man, as “to toil in the fields, to drink, to eat, or to have friends,” and the like, as Augustine says in his third Reply to the Pelagians†.

Reply to Objection 1. Man, by his will, does works meritorious of everlasting life; but as Augustine says, in the same book, for this it is necessary that the will of man should be prepared with grace by God.

Reply to Objection 2. As the gloss upon Rom. 6:23, “The grace of God is life everlasting,” says, “It is certain that everlasting life is meter to good works; but the works to which it is meted, belong to God’s grace.” And it has been said (a. 4), that to fulfil the commandments of the Law, in their due way, whereby their fulfil-

* Symboli Explanatio ad Damasum, among the supposititious works of St. Jerome: now ascribed to Pelagius * Symboli Explanatio ad Damasum, among the supposititious works of St. Jerome: now ascribed to Pelagius † Hypognosticon iii, among the spurious works of St. Augustine

ment may be meritorious, requires grace.

Reply to Objection 3. This objection has to do with the natural end of man. Now human nature, since it is nobler, can be raised by the help of grace to a higher

end, which lower natures can nowise reach; even as a man who can recover his health by the help of medicines is better disposed to health than one who can nowise recover it, as the Philosopher observes (*De Coelo* ii, 12).

Whether a man, by himself and without the external aid of grace, can prepare himself for grace? Ia IIae q. 109 a. 6

Objection 1. It would seem that man, by himself and without the external help of grace, can prepare himself for grace. For nothing impossible is laid upon man, as stated above (a. 4, ad 1). But it is written (*Zech.* 1:3): “Turn ye to Me. . . and I will turn to you.” Now to prepare for grace is nothing more than to turn to God. Therefore it seems that man of himself, and without the external help of grace, can prepare himself for grace.

Objection 2. Further, man prepares himself for grace by doing what is in him to do, since if man does what is in him to do, God will not deny him grace, for it is written (*Mat.* 7:11) that God gives His good Spirit “to them that ask Him.” But what is in our power is in us to do. Therefore it seems to be in our power to prepare ourselves for grace.

Objection 3. Further, if a man needs grace in order to prepare for grace, with equal reason will he need grace to prepare himself for the first grace; and thus to infinity, which is impossible. Hence it seems that we must not go beyond what was said first, viz. that man, of himself and without grace, can prepare himself for grace.

Objection 4. Further, it is written (*Prov.* 16:1) that “it is the part of man to prepare the soul.” Now an action is said to be part of a man, when he can do it by himself. Hence it seems that man by himself can prepare himself for grace.

On the contrary, It is written (*Jn.* 6:44): “No man can come to Me except the Father, Who hath sent Me, draw him.” But if man could prepare himself, he would not need to be drawn by another. Hence man cannot prepare himself without the help of grace.

I answer that, The preparation of the human will for good is twofold: the first, whereby it is prepared to operate rightly and to enjoy God; and this preparation of the will cannot take place without the habitual gift of grace, which is the principle of meritorious works, as stated above (a. 5). There is a second way in which the human will may be taken to be prepared for the gift of habitual grace itself. Now in order that man prepare himself to receive this gift, it is not necessary to presuppose any further habitual gift in the soul, otherwise we should go on to infinity. But we must presuppose a gratuitous gift of God, Who moves the soul inwardly or inspires the good wish. For in these two ways do we need the Divine assistance, as stated above (Aa. 2,3). Now that we need the help of God to move us, is manifest.

For since every agent acts for an end, every cause must direct its effect to its end, and hence since the order of ends is according to the order of agents or movers, man must be directed to the last end by the motion of the first mover, and to the proximate end by the motion of any of the subordinate movers; as the spirit of the soldier is bent towards seeking the victory by the motion of the leader of the army—and towards following the standard of a regiment by the motion of the standard-bearer. And thus since God is the First Mover, simply, it is by His motion that everything seeks to be likened to God in its own way. Hence Dionysius says (*Div. Nom.* iv) that “God turns all to Himself.” But He directs righteous men to Himself as to a special end, which they seek, and to which they wish to cling, according to *Ps.* 72:28, “it is good for Me to adhere to my God.” And that they are “turned” to God can only spring from God’s having “turned” them. Now to prepare oneself for grace is, as it were, to be turned to God; just as, whoever has his eyes turned away from the light of the sun, prepares himself to receive the sun’s light, by turning his eyes towards the sun. Hence it is clear that man cannot prepare himself to receive the light of grace except by the gratuitous help of God moving him inwardly.

Reply to Objection 1. Man’s turning to God is by free-will; and thus man is bidden to turn himself to God. But free-will can only be turned to God, when God turns it, according to *Jer.* 31:18: “Convert me and I shall be converted, for Thou art the Lord, my God”; and *Lam.* 5:21: “Convert us, O Lord, to Thee, and we shall be converted.”

Reply to Objection 2. Man can do nothing unless moved by God, according to *Jn.* 15:5: “Without Me, you can do nothing.” Hence when a man is said to do what is in him to do, this is said to be in his power according as he is moved by God.

Reply to Objection 3. This objection regards habitual grace, for which some preparation is required, since every form requires a disposition in that which is to be its subject. But in order that man should be moved by God, no further motion is presupposed since God is the First Mover. Hence we need not go to infinity.

Reply to Objection 4. It is the part of man to prepare his soul, since he does this by his free-will. And yet he does not do this without the help of God moving him, and drawing him to Himself, as was said above.

Objection 1. It would seem that man can rise from sin without the help of grace. For what is presupposed to grace, takes place without grace. But to rise to sin is presupposed to the enlightenment of grace; since it is written (Eph. 5:14): “Arise from the dead and Christ shall enlighten thee.” Therefore man can rise from sin without grace.

Objection 2. Further, sin is opposed to virtue as illness to health, as stated above (q. 71, a. 1, ad 3). Now, man, by force of his nature, can rise from illness to health, without the external help of medicine, since there still remains in him the principle of life, from which the natural operation proceeds. Hence it seems that, with equal reason, man may be restored by himself, and return from the state of sin to the state of justice without the help of external grace.

Objection 3. Further, every natural thing can return by itself to the act befitting its nature, as hot water returns by itself to its natural coldness, and a stone cast upwards returns by itself to its natural movement. Now a sin is an act against nature, as is clear from Damascene (De Fide Orth. ii, 30). Hence it seems that man by himself can return from sin to the state of justice.

On the contrary, The Apostle says (Gal. 2:21; Cf. Gal. 3:21): “For if there had been a law given which could give life—then Christ died in vain,” i.e. to no purpose. Hence with equal reason, if man has a nature, whereby he can be justified, “Christ died in vain,” i.e. to no purpose. But this cannot fittingly be said. Therefore by himself he cannot be justified, i.e. he cannot return from a state of sin to a state of justice.

I answer that, Man by himself can no wise rise from sin without the help of grace. For since sin is transient as to the act and abiding in its guilt, as stated above (q. 87, a. 6), to rise from sin is not the same as to cease the act of sin; but to rise from sin means that man has restored to him what he lost by sinning. Now man incurs a triple loss by sinning, as was clearly shown above (q. 85, a. 1; q. 86, a. 1; q. 87, a. 1), viz. stain, corruption of natural good, and debt of punishment. He incurs a stain, inasmuch as he forfeits the lustre of grace through the deformity of sin. Natural good is corrupted, inasmuch as man’s nature is disordered by man’s will

not being subject to God’s; and this order being overthrown, the consequence is that the whole nature of sinful man remains disordered. Lastly, there is the debt of punishment, inasmuch as by sinning man deserves everlasting damnation.

Now it is manifest that none of these three can be restored except by God. For since the lustre of grace springs from the shedding of Divine light, this lustre cannot be brought back, except God sheds His light anew: hence a habitual gift is necessary, and this is the light of grace. Likewise, the order of nature can only be restored, i.e. man’s will can only be subject to God when God draws man’s will to Himself, as stated above (a. 6). So, too, the guilt of eternal punishment can be remitted by God alone, against Whom the offense was committed and Who is man’s Judge. And thus in order that man rise from sin there is required the help of grace, both as regards a habitual gift, and as regards the internal motion of God.

Reply to Objection 1. To man is bidden that which pertains to the act of free-will, as this act is required in order that man should rise from sin. Hence when it is said, “Arise, and Christ shall enlighten thee,” we are not to think that the complete rising from sin precedes the enlightenment of grace; but that when man by his free-will, moved by God, strives to rise from sin, he receives the light of justifying grace.

Reply to Objection 2. The natural reason is not the sufficient principle of the health that is in man by justifying grace. This principle is grace which is taken away by sin. Hence man cannot be restored by himself; but he requires the light of grace to be poured upon him anew, as if the soul were infused into a dead body for its resurrection.

Reply to Objection 3. When nature is perfect, it can be restored by itself to its befitting and proportionate condition; but without exterior help it cannot be restored to what surpasses its measure. And thus human nature undone by reason of the act of sin, remains no longer perfect, but corrupted, as stated above (q. 85); nor can it be restored, by itself, to its connatural good, much less to the supernatural good of justice.

Objection 1. It would seem that without grace man can avoid sin. Because “no one sins in what he cannot avoid,” as Augustine says (De Duab. Anim. x, xi; De Libero Arbit. iii, 18). Hence if a man in mortal sin cannot avoid sin, it would seem that in sinning he does not sin, which is impossible.

Objection 2. Further, men are corrected that they may not sin. If therefore a man in mortal sin cannot avoid sin, correction would seem to be given to no pur-

pose; which is absurd.

Objection 3. Further, it is written (Ecclus. 15:18): “Before man is life and death, good and evil; that which he shall choose shall be given him.” But by sinning no one ceases to be a man. Hence it is still in his power to choose good or evil; and thus man can avoid sin without grace.

On the contrary, Augustine says (De Perfect Just. xxi): “Whoever denies that we ought to say the prayer

‘Lead us not into temptation’ (and they deny it who maintain that the help of God’s grace is not necessary to man for salvation, but that the gift of the law is enough for the human will) ought without doubt to be removed beyond all hearing, and to be anathematized by the tongues of all.”

I answer that, We may speak of man in two ways: first, in the state of perfect nature; secondly, in the state of corrupted nature. Now in the state of perfect nature, man, without habitual grace, could avoid sinning either mortally or venially; since to sin is nothing else than to stray from what is according to our nature—and in the state of perfect nature man could avoid this. Nevertheless he could not have done it without God’s help to uphold him in good, since if this had been withdrawn, even his nature would have fallen back into nothingness.

But in the state of corrupt nature man needs grace to heal his nature in order that he may entirely abstain from sin. And in the present life this healing is wrought in the mind—the carnal appetite being not yet restored. Hence the Apostle (Rom. 7:25) says in the person of one who is restored: “I myself, with the mind, serve the law of God, but with the flesh, the law of sin.” And in this state man can abstain from all mortal sin, which takes its stand in his reason, as stated above (q. 74, a. 5); but man cannot abstain from all venial sin on account of the corruption of his lower appetite of sensuality. For man can, indeed, repress each of its movements (and hence they are sinful and voluntary), but not all, because whilst he is resisting one, another may arise, and also because the reason is always alert to avoid these movements, as was said above (q. 74, a. 3, ad 2).

So, too, before man’s reason, wherein is mortal sin, is restored by justifying grace, he can avoid each mortal sin, and for a time, since it is not necessary that he should be always actually sinning. But it cannot be that he remains for a long time without mortal sin. Hence Gregory says (Super Ezech. Hom. xi) that “a sin not at once taken away by repentance, by its weight drags us down to other sins”: and this because, as the lower appetite ought to be subject to the reason, so should the reason be subject to God, and should place in Him the end of its will. Now it is by the end that all human acts ought to be regulated, even as it is by the judgment of the reason that the movements of the lower ap-

petite should be regulated. And thus, even as inordinate movements of the sensitive appetite cannot help occurring since the lower appetite is not subject to reason, so likewise, since man’s reason is not entirely subject to God, the consequence is that many disorders occur in the reason. For when man’s heart is not so fixed on God as to be unwilling to be parted from Him for the sake of finding any good or avoiding any evil, many things happen for the achieving or avoiding of which a man strays from God and breaks His commandments, and thus sins mortally: especially since, when surprised, a man acts according to his preconceived end and his pre-existing habits, as the Philosopher says (Ethic. iii); although with premeditation of his reason a man may do something outside the order of his preconceived end and the inclination of his habit. But because a man cannot always have this premeditation, it cannot help occurring that he acts in accordance with his will turned aside from God, unless, by grace, he is quickly brought back to the due order.

Reply to Objection 1. Man can avoid each but every act of sin, except by grace, as stated above. Nevertheless, since it is by his own shortcoming that he does not prepare himself to have grace, the fact that he cannot avoid sin without grace does not excuse him from sin.

Reply to Objection 2. Correction is useful “in order that out of the sorrow of correction may spring the wish to be regenerate; if indeed he who is corrected is a son of promise, in such sort that whilst the noise of correction is outwardly resounding and punishing, God by hidden inspirations is inwardly causing to will,” as Augustine says (De Corr. et Gratia vi). Correction is therefore necessary, from the fact that man’s will is required in order to abstain from sin; yet it is not sufficient without God’s help. Hence it is written (Eccles. 7:14): “Consider the works of God that no man can correct whom He hath despised.”

Reply to Objection 3. As Augustine says (Hypogonosticon iii*), this saying is to be understood of man in the state of perfect nature, when as yet he was not a slave of sin. Hence he was able to sin and not to sin. Now, too, whatever a man wills, is given to him; but his willing good, he has by God’s assistance.

Whether one who has already obtained grace, can, of himself and without further help of grace, do good and avoid sin? Ia IIae q. 109 a. 9

Objection 1. It would seem that whoever has already obtained grace, can by himself and without further help of grace, do good and avoid sin. For a thing is useless or imperfect, if it does not fulfil what it was given for. Now grace is given to us that we may do good and keep from sin. Hence if with grace man cannot do this, it seems that grace is either useless or imperfect.

Objection 2. Further, by grace the Holy Spirit dwells in us, according to 1 Cor. 3:16: “Know you not that you are the temple of God, and that the Spirit of God dwelleth in you?” Now since the Spirit of God is omnipotent, He is sufficient to ensure our doing good and to keep us from sin. Hence a man who has obtained grace can do the above two things without any further

* Among the spurious works of St. Augustine

assistance of grace.

Objection 3. Further, if a man who has obtained grace needs further aid of grace in order to live righteously and to keep free from sin, with equal reason, will he need yet another grace, even though he has obtained this first help of grace. Therefore we must go on to infinity; which is impossible. Hence whoever is in grace needs no further help of grace in order to do righteously and to keep free from sin.

On the contrary, Augustine says (*De Natura et Gratia* xxvi) that “as the eye of the body though most healthy cannot see unless it is helped by the brightness of light, so, neither can a man, even if he is most righteous, live righteously unless he be helped by the eternal light of justice.” But justification is by grace, according to Rom. 3:24: “Being justified freely by His grace.” Hence even a man who already possesses grace needs a further assistance of grace in order to live righteously.

I answer that, As stated above (a. 5), in order to live righteously a man needs a twofold help of God—first, a habitual gift whereby corrupted human nature is healed, and after being healed is lifted up so as to work deeds meritoriously of everlasting life, which exceed the capability of nature. Secondly, man needs the help of grace in order to be moved by God to act.

Now with regard to the first kind of help, man does not need a further help of grace, e.g. a further infused habit. Yet he needs the help of grace in another way, i.e. in order to be moved by God to act righteously, and this for two reasons: first, for the general reason that no created thing can put forth any act, unless by virtue of the Divine motion. Secondly, for this special reason—the condition of the state of human nature. For

although healed by grace as to the mind, yet it remains corrupted and poisoned in the flesh, whereby it serves “the law of sin,” Rom. 7:25. In the intellect, too, there seems the darkness of ignorance, whereby, as is written (Rom. 8:26): “We know not what we should pray for as we ought”; since on account of the various turns of circumstances, and because we do not know ourselves perfectly, we cannot fully know what is for our good, according to Wis. 9:14: “For the thoughts of mortal men are fearful and our counsels uncertain.” Hence we must be guided and guarded by God, Who knows and can do all things. For which reason also it is becoming in those who have been born again as sons of God, to say: “Lead us not into temptation,” and “Thy Will be done on earth as it is in heaven,” and whatever else is contained in the Lord’s Prayer pertaining to this.

Reply to Objection 1. The gift of habitual grace is not therefore given to us that we may no longer need the Divine help; for every creature needs to be preserved in the good received from Him. Hence if after having received grace man still needs the Divine help, it cannot be concluded that grace is given to no purpose, or that it is imperfect, since man will need the Divine help even in the state of glory, when grace shall be fully perfected. But here grace is to some extent imperfect, inasmuch as it does not completely heal man, as stated above.

Reply to Objection 2. The operation of the Holy Ghost, which moves and protects, is not circumscribed by the effect of habitual grace which it causes in us; but beyond this effect He, together with the Father and the Son, moves and protects us.

Reply to Objection 3. This argument merely proves that man needs no further habitual grace.

Whether man possessed of grace needs the help of grace in order to persevere?

Ia IIae q. 109 a. 10

Objection 1. It would seem that man possessed of grace needs no help to persevere. For perseverance is something less than virtue, even as continence is, as is clear from the Philosopher (*Ethic.* vii, 7,9). Now since man is justified by grace, he needs no further help of grace in order to have the virtues. Much less, therefore, does he need the help of grace to have perseverance.

Objection 2. Further, all the virtues are infused at once. But perseverance is put down as a virtue. Hence it seems that, together with grace, perseverance is given to the other infused virtues.

Objection 3. Further, as the Apostle says (Rom. 5:20) more was restored to man by Christ’s gift, than he had lost by Adam’s sin. But Adam received what enabled him to persevere; and thus man does not need grace in order to persevere.

On the contrary, Augustine says (*De Persev.* ii): “Why is perseverance besought of God, if it is not bestowed by God? For is it not a mocking request to seek what we know He does not give, and what is in our power without His giving it?” Now perseverance

is besought by even those who are hallowed by grace; and this is seen, when we say “Hallowed be Thy name,” which Augustine confirms by the words of Cyprian (*De Correp. et Grat.* xii). Hence man, even when possessed of grace, needs perseverance to be given to him by God.

I answer that, Perseverance is taken in three ways. First, to signify a habit of the mind whereby a man stands steadfastly, lest he be moved by the assault of sadness from what is virtuous. And thus perseverance is to sadness as continence is to concupiscence and pleasure, as the Philosopher says (*Ethic.* vii, 7). Secondly, perseverance may be called a habit, whereby a man has the purpose of persevering in good unto the end. And in both these ways perseverance is infused together with grace, even as continence and the other virtues are. Thirdly, perseverance is called the abiding in good to the end of life. And in order to have this perseverance man does not, indeed, need another habitual grace, but he needs the Divine assistance guiding and guarding him against the attacks of the passions, as appears from the preceding article. And hence after anyone has been jus-

tified by grace, he still needs to beseech God for the aforesaid gift of perseverance, that he may be kept from evil till the end of his life. For to many grace is given to whom perseverance in grace is not given.

Reply to Objection 1. This objection regards the first mode of perseverance, as the second objection regards the second.

Hence the solution of the second objection is clear.

Reply to Objection 3. As Augustine says (*De Natura et Gratia* xliii)*: “in the original state man received a gift whereby he could persevere, but to perse-

vere was not given him. But now, by the grace of Christ, many receive both the gift of grace whereby they may persevere, and the further gift of persevering,” and thus Christ’s gift is greater than Adam’s fault. Nevertheless it was easier for man to persevere, with the gift of grace in the state of innocence in which the flesh was not rebellious against the spirit, than it is now. For the restoration by Christ’s grace, although it is already begun in the mind, is not yet completed in the flesh, as it will be in heaven, where man will not merely be able to persevere but will be unable to sin.

* Cf. *De Correp. et Grat.* xii

Objection 1. It would seem that without grace man can know no truth. For, on 1 Cor. 12:3: “No man can say, the Lord Jesus, but by the Holy Ghost,” a gloss says: “Every truth, by whomsoever spoken is from the Holy Ghost.” Now the Holy Ghost dwells in us by grace. Therefore we cannot know truth without grace.

Objection 2. Further, Augustine says (Solil. i, 6) that “the most certain sciences are like things lit up by the sun so as to be seen. Now God Himself is He Whom sheds the light. And reason is in the mind as sight is in the eye. And the eyes of the mind are the senses of the soul.” Now the bodily senses, however pure, cannot see any visible object, without the sun’s light. Therefore the human mind, however perfect, cannot, by reasoning, know any truth without Divine light: and this pertains to the aid of grace.

Objection 3. Further, the human mind can only understand truth by thinking, as is clear from Augustine (De Trin. xiv, 7). But the Apostle says (2 Cor. 3:5): “Not that we are sufficient to think anything of ourselves, as of ourselves; but our sufficiency is from God.” Therefore man cannot, of himself, know truth without the help of grace.

On the contrary, Augustine says (Retract. i, 4): “I do not approve having said in the prayer, O God, Who dost wish the sinless alone to know the truth; for it may be answered that many who are not sinless know many truths.” Now man is cleansed from sin by grace, according to Ps. 50:12: “Create a clean heart in me, O God, and renew a right spirit within my bowels.” Therefore without grace man of himself can know truth.

I answer that, To know truth is a use or act of intellectual light, since, according to the Apostle (Eph. 5:13): “All that is made manifest is light.” Now every use implies movement, taking movement broadly, so as to call thinking and willing movements, as is clear from the Philosopher (De Anima iii, 4). Now in corporeal things we see that for movement there is required not merely the form which is the principle of the movement or action, but there is also required the motion of the first mover. Now the first mover in the order of corporeal things is the heavenly body. Hence no matter how perfectly fire has heat, it would not bring about alteration, except by the motion of the heavenly body. But it is clear that as all corporeal movements are reduced to the motion of the heavenly body as to the first corporeal mover, so all movements, both corporeal and spiritual, are reduced to the simple First Mover, Who is God. And hence no matter how perfect a corporeal or spiritual nature is supposed to be, it cannot proceed to its act unless

it be moved by God; but this motion is according to the plan of His providence, and not by necessity of nature, as the motion of the heavenly body. Now not only is every motion from God as from the First Mover, but all formal perfection is from Him as from the First Act. And thus the act of the intellect or of any created being whatsoever depends upon God in two ways: first, inasmuch as it is from Him that it has the form whereby it acts; secondly, inasmuch as it is moved by Him to act.

Now every form bestowed on created things by God has power for a determined act, which it can bring about in proportion to its own proper endowment; and beyond which it is powerless, except by a superadded form, as water can only heat when heated by the fire. And thus the human understanding has a form, viz. intelligible light, which of itself is sufficient for knowing certain intelligible things, viz. those we can come to know through the senses. Higher intelligible things of the human intellect cannot know, unless it be perfected by a stronger light, viz. the light of faith or prophecy which is called the “light of grace,” inasmuch as it is added to nature.

Hence we must say that for the knowledge of any truth whatsoever man needs Divine help, that the intellect may be moved by God to its act. But he does not need a new light added to his natural light, in order to know the truth in all things, but only in some that surpass his natural knowledge. And yet at times God miraculously instructs some by His grace in things that can be known by natural reason, even as He sometimes brings about miraculously what nature can do.

Reply to Objection 1. Every truth by whomsoever spoken is from the Holy Ghost as bestowing the natural light, and moving us to understand and speak the truth, but not as dwelling in us by sanctifying grace, or as bestowing any habitual gift superadded to nature. For this only takes place with regard to certain truths that are known and spoken, and especially in regard to such as pertain to faith, of which the Apostle speaks.

Reply to Objection 2. The material sun sheds its light outside us; but the intelligible Sun, Who is God, shines within us. Hence the natural light bestowed upon the soul is God’s enlightenment, whereby we are enlightened to see what pertains to natural knowledge; and for this there is required no further knowledge, but only for such things as surpass natural knowledge.

Reply to Objection 3. We always need God’s help for every thought, inasmuch as He moves the understanding to act; for actually to understand anything is to think, as is clear from Augustine (De Trin. xiv, 7).

Objection 1. It would seem that man possessed of grace needs no help to persevere. For perseverance is something less than virtue, even as continence is, as is clear from the Philosopher (*Ethic. vii, 7,9*). Now since man is justified by grace, he needs no further help of grace in order to have the virtues. Much less, therefore, does he need the help of grace to have perseverance.

Objection 2. Further, all the virtues are infused at once. But perseverance is put down as a virtue. Hence it seems that, together with grace, perseverance is given to the other infused virtues.

Objection 3. Further, as the Apostle says (*Rom. 5:20*) more was restored to man by Christ's gift, than he had lost by Adam's sin. But Adam received what enabled him to persevere; and thus man does not need grace in order to persevere.

On the contrary, Augustine says (*De Persev. ii*): "Why is perseverance besought of God, if it is not bestowed by God? For is it not a mocking request to seek what we know He does not give, and what is in our power without His giving it?" Now perseverance is besought by even those who are hallowed by grace; and this is seen, when we say "Hallowed be Thy name," which Augustine confirms by the words of Cyprian (*De Correp. et Grat. xii*). Hence man, even when possessed of grace, needs perseverance to be given to him by God.

Answer that, Perseverance is taken in three ways. First, to signify a habit of the mind whereby a man stands steadfastly, lest he be moved by the assault of sadness from what is virtuous. And thus perseverance is to sadness as continence is to concupiscence and pleasure, as the Philosopher says (*Ethic. vii, 7*). Secondly,

perseverance may be called a habit, whereby a man has the purpose of persevering in good unto the end. And in both these ways perseverance is infused together with grace, even as continence and the other virtues are. Thirdly, perseverance is called the abiding in good to the end of life. And in order to have this perseverance man does not, indeed, need another habitual grace, but he needs the Divine assistance guiding and guarding him against the attacks of the passions, as appears from the preceding article. And hence after anyone has been justified by grace, he still needs to beseech God for the aforesaid gift of perseverance, that he may be kept from evil till the end of his life. For to many grace is given to whom perseverance in grace is not given.

Reply to Objection 1. This objection regards the first mode of perseverance, as the second objection regards the second.

Hence the solution of the second objection is clear.

Reply to Objection 3. As Augustine says (*De Natura et Gratia xlili*)*: "in the original state man received a gift whereby he could persevere, but to persevere was not given him. But now, by the grace of Christ, many receive both the gift of grace whereby they may persevere, and the further gift of persevering," and thus Christ's gift is greater than Adam's fault. Nevertheless it was easier for man to persevere, with the gift of grace in the state of innocence in which the flesh was not rebellious against the spirit, than it is now. For the restoration by Christ's grace, although it is already begun in the mind, is not yet completed in the flesh, as it will be in heaven, where man will not merely be able to persevere but will be unable to sin.

* Cf. *De Correp. et Grat. xii*

Objection 1. It would seem that man can wish and do good without grace. For that is in man's power, whereof he is master. Now man is master of his acts, and especially of his willing, as stated above (q. 1, a. 1; q. 13, a. 6). Hence man, of himself, can wish and do good without the help of grace.

Objection 2. Further, man has more power over what is according to his nature than over what is beyond his nature. Now sin is against his nature, as Damascene says (*De Fide Orth.* ii, 30); whereas deeds of virtue are according to his nature, as stated above (q. 71, a. 1). Therefore since man can sin of himself he can wish and do good.

Objection 3. Further, the understanding's good is truth, as the Philosopher says (*Ethic.* vi, 2). Now the intellect can of itself know truth, even as every other thing can work its own operation of itself. Therefore, much more can man, of himself, do and wish good.

On the contrary, The Apostle says (*Rom.* 9:16): "It is not of him that willeth," namely, to will, "nor of him that runneth," namely, to run, "but of God that showeth mercy." And Augustine says (*De Corrept. et Gratia* ii) that "without grace men do nothing good when they either think or wish or love or act."

I answer that, Man's nature may be looked at in two ways: first, in its integrity, as it was in our first parent before sin; secondly, as it is corrupted in us after the sin of our first parent. Now in both states human nature needs the help of God as First Mover, to do or wish any good whatsoever, as stated above (a. 1). But in the state of integrity, as regards the sufficiency of the operative power, man by his natural endowments could wish and do the good proportionate to his nature, such as the good of acquired virtue; but not surpassing good, as the good of infused virtue. But in the state of corrupt nature, man falls short of what he could do by his nature, so that he is unable to fulfil it by his own natural powers. Yet because human nature is not altogether corrupted by sin, so as to be shorn of every natural good, even in the state of corrupted nature it can, by virtue of its natural endowments, work some particular good, as to build

dwelling, plant vineyards, and the like; yet it cannot do all the good natural to it, so as to fall short in nothing; just as a sick man can of himself make some movements, yet he cannot be perfectly moved with the movements of one in health, unless by the help of medicine he be cured.

And thus in the state of perfect nature man needs a gratuitous strength superadded to natural strength for one reason, viz. in order to do and wish supernatural good; but for two reasons, in the state of corrupt nature, viz. in order to be healed, and furthermore in order to carry out works of supernatural virtue, which are meritorious. Beyond this, in both states man needs the Divine help, that he may be moved to act well.

Reply to Objection 1. Man is master of his acts and of his willing or not willing, because of his deliberate reason, which can be bent to one side or another. And although he is master of his deliberating or not deliberating, yet this can only be by a previous deliberation; and since it cannot go on to infinity, we must come at length to this, that man's free-will is moved by an extrinsic principle, which is above the human mind, to wit by God, as the Philosopher proves in the chapter "On Good Fortune" (*Ethic.* Eudem. vii). Hence the mind of man still unweakened is not so much master of its act that it does not need to be moved by God; and much more the free-will of man weakened by sin, whereby it is hindered from good by the corruption of the nature.

Reply to Objection 2. To sin is nothing else than to fail in the good which belongs to any being according to its nature. Now as every created thing has its being from another, and, considered in itself, is nothing, so does it need to be preserved by another in the good which pertains to its nature. For it can of itself fail in good, even as of itself it can fall into non-existence, unless it is upheld by God.

Reply to Objection 3. Man cannot even know truth without Divine help, as stated above (a. 1). And yet human nature is more corrupt by sin in regard to the desire for good, than in regard to the knowledge of truth.

Objection 1. It would seem that without grace man cannot love God above all things by his own natural powers. For to love God above all things is the proper and principal act of charity. Now man cannot of himself possess charity, since the “charity of God is poured forth in our hearts by the Holy Ghost Who is given to us,” as is said Rom. 5:5. Therefore man by his natural powers alone cannot love God above all things.

Objection 2. Further, no nature can rise above itself. But to love God above all things is to tend above oneself. Therefore without the help of grace no created nature can love God above itself.

Objection 3. Further, to God, Who is the Highest Good, is due the best love, which is that He be loved above all things. Now without grace man is not capable of giving God the best love, which is His due; otherwise it would be useless to add grace. Hence man, without grace and with his natural powers alone, cannot love God above all things.

On the contrary, As some maintain, man was first made with only natural endowments; and in this state it is manifest that he loved God to some extent. But he did not love God equally with himself, or less than himself, otherwise he would have sinned. Therefore he loved God above himself. Therefore man, by his natural powers alone, can love God more than himself and above all things.

I answer that, As was said above (Ia, q. 60, a. 5), where the various opinions concerning the natural love of the angels were set forth, man in a state of perfect nature, could by his natural power, do the good natural to him without the addition of any gratuitous gift, though not without the help of God moving him. Now to love God above all things is natural to man and to every nature, not only rational but irrational, and even to inanimate nature according to the manner of love which can belong to each creature. And the reason of this is that it is natural to all to seek and love things according as they are naturally fit (to be sought and loved) since “all things act according as they are naturally fit” as stated in Phys. ii, 8. Now it is manifest that the good of the part is for the good of the whole; hence everything, by its natural

appetite and love, loves its own proper good on account of the common good of the whole universe, which is God. Hence Dionysius says (Div. Nom. iv) that “God leads everything to love of Himself.” Hence in the state of perfect nature man referred the love of himself and of all other things to the love of God as to its end; and thus he loved God more than himself and above all things. But in the state of corrupt nature man falls short of this in the appetite of his rational will, which, unless it is cured by God’s grace, follows its private good, on account of the corruption of nature. And hence we must say that in the state of perfect nature man did not need the gift of grace added to his natural endowments, in order to love God above all things naturally, although he needed God’s help to move him to it; but in the state of corrupt nature man needs, even for this, the help of grace to heal his nature.

Reply to Objection 1. Charity loves God above all things in a higher way than nature does. For nature loves God above all things inasmuch as He is the beginning and the end of natural good; whereas charity loves Him, as He is the object of beatitude, and inasmuch as man has a spiritual fellowship with God. Moreover charity adds to natural love of God a certain quickness and joy, in the same way that every habit of virtue adds to the good act which is done merely by the natural reason of a man who has not the habit of virtue.

Reply to Objection 2. When it is said that nature cannot rise above itself, we must not understand this as if it could not be drawn to any object above itself, for it is clear that our intellect by its natural knowledge can know things above itself, as is shown in our natural knowledge of God. But we are to understand that nature cannot rise to an act exceeding the proportion of its strength. Now to love God above all things is not such an act; for it is natural to every creature, as was said above.

Reply to Objection 3. Love is said to be best, both with respect to degree of love, and with regard to the motive of loving, and the mode of love. And thus the highest degree of love is that whereby charity loves God as the giver of beatitude, as was said above.

Objection 1. It would seem that man without grace, and by his own natural powers, can fulfil the commandments of the Law. For the Apostle says (Rom. 2:14) that “the Gentiles who have not the law, do by nature those things that are of the Law.” Now what a man does naturally he can do of himself without grace. Hence a man can fulfil the commandments of the Law without grace.

Objection 2. Further, Jerome says (Expos. Cathol. Fide*) that “they are anathema who say God has laid impossibilities upon man.” Now what a man cannot fulfil by himself is impossible to him. Therefore a man can fulfil all the commandments of himself.

Objection 3. Further, of all the commandments of the Law, the greatest is this, “Thou shalt love the Lord thy God with thy whole heart” (Mat. 27:37). Now man with his natural endowments can fulfil this command by loving God above all things, as stated above (a. 3). Therefore man can fulfil all the commandments of the Law without grace.

On the contrary, Augustine says (De Haeres. lxxxviii) that it is part of the Pelagian heresy that “they believe that without grace man can fulfil all the Divine commandments.”

I answer that, There are two ways of fulfilling the commandments of the Law. The first regards the substance of the works, as when a man does works of justice, fortitude, and of other virtues. And in this way man in the state of perfect nature could fulfil all the commandments of the Law; otherwise he would have been unable to sin in that state, since to sin is nothing else

than to transgress the Divine commandments. But in the state of corrupted nature man cannot fulfil all the Divine commandments without healing grace. Secondly, the commandments of the law can be fulfilled, not merely as regards the substance of the act, but also as regards the mode of acting, i.e. their being done out of charity. And in this way, neither in the state of perfect nature, nor in the state of corrupt nature can man fulfil the commandments of the law without grace. Hence, Augustine (De Corrupt. et Grat. ii) having stated that “without grace men can do no good whatever,” adds: “Not only do they know by its light what to do, but by its help they do lovingly what they know.” Beyond this, in both states they need the help of God’s motion in order to fulfil the commandments, as stated above (Aa. 2,3).

Reply to Objection 1. As Augustine says (De Spir. et Lit. xxvii), “do not be disturbed at his saying that they do by nature those things that are of the Law; for the Spirit of grace works this, in order to restore in us the image of God, after which we were naturally made.”

Reply to Objection 2. What we can do with the Divine assistance is not altogether impossible to us; according to the Philosopher (Ethic. iii, 3): “What we can do through our friends, we can do, in some sense, by ourselves.” Hence Jerome[†] concedes that “our will is in such a way free that we must confess we still require God’s help.”

Reply to Objection 3. Man cannot, with his purely natural endowments, fulfil the precept of the love of God, as stated above (a. 3).

* Symboli Explanatio ad Damasum, among the supposititious works of St. Jerome: now ascribed to Pelagius † Symboli Explanatio ad Damasum, among the supposititious works of St. Jerome: now ascribed to Pelagius

Objection 1. It would seem that man can merit everlasting life without grace. For Our Lord says (Mat. 19:17): “If thou wilt enter into life, keep the commandments”; from which it would seem that to enter into everlasting life rests with man’s will. But what rests with our will, we can do of ourselves. Hence it seems that man can merit everlasting life of himself.

Objection 2. Further, eternal life is the wage of reward bestowed by God on men, according to Mat. 5:12: “Your reward is very great in heaven.” But wage or reward is meted by God to everyone according to his works, according to Ps. 61:12: “Thou wilt render to every man according to his works.” Hence, since man is master of his works, it seems that it is within his power to reach everlasting life.

Objection 3. Further, everlasting life is the last end of human life. Now every natural thing by its natural endowments can attain its end. Much more, therefore, may man attain to life everlasting by his natural endowments, without grace.

On the contrary, The Apostle says (Rom. 6:23): “The grace of God is life everlasting.” And as a gloss says, this is said “that we may understand that God, of His own mercy, leads us to everlasting life.”

I answer that, Acts conducing to an end must be proportioned to the end. But no act exceeds the proportion of its active principle; and hence we see in natural things, that nothing can by its operation bring about an effect which exceeds its active force, but only such as

is proportionate to its power. Now everlasting life is an end exceeding the proportion of human nature, as is clear from what we have said above (q. 5, a. 5). Hence man, by his natural endowments, cannot produce meritorious works proportionate to everlasting life; and for this a higher force is needed, viz. the force of grace. And thus without grace man cannot merit everlasting life; yet he can perform works conducing to a good which is natural to man, as “to toil in the fields, to drink, to eat, or to have friends,” and the like, as Augustine says in his third Reply to the Pelagians*.

Reply to Objection 1. Man, by his will, does works meritorious of everlasting life; but as Augustine says, in the same book, for this it is necessary that the will of man should be prepared with grace by God.

Reply to Objection 2. As the gloss upon Rom. 6:23, “The grace of God is life everlasting,” says, “It is certain that everlasting life is meter to good works; but the works to which it is meted, belong to God’s grace.” And it has been said (a. 4), that to fulfil the commandments of the Law, in their due way, whereby their fulfilment may be meritorious, requires grace.

Reply to Objection 3. This objection has to do with the natural end of man. Now human nature, since it is nobler, can be raised by the help of grace to a higher end, which lower natures can nowise reach; even as a man who can recover his health by the help of medicines is better disposed to health than one who can nowise recover it, as the Philosopher observes (De Coelo ii, 12).

* Hypognoticon iii, among the spurious works of St. Augustine

Objection 1. It would seem that man, by himself and without the external help of grace, can prepare himself for grace. For nothing impossible is laid upon man, as stated above (a. 4, ad 1). But it is written (Zech. 1:3): “Turn ye to Me. . . and I will turn to you.” Now to prepare for grace is nothing more than to turn to God. Therefore it seems that man of himself, and without the external help of grace, can prepare himself for grace.

Objection 2. Further, man prepares himself for grace by doing what is in him to do, since if man does what is in him to do, God will not deny him grace, for it is written (Mat. 7:11) that God gives His good Spirit “to them that ask Him.” But what is in our power is in us to do. Therefore it seems to be in our power to prepare ourselves for grace.

Objection 3. Further, if a man needs grace in order to prepare for grace, with equal reason will he need grace to prepare himself for the first grace; and thus to infinity, which is impossible. Hence it seems that we must not go beyond what was said first, viz. that man, of himself and without grace, can prepare himself for grace.

Objection 4. Further, it is written (Prov. 16:1) that “it is the part of man to prepare the soul.” Now an action is said to be part of a man, when he can do it by himself. Hence it seems that man by himself can prepare himself for grace.

On the contrary, It is written (Jn. 6:44): “No man can come to Me except the Father, Who hath sent Me, draw him.” But if man could prepare himself, he would not need to be drawn by another. Hence man cannot prepare himself without the help of grace.

I answer that, The preparation of the human will for good is twofold: the first, whereby it is prepared to operate rightly and to enjoy God; and this preparation of the will cannot take place without the habitual gift of grace, which is the principle of meritorious works, as stated above (a. 5). There is a second way in which the human will may be taken to be prepared for the gift of habitual grace itself. Now in order that man prepare himself to receive this gift, it is not necessary to presuppose any further habitual gift in the soul, otherwise we should go on to infinity. But we must presuppose a gratuitous gift of God, Who moves the soul inwardly or inspires the good wish. For in these two ways do we need the Divine assistance, as stated above (Aa. 2,3). Now that we need the help of God to move us, is manifest.

For since every agent acts for an end, every cause must direct its effect to its end, and hence since the order of ends is according to the order of agents or movers, man must be directed to the last end by the motion of the first mover, and to the proximate end by the motion of any of the subordinate movers; as the spirit of the soldier is bent towards seeking the victory by the motion of the leader of the army—and towards following the standard of a regiment by the motion of the standard-bearer. And thus since God is the First Mover, simply, it is by His motion that everything seeks to be likened to God in its own way. Hence Dionysius says (Div. Nom. iv) that “God turns all to Himself.” But He directs righteous men to Himself as to a special end, which they seek, and to which they wish to cling, according to Ps. 72:28, “it is good for Me to adhere to my God.” And that they are “turned” to God can only spring from God’s having “turned” them. Now to prepare oneself for grace is, as it were, to be turned to God; just as, whoever has his eyes turned away from the light of the sun, prepares himself to receive the sun’s light, by turning his eyes towards the sun. Hence it is clear that man cannot prepare himself to receive the light of grace except by the gratuitous help of God moving him inwardly.

Reply to Objection 1. Man’s turning to God is by free-will; and thus man is bidden to turn himself to God. But free-will can only be turned to God, when God turns it, according to Jer. 31:18: “Convert me and I shall be converted, for Thou art the Lord, my God”; and Lam. 5:21: “Convert us, O Lord, to Thee, and we shall be converted.”

Reply to Objection 2. Man can do nothing unless moved by God, according to Jn. 15:5: “Without Me, you can do nothing.” Hence when a man is said to do what is in him to do, this is said to be in his power according as he is moved by God.

Reply to Objection 3. This objection regards habitual grace, for which some preparation is required, since every form requires a disposition in that which is to be its subject. But in order that man should be moved by God, no further motion is presupposed since God is the First Mover. Hence we need not go to infinity.

Reply to Objection 4. It is the part of man to prepare his soul, since he does this by his free-will. And yet he does not do this without the help of God moving him, and drawing him to Himself, as was said above.

Objection 1. It would seem that man can rise from sin without the help of grace. For what is presupposed to grace, takes place without grace. But to rise to sin is presupposed to the enlightenment of grace; since it is written (Eph. 5:14): “Arise from the dead and Christ shall enlighten thee.” Therefore man can rise from sin without grace.

Objection 2. Further, sin is opposed to virtue as illness to health, as stated above (q. 71, a. 1, ad 3). Now, man, by force of his nature, can rise from illness to health, without the external help of medicine, since there still remains in him the principle of life, from which the natural operation proceeds. Hence it seems that, with equal reason, man may be restored by himself, and return from the state of sin to the state of justice without the help of external grace.

Objection 3. Further, every natural thing can return by itself to the act befitting its nature, as hot water returns by itself to its natural coldness, and a stone cast upwards returns by itself to its natural movement. Now a sin is an act against nature, as is clear from Damascene (De Fide Orth. ii, 30). Hence it seems that man by himself can return from sin to the state of justice.

On the contrary, The Apostle says (Gal. 2:21; Cf. Gal. 3:21): “For if there had been a law given which could give life—then Christ died in vain,” i.e. to no purpose. Hence with equal reason, if man has a nature, whereby he can be justified, “Christ died in vain,” i.e. to no purpose. But this cannot fittingly be said. Therefore by himself he cannot be justified, i.e. he cannot return from a state of sin to a state of justice.

I answer that, Man by himself can no wise rise from sin without the help of grace. For since sin is transient as to the act and abiding in its guilt, as stated above (q. 87, a. 6), to rise from sin is not the same as to cease the act of sin; but to rise from sin means that man has restored to him what he lost by sinning. Now man incurs a triple loss by sinning, as was clearly shown above (q. 85, a. 1; q. 86, a. 1; q. 87, a. 1), viz. stain, corruption of natural good, and debt of punishment. He incurs a stain, inasmuch as he forfeits the lustre of grace through the deformity of sin. Natural good is corrupted, inasmuch as man’s nature is disordered by man’s will

not being subject to God’s; and this order being overthrown, the consequence is that the whole nature of sinful man remains disordered. Lastly, there is the debt of punishment, inasmuch as by sinning man deserves everlasting damnation.

Now it is manifest that none of these three can be restored except by God. For since the lustre of grace springs from the shedding of Divine light, this lustre cannot be brought back, except God sheds His light anew: hence a habitual gift is necessary, and this is the light of grace. Likewise, the order of nature can only be restored, i.e. man’s will can only be subject to God when God draws man’s will to Himself, as stated above (a. 6). So, too, the guilt of eternal punishment can be remitted by God alone, against Whom the offense was committed and Who is man’s Judge. And thus in order that man rise from sin there is required the help of grace, both as regards a habitual gift, and as regards the internal motion of God.

Reply to Objection 1. To man is bidden that which pertains to the act of free-will, as this act is required in order that man should rise from sin. Hence when it is said, “Arise, and Christ shall enlighten thee,” we are not to think that the complete rising from sin precedes the enlightenment of grace; but that when man by his free-will, moved by God, strives to rise from sin, he receives the light of justifying grace.

Reply to Objection 2. The natural reason is not the sufficient principle of the health that is in man by justifying grace. This principle is grace which is taken away by sin. Hence man cannot be restored by himself; but he requires the light of grace to be poured upon him anew, as if the soul were infused into a dead body for its resurrection.

Reply to Objection 3. When nature is perfect, it can be restored by itself to its befitting and proportionate condition; but without exterior help it cannot be restored to what surpasses its measure. And thus human nature undone by reason of the act of sin, remains no longer perfect, but corrupted, as stated above (q. 85); nor can it be restored, by itself, to its connatural good, much less to the supernatural good of justice.

Objection 1. It would seem that without grace man can avoid sin. Because “no one sins in what he cannot avoid,” as Augustine says (*De Duab. Anim.* x, xi; *De Libero Arbit.* iii, 18). Hence if a man in mortal sin cannot avoid sin, it would seem that in sinning he does not sin, which is impossible.

Objection 2. Further, men are corrected that they may not sin. If therefore a man in mortal sin cannot avoid sin, correction would seem to be given to no purpose; which is absurd.

Objection 3. Further, it is written (*Ecclus.* 15:18): “Before man is life and death, good and evil; that which he shall choose shall be given him.” But by sinning no one ceases to be a man. Hence it is still in his power to choose good or evil; and thus man can avoid sin without grace.

On the contrary, Augustine says (*De Perfect Just.* xxi): “Whoever denies that we ought to say the prayer ‘Lead us not into temptation’ (and they deny it who maintain that the help of God’s grace is not necessary to man for salvation, but that the gift of the law is enough for the human will) ought without doubt to be removed beyond all hearing, and to be anathematized by the tongues of all.”

I answer that, We may speak of man in two ways: first, in the state of perfect nature; secondly, in the state of corrupted nature. Now in the state of perfect nature, man, without habitual grace, could avoid sinning either mortally or venially; since to sin is nothing else than to stray from what is according to our nature—and in the state of perfect nature man could avoid this. Nevertheless he could not have done it without God’s help to uphold him in good, since if this had been withdrawn, even his nature would have fallen back into nothingness.

But in the state of corrupt nature man needs grace to heal his nature in order that he may entirely abstain from sin. And in the present life this healing is wrought in the mind—the carnal appetite being not yet restored. Hence the Apostle (*Rom.* 7:25) says in the person of one who is restored: “I myself, with the mind, serve the law of God, but with the flesh, the law of sin.” And in this state man can abstain from all mortal sin, which takes its stand in his reason, as stated above (q. 74, a. 5); but man cannot abstain from all venial sin on account of the corruption of his lower appetite of sensuality. For man can, indeed, repress each of its movements (and hence they are sinful and voluntary), but not all, because whilst he is resisting one, another may arise, and also because the reason is always alert to avoid these movements, as was said above (q. 74, a. 3, ad 2).

So, too, before man’s reason, wherein is mortal sin, is restored by justifying grace, he can avoid each mortal sin, and for a time, since it is not necessary that he should be always actually sinning. But it cannot be that

he remains for a long time without mortal sin. Hence Gregory says (*Super Ezech. Hom.* xi) that “a sin not at once taken away by repentance, by its weight drags us down to other sins”: and this because, as the lower appetite ought to be subject to the reason, so should the reason be subject to God, and should place in Him the end of its will. Now it is by the end that all human acts ought to be regulated, even as it is by the judgment of the reason that the movements of the lower appetite should be regulated. And thus, even as inordinate movements of the sensitive appetite cannot help occurring since the lower appetite is not subject to reason, so likewise, since man’s reason is not entirely subject to God, the consequence is that many disorders occur in the reason. For when man’s heart is not so fixed on God as to be unwilling to be parted from Him for the sake of finding any good or avoiding any evil, many things happen for the achieving or avoiding of which a man strays from God and breaks His commandments, and thus sins mortally: especially since, when surprised, a man acts according to his preconceived end and his pre-existing habits, as the Philosopher says (*Ethic.* iii); although with premeditation of his reason a man may do something outside the order of his preconceived end and the inclination of his habit. But because a man cannot always have this premeditation, it cannot help occurring that he acts in accordance with his will turned aside from God, unless, by grace, he is quickly brought back to the due order.

Reply to Objection 1. Man can avoid each but every act of sin, except by grace, as stated above. Nevertheless, since it is by his own shortcoming that he does not prepare himself to have grace, the fact that he cannot avoid sin without grace does not excuse him from sin.

Reply to Objection 2. Correction is useful “in order that out of the sorrow of correction may spring the wish to be regenerate; if indeed he who is corrected is a son of promise, in such sort that whilst the noise of correction is outwardly resounding and punishing, God by hidden inspirations is inwardly causing to will,” as Augustine says (*De Corr. et Gratia* vi). Correction is therefore necessary, from the fact that man’s will is required in order to abstain from sin; yet it is not sufficient without God’s help. Hence it is written (*Eccles.* 7:14): “Consider the works of God that no man can correct whom He hath despised.”

Reply to Objection 3. As Augustine says (*Hypognosticon* iii*), this saying is to be understood of man in the state of perfect nature, when as yet he was not a slave of sin. Hence he was able to sin and not to sin. Now, too, whatever a man wills, is given to him; but his willing good, he has by God’s assistance.

* Among the spurious works of St. Augustine

Objection 1. It would seem that whoever has already obtained grace, can by himself and without further help of grace, do good and avoid sin. For a thing is useless or imperfect, if it does not fulfil what it was given for. Now grace is given to us that we may do good and keep from sin. Hence if with grace man cannot do this, it seems that grace is either useless or imperfect.

Objection 2. Further, by grace the Holy Spirit dwells in us, according to 1 Cor. 3:16: “Know you not that you are the temple of God, and that the Spirit of God dwelleth in you?” Now since the Spirit of God is omnipotent, He is sufficient to ensure our doing good and to keep us from sin. Hence a man who has obtained grace can do the above two things without any further assistance of grace.

Objection 3. Further, if a man who has obtained grace needs further aid of grace in order to live righteously and to keep free from sin, with equal reason, will he need yet another grace, even though he has obtained this first help of grace. Therefore we must go on to infinity; which is impossible. Hence whoever is in grace needs no further help of grace in order to do righteously and to keep free from sin.

On the contrary, Augustine says (*De Natura et Gratia* xxvi) that “as the eye of the body though most healthy cannot see unless it is helped by the brightness of light, so, neither can a man, even if he is most righteous, live righteously unless he be helped by the eternal light of justice.” But justification is by grace, according to Rom. 3:24: “Being justified freely by His grace.” Hence even a man who already possesses grace needs a further assistance of grace in order to live righteously.

I answer that, As stated above (a. 5), in order to live righteously a man needs a twofold help of God—first, a habitual gift whereby corrupted human nature is healed, and after being healed is lifted up so as to work deeds meritoriously of everlasting life, which exceed the capability of nature. Secondly, man needs the help of grace in order to be moved by God to act.

Now with regard to the first kind of help, man does

not need a further help of grace, e.g. a further infused habit. Yet he needs the help of grace in another way, i.e. in order to be moved by God to act righteously, and this for two reasons: first, for the general reason that no created thing can put forth any act, unless by virtue of the Divine motion. Secondly, for this special reason—the condition of the state of human nature. For although healed by grace as to the mind, yet it remains corrupted and poisoned in the flesh, whereby it serves “the law of sin,” Rom. 7:25. In the intellect, too, there seems the darkness of ignorance, whereby, as is written (Rom. 8:26): “We know not what we should pray for as we ought”; since on account of the various turns of circumstances, and because we do not know ourselves perfectly, we cannot fully know what is for our good, according to Wis. 9:14: “For the thoughts of mortal men are fearful and our counsels uncertain.” Hence we must be guided and guarded by God, Who knows and can do all things. For which reason also it is becoming in those who have been born again as sons of God, to say: “Lead us not into temptation,” and “Thy Will be done on earth as it is in heaven,” and whatever else is contained in the Lord’s Prayer pertaining to this.

Reply to Objection 1. The gift of habitual grace is not therefore given to us that we may no longer need the Divine help; for every creature needs to be preserved in the good received from Him. Hence if after having received grace man still needs the Divine help, it cannot be concluded that grace is given to no purpose, or that it is imperfect, since man will need the Divine help even in the state of glory, when grace shall be fully perfected. But here grace is to some extent imperfect, inasmuch as it does not completely heal man, as stated above.

Reply to Objection 2. The operation of the Holy Ghost, which moves and protects, is not circumscribed by the effect of habitual grace which it causes in us; but beyond this effect He, together with the Father and the Son, moves and protects us.

Reply to Objection 3. This argument merely proves that man needs no further habitual grace.

Objection 1. It would seem that the will is not moved to anything naturally. For the natural agent is condivided with the voluntary agent, as stated at the beginning of Phys. ii, 1. Therefore the will is not moved to anything naturally.

Objection 2. Further, that which is natural is in a thing always: as “being hot” is in fire. But no movement is always in the will. Therefore no movement is natural to the will.

Objection 3. Further, nature is determinate to one thing: whereas the will is referred to opposites. Therefore the will wills nothing naturally.

On the contrary, The movement of the will follows the movement of the intellect. But the intellect understands some things naturally. Therefore the will, too, wills some things naturally.

I answer that, As Boethius says (*De Duabus Nat.*) and the Philosopher also (*Metaph. v, 4*) the word “nature” is used in a manifold sense. For sometimes it stands for the intrinsic principle in movable things. In this sense nature is either matter or the material form, as stated in Phys. ii, 1. In another sense nature stands for any substance, or even for any being. And in this sense, that is said to be natural to a thing which befits it in respect of its substance. And this is that which of itself is in a thing. Now all things that do not of themselves belong to the thing in which they are, are reduced to something which belongs of itself to that thing, as to their principle. Wherefore, taking nature in this sense, it is necessary that the principle of whatever belongs to a thing, be a natural principle. This is evident in regard to the intellect: for the principles of intellectual knowledge are naturally known. In like manner the principle of voluntary movements must be something naturally willed.

Now this is good in general, to which the will tends naturally, as does each power to its object; and again it is the last end, which stands in the same relation to things appetible, as the first principles of demonstrations to things intelligible: and, speaking generally, it is all those things which belong to the willer according to his nature. For it is not only things pertaining to the will that the will desires, but also that which pertains to each power, and to the entire man. Wherefore man wills naturally not only the object of the will, but also other things that are appropriate to the other powers; such as

the knowledge of truth, which befits the intellect; and to be and to live and other like things which regard the natural well-being; all of which are included in the object of the will, as so many particular goods.

Reply to Objection 1. The will is distinguished from nature as one kind of cause from another; for some things happen naturally and some are done voluntarily. There is, however, another manner of causing that is proper to the will, which is mistress of its act, besides the manner proper to nature, which is determinate to one thing. But since the will is founded on some nature, it is necessary that the movement proper to nature be shared by the will, to some extent: just as what belongs to a previous cause is shared by a subsequent cause. Because in every thing, being itself, which is from nature, precedes volition, which is from the will. And hence it is that the will wills something naturally.

Reply to Objection 2. In the case of natural things, that which is natural, as a result of the form only, is always in them actually, as heat is in fire. But that which is natural as a result of matter, is not always in them actually, but sometimes only in potentiality: because form is act, whereas matter is potentiality. Now movement is “the act of that which is in potentiality” (Aristotle, Phys. iii, 1). Wherefore that which belongs to, or results from, movement, in regard to natural things, is not always in them. Thus fire does not always move upwards, but only when it is outside its own place.* And in like manner it is not necessary that the will (which is reduced from potentiality to act, when it wills something), should always be in the act of volition; but only when it is in a certain determinate disposition. But God’s will, which is pure act, is always in the act of volition.

Reply to Objection 3. To every nature there is one thing corresponding, proportionate, however, to that nature. For to nature considered as a genus, there corresponds something one generically; and to nature as species there corresponds something one specifically; and to the individualized nature there corresponds some one individual. Since, therefore, the will is an immaterial power like the intellect, some one general thing corresponds to it, naturally which is the good; just as to the intellect there corresponds some one general thing, which is the true, or being, or “what a thing is.” And under good in general are included many particular goods, to none of which is the will determined.

* The Aristotelian theory was that fire’s proper place is the fiery heaven, i.e. the Empyrean.

Objection 1. It seems that the will is moved, of necessity, by its object. For the object of the will is compared to the will as mover to movable, as stated in *De Anima* iii, 10. But a mover, if it be sufficient, moves the movable of necessity. Therefore the will can be moved of necessity by its object.

Objection 2. Further, just as the will is an immaterial power, so is the intellect: and both powers are ordained to a universal object, as stated above (a. 1, ad 3). But the intellect is moved, of necessity, by its object: therefore the will also, by its object.

Objection 3. Further, whatever one wills, is either the end, or something ordained to an end. But, seemingly, one wills an end necessarily: because it is like the principle in speculative matters, to which principle one assents of necessity. Now the end is the reason for willing the means; and so it seems that we will the means also necessarily. Therefore the will is moved of necessity by its object.

On the contrary, The rational powers, according to the Philosopher (*Metaph.* ix, 2) are directed to opposites. But the will is a rational power, since it is in the reason, as stated in *De Anima* iii, 9. Therefore the will is directed to opposites. Therefore it is not moved, of necessity, to either of the opposites.

I answer that, The will is moved in two ways: first, as to the exercise of its act; secondly, as to the specification of its act, derived from the object. As to the first way, no object moves the will necessarily, for no matter what the object be, it is in man's power not to think of it, and consequently not to will it actually. But as to the second manner of motion, the will is moved by one object necessarily, by another not. For in the movement of a power by its object, we must consider under what aspect the object moves the power. For the visible moves the sight, under the aspect of color actually visible. Wherefore if color be offered to the sight, it moves the sight necessarily: unless one turns one's eyes away; which belongs to the exercise of the act. But if the sight were confronted with something not in all respects col-

ored actually, but only so in some respects, and in other respects not, the sight would not of necessity see such an object: for it might look at that part of the object which is not actually colored, and thus it would not see it. Now just as the actually colored is the object of sight, so is good the object of the will. Wherefore if the will be offered an object which is good universally and from every point of view, the will tends to it of necessity, if it wills anything at all; since it cannot will the opposite. If, on the other hand, the will is offered an object that is not good from every point of view, it will not tend to it of necessity. And since lack of any good whatever, is a non-good, consequently, that good alone which is perfect and lacking in nothing, is such a good that the will cannot not-will it: and this is Happiness. Whereas any other particular goods, in so far as they are lacking in some good, can be regarded as non-goods: and from this point of view, they can be set aside or approved by the will, which can tend to one and the same thing from various points of view.

Reply to Objection 1. The sufficient mover of a power is none but that object that in every respect presents the aspect of the mover of that power. If, on the other hand, it is lacking in any respect, it will not move of necessity, as stated above.

Reply to Objection 2. The intellect is moved, of necessity, by an object which is such as to be always and necessarily true: but not by that which may be either true or false—viz. by that which is contingent: as we have said of the good.

Reply to Objection 3. The last end moves the will necessarily, because it is the perfect good. In like manner whatever is ordained to that end, and without which the end cannot be attained, such as "to be" and "to live," and the like. But other things without which the end can be gained, are not necessarily willed by one who wills the end: just as he who assents to the principle, does not necessarily assent to the conclusions, without which the principles can still be true.

Objection 1. It would seem that the will is moved of necessity by a passion of the lower appetite. For the Apostle says (Rom. 7:19): “The good which I will I do not; but the evil which I will not, that I do”: and this is said by reason of concupiscence, which is a passion. Therefore the will is moved of necessity by a passion.

Objection 2. Further, as stated in Ethic. iii, 5, “according as a man is, such does the end seem to him.” But it is not in man’s power to cast aside a passion once. Therefore it is not in man’s power not to will that to which the passion inclines him.

Objection 3. Further, a universal cause is not applied to a particular effect, except by means of a particular cause: wherefore the universal reason does not move save by means of a particular estimation, as stated in De Anima iii, 11. But as the universal reason is to the particular estimation, so is the will to the sensitive appetite. Therefore the will is not moved to will something particular, except through the sensitive appetite. Therefore, if the sensitive appetite happen to be disposed to something, by reason of a passion, the will cannot be moved in a contrary sense.

On the contrary, It is written (Gn. 4:7): “Thy lust [Vulg. ‘The lust thereof’] shall be under thee, and thou shalt have dominion over it.” Therefore man’s will is moved of necessity by the lower appetite.

I answer that, As stated above (q. 9, a. 2), the passion of the sensitive appetite moves the will, in so far as the will is moved by its object: inasmuch as, to wit, man through being disposed in such and such a way by a passion, judges something to be fitting and good, which he would not judge thus were it not for the passion. Now this influence of a passion on man occurs in two ways. First, so that his reason is wholly bound, so that he has not the use of reason: as happens in those who through a violent access of anger or concupiscence become furious or insane, just as they may from some other bodily disorder; since such like passions do not take place without some change in the body. And of such the same is to be said as of irrational animals, which follow, of necessity, the impulse of their passions: for in them there is neither movement of reason, nor, consequently,

of will.

Sometimes, however, the reason is not entirely engrossed by the passion, so that the judgment of reason retains, to a certain extent, its freedom: and thus the movement of the will remains in a certain degree. Accordingly in so far as the reason remains free, and not subject to the passion, the will’s movement, which also remains, does not tend of necessity to that whereto the passion inclines it. Consequently, either there is no movement of the will in that man, and the passion alone holds its sway: or if there be a movement of the will, it does not necessarily follow the passion.

Reply to Objection 1. Although the will cannot prevent the movement of concupiscence from arising, of which the Apostle says: “The evil which I will not, that I do—i.e. I desire”; yet it is in the power of the will not to will to desire or not to consent to concupiscence. And thus it does not necessarily follow the movement of concupiscence.

Reply to Objection 2. Since there is in man a twofold nature, intellectual and sensitive; sometimes man is such and such uniformly in respect of his whole soul: either because the sensitive part is wholly subject to this reason, as in the virtuous; or because reason is entirely engrossed by passion, as in a madman. But sometimes, although reason is clouded by passion, yet something of this reason remains free. And in respect of this, man can either repel the passion entirely, or at least hold himself in check so as not to be led away by the passion. For when thus disposed, since man is variously disposed according to the various parts of the soul, a thing appears to him otherwise according to his reason, than it does according to a passion.

Reply to Objection 3. The will is moved not only by the universal good apprehended by the reason, but also by good apprehended by sense. Wherefore he can be moved to some particular good independently of a passion of the sensitive appetite. For we will and do many things without passion, and through choice alone; as is most evident in those cases wherein reason resists passion.

Objection 1. It would seem that the will is moved of necessity by God. For every agent that cannot be resisted moves of necessity. But God cannot be resisted, because His power is infinite; wherefore it is written (Rom. 9:19): “Who resisteth His will?” Therefore God moves the will of necessity.

Objection 2. Further, the will is moved of necessity to whatever it wills naturally, as stated above (a. 2, ad 3). But “whatever God does in a thing is natural to it,” as Augustine says (Contra Faust. xxvi, 3). Therefore the will wills of necessity everything to which God moves it.

Objection 3. Further, a thing is possible, if nothing impossible follows from its being supposed. But something impossible follows from the supposition that the will does not will that to which God moves it: because in that case God’s operation would be ineffectual. Therefore it is not possible for the will not to will that to which God moves it. Therefore it wills it of necessity.

On the contrary, It is written (Ecclus. 15:14): “God made man from the beginning, and left him in the hand of his own counsel.” Therefore He does not of necessity move man’s will.

I answer that, As Dionysius says (Div. Nom. iv) “it belongs to Divine providence, not to destroy but to preserve the nature of things.” Wherefore it moves all things in accordance with their conditions; so that from necessary causes through the Divine motion, effects fol-

low of necessity; but from contingent causes, effects follow contingently. Since, therefore, the will is an active principle, not determinate to one thing, but having an indifferent relation to many things, God so moves it, that He does not determine it of necessity to one thing, but its movement remains contingent and not necessary, except in those things to which it is moved naturally.

Reply to Objection 1. The Divine will extends not only to the doing of something by the thing which He moves, but also to its being done in a way which is fitting to the nature of that thing. And therefore it would be more repugnant to the Divine motion, for the will to be moved of necessity, which is not fitting to its nature; than for it to be moved freely, which is becoming to its nature.

Reply to Objection 2. That is natural to a thing, which God so works in it that it may be natural to it: for thus is something becoming to a thing, according as God wishes it to be becoming. Now He does not wish that whatever He works in things should be natural to them, for instance, that the dead should rise again. But this He does wish to be natural to each thing—that it be subject to the Divine power.

Reply to Objection 3. If God moves the will to anything, it is incompatible with this supposition, that the will be not moved thereto. But it is not impossible simply. Consequently it does not follow that the will is moved by God necessarily.

FIRST PART OF THE SECOND PART, QUESTION 11

Of Enjoyment*, Which Is an Act of the Will (In Four Articles)

We must now consider enjoyment: concerning which there are four points of inquiry:

- (1) Whether to enjoy is an act of the appetitive power?
- (2) Whether it belongs to the rational creature alone, or also to irrational animals?
- (3) Whether enjoyment is only of the last end?
- (4) Whether it is only of the end possessed?

Whether to enjoy is an act of the appetitive power?

Ia IIae q. 11 a. 1

Objection 1. It would seem that to enjoy belongs not only to the appetitive power. For to enjoy seems nothing else than to receive the fruit. But it is the intellect, in whose act Happiness consists, as shown above (q. 3, a. 4), that receives the fruit of human life, which is Happiness. Therefore to enjoy is not an act of the appetitive power, but of the intellect.

Objection 2. Further, each power has its proper end, which is its perfection: thus the end of sight is to know the visible; of the hearing, to perceive sounds; and so forth. But the end of a thing is its fruit. Therefore to enjoy belongs to each power, and not only to the appetite.

Objection 3. Further, enjoyment implies a certain delight. But sensible delight belongs to sense, which delights in its object: and for the same reason, intellectual delight belongs to the intellect. Therefore enjoyment belongs to the apprehensive, and not to the appetitive power.

On the contrary, Augustine says (De Doctr. Christ. i, 4; and De Trin. x, 10,11): “To enjoy is to adhere lovingly to something for its own sake.” But love belongs to the appetitive power. Therefore also to enjoy is an act of the appetitive power.

I answer that, “Fruitio” [enjoyment] and “fructus” [fruit] seem to refer to the same, one being derived from the other; which from which, matters not for our purpose; though it seems probable that the one which is more clearly known, was first named. Now those things are most manifest to us which appeal most to the senses: wherefore it seems that the word “fruitio” is derived from sensible fruits. But sensible fruit is that which we

expect the tree to produce in the last place, and in which a certain sweetness is to be perceived. Hence fruition seems to have relation to love, or to the delight which one has in realizing the longed-for term, which is the end. Now the end and the good is the object of the appetitive power. Wherefore it is evident that fruition is the act of the appetitive power.

Reply to Objection 1. Nothing hinders one and the same thing from belonging, under different aspects, to different powers. Accordingly the vision of God, as vision, is an act of the intellect, but as a good and an end, is the object of the will. And as such is the fruition thereof: so that the intellect attains this end, as the executive power, but the will as the motive power, moving (the powers) towards the end and enjoying the end attained.

Reply to Objection 2. The perfection and end of every other power is contained in the object of the appetitive power, as the proper is contained in the common, as stated above (q. 9, a. 1). Hence the perfection and end of each power, in so far as it is a good, belongs to the appetitive power. Wherefore the appetitive power moves the other powers to their ends; and itself realizes the end, when each of them reaches the end.

Reply to Objection 3. In delight there are two things: perception of what is becoming; and this belongs to the apprehensive power; and complacency in that which is offered as becoming: and this belongs to the appetitive power, in which power delight is formally completed.

Whether to enjoy belongs to the rational creature alone, or also to irrational animals?

Ia IIae q. 11 a. 2

Objection 1. It would seem that to enjoy belongs to men alone. For Augustine says (De Doctr. Christ. i, 22) that “it is given to us men to enjoy and to use.” Therefore other animals cannot enjoy.

Objection 2. Further, to enjoy relates to the last end. But irrational animals cannot obtain the last end. Therefore it is not for them to enjoy.

Objection 3. Further, just as the sensitive appetite

is beneath the intellectual appetite, so is the natural appetite beneath the sensitive. If, therefore, to enjoy belongs to the sensitive appetite, it seems that for the same reason it can belong to the natural appetite. But this is evidently false, since the latter cannot delight in anything. Therefore the sensitive appetite cannot enjoy: and accordingly enjoyment is not possible for irrational animals.

* or, Fruition

On the contrary, Augustine says (QQ. 83, qu. 30): “It is not so absurd to suppose that even beasts enjoy their food and any bodily pleasure.”

I answer that, As was stated above (a. 1) to enjoy is not the act of the power that achieves the end as executor, but of the power that commands the achievement; for it has been said to belong to the appetitive power. Now things void of reason have indeed a power of achieving an end by way of execution, as that by which a heavy body has a downward tendency, whereas a light body has an upward tendency. Yet the power of command in respect of the end is not in them, but in some higher nature, which moves all nature by its command, just as in things endowed with knowledge, the appetite moves the other powers to their acts. Wherefore it is clear that things void of knowledge, although they attain an end, have no enjoyment of the end: this is only for those that are endowed with knowledge.

Now knowledge of the end is twofold: perfect and imperfect. Perfect knowledge of the end, is that whereby not only is that known which is the end and the good, but also the universal formality of the end and the

good; and such knowledge belongs to the rational nature alone. On the other hand, imperfect knowledge is that by which the end and the good are known in the particular. Such knowledge is in irrational animals: whose appetitive powers do not command with freedom, but are moved according to a natural instinct to whatever they apprehend. Consequently, enjoyment belongs to the rational nature, in a perfect degree; to irrational animals, imperfectly; to other creatures, not at all.

Reply to Objection 1. Augustine is speaking there of perfect enjoyment.

Reply to Objection 2. Enjoyment need not be of the last end simply; but of that which each one chooses for his last end.

Reply to Objection 3. The sensitive appetite follows some knowledge; not so the natural appetite, especially in things void of knowledge.

Reply to Objection 4. Augustine is speaking there of imperfect enjoyment. This is clear from his way of speaking: for he says that “it is not so absurd to suppose that even beasts enjoy,” that is, as it would be, if one were to say that they “use.”

Whether enjoyment is only of the last end?

Ia IIae q. 11 a. 3

Objection 1. It would seem that enjoyment is not only of the last end. For the Apostle says (Philem. 20): “Yea, brother, may I enjoy thee in the Lord.” But it is evident that Paul had not placed his last end in a man. Therefore to enjoy is not only of the last end.

Objection 2. Further, what we enjoy is the fruit. But the Apostle says (Gal. 5:22): “The fruit of the Spirit is charity, joy, peace,” and other like things, which are not in the nature of the last end. Therefore enjoyment is not only of the last end.

Objection 3. Further, the acts of the will reflect on one another; for I will to will, and I love to love. But to enjoy is an act of the will: since “it is the will with which we enjoy,” as Augustine says (De Trin. x, 10). Therefore a man enjoys his enjoyment. But the last end of man is not enjoyment, but the uncreated good alone, which is God. Therefore enjoyment is not only of the last end.

On the contrary, Augustine says (De Trin. x, 11): “A man does not enjoy that which he desires for the sake of something else.” But the last end alone is that which man does not desire for the sake of something else. Therefore enjoyment is of the last end alone.

I answer that, As stated above (a. 1) the notion of fruit implies two things: first that it should come last; second, that it should calm the appetite with a certain sweetness and delight. Now a thing is last either simply or relatively; simply, if it be referred to nothing else; relatively, if it is the last in a particular series. Therefore that which is last simply, and in which one delights as in the last end, is properly called fruit; and this it is that one is properly said to enjoy. But that which is

delightful not in itself, but is desired, only as referred to something else, e.g. a bitter potion for the sake of health, can nowise be called fruit. And that which has something delightful about it, to which a number of preceding things are referred, may indeed be called fruit in a certain manner; but we cannot be said to enjoy it properly or as though it answered perfectly to the notion of fruit. Hence Augustine says (De Trin. x, 10) that “we enjoy what we know, when the delighted will is at rest therein.” But its rest is not absolute save in the possession of the last end: for as long as something is looked for, the movement of the will remains in suspense, although it has reached something. Thus in local movement, although any point between the two terms is a beginning and an end, yet it is not considered as an actual end, except when the movement stops there.

Reply to Objection 1. As Augustine says (De Doctr. Christ. i, 33), “if he had said, ‘May I enjoy thee,’ without adding ‘in the Lord,’ he would seem to have set the end of his love in him. But since he added that he set his end in the Lord, he implied his desire to enjoy Him”: as if we were to say that he expressed his enjoyment of his brother not as a term but as a means.

Reply to Objection 2. Fruit bears one relation to the tree that bore it, and another to man that enjoys it. To the tree indeed that bore it, it is compared as effect to cause; to the one enjoying it, as the final object of his longing and the consummation of his delight. Accordingly these fruits mentioned by the Apostle are so called because they are certain effects of the Holy Ghost in us, wherefore they are called “fruits of the spirit”: but not as though we are to enjoy them as our last end. Or

we may say with Ambrose that they are called fruits because “we should desire them for their own sake”: not indeed as though they were not ordained to the last end; but because they are such that we ought to find pleasure in them.

Reply to Objection 3. As stated above (q. 1, a. 8; q. 2, a. 7), we speak of an end in a twofold sense: first, as being the thing itself; secondly, as the attainment thereof. These are not, of course, two ends, but one

end, considered in itself, and in its relation to something else. Accordingly God is the last end, as that which is ultimately sought for: while the enjoyment is as the attainment of this last end. And so, just as God is not one end, and the enjoyment of God, another: so it is the same enjoyment whereby we enjoy God, and whereby we enjoy our enjoyment of God. And the same applies to created happiness which consists in enjoyment.

Whether enjoyment is only of the end possessed?

Ia IIae q. 11 a. 4

Objection 1. It would seem that enjoyment is only of the end possessed. For Augustine says (De Trin. x, 1) that “to enjoy is to use joyfully, with the joy, not of hope, but of possession.” But so long as a thing is not had, there is joy, not of possession, but of hope. Therefore enjoyment is only of the end possessed.

Objection 2. Further, as stated above (a. 3), enjoyment is not properly otherwise than of the last end: because this alone gives rest to the appetite. But the appetite has no rest save in the possession of the end. Therefore enjoyment, properly speaking, is only of the end possessed.

Objection 3. Further, to enjoy is to lay hold of the fruit. But one does not lay hold of the fruit until one is in possession of the end. Therefore enjoyment is only of the end possessed.

On the contrary, “to enjoy is to adhere lovingly to something for its own sake,” as Augustine says (De Doctr. Christ. i, 4). But this is possible, even in regard to a thing which is not in our possession. Therefore it is possible to enjoy the end even though it be not possessed.

I answer that, To enjoy implies a certain relation of the will to the last end, according as the will has something by way of last end. Now an end is possessed in

two ways; perfectly and imperfectly. Perfectly, when it is possessed not only in intention but also in reality; imperfectly, when it is possessed in intention only. Perfect enjoyment, therefore, is of the end already possessed: but imperfect enjoyment is also of the end possessed not really, but only in intention.

Reply to Objection 1. Augustine speaks there of perfect enjoyment.

Reply to Objection 2. The will is hindered in two ways from being at rest. First on the part of the object; by reason of its not being the last end, but ordained to something else: secondly on the part of the one who desires the end, by reason of his not being yet in possession of it. Now it is the object that specifies an act: but on the agent depends the manner of acting, so that the act be perfect or imperfect, as compared with the actual circumstances of the agent. Therefore enjoyment of anything but the last end is not enjoyment properly speaking, as falling short of the nature of enjoyment. But enjoyment of the last end, not yet possessed, is enjoyment properly speaking, but imperfect, on account of the imperfect way in which it is possessed.

Reply to Objection 3. One is said to lay hold of or to have an end, not only in reality, but also in intention, as stated above.

FIRST PART OF THE SECOND PART, QUESTION 110

Of the Grace of God As Regards Its Essence (In Four Articles)

We must now consider the grace of God as regards its essence; and under this head there are four points of inquiry:

- (1) Whether grace implies something in the soul?
- (2) Whether grace is a quality?
- (3) Whether grace differs from infused virtue?
- (4) Of the subject of grace.

Whether grace implies anything in the soul?

Ia IIae q. 110 a. 1

Objection 1. It would seem that grace does not imply anything in the soul. For man is said to have the grace of God even as the grace of man. Hence it is written (Gn. 39:21) that the Lord gave to Joseph “grace [Douay: ‘favor’] in the sight of the chief keeper of the prison.” Now when we say that a man has the favor of another, nothing is implied in him who has the favor of the other, but an acceptance is implied in him whose favor he has. Hence when we say that a man has the grace of God, nothing is implied in his soul; but we merely signify the Divine acceptance.

Objection 2. Further, as the soul quickens the body so does God quicken the soul; hence it is written (Dt. 30:20): “He is thy life.” Now the soul quickens the body immediately. Therefore nothing can come as a medium between God and the soul. Hence grace implies nothing created in the soul.

Objection 3. Further, on Rom. 1:7, “Grace to you and peace,” the gloss says: “Grace, i.e. the remission of sins.” Now the remission of sin implies nothing in the soul, but only in God, Who does not impute the sin, according to Ps. 31:2: “Blessed is the man to whom the Lord hath not imputed sin.” Hence neither does grace imply anything in the soul.

On the contrary, Light implies something in what is enlightened. But grace is a light of the soul; hence Augustine says (De Natura et Gratia xxii): “The light of truth rightly deserts the prevaricator of the law, and those who have been thus deserted become blind.” Therefore grace implies something in the soul.

I answer that, According to the common manner of speech, grace is usually taken in three ways. First, for anyone’s love, as we are accustomed to say that the soldier is in the good graces of the king, i.e. the king looks on him with favor. Secondly, it is taken for any gift freely bestowed, as we are accustomed to say: I do you this act of grace. Thirdly, it is taken for the recompense of a gift given “gratis,” inasmuch as we are said to be “grateful” for benefits. Of these three the second depends on the first, since one bestows something on another “gratis” from the love wherewith he receives him into his good “graces.” And from the second proceeds the third, since from benefits bestowed “gratis”

arises “gratitude.”

Now as regards the last two, it is clear that grace implies something in him who receives grace: first, the gift given gratis; secondly, the acknowledgment of the gift. But as regards the first, a difference must be noted between the grace of God and the grace of man; for since the creature’s good springs from the Divine will, some good in the creature flows from God’s love, whereby He wishes the good of the creature. On the other hand, the will of man is moved by the good pre-existing in things; and hence man’s love does not wholly cause the good of the thing, but pre-supposes it either in part or wholly. Therefore it is clear that every love of God is followed at some time by a good caused in the creature, but not co-eternal with the eternal love. And according to this difference of good the love of God to the creature is looked at differently. For one is common, whereby He loves “all things that are” (Wis. 11:25), and thereby gives things their natural being. But the second is a special love, whereby He draws the rational creature above the condition of its nature to a participation of the Divine good; and according to this love He is said to love anyone simply, since it is by this love that God simply wishes the eternal good, which is Himself, for the creature.

Accordingly when a man is said to have the grace of God, there is signified something bestowed on man by God. Nevertheless the grace of God sometimes signifies God’s eternal love, as we say the grace of predestination, inasmuch as God gratuitously and not from merits predestines or elects some; for it is written (Eph. 1:5): “He hath predestinated us into the adoption of children. . . unto the praise of the glory of His grace.”

Reply to Objection 1. Even when a man is said to be in another’s good graces, it is understood that there is something in him pleasing to the other; even as anyone is said to have God’s grace—with this difference, that what is pleasing to a man in another is presupposed to his love, but whatever is pleasing to God in a man is caused by the Divine love, as was said above.

Reply to Objection 2. God is the life of the soul after the manner of an efficient cause; but the soul is the life of the body after the manner of a formal cause. Now

there is no medium between form and matter, since the form, of itself, “informs” the matter or subject; whereas the agent “informs” the subject, not by its substance, but by the form, which it causes in the matter.

Reply to Objection 3. Augustine says (Retract. i, 25): “When I said that grace was for the remission of sins, and peace for our reconciliation with God, you

must not take it to mean that peace and reconciliation do not pertain to general peace, but that the special name of grace signifies the remission of sins.” Not only grace, therefore, but many other of God’s gifts pertain to grace. And hence the remission of sins does not take place without some effect divinely caused in us, as will appear later (q. 113, a. 2).

Whether grace is a quality of the soul?

Ia IIae q. 110 a. 2

Objection 1. It would seem that grace is not a quality of the soul. For no quality acts on its subject, since the action of a quality is not without the action of its subject, and thus the subject would necessarily act upon itself. But grace acts upon the soul, by justifying it. Therefore grace is not a quality.

Objection 2. Furthermore, substance is nobler than quality. But grace is nobler than the nature of the soul, since we can do many things by grace, to which nature is not equal, as stated above (q. 109, Aa. 1,2,3). Therefore grace is not a quality.

Objection 3. Furthermore, no quality remains after it has ceased to be in its subject. But grace remains; since it is not corrupted, for thus it would be reduced to nothing, since it was created from nothing; hence it is called a “new creature”(Gal. 6:15).

On the contrary, on Ps. 103:15: “That he may make the face cheerful with oil”; the gloss says: “Grace is a certain beauty of soul, which wins the Divine love.” But beauty of soul is a quality, even as beauty of body. Therefore grace is a quality.

I answer that, As stated above (a. 1), there is understood to be an effect of God’s gratuitous will in whoever is said to have God’s grace. Now it was stated (q. 109, a. 1) that man is aided by God’s gratuitous will in two ways: first, inasmuch as man’s soul is moved by God to know or will or do something, and in this way the gratuitous effect in man is not a quality, but a movement of the soul; for “motion is the act of the mover in the moved.” Secondly, man is helped by God’s gratuitous will, inasmuch as a habitual gift is infused by God into the soul; and for this reason, that it is not fitting that God should provide less for those He loves, that they may acquire supernatural good, than for creatures, whom He loves that they may acquire natural good. Now He so provides for natural creatures, that not merely does He move them to their natural acts, but He bestows upon them certain forms and powers, which are the principles of acts, in order that they may of themselves be inclined to these movements, and thus the movements whereby

they are moved by God become natural and easy to creatures, according to Wis. 8:1: “she. . . ordereth all things sweetly.” Much more therefore does He infuse into such as He moves towards the acquisition of supernatural good, certain forms or supernatural qualities, whereby they may be moved by Him sweetly and promptly to acquire eternal good; and thus the gift of grace is a quality.

Reply to Objection 1. Grace, as a quality, is said to act upon the soul, not after the manner of an efficient cause, but after the manner of a formal cause, as whiteness makes a thing white, and justice, just.

Reply to Objection 2. Every substance is either the nature of the thing whereof it is the substance or is a part of the nature, even as matter and form are called substance. And because grace is above human nature, it cannot be a substance or a substantial form, but is an accidental form of the soul. Now what is substantially in God, becomes accidental in the soul participating the Divine goodness, as is clear in the case of knowledge. And thus because the soul participates in the Divine goodness imperfectly, the participation of the Divine goodness, which is grace, has its being in the soul in a less perfect way than the soul subsists in itself. Nevertheless, inasmuch as it is the expression or participation of the Divine goodness, it is nobler than the nature of the soul, though not in its mode of being.

Reply to Objection 3. As Boethius* says, the “being of an accident is to inhere.” Hence no accident is called being as if it had being, but because by it something is; hence it is said to belong to a being rather to be a being (Metaph. vii, text. 2). And because to become and to be corrupted belong to what is, properly speaking, no accident comes into being or is corrupted, but is said to come into being and to be corrupted inasmuch as its subject begins or ceases to be in act with this accident. And thus grace is said to be created inasmuch as men are created with reference to it, i.e. are given a new being out of nothing, i.e. not from merits, according to Eph. 2:10, “created in Jesus Christ in good works.”

* Pseudo-Bede, Sent. Phil. ex Artist

Objection 1. It would seem that grace is the same as virtue. For Augustine says (*De Spir. et Lit.* xiv) that “operating grace is faith that worketh by charity.” But faith that worketh by charity is a virtue. Therefore grace is a virtue.

Objection 2. Further, what fits the definition, fits the defined. But the definitions of virtue given by saints and philosophers fit grace, since “it makes its subject good, and his work good,” and “it is a good quality of the mind, whereby we live righteously,” etc. Therefore grace is virtue.

Objection 3. Further, grace is a quality. Now it is clearly not in the “fourth” species of quality; viz. “form” which is the “abiding figure of things,” since it does not belong to bodies. Nor is it in the “third,” since it is not a “passion nor a passion-like quality,” which is in the sensitive part of the soul, as is proved in *Physic.* viii; and grace is principally in the mind. Nor is it in the “second” species, which is “natural power” or “impotence”; since grace is above nature and does not regard good and evil, as does natural power. Therefore it must be in the “first” species which is “habit” or “disposition.” Now habits of the mind are virtues; since even knowledge itself is a virtue after a manner, as stated above (q. 57, Aa. 1,2). Therefore grace is the same as virtue.

On the contrary, If grace is a virtue, it would seem before all to be one of the three theological virtues. But grace is neither faith nor hope, for these can be without sanctifying grace. Nor is it charity, since “grace fore-runs charity,” as Augustine says in his book on the Predestination of the Saints (*De Dono Persev.* xvi). Therefore grace is not virtue.

I answer that, Some held that grace and virtue were identical in essence, and differed only logically—in the sense that we speak of grace inasmuch as it makes man pleasing to God, or is given gratuitously—and of virtue inasmuch as it empowers us to act rightly. And the Master seems to have thought this (*Sent.* ii, D 27).

But if anyone rightly considers the nature of virtue, this cannot hold, since, as the Philosopher says (*Physic.*

vii, text. 17), “virtue is disposition of what is perfect—and I call perfect what is disposed according to its nature.” Now from this it is clear that the virtue of a thing has reference to some pre-existing nature, from the fact that everything is disposed with reference to what befits its nature. But it is manifest that the virtues acquired by human acts of which we spoke above (q. 55, seqq.) are dispositions, whereby a man is fittingly disposed with reference to the nature whereby he is a man; whereas infused virtues dispose man in a higher manner and towards a higher end, and consequently in relation to some higher nature, i.e. in relation to a participation of the Divine Nature, according to 2 Pet. 1:4: “He hath given us most great and most precious promises; that by these you may be made partakers of the Divine Nature.” And it is in respect of receiving this nature that we are said to be born again sons of God.

And thus, even as the natural light of reason is something besides the acquired virtues, which are ordained to this natural light, so also the light of grace which is a participation of the Divine Nature is something besides the infused virtues which are derived from and are ordained to this light, hence the Apostle says (*Eph.* 5:8): “For you were heretofore darkness, but now light in the Lord. Walk then as children of the light.” For as the acquired virtues enable a man to walk, in accordance with the natural light of reason, so do the infused virtues enable a man to walk as befits the light of grace.

Reply to Objection 1. Augustine calls “faith that worketh by charity” grace, since the act of faith of him that worketh by charity is the first act by which sanctifying grace is manifested.

Reply to Objection 2. Good is placed in the definition of virtue with reference to its fitness with some pre-existing nature essential or participated. Now good is not attributed to grace in this manner, but as to the root of goodness in man, as stated above.

Reply to Objection 3. Grace is reduced to the first species of quality; and yet it is not the same as virtue, but is a certain disposition which is presupposed to the infused virtues, as their principle and root.

Objection 1. It would seem that grace is not in the essence of the soul, as in a subject, but in one of the powers. For Augustine says (*Hypognosticon* iii*) that grace is related to the will or to the free will “as a rider to his horse.” Now the will or the free will is a power, as stated above (Ia, q. 83, a. 2). Hence grace is in a power of the soul, as in a subject.

Objection 2. Further, “Man’s merit springs from grace” as Augustine says (*De Gratia et Lib. Arbit.* vi). Now merit consists in acts, which proceed from

a power. Hence it seems that grace is a perfection of a power of the soul.

Objection 3. Further, if the essence of the soul is the proper subject of grace, the soul, inasmuch as it has an essence, must be capable of grace. But this is false; since it would follow that every soul would be capable of grace. Therefore the essence of the soul is not the proper subject of grace.

Objection 4. Further, the essence of the soul is prior to its powers. Now what is prior may be understood

* Among the spurious works of St. Augustine

without what is posterior. Hence it follows that grace may be taken to be in the soul, although we suppose no part or power of the soul—viz. neither the will, nor the intellect, nor anything else; which is impossible.

On the contrary, By grace we are born again sons of God. But generation terminates at the essence prior to the powers. Therefore grace is in the soul's essence prior to being in the powers.

I answer that, This question depends on the preceding. For if grace is the same as virtue, it must necessarily be in the powers of the soul as in a subject; since the soul's powers are the proper subject of virtue, as stated above (q. 56, a. 1). But if grace differs from virtue, it cannot be said that a power of the soul is the subject of grace, since every perfection of the soul's powers has the nature of virtue, as stated above (q. 55, a. 1; q. 56, a. 1). Hence it remains that grace, as it is prior to virtue, has a subject prior to the powers of the soul, so that it is in the essence of the soul. For as man in his intellectual powers participates in the Divine knowledge through the virtue of faith, and in his power of will participates in the Divine love through the virtue of charity, so also in the nature of the soul does he participate in the Divine Nature, after the manner of a likeness, through a certain regeneration or re-creation.

Reply to Objection 1. As from the essence of the soul flows its powers, which are the principles of deeds, so likewise the virtues, whereby the powers are moved

to act, flow into the powers of the soul from grace. And thus grace is compared to the will as the mover to the moved, which is the same comparison as that of a horse-man to the horse—but not as an accident to a subject.

And thereby is made clear the Reply to the Second Objection. For grace is the principle of meritorious works through the medium of virtues, as the essence of the soul is the principal of vital deeds through the medium of the powers.

Reply to Objection 3. The soul is the subject of grace, as being in the species of intellectual or rational nature. But the soul is not classed in a species by any of its powers, since the powers are natural properties of the soul following upon the species. Hence the soul differs specifically in its essence from other souls, viz. of dumb animals, and of plants. Consequently it does not follow that, if the essence of the human soul is the subject of grace, every soul may be the subject of grace; since it belongs to the essence of the soul, inasmuch as it is of such a species.

Reply to Objection 4. Since the powers of the soul are natural properties following upon the species, the soul cannot be without them. Yet, granted that it was without them, the soul would still be called intellectual or rational in its species, not that it would actually have these powers, but on account of the essence of such a species, from which these powers naturally flow.

Objection 1. It would seem that grace does not imply anything in the soul. For man is said to have the grace of God even as the grace of man. Hence it is written (Gn. 39:21) that the Lord gave to Joseph “grace [Douay: ‘favor’] in the sight of the chief keeper of the prison.” Now when we say that a man has the favor of another, nothing is implied in him who has the favor of the other, but an acceptance is implied in him whose favor he has. Hence when we say that a man has the grace of God, nothing is implied in his soul; but we merely signify the Divine acceptance.

Objection 2. Further, as the soul quickens the body so does God quicken the soul; hence it is written (Dt. 30:20): “He is thy life.” Now the soul quickens the body immediately. Therefore nothing can come as a medium between God and the soul. Hence grace implies nothing created in the soul.

Objection 3. Further, on Rom. 1:7, “Grace to you and peace,” the gloss says: “Grace, i.e. the remission of sins.” Now the remission of sin implies nothing in the soul, but only in God, Who does not impute the sin, according to Ps. 31:2: “Blessed is the man to whom the Lord hath not imputed sin.” Hence neither does grace imply anything in the soul.

On the contrary, Light implies something in what is enlightened. But grace is a light of the soul; hence Augustine says (De Natura et Gratia xxii): “The light of truth rightly deserts the prevaricator of the law, and those who have been thus deserted become blind.” Therefore grace implies something in the soul.

I answer that, According to the common manner of speech, grace is usually taken in three ways. First, for anyone’s love, as we are accustomed to say that the soldier is in the good graces of the king, i.e. the king looks on him with favor. Secondly, it is taken for any gift freely bestowed, as we are accustomed to say: I do you this act of grace. Thirdly, it is taken for the recompense of a gift given “gratis,” inasmuch as we are said to be “grateful” for benefits. Of these three the second depends on the first, since one bestows something on another “gratis” from the love wherewith he receives him into his good “graces.” And from the second proceeds the third, since from benefits bestowed “gratis” arises “gratitude.”

Now as regards the last two, it is clear that grace implies something in him who receives grace: first, the gift given gratis; secondly, the acknowledgment of the gift. But as regards the first, a difference must be noted between the grace of God and the grace of man; for since the creature’s good springs from the Divine will, some

good in the creature flows from God’s love, whereby He wishes the good of the creature. On the other hand, the will of man is moved by the good pre-existing in things; and hence man’s love does not wholly cause the good of the thing, but pre-supposes it either in part or wholly. Therefore it is clear that every love of God is followed at some time by a good caused in the creature, but not co-eternal with the eternal love. And according to this difference of good the love of God to the creature is looked at differently. For one is common, whereby He loves “all things that are” (Wis. 11:25), and thereby gives things their natural being. But the second is a special love, whereby He draws the rational creature above the condition of its nature to a participation of the Divine good; and according to this love He is said to love anyone simply, since it is by this love that God simply wishes the eternal good, which is Himself, for the creature.

Accordingly when a man is said to have the grace of God, there is signified something bestowed on man by God. Nevertheless the grace of God sometimes signifies God’s eternal love, as we say the grace of predestination, inasmuch as God gratuitously and not from merits predestines or elects some; for it is written (Eph. 1:5): “He hath predestinated us into the adoption of children. . . unto the praise of the glory of His grace.”

Reply to Objection 1. Even when a man is said to be in another’s good graces, it is understood that there is something in him pleasing to the other; even as anyone is said to have God’s grace—with this difference, that what is pleasing to a man in another is presupposed to his love, but whatever is pleasing to God in a man is caused by the Divine love, as was said above.

Reply to Objection 2. God is the life of the soul after the manner of an efficient cause; but the soul is the life of the body after the manner of a formal cause. Now there is no medium between form and matter, since the form, of itself, “informs” the matter or subject; whereas the agent “informs” the subject, not by its substance, but by the form, which it causes in the matter.

Reply to Objection 3. Augustine says (Retract. i, 25): “When I said that grace was for the remission of sins, and peace for our reconciliation with God, you must not take it to mean that peace and reconciliation do not pertain to general peace, but that the special name of grace signifies the remission of sins.” Not only grace, therefore, but many other of God’s gifts pertain to grace. And hence the remission of sins does not take place without some effect divinely caused in us, as will appear later (q. 113, a. 2).

Objection 1. It would seem that grace is not a quality of the soul. For no quality acts on its subject, since the action of a quality is not without the action of its subject, and thus the subject would necessarily act upon itself. But grace acts upon the soul, by justifying it. Therefore grace is not a quality.

Objection 2. Furthermore, substance is nobler than quality. But grace is nobler than the nature of the soul, since we can do many things by grace, to which nature is not equal, as stated above (q. 109, Aa. 1,2,3). Therefore grace is not a quality.

Objection 3. Furthermore, no quality remains after it has ceased to be in its subject. But grace remains; since it is not corrupted, for thus it would be reduced to nothing, since it was created from nothing; hence it is called a “new creature” (Gal. 6:15).

On the contrary, on Ps. 103:15: “That he may make the face cheerful with oil”; the gloss says: “Grace is a certain beauty of soul, which wins the Divine love.” But beauty of soul is a quality, even as beauty of body. Therefore grace is a quality.

I answer that, As stated above (a. 1), there is understood to be an effect of God’s gratuitous will in whoever is said to have God’s grace. Now it was stated (q. 109, a. 1) that man is aided by God’s gratuitous will in two ways: first, inasmuch as man’s soul is moved by God to know or will or do something, and in this way the gratuitous effect in man is not a quality, but a movement of the soul; for “motion is the act of the mover in the moved.” Secondly, man is helped by God’s gratuitous will, inasmuch as a habitual gift is infused by God into the soul; and for this reason, that it is not fitting that God should provide less for those He loves, that they may acquire supernatural good, than for creatures, whom He loves that they may acquire natural good. Now He so provides for natural creatures, that not merely does He move them to their natural acts, but He bestows upon them certain forms and powers, which are the principles of acts, in order that they may of themselves be inclined to these movements, and thus the movements whereby

they are moved by God become natural and easy to creatures, according to Wis. 8:1: “she... ordereth all things sweetly.” Much more therefore does He infuse into such as He moves towards the acquisition of supernatural good, certain forms or supernatural qualities, whereby they may be moved by Him sweetly and promptly to acquire eternal good; and thus the gift of grace is a quality.

Reply to Objection 1. Grace, as a quality, is said to act upon the soul, not after the manner of an efficient cause, but after the manner of a formal cause, as whiteness makes a thing white, and justice, just.

Reply to Objection 2. Every substance is either the nature of the thing whereof it is the substance or is a part of the nature, even as matter and form are called substance. And because grace is above human nature, it cannot be a substance or a substantial form, but is an accidental form of the soul. Now what is substantially in God, becomes accidental in the soul participating the Divine goodness, as is clear in the case of knowledge. And thus because the soul participates in the Divine goodness imperfectly, the participation of the Divine goodness, which is grace, has its being in the soul in a less perfect way than the soul subsists in itself. Nevertheless, inasmuch as it is the expression or participation of the Divine goodness, it is nobler than the nature of the soul, though not in its mode of being.

Reply to Objection 3. As Boethius* says, the “being of an accident is to inhere.” Hence no accident is called being as if it had being, but because by it something is; hence it is said to belong to a being rather to be a being (Metaph. vii, text. 2). And because to become and to be corrupted belong to what is, properly speaking, no accident comes into being or is corrupted, but is said to come into being and to be corrupted inasmuch as its subject begins or ceases to be in act with this accident. And thus grace is said to be created inasmuch as men are created with reference to it, i.e. are given a new being out of nothing, i.e. not from merits, according to Eph. 2:10, “created in Jesus Christ in good works.”

* Pseudo-Bede, Sent. Phil. ex Artist

Objection 1. It would seem that grace is the same as virtue. For Augustine says (*De Spir. et Lit.* xiv) that “operating grace is faith that worketh by charity.” But faith that worketh by charity is a virtue. Therefore grace is a virtue.

Objection 2. Further, what fits the definition, fits the defined. But the definitions of virtue given by saints and philosophers fit grace, since “it makes its subject good, and his work good,” and “it is a good quality of the mind, whereby we live righteously,” etc. Therefore grace is virtue.

Objection 3. Further, grace is a quality. Now it is clearly not in the “fourth” species of quality; viz. “form” which is the “abiding figure of things,” since it does not belong to bodies. Nor is it in the “third,” since it is not a “passion nor a passion-like quality,” which is in the sensitive part of the soul, as is proved in *Physic.* viii; and grace is principally in the mind. Nor is it in the “second” species, which is “natural power” or “impotence”; since grace is above nature and does not regard good and evil, as does natural power. Therefore it must be in the “first” species which is “habit” or “disposition.” Now habits of the mind are virtues; since even knowledge itself is a virtue after a manner, as stated above (q. 57, Aa. 1,2). Therefore grace is the same as virtue.

On the contrary, If grace is a virtue, it would seem before all to be one of the three theological virtues. But grace is neither faith nor hope, for these can be without sanctifying grace. Nor is it charity, since “grace fore-runs charity,” as Augustine says in his book on the Pre-destination of the Saints (*De Dono Persev.* xvi). Therefore grace is not virtue.

I answer that, Some held that grace and virtue were identical in essence, and differed only logically—in the sense that we speak of grace inasmuch as it makes man pleasing to God, or is given gratuitously—and of virtue inasmuch as it empowers us to act rightly. And the Master seems to have thought this (*Sent.* ii, D 27).

But if anyone rightly considers the nature of virtue, this cannot hold, since, as the Philosopher says (*Physic.*

vii, text. 17), “virtue is disposition of what is perfect—and I call perfect what is disposed according to its nature.” Now from this it is clear that the virtue of a thing has reference to some pre-existing nature, from the fact that everything is disposed with reference to what befits its nature. But it is manifest that the virtues acquired by human acts of which we spoke above (q. 55, seqq.) are dispositions, whereby a man is fittingly disposed with reference to the nature whereby he is a man; whereas infused virtues dispose man in a higher manner and towards a higher end, and consequently in relation to some higher nature, i.e. in relation to a participation of the Divine Nature, according to 2 Pet. 1:4: “He hath given us most great and most precious promises; that by these you may be made partakers of the Divine Nature.” And it is in respect of receiving this nature that we are said to be born again sons of God.

And thus, even as the natural light of reason is something besides the acquired virtues, which are ordained to this natural light, so also the light of grace which is a participation of the Divine Nature is something besides the infused virtues which are derived from and are ordained to this light, hence the Apostle says (*Eph.* 5:8): “For you were heretofore darkness, but now light in the Lord. Walk then as children of the light.” For as the acquired virtues enable a man to walk, in accordance with the natural light of reason, so do the infused virtues enable a man to walk as befits the light of grace.

Reply to Objection 1. Augustine calls “faith that worketh by charity” grace, since the act of faith of him that worketh by charity is the first act by which sanctifying grace is manifested.

Reply to Objection 2. Good is placed in the definition of virtue with reference to its fitness with some pre-existing nature essential or participated. Now good is not attributed to grace in this manner, but as to the root of goodness in man, as stated above.

Reply to Objection 3. Grace is reduced to the first species of quality; and yet it is not the same as virtue, but is a certain disposition which is presupposed to the infused virtues, as their principle and root.

Objection 1. It would seem that grace is not in the essence of the soul, as in a subject, but in one of the powers. For Augustine says (*Hypognosticon* iii*) that grace is related to the will or to the free will “as a rider to his horse.” Now the will or the free will is a power, as stated above (Ia, q. 83, a. 2). Hence grace is in a power of the soul, as in a subject.

Objection 2. Further, “Man’s merit springs from grace” as Augustine says (*De Gratia et Lib. Arbit.* vi). Now merit consists in acts, which proceed from a power. Hence it seems that grace is a perfection of a power of the soul.

Objection 3. Further, if the essence of the soul is the proper subject of grace, the soul, inasmuch as it has an essence, must be capable of grace. But this is false; since it would follow that every soul would be capable of grace. Therefore the essence of the soul is not the proper subject of grace.

Objection 4. Further, the essence of the soul is prior to its powers. Now what is prior may be understood without what is posterior. Hence it follows that grace may be taken to be in the soul, although we suppose no part or power of the soul—viz. neither the will, nor the intellect, nor anything else; which is impossible.

On the contrary, By grace we are born again sons of God. But generation terminates at the essence prior to the powers. Therefore grace is in the soul’s essence prior to being in the powers.

Answer that, This question depends on the preceding. For if grace is the same as virtue, it must necessarily be in the powers of the soul as in a subject; since the soul’s powers are the proper subject of virtue, as stated above (q. 56, a. 1). But if grace differs from virtue, it cannot be said that a power of the soul is the subject of grace, since every perfection of the soul’s powers has the nature of virtue, as stated above (q. 55, a. 1; q. 56, a. 1). Hence it remains that grace, as it is prior to virtue, has a subject prior to the powers of the soul, so that

it is in the essence of the soul. For as man in his intellectual powers participates in the Divine knowledge through the virtue of faith, and in his power of will participates in the Divine love through the virtue of charity, so also in the nature of the soul does he participate in the Divine Nature, after the manner of a likeness, through a certain regeneration or re-creation.

Reply to Objection 1. As from the essence of the soul flows its powers, which are the principles of deeds, so likewise the virtues, whereby the powers are moved to act, flow into the powers of the soul from grace. And thus grace is compared to the will as the mover to the moved, which is the same comparison as that of a horseman to the horse—but not as an accident to a subject.

And thereby is made clear the Reply to the Second Objection. For grace is the principle of meritorious works through the medium of virtues, as the essence of the soul is the principal of vital deeds through the medium of the powers.

Reply to Objection 3. The soul is the subject of grace, as being in the species of intellectual or rational nature. But the soul is not classed in a species by any of its powers, since the powers are natural properties of the soul following upon the species. Hence the soul differs specifically in its essence from other souls, viz. of dumb animals, and of plants. Consequently it does not follow that, if the essence of the human soul is the subject of grace, every soul may be the subject of grace; since it belongs to the essence of the soul, inasmuch as it is of such a species.

Reply to Objection 4. Since the powers of the soul are natural properties following upon the species, the soul cannot be without them. Yet, granted that it was without them, the soul would still be called intellectual or rational in its species, not that it would actually have these powers, but on account of the essence of such a species, from which these powers naturally flow.

* Among the spurious works of St. Augustine

FIRST PART OF THE SECOND PART, QUESTION 111

Of the Division of Grace (In Five Articles)

We must now consider the division of grace; under which head there are five points of inquiry:

- (1) Whether grace is fittingly divided into gratuitous grace and sanctifying grace?
- (2) Of the division into operating and cooperating grace;
- (3) Of the division of it into prevenient and subsequent grace;
- (4) Of the division of gratuitous grace;
- (5) Of the comparison between sanctifying and gratuitous grace.

Whether grace is fittingly divided into sanctifying grace and gratuitous grace?

Ia IIae q. 111 a. 1

Objection 1. It would seem that grace is not fittingly divided into sanctifying grace and gratuitous grace. For grace is a gift of God, as is clear from what has been already stated (q. 110, a. 1). But man is not therefore pleasing to God because something is given him by God, but rather on the contrary; since something is freely given by God, because man is pleasing to Him. Hence there is no sanctifying grace.

Objection 2. Further, whatever is not given on account of preceding merits is given gratis. Now even natural good is given to man without preceding merit, since nature is presupposed to merit. Therefore nature itself is given gratuitously by God. But nature is condivided with grace. Therefore to be gratuitously given is not fittingly set down as a difference of grace, since it is found outside the genus of grace.

Objection 3. Further, members of a division are mutually opposed. But even sanctifying grace, whereby we are justified, is given to us gratuitously, according to Rom. 3:24: "Being justified freely [gratis] by His grace." Hence sanctifying grace ought not to be divided against gratuitous grace.

On the contrary, The Apostle attributes both to grace, viz. to sanctify and to be gratuitously given. For with regard to the first he says (Eph. 1:6): "He hath graced us in His beloved son." And with regard to the second (Rom. 2:6): "And if by grace, it is not now by works, otherwise grace is no more grace." Therefore grace can be distinguished by its having one only or both.

I answer that, As the Apostle says (Rom. 13:1), "those things that are of God are well ordered [Vulg.: 'those that are, are ordained by God]." Now the order of things consists in this, that things are led to God by other things, as Dionysius says (Coel. Hier. iv). And hence since grace is ordained to lead men to God, this takes place in a certain order, so that some are led to God by others.

And thus there is a twofold grace: one whereby man himself is united to God, and this is called "sanctifying grace"; the other is that whereby one man cooper-

ates with another in leading him to God, and this gift is called "gratuitous grace," since it is bestowed on a man beyond the capability of nature, and beyond the merit of the person. But whereas it is bestowed on a man, not to justify him, but rather that he may cooperate in the justification of another, it is not called sanctifying grace. And it is of this that the Apostle says (1 Cor. 12:7): "And the manifestation of the Spirit is given to every man unto utility," i.e. of others.

Reply to Objection 1. Grace is said to make pleasing, not efficiently but formally, i.e. because thereby a man is justified, and is made worthy to be called pleasing to God, according to Col. 1:21: "He hath made us worthy to be made partakers of the lot of the saints in light."

Reply to Objection 2. Grace, inasmuch as it is gratuitously given, excludes the notion of debt. Now debt may be taken in two ways: first, as arising from merit; and this regards the person whose it is to do meritorious works, according to Rom. 4:4: "Now to him that worketh, the reward is not reckoned according to grace, but according to debt." The second debt regards the condition of nature. Thus we say it is due to a man to have reason, and whatever else belongs to human nature. Yet in neither way is debt taken to mean that God is under an obligation to His creature, but rather that the creature ought to be subject to God, that the Divine ordination may be fulfilled in it, which is that a certain nature should have certain conditions or properties, and that by doing certain works it should attain to something further. And hence natural endowments are not a debt in the first sense but in the second. Hence they especially merit the name of grace.

Reply to Objection 3. Sanctifying grace adds to the notion of gratuitous grace something pertaining to the nature of grace, since it makes man pleasing to God. And hence gratuitous grace which does not do this keeps the common name, as happens in many other cases; and thus the two parts of the division are opposed as sanctifying and non-sanctifying grace.

Objection 1. It would seem that grace is not fittingly divided into operating and cooperating grace. For grace is an accident, as stated above (q. 110, a. 2). Now no accident can act upon its subject. Therefore no grace can be called operating.

Objection 2. Further, if grace operates anything in us it assuredly brings about justification. But not only grace works this. For Augustine says, on Jn. 14:12, “the works that I do he also shall do,” says (Serm. clxix): “He Who created thee without thyself, will not justify thee without thyself.” Therefore no grace ought to be called simply operating.

Objection 3. Further, to cooperate seems to pertain to the inferior agent, and not to the principal agent. But grace works in us more than free-will, according to Rom. 9:16: “It is not of him that willeth, nor of him that runneth, but of God that sheweth mercy.” Therefore no grace ought to be called cooperating.

Objection 4. Further, division ought to rest on opposition. But to operate and to cooperate are not opposed; for one and the same thing can both operate and cooperate. Therefore grace is not fittingly divided into operating and cooperating.

On the contrary, Augustine says (De Gratia et Lib. Arbit. xvii): “God by cooperating with us, perfects what He began by operating in us, since He who perfects by cooperation with such as are willing, beings by operating that they may will.” But the operations of God whereby He moves us to good pertain to grace. Therefore grace is fittingly divided into operating and cooperating.

I answer that, As stated above (q. 110, a. 2) grace may be taken in two ways; first, as a Divine help, whereby God moves us to will and to act; secondly, as a habitual gift divinely bestowed on us.

Now in both these ways grace is fittingly divided into operating and cooperating. For the operation of an effect is not attributed to the thing moved but to the mover. Hence in that effect in which our mind is moved and does not move, but in which God is the sole mover, the operation is attributed to God, and it is with reference to this that we speak of “operating grace.” But in that effect in which our mind both moves and is moved, the operation is not only attributed to God, but also to the soul; and it is with reference to this that we speak of “cooperating grace.” Now there is a double act in

us. First, there is the interior act of the will, and with regard to this act the will is a thing moved, and God is the mover; and especially when the will, which hitherto willed evil, begins to will good. And hence, inasmuch as God moves the human mind to this act, we speak of operating grace. But there is another, exterior act; and since it is commanded by the will, as was shown above (q. 17, a. 9) the operation of this act is attributed to the will. And because God assists us in this act, both by strengthening our will interiorly so as to attain to the act, and by granting outwardly the capability of operating, it is with respect to this that we speak of cooperating grace. Hence after the aforesaid words Augustine subjoins: “He operates that we may will; and when we will, He cooperates that we may perfect.” And thus if grace is taken for God’s gratuitous motion whereby He moves us to meritorious good, it is fittingly divided into operating and cooperating grace.

But if grace is taken for the habitual gift, then again there is a double effect of grace, even as of every other form; the first of which is “being,” and the second, “operation”; thus the work of heat is to make its subject hot, and to give heat outwardly. And thus habitual grace, inasmuch as it heals and justifies the soul, or makes it pleasing to God, is called operating grace; but inasmuch as it is the principle of meritorious works, which spring from the free-will, it is called cooperating grace.

Reply to Objection 1. Inasmuch as grace is a certain accidental quality, it does not act upon the soul efficiently, but formally, as whiteness makes a surface white.

Reply to Objection 2. God does not justify us without ourselves, because whilst we are being justified we consent to God’s justification [justitiae] by a movement of our free-will. Nevertheless this movement is not the cause of grace, but the effect; hence the whole operation pertains to grace.

Reply to Objection 3. One thing is said to cooperate with another not merely when it is a secondary agent under a principal agent, but when it helps to the end intended. Now man is helped by God to will the good, through the means of operating grace. And hence, the end being already intended, grace cooperates with us.

Reply to Objection 4. Operating and cooperating grace are the same grace; but are distinguished by their different effects, as is plain from what has been said.

Objection 1. It would seem that grace is not fittingly divided into prevenient and subsequent. For grace is an effect of the Divine love. But God’s love is never subsequent, but always prevenient, according to 1 Jn. 4:10: “Not as though we had loved God, but because He hath first loved us.” Therefore grace ought

not to be divided into prevenient and subsequent.

Objection 2. Further, there is but one sanctifying grace in man, since it is sufficient, according to 2 Cor. 12:9: “My grace is sufficient for thee.” But the same thing cannot be before and after. Therefore grace is not fittingly divided into prevenient and subsequent.

Objection 3. Further, grace is known by its effects. Now there are an infinite number of effects—one preceding another. Hence it with regard to these, grace must be divided into prevenient and subsequent, it would seem that there are infinite species of grace. Now no art takes note of the infinite in number. Hence grace is not fittingly divided into prevenient and subsequent.

On the contrary, God's grace is the outcome of His mercy. Now both are said in Ps. 58:11: "His mercy shall prevent me," and again, Ps. 22:6: "Thy mercy will follow me." Therefore grace is fittingly divided into prevenient and subsequent.

I answer that, As grace is divided into operating and cooperating, with regard to its diverse effects, so also is it divided into prevenient and subsequent, howsoever we consider grace. Now there are five effects of grace in us: of these, the first is, to heal the soul; the second, to desire good; the third, to carry into effect the good proposed; the fourth, to persevere in good; the fifth, to reach glory. And hence grace, inasmuch as it causes the first effect in us, is called prevenient with respect to the second, and inasmuch as it causes the second, it is called subsequent with respect to the first effect. And as one effect is posterior to this effect, and prior to that, so may grace be called prevenient and sub-

sequent on account of the same effect viewed relatively to divers others. And this is what Augustine says (*De Natura et Gratia xxxi*): "It is prevenient, inasmuch as it heals, and subsequent, inasmuch as, being healed, we are strengthened; it is prevenient, inasmuch as we are called, and subsequent, inasmuch as we are glorified."

Reply to Objection 1. God's love signifies something eternal; and hence can never be called anything but prevenient. But grace signifies a temporal effect, which can precede and follow another; and thus grace may be both prevenient and subsequent.

Reply to Objection 2. The division into prevenient and subsequent grace does not divide grace in its essence, but only in its effects, as was already said of operating and cooperating grace. For subsequent grace, inasmuch as it pertains to glory, is not numerically distinct from prevenient grace whereby we are at present justified. For even as the charity of the earth is not voided in heaven, so must the same be said of the light of grace, since the notion of neither implies imperfection.

Reply to Objection 3. Although the effects of grace may be infinite in number, even as human acts are infinite, nevertheless all reduced to some of a determinate species, and moreover all coincide in this—that one precedes another.

Whether gratuitous grace is rightly divided by the Apostle?

Ia IIae q. 111 a. 4

Objection 1. It would seem that gratuitous grace is not rightly divided by the Apostle. For every gift vouchsafed to us by God, may be called a gratuitous grace. Now there are an infinite number of gifts freely bestowed on us by God as regards both the good of the soul and the good of the body—and yet they do not make us pleasing to God. Hence gratuitous graces cannot be contained under any certain division.

Objection 2. Further, gratuitous grace is distinguished from sanctifying grace. But faith pertains to sanctifying grace, since we are justified by it, according to Rom. 5:1: "Being justified therefore by faith." Hence it is not right to place faith amongst the gratuitous graces, especially since the other virtues are not so placed, as hope and charity.

Objection 3. Further, the operation of healing, and speaking divers tongues are miracles. Again, the interpretation of speeches pertains either to wisdom or to knowledge, according to Dan. 1:17: "And to these children God gave knowledge and understanding in every book and wisdom." Hence it is not correct to divide the grace of healing and kinds of tongues against the working of miracles; and the interpretation of speeches against the word of wisdom and knowledge.

Objection 4. Further, as wisdom and knowledge are gifts of the Holy Ghost, so also are understanding, counsel, piety, fortitude, and fear, as stated above (q. 68, a. 4). Therefore these also ought to be placed amongst

the gratuitous gifts.

On the contrary, The Apostle says (1 Cor. 12:8,9,10): "To one indeed by the Spirit is given the word of wisdom; and to another the word of knowledge, according to the same Spirit; to another, the working of miracles; to another, prophecy; to another, the discerning of spirits; to another divers kinds of tongues; to another interpretation of speeches."

I answer that, As was said above (a. 1), gratuitous grace is ordained to this, viz. that a man may help another to be led to God. Now no man can help in this by moving interiorly (for this belongs to God alone), but only exteriorly by teaching or persuading. Hence gratuitous grace embraces whatever a man needs in order to instruct another in Divine things which are above reason. Now for this three things are required: first, a man must possess the fullness of knowledge of Divine things, so as to be capable of teaching others. Secondly, he must be able to confirm or prove what he says, otherwise his words would have no weight. Thirdly, he must be capable of fittingly presenting to his hearers what he knows.

Now as regards the first, three things are necessary, as may be seen in human teaching. For whoever would teach another in any science must first be certain of the principles of the science, and with regard to this there is "faith," which is certitude of invisible things, the principles of Catholic doctrine. Secondly, it behooves the

teacher to know the principal conclusions of the science, and hence we have the word of “wisdom,” which is the knowledge of Divine things. Thirdly, he ought to abound with examples and a knowledge of effects, whereby at times he needs to manifest causes; and thus we have the word of “knowledge,” which is the knowledge of human things, since “the invisible things of Him . . . are clearly seen, being understood by the things that are made” (Rom. 1:20).

Now the confirmation of such things as are within reason rests upon arguments; but the confirmation of what is above reason rests on what is proper to the Divine power, and this in two ways: first, when the teacher of sacred doctrine does what God alone can do, in miraculous deeds, whether with respect to bodily health—and thus there is the “grace of healing,” or merely for the purpose of manifesting the Divine power; for instance, that the sun should stand still or darken, or that the sea should be divided—and thus there is the “working of miracles.” Secondly, when he can manifest what God alone can know, and these are either future contingents—and thus there is “prophecy,” or also the secrets of hearts—and thus there is the “discerning of spirits.”

But the capability of speaking can regard either the idiom in which a person can be understood, and thus there is “kinds of tongues”; or it can regard the sense of what is said, and thus there is the “interpretation of speeches.”

Reply to Objection 1. As stated above (a. 1), not all the benefits divinely conferred upon us are called gratuitous graces, but only those that surpass the power of nature—e.g. that a fisherman should be replete with the word of wisdom and of knowledge and the like; and such as these are here set down as gratuitous graces.

Reply to Objection 2. Faith is enumerated here under the gratuitous graces, not as a virtue justifying man in himself, but as implying a super-eminent certitude of faith, whereby a man is fitted for instructing others concerning such things as belong to the faith. With regard to hope and charity, they belong to the appetitive power, according as man is ordained thereby to God.

Reply to Objection 3. The grace of healing is distinguished from the general working of miracles because it has a special reason for inducing one to the faith, since a man is all the more ready to believe when he has received the gift of bodily health through the virtue of faith. So, too, to speak with divers tongues and to interpret speeches have special efficacy in bestowing faith. Hence they are set down as special gratuitous graces.

Reply to Objection 4. Wisdom and knowledge are not numbered among the gratuitous graces in the same way as they are reckoned among the gifts of the Holy Ghost, i.e. inasmuch as man’s mind is rendered easily movable by the Holy Ghost to the things of wisdom and knowledge; for thus they are gifts of the Holy Ghost, as stated above (q. 68, Aa. 1,4). But they are numbered amongst the gratuitous graces, inasmuch as they imply such a fullness of knowledge and wisdom that a man may not merely think aright of Divine things, but may instruct others and overpower adversaries. Hence it is significant that it is the “word” of wisdom and the “word” of knowledge that are placed in the gratuitous graces, since, as Augustine says (De Trin. xiv, 1), “It is one thing merely to know what a man must believe in order to reach everlasting life, and another thing to know how this may benefit the godly and may be defended against the ungodly.”

Whether gratuitous grace is nobler than sanctifying grace?

Ia IIae q. 111 a. 5

Objection 1. It would seem that gratuitous grace is nobler than sanctifying grace. For “the people’s good is better than the individual good,” as the Philosopher says (Ethic. i, 2). Now sanctifying grace is ordained to the good of one man alone, whereas gratuitous grace is ordained to the common good of the whole Church, as stated above (Aa. 1,4). Hence gratuitous grace is nobler than sanctifying grace.

Objection 2. Further, it is a greater power that is able to act upon another, than that which is confined to itself, even as greater is the brightness of the body that can illuminate other bodies, than of that which can only shine but cannot illuminate; and hence the Philosopher says (Ethic. v, 1) “that justice is the most excellent of the virtues,” since by it a man bears himself rightly towards others. But by sanctifying grace a man is perfected only in himself; whereas by gratuitous grace a man works for the perfection of others. Hence gratuitous grace is nobler than sanctifying grace.

Objection 3. Further, what is proper to the best is nobler than what is common to all; thus to reason, which is proper to man is nobler than to feel, which is common to all animals. Now sanctifying grace is common to all members of the Church, but gratuitous grace is the proper gift of the more exalted members of the Church. Hence gratuitous grace is nobler than sanctifying grace.

On the contrary, The Apostle (1 Cor. 12:31), having enumerated the gratuitous graces adds: “And I shew unto you yet a more excellent way”; and as the sequel proves he is speaking of charity, which pertains to sanctifying grace. Hence sanctifying grace is more noble than gratuitous grace.

I answer that, The higher the good to which a virtue is ordained, the more excellent is the virtue. Now the end is always greater than the means. But sanctifying grace ordains a man immediately to a union with his last end, whereas gratuitous grace ordains a man to what is preparatory to the end; i.e. by prophecy and miracles

and so forth, men are induced to unite themselves to their last end. And hence sanctifying grace is nobler than gratuitous grace.

Reply to Objection 1. As the Philosopher says (Metaph. xii, text. 52), a multitude, as an army, has a double good; the first is in the multitude itself, viz. the order of the army; the second is separate from the multitude, viz. the good of the leader—and this is better good, since the other is ordained to it. Now gratuitous grace is ordained to the common good of the Church, which is ecclesiastical order, whereas sanctifying grace is ordained to the separate common good, which is God. Hence sanctifying grace is the nobler.

Reply to Objection 2. If gratuitous grace could cause a man to have sanctifying grace, it would fol-

low that the gratuitous grace was the nobler; even as the brightness of the sun that enlightens is more excellent than that of an object that is lit up. But by gratuitous grace a man cannot cause another to have union with God, which he himself has by sanctifying grace; but he causes certain dispositions towards it. Hence gratuitous grace needs not to be the more excellent, even as in fire, the heat, which manifests its species whereby it produces heat in other things, is not more noble than its substantial form.

Reply to Objection 3. Feeling is ordained to reason, as to an end; and thus, to reason is nobler. But here it is the contrary; for what is proper is ordained to what is common as to an end. Hence there is no comparison.

Objection 1. It would seem that grace is not fittingly divided into sanctifying grace and gratuitous grace. For grace is a gift of God, as is clear from what has been already stated (q. 110, a. 1). But man is not therefore pleasing to God because something is given him by God, but rather on the contrary; since something is freely given by God, because man is pleasing to Him. Hence there is no sanctifying grace.

Objection 2. Further, whatever is not given on account of preceding merits is given gratis. Now even natural good is given to man without preceding merit, since nature is presupposed to merit. Therefore nature itself is given gratuitously by God. But nature is condivided with grace. Therefore to be gratuitously given is not fittingly set down as a difference of grace, since it is found outside the genus of grace.

Objection 3. Further, members of a division are mutually opposed. But even sanctifying grace, whereby we are justified, is given to us gratuitously, according to Rom. 3:24: "Being justified freely [gratis] by His grace." Hence sanctifying grace ought not to be divided against gratuitous grace.

On the contrary, The Apostle attributes both to grace, viz. to sanctify and to be gratuitously given. For with regard to the first he says (Eph. 1:6): "He hath graced us in His beloved son." And with regard to the second (Rom. 2:6): "And if by grace, it is not now by works, otherwise grace is no more grace." Therefore grace can be distinguished by its having one only or both.

I answer that, As the Apostle says (Rom. 13:1), "those things that are of God are well ordered [Vulg.: 'those that are, are ordained by God]." Now the order of things consists in this, that things are led to God by other things, as Dionysius says (Coel. Hier. iv). And hence since grace is ordained to lead men to God, this takes place in a certain order, so that some are led to God by others.

And thus there is a twofold grace: one whereby man himself is united to God, and this is called "sanctifying grace"; the other is that whereby one man cooper-

ates with another in leading him to God, and this gift is called "gratuitous grace," since it is bestowed on a man beyond the capability of nature, and beyond the merit of the person. But whereas it is bestowed on a man, not to justify him, but rather that he may cooperate in the justification of another, it is not called sanctifying grace. And it is of this that the Apostle says (1 Cor. 12:7): "And the manifestation of the Spirit is given to every man unto utility," i.e. of others.

Reply to Objection 1. Grace is said to make pleasing, not efficiently but formally, i.e. because thereby a man is justified, and is made worthy to be called pleasing to God, according to Col. 1:21: "He hath made us worthy to be made partakers of the lot of the saints in light."

Reply to Objection 2. Grace, inasmuch as it is gratuitously given, excludes the notion of debt. Now debt may be taken in two ways: first, as arising from merit; and this regards the person whose it is to do meritorious works, according to Rom. 4:4: "Now to him that worketh, the reward is not reckoned according to grace, but according to debt." The second debt regards the condition of nature. Thus we say it is due to a man to have reason, and whatever else belongs to human nature. Yet in neither way is debt taken to mean that God is under an obligation to His creature, but rather that the creature ought to be subject to God, that the Divine ordination may be fulfilled in it, which is that a certain nature should have certain conditions or properties, and that by doing certain works it should attain to something further. And hence natural endowments are not a debt in the first sense but in the second. Hence they especially merit the name of grace.

Reply to Objection 3. Sanctifying grace adds to the notion of gratuitous grace something pertaining to the nature of grace, since it makes man pleasing to God. And hence gratuitous grace which does not do this keeps the common name, as happens in many other cases; and thus the two parts of the division are opposed as sanctifying and non-sanctifying grace.

Objection 1. It would seem that grace is not fittingly divided into operating and cooperating grace. For grace is an accident, as stated above (q. 110, a. 2). Now no accident can act upon its subject. Therefore no grace can be called operating.

Objection 2. Further, if grace operates anything in us it assuredly brings about justification. But not only grace works this. For Augustine says, on Jn. 14:12, “the works that I do he also shall do,” says (Serm. clxix): “He Who created thee without thyself, will not justify thee without thyself.” Therefore no grace ought to be called simply operating.

Objection 3. Further, to cooperate seems to pertain to the inferior agent, and not to the principal agent. But grace works in us more than free-will, according to Rom. 9:16: “It is not of him that willeth, nor of him that runneth, but of God that sheweth mercy.” Therefore no grace ought to be called cooperating.

Objection 4. Further, division ought to rest on opposition. But to operate and to cooperate are not opposed; for one and the same thing can both operate and cooperate. Therefore grace is not fittingly divided into operating and cooperating.

On the contrary, Augustine says (De Gratia et Lib. Arbit. xvii): “God by cooperating with us, perfects what He began by operating in us, since He who perfects by cooperation with such as are willing, beings by operating that they may will.” But the operations of God whereby He moves us to good pertain to grace. Therefore grace is fittingly divided into operating and cooperating.

I answer that, As stated above (q. 110, a. 2) grace may be taken in two ways; first, as a Divine help, whereby God moves us to will and to act; secondly, as a habitual gift divinely bestowed on us.

Now in both these ways grace is fittingly divided into operating and cooperating. For the operation of an effect is not attributed to the thing moved but to the mover. Hence in that effect in which our mind is moved and does not move, but in which God is the sole mover, the operation is attributed to God, and it is with reference to this that we speak of “operating grace.” But in that effect in which our mind both moves and is moved, the operation is not only attributed to God, but also to the soul; and it is with reference to this that we speak of “cooperating grace.” Now there is a double act in

us. First, there is the interior act of the will, and with regard to this act the will is a thing moved, and God is the mover; and especially when the will, which hitherto willed evil, begins to will good. And hence, inasmuch as God moves the human mind to this act, we speak of operating grace. But there is another, exterior act; and since it is commanded by the will, as was shown above (q. 17, a. 9) the operation of this act is attributed to the will. And because God assists us in this act, both by strengthening our will interiorly so as to attain to the act, and by granting outwardly the capability of operating, it is with respect to this that we speak of cooperating grace. Hence after the aforesaid words Augustine subjoins: “He operates that we may will; and when we will, He cooperates that we may perfect.” And thus if grace is taken for God’s gratuitous motion whereby He moves us to meritorious good, it is fittingly divided into operating and cooperating grace.

But if grace is taken for the habitual gift, then again there is a double effect of grace, even as of every other form; the first of which is “being,” and the second, “operation”; thus the work of heat is to make its subject hot, and to give heat outwardly. And thus habitual grace, inasmuch as it heals and justifies the soul, or makes it pleasing to God, is called operating grace; but inasmuch as it is the principle of meritorious works, which spring from the free-will, it is called cooperating grace.

Reply to Objection 1. Inasmuch as grace is a certain accidental quality, it does not act upon the soul efficiently, but formally, as whiteness makes a surface white.

Reply to Objection 2. God does not justify us without ourselves, because whilst we are being justified we consent to God’s justification [justitiae] by a movement of our free-will. Nevertheless this movement is not the cause of grace, but the effect; hence the whole operation pertains to grace.

Reply to Objection 3. One thing is said to cooperate with another not merely when it is a secondary agent under a principal agent, but when it helps to the end intended. Now man is helped by God to will the good, through the means of operating grace. And hence, the end being already intended, grace cooperates with us.

Reply to Objection 4. Operating and cooperating grace are the same grace; but are distinguished by their different effects, as is plain from what has been said.

Objection 1. It would seem that grace is not fittingly divided into prevenient and subsequent. For grace is an effect of the Divine love. But God's love is never subsequent, but always prevenient, according to 1 Jn. 4:10: "Not as though we had loved God, but because He hath first loved us." Therefore grace ought not to be divided into prevenient and subsequent.

Objection 2. Further, there is but one sanctifying grace in man, since it is sufficient, according to 2 Cor. 12:9: "My grace is sufficient for thee." But the same thing cannot be before and after. Therefore grace is not fittingly divided into prevenient and subsequent.

Objection 3. Further, grace is known by its effects. Now there are an infinite number of effects—one preceding another. Hence it with regard to these, grace must be divided into prevenient and subsequent, it would seem that there are infinite species of grace. Now no art takes note of the infinite in number. Hence grace is not fittingly divided into prevenient and subsequent.

On the contrary, God's grace is the outcome of His mercy. Now both are said in Ps. 58:11: "His mercy shall prevent me," and again, Ps. 22:6: "Thy mercy will follow me." Therefore grace is fittingly divided into prevenient and subsequent.

I answer that, As grace is divided into operating and cooperating, with regard to its diverse effects, so also is it divided into prevenient and subsequent, howsoever we consider grace. Now there are five effects of grace in us: of these, the first is, to heal the soul; the second, to desire good; the third, to carry into effect the good proposed; the fourth, to persevere in good; the

fifth, to reach glory. And hence grace, inasmuch as it causes the first effect in us, is called prevenient with respect to the second, and inasmuch as it causes the second, it is called subsequent with respect to the first effect. And as one effect is posterior to this effect, and prior to that, so may grace be called prevenient and subsequent on account of the same effect viewed relatively to divers others. And this is what Augustine says (*De Natura et Gratia* xxxi): "It is prevenient, inasmuch as it heals, and subsequent, inasmuch as, being healed, we are strengthened; it is prevenient, inasmuch as we are called, and subsequent, inasmuch as we are glorified."

Reply to Objection 1. God's love signifies something eternal; and hence can never be called anything but prevenient. But grace signifies a temporal effect, which can precede and follow another; and thus grace may be both prevenient and subsequent.

Reply to Objection 2. The division into prevenient and subsequent grace does not divide grace in its essence, but only in its effects, as was already said of operating and cooperating grace. For subsequent grace, inasmuch as it pertains to glory, is not numerically distinct from prevenient grace whereby we are at present justified. For even as the charity of the earth is not voided in heaven, so must the same be said of the light of grace, since the notion of neither implies imperfection.

Reply to Objection 3. Although the effects of grace may be infinite in number, even as human acts are infinite, nevertheless all reduced to some of a determinate species, and moreover all coincide in this—that one precedes another.

Objection 1. It would seem that gratuitous grace is not rightly divided by the Apostle. For every gift vouchsafed to us by God, may be called a gratuitous grace. Now there are an infinite number of gifts freely bestowed on us by God as regards both the good of the soul and the good of the body—and yet they do not make us pleasing to God. Hence gratuitous graces cannot be contained under any certain division.

Objection 2. Further, gratuitous grace is distinguished from sanctifying grace. But faith pertains to sanctifying grace, since we are justified by it, according to Rom. 5:1: “Being justified therefore by faith.” Hence it is not right to place faith amongst the gratuitous graces, especially since the other virtues are not so placed, as hope and charity.

Objection 3. Further, the operation of healing, and speaking divers tongues are miracles. Again, the interpretation of speeches pertains either to wisdom or to knowledge, according to Dan. 1:17: “And to these children God gave knowledge and understanding in every book and wisdom.” Hence it is not correct to divide the grace of healing and kinds of tongues against the working of miracles; and the interpretation of speeches against the word of wisdom and knowledge.

Objection 4. Further, as wisdom and knowledge are gifts of the Holy Ghost, so also are understanding, counsel, piety, fortitude, and fear, as stated above (q. 68, a. 4). Therefore these also ought to be placed amongst the gratuitous gifts.

On the contrary, The Apostle says (1 Cor. 12:8,9,10): “To one indeed by the Spirit is given the word of wisdom; and to another the word of knowledge, according to the same Spirit; to another, the working of miracles; to another, prophecy; to another, the discerning of spirits; to another divers kinds of tongues; to another interpretation of speeches.”

I answer that, As was said above (a. 1), gratuitous grace is ordained to this, viz. that a man may help another to be led to God. Now no man can help in this by moving interiorly (for this belongs to God alone), but only exteriorly by teaching or persuading. Hence gratuitous grace embraces whatever a man needs in order to instruct another in Divine things which are above reason. Now for this three things are required: first, a man must possess the fullness of knowledge of Divine things, so as to be capable of teaching others. Secondly, he must be able to confirm or prove what he says, otherwise his words would have no weight. Thirdly, he must be capable of fittingly presenting to his hearers what he knows.

Now as regards the first, three things are necessary, as may be seen in human teaching. For whoever would teach another in any science must first be certain of the principles of the science, and with regard to this there is “faith,” which is certitude of invisible things, the principles of Catholic doctrine. Secondly, it behooves the

teacher to know the principal conclusions of the science, and hence we have the word of “wisdom,” which is the knowledge of Divine things. Thirdly, he ought to abound with examples and a knowledge of effects, whereby at times he needs to manifest causes; and thus we have the word of “knowledge,” which is the knowledge of human things, since “the invisible things of Him... are clearly seen, being understood by the things that are made” (Rom. 1:20).

Now the confirmation of such things as are within reason rests upon arguments; but the confirmation of what is above reason rests on what is proper to the Divine power, and this in two ways: first, when the teacher of sacred doctrine does what God alone can do, in miraculous deeds, whether with respect to bodily health—and thus there is the “grace of healing,” or merely for the purpose of manifesting the Divine power; for instance, that the sun should stand still or darken, or that the sea should be divided—and thus there is the “working of miracles.” Secondly, when he can manifest what God alone can know, and these are either future contingents—and thus there is “prophecy,” or also the secrets of hearts—and thus there is the “discerning of spirits.”

But the capability of speaking can regard either the idiom in which a person can be understood, and thus there is “kinds of tongues”; or it can regard the sense of what is said, and thus there is the “interpretation of speeches.”

Reply to Objection 1. As stated above (a. 1), not all the benefits divinely conferred upon us are called gratuitous graces, but only those that surpass the power of nature—e.g. that a fisherman should be replete with the word of wisdom and of knowledge and the like; and such as these are here set down as gratuitous graces.

Reply to Objection 2. Faith is enumerated here under the gratuitous graces, not as a virtue justifying man in himself, but as implying a super-eminent certitude of faith, whereby a man is fitted for instructing others concerning such things as belong to the faith. With regard to hope and charity, they belong to the appetitive power, according as man is ordained thereby to God.

Reply to Objection 3. The grace of healing is distinguished from the general working of miracles because it has a special reason for inducing one to the faith, since a man is all the more ready to believe when he has received the gift of bodily health through the virtue of faith. So, too, to speak with divers tongues and to interpret speeches have special efficacy in bestowing faith. Hence they are set down as special gratuitous graces.

Reply to Objection 4. Wisdom and knowledge are not numbered among the gratuitous graces in the same way as they are reckoned among the gifts of the Holy Ghost, i.e. inasmuch as man’s mind is rendered easily movable by the Holy Ghost to the things of wisdom and

knowledge; for thus they are gifts of the Holy Ghost, as stated above (q. 68, Aa. 1,4). But they are numbered amongst the gratuitous graces, inasmuch as they imply such a fullness of knowledge and wisdom that a man may not merely think aright of Divine things, but may instruct others and overpower adversaries. Hence it is significant that it is the “word” of wisdom and the

“word” of knowledge that are placed in the gratuitous graces, since, as Augustine says (De Trin. xiv, 1), “It is one thing merely to know what a man must believe in order to reach everlasting life, and another thing to know how this may benefit the godly and may be defended against the ungodly.”

Objection 1. It would seem that gratuitous grace is nobler than sanctifying grace. For “the people’s good is better than the individual good,” as the Philosopher says (Ethic. i, 2). Now sanctifying grace is ordained to the good of one man alone, whereas gratuitous grace is ordained to the common good of the whole Church, as stated above (Aa. 1,4). Hence gratuitous grace is nobler than sanctifying grace.

Objection 2. Further, it is a greater power that is able to act upon another, than that which is confined to itself, even as greater is the brightness of the body that can illuminate other bodies, than of that which can only shine but cannot illuminate; and hence the Philosopher says (Ethic. v, 1) “that justice is the most excellent of the virtues,” since by it a man bears himself rightly towards others. But by sanctifying grace a man is perfected only in himself; whereas by gratuitous grace a man works for the perfection of others. Hence gratuitous grace is nobler than sanctifying grace.

Objection 3. Further, what is proper to the best is nobler than what is common to all; thus to reason, which is proper to man is nobler than to feel, which is common to all animals. Now sanctifying grace is common to all members of the Church, but gratuitous grace is the proper gift of the more exalted members of the Church. Hence gratuitous grace is nobler than sanctifying grace.

On the contrary, The Apostle (1 Cor. 12:31), having enumerated the gratuitous graces adds: “And I shew unto you yet a more excellent way”; and as the sequel proves he is speaking of charity, which pertains to sanctifying grace. Hence sanctifying grace is more noble than gratuitous grace.

I answer that, The higher the good to which a virtue is ordained, the more excellent is the virtue. Now the

end is always greater than the means. But sanctifying grace ordains a man immediately to a union with his last end, whereas gratuitous grace ordains a man to what is preparatory to the end; i.e. by prophecy and miracles and so forth, men are induced to unite themselves to their last end. And hence sanctifying grace is nobler than gratuitous grace.

Reply to Objection 1. As the Philosopher says (Metaph. xii, text. 52), a multitude, as an army, has a double good; the first is in the multitude itself, viz. the order of the army; the second is separate from the multitude, viz. the good of the leader—and this is better good, since the other is ordained to it. Now gratuitous grace is ordained to the common good of the Church, which is ecclesiastical order, whereas sanctifying grace is ordained to the separate common good, which is God. Hence sanctifying grace is the nobler.

Reply to Objection 2. If gratuitous grace could cause a man to have sanctifying grace, it would follow that the gratuitous grace was the nobler; even as the brightness of the sun that enlightens is more excellent than that of an object that is lit up. But by gratuitous grace a man cannot cause another to have union with God, which he himself has by sanctifying grace; but he causes certain dispositions towards it. Hence gratuitous grace needs not to be the more excellent, even as in fire, the heat, which manifests its species whereby it produces heat in other things, is not more noble than its substantial form.

Reply to Objection 3. Feeling is ordained to reason, as to an end; and thus, to reason is nobler. But here it is the contrary; for what is proper is ordained to what is common as to an end. Hence there is no comparison.

FIRST PART OF THE SECOND PART, QUESTION 112

Of the Cause of Grace (In Five Articles)

We must now consider the cause of grace; and under this head there are five points of inquiry:

- (1) Whether God alone is the efficient cause of grace?
- (2) Whether any disposition towards grace is needed on the part of the recipient, by an act of free-will?
- (3) Whether such a disposition can make grace follow of necessity?
- (4) Whether grace is equal in all?
- (5) Whether anyone may know that he has grace?

Whether God alone is the cause of grace?

Ia IIae q. 112 a. 1

Objection 1. It would seem that God alone is not the cause of grace. For it is written (Jn. 1:17): "Grace and truth came by Jesus Christ." Now, by the name of Jesus Christ is understood not merely the Divine Nature assuming, but the created nature assumed. Therefore a creature may be the cause of grace.

Objection 2. Further, there is this difference between the sacraments of the New Law and those of the Old, that the sacraments of the New Law cause grace, whereas the sacraments of the Old Law merely signify it. Now the sacraments of the New Law are certain visible elements. Therefore God is not the only cause of grace.

Objection 3. Further, according to Dionysius (Coel. Hier. iii, iv, vii, viii), "Angels cleanse, enlighten, and perfect both lesser angels and men." Now the rational creature is cleansed, enlightened, and perfected by grace. Therefore God is not the only cause of grace.

On the contrary, It is written (Ps. 83:12): "The Lord will give grace and glory."

I answer that, Nothing can act beyond its species, since the cause must always be more powerful than its effect. Now the gift of grace surpasses every capability of created nature, since it is nothing short of a partaking of the Divine Nature, which exceeds every other nature. And thus it is impossible that any creature should cause grace. For it is as necessary that God alone should deify,

bestowing a partaking of the Divine Nature by a participated likeness, as it is impossible that anything save fire should enkindle.

Reply to Objection 1. Christ's humanity is an "organ of His Godhead," as Damascene says (De Fide Orth. iii, 19). Now an instrument does not bring forth the action of the principal agent by its own power, but in virtue of the principal agent. Hence Christ's humanity does not cause grace by its own power, but by virtue of the Divine Nature joined to it, whereby the actions of Christ's humanity are saving actions.

Reply to Objection 2. As in the person of Christ the humanity causes our salvation by grace, the Divine power being the principal agent, so likewise in the sacraments of the New Law, which are derived from Christ, grace is instrumentally caused by the sacraments, and principally by the power of the Holy Ghost working in the sacraments, according to Jn. 3:5: "Unless a man be born again of water and the Holy Ghost he cannot enter into the kingdom of God."

Reply to Objection 3. Angels cleanse, enlighten, and perfect angels or men, by instruction, and not by justifying them through grace. Hence Dionysius says (Coel. Hier. vii) that "this cleansing and enlightenment and perfecting is nothing else than the assumption of Divine knowledge."

Whether any preparation and disposition for grace is required on man's part?

Ia IIae q. 112 a. 2

Objection 1. It would seem that no preparation or disposition for grace is required on man's part, since, as the Apostle says (Rom. 4:4), "To him that worketh, the reward is not reckoned according to grace, but according to debt." Now a man's preparation by free-will can only be through some operation. Hence it would do away with the notion of grace.

Objection 2. Further, whoever is going on sinning, is not preparing himself to have grace. But to some who are going on sinning grace is given, as is clear in the case of Paul, who received grace whilst he was "breath-

ing our threatenings and slaughter against the disciples of the Lord" (Act 9:1). Hence no preparation for grace is required on man's part.

Objection 3. Further, an agent of infinite power needs no disposition in matter, since it does not even require matter, as appears in creation, to which grace is compared, which is called "a new creature" (Gal. 6:15). But only God, Who has infinite power, causes grace, as stated above (a. 1). Hence no preparation is required on man's part to obtain grace.

On the contrary, It is written (Amos 4:12): "Be

prepared to meet thy God, O Israel,” and (1 Kings 7:3): “Prepare your hearts unto the Lord.”

I answer that, As stated above (q. 111, a. 2), grace is taken in two ways: first, as a habitual gift of God. Secondly, as a help from God, Who moves the soul to good. Now taking grace in the first sense, a certain preparation of grace is required for it, since a form can only be in disposed matter. But if we speak of grace as it signifies a help from God to move us to good, no preparation is required on man’s part, that, as it were, anticipates the Divine help, but rather, every preparation in man must be by the help of God moving the soul to good. And thus even the good movement of the free-will, whereby anyone is prepared for receiving the gift of grace is an act of the free-will moved by God. And thus man is said to prepare himself, according to Prov. 16:1: “It is the part of man to prepare the soul”; yet it is principally from God, Who moves the free-will. Hence it is said that man’s will is prepared by God, and that man’s steps are guided by God.

Reply to Objection 1. A certain preparation of man for grace is simultaneous with the infusion of grace; and this operation is meritorious, not indeed of grace, which is already possessed—but of glory which is not yet possessed. But there is another imperfect preparation, which sometimes precedes the gift of sanctifying grace, and yet it is from God’s motion. But it does not

suffice for merit, since man is not yet justified by grace, and merit can only arise from grace, as will be seen further on (q. 114, a. 2).

Reply to Objection 2. Since a man cannot prepare himself for grace unless God prevent and move him to good, it is of no account whether anyone arrive at perfect preparation instantaneously, or step by step. For it is written (Ecclus. 11:23): “It is easy in the eyes of God on a sudden to make the poor man rich.” Now it sometimes happens that God moves a man to good, but not perfect good, and this preparation precedes grace. But He sometimes moves him suddenly and perfectly to good, and man receives grace suddenly, according to Jn. 6:45: “Every one that hath heard of the Father, and hath learned, cometh to Me.” And thus it happened to Paul, since, suddenly when he was in the midst of sin, his heart was perfectly moved by God to hear, to learn, to come; and hence he received grace suddenly.

Reply to Objection 3. An agent of infinite power needs no matter or disposition of matter, brought about by the action of something else; and yet, looking to the condition of the thing caused, it must cause, in the thing caused, both the matter and the due disposition for the form. So likewise, when God infuses grace into a soul, no preparation is required which He Himself does not bring about.

Whether grace is necessarily given to whoever prepares himself for it, or to whoever does what he can? Ia IIae q. 112 a. 3

Objection 1. It would seem that grace is necessarily given to whoever prepares himself for grace, or to whoever does what he can, because, on Rom. 5:1, “Being justified. . . by faith, let us have peace,” etc. the gloss says: “God welcomes whoever flies to Him, otherwise there would be injustice with Him.” But it is impossible for injustice to be with God. Therefore it is impossible for God not to welcome whoever flies to Him. Hence he receives grace of necessity.

Objection 2. Further, Anselm says (De Casu Diaboli. iii) that the reason why God does not bestow grace on the devil, is that he did not wish, nor was he prepared, to receive it. But if the cause be removed, the effect must needs be removed also. Therefore, if anyone is willing to receive grace it is bestowed on them of necessity.

Objection 3. Further, good is diffusive of itself, as appears from Dionysius (Div. Nom. iv). Now the good of grace is better than the good of nature. Hence, since natural forms necessarily come to disposed matter, much more does it seem that grace is necessarily bestowed on whoever prepares himself for grace.

On the contrary, Man is compared to God as clay to the potter, according to Jer. 18:6: “As clay is in the hand of the potter, so are you in My hand.” But however much the clay is prepared, it does not necessarily receive its shape from the potter. Hence, however much

a man prepares himself, he does not necessarily receive grace from God.

I answer that, As stated above (a. 2), man’s preparation for grace is from God, as Mover, and from the free-will, as moved. Hence the preparation may be looked at in two ways: first, as it is from free-will, and thus there is no necessity that it should obtain grace, since the gift of grace exceeds every preparation of human power. But it may be considered, secondly, as it is from God the Mover, and thus it has a necessity—not indeed of coercion, but of infallibility—as regards what it is ordained to by God, since God’s intention cannot fail, according to the saying of Augustine in his book on the Predestination of the Saints (De Dono Persev. xiv) that “by God’s good gifts whoever is liberated, is most certainly liberated.” Hence if God intends, while moving, that the one whose heart He moves should attain to grace, he will infallibly attain to it, according to Jn. 6:45: “Every one that hath heard of the Father, and hath learned, cometh to Me.”

Reply to Objection 1. This gloss is speaking of such as fly to God by a meritorious act of their free-will, already “informed” with grace; for if they did not receive grace, it would be against the justice which He Himself established. Or if it refers to the movement of free-will before grace, it is speaking in the sense that man’s flight to God is by a Divine motion, which ought

not, in justice, to fail.

Reply to Objection 2. The first cause of the defect of grace is on our part; but the first cause of the bestowal of grace is on God's according to Osee 13:9: "Destruction is thy own, O Israel; thy help is only in Me."

Reply to Objection 3. Even in natural things, the form does not necessarily ensue the disposition of the matter, except by the power of the agent that causes the disposition.

Whether grace is greater in one than in another?

Ia IIae q. 112 a. 4

Objection 1. It would seem that grace is not greater in one than in another. For grace is caused in us by the Divine love, as stated above (q. 110, a. 1). Now it is written (Wis. 6:8): "He made the little and the great and He hath equally care of all." Therefore all obtain grace from Him equally.

Objection 2. Further, whatever is the greatest possible, cannot be more or less. But grace is the greatest possible, since it joins us with our last end. Therefore there is no greater or less in it. Hence it is not greater in one than in another.

Objection 3. Further, grace is the soul's life, as stated above (q. 110, a. 1, ad 2). But there is no greater or less in life. Hence, neither is there in grace.

On the contrary, It is written (Eph. 4:7): "But to every one of us is given grace according to the measure of the giving of Christ." Now what is given in measure, is not given to all equally. Hence all have not an equal grace.

I answer that, As stated above (q. 52, Aa. 1,2; q. 56, Aa. 1,2), habits can have a double magnitude: one, as regards the end or object, as when a virtue is said to be more noble through being ordained to a greater good; the other on the part of the subject, which more or less participates in the habit inhering to it.

Now as regards the first magnitude, sanctifying grace cannot be greater or less, since, of its nature, grace joins man to the Highest Good, which is God. But as regards the subject, grace can receive more or less, inasmuch as one may be more perfectly enlightened by grace than another. And a certain reason for this is on the part of him who prepares himself for grace; since he who is better prepared for grace, receives more grace.

Yet it is not here that we must seek the first cause of this diversity, since man prepares himself, only inasmuch as his free-will is prepared by God. Hence the first cause of this diversity is to be sought on the part of the God, Who dispenses His gifts of grace variously, in order that the beauty and perfection of the Church may result from these various degree; even as He instituted the various conditions of things, that the universe might be perfect. Hence after the Apostle had said (Eph. 4:7): "To every one of us is given grace according to the measure of the giving of Christ," having enumerated the various graces, he adds (Eph. 4:12): "For the perfecting of the saints... for the edifying of the body of Christ."

Reply to Objection 1. The Divine care may be looked at in two ways: first, as regards the Divine act, which is simple and uniform; and thus His care looks equally to all, since by one simple act He administers great things and little. But, "secondly," it may be considered in those things which come to be considered by the Divine care; and thus, inequality is found, inasmuch as God by His care provides greater gifts to some, and lesser gifts for others.

Reply to Objection 2. This objection is based on the first kind of magnitude of grace; since grace cannot be greater by ordaining to a greater good, but inasmuch as it more or less ordains to a greater or less participation of the same good. For there may be diversity of intensity and remissness, both in grace and in final glory as regards the subjects' participation.

Reply to Objection 3. Natural life pertains to man's substance, and hence cannot be more or less; but man partakes of the life of grace accidentally, and hence man may possess it more or less.

Whether man can know that he has grace?

Ia IIae q. 112 a. 5

Objection 1. It would seem that man can know that he has grace. For grace by its physical reality is in the soul. Now the soul has most certain knowledge of those things that are in it by their physical reality, as appears from Augustine (Gen. ad lit. xii, 31). Hence grace may be known most certainly by one who has grace.

Objection 2. Further, as knowledge is a gift of God, so is grace. But whoever receives knowledge from God, knows that he has knowledge, according to Wis. 7:17: The Lord "hath given me the true knowledge of the things that are." Hence, with equal reason, whoever receives grace from God, knows that he has grace.

Objection 3. Further, light is more knowable than

darkness, since, according to the Apostle (Eph. 5:13), "all that is made manifest is light." Now sin, which is spiritual darkness, may be known with certainty by one that is in sin. Much more, therefore, may grace, which is spiritual light, be known.

Objection 4. Further, the Apostle says (1 Cor. 2:12): "Now we have received not the Spirit of this world, but the Spirit that is of God; that we may know the things that are given us from God." Now grace is God's first gift. Hence, the man who receives grace by the Holy Spirit, by the same Holy Spirit knows the grace given to him.

Objection 5. Further, it was said by the Lord to

Abraham (Gn. 22:12): “Now I know that thou fearest God,” i.e. “I have made thee know.” Now He is speaking there of chaste fear, which is not apart from grace. Hence a man may know that he has grace.

On the contrary, It is written (Eccles. 9:1): “Man knoweth not whether he be worthy of love or hatred.” Now sanctifying grace maketh a man worthy of God’s love. Therefore no one can know whether he has sanctifying grace.

I answer that, There are three ways of knowing a thing: first, by revelation, and thus anyone may know that he has grace, for God by a special privilege reveals this at times to some, in order that the joy of safety may begin in them even in this life, and that they may carry on toilsome works with greater trust and greater energy, and may bear the evils of this present life, as when it was said to Paul (2 Cor. 12:9): “My grace is sufficient for thee.”

Secondly, a man may, of himself, know something, and with certainty; and in this way no one can know that he has grace. For certitude about a thing can only be had when we may judge of it by its proper principle. Thus it is by undemonstrable universal principles that certitude is obtained concerning demonstrative conclusions. Now no one can know he has the knowledge of a conclusion if he does not know its principle. But the principle of grace and its object is God, Who by reason of His very excellence is unknown to us, according to Job 36:26: “Behold God is great, exceeding our knowledge.” And hence His presence in us and His absence cannot be known with certainty, according to Job 9:11: “If He come to me, I shall not see Him; if He depart I shall not understand.” And hence man cannot judge with certainty that he has grace, according to 1 Cor. 4:3,4: “But neither do I judge my own self... but He that judgeth me is the Lord.”

Thirdly, things are known conjecturally by signs; and thus anyone may know he has grace, when he is conscious of delighting in God, and of despising worldly things, and inasmuch as a man is not conscious of any mortal sin. And thus it is written (Apoc. 2:17): “To him that overcometh I will give the hidden manna... which no man knoweth, but he that receiveth

it,” because whoever receives it knows, by experiencing a certain sweetness, which he who does not receive it, does not experience. Yet this knowledge is imperfect; hence the Apostle says (1 Cor. 4:4): “I am not conscious to myself of anything, yet am I not hereby justified,” since, according to Ps. 18:13: “Who can understand sins? From my secret ones cleanse me, O Lord, and from those of others spare Thy servant.”

Reply to Objection 1. Those things which are in the soul by their physical reality, are known through experimental knowledge; in so far as through acts man has experience of their inward principles: thus when we wish, we perceive that we have a will; and when we exercise the functions of life, we observe that there is life in us.

Reply to Objection 2. It is an essential condition of knowledge that a man should have certitude of the objects of knowledge; and again, it is an essential condition of faith that a man should be certain of the things of faith, and this, because certitude belongs to the perfection of the intellect, wherein these gifts exist. Hence, whoever has knowledge or faith is certain that he has them. But it is otherwise with grace and charity and such like, which perfect the appetitive faculty.

Reply to Objection 3. Sin has for its principal object commutable good, which is known to us. But the object or end of grace is unknown to us on account of the greatness of its light, according to 1 Tim. 6:16: “Who... inhabiteth light inaccessible.”

Reply to Objection 4. The Apostle is here speaking of the gifts of glory, which have been given to us in hope, and these we know most certainly by faith, although we do not know for certain that we have grace to enable us to merit them. Or it may be said that he is speaking of the privileged knowledge, which comes of revelation. Hence he adds (1 Cor. 2:10): “But to us God hath revealed them by His Spirit.”

Reply to Objection 5. What was said to Abraham may refer to experimental knowledge which springs from deeds of which we are cognizant. For in the deed that Abraham had just wrought, he could know experimentally that he had the fear of God. Or it may refer to a revelation.

Objection 1. It would seem that God alone is not the cause of grace. For it is written (Jn. 1:17): “Grace and truth came by Jesus Christ.” Now, by the name of Jesus Christ is understood not merely the Divine Nature assuming, but the created nature assumed. Therefore a creature may be the cause of grace.

Objection 2. Further, there is this difference between the sacraments of the New Law and those of the Old, that the sacraments of the New Law cause grace, whereas the sacraments of the Old Law merely signify it. Now the sacraments of the New Law are certain visible elements. Therefore God is not the only cause of grace.

Objection 3. Further, according to Dionysius (Coel. Hier. iii, iv, vii, viii), “Angels cleanse, enlighten, and perfect both lesser angels and men.” Now the rational creature is cleansed, enlightened, and perfected by grace. Therefore God is not the only cause of grace.

On the contrary, It is written (Ps. 83:12): “The Lord will give grace and glory.”

I answer that, Nothing can act beyond its species, since the cause must always be more powerful than its effect. Now the gift of grace surpasses every capability of created nature, since it is nothing short of a partaking of the Divine Nature, which exceeds every other nature. And thus it is impossible that any creature should cause grace. For it is as necessary that God alone should deify,

bestowing a partaking of the Divine Nature by a participated likeness, as it is impossible that anything save fire should enkindle.

Reply to Objection 1. Christ’s humanity is an “organ of His Godhead,” as Damascene says (De Fide Orth. iii, 19). Now an instrument does not bring forth the action of the principal agent by its own power, but in virtue of the principal agent. Hence Christ’s humanity does not cause grace by its own power, but by virtue of the Divine Nature joined to it, whereby the actions of Christ’s humanity are saving actions.

Reply to Objection 2. As in the person of Christ the humanity causes our salvation by grace, the Divine power being the principal agent, so likewise in the sacraments of the New Law, which are derived from Christ, grace is instrumentally caused by the sacraments, and principally by the power of the Holy Ghost working in the sacraments, according to Jn. 3:5: “Unless a man be born again of water and the Holy Ghost he cannot enter into the kingdom of God.”

Reply to Objection 3. Angels cleanse, enlighten, and perfect angels or men, by instruction, and not by justifying them through grace. Hence Dionysius says (Coel. Hier. vii) that “this cleansing and enlightenment and perfecting is nothing else than the assumption of Divine knowledge.”

Objection 1. It would seem that no preparation or disposition for grace is required on man's part, since, as the Apostle says (Rom. 4:4), "To him that worketh, the reward is not reckoned according to grace, but according to debt." Now a man's preparation by free-will can only be through some operation. Hence it would do away with the notion of grace.

Objection 2. Further, whoever is going on sinning, is not preparing himself to have grace. But to some who are going on sinning grace is given, as is clear in the case of Paul, who received grace whilst he was "breathing out threatenings and slaughter against the disciples of the Lord" (Act 9:1). Hence no preparation for grace is required on man's part.

Objection 3. Further, an agent of infinite power needs no disposition in matter, since it does not even require matter, as appears in creation, to which grace is compared, which is called "a new creature" (Gal. 6:15). But only God, Who has infinite power, causes grace, as stated above (a. 1). Hence no preparation is required on man's part to obtain grace.

On the contrary, It is written (Amos 4:12): "Be prepared to meet thy God, O Israel," and (1 Kings 7:3): "Prepare your hearts unto the Lord."

I answer that, As stated above (q. 111, a. 2), grace is taken in two ways: first, as a habitual gift of God. Secondly, as a help from God, Who moves the soul to good. Now taking grace in the first sense, a certain preparation of grace is required for it, since a form can only be in disposed matter. But if we speak of grace as it signifies a help from God to move us to good, no preparation is required on man's part, that, as it were, anticipates the Divine help, but rather, every preparation in man must be by the help of God moving the soul to good. And thus even the good movement of the free-will, whereby anyone is prepared for receiving the gift of grace is an act of the free-will moved by God. And thus man is said to prepare himself, according to Prov.

16:1: "It is the part of man to prepare the soul"; yet it is principally from God, Who moves the free-will. Hence it is said that man's will is prepared by God, and that man's steps are guided by God.

Reply to Objection 1. A certain preparation of man for grace is simultaneous with the infusion of grace; and this operation is meritorious, not indeed of grace, which is already possessed—but of glory which is not yet possessed. But there is another imperfect preparation, which sometimes precedes the gift of sanctifying grace, and yet it is from God's motion. But it does not suffice for merit, since man is not yet justified by grace, and merit can only arise from grace, as will be seen further on (q. 114, a. 2).

Reply to Objection 2. Since a man cannot prepare himself for grace unless God prevent and move him to good, it is of no account whether anyone arrive at perfect preparation instantaneously, or step by step. For it is written (Ecclus. 11:23): "It is easy in the eyes of God on a sudden to make the poor man rich." Now it sometimes happens that God moves a man to good, but not perfect good, and this preparation precedes grace. But He sometimes moves him suddenly and perfectly to good, and man receives grace suddenly, according to Jn. 6:45: "Every one that hath heard of the Father, and hath learned, cometh to Me." And thus it happened to Paul, since, suddenly when he was in the midst of sin, his heart was perfectly moved by God to hear, to learn, to come; and hence he received grace suddenly.

Reply to Objection 3. An agent of infinite power needs no matter or disposition of matter, brought about by the action of something else; and yet, looking to the condition of the thing caused, it must cause, in the thing caused, both the matter and the due disposition for the form. So likewise, when God infuses grace into a soul, no preparation is required which He Himself does not bring about.

Objection 1. It would seem that grace is necessarily given to whoever prepares himself for grace, or to whoever does what he can, because, on Rom. 5:1, “Being justified. . . by faith, let us have peace,” etc. the gloss says: “God welcomes whoever flies to Him, otherwise there would be injustice with Him.” But it is impossible for injustice to be with God. Therefore it is impossible for God not to welcome whoever flies to Him. Hence he receives grace of necessity.

Objection 2. Further, Anselm says (*De Casu Diaboli*. iii) that the reason why God does not bestow grace on the devil, is that he did not wish, nor was he prepared, to receive it. But if the cause be removed, the effect must needs be removed also. Therefore, if anyone is willing to receive grace it is bestowed on them of necessity.

Objection 3. Further, good is diffusive of itself, as appears from Dionysius (*Div. Nom.* iv). Now the good of grace is better than the good of nature. Hence, since natural forms necessarily come to disposed matter, much more does it seem that grace is necessarily bestowed on whoever prepares himself for grace.

On the contrary, Man is compared to God as clay to the potter, according to Jer. 18:6: “As clay is in the hand of the potter, so are you in My hand.” But however much the clay is prepared, it does not necessarily receive its shape from the potter. Hence, however much a man prepares himself, he does not necessarily receive grace from God.

I answer that, As stated above (a. 2), man’s preparation for grace is from God, as Mover, and from the free-will, as moved. Hence the preparation may be

looked at in two ways: first, as it is from free-will, and thus there is no necessity that it should obtain grace, since the gift of grace exceeds every preparation of human power. But it may be considered, secondly, as it is from God the Mover, and thus it has a necessity—not indeed of coercion, but of infallibility—as regards what it is ordained to by God, since God’s intention cannot fail, according to the saying of Augustine in his book on the Predestination of the Saints (*De Dono Persev.* xiv) that “by God’s good gifts whoever is liberated, is most certainly liberated.” Hence if God intends, while moving, that the one whose heart He moves should attain to grace, he will infallibly attain to it, according to Jn. 6:45: “Every one that hath heard of the Father, and hath learned, cometh to Me.”

Reply to Objection 1. This gloss is speaking of such as fly to God by a meritorious act of their free-will, already “informed” with grace; for if they did not receive grace, it would be against the justice which He Himself established. Or if it refers to the movement of free-will before grace, it is speaking in the sense that man’s flight to God is by a Divine motion, which ought not, in justice, to fail.

Reply to Objection 2. The first cause of the defect of grace is on our part; but the first cause of the bestowal of grace is on God’s according to Osee 13:9: “Destruction is thy own, O Israel; thy help is only in Me.”

Reply to Objection 3. Even in natural things, the form does not necessarily ensue the disposition of the matter, except by the power of the agent that causes the disposition.

Objection 1. It would seem that grace is not greater in one than in another. For grace is caused in us by the Divine love, as stated above (q. 110, a. 1). Now it is written (Wis. 6:8): “He made the little and the great and He hath equally care of all.” Therefore all obtain grace from Him equally.

Objection 2. Further, whatever is the greatest possible, cannot be more or less. But grace is the greatest possible, since it joins us with our last end. Therefore there is no greater or less in it. Hence it is not greater in one than in another.

Objection 3. Further, grace is the soul’s life, as stated above (q. 110, a. 1, ad 2). But there is no greater or less in life. Hence, neither is there in grace.

On the contrary, It is written (Eph. 4:7): “But to every one of us is given grace according to the measure of the giving of Christ.” Now what is given in measure, is not given to all equally. Hence all have not an equal grace.

I answer that, As stated above (q. 52, Aa. 1,2; q. 56, Aa. 1,2), habits can have a double magnitude: one, as regards the end or object, as when a virtue is said to be more noble through being ordained to a greater good; the other on the part of the subject, which more or less participates in the habit inhering to it.

Now as regards the first magnitude, sanctifying grace cannot be greater or less, since, of its nature, grace joins man to the Highest Good, which is God. But as regards the subject, grace can receive more or less, inasmuch as one may be more perfectly enlightened by grace than another. And a certain reason for this is on the part of him who prepares himself for grace; since he who is better prepared for grace, receives more grace.

Yet it is not here that we must seek the first cause of this diversity, since man prepares himself, only inasmuch as his free-will is prepared by God. Hence the first cause of this diversity is to be sought on the part of the God, Who dispenses His gifts of grace variously, in order that the beauty and perfection of the Church may result from these various degree; even as He instituted the various conditions of things, that the universe might be perfect. Hence after the Apostle had said (Eph. 4:7): “To every one of us is given grace according to the measure of the giving of Christ,” having enumerated the various graces, he adds (Eph. 4:12): “For the perfecting of the saints. . . for the edifying of the body of Christ.”

Reply to Objection 1. The Divine care may be looked at in two ways: first, as regards the Divine act, which is simple and uniform; and thus His care looks equally to all, since by one simple act He administers great things and little. But, “secondly,” it may be considered in those things which come to be considered by the Divine care; and thus, inequality is found, inasmuch as God by His care provides greater gifts to some, and lesser gifts for others.

Reply to Objection 2. This objection is based on the first kind of magnitude of grace; since grace cannot be greater by ordaining to a greater good, but inasmuch as it more or less ordains to a greater or less participation of the same good. For there may be diversity of intensity and remissness, both in grace and in final glory as regards the subjects’ participation.

Reply to Objection 3. Natural life pertains to man’s substance, and hence cannot be more or less; but man partakes of the life of grace accidentally, and hence man may possess it more or less.

Objection 1. It would seem that man can know that he has grace. For grace by its physical reality is in the soul. Now the soul has most certain knowledge of those things that are in it by their physical reality, as appears from Augustine (Gen. ad lit. xii, 31). Hence grace may be known most certainly by one who has grace.

Objection 2. Further, as knowledge is a gift of God, so is grace. But whoever receives knowledge from God, knows that he has knowledge, according to Wis. 7:17: The Lord "hath given me the true knowledge of the things that are." Hence, with equal reason, whoever receives grace from God, knows that he has grace.

Objection 3. Further, light is more knowable than darkness, since, according to the Apostle (Eph. 5:13), "all that is made manifest is light." Now sin, which is spiritual darkness, may be known with certainty by one that is in sin. Much more, therefore, may grace, which is spiritual light, be known.

Objection 4. Further, the Apostle says (1 Cor. 2:12): "Now we have received not the Spirit of this world, but the Spirit that is of God; that we may know the things that are given us from God." Now grace is God's first gift. Hence, the man who receives grace by the Holy Spirit, by the same Holy Spirit knows the grace given to him.

Objection 5. Further, it was said by the Lord to Abraham (Gn. 22:12): "Now I know that thou fearest God," i.e. "I have made thee know." Now He is speaking there of chaste fear, which is not apart from grace. Hence a man may know that he has grace.

On the contrary, It is written (Eccles. 9:1): "Man knoweth not whether he be worthy of love or hatred." Now sanctifying grace maketh a man worthy of God's love. Therefore no one can know whether he has sanctifying grace.

I answer that, There are three ways of knowing a thing: first, by revelation, and thus anyone may know that he has grace, for God by a special privilege reveals this at times to some, in order that the joy of safety may begin in them even in this life, and that they may carry on toilsome works with greater trust and greater energy, and may bear the evils of this present life, as when it was said to Paul (2 Cor. 12:9): "My grace is sufficient for thee."

Secondly, a man may, of himself, know something, and with certainty; and in this way no one can know that he has grace. For certitude about a thing can only be had when we may judge of it by its proper principle. Thus it is by undemonstrable universal principles that certitude is obtained concerning demonstrative conclusions. Now no one can know he has the knowledge of a conclusion if he does not know its principle. But the principle of grace and its object is God, Who by reason of His very excellence is unknown to us, according to Job 36:26: "Behold God is great, exceeding our knowledge." And hence His presence in us and His ab-

sence cannot be known with certainty, according to Job 9:11: "If He come to me, I shall not see Him; if He depart I shall not understand." And hence man cannot judge with certainty that he has grace, according to 1 Cor. 4:3,4: "But neither do I judge my own self. . . but He that judgeth me is the Lord."

Thirdly, things are known conjecturally by signs; and thus anyone may know he has grace, when he is conscious of delighting in God, and of despising worldly things, and inasmuch as a man is not conscious of any mortal sin. And thus it is written (Apoc. 2:17): "To him that overcometh I will give the hidden manna. . . which no man knoweth, but he that receiveth it," because whoever receives it knows, by experiencing a certain sweetness, which he who does not receive it, does not experience. Yet this knowledge is imperfect; hence the Apostle says (1 Cor. 4:4): "I am not conscious to myself of anything, yet am I not hereby justified," since, according to Ps. 18:13: "Who can understand sins? From my secret ones cleanse me, O Lord, and from those of others spare Thy servant."

Reply to Objection 1. Those things which are in the soul by their physical reality, are known through experimental knowledge; in so far as through acts man has experience of their inward principles: thus when we wish, we perceive that we have a will; and when we exercise the functions of life, we observe that there is life in us.

Reply to Objection 2. It is an essential condition of knowledge that a man should have certitude of the objects of knowledge; and again, it is an essential condition of faith that a man should be certain of the things of faith, and this, because certitude belongs to the perfection of the intellect, wherein these gifts exist. Hence, whoever has knowledge or faith is certain that he has them. But it is otherwise with grace and charity and such like, which perfect the appetitive faculty.

Reply to Objection 3. Sin has for its principal object commutable good, which is known to us. But the object or end of grace is unknown to us on account of the greatness of its light, according to 1 Tim. 6:16: "Who. . . inhabiteth light inaccessible."

Reply to Objection 4. The Apostle is here speaking of the gifts of glory, which have been given to us in hope, and these we know most certainly by faith, although we do not know for certain that we have grace to enable us to merit them. Or it may be said that he is speaking of the privileged knowledge, which comes of revelation. Hence he adds (1 Cor. 2:10): "But to us God hath revealed them by His Spirit."

Reply to Objection 5. What was said to Abraham may refer to experimental knowledge which springs from deeds of which we are cognizant. For in the deed that Abraham had just wrought, he could know experimentally that he had the fear of God. Or it may refer to a revelation.

FIRST PART OF THE SECOND PART, QUESTION 113

Of the Effects of Grace

(In Ten Articles)

We have now to consider the effect of grace; (1) the justification of the ungodly, which is the effect of operating grace; and (2) merit, which is the effect of cooperating grace. Under the first head there are ten points of inquiry:

- (1) What is the justification of the ungodly?
- (2) Whether grace is required for it?
- (3) Whether any movement of the free-will is required?
- (4) Whether a movement of faith is required?
- (5) Whether a movement of the free-will against sin is required?
- (6) Whether the remission of sins is to be reckoned with the foregoing?
- (7) Whether the justification of the ungodly is a work of time or is sudden?
- (8) Of the natural order of the things concurring to justification;
- (9) Whether the justification of the ungodly is God's greatest work?
- (10) Whether the justification of the ungodly is miraculous?

Whether the justification of the ungodly is the remission of sins?

Ia IIae q. 113 a. 1

Objection 1. It would seem that the justification of the ungodly is not the remission of sins. For sin is opposed not only to justice, but to all the other virtues, as stated above (q. 71, a. 1). Now justification signifies a certain movement towards justice. Therefore not even remission of sin is justification, since movement is from one contrary to the other.

Objection 2. Further, everything ought to be named from what is predominant in it, according to De Anima ii, text. 49. Now the remission of sins is brought about chiefly by faith, according to Acts 15:9: "Purifying their hearts by faith"; and by charity, according to Prov. 10:12: "Charity covereth all sins." Therefore the remission of sins ought to be named after faith or charity rather than justice.

Objection 3. Further, the remission of sins seems to be the same as being called, for whoever is called is afar off, and we are afar off from God by sin. But one is called before being justified according to Rom. 8:30: "And whom He called, them He also justified." Therefore justification is not the remission of sins.

On the contrary, On Rom. 8:30, "Whom He called, them He also justified," the gloss says i.e. "by the remission of sins." Therefore the remission of sins is justification.

I answer that, Justification taken passively implies a movement towards heat. But since justice, by its nature, implies a certain rectitude of order, it may be taken in two ways: first, inasmuch as it implies a right order in man's act, and thus justice is placed amongst the virtues—either as particular justice, which directs a man's acts by regulating them in relation to his fellowman—or as legal justice, which directs a man's acts by regulating them in their relation to the common good of society, as appears from Ethic. v, 1.

Secondly, justice is so-called inasmuch as it implies a certain rectitude of order in the interior disposition of

a man, in so far as what is highest in man is subject to God, and the inferior powers of the soul are subject to the superior, i.e. to the reason; and this disposition the Philosopher calls "justice metaphorically speaking" (Ethic. v, 11). Now this justice may be in man in two ways: first, by simple generation, which is from privation to form; and thus justification may belong even to such as are not in sin, when they receive this justice from God, as Adam is said to have received original justice. Secondly, this justice may be brought about in man by a movement from one contrary to the other, and thus justification implies a transmutation from the state of injustice to the aforesaid state of justice. And it is thus we are now speaking of the justification of the ungodly, according to the Apostle (Rom. 4:5): "But to him that worketh not, yet believeth in Him that justifieth the ungodly," etc. And because movement is named after its term "whereto" rather than from its term "whence," the transmutation whereby anyone is changed by the remission of sins from the state of ungodliness to the state of justice, borrows its name from its term "whereto," and is called "justification of the ungodly."

Reply to Objection 1. Every sin, inasmuch as it implies the disorder of a mind not subject to God, may be called injustice, as being contrary to the aforesaid justice, according to 1 Jn. 3:4: "Whosoever committeth sin, committeth also iniquity; and sin is iniquity." And thus the removal of any sin is called the justification of the ungodly.

Reply to Objection 2. Faith and charity imply a special directing of the human mind to God by the intellect and will; whereas justice implies a general rectitude of order. Hence this transmutation is named after justice rather than after charity or faith.

Reply to Objection 3. Being called refers to God's help moving and exciting our mind to give up sin, and this motion of God is not the remission of sins, but its

cause.

Whether the infusion of grace is required for the remission of guilt, i.e. for the justification of the ungodly? Ia IIae q. 113 a. 2

Objection 1. It would seem that for the remission of guilt, which is the justification of the ungodly, no infusion of grace is required. For anyone may be moved from one contrary without being led to the other, if the contraries are not immediate. Now the state of guilt and the state of grace are not immediate contraries; for there is the middle state of innocence wherein a man has neither grace nor guilt. Hence a man may be pardoned his guilt without his being brought to a state of grace.

Objection 2. Further, the remission of guilt consists in the Divine imputation, according to Ps. 31:2: "Blessed is the man to whom the Lord hath not imputed sin." Now the infusion of grace puts something into our soul, as stated above (q. 110, a. 1). Hence the infusion of grace is not required for the remission of guilt.

Objection 3. Further, no one can be subject to two contraries at once. Now some sins are contraries, as wastefulness and miserliness. Hence whoever is subject to the sin of wastefulness is not simultaneously subject to the sin of miserliness, yet it may happen that he has been subject to it hitherto. Hence by sinning with the vice of wastefulness he is freed from the sin of miserliness. And thus a sin is remitted without grace.

On the contrary, It is written (Rom. 3:24): "Justified freely by His grace."

I answer that, by sinning a man offends God as stated above (q. 71, a. 5). Now an offense is remitted to anyone, only when the soul of the offender is at peace with the offended. Hence sin is remitted to us, when God is at peace with us, and this peace consists in the love whereby God loves us. Now God's love, considered on the part of the Divine act, is eternal and unchangeable; whereas, as regards the effect it imprints on us, it is sometimes interrupted, inasmuch as we sometimes fall short of it and once more require it. Now the effect of the Divine love in us, which is taken away by

sin, is grace, whereby a man is made worthy of eternal life, from which sin shuts him out. Hence we could not conceive the remission of guilt, without the infusion of grace.

Reply to Objection 1. More is required for an offender to pardon an offense, than for one who has committed no offense, not to be hated. For it may happen amongst men that one man neither hates nor loves another. But if the other offends him, then the forgiveness of the offense can only spring from a special goodwill. Now God's goodwill is said to be restored to man by the gift of grace; and hence although a man before sinning may be without grace and without guilt, yet that he is without guilt after sinning can only be because he has grace.

Reply to Objection 2. As God's love consists not merely in the act of the Divine will but also implies a certain effect of grace, as stated above (q. 110, a. 1), so likewise, when God does not impute sin to a man, there is implied a certain effect in him to whom the sin is not imputed; for it proceeds from the Divine love, that sin is not imputed to a man by God.

Reply to Objection 3. As Augustine says (De Nup. et Concup. i, 26), if to leave off sinning was the same as to have no sin, it would be enough if Scripture warned us thus: "My son, hast thou sinned? do so no more?" Now this is not enough, but it is added: "But for thy former sins also pray that they may be forgiven thee." For the act of sin passes, but the guilt remains, as stated above (q. 87, a. 6). Hence when anyone passes from the sin of one vice to the sin of a contrary vice, he ceases to have the act of the former sin, but he does not cease to have the guilt, hence he may have the guilt of both sins at once. For sins are not contrary to each other on the part of their turning from God, wherein sin has its guilt.

Whether for the justification of the ungodly is required a movement of the free-will? Ia IIae q. 113 a. 3

Objection 1. It would seem that no movement of the free-will is required for the justification of the ungodly. For we see that by the sacrament of Baptism, infants and sometimes adults are justified without a movement of their free-will: hence Augustine says (Confess. iv) that when one of his friends was taken with a fever, "he lay for a long time senseless and in a deadly sweat, and when he was despaired of, he was baptized without his knowing, and was regenerated"; which is effected by sanctifying grace. Now God does not confine His power to the sacraments. Hence He can justify a man without the sacraments, and without any movement of the free-will.

Objection 2. Further, a man has not the use of reason when asleep, and without it there can be no movement of the free-will. But Solomon received from God the gift of wisdom when asleep, as related in 3 Kings 3 and 2 Paral 1. Hence with equal reason the gift of sanctifying grace is sometimes bestowed by God on man without the movement of his free-will.

Objection 3. Further, grace is preserved by the same cause as brings it into being, for Augustine says (Gen. ad lit. viii, 12) that "so ought man to turn to God as he is ever made just by Him." Now grace is preserved in man without a movement of his free-will. Hence it can be infused in the beginning without a movement of

the free-will.

On the contrary, It is written (Jn. 6:45): “Every one that hath heard of the Father, and hath learned, cometh to Me.” Now to learn cannot be without a movement of the free-will, since the learner assents to the teacher. Hence, no one comes to the Father by justifying grace without a movement of the free-will.

I answer that, The justification of the ungodly is brought about by God moving man to justice. For He it is “that justifieth the ungodly” according to Rom. 4:5. Now God moves everything in its own manner, just as we see that in natural things, what is heavy and what is light are moved differently, on account of their diverse natures. Hence He moves man to justice according to the condition of his human nature. But it is man’s proper nature to have free-will. Hence in him who has the use of reason, God’s motion to justice does not take place without a movement of the free-will; but He so infuses the gift of justifying grace that at the same time He moves the free-will to accept the gift of grace, in such as are capable of being moved thus.

Reply to Objection 1. Infants are not capable of the movement of their free-will; hence it is by the mere infusion of their souls that God moves them to justice. Now this cannot be brought about without a sacrament; because as original sin, from which they are justified, does not come to them from their own will, but by carnal generation, so also is grace given them by Christ through spiritual regeneration. And the same reason holds good with madmen and idiots that have never had the use of their free-will. But in the case of one who has had the use of his free-will and afterwards has lost it either through sickness or sleep, he does not obtain justifying grace by the exterior rite of Baptism, or of any other sacrament, unless he intended to make use of this sacrament, and this can only be by the use of his free-

will. And it was in this way that he of whom Augustine speaks was regenerated, because both previously and afterwards he assented to the Baptism.

Reply to Objection 2. Solomon neither merited nor received wisdom whilst asleep; but it was declared to him in his sleep that on account of his previous desire wisdom would be infused into him by God. Hence it is said in his person (Wis. 7:7): “I wished, and understanding was given unto me.”

Or it may be said that his sleep was not natural, but was the sleep of prophecy, according to Num. 12:6: “If there be among you a prophet of the Lord, I will appear to him in a vision, or I will speak to him in a dream.” In such cases the use of free-will remains.

And yet it must be observed that the comparison between the gift of wisdom and the gift of justifying grace does not hold. For the gift of justifying grace especially ordains a man to good, which is the object of the will; and hence a man is moved to it by a movement of the will which is a movement of free-will. But wisdom perfects the intellect which precedes the will; hence without any complete movement of the free-will, the intellect can be enlightened with the gift of wisdom, even as we see that things are revealed to men in sleep, according to Job 33:15,16: “When deep sleep falleth upon men and they are sleeping in their beds, then He openeth the ears of men, and teaching, instructeth them in what they are to learn.”

Reply to Objection 3. In the infusion of justifying grace there is a certain transmutation of the human soul, and hence a proper movement of the human soul is required in order that the soul may be moved in its own manner. But the conservation of grace is without transmutation: no movement on the part of the soul is required but only a continuation of the Divine influx.

Whether a movement of faith is required for the justification of the ungodly?

Ia IIae q. 113 a. 4

Objection 1. It would seem that no movement of faith is required for the justification of the ungodly. For as a man is justified by faith, so also by other things, viz. by fear, of which it is written (Ecclus. 1:27): “The fear of the Lord driveth out sin, for he that is without fear cannot be justified”; and again by charity, according to Lk. 7:47: “Many sins are forgiven her because she hath loved much”; and again by humility, according to James 4:6: “God resisteth the proud and giveth grace to the humble”; and again by mercy, according to Prov. 15:27: “By mercy and faith sins are purged away.” Hence the movement of faith is no more required for the justification of the ungodly, than the movements of the aforesaid virtues.

Objection 2. Further, the act of faith is required for justification only inasmuch as a man knows God by faith. But a man may know God in other ways, viz. by natural knowledge, and by the gift of wisdom. Hence

no act of faith is required for the justification of the ungodly.

Objection 3. Further, there are several articles of faith. Therefore if the act of faith is required for the justification of the ungodly, it would seem that a man ought to think on every article of faith when he is first justified. But this seems inconvenient, since such thought would require a long delay of time. Hence it seems that an act of faith is not required for the justification of the ungodly.

On the contrary, It is written (Rom. 5:1): “Being justified therefore by faith, let us have peace with God.”

I answer that, As stated above (a. 3) a movement of free-will is required for the justification of the ungodly, inasmuch as man’s mind is moved by God. Now God moves man’s soul by turning it to Himself according to Ps. 84:7 (Septuagint): “Thou wilt turn us, O God, and bring us to life.” Hence for the justification of the un-

godly a movement of the mind is required, by which it is turned to God. Now the first turning to God is by faith, according to Heb. 11:6: "He that cometh to God must believe that He is." Hence a movement of faith is required for the justification of the ungodly.

Reply to Objection 1. The movement of faith is not perfect unless it is quickened by charity; hence in the justification of the ungodly, a movement of charity is infused together with the movement of faith. Now free-will is moved to God by being subject to Him; hence an act of filial fear and an act of humility also concur. For it may happen that one and the same act of free-will springs from different virtues, when one commands and another is commanded, inasmuch as the act may be ordained to various ends. But the act of mercy counteracts sin either by way of satisfying for it, and thus it follows justification; or by way of preparation, inasmuch as the

merciful obtain mercy; and thus it can either precede justification, or concur with the other virtues towards justification, inasmuch as mercy is included in the love of our neighbor.

Reply to Objection 2. By natural knowledge a man is not turned to God, according as He is the object of beatitude and the cause of justification. Hence such knowledge does not suffice for justification. But the gift of wisdom presupposes the knowledge of faith, as stated above (q. 68, a. 4, ad 3).

Reply to Objection 3. As the Apostle says (Rom. 4:5), "to him that... believeth in Him that justifieth the ungodly his faith is reputed to justice, according to the purpose of the grace of God." Hence it is clear that in the justification of the ungodly an act of faith is required in order that a man may believe that God justifies man through the mystery of Christ.

Whether for the justification of the ungodly there is required a movement of the free-will towards sin? Ia IIae q. 113 a. 5

Objection 1. It would seem that no movement of the free-will towards sin is required for the justification of the ungodly. For charity alone suffices to take away sin, according to Prov. 10:12: "Charity covereth all sins." Now the object of charity is not sin. Therefore for this justification of the ungodly no movement of the free-will towards sin is required.

Objection 2. Further, whoever is tending onward, ought not to look back, according to Phil. 3:13,14: "Forgetting the things that are behind, and stretching forth myself to those that are before, I press towards the mark, to the prize of the supernal vocation." But whoever is stretching forth to righteousness has his sins behind him. Hence he ought to forget them, and not stretch forth to them by a movement of his free-will.

Objection 3. Further, in the justification of the ungodly one sin is not remitted without another, for "it is irreverent to expect half a pardon from God"* . Hence, in the justification of the ungodly, if man's free-will must move against sin, he ought to think of all his sins. But this is unseemly, both because a great space of time would be required for such thought, and because a man could not obtain the forgiveness of such sins as he had forgotten. Hence for the justification of the ungodly no movement of the free-will is required.

On the contrary, It is written (Ps. 31:5): "I will confess against myself my injustice to the Lord; and Thou hast forgiven the wickedness of my sin."

I answer that, As stated above (a. 1), the justification of the ungodly is a certain movement whereby the human mind is moved by God from the state of sin to the state of justice. Hence it is necessary for the human mind to regard both extremes by an act of free-will, as a body in local movement is related to both terms of

the movement. Now it is clear that in local movement the moving body leaves the term "whence" and nears the term "whereto." Hence the human mind whilst it is being justified, must, by a movement of its free-will withdraw from sin and draw near to justice.

Now to withdraw from sin and to draw near to justice, in an act of free-will, means detestation and desire. For Augustine says on the words "the hireling fleeth," etc. (Jn. 10:12): "Our emotions are the movements of our soul; joy is the soul's outpouring; fear is the soul's flight; your soul goes forward when you seek; your soul flees, when you are afraid." Hence in the justification of the ungodly there must be two acts of the free-will—one, whereby it tends to God's justice; the other whereby it hates sin.

Reply to Objection 1. It belongs to the same virtue to seek one contrary and to avoid the other; and hence, as it belongs to charity to love God, so likewise, to detest sin whereby the soul is separated from God.

Reply to Objection 2. A man ought not to return to those things that are behind, by loving them; but, for that matter, he ought to forget them, lest he be drawn to them. Yet he ought to recall them to mind, in order to detest them; for this is to fly from them.

Reply to Objection 3. Previous to justification a man must detest each sin he remembers to have committed, and from this remembrance the soul goes on to have a general movement of detestation with regard to all sins committed, in which are included such sins as have been forgotten. For a man is then in such a frame of mind that he would be sorry even for those he does not remember, if they were present to his memory; and this movement cooperates in his justification.

* Cap., Sunt. plures: Dist. iii, De Poenit.

Objection 1. It would seem that the remission of sins ought not to be reckoned amongst the things required for justification. For the substance of a thing is not reckoned together with those that are required for a thing; thus a man is not reckoned together with his body and soul. But the justification of the ungodly is itself the remission of sins, as stated above (a. 1). Therefore the remission of sins ought not to be reckoned among the things required for the justification of the ungodly.

Objection 2. Further, infusion of grace and remission of sins are the same; as illumination and expulsion of darkness are the same. But a thing ought not to be reckoned together with itself; for unity is opposed to multitude. Therefore the remission of sins ought not to be reckoned with the infusion of grace.

Objection 3. Further, the remission of sin follows as effect from cause, from the free-will's movement towards God and sin; since it is by faith and contrition that sin is forgiven. But an effect ought not to be reckoned with its cause; since things thus enumerated together, and, as it were, condivided, are by nature simultaneous. Hence the remission of sins ought not to be reckoned with the things required for the justification of the ungodly.

On the contrary, In reckoning what is required for a thing we ought not to pass over the end, which is the chief part of everything. Now the remission of sins is the end of the justification of the ungodly; for it is written (Is. 27:9): "This is all the fruit, that the sin thereof should be taken away." Hence the remission of sins ought to be reckoned amongst the things required for justification.

I answer that, There are four things which are accounted to be necessary for the justification of the ungodly, viz. the infusion of grace, the movement of the free-will towards God by faith, the movement of the free-will towards sin, and the remission of sins. The

reason for this is that, as stated above (a. 1), the justification of the ungodly is a movement whereby the soul is moved by God from a state of sin to a state of justice. Now in the movement whereby one thing is moved by another, three things are required: first, the motion of the mover; secondly, the movement of the moved; thirdly, the consummation of the movement, or the attainment of the end. On the part of the Divine motion, there is the infusion of grace; on the part of the free-will which is moved, there are two movements—of departure from the term "whence," and of approach to the term "whereto"; but the consummation of the movement or the attainment of the end of the movement is implied in the remission of sins; for in this is the justification of the ungodly completed.

Reply to Objection 1. The justification of the ungodly is called the remission of sins, even as every movement has its species from its term. Nevertheless, many other things are required in order to reach the term, as stated above (a. 5).

Reply to Objection 2. The infusion of grace and the remission of sin may be considered in two ways: first, with respect to the substance of the act, and thus they are the same; for by the same act God bestows grace and remits sin. Secondly, they may be considered on the part of the objects; and thus they differ by the difference between guilt, which is taken away, and grace, which is infused; just as in natural things generation and corruption differ, although the generation of one thing is the corruption of another.

Reply to Objection 3. This enumeration is not the division of a genus into its species, in which the things enumerated must be simultaneous; but it is division of the things required for the completion of anything; and in this enumeration we may have what precedes and what follows, since some of the principles and parts of a composite thing may precede and some follow.

Objection 1. It would seem that the justification of the ungodly does not take place in an instant, but successively, since, as already stated (a. 3), for the justification of the ungodly, there is required a movement of free-will. Now the act of the free-will is choice, which requires the deliberation of counsel, as stated above (q. 13, a. 1). Hence, since deliberation implies a certain reasoning process, and this implies succession, the justification of the ungodly would seem to be successive.

Objection 2. Further, the free-will's movement is not without actual consideration. But it is impossible to understand many things actually and at once, as stated above (Ia, q. 85, a. 4). Hence, since for the justifica-

tion of the ungodly there is required a movement of the free-will towards several things, viz. towards God and towards sin, it would seem impossible for the justification of the ungodly to be in an instant.

Objection 3. Further, a form that may be greater or less, e.g. blackness or whiteness, is received successively by its subject. Now grace may be greater or less, as stated above (q. 112, a. 4). Hence it is not received suddenly by its subject. Therefore, seeing that the infusion of grace is required for the justification of the ungodly, it would seem that the justification of the ungodly cannot be in an instant.

Objection 4. Further, the free-will's movement, which cooperates in justification, is meritorious; and

hence it must proceed from grace, without which there is no merit, as we shall state further on (q. 114, a. 2). Now a thing receives its form before operating by this form. Hence grace is first infused, and then the free-will is moved towards God and to detest sin. Hence justification is not all at once.

Objection 5. Further, if grace is infused into the soul, there must be an instant when it first dwells in the soul; so, too, if sin is forgiven there must be a last instant that man is in sin. But it cannot be the same instant, otherwise opposites would be in the same simultaneously. Hence they must be two successive instants; between which there must be time, as the Philosopher says (Phys. vi, 1). Therefore the justification of the ungodly takes place not all at once, but successively.

On the contrary, The justification of the ungodly is caused by the justifying grace of the Holy Spirit. Now the Holy Spirit comes to men's minds suddenly, according to Acts 2:2: "And suddenly there came a sound from heaven as of a mighty wind coming," upon which the gloss says that "the grace of the Holy Ghost knows no tardy efforts." Hence the justification of the ungodly is not successive, but instantaneous.

I answer that, The entire justification of the ungodly consists as to its origin in the infusion of grace. For it is by grace that free-will is moved and sin is remitted. Now the infusion of grace takes place in an instant and without succession. And the reason of this is that if a form be not suddenly impressed upon its subject, it is either because that subject is not disposed, or because the agent needs time to dispose the subject. Hence we see that immediately the matter is disposed by a preceding alteration, the substantial form accrues to the matter; thus because the atmosphere of itself is disposed to receive light, it is suddenly illuminated by a body actually luminous. Now it was stated (q. 112, a. 2) that God, in order to infuse grace into the soul, needs no disposition, save what He Himself has made. And sometimes this sufficient disposition for the reception of grace He makes suddenly, sometimes gradually and successively, as stated above (q. 112, a. 2, ad 2). For the reason why a natural agent cannot suddenly dispose matter is that in the matter there is a resistant which has some disproportion with the power of the agent; and hence we see that the stronger the agent, the more speedily is the matter disposed. Therefore, since the Divine power is infinite, it can suddenly dispose any matter whatsoever to its form; and much more man's free-will, whose movement is by nature instantaneous. Therefore the justification of the ungodly by God takes place in an instant.

Reply to Objection 1. The movement of the free-will, which concurs in the justification of the ungodly, is a consent to detest sin, and to draw near to God; and this consent takes place suddenly. Sometimes, indeed, it happens that deliberation precedes, yet this is not of the substance of justification, but a way of justification; as local movement is a way of illumination, and alteration to generation.

Reply to Objection 2. As stated above (Ia, q. 85, a. 5), there is nothing to prevent two things being understood at once, in so far as they are somehow one; thus we understand the subject and predicate together, inasmuch as they are united in the order of one affirmation. And in the same manner can the free-will be moved to two things at once in so far as one is ordained to the other. Now the free-will's movement towards sin is ordained to the free-will's movement towards God, since a man detests sin, as contrary to God, to Whom he wishes to cling. Hence in the justification of the ungodly the free-will simultaneously detests sin and turns to God, even as a body approaches one point and withdraws from another simultaneously.

Reply to Objection 3. The reason why a form is not received instantaneously in the matter is not the fact that it can inhere more or less; for thus the light would not be suddenly received in the air, which can be illuminated more or less. But the reason is to be sought on the part of the disposition of the matter or subject, as stated above.

Reply to Objection 4. The same instant the form is acquired, the thing begins to operate with the form; as fire, the instant it is generated moves upwards, and if its movement was instantaneous, it would be terminated in the same instant. Now to will and not to will—the movements of the free-will—are not successive, but instantaneous. Hence the justification of the ungodly must not be successive.

Reply to Objection 5. The succession of opposites in the same subject must be looked at differently in the things that are subject to time and in those that are above time. For in those that are in time, there is no last instant in which the previous form inheres in the subject; but there is the last time, and the first instant that the subsequent form inheres in the matter or subject; and this for the reason, that in time we are not to consider one instant, since neither do instants succeed each other immediately in time, nor points in a line, as is proved in Physic. vi, 1. But time is terminated by an instant. Hence in the whole of the previous time wherein anything is moving towards its form, it is under the opposite form; but in the last instant of this time, which is the first instant of the subsequent time, it has the form which is the term of the movement.

But in those that are above time, it is otherwise. For if there be any succession of affections or intellectual conceptions in them (as in the angels), such succession is not measured by continuous time, but by discrete time, even as the things measured are not continuous, as stated above (Ia, q. 53, Aa. 2,3). In these, therefore, there is a last instant in which the preceding is, and a first instant in which the subsequent is. Nor must there be time in between, since there is no continuity of time, which this would necessitate.

Now the human mind, which is justified, is, in itself, above time, but is subject to time accidentally, inasmuch as it understands with continuity and time, with respect

to the phantasms in which it considers the intelligible species, as stated above (Ia, q. 85, Aa. 1,2). We must, therefore, decide from this about its change as regards the condition of temporal movements, i.e. we must say

that there is no last instant that sin inheres, but a last time; whereas there is a first instant that grace inheres; and in all the time previous sin inhered.

Whether the infusion of grace is naturally the first of the things required for the justification of the ungodly?

Ia IIae q. 113 a. 8

Objection 1. It would seem that the infusion of grace is not what is naturally required first for the justification of the ungodly. For we withdraw from evil before drawing near to good, according to Ps. 33:15: “Turn away from evil, and do good.” Now the remission of sins regards the turning away from evil, and the infusion of grace regards the turning to good. Hence the remission of sin is naturally before the infusion of grace.

Objection 2. Further, the disposition naturally precedes the form to which it disposes. Now the free-will’s movement is a disposition for the reception of grace. Therefore it naturally precedes the infusion of grace.

Objection 3. Further, sin hinders the soul from tending freely to God. Now a hindrance to movement must be removed before the movement takes place. Hence the remission of sin and the free-will’s movement towards sin are naturally before the infusion of grace.

On the contrary, The cause is naturally prior to its effect. Now the infusion of grace is the cause of whatever is required for the justification of the ungodly, as stated above (a. 7). Therefore it is naturally prior to it.

I answer that, The aforesaid four things required for the justification of the ungodly are simultaneous in time, since the justification of the ungodly is not successive, as stated above (a. 7); but in the order of nature, one is prior to another; and in their natural order the first is the infusion of grace; the second, the free-will’s movement towards God; the third, the free-will’s movement towards sin; the fourth, the remission of sin.

The reason for this is that in every movement the motion of the mover is naturally first; the disposition of the matter, or the movement of the moved, is second; the end or term of the movement in which the motion of the mover rests, is last. Now the motion of God the Mover is the infusion of grace, as stated above (a. 6); the movement or disposition of the moved is the free-will’s double movement; and the term or end of the movement is the remission of sin, as stated above (a. 6). Hence in their natural order the first in the justification of the ungodly is the infusion of grace; the second is the free-will’s movement towards God; the third is the free-will’s movement towards sin, for he who is being justified detests sin because it is against God, and thus

the free-will’s movement towards God naturally precedes the free-will’s movement towards sin, since it is its cause and reason; the fourth and last is the remission of sin, to which this transmutation is ordained as to an end, as stated above (Aa. 1,6).

Reply to Objection 1. The withdrawal from one term and approach to another may be looked at in two ways: first, on the part of the thing moved, and thus the withdrawal from a term naturally precedes the approach to a term, since in the subject of movement the opposite which is put away is prior to the opposite which the subject moved attains to by its movement. But on the part of the agent it is the other way about, since the agent, by the form pre-existing in it, acts for the removal of the opposite form; as the sun by its light acts for the removal of darkness, and hence on the part of the sun, illumination is prior to the removal of darkness; but on the part of the atmosphere to be illuminated, to be freed from darkness is, in the order of nature, prior to being illuminated, although both are simultaneous in time. And since the infusion of grace and the remission of sin regard God Who justifies, hence in the order of nature the infusion of grace is prior to the freeing from sin. But if we look at what is on the part of the man justified, it is the other way about, since in the order of nature the being freed from sin is prior to the obtaining of justifying grace. Or it may be said that the term “whence” of justification is sin; and the term “whereto” is justice; and that grace is the cause of the forgiveness of sin and of obtaining of justice.

Reply to Objection 2. The disposition of the subject precedes the reception of the form, in the order of nature; yet it follows the action of the agent, whereby the subject is disposed. And hence the free-will’s movement precedes the reception of grace in the order of nature, and follows the infusion of grace.

Reply to Objection 3. As the Philosopher says (Phys. ii, 9), in movements of the soul the movement toward the speculative principle or the practical end is the very first, but in exterior movements the removal of the impediment precedes the attainment of the end. And as the free-will’s movement is a movement of the soul, in the order of nature it moves towards God as to its end, before removing the impediment of sin.

Objection 1. It would seem that the justification of the ungodly is not God's greatest work. For it is by the justification of the ungodly that we attain the grace of a wayfarer. Now by glorification we receive heavenly grace, which is greater. Hence the glorification of angels and men is a greater work than the justification of the ungodly.

Objection 2. Further, the justification of the ungodly is ordained to the particular good of one man. But the good of the universe is greater than the good of one man, as is plain from Ethic. i, 2. Hence the creation of heaven and earth is a greater work than the justification of the ungodly.

Objection 3. Further, to make something from nothing, where there is nought to cooperate with the agent, is greater than to make something with the cooperation of the recipient. Now in the work of creation something is made from nothing, and hence nothing can cooperate with the agent; but in the justification of the ungodly God makes something from something, i.e. a just man from a sinner, and there is a cooperation on man's part, since there is a movement of the free-will, as stated above (a. 3). Hence the justification of the ungodly is not God's greatest work.

On the contrary, It is written (Ps. 144:9): "His tender mercies are over all His works," and in a collect* we say: "O God, Who dost show forth Thine all-mightiness most by pardoning and having mercy," and Augustine, expounding the words, "greater than these shall he do" (Jn. 14:12) says that "for a just man to be made from a sinner, is greater than to create heaven and earth."

I answer that, A work may be called great in two ways: first, on the part of the mode of action, and thus the work of creation is the greatest work, wherein some-

thing is made from nothing; secondly, a work may be called great on account of what is made, and thus the justification of the ungodly, which terminates at the eternal good of a share in the Godhead, is greater than the creation of heaven and earth, which terminates at the good of mutable nature. Hence, Augustine, after saying that "for a just man to be made from a sinner is greater than to create heaven and earth," adds, "for heaven and earth shall pass away, but the justification of the ungodly shall endure."

Again, we must bear in mind that a thing is called great in two ways: first, in an absolute quantity, and thus the gift of glory is greater than the gift of grace that sanctifies the ungodly; and in this respect the glorification of the just is greater than the justification of the ungodly. Secondly, a thing may be said to be great in proportionate quantity, and thus the gift of grace that justifies the ungodly is greater than the gift of glory that beatifies the just, for the gift of grace exceeds the worthiness of the ungodly, who are worthy of punishment, more than the gift of glory exceeds the worthiness of the just, who by the fact of their justification are worthy of glory. Hence Augustine says: "Let him that can, judge whether it is greater to create the angels just, than to justify the ungodly. Certainly, if they both betoken equal power, one betokens greater mercy."

And thus the reply to the first is clear.

Reply to Objection 2. The good of the universe is greater than the particular good of one, if we consider both in the same genus. But the good of grace in one is greater than the good of nature in the whole universe.

Reply to Objection 3. This objection rests on the manner of acting, in which way creation is God's greatest work.

Objection 1. It would seem that the justification of the ungodly is a miraculous work. For miraculous works are greater than non-miraculous. Now the justification of the ungodly is greater than the other miraculous works, as is clear from the quotation from Augustine (a. 9). Hence the justification of the ungodly is a miraculous work.

Objection 2. Further, the movement of the will in the soul is like the natural inclination in natural things. But when God works in natural things against their inclination of their nature, it is a miraculous work, as when He gave sight to the blind or raised the dead. Now the will of the ungodly is bent on evil. Hence, since God in justifying a man moves him to good, it would seem that the justification of the ungodly is miraculous.

Objection 3. Further, as wisdom is a gift of God, so also is justice. Now it is miraculous that any-

one should suddenly obtain wisdom from God without study. Therefore it is miraculous that the ungodly should be justified by God.

On the contrary, Miraculous works are beyond natural power. Now the justification of the ungodly is not beyond natural power; for Augustine says (De Praed. Sanct. v) that "to be capable of having faith and to be capable of having charity belongs to man's nature; but to have faith and charity belongs to the grace of the faithful." Therefore the justification of the ungodly is not miraculous.

I answer that, In miraculous works it is usual to find three things: the first is on the part of the active power, because they can only be performed by Divine power; and they are simply wondrous, since their cause is hidden, as stated above (Ia, q. 105, a. 7). And thus both the justification of the ungodly and the creation of

* Tenth Sunday after Pentecost

the world, and, generally speaking, every work that can be done by God alone, is miraculous.

Secondly, in certain miraculous works it is found that the form introduced is beyond the natural power of such matter, as in the resurrection of the dead, life is above the natural power of such a body. And thus the justification of the ungodly is not miraculous, because the soul is naturally capable of grace; since from its having been made to the likeness of God, it is fit to receive God by grace, as Augustine says, in the above quotation.

Thirdly, in miraculous works something is found besides the usual and customary order of causing an effect, as when a sick man suddenly and beyond the wonted course of healing by nature or art, receives perfect health; and thus the justification of the ungodly is sometimes miraculous and sometimes not. For the common and wonted course of justification is that God moves the soul interiorly and that man is converted to God, first by an imperfect conversion, that it may afterwards become perfect; because "charity begun merits increase, and when increased merits perfection," as Augustine says (In Epist. Joan. Tract. v). Yet God sometimes moves the soul so vehemently that it reaches the perfection of justice at once, as took place in the con-

version of Paul, which was accompanied at the same time by a miraculous external prostration. Hence the conversion of Paul is commemorated in the Church as miraculous.

Reply to Objection 1. Certain miraculous works, although they are less than the justification of the ungodly, as regards the good caused, are beyond the wonted order of such effects, and thus have more of the nature of a miracle.

Reply to Objection 2. It is not a miraculous work, whenever a natural thing is moved contrary to its inclination, otherwise it would be miraculous for water to be heated, or for a stone to be thrown upwards; but only whenever this takes place beyond the order of the proper cause, which naturally does this. Now no other cause save God can justify the ungodly, even as nothing save fire can heat water. Hence the justification of the ungodly by God is not miraculous in this respect.

Reply to Objection 3. A man naturally acquires wisdom and knowledge from God by his own talent and study. Hence it is miraculous when a man is made wise or learned outside this order. But a man does not naturally acquire justifying grace by his own action, but by God's. Hence there is no parity.

Objection 1. It would seem that the justification of the ungodly is not the remission of sins. For sin is opposed not only to justice, but to all the other virtues, as stated above (q. 71, a. 1). Now justification signifies a certain movement towards justice. Therefore not even remission of sin is justification, since movement is from one contrary to the other.

Objection 2. Further, everything ought to be named from what is predominant in it, according to *De Anima* ii, text. 49. Now the remission of sins is brought about chiefly by faith, according to Acts 15:9: “Purifying their hearts by faith”; and by charity, according to Prov. 10:12: “Charity covereth all sins.” Therefore the remission of sins ought to be named after faith or charity rather than justice.

Objection 3. Further, the remission of sins seems to be the same as being called, for whoever is called is afar off, and we are afar off from God by sin. But one is called before being justified according to Rom. 8:30: “And whom He called, them He also justified.” Therefore justification is not the remission of sins.

On the contrary, On Rom. 8:30, “Whom He called, them He also justified,” the gloss says i.e. “by the remission of sins.” Therefore the remission of sins is justification.

I answer that, Justification taken passively implies a movement towards heat. But since justice, by its nature, implies a certain rectitude of order, it may be taken in two ways: first, inasmuch as it implies a right order in man’s act, and thus justice is placed amongst the virtues—either as particular justice, which directs a man’s acts by regulating them in relation to his fellowman—or as legal justice, which directs a man’s acts by regulating them in their relation to the common good of society, as appears from *Ethic.* v, 1.

Secondly, justice is so-called inasmuch as it implies a certain rectitude of order in the interior disposition of a man, in so far as what is highest in man is subject

to God, and the inferior powers of the soul are subject to the superior, i.e. to the reason; and this disposition the Philosopher calls “justice metaphorically speaking” (*Ethic.* v, 11). Now this justice may be in man in two ways: first, by simple generation, which is from privation to form; and thus justification may belong even to such as are not in sin, when they receive this justice from God, as Adam is said to have received original justice. Secondly, this justice may be brought about in man by a movement from one contrary to the other, and thus justification implies a transmutation from the state of injustice to the aforesaid state of justice. And it is thus we are now speaking of the justification of the ungodly, according to the Apostle (Rom. 4:5): “But to him that worketh not, yet believeth in Him that justifieth the ungodly,” etc. And because movement is named after its term “whereto” rather than from its term “whence,” the transmutation whereby anyone is changed by the remission of sins from the state of ungodliness to the state of justice, borrows its name from its term “whereto,” and is called “justification of the ungodly.”

Reply to Objection 1. Every sin, inasmuch as it implies the disorder of a mind not subject to God, may be called injustice, as being contrary to the aforesaid justice, according to 1 Jn. 3:4: “Whosoever committeth sin, committeth also iniquity; and sin is iniquity.” And thus the removal of any sin is called the justification of the ungodly.

Reply to Objection 2. Faith and charity imply a special directing of the human mind to God by the intellect and will; whereas justice implies a general rectitude of order. Hence this transmutation is named after justice rather than after charity or faith.

Reply to Objection 3. Being called refers to God’s help moving and exciting our mind to give up sin, and this motion of God is not the remission of sins, but its cause.

Objection 1. It would seem that the justification of the ungodly is a miraculous work. For miraculous works are greater than non-miraculous. Now the justification of the ungodly is greater than the other miraculous works, as is clear from the quotation from Augustine (a. 9). Hence the justification of the ungodly is a miraculous work.

Objection 2. Further, the movement of the will in the soul is like the natural inclination in natural things. But when God works in natural things against their inclination of their nature, it is a miraculous work, as when He gave sight to the blind or raised the dead. Now the will of the ungodly is bent on evil. Hence, since God in justifying a man moves him to good, it would seem that the justification of the ungodly is miraculous.

Objection 3. Further, as wisdom is a gift of God, so also is justice. Now it is miraculous that anyone should suddenly obtain wisdom from God without study. Therefore it is miraculous that the ungodly should be justified by God.

On the contrary, Miraculous works are beyond natural power. Now the justification of the ungodly is not beyond natural power; for Augustine says (De Praed. Sanct. v) that “to be capable of having faith and to be capable of having charity belongs to man’s nature; but to have faith and charity belongs to the grace of the faithful.” Therefore the justification of the ungodly is not miraculous.

I answer that, In miraculous works it is usual to find three things: the first is on the part of the active power, because they can only be performed by Divine power; and they are simply wondrous, since their cause is hidden, as stated above (Ia, q. 105, a. 7). And thus both the justification of the ungodly and the creation of the world, and, generally speaking, every work that can be done by God alone, is miraculous.

Secondly, in certain miraculous works it is found that the form introduced is beyond the natural power of such matter, as in the resurrection of the dead, life is above the natural power of such a body. And thus the justification of the ungodly is not miraculous, because the soul is naturally capable of grace; since from

its having been made to the likeness of God, it is fit to receive God by grace, as Augustine says, in the above quotation.

Thirdly, in miraculous works something is found besides the usual and customary order of causing an effect, as when a sick man suddenly and beyond the wonted course of healing by nature or art, receives perfect health; and thus the justification of the ungodly is sometimes miraculous and sometimes not. For the common and wonted course of justification is that God moves the soul interiorly and that man is converted to God, first by an imperfect conversion, that it may afterwards become perfect; because “charity begun merits increase, and when increased merits perfection,” as Augustine says (In Epist. Joan. Tract. v). Yet God sometimes moves the soul so vehemently that it reaches the perfection of justice at once, as took place in the conversion of Paul, which was accompanied at the same time by a miraculous external prostration. Hence the conversion of Paul is commemorated in the Church as miraculous.

Reply to Objection 1. Certain miraculous works, although they are less than the justification of the ungodly, as regards the good caused, are beyond the wonted order of such effects, and thus have more of the nature of a miracle.

Reply to Objection 2. It is not a miraculous work, whenever a natural thing is moved contrary to its inclination, otherwise it would be miraculous for water to be heated, or for a stone to be thrown upwards; but only whenever this takes place beyond the order of the proper cause, which naturally does this. Now no other cause save God can justify the ungodly, even as nothing save fire can heat water. Hence the justification of the ungodly by God is not miraculous in this respect.

Reply to Objection 3. A man naturally acquires wisdom and knowledge from God by his own talent and study. Hence it is miraculous when a man is made wise or learned outside this order. But a man does not naturally acquire justifying grace by his own action, but by God’s. Hence there is no parity.

Objection 1. It would seem that for the remission of guilt, which is the justification of the ungodly, no infusion of grace is required. For anyone may be moved from one contrary without being led to the other, if the contraries are not immediate. Now the state of guilt and the state of grace are not immediate contraries; for there is the middle state of innocence wherein a man has neither grace nor guilt. Hence a man may be pardoned his guilt without his being brought to a state of grace.

Objection 2. Further, the remission of guilt consists in the Divine imputation, according to Ps. 31:2: "Blessed is the man to whom the Lord hath not imputed sin." Now the infusion of grace puts something into our soul, as stated above (q. 110, a. 1). Hence the infusion of grace is not required for the remission of guilt.

Objection 3. Further, no one can be subject to two contraries at once. Now some sins are contraries, as wastefulness and miserliness. Hence whoever is subject to the sin of wastefulness is not simultaneously subject to the sin of miserliness, yet it may happen that he has been subject to it hitherto. Hence by sinning with the vice of wastefulness he is freed from the sin of miserliness. And thus a sin is remitted without grace.

On the contrary, It is written (Rom. 3:24): "Justified freely by His grace."

I answer that, by sinning a man offends God as stated above (q. 71, a. 5). Now an offense is remitted to anyone, only when the soul of the offender is at peace with the offended. Hence sin is remitted to us, when God is at peace with us, and this peace consists in the love whereby God loves us. Now God's love, considered on the part of the Divine act, is eternal and unchangeable; whereas, as regards the effect it imprints on us, it is sometimes interrupted, inasmuch as we sometimes fall short of it and once more require it. Now the effect of the Divine love in us, which is taken away by

sin, is grace, whereby a man is made worthy of eternal life, from which sin shuts him out. Hence we could not conceive the remission of guilt, without the infusion of grace.

Reply to Objection 1. More is required for an offender to pardon an offense, than for one who has committed no offense, not to be hated. For it may happen amongst men that one man neither hates nor loves another. But if the other offends him, then the forgiveness of the offense can only spring from a special goodwill. Now God's goodwill is said to be restored to man by the gift of grace; and hence although a man before sinning may be without grace and without guilt, yet that he is without guilt after sinning can only be because he has grace.

Reply to Objection 2. As God's love consists not merely in the act of the Divine will but also implies a certain effect of grace, as stated above (q. 110, a. 1), so likewise, when God does not impute sin to a man, there is implied a certain effect in him to whom the sin is not imputed; for it proceeds from the Divine love, that sin is not imputed to a man by God.

Reply to Objection 3. As Augustine says (De Nup. et Concup. i, 26), if to leave off sinning was the same as to have no sin, it would be enough if Scripture warned us thus: "My son, hast thou sinned? do so no more?" Now this is not enough, but it is added: "But for thy former sins also pray that they may be forgiven thee." For the act of sin passes, but the guilt remains, as stated above (q. 87, a. 6). Hence when anyone passes from the sin of one vice to the sin of a contrary vice, he ceases to have the act of the former sin, but he does not cease to have the guilt, hence he may have the guilt of both sins at once. For sins are not contrary to each other on the part of their turning from God, wherein sin has its guilt.

Objection 1. It would seem that no movement of the free-will is required for the justification of the ungodly. For we see that by the sacrament of Baptism, infants and sometimes adults are justified without a movement of their free-will: hence Augustine says (*Confess.* iv) that when one of his friends was taken with a fever, “he lay for a long time senseless and in a deadly sweat, and when he was despaired of, he was baptized without his knowing, and was regenerated”; which is effected by sanctifying grace. Now God does not confine His power to the sacraments. Hence He can justify a man without the sacraments, and without any movement of the free-will.

Objection 2. Further, a man has not the use of reason when asleep, and without it there can be no movement of the free-will. But Solomon received from God the gift of wisdom when asleep, as related in 3 Kings 3 and 2 Paral 1. Hence with equal reason the gift of sanctifying grace is sometimes bestowed by God on man without the movement of his free-will.

Objection 3. Further, grace is preserved by the same cause as brings it into being, for Augustine says (*Gen. ad lit.* viii, 12) that “so ought man to turn to God as he is ever made just by Him.” Now grace is preserved in man without a movement of his free-will. Hence it can be infused in the beginning without a movement of the free-will.

On the contrary, It is written (*Jn.* 6:45): “Every one that hath heard of the Father, and hath learned, cometh to Me.” Now to learn cannot be without a movement of the free-will, since the learner assents to the teacher. Hence, no one comes to the Father by justifying grace without a movement of the free-will.

I answer that, The justification of the ungodly is brought about by God moving man to justice. For He it is “that justifieth the ungodly” according to *Rom.* 4:5. Now God moves everything in its own manner, just as we see that in natural things, what is heavy and what is light are moved differently, on account of their diverse natures. Hence He moves man to justice according to the condition of his human nature. But it is man’s proper nature to have free-will. Hence in him who has the use of reason, God’s motion to justice does not take place without a movement of the free-will; but He so infuses the gift of justifying grace that at the same time He moves the free-will to accept the gift of grace, in such as are capable of being moved thus.

Reply to Objection 1. Infants are not capable of the movement of their free-will; hence it is by the mere

infusion of their souls that God moves them to justice. Now this cannot be brought about without a sacrament; because as original sin, from which they are justified, does not come to them from their own will, but by carnal generation, so also is grace given them by Christ through spiritual regeneration. And the same reason holds good with madmen and idiots that have never had the use of their free-will. But in the case of one who has had the use of his free-will and afterwards has lost it either through sickness or sleep, he does not obtain justifying grace by the exterior rite of Baptism, or of any other sacrament, unless he intended to make use of this sacrament, and this can only be by the use of his free-will. And it was in this way that he of whom Augustine speaks was regenerated, because both previously and afterwards he assented to the Baptism.

Reply to Objection 2. Solomon neither merited nor received wisdom whilst asleep; but it was declared to him in his sleep that on account of his previous desire wisdom would be infused into him by God. Hence it is said in his person (*Wis.* 7:7): “I wished, and understanding was given unto me.”

Or it may be said that his sleep was not natural, but was the sleep of prophecy, according to *Num.* 12:6: “If there be among you a prophet of the Lord, I will appear to him in a vision, or I will speak to him in a dream.” In such cases the use of free-will remains.

And yet it must be observed that the comparison between the gift of wisdom and the gift of justifying grace does not hold. For the gift of justifying grace especially ordains a man to good, which is the object of the will; and hence a man is moved to it by a movement of the will which is a movement of free-will. But wisdom perfects the intellect which precedes the will; hence without any complete movement of the free-will, the intellect can be enlightened with the gift of wisdom, even as we see that things are revealed to men in sleep, according to *Job* 33:15,16: “When deep sleep falleth upon men and they are sleeping in their beds, then He openeth the ears of men, and teaching, instructeth them in what they are to learn.”

Reply to Objection 3. In the infusion of justifying grace there is a certain transmutation of the human soul, and hence a proper movement of the human soul is required in order that the soul may be moved in its own manner. But the conservation of grace is without transmutation: no movement on the part of the soul is required but only a continuation of the Divine influx.

Objection 1. It would seem that no movement of faith is required for the justification of the ungodly. For as a man is justified by faith, so also by other things, viz. by fear, of which it is written (Ecclus. 1:27): “The fear of the Lord driveth out sin, for he that is without fear cannot be justified”; and again by charity, according to Lk. 7:47: “Many sins are forgiven her because she hath loved much”; and again by humility, according to James 4:6: “God resisteth the proud and giveth grace to the humble”; and again by mercy, according to Prov. 15:27: “By mercy and faith sins are purged away.” Hence the movement of faith is no more required for the justification of the ungodly, than the movements of the aforesaid virtues.

Objection 2. Further, the act of faith is required for justification only inasmuch as a man knows God by faith. But a man may know God in other ways, viz. by natural knowledge, and by the gift of wisdom. Hence no act of faith is required for the justification of the ungodly.

Objection 3. Further, there are several articles of faith. Therefore if the act of faith is required for the justification of the ungodly, it would seem that a man ought to think on every article of faith when he is first justified. But this seems inconvenient, since such thought would require a long delay of time. Hence it seems that an act of faith is not required for the justification of the ungodly.

On the contrary, It is written (Rom. 5:1): “Being justified therefore by faith, let us have peace with God.”

I answer that, As stated above (a. 3) a movement of free-will is required for the justification of the ungodly, inasmuch as man’s mind is moved by God. Now God moves man’s soul by turning it to Himself according to Ps. 84:7 (Septuagint): “Thou wilt turn us, O God, and

bring us to life.” Hence for the justification of the ungodly a movement of the mind is required, by which it is turned to God. Now the first turning to God is by faith, according to Heb. 11:6: “He that cometh to God must believe that He is.” Hence a movement of faith is required for the justification of the ungodly.

Reply to Objection 1. The movement of faith is not perfect unless it is quickened by charity; hence in the justification of the ungodly, a movement of charity is infused together with the movement of faith. Now free-will is moved to God by being subject to Him; hence an act of filial fear and an act of humility also concur. For it may happen that one and the same act of free-will springs from different virtues, when one commands and another is commanded, inasmuch as the act may be ordained to various ends. But the act of mercy counteracts sin either by way of satisfying for it, and thus it follows justification; or by way of preparation, inasmuch as the merciful obtain mercy; and thus it can either precede justification, or concur with the other virtues towards justification, inasmuch as mercy is included in the love of our neighbor.

Reply to Objection 2. By natural knowledge a man is not turned to God, according as He is the object of beatitude and the cause of justification. Hence such knowledge does not suffice for justification. But the gift of wisdom presupposes the knowledge of faith, as stated above (q. 68, a. 4, ad 3).

Reply to Objection 3. As the Apostle says (Rom. 4:5), “to him that . . . believeth in Him that justifieth the ungodly his faith is reputed to justice, according to the purpose of the grace of God.” Hence it is clear that in the justification of the ungodly an act of faith is required in order that a man may believe that God justifies man through the mystery of Christ.

Objection 1. It would seem that no movement of the free-will towards sin is required for the justification of the ungodly. For charity alone suffices to take away sin, according to Prov. 10:12: “Charity covereth all sins.” Now the object of charity is not sin. Therefore for this justification of the ungodly no movement of the free-will towards sin is required.

Objection 2. Further, whoever is tending onward, ought not to look back, according to Phil. 3:13,14: “Forgetting the things that are behind, and stretching forth myself to those that are before, I press towards the mark, to the prize of the supernal vocation.” But whoever is stretching forth to righteousness has his sins behind him. Hence he ought to forget them, and not stretch forth to them by a movement of his free-will.

Objection 3. Further, in the justification of the ungodly one sin is not remitted without another, for “it is irreverent to expect half a pardon from God”*. Hence, in the justification of the ungodly, if man’s free-will must move against sin, he ought to think of all his sins. But this is unseemly, both because a great space of time would be required for such thought, and because a man could not obtain the forgiveness of such sins as he had forgotten. Hence for the justification of the ungodly no movement of the free-will is required.

On the contrary, It is written (Ps. 31:5): “I will confess against myself my injustice to the Lord; and Thou hast forgiven the wickedness of my sin.”

I answer that, As stated above (a. 1), the justification of the ungodly is a certain movement whereby the human mind is moved by God from the state of sin to the state of justice. Hence it is necessary for the human mind to regard both extremes by an act of free-will, as a body in local movement is related to both terms of

the movement. Now it is clear that in local movement the moving body leaves the term “whence” and nears the term “whereto.” Hence the human mind whilst it is being justified, must, by a movement of its free-will withdraw from sin and draw near to justice.

Now to withdraw from sin and to draw near to justice, in an act of free-will, means detestation and desire. For Augustine says on the words “the hireling fleeth,” etc. (Jn. 10:12): “Our emotions are the movements of our soul; joy is the soul’s outpouring; fear is the soul’s flight; your soul goes forward when you seek; your soul flees, when you are afraid.” Hence in the justification of the ungodly there must be two acts of the free-will—one, whereby it tends to God’s justice; the other whereby it hates sin.

Reply to Objection 1. It belongs to the same virtue to seek one contrary and to avoid the other; and hence, as it belongs to charity to love God, so likewise, to detest sin whereby the soul is separated from God.

Reply to Objection 2. A man ought not to return to those things that are behind, by loving them; but, for that matter, he ought to forget them, lest he be drawn to them. Yet he ought to recall them to mind, in order to detest them; for this is to fly from them.

Reply to Objection 3. Previous to justification a man must detest each sin he remembers to have committed, and from this remembrance the soul goes on to have a general movement of detestation with regard to all sins committed, in which are included such sins as have been forgotten. For a man is then in such a frame of mind that he would be sorry even for those he does not remember, if they were present to his memory; and this movement cooperates in his justification.

* Cap., Sunt. plures: Dist. iii, De Poenit.

Objection 1. It would seem that the remission of sins ought not to be reckoned amongst the things required for justification. For the substance of a thing is not reckoned together with those that are required for a thing; thus a man is not reckoned together with his body and soul. But the justification of the ungodly is itself the remission of sins, as stated above (a. 1). Therefore the remission of sins ought not to be reckoned among the things required for the justification of the ungodly.

Objection 2. Further, infusion of grace and remission of sins are the same; as illumination and expulsion of darkness are the same. But a thing ought not to be reckoned together with itself; for unity is opposed to multitude. Therefore the remission of sins ought not to be reckoned with the infusion of grace.

Objection 3. Further, the remission of sin follows as effect from cause, from the free-will's movement towards God and sin; since it is by faith and contrition that sin is forgiven. But an effect ought not to be reckoned with its cause; since things thus enumerated together, and, as it were, condivided, are by nature simultaneous. Hence the remission of sins ought not to be reckoned with the things required for the justification of the ungodly.

On the contrary, In reckoning what is required for a thing we ought not to pass over the end, which is the chief part of everything. Now the remission of sins is the end of the justification of the ungodly; for it is written (Is. 27:9): "This is all the fruit, that the sin thereof should be taken away." Hence the remission of sins ought to be reckoned amongst the things required for justification.

I answer that, There are four things which are accounted to be necessary for the justification of the ungodly, viz. the infusion of grace, the movement of the free-will towards God by faith, the movement of the free-will towards sin, and the remission of sins. The

reason for this is that, as stated above (a. 1), the justification of the ungodly is a movement whereby the soul is moved by God from a state of sin to a state of justice. Now in the movement whereby one thing is moved by another, three things are required: first, the motion of the mover; secondly, the movement of the moved; thirdly, the consummation of the movement, or the attainment of the end. On the part of the Divine motion, there is the infusion of grace; on the part of the free-will which is moved, there are two movements—of departure from the term "whence," and of approach to the term "whereto"; but the consummation of the movement or the attainment of the end of the movement is implied in the remission of sins; for in this is the justification of the ungodly completed.

Reply to Objection 1. The justification of the ungodly is called the remission of sins, even as every movement has its species from its term. Nevertheless, many other things are required in order to reach the term, as stated above (a. 5).

Reply to Objection 2. The infusion of grace and the remission of sin may be considered in two ways: first, with respect to the substance of the act, and thus they are the same; for by the same act God bestows grace and remits sin. Secondly, they may be considered on the part of the objects; and thus they differ by the difference between guilt, which is taken away, and grace, which is infused; just as in natural things generation and corruption differ, although the generation of one thing is the corruption of another.

Reply to Objection 3. This enumeration is not the division of a genus into its species, in which the things enumerated must be simultaneous; but it is division of the things required for the completion of anything; and in this enumeration we may have what precedes and what follows, since some of the principles and parts of a composite thing may precede and some follow.

Objection 1. It would seem that the justification of the ungodly does not take place in an instant, but successively, since, as already stated (a. 3), for the justification of the ungodly, there is required a movement of free-will. Now the act of the free-will is choice, which requires the deliberation of counsel, as stated above (q. 13, a. 1). Hence, since deliberation implies a certain reasoning process, and this implies succession, the justification of the ungodly would seem to be successive.

Objection 2. Further, the free-will's movement is not without actual consideration. But it is impossible to understand many things actually and at once, as stated above (Ia, q. 85, a. 4). Hence, since for the justification of the ungodly there is required a movement of the free-will towards several things, viz. towards God and towards sin, it would seem impossible for the justification of the ungodly to be in an instant.

Objection 3. Further, a form that may be greater or less, e.g. blackness or whiteness, is received successively by its subject. Now grace may be greater or less, as stated above (q. 112, a. 4). Hence it is not received suddenly by its subject. Therefore, seeing that the infusion of grace is required for the justification of the ungodly, it would seem that the justification of the ungodly cannot be in an instant.

Objection 4. Further, the free-will's movement, which cooperates in justification, is meritorious; and hence it must proceed from grace, without which there is no merit, as we shall state further on (q. 114, a. 2). Now a thing receives its form before operating by this form. Hence grace is first infused, and then the free-will is moved towards God and to detest sin. Hence justification is not all at once.

Objection 5. Further, if grace is infused into the soul, there must be an instant when it first dwells in the soul; so, too, if sin is forgiven there must be a last instant that man is in sin. But it cannot be the same instant, otherwise opposites would be in the same simultaneously. Hence they must be two successive instants; between which there must be time, as the Philosopher says (Phys. vi, 1). Therefore the justification of the ungodly takes place not all at once, but successively.

On the contrary, The justification of the ungodly is caused by the justifying grace of the Holy Spirit. Now the Holy Spirit comes to men's minds suddenly, according to Acts 2:2: "And suddenly there came a sound from heaven as of a mighty wind coming," upon which the gloss says that "the grace of the Holy Ghost knows no tardy efforts." Hence the justification of the ungodly is not successive, but instantaneous.

I answer that, The entire justification of the ungodly consists as to its origin in the infusion of grace. For it is by grace that free-will is moved and sin is remitted. Now the infusion of grace takes place in an instant and without succession. And the reason of this is that if

a form be not suddenly impressed upon its subject, it is either because that subject is not disposed, or because the agent needs time to dispose the subject. Hence we see that immediately the matter is disposed by a preceding alteration, the substantial form accrues to the matter; thus because the atmosphere of itself is disposed to receive light, it is suddenly illuminated by a body actually luminous. Now it was stated (q. 112, a. 2) that God, in order to infuse grace into the soul, needs no disposition, save what He Himself has made. And sometimes this sufficient disposition for the reception of grace He makes suddenly, sometimes gradually and successively, as stated above (q. 112, a. 2, ad 2). For the reason why a natural agent cannot suddenly dispose matter is that in the matter there is a resistant which has some disproportion with the power of the agent; and hence we see that the stronger the agent, the more speedily is the matter disposed. Therefore, since the Divine power is infinite, it can suddenly dispose any matter whatsoever to its form; and much more man's free-will, whose movement is by nature instantaneous. Therefore the justification of the ungodly by God takes place in an instant.

Reply to Objection 1. The movement of the free-will, which concurs in the justification of the ungodly, is a consent to detest sin, and to draw near to God; and this consent takes place suddenly. Sometimes, indeed, it happens that deliberation precedes, yet this is not of the substance of justification, but a way of justification; as local movement is a way of illumination, and alteration to generation.

Reply to Objection 2. As stated above (Ia, q. 85, a. 5), there is nothing to prevent two things being understood at once, in so far as they are somehow one; thus we understand the subject and predicate together, inasmuch as they are united in the order of one affirmation. And in the same manner can the free-will be moved to two things at once in so far as one is ordained to the other. Now the free-will's movement towards sin is ordained to the free-will's movement towards God, since a man detests sin, as contrary to God, to Whom he wishes to cling. Hence in the justification of the ungodly the free-will simultaneously detests sin and turns to God, even as a body approaches one point and withdraws from another simultaneously.

Reply to Objection 3. The reason why a form is not received instantaneously in the matter is not the fact that it can inhere more or less; for thus the light would not be suddenly received in the air, which can be illuminated more or less. But the reason is to be sought on the part of the disposition of the matter or subject, as stated above.

Reply to Objection 4. The same instant the form is acquired, the thing begins to operate with the form; as fire, the instant it is generated moves upwards, and if its movement was instantaneous, it would be terminated in the same instant. Now to will and not to will—the

movements of the free-will—are not successive, but instantaneous. Hence the justification of the ungodly must not be successive.

Reply to Objection 5. The succession of opposites in the same subject must be looked at differently in the things that are subject to time and in those that are above time. For in those that are in time, there is no last instant in which the previous form inheres in the subject; but there is the last time, and the first instant that the subsequent form inheres in the matter or subject; and this for the reason, that in time we are not to consider one instant, since neither do instants succeed each other immediately in time, nor points in a line, as is proved in *Physic. vi, 1*. But time is terminated by an instant. Hence in the whole of the previous time wherein anything is moving towards its form, it is under the opposite form; but in the last instant of this time, which is the first instant of the subsequent time, it has the form which is the term of the movement.

But in those that are above time, it is otherwise. For

if there be any succession of affections or intellectual conceptions in them (as in the angels), such succession is not measured by continuous time, but by discrete time, even as the things measured are not continuous, as stated above (*Ia, q. 53, Aa. 2,3*). In these, therefore, there is a last instant in which the preceding is, and a first instant in which the subsequent is. Nor must there be time in between, since there is no continuity of time, which this would necessitate.

Now the human mind, which is justified, is, in itself, above time, but is subject to time accidentally, inasmuch as it understands with continuity and time, with respect to the phantasms in which it considers the intelligible species, as stated above (*Ia, q. 85, Aa. 1,2*). We must, therefore, decide from this about its change as regards the condition of temporal movements, i.e. we must say that there is no last instant that sin inheres, but a last time; whereas there is a first instant that grace inheres; and in all the time previous sin inhered.

Objection 1. It would seem that the infusion of grace is not what is naturally required first for the justification of the ungodly. For we withdraw from evil before drawing near to good, according to Ps. 33:15: "Turn away from evil, and do good." Now the remission of sins regards the turning away from evil, and the infusion of grace regards the turning to good. Hence the remission of sin is naturally before the infusion of grace.

Objection 2. Further, the disposition naturally precedes the form to which it disposes. Now the free-will's movement is a disposition for the reception of grace. Therefore it naturally precedes the infusion of grace.

Objection 3. Further, sin hinders the soul from tending freely to God. Now a hindrance to movement must be removed before the movement takes place. Hence the remission of sin and the free-will's movement towards sin are naturally before the infusion of grace.

On the contrary, The cause is naturally prior to its effect. Now the infusion of grace is the cause of whatever is required for the justification of the ungodly, as stated above (a. 7). Therefore it is naturally prior to it.

I answer that, The aforesaid four things required for the justification of the ungodly are simultaneous in time, since the justification of the ungodly is not successive, as stated above (a. 7); but in the order of nature, one is prior to another; and in their natural order the first is the infusion of grace; the second, the free-will's movement towards God; the third, the free-will's movement towards sin; the fourth, the remission of sin.

The reason for this is that in every movement the motion of the mover is naturally first; the disposition of the matter, or the movement of the moved, is second; the end or term of the movement in which the motion of the mover rests, is last. Now the motion of God the Mover is the infusion of grace, as stated above (a. 6); the movement or disposition of the moved is the free-will's double movement; and the term or end of the movement is the remission of sin, as stated above (a. 6). Hence in their natural order the first in the justification of the ungodly is the infusion of grace; the second is the free-will's movement towards God; the third is the free-will's movement towards sin, for he who is being justified detests sin because it is against God, and thus

the free-will's movement towards God naturally precedes the free-will's movement towards sin, since it is its cause and reason; the fourth and last is the remission of sin, to which this transmutation is ordained as to an end, as stated above (Aa. 1,6).

Reply to Objection 1. The withdrawal from one term and approach to another may be looked at in two ways: first, on the part of the thing moved, and thus the withdrawal from a term naturally precedes the approach to a term, since in the subject of movement the opposite which is put away is prior to the opposite which the subject moved attains to by its movement. But on the part of the agent it is the other way about, since the agent, by the form pre-existing in it, acts for the removal of the opposite form; as the sun by its light acts for the removal of darkness, and hence on the part of the sun, illumination is prior to the removal of darkness; but on the part of the atmosphere to be illuminated, to be freed from darkness is, in the order of nature, prior to being illuminated, although both are simultaneous in time. And since the infusion of grace and the remission of sin regard God Who justifies, hence in the order of nature the infusion of grace is prior to the freeing from sin. But if we look at what is on the part of the man justified, it is the other way about, since in the order of nature the being freed from sin is prior to the obtaining of justifying grace. Or it may be said that the term "whence" of justification is sin; and the term "whereto" is justice; and that grace is the cause of the forgiveness of sin and of obtaining of justice.

Reply to Objection 2. The disposition of the subject precedes the reception of the form, in the order of nature; yet it follows the action of the agent, whereby the subject is disposed. And hence the free-will's movement precedes the reception of grace in the order of nature, and follows the infusion of grace.

Reply to Objection 3. As the Philosopher says (Phys. ii, 9), in movements of the soul the movement toward the speculative principle or the practical end is the very first, but in exterior movements the removal of the impediment precedes the attainment of the end. And as the free-will's movement is a movement of the soul, in the order of nature it moves towards God as to its end, before removing the impediment of sin.

Objection 1. It would seem that the justification of the ungodly is not God's greatest work. For it is by the justification of the ungodly that we attain the grace of a wayfarer. Now by glorification we receive heavenly grace, which is greater. Hence the glorification of angels and men is a greater work than the justification of the ungodly.

Objection 2. Further, the justification of the ungodly is ordained to the particular good of one man. But the good of the universe is greater than the good of one man, as is plain from *Ethic.* i, 2. Hence the creation of heaven and earth is a greater work than the justification of the ungodly.

Objection 3. Further, to make something from nothing, where there is nought to cooperate with the agent, is greater than to make something with the cooperation of the recipient. Now in the work of creation something is made from nothing, and hence nothing can cooperate with the agent; but in the justification of the ungodly God makes something from something, i.e. a just man from a sinner, and there is a cooperation on man's part, since there is a movement of the free-will, as stated above (a. 3). Hence the justification of the ungodly is not God's greatest work.

On the contrary, It is written (*Ps.* 144:9): "His tender mercies are over all His works," and in a collect* we say: "O God, Who dost show forth Thine all-mightiness most by pardoning and having mercy," and Augustine, expounding the words, "greater than these shall he do" (*Jn.* 14:12) says that "for a just man to be made from a sinner, is greater than to create heaven and earth."

I answer that, A work may be called great in two ways: first, on the part of the mode of action, and thus the work of creation is the greatest work, wherein some-

thing is made from nothing; secondly, a work may be called great on account of what is made, and thus the justification of the ungodly, which terminates at the eternal good of a share in the Godhead, is greater than the creation of heaven and earth, which terminates at the good of mutable nature. Hence, Augustine, after saying that "for a just man to be made from a sinner is greater than to create heaven and earth," adds, "for heaven and earth shall pass away, but the justification of the ungodly shall endure."

Again, we must bear in mind that a thing is called great in two ways: first, in an absolute quantity, and thus the gift of glory is greater than the gift of grace that sanctifies the ungodly; and in this respect the glorification of the just is greater than the justification of the ungodly. Secondly, a thing may be said to be great in proportionate quantity, and thus the gift of grace that justifies the ungodly is greater than the gift of glory that beatifies the just, for the gift of grace exceeds the worthiness of the ungodly, who are worthy of punishment, more than the gift of glory exceeds the worthiness of the just, who by the fact of their justification are worthy of glory. Hence Augustine says: "Let him that can, judge whether it is greater to create the angels just, than to justify the ungodly. Certainly, if they both betoken equal power, one betokens greater mercy."

And thus the reply to the first is clear.

Reply to Objection 2. The good of the universe is greater than the particular good of one, if we consider both in the same genus. But the good of grace in one is greater than the good of nature in the whole universe.

Reply to Objection 3. This objection rests on the manner of acting, in which way creation is God's greatest work.

* Tenth Sunday after Pentecost

FIRST PART OF THE SECOND PART, QUESTION 114

Of Merit (In Ten Articles)

We must now consider merit, which is the effect of cooperating grace; and under this head there are ten points of inquiry:

- (1) Whether a man can merit anything from God?
- (2) Whether without grace anyone can merit eternal life?
- (3) Whether anyone with grace may merit eternal life condignly?
- (4) Whether it is chiefly through the instrumentality of charity that grace is the principle of merit?
- (5) Whether a man may merit the first grace for himself?
- (6) Whether he may merit it for someone else?
- (7) Whether anyone can merit restoration after sin?
- (8) Whether he can merit for himself an increase of grace or charity?
- (9) Whether he can merit final perseverance?
- (10) Whether temporal goods fall under merit?

Whether a man may merit anything from God?

Ia IIae q. 114 a. 1

Objection 1. It would seem that a man can merit nothing from God. For no one, it would seem, merits by giving another his due. But by all the good we do, we cannot make sufficient return to God, since yet more is His due, as also the Philosopher says (*Ethic.* viii, 14). Hence it is written (*Lk.* 17:10): “When you have done all these things that are commanded you, say: We are unprofitable servants; we have done that which we ought to do.” Therefore a man can merit nothing from God.

Objection 2. Further, it would seem that a man merits nothing from God, by what profits himself only, and profits God nothing. Now by acting well, a man profits himself or another man, but not God, for it is written (*Job* 35:7): “If thou do justly, what shalt thou give Him, or what shall He receive of thy hand.” Hence a man can merit nothing from God.

Objection 3. Further, whoever merits anything from another makes him his debtor; for a man’s wage is a debt due to him. Now God is no one’s debtor; hence it is written (*Rom.* 11:35): “Who hath first given to Him, and recompense shall be made to him?” Hence no one can merit anything from God.

On the contrary, It is written (*Jer.* 31:16): “There is a reward for thy work.” Now a reward means something bestowed by reason of merit. Hence it would seem that a man may merit from God.

I answer that, Merit and reward refer to the same, for a reward means something given anyone in return for work or toil, as a price for it. Hence, as it is an act of justice to give a just price for anything received from another, so also is it an act of justice to make a return for work or toil. Now justice is a kind of equality, as is clear from the Philosopher (*Ethic.* v, 3), and hence justice is simply between those that are simply equal; but where there is no absolute equality between them, neither is there absolute justice, but there may be a cer-

tain manner of justice, as when we speak of a father’s or a master’s right (*Ethic.* v, 6), as the Philosopher says. And hence where there is justice simply, there is the character of merit and reward simply. But where there is no simple right, but only relative, there is no character of merit simply, but only relatively, in so far as the character of justice is found there, since the child merits something from his father and the slave from his lord.

Now it is clear that between God and man there is the greatest inequality: for they are infinitely apart, and all man’s good is from God. Hence there can be no justice of absolute equality between man and God, but only of a certain proportion, inasmuch as both operate after their own manner. Now the manner and measure of human virtue is in man from God. Hence man’s merit with God only exists on the presupposition of the Divine ordination, so that man obtains from God, as a reward of his operation, what God gave him the power of operation for, even as natural things by their proper movements and operations obtain that to which they were ordained by God; differently, indeed, since the rational creature moves itself to act by its free-will, hence its action has the character of merit, which is not so in other creatures.

Reply to Objection 1. Man merits, inasmuch as he does what he ought, by his free-will; otherwise the act of justice whereby anyone discharges a debt would not be meritorious.

Reply to Objection 2. God seeks from our goods not profit, but glory, i.e. the manifestation of His goodness; even as He seeks it also in His own works. Now nothing accrues to Him, but only to ourselves, by our worship of Him. Hence we merit from God, not that by our works anything accrues to Him, but inasmuch as we work for His glory.

Reply to Objection 3. Since our action has the character of merit, only on the presupposition of the Di-

vine ordination, it does not follow that God is made our debtor simply, but His own, inasmuch as it is right that

His will should be carried out.

Whether anyone without grace can merit eternal life?

Ia IIae q. 114 a. 2

Objection 1. It would seem that without grace anyone can merit eternal life. For man merits from God what he is divinely ordained to, as stated above (a. 1). Now man by his nature is ordained to beatitude as his end; hence, too, he naturally wishes to be blessed. Hence man by his natural endowments and without grace can merit beatitude which is eternal life.

Objection 2. Further, the less a work is due, the more meritorious it is. Now, less due is that work which is done by one who has received fewer benefits. Hence, since he who has only natural endowments has received fewer gifts from God, than he who has gratuitous gifts as well as nature, it would seem that his works are more meritorious with God. And thus if he who has grace can merit eternal life to some extent, much more may he who has no grace.

Objection 3. Further, God's mercy and liberality infinitely surpass human mercy and liberality. Now a man may merit from another, even though he has not hitherto had his grace. Much more, therefore, would it seem that a man without grace may merit eternal life.

On the contrary, The Apostle says (Rom. 6:23): "The grace of God, life everlasting."

I answer that, Man without grace may be looked at in two states, as was said above (q. 109, a. 2): the first, a state of perfect nature, in which Adam was before his sin; the second, a state of corrupt nature, in which we are before being restored by grace. Therefore, if we speak of man in the first state, there is only one reason why man cannot merit eternal life without grace, by his purely natural endowments, viz. because man's merit depends on the Divine pre-ordination. Now no act of anything whatsoever is divinely ordained to anything exceeding the proportion of the powers which are the principles of its act; for it is a law of Divine providence that nothing shall act beyond its powers. Now everlasting life is a good exceeding the proportion of created nature; since it exceeds its knowledge and desire, ac-

ording to 1 Cor. 2:9: "Eye hath not seen, nor ear heard, neither hath it entered into the heart of man." And hence it is that no created nature is a sufficient principle of an act meritorious of eternal life, unless there is added a supernatural gift, which we call grace. But if we speak of man as existing in sin, a second reason is added to this, viz. the impediment of sin. For since sin is an offense against God, excluding us from eternal life, as is clear from what has been said above (q. 71, a. 6; q. 113, a. 2), no one existing in a state of mortal sin can merit eternal life unless first he be reconciled to God, through his sin being forgiven, which is brought about by grace. For the sinner deserves not life, but death, according to Rom. 6:23: "The wages of sin is death."

Reply to Objection 1. God ordained human nature to attain the end of eternal life, not by its own strength, but by the help of grace; and in this way its act can be meritorious of eternal life.

Reply to Objection 2. Without grace a man cannot have a work equal to a work proceeding from grace, since the more perfect the principle, the more perfect the action. But the objection would hold good, if we supposed the operations equal in both cases.

Reply to Objection 3. With regard to the first reason adduced, the case is different in God and in man. For a man receives all his power of well-doing from God, and not from man. Hence a man can merit nothing from God except by His gift, which the Apostle expresses aptly saying (Rom. 11:35): "Who hath first given to Him, and recompense shall be made to him?" But man may merit from man, before he has received anything from him, by what he has received from God.

But as regards the second proof taken from the impediment of sin, the case is similar with man and God, since one man cannot merit from another whom he has offended, unless he makes satisfaction to him and is reconciled.

Whether a man in grace can merit eternal life condignly?

Ia IIae q. 114 a. 3

Objection 1. It would seem that a man in grace cannot merit eternal life condignly, for the Apostle says (Rom. 8:18): "The sufferings of this time are not worthy [condignae] to be compared with the glory to come, that shall be revealed in us." But of all meritorious works, the sufferings of the saints would seem the most meritorious. Therefore no works of men are meritorious of eternal life condignly.

Objection 2. Further, on Rom. 6:23, "The grace of God, life everlasting," a gloss says: "He might have truly said: 'The wages of justice, life everlasting'; but

He preferred to say 'The grace of God, life everlasting,' that we may know that God leads us to life everlasting of His own mercy and not by our merits." Now when anyone merits something condignly he receives it not from mercy, but from merit. Hence it would seem that a man with grace cannot merit life everlasting condignly.

Objection 3. Further, merit that equals the reward, would seem to be condign. Now no act of the present life can equal everlasting life, which surpasses our knowledge and our desire, and moreover, surpasses the charity or love of the wayfarer, even as it exceeds

nature. Therefore with grace a man cannot merit eternal life condignly.

On the contrary, What is granted in accordance with a fair judgment, would seem a condign reward. But life everlasting is granted by God, in accordance with the judgment of justice, according to 2 Tim. 4:8: “As to the rest, there is laid up for me a crown of justice, which the Lord, the just judge, will render to me in that day.” Therefore man merits everlasting life condignly.

I answer that, Man’s meritorious work may be considered in two ways: first, as it proceeds from free-will; secondly, as it proceeds from the grace of the Holy Ghost. If it is considered as regards the substance of the work, and inasmuch as it springs from the free-will, there can be no condignity because of the very great inequality. But there is congruity, on account of an equality of proportion: for it would seem congruous that, if a man does what he can, God should reward him according to the excellence of his power.

If, however, we speak of a meritorious work, inasmuch as it proceeds from the grace of the Holy Ghost moving us to life everlasting, it is meritorious of life

everlasting condignly. For thus the value of its merit depends upon the power of the Holy Ghost moving us to life everlasting according to Jn. 4:14: “Shall become in him a fount of water springing up into life everlasting.” And the worth of the work depends on the dignity of grace, whereby a man, being made a partaker of the Divine Nature, is adopted as a son of God, to whom the inheritance is due by right of adoption, according to Rom. 8:17: “If sons, heirs also.”

Reply to Objection 1. The Apostle is speaking of the substance of these sufferings.

Reply to Objection 2. This saying is to be understood of the first cause of our reaching everlasting life, viz. God’s mercy. But our merit is a subsequent cause.

Reply to Objection 3. The grace of the Holy Ghost which we have at present, although unequal to glory in act, is equal to it virtually as the seed of a tree, wherein the whole tree is virtually. So likewise by grace of the Holy Ghost dwells in man; and He is a sufficient cause of life everlasting; hence, 2 Cor. 1:22, He is called the “pledge” of our inheritance.

Whether grace is the principle of merit through charity rather than the other virtues? Ia IIae q. 114 a. 4

Objection 1. It would seem that grace is not the principle of merit through charity rather than the other virtues. For wages are due to work, according to Mat. 20:8: “Call the laborers and pay them their hire.” Now every virtue is a principle of some operation, since virtue is an operative habit, as stated above (q. 55, a. 2). Hence every virtue is equally a principle of merit.

Objection 2. Further, the Apostle says (1 Cor. 3:8): “Every man shall receive his own reward according to his labor.” Now charity lessens rather than increases the labor, because as Augustine says (De Verbis Dom., Serm. lxx), “love makes all hard and repulsive tasks easy and next to nothing.” Hence charity is no greater principle of merit than any other virtue.

Objection 3. Further, the greatest principle of merit would seem to be the one whose acts are most meritorious. But the acts of faith and patience or fortitude would seem to be the most meritorious, as appears in the martyrs, who strove for the faith patiently and bravely even till death. Hence other virtues are a greater principle of merit than charity.

On the contrary, Our Lord said (Jn. 14:21): “He that loveth Me, shall be loved of My Father; and I will love him and will manifest Myself to him.” Now everlasting life consists in the manifest knowledge of God, according to Jn. 17:3: “This is eternal life: that they may know Thee, the only true” and living “God.” Hence the merit of eternal life rests chiefly with charity.

I answer that, As we may gather from what has been stated above (a. 1), human acts have the nature of merit from two causes: first and chiefly from the Divine ordination, inasmuch as acts are said to merit that

good to which man is divinely ordained. Secondly, on the part of free-will, inasmuch as man, more than other creatures, has the power of voluntary acts by acting by himself. And in both these ways does merit chiefly rest with charity. For we must bear in mind that everlasting life consists in the enjoyment of God. Now the human mind’s movement to the fruition of the Divine good is the proper act of charity, whereby all the acts of the other virtues are ordained to this end, since all the other virtues are commanded by charity. Hence the merit of life everlasting pertains first to charity, and secondly, to the other virtues, inasmuch as their acts are commanded by charity. So, likewise, is it manifest that what we do out of love we do most willingly. Hence, even inasmuch as merit depends on voluntariness, merit is chiefly attributed to charity.

Reply to Objection 1. Charity, inasmuch as it has the last end for object, moves the other virtues to act. For the habit to which the end pertains always commands the habits to which the means pertain, as was said above (q. 9, a. 1).

Reply to Objection 2. A work can be toilsome and difficult in two ways: first, from the greatness of the work, and thus the greatness of the work pertains to the increase of merit; and thus charity does not lessen the toil—rather, it makes us undertake the greatest toils, “for it does great things, if it exists,” as Gregory says (Hom. in Evang. xxx). Secondly, from the defect of the operator; for what is not done with a ready will is hard and difficult to all of us, and this toil lessens merit and is removed by charity.

Reply to Objection 3. The act of faith is not mer-

itorious unless “faith. . . worketh by charity” (Gal. 5:6). So, too, the acts of patience and fortitude are not meritorious unless a man does them out of charity, accord-

ing to 1 Cor. 13:3: “If I should deliver my body to be burned, and have not charity, it profiteth me nothing.”

Whether a man may merit for himself the first grace?

Ia IIae q. 114 a. 5

Objection 1. It would seem that a man may merit for himself the first grace, because, as Augustine says (Ep. clxxxvi), “faith merits justification.” Now a man is justified by the first grace. Therefore a man may merit the first grace.

Objection 2. Further, God gives grace only to the worthy. Now, no one is said to be worthy of some good, unless he has merited it condignly. Therefore we may merit the first grace condignly.

Objection 3. Further, with men we may merit a gift already received. Thus if a man receives a horse from his master, he merits it by a good use of it in his master’s service. Now God is much more bountiful than man. Much more, therefore, may a man, by subsequent works, merit the first grace already received from God.

On the contrary, The nature of grace is repugnant to reward of works, according to Rom. 4:4: “Now to him that worketh, the reward is not reckoned according to grace but according to debt.” Now a man merits what is reckoned to him according to debt, as the reward of his works. Hence a man may not merit the first grace.

I answer that, The gift of grace may be considered in two ways: first in the nature of a gratuitous gift, and thus it is manifest that all merit is repugnant to grace, since as the Apostle says (Rom. 11:6), “if by grace, it is not now by works.” Secondly, it may be considered as regards the nature of the thing given, and thus, also, it cannot come under the merit of him who has not grace, both because it exceeds the proportion of nature, and because previous to grace a man in the state of sin has an obstacle to his meriting grace, viz. sin. But when any-

one has grace, the grace already possessed cannot come under merit, since reward is the term of the work, but grace is the principle of all our good works, as stated above (q. 109). But of anyone merits a further gratuitous gift by virtue of the preceding grace, it would not be the first grace. Hence it is manifest that no one can merit for himself the first grace.

Reply to Objection 1. As Augustine says (Retract. i, 23), he was deceived on this point for a time, believing the beginning of faith to be from us, and its consummation to be granted us by God; and this he here retracts. And seemingly it is in this sense that he speaks of faith as meriting justification. But if we suppose, as indeed it is a truth of faith, that the beginning of faith is in us from God, the first act must flow from grace; and thus it cannot be meritorious of the first grace. Therefore man is justified by faith, not as though man, by believing, were to merit justification, but that, he believes, whilst he is being justified; inasmuch as a movement of faith is required for the justification of the ungodly, as stated above (q. 113, a. 4).

Reply to Objection 2. God gives grace to none but to the worthy, not that they were previously worthy, but that by His grace He makes them worthy, Who alone “can make him clean that is conceived of unclean seed” (Job 14:4).

Reply to Objection 3. Man’s every good work proceeds from the first grace as from its principle; but not from any gift of man. Consequently, there is no comparison between gifts of grace and gifts of men.

Whether a man can merit the first grace for another?

Ia IIae q. 114 a. 6

Objection 1. It would seem that a man can merit the first grace for another. Because on Mat. 9:2: “Jesus seeing their faith,” etc. a gloss says: “How much is our personal faith worth with God, Who set such a price on another’s faith, as to heal the man both inwardly and outwardly!” Now inward healing is brought about by grace. Hence a man can merit the first grace for another.

Objection 2. Further, the prayers of the just are not void, but efficacious, according to James 5:16: “The continued prayer of a just man availeth much.” Now he had previously said: “Pray one for another, that you may be saved.” Hence, since man’s salvation can only be brought about by grace, it seems that one man may merit for another his first grace.

Objection 3. Further, it is written (Lk. 16:9): “Make unto you friends of the mammon of iniquity, that when you shall fail they may receive you into everlast-

ing dwellings.” Now it is through grace alone that anyone is received into everlasting dwellings, for by it alone does anyone merit everlasting life as stated above (a. 2; q. 109, a. 5). Hence one man may by merit obtain for another his first grace.

On the contrary, It is written (Jer. 15:1): “If Moses and Samuel shall stand before Me, My soul is not towards this people” —yet they had great merit with God. Hence it seems that no one can merit the first grace for another.

I answer that, As shown above (Aa. 1,3,4), our works are meritorious from two causes: first, by virtue of the Divine motion; and thus we merit condignly; secondly, according as they proceed from free-will in so far as we do them willingly, and thus they have congruous merit, since it is congruous that when a man makes good use of his power God should by His super-

excellent power work still higher things. And therefore it is clear that no one can merit condignly for another his first grace, save Christ alone; since each one of us is moved by God to reach life everlasting through the gift of grace; hence condign merit does not reach beyond this motion. But Christ's soul is moved by God through grace, not only so as to reach the glory of life everlasting, but so as to lead others to it, inasmuch as He is the Head of the Church, and the Author of human salvation, according to Heb. 2:10: "Who hath brought many children into glory [to perfect] the Author of their salvation."

But one may merit the first grace for another congruously; because a man in grace fulfils God's will, and it is congruous and in harmony with friendship that God should fulfil man's desire for the salvation of another, although sometimes there may be an impediment on the part of him whose salvation the just man desires. And it

is in this sense that the passage from Jeremias speaks.

Reply to Objection 1. A man's faith avails for another's salvation by congruous and not by condign merit.

Reply to Objection 2. The impetration of prayer rests on mercy, whereas condign merit rests on justice; hence a man may impetrate many things from the Divine mercy in prayer, which he does not merit in justice, according to Dan. 9:18: "For it is not for our justifications that we present our prayers before Thy face, but for the multitude of Thy tender mercies."

Reply to Objection 3. The poor who receive alms are said to receive others into everlasting dwellings, either by impetrating their forgiveness in prayer, or by meriting congruously by other good works, or materially speaking, inasmuch as by these good works of mercy, exercised towards the poor, we merit to be received into everlasting dwellings.

Whether a man may merit restoration after a fall?

Ia IIae q. 114 a. 7

Objection 1. It would seem that anyone may merit for himself restoration after a fall. For what a man may justly ask of God, he may justly merit. Now nothing may more justly be besought of God than to be restored after a fall, as Augustine says*, according to Ps. 70:9: "When my strength shall fail, do not Thou forsake me." Hence a man may merit to be restored after a fall.

Objection 2. Further, a man's works benefit himself more than another. Now a man may, to some extent, merit for another his restoration after a fall, even as his first grace. Much more, therefore, may he merit for himself restoration after a fall.

Objection 3. Further, when a man is once in grace he merits life everlasting by the good works he does, as was shown above (a. 2; q. 109, a. 5). Now no one can attain life everlasting unless he is restored by grace. Hence it would seem that he merits for himself restoration.

On the contrary, It is written (Ezech. 18:24): "If the just man turn himself away from his justice and do iniquity. . . all his justices which he hath done shall not be remembered." Therefore his previous merits will nowise help him to rise again. Hence no one can merit for himself restoration after a fall.

I answer that, No one can merit for himself restoration after a future fall, either condignly or congruously. He cannot merit for himself condignly, since the reason of this merit depends on the motion of Divine grace, and this motion is interrupted by the subsequent sin; hence all benefits which he afterwards obtains from God, whereby he is restored, do not fall under merit—

the motion of the preceding grace not extending to them. Again, congruous merit, whereby one merits the first grace for another, is prevented from having its effect on account of the impediment of sin in the one for whom it is merited. Much more, therefore, is the efficacy of such merit impeded by the obstacle which is in him who merits, and in him for whom it is merited; for both these are in the same person. And therefore a man can nowise merit for himself restoration after a fall.

Reply to Objection 1. The desire whereby we seek for restoration after a fall is called just, and likewise the prayer whereby this restoration is besought is called just, because it tends to justice; and not that it depends on justice by way of merit, but only on mercy.

Reply to Objection 2. Anyone may congruously merit for another his first grace, because there is no impediment (at least, on the part of him who merits), such as is found when anyone recedes from justice after the merit of grace.

Reply to Objection 3. Some have said that no one "absolutely" merits life everlasting except by the act of final grace, but only "conditionally," i.e. if he perseveres. But it is unreasonable to say this, for sometimes the act of the last grace is not more, but less meritorious than preceding acts, on account of the prostration of illness. Hence it must be said that every act of charity merits eternal life absolutely; but by subsequent sin, there arises an impediment to the preceding merit, so that it does not obtain its effect; just as natural causes fail of their effects on account of a supervening impediment.

* Cf. Ennar. i super Ps. lxx.

Objection 1. It would seem that a man cannot merit an increase of grace or charity. For when anyone receives the reward he merited no other reward is due to him; thus it was said of some (Mat. 6:2): “They have received their reward.” Hence, if anyone were to merit the increase of charity or grace, it would follow that, when his grace has been increased, he could not expect any further reward, which is unfitting.

Objection 2. Further, nothing acts beyond its species. But the principle of merit is grace or charity, as was shown above (Aa. 2, 4). Therefore no one can merit greater grace or charity than he has.

Objection 3. Further, what falls under merit a man merits by every act flowing from grace or charity, as by every such act a man merits life everlasting. If, therefore, the increase of grace or charity falls under merit, it would seem that by every act quickened by charity a man would merit an increase of charity. But what a man merits, he infallibly receives from God, unless hindered by subsequent sin; for it is written (2 Tim. 1:12): “I know Whom I have believed, and I am certain that He is able to keep that which I have committed unto Him.” Hence it would follow that grace or charity is increased by every meritorious act; and this would seem impossible since at times meritorious acts are not very fervent, and would not suffice for the increase of charity. Therefore the increase of charity does not come under merit.

On the contrary, Augustine says (super Ep. Joan.; cf. Ep. clxxxvi) that “charity merits increase, and being increased merits to be perfected.” Hence the increase of

grace or charity falls under merit.

I answer that, As stated above (Aa. 6,7), whatever the motion of grace reaches to, falls under condign merit. Now the motion of a mover extends not merely to the last term of the movement, but to the whole progress of the movement. But the term of the movement of grace is eternal life; and progress in this movement is by the increase of charity or grace according to Prov. 4:18: “But the path of the just as a shining light, goeth forward and increaseth even to perfect day,” which is the day of glory. And thus the increase of grace falls under condign merit.

Reply to Objection 1. Reward is the term of merit. But there is a double term of movement, viz. the last, and the intermediate, which is both beginning and term; and this term is the reward of increase. Now the reward of human favor is as the last end to those who place their end in it; hence such as these receive no other reward.

Reply to Objection 2. The increase of grace is not above the virtuality of the pre-existing grace, although it is above its quantity, even as a tree is not above the virtuality of the seed, although above its quantity.

Reply to Objection 3. By every meritorious act a man merits the increase of grace, equally with the consummation of grace which is eternal life. But just as eternal life is not given at once, but in its own time, so neither is grace increased at once, but in its own time, viz. when a man is sufficiently disposed for the increase of grace.

Objection 1. It would seem that anyone may merit perseverance. For what a man obtains by asking, can come under the merit of anyone that is in grace. Now men obtain perseverance by asking it of God; otherwise it would be useless to ask it of God in the petitions of the Lord’s Prayer, as Augustine says (De Dono Persev. ii). Therefore perseverance may come under the merit of whoever has grace.

Objection 2. Further, it is more not to be able to sin than not to sin. But not to be able to sin comes under merit, for we merit eternal life, of which impeccability is an essential part. Much more, therefore, may we merit not to sin, i.e. to persevere.

Objection 3. Further, increase of grace is greater than perseverance in the grace we already possess. But a man may merit an increase of grace, as was stated above (a. 8). Much more, therefore, may he merit perseverance in the grace he has already.

On the contrary, What we merit, we obtain from God, unless it is hindered by sin. Now many have meritorious works, who do not obtain perseverance; nor can it be urged that this takes place because of the impedi-

ment of sin, since sin itself is opposed to perseverance; and thus if anyone were to merit perseverance, God would not permit him to fall into sin. Hence perseverance does not come under merit.

I answer that, Since man’s free-will is naturally flexible towards good and evil, there are two ways of obtaining from God perseverance in good: first, inasmuch as free-will is determined to good by consummate grace, which will be in glory; secondly, on the part of the Divine motion, which inclines man to good unto the end. Now as explained above (Aa. 6,7,8), that which is related as a term to the free-will’s movement directed to God the mover, falls under human merit; and not what is related to the aforesaid movement as principle. Hence it is clear that the perseverance of glory which is the term of the aforesaid movement falls under merit; but perseverance of the wayfarer does not fall under merit, since it depends solely on the Divine motion, which is the principle of all merit. Now God freely bestows the good of perseverance, on whomsoever He bestows it.

Reply to Objection 1. We impetrate in prayer things that we do not merit, since God hears sinners

who beseech the pardon of their sins, which they do not merit, as appears from Augustine* on Jn. 11:31, "Now we know that God doth not hear sinners," otherwise it would have been useless for the publican to say: "O God, be merciful to me a sinner," Lk. 18:13. So too may we impetrate of God in prayer the grace of perseverance either for ourselves or for others, although it does not fall under merit.

Reply to Objection 2. The perseverance which is in heaven is compared as term to the free-will's movement; not so, the perseverance of the wayfarer, for the reason given in the body of the article.

In the same way may we answer the third objection which concerns the increase of grace, as was explained above.

Whether temporal goods fall under merit?

Ia IIae q. 114 a. 10

Objection 1. It would seem that temporal goods fall under merit. For what is promised to some as a reward of justice, falls under merit. Now, temporal goods were promised in the Old Law as the reward of justice, as appears from Dt. 28. Hence it seems that temporal goods fall under merit.

Objection 2. Further, that would seem to fall under merit, which God bestows on anyone for a service done. But God sometimes bestows temporal goods on men for services done for Him. For it is written (Ex. 1:21): "And because the midwives feared God, He built them houses"; on which a gloss of Gregory (Moral. xviii, 4) says that "life everlasting might have been awarded them as the fruit of their goodwill, but on account of their sin of falsehood they received an earthly reward." And it is written (Ezech. 29:18): "The King of Babylon hath made his army to undergo hard service against Tyre. . . and there hath been no reward given him," and further on: "And it shall be wages for his army. . . I have given him the land of Egypt because he hath labored for me." Therefore temporal goods fall under merit.

Objection 3. Further, as good is to merit so is evil to demerit. But on account of the demerit of sin some are punished by God with temporal punishments, as appears from the Sodomites, Gn. 19. Hence temporal goods fall under merit.

Objection 4. On the contrary, What falls under merit does not come upon all alike. But temporal goods regard the good and the wicked alike; according to Eccles. 9:2: "All things equally happen to the just and the wicked, to the good and to the evil, to the clean and to the unclean, to him that offereth victims and to him that despiseth sacrifices." Therefore temporal goods do not fall under merit.

I answer that, What falls under merit is the reward or wage, which is a kind of good. Now man's good is twofold: the first, simply; the second, relatively. Now man's good simply is his last end (according to Ps. 72:27: "But it is good for men to adhere to my God") and consequently what is ordained and leads to this end; and these fall simply under merit. But the relative, not the simple, good of man is what is good to him now, or what is a good to him relatively; and this does not fall under merit simply, but relatively.

Hence we must say that if temporal goods are con-

sidered as they are useful for virtuous works, whereby we are led to heaven, they fall directly and simply under merit, even as increase of grace, and everything whereby a man is helped to attain beatitude after the first grace. For God gives men, both just and wicked, enough temporal goods to enable them to attain to everlasting life; and thus these temporal goods are simply good. Hence it is written (Ps. 33:10): "For there is no want to them that fear Him," and again, Ps. 36:25: "I have not seen the just forsaken," etc.

But if these temporal goods are considered in themselves, they are not man's good simply, but relatively, and thus they do not fall under merit simply, but relatively, inasmuch as men are moved by God to do temporal works, in which with God's help they reach their purpose. And thus as life everlasting is simply the reward of the works of justice in relation to the Divine motion, as stated above (Aa. 3,6), so have temporal goods, considered in themselves, the nature of reward, with respect to the Divine motion, whereby men's wills are moved to undertake these works, even though, sometimes, men have not a right intention in them.

Reply to Objection 1. As Augustine says (Contra Faust. iv, 2), "in these temporal promises were figures of spiritual things to come. For the carnal people were adhering to the promises of the present life; and not merely their speech but even their life was prophetic."

Reply to Objection 2. These rewards are said to have been divinely brought about in relation to the Divine motion, and not in relation to the malice of their wills, especially as regards the King of Babylon, since he did not besiege Tyre as if wishing to serve God, but rather in order to usurp dominion. So, too, although the midwives had a good will with regard to saving the children, yet their will was not right, inasmuch as they framed falsehoods.

Reply to Objection 3. Temporal evils are imposed as a punishment on the wicked, inasmuch as they are not thereby helped to reach life everlasting. But to the just who are aided by these evils they are not punishments but medicines as stated above (q. 87, a. 8).

Reply to Objection 4. All things happen equally to the good and the wicked, as regards the substance of temporal good or evil; but not as regards the end, since the good and not the wicked are led to beatitude

* Tract. xlv in Joan.

by them. general.
And now enough has been said regarding morals in

Objection 1. It would seem that a man can merit nothing from God. For no one, it would seem, merits by giving another his due. But by all the good we do, we cannot make sufficient return to God, since yet more is His due, as also the Philosopher says (*Ethic.* viii, 14). Hence it is written (*Lk.* 17:10): “When you have done all these things that are commanded you, say: We are unprofitable servants; we have done that which we ought to do.” Therefore a man can merit nothing from God.

Objection 2. Further, it would seem that a man merits nothing from God, by what profits himself only, and profits God nothing. Now by acting well, a man profits himself or another man, but not God, for it is written (*Job* 35:7): “If thou do justly, what shalt thou give Him, or what shall He receive of thy hand.” Hence a man can merit nothing from God.

Objection 3. Further, whoever merits anything from another makes him his debtor; for a man’s wage is a debt due to him. Now God is no one’s debtor; hence it is written (*Rom.* 11:35): “Who hath first given to Him, and recompense shall be made to him?” Hence no one can merit anything from God.

On the contrary, It is written (*Jer.* 31:16): “There is a reward for thy work.” Now a reward means something bestowed by reason of merit. Hence it would seem that a man may merit from God.

I answer that, Merit and reward refer to the same, for a reward means something given anyone in return for work or toil, as a price for it. Hence, as it is an act of justice to give a just price for anything received from another, so also is it an act of justice to make a return for work or toil. Now justice is a kind of equality, as is clear from the Philosopher (*Ethic.* v, 3), and hence justice is simply between those that are simply equal; but where there is no absolute equality between them, neither is there absolute justice, but there may be a certain manner of justice, as when we speak of a father’s or a master’s right (*Ethic.* v, 6), as the Philosopher says.

And hence where there is justice simply, there is the character of merit and reward simply. But where there is no simple right, but only relative, there is no character of merit simply, but only relatively, in so far as the character of justice is found there, since the child merits something from his father and the slave from his lord.

Now it is clear that between God and man there is the greatest inequality: for they are infinitely apart, and all man’s good is from God. Hence there can be no justice of absolute equality between man and God, but only of a certain proportion, inasmuch as both operate after their own manner. Now the manner and measure of human virtue is in man from God. Hence man’s merit with God only exists on the presupposition of the Divine ordination, so that man obtains from God, as a reward of his operation, what God gave him the power of operation for, even as natural things by their proper movements and operations obtain that to which they were ordained by God; differently, indeed, since the rational creature moves itself to act by its free-will, hence its action has the character of merit, which is not so in other creatures.

Reply to Objection 1. Man merits, inasmuch as he does what he ought, by his free-will; otherwise the act of justice whereby anyone discharges a debt would not be meritorious.

Reply to Objection 2. God seeks from our goods not profit, but glory, i.e. the manifestation of His goodness; even as He seeks it also in His own works. Now nothing accrues to Him, but only to ourselves, by our worship of Him. Hence we merit from God, not that by our works anything accrues to Him, but inasmuch as we work for His glory.

Reply to Objection 3. Since our action has the character of merit, only on the presupposition of the Divine ordination, it does not follow that God is made our debtor simply, but His own, inasmuch as it is right that His will should be carried out.

Objection 1. It would seem that temporal goods fall under merit. For what is promised to some as a reward of justice, falls under merit. Now, temporal goods were promised in the Old Law as the reward of justice, as appears from Dt. 28. Hence it seems that temporal goods fall under merit.

Objection 2. Further, that would seem to fall under merit, which God bestows on anyone for a service done. But God sometimes bestows temporal goods on men for services done for Him. For it is written (Ex. 1:21): “And because the midwives feared God, He built them houses”; on which a gloss of Gregory (Moral. xviii, 4) says that “life everlasting might have been awarded them as the fruit of their goodwill, but on account of their sin of falsehood they received an earthly reward.” And it is written (Ezech. 29:18): “The King of Babylon hath made his army to undergo hard service against Tyre. . . and there hath been no reward given him,” and further on: “And it shall be wages for his army. . . I have given him the land of Egypt because he hath labored for me.” Therefore temporal goods fall under merit.

Objection 3. Further, as good is to merit so is evil to demerit. But on account of the demerit of sin some are punished by God with temporal punishments, as appears from the Sodomites, Gn. 19. Hence temporal goods fall under merit.

Objection 4. On the contrary, What falls under merit does not come upon all alike. But temporal goods regard the good and the wicked alike; according to Eccles. 9:2: “All things equally happen to the just and the wicked, to the good and to the evil, to the clean and to the unclean, to him that offereth victims and to him that despiseth sacrifices.” Therefore temporal goods do not fall under merit.

I answer that, What falls under merit is the reward or wage, which is a kind of good. Now man’s good is twofold: the first, simply; the second, relatively. Now man’s good simply is his last end (according to Ps. 72:27: “But it is good for men to adhere to my God”) and consequently what is ordained and leads to this end; and these fall simply under merit. But the relative, not the simple, good of man is what is good to him now, or what is a good to him relatively; and this does not fall under merit simply, but relatively.

Hence we must say that if temporal goods are considered as they are useful for virtuous works, whereby we are led to heaven, they fall directly and simply un-

der merit, even as increase of grace, and everything whereby a man is helped to attain beatitude after the first grace. For God gives men, both just and wicked, enough temporal goods to enable them to attain to everlasting life; and thus these temporal goods are simply good. Hence it is written (Ps. 33:10): “For there is no want to them that fear Him,” and again, Ps. 36:25: “I have not seen the just forsaken,” etc.

But if these temporal goods are considered in themselves, they are not man’s good simply, but relatively, and thus they do not fall under merit simply, but relatively, inasmuch as men are moved by God to do temporal works, in which with God’s help they reach their purpose. And thus as life everlasting is simply the reward of the works of justice in relation to the Divine motion, as stated above (Aa. 3,6), so have temporal goods, considered in themselves, the nature of reward, with respect to the Divine motion, whereby men’s wills are moved to undertake these works, even though, sometimes, men have not a right intention in them.

Reply to Objection 1. As Augustine says (Contra Faust. iv, 2), “in these temporal promises were figures of spiritual things to come. For the carnal people were adhering to the promises of the present life; and not merely their speech but even their life was prophetic.”

Reply to Objection 2. These rewards are said to have been divinely brought about in relation to the Divine motion, and not in relation to the malice of their wills, especially as regards the King of Babylon, since he did not besiege Tyre as if wishing to serve God, but rather in order to usurp dominion. So, too, although the midwives had a good will with regard to saving the children, yet their will was not right, inasmuch as they framed falsehoods.

Reply to Objection 3. Temporal evils are imposed as a punishment on the wicked, inasmuch as they are not thereby helped to reach life everlasting. But to the just who are aided by these evils they are not punishments but medicines as stated above (q. 87, a. 8).

Reply to Objection 4. All things happen equally to the good and the wicked, as regards the substance of temporal good or evil; but not as regards the end, since the good and not the wicked are led to beatitude by them.

And now enough has been said regarding morals in general.

Objection 1. It would seem that without grace anyone can merit eternal life. For man merits from God what he is divinely ordained to, as stated above (a. 1). Now man by his nature is ordained to beatitude as his end; hence, too, he naturally wishes to be blessed. Hence man by his natural endowments and without grace can merit beatitude which is eternal life.

Objection 2. Further, the less a work is due, the more meritorious it is. Now, less due is that work which is done by one who has received fewer benefits. Hence, since he who has only natural endowments has received fewer gifts from God, than he who has gratuitous gifts as well as nature, it would seem that his works are more meritorious with God. And thus if he who has grace can merit eternal life to some extent, much more may he who has no grace.

Objection 3. Further, God's mercy and liberality infinitely surpass human mercy and liberality. Now a man may merit from another, even though he has not hitherto had his grace. Much more, therefore, would it seem that a man without grace may merit eternal life.

On the contrary, The Apostle says (Rom. 6:23): "The grace of God, life everlasting."

I answer that, Man without grace may be looked at in two states, as was said above (q. 109, a. 2): the first, a state of perfect nature, in which Adam was before his sin; the second, a state of corrupt nature, in which we are before being restored by grace. Therefore, if we speak of man in the first state, there is only one reason why man cannot merit eternal life without grace, by his purely natural endowments, viz. because man's merit depends on the Divine pre-ordination. Now no act of anything whatsoever is divinely ordained to anything exceeding the proportion of the powers which are the principles of its act; for it is a law of Divine providence that nothing shall act beyond its powers. Now everlasting life is a good exceeding the proportion of created nature; since it exceeds its knowledge and desire, ac-

ording to 1 Cor. 2:9: "Eye hath not seen, nor ear heard, neither hath it entered into the heart of man." And hence it is that no created nature is a sufficient principle of an act meritorious of eternal life, unless there is added a supernatural gift, which we call grace. But if we speak of man as existing in sin, a second reason is added to this, viz. the impediment of sin. For since sin is an offense against God, excluding us from eternal life, as is clear from what has been said above (q. 71, a. 6; q. 113, a. 2), no one existing in a state of mortal sin can merit eternal life unless first he be reconciled to God, through his sin being forgiven, which is brought about by grace. For the sinner deserves not life, but death, according to Rom. 6:23: "The wages of sin is death."

Reply to Objection 1. God ordained human nature to attain the end of eternal life, not by its own strength, but by the help of grace; and in this way its act can be meritorious of eternal life.

Reply to Objection 2. Without grace a man cannot have a work equal to a work proceeding from grace, since the more perfect the principle, the more perfect the action. But the objection would hold good, if we supposed the operations equal in both cases.

Reply to Objection 3. With regard to the first reason adduced, the case is different in God and in man. For a man receives all his power of well-doing from God, and not from man. Hence a man can merit nothing from God except by His gift, which the Apostle expresses aptly saying (Rom. 11:35): "Who hath first given to Him, and recompense shall be made to him?" But man may merit from man, before he has received anything from him, by what he has received from God.

But as regards the second proof taken from the impediment of sin, the case is similar with man and God, since one man cannot merit from another whom he has offended, unless he makes satisfaction to him and is reconciled.

Objection 1. It would seem that a man in grace cannot merit eternal life condignly, for the Apostle says (Rom. 8:18): “The sufferings of this time are not worthy [condignae] to be compared with the glory to come, that shall be revealed in us.” But of all meritorious works, the sufferings of the saints would seem the most meritorious. Therefore no works of men are meritorious of eternal life condignly.

Objection 2. Further, on Rom. 6:23, “The grace of God, life everlasting,” a gloss says: “He might have truly said: ‘The wages of justice, life everlasting’; but He preferred to say ‘The grace of God, life everlasting,’ that we may know that God leads us to life everlasting of His own mercy and not by our merits.” Now when anyone merits something condignly he receives it not from mercy, but from merit. Hence it would seem that a man with grace cannot merit life everlasting condignly.

Objection 3. Further, merit that equals the reward, would seem to be condign. Now no act of the present life can equal everlasting life, which surpasses our knowledge and our desire, and moreover, surpasses the charity or love of the wayfarer, even as it exceeds nature. Therefore with grace a man cannot merit eternal life condignly.

On the contrary, What is granted in accordance with a fair judgment, would seem a condign reward. But life everlasting is granted by God, in accordance with the judgment of justice, according to 2 Tim. 4:8: “As to the rest, there is laid up for me a crown of justice, which the Lord, the just judge, will render to me in that day.” Therefore man merits everlasting life condignly.

I answer that, Man’s meritorious work may be considered in two ways: first, as it proceeds from free-

will; secondly, as it proceeds from the grace of the Holy Ghost. If it is considered as regards the substance of the work, and inasmuch as it springs from the free-will, there can be no condignity because of the very great inequality. But there is congruity, on account of an equality of proportion: for it would seem congruous that, if a man does what he can, God should reward him according to the excellence of his power.

If, however, we speak of a meritorious work, inasmuch as it proceeds from the grace of the Holy Ghost moving us to life everlasting, it is meritorious of life everlasting condignly. For thus the value of its merit depends upon the power of the Holy Ghost moving us to life everlasting according to Jn. 4:14: “Shall become in him a fount of water springing up into life everlasting.” And the worth of the work depends on the dignity of grace, whereby a man, being made a partaker of the Divine Nature, is adopted as a son of God, to whom the inheritance is due by right of adoption, according to Rom. 8:17: “If sons, heirs also.”

Reply to Objection 1. The Apostle is speaking of the substance of these sufferings.

Reply to Objection 2. This saying is to be understood of the first cause of our reaching everlasting life, viz. God’s mercy. But our merit is a subsequent cause.

Reply to Objection 3. The grace of the Holy Ghost which we have at present, although unequal to glory in act, is equal to it virtually as the seed of a tree, wherein the whole tree is virtually. So likewise by grace of the Holy Ghost dwells in man; and He is a sufficient cause of life everlasting; hence, 2 Cor. 1:22, He is called the “pledge” of our inheritance.

Objection 1. It would seem that grace is not the principle of merit through charity rather than the other virtues. For wages are due to work, according to Mat. 20:8: “Call the laborers and pay them their hire.” Now every virtue is a principle of some operation, since virtue is an operative habit, as stated above (q. 55, a. 2). Hence every virtue is equally a principle of merit.

Objection 2. Further, the Apostle says (1 Cor. 3:8): “Every man shall receive his own reward according to his labor.” Now charity lessens rather than increases the labor, because as Augustine says (*De Verbis Dom.*, Serm. lxx), “love makes all hard and repulsive tasks easy and next to nothing.” Hence charity is no greater principle of merit than any other virtue.

Objection 3. Further, the greatest principle of merit would seem to be the one whose acts are most meritorious. But the acts of faith and patience or fortitude would seem to be the most meritorious, as appears in the martyrs, who strove for the faith patiently and bravely even till death. Hence other virtues are a greater principle of merit than charity.

On the contrary, Our Lord said (Jn. 14:21): “He that loveth Me, shall be loved of My Father; and I will love him and will manifest Myself to him.” Now everlasting life consists in the manifest knowledge of God, according to Jn. 17:3: “This is eternal life: that they may know Thee, the only true” and living “God.” Hence the merit of eternal life rests chiefly with charity.

I answer that, As we may gather from what has been stated above (a. 1), human acts have the nature of merit from two causes: first and chiefly from the Divine ordination, inasmuch as acts are said to merit that good to which man is divinely ordained. Secondly, on the part of free-will, inasmuch as man, more than other creatures, has the power of voluntary acts by acting by

himself. And in both these ways does merit chiefly rest with charity. For we must bear in mind that everlasting life consists in the enjoyment of God. Now the human mind’s movement to the fruition of the Divine good is the proper act of charity, whereby all the acts of the other virtues are ordained to this end, since all the other virtues are commanded by charity. Hence the merit of life everlasting pertains first to charity, and secondly, to the other virtues, inasmuch as their acts are commanded by charity. So, likewise, is it manifest that what we do out of love we do most willingly. Hence, even inasmuch as merit depends on voluntariness, merit is chiefly attributed to charity.

Reply to Objection 1. Charity, inasmuch as it has the last end for object, moves the other virtues to act. For the habit to which the end pertains always commands the habits to which the means pertain, as was said above (q. 9, a. 1).

Reply to Objection 2. A work can be toilsome and difficult in two ways: first, from the greatness of the work, and thus the greatness of the work pertains to the increase of merit; and thus charity does not lessen the toil—rather, it makes us undertake the greatest toils, “for it does great things, if it exists,” as Gregory says (*Hom. in Evang.* xxx). Secondly, from the defect of the operator; for what is not done with a ready will is hard and difficult to all of us, and this toil lessens merit and is removed by charity.

Reply to Objection 3. The act of faith is not meritorious unless “faith. . . worketh by charity” (Gal. 5:6). So, too, the acts of patience and fortitude are not meritorious unless a man does them out of charity, according to 1 Cor. 13:3: “If I should deliver my body to be burned, and have not charity, it profiteth me nothing.”

Objection 1. It would seem that a man may merit for himself the first grace, because, as Augustine says (Ep. clxxxvi), “faith merits justification.” Now a man is justified by the first grace. Therefore a man may merit the first grace.

Objection 2. Further, God gives grace only to the worthy. Now, no one is said to be worthy of some good, unless he has merited it condignly. Therefore we may merit the first grace condignly.

Objection 3. Further, with men we may merit a gift already received. Thus if a man receives a horse from his master, he merits it by a good use of it in his master’s service. Now God is much more bountiful than man. Much more, therefore, may a man, by subsequent works, merit the first grace already received from God.

On the contrary, The nature of grace is repugnant to reward of works, according to Rom. 4:4: “Now to him that worketh, the reward is not reckoned according to grace but according to debt.” Now a man merits what is reckoned to him according to debt, as the reward of his works. Hence a man may not merit the first grace.

I answer that, The gift of grace may be considered in two ways: first in the nature of a gratuitous gift, and thus it is manifest that all merit is repugnant to grace, since as the Apostle says (Rom. 11:6), “if by grace, it is not now by works.” Secondly, it may be considered as regards the nature of the thing given, and thus, also, it cannot come under the merit of him who has not grace, both because it exceeds the proportion of nature, and because previous to grace a man in the state of sin has an obstacle to his meriting grace, viz. sin. But when any-

one has grace, the grace already possessed cannot come under merit, since reward is the term of the work, but grace is the principle of all our good works, as stated above (q. 109). But of anyone merits a further gratuitous gift by virtue of the preceding grace, it would not be the first grace. Hence it is manifest that no one can merit for himself the first grace.

Reply to Objection 1. As Augustine says (Retract. i, 23), he was deceived on this point for a time, believing the beginning of faith to be from us, and its consummation to be granted us by God; and this he here retracts. And seemingly it is in this sense that he speaks of faith as meriting justification. But if we suppose, as indeed it is a truth of faith, that the beginning of faith is in us from God, the first act must flow from grace; and thus it cannot be meritorious of the first grace. Therefore man is justified by faith, not as though man, by believing, were to merit justification, but that, he believes, whilst he is being justified; inasmuch as a movement of faith is required for the justification of the ungodly, as stated above (q. 113, a. 4).

Reply to Objection 2. God gives grace to none but to the worthy, not that they were previously worthy, but that by His grace He makes them worthy, Who alone “can make him clean that is conceived of unclean seed” (Job 14:4).

Reply to Objection 3. Man’s every good work proceeds from the first grace as from its principle; but not from any gift of man. Consequently, there is no comparison between gifts of grace and gifts of men.

Objection 1. It would seem that a man can merit the first grace for another. Because on Mat. 9:2: “Jesus seeing their faith,” etc. a gloss says: “How much is our personal faith worth with God, Who set such a price on another’s faith, as to heal the man both inwardly and outwardly!” Now inward healing is brought about by grace. Hence a man can merit the first grace for another.

Objection 2. Further, the prayers of the just are not void, but efficacious, according to James 5:16: “The continued prayer of a just man availeth much.” Now he had previously said: “Pray one for another, that you may be saved.” Hence, since man’s salvation can only be brought about by grace, it seems that one man may merit for another his first grace.

Objection 3. Further, it is written (Lk. 16:9): “Make unto you friends of the mammon of iniquity, that when you shall fail they may receive you into everlasting dwellings.” Now it is through grace alone that anyone is received into everlasting dwellings, for by it alone does anyone merit everlasting life as stated above (a. 2; q. 109, a. 5). Hence one man may by merit obtain for another his first grace.

On the contrary, It is written (Jer. 15:1): “If Moses and Samuel shall stand before Me, My soul is not towards this people” —yet they had great merit with God. Hence it seems that no one can merit the first grace for another.

I answer that, As shown above (Aa. 1,3,4), our works are meritorious from two causes: first, by virtue of the Divine motion; and thus we merit condignly; secondly, according as they proceed from free-will in so far as we do them willingly, and thus they have congruous merit, since it is congruous that when a man makes good use of his power God should by His super-excellent power work still higher things. And therefore

it is clear that no one can merit condignly for another his first grace, save Christ alone; since each one of us is moved by God to reach life everlasting through the gift of grace; hence condign merit does not reach beyond this motion. But Christ’s soul is moved by God through grace, not only so as to reach the glory of life everlasting, but so as to lead others to it, inasmuch as He is the Head of the Church, and the Author of human salvation, according to Heb. 2:10: “Who hath brought many children into glory [to perfect] the Author of their salvation.”

But one may merit the first grace for another congruously; because a man in grace fulfils God’s will, and it is congruous and in harmony with friendship that God should fulfil man’s desire for the salvation of another, although sometimes there may be an impediment on the part of him whose salvation the just man desires. And it is in this sense that the passage from Jeremias speaks.

Reply to Objection 1. A man’s faith avails for another’s salvation by congruous and not by condign merit.

Reply to Objection 2. The impetration of prayer rests on mercy, whereas condign merit rests on justice; hence a man may impetrate many things from the Divine mercy in prayer, which he does not merit in justice, according to Dan. 9:18: “For it is not for our justifications that we present our prayers before Thy face, but for the multitude of Thy tender mercies.”

Reply to Objection 3. The poor who receive alms are said to receive others into everlasting dwellings, either by impetrating their forgiveness in prayer, or by meriting congruously by other good works, or materially speaking, inasmuch as by these good works of mercy, exercised towards the poor, we merit to be received into everlasting dwellings.

Objection 1. It would seem that anyone may merit for himself restoration after a fall. For what a man may justly ask of God, he may justly merit. Now nothing may more justly be besought of God than to be restored after a fall, as Augustine says*, according to Ps. 70:9: “When my strength shall fail, do not Thou forsake me.” Hence a man may merit to be restored after a fall.

Objection 2. Further, a man’s works benefit himself more than another. Now a man may, to some extent, merit for another his restoration after a fall, even as his first grace. Much more, therefore, may he merit for himself restoration after a fall.

Objection 3. Further, when a man is once in grace he merits life everlasting by the good works he does, as was shown above (a. 2; q. 109, a. 5). Now no one can attain life everlasting unless he is restored by grace. Hence it would seem that he merits for himself restoration.

On the contrary, It is written (Ezech. 18:24): “If the just man turn himself away from his justice and do iniquity. . . all his justices which he hath done shall not be remembered.” Therefore his previous merits will nowise help him to rise again. Hence no one can merit for himself restoration after a fall.

I answer that, No one can merit for himself restoration after a future fall, either condignly or congruously. He cannot merit for himself condignly, since the reason of this merit depends on the motion of Divine grace, and this motion is interrupted by the subsequent sin; hence all benefits which he afterwards obtains from God, whereby he is restored, do not fall under merit—

the motion of the preceding grace not extending to them. Again, congruous merit, whereby one merits the first grace for another, is prevented from having its effect on account of the impediment of sin in the one for whom it is merited. Much more, therefore, is the efficacy of such merit impeded by the obstacle which is in him who merits, and in him for whom it is merited; for both these are in the same person. And therefore a man can nowise merit for himself restoration after a fall.

Reply to Objection 1. The desire whereby we seek for restoration after a fall is called just, and likewise the prayer whereby this restoration is besought is called just, because it tends to justice; and not that it depends on justice by way of merit, but only on mercy.

Reply to Objection 2. Anyone may congruously merit for another his first grace, because there is no impediment (at least, on the part of him who merits), such as is found when anyone recedes from justice after the merit of grace.

Reply to Objection 3. Some have said that no one “absolutely” merits life everlasting except by the act of final grace, but only “conditionally,” i.e. if he perseveres. But it is unreasonable to say this, for sometimes the act of the last grace is not more, but less meritorious than preceding acts, on account of the prostration of illness. Hence it must be said that every act of charity merits eternal life absolutely; but by subsequent sin, there arises an impediment to the preceding merit, so that it does not obtain its effect; just as natural causes fail of their effects on account of a supervening impediment.

* Cf. Ennar. i super Ps. lxx.

Objection 1. It would seem that a man cannot merit an increase of grace or charity. For when anyone receives the reward he merited no other reward is due to him; thus it was said of some (Mat. 6:2): “They have received their reward.” Hence, if anyone were to merit the increase of charity or grace, it would follow that, when his grace has been increased, he could not expect any further reward, which is unfitting.

Objection 2. Further, nothing acts beyond its species. But the principle of merit is grace or charity, as was shown above (Aa. 2, 4). Therefore no one can merit greater grace or charity than he has.

Objection 3. Further, what falls under merit a man merits by every act flowing from grace or charity, as by every such act a man merits life everlasting. If, therefore, the increase of grace or charity falls under merit, it would seem that by every act quickened by charity a man would merit an increase of charity. But what a man merits, he infallibly receives from God, unless hindered by subsequent sin; for it is written (2 Tim. 1:12): “I know Whom I have believed, and I am certain that He is able to keep that which I have committed unto Him.” Hence it would follow that grace or charity is increased by every meritorious act; and this would seem impossible since at times meritorious acts are not very fervent, and would not suffice for the increase of charity. Therefore the increase of charity does not come under merit.

On the contrary, Augustine says (super Ep. Joan.; cf. Ep. clxxxvi) that “charity merits increase, and being increased merits to be perfected.” Hence the increase of

grace or charity falls under merit.

I answer that, As stated above (Aa. 6,7), whatever the motion of grace reaches to, falls under condign merit. Now the motion of a mover extends not merely to the last term of the movement, but to the whole progress of the movement. But the term of the movement of grace is eternal life; and progress in this movement is by the increase of charity or grace according to Prov. 4:18: “But the path of the just as a shining light, goeth forward and increaseth even to perfect day,” which is the day of glory. And thus the increase of grace falls under condign merit.

Reply to Objection 1. Reward is the term of merit. But there is a double term of movement, viz. the last, and the intermediate, which is both beginning and term; and this term is the reward of increase. Now the reward of human favor is as the last end to those who place their end in it; hence such as these receive no other reward.

Reply to Objection 2. The increase of grace is not above the virtuality of the pre-existing grace, although it is above its quantity, even as a tree is not above the virtuality of the seed, although above its quantity.

Reply to Objection 3. By every meritorious act a man merits the increase of grace, equally with the consummation of grace which is eternal life. But just as eternal life is not given at once, but in its own time, so neither is grace increased at once, but in its own time, viz. when a man is sufficiently disposed for the increase of grace.

Objection 1. It would seem that anyone may merit perseverance. For what a man obtains by asking, can come under the merit of anyone that is in grace. Now men obtain perseverance by asking it of God; otherwise it would be useless to ask it of God in the petitions of the Lord's Prayer, as Augustine says (*De Dono Persev.* ii). Therefore perseverance may come under the merit of whoever has grace.

Objection 2. Further, it is more not to be able to sin than not to sin. But not to be able to sin comes under merit, for we merit eternal life, of which impeccability is an essential part. Much more, therefore, may we merit not to sin, i.e. to persevere.

Objection 3. Further, increase of grace is greater than perseverance in the grace we already possess. But a man may merit an increase of grace, as was stated above (a. 8). Much more, therefore, may he merit perseverance in the grace he has already.

On the contrary, What we merit, we obtain from God, unless it is hindered by sin. Now many have meritorious works, who do not obtain perseverance; nor can it be urged that this takes place because of the impediment of sin, since sin itself is opposed to perseverance; and thus if anyone were to merit perseverance, God would not permit him to fall into sin. Hence perseverance does not come under merit.

I answer that, Since man's free-will is naturally flexible towards good and evil, there are two ways of obtaining from God perseverance in good: first, inasmuch as free-will is determined to good by consummate

grace, which will be in glory; secondly, on the part of the Divine motion, which inclines man to good unto the end. Now as explained above (Aa. 6,7,8), that which is related as a term to the free-will's movement directed to God the mover, falls under human merit; and not what is related to the aforesaid movement as principle. Hence it is clear that the perseverance of glory which is the term of the aforesaid movement falls under merit; but perseverance of the wayfarer does not fall under merit, since it depends solely on the Divine motion, which is the principle of all merit. Now God freely bestows the good of perseverance, on whomsoever He bestows it.

Reply to Objection 1. We impetrate in prayer things that we do not merit, since God hears sinners who beseech the pardon of their sins, which they do not merit, as appears from Augustine* on Jn. 11:31, "Now we know that God doth not hear sinners," otherwise it would have been useless for the publican to say: "O God, be merciful to me a sinner," Lk. 18:13. So too may we impetrate of God in prayer the grace of perseverance either for ourselves or for others, although it does not fall under merit.

Reply to Objection 2. The perseverance which is in heaven is compared as term to the free-will's movement; not so, the perseverance of the wayfarer, for the reason given in the body of the article.

In the same way may we answer the third objection which concerns the increase of grace, as was explained above.

* Tract. xliv in Joan.

Objection 1. It would seem that to enjoy belongs not only to the appetitive power. For to enjoy seems nothing else than to receive the fruit. But it is the intellect, in whose act Happiness consists, as shown above (q. 3, a. 4), that receives the fruit of human life, which is Happiness. Therefore to enjoy is not an act of the appetitive power, but of the intellect.

Objection 2. Further, each power has its proper end, which is its perfection: thus the end of sight is to know the visible; of the hearing, to perceive sounds; and so forth. But the end of a thing is its fruit. Therefore to enjoy belongs to each power, and not only to the appetite.

Objection 3. Further, enjoyment implies a certain delight. But sensible delight belongs to sense, which delights in its object: and for the same reason, intellectual delight belongs to the intellect. Therefore enjoyment belongs to the apprehensive, and not to the appetitive power.

On the contrary, Augustine says (De Doctr. Christ. i, 4; and De Trin. x, 10,11): “To enjoy is to adhere lovingly to something for its own sake.” But love belongs to the appetitive power. Therefore also to enjoy is an act of the appetitive power.

I answer that, “Fruitio” [enjoyment] and “fructus” [fruit] seem to refer to the same, one being derived from the other; which from which, matters not for our purpose; though it seems probable that the one which is more clearly known, was first named. Now those things are most manifest to us which appeal most to the senses: wherefore it seems that the word “fruitio” is derived from sensible fruits. But sensible fruit is that which we

expect the tree to produce in the last place, and in which a certain sweetness is to be perceived. Hence fruitio seems to have relation to love, or to the delight which one has in realizing the longed-for term, which is the end. Now the end and the good is the object of the appetitive power. Wherefore it is evident that fruitio is the act of the appetitive power.

Reply to Objection 1. Nothing hinders one and the same thing from belonging, under different aspects, to different powers. Accordingly the vision of God, as vision, is an act of the intellect, but as a good and an end, is the object of the will. And as such is the fruitio thereof: so that the intellect attains this end, as the executive power, but the will as the motive power, moving (the powers) towards the end and enjoying the end attained.

Reply to Objection 2. The perfection and end of every other power is contained in the object of the appetitive power, as the proper is contained in the common, as stated above (q. 9, a. 1). Hence the perfection and end of each power, in so far as it is a good, belongs to the appetitive power. Wherefore the appetitive power moves the other powers to their ends; and itself realizes the end, when each of them reaches the end.

Reply to Objection 3. In delight there are two things: perception of what is becoming; and this belongs to the apprehensive power; and complacency in that which is offered as becoming: and this belongs to the appetitive power, in which power delight is formally completed.

Objection 1. It would seem that to enjoy belongs to men alone. For Augustine says (*De Doctr. Christ.* i, 22) that “it is given to us men to enjoy and to use.” Therefore other animals cannot enjoy.

Objection 2. Further, to enjoy relates to the last end. But irrational animals cannot obtain the last end. Therefore it is not for them to enjoy.

Objection 3. Further, just as the sensitive appetite is beneath the intellectual appetite, so is the natural appetite beneath the sensitive. If, therefore, to enjoy belongs to the sensitive appetite, it seems that for the same reason it can belong to the natural appetite. But this is evidently false, since the latter cannot delight in anything. Therefore the sensitive appetite cannot enjoy; and accordingly enjoyment is not possible for irrational animals.

On the contrary, Augustine says (*QQ.* 83, qu. 30): “It is not so absurd to suppose that even beasts enjoy their food and any bodily pleasure.”

I answer that, As was stated above (a. 1) to enjoy is not the act of the power that achieves the end as executor, but of the power that commands the achievement; for it has been said to belong to the appetitive power. Now things void of reason have indeed a power of achieving an end by way of execution, as that by which a heavy body has a downward tendency, whereas a light body has an upward tendency. Yet the power of command in respect of the end is not in them, but in some higher nature, which moves all nature by its command, just as in things endowed with knowledge, the

appetite moves the other powers to their acts. Wherefore it is clear that things void of knowledge, although they attain an end, have no enjoyment of the end: this is only for those that are endowed with knowledge.

Now knowledge of the end is twofold: perfect and imperfect. Perfect knowledge of the end, is that whereby not only is that known which is the end and the good, but also the universal formality of the end and the good; and such knowledge belongs to the rational nature alone. On the other hand, imperfect knowledge is that by which the end and the good are known in the particular. Such knowledge is in irrational animals: whose appetitive powers do not command with freedom, but are moved according to a natural instinct to whatever they apprehend. Consequently, enjoyment belongs to the rational nature, in a perfect degree; to irrational animals, imperfectly; to other creatures, not at all.

Reply to Objection 1. Augustine is speaking there of perfect enjoyment.

Reply to Objection 2. Enjoyment need not be of the last end simply; but of that which each one chooses for his last end.

Reply to Objection 3. The sensitive appetite follows some knowledge; not so the natural appetite, especially in things void of knowledge.

Reply to Objection 4. Augustine is speaking there of imperfect enjoyment. This is clear from his way of speaking: for he says that “it is not so absurd to suppose that even beasts enjoy,” that is, as it would be, if one were to say that they “use.”

Objection 1. It would seem that enjoyment is not only of the last end. For the Apostle says (Philem. 20): “Yea, brother, may I enjoy thee in the Lord.” But it is evident that Paul had not placed his last end in a man. Therefore to enjoy is not only of the last end.

Objection 2. Further, what we enjoy is the fruit. But the Apostle says (Gal. 5:22): “The fruit of the Spirit is charity, joy, peace,” and other like things, which are not in the nature of the last end. Therefore enjoyment is not only of the last end.

Objection 3. Further, the acts of the will reflect on one another; for I will to will, and I love to love. But to enjoy is an act of the will: since “it is the will with which we enjoy,” as Augustine says (De Trin. x, 10). Therefore a man enjoys his enjoyment. But the last end of man is not enjoyment, but the uncreated good alone, which is God. Therefore enjoyment is not only of the last end.

On the contrary, Augustine says (De Trin. x, 11): “A man does not enjoy that which he desires for the sake of something else.” But the last end alone is that which man does not desire for the sake of something else. Therefore enjoyment is of the last end alone.

I answer that, As stated above (a. 1) the notion of fruit implies two things: first that it should come last; second, that it should calm the appetite with a certain sweetness and delight. Now a thing is last either simply or relatively; simply, if it be referred to nothing else; relatively, if it is the last in a particular series. Therefore that which is last simply, and in which one delights as in the last end, is properly called fruit; and this it is that one is properly said to enjoy. But that which is delightful not in itself, but is desired, only as referred to something else, e.g. a bitter potion for the sake of health, can nowise be called fruit. And that which has something delightful about it, to which a number of preceding things are referred, may indeed be called fruit in a certain manner; but we cannot be said to enjoy it properly or as though it answered perfectly to the notion of fruit. Hence Augustine says (De Trin. x, 10) that “we enjoy what we know, when the delighted will

is at rest therein.” But its rest is not absolute save in the possession of the last end: for as long as something is looked for, the movement of the will remains in suspense, although it has reached something. Thus in local movement, although any point between the two terms is a beginning and an end, yet it is not considered as an actual end, except when the movement stops there.

Reply to Objection 1. As Augustine says (De Doctr. Christ. i, 33), “if he had said, ‘May I enjoy thee,’ without adding ‘in the Lord,’ he would seem to have set the end of his love in him. But since he added that he set his end in the Lord, he implied his desire to enjoy Him”: as if we were to say that he expressed his enjoyment of his brother not as a term but as a means.

Reply to Objection 2. Fruit bears one relation to the tree that bore it, and another to man that enjoys it. To the tree indeed that bore it, it is compared as effect to cause; to the one enjoying it, as the final object of his longing and the consummation of his delight. Accordingly these fruits mentioned by the Apostle are so called because they are certain effects of the Holy Ghost in us, wherefore they are called “fruits of the spirit”: but not as though we are to enjoy them as our last end. Or we may say with Ambrose that they are called fruits because “we should desire them for their own sake”: not indeed as though they were not ordained to the last end; but because they are such that we ought to find pleasure in them.

Reply to Objection 3. As stated above (q. 1, a. 8; q. 2, a. 7), we speak of an end in a twofold sense: first, as being the thing itself; secondly, as the attainment thereof. These are not, of course, two ends, but one end, considered in itself, and in its relation to something else. Accordingly God is the last end, as that which is ultimately sought for: while the enjoyment is as the attainment of this last end. And so, just as God is not one end, and the enjoyment of God, another: so it is the same enjoyment whereby we enjoy God, and whereby we enjoy our enjoyment of God. And the same applies to created happiness which consists in enjoyment.

Objection 1. It would seem that enjoyment is only of the end possessed. For Augustine says (De Trin. x, 1) that “to enjoy is to use joyfully, with the joy, not of hope, but of possession.” But so long as a thing is not had, there is joy, not of possession, but of hope. Therefore enjoyment is only of the end possessed.

Objection 2. Further, as stated above (a. 3), enjoyment is not properly otherwise than of the last end: because this alone gives rest to the appetite. But the appetite has no rest save in the possession of the end. Therefore enjoyment, properly speaking, is only of the end possessed.

Objection 3. Further, to enjoy is to lay hold of the fruit. But one does not lay hold of the fruit until one is in possession of the end. Therefore enjoyment is only of the end possessed.

On the contrary, “to enjoy is to adhere lovingly to something for its own sake,” as Augustine says (De Doctr. Christ. i, 4). But this is possible, even in regard to a thing which is not in our possession. Therefore it is possible to enjoy the end even though it be not possessed.

I answer that, To enjoy implies a certain relation of the will to the last end, according as the will has something by way of last end. Now an end is possessed in

two ways; perfectly and imperfectly. Perfectly, when it is possessed not only in intention but also in reality; imperfectly, when it is possessed in intention only. Perfect enjoyment, therefore, is of the end already possessed: but imperfect enjoyment is also of the end possessed not really, but only in intention.

Reply to Objection 1. Augustine speaks there of perfect enjoyment.

Reply to Objection 2. The will is hindered in two ways from being at rest. First on the part of the object; by reason of its not being the last end, but ordained to something else: secondly on the part of the one who desires the end, by reason of his not being yet in possession of it. Now it is the object that specifies an act: but on the agent depends the manner of acting, so that the act be perfect or imperfect, as compared with the actual circumstances of the agent. Therefore enjoyment of anything but the last end is not enjoyment properly speaking, as falling short of the nature of enjoyment. But enjoyment of the last end, not yet possessed, is enjoyment properly speaking, but imperfect, on account of the imperfect way in which it is possessed.

Reply to Objection 3. One is said to lay hold of or to have an end, not only in reality, but also in intention, as stated above.

FIRST PART OF THE SECOND PART, QUESTION 12

Of Intention (In Five Articles)

We must now consider Intention: concerning which there are five points of inquiry:

- (1) Whether intention is an act of intellect or of the will?
- (2) Whether it is only of the last end?
- (3) Whether one can intend two things at the same time?
- (4) Whether intention of the end is the same act as volition of the means?
- (5) Whether intention is within the competency of irrational animals?

Whether intention is an act of the intellect or of the will?

Ia IIae q. 12 a. 1

Objection 1. It would seem that intention is an act of the intellect, and not of the will. For it is written (Mat. 6:22): “If thy eye be single, thy whole body shall be lightsome”: where, according to Augustine (De Serm. Dom. in Monte ii, 13) the eye signifies intention. But since the eye is the organ of sight, it signifies the apprehensive power. Therefore intention is not an act of the appetitive but of the apprehensive power.

Objection 2. Further, Augustine says (De Serm. Dom. in Monte ii, 13) that Our Lord spoke of intention as a light, when He said (Mat. 6:23): “If the light that is in thee be darkness,” etc. But light pertains to knowledge. Therefore intention does too.

Objection 3. Further, intention implies a kind of ordaining to an end. But to ordain is an act of reason. Therefore intention belongs not to the will but to the reason.

Objection 4. Further, an act of the will is either of the end or of the means. But the act of the will in respect of the end is called volition, or enjoyment; with regard to the means, it is choice, from which intention is distinct. Therefore it is not an act of the will.

On the contrary, Augustine says (De Trin. xi, 4,8,9) that “the intention of the will unites the sight to the object seen; and the images retained in the memory, to the penetrating gaze of the soul’s inner thought.” Therefore intention is an act of the will.

I answer that, Intention, as the very word denotes, signifies, “to tend to something.” Now both the action of the mover and the movement of thing moved, tend to something. But that the movement of the thing moved tends to anything, is due to the action of the mover. Consequently intention belongs first and principally to

that which moves to the end: hence we say that an architect or anyone who is in authority, by his command moves others to that which he intends. Now the will moves all the other powers of the soul to the end, as shown above (q. 9, a. 1). Wherefore it is evident that intention, properly speaking, is an act of the will.

Reply to Objection 1. The eye designates intention figuratively, not because intention has reference to knowledge, but because it presupposes knowledge, which proposes to the will the end to which the latter moves; thus we foresee with the eye whither we should tend with our bodies.

Reply to Objection 2. Intention is called a light because it is manifest to him who intends. Wherefore works are called darkness because a man knows what he intends, but knows not what the result may be, as Augustine expounds (De Serm. Dom. in Monte ii, 13).

Reply to Objection 3. The will does not ordain, but tends to something according to the order of reason. Consequently this word “intention” indicates an act of the will, presupposing the act whereby the reason orders something to the end.

Reply to Objection 4. Intention is an act of the will in regard to the end. Now the will stands in a threefold relation to the end. First, absolutely; and thus we have “volition,” whereby we will absolutely to have health, and so forth. Secondly, it considers the end, as its place of rest; and thus “enjoyment” regards the end. Thirdly, it considers the end as the term towards which something is ordained; and thus “intention” regards the end. For when we speak of intending to have health, we mean not only that we have it, but that we will have it by means of something else.

Whether intention is only of the last end?

Ia IIae q. 12 a. 2

Objection 1. It would seem that intention is only of the last end. For it is said in the book of Prosper’s Sentences (Sent. 100): “The intention of the heart is a cry to God.” But God is the last end of the human heart. Therefore intention is always regards the last end.

Objection 2. Further, intention regards the end as

the terminus, as stated above (a. 1, ad 4). But a terminus is something last. Therefore intention always regards the last end.

Objection 3. Further, just as intention regards the end, so does enjoyment. But enjoyment is always of the last end. Therefore intention is too.

On the contrary, There is but one last end of human wills, viz. Happiness, as stated above (q. 1, a. 7). If, therefore, intentions were only of the last end, men would not have different intentions: which is evidently false.

I answer that, As stated above (a. 1, ad 4), intention regards the end as a terminus of the movement of the will. Now a terminus of movement may be taken in two ways. First, the very last terminus, when the movement comes to a stop; this is the terminus of the whole movement. Secondly, some point midway, which is the beginning of one part of the movement, and the end or terminus of the other. Thus in the movement from A to C through B, C is the last terminus, while B is a terminus, but not the last. And intention can be both. Con-

sequently though intention is always of the end, it need not be always of the last end.

Reply to Objection 1. The intention of the heart is called a cry to God, not that God is always the object of intention, but because He sees our intention. Or because, when we pray, we direct our intention to God, which intention has the force of a cry.

Reply to Objection 2. A terminus is something last, not always in respect of the whole, but sometimes in respect of a part.

Reply to Objection 3. Enjoyment implies rest in the end; and this belongs to the last end alone. But intention implies movement towards an end, not rest. Wherefore the comparison proves nothing.

Whether one can intend two things at the same time?

Ia IIae q. 12 a. 3

Objection 1. It would seem that one cannot intend several things at the same time. For Augustine says (De Serm. Dom. in Monte ii, 14,16,17) that man's intention cannot be directed at the same time to God and to bodily benefits. Therefore, for the same reason, neither to any other two things.

Objection 2. Further, intention designates a movement of the will towards a terminus. Now there cannot be several termini in the same direction of one movement. Therefore the will cannot intend several things at the same time.

Objection 3. Further, intention presupposes an act of reason or of the intellect. But "it is not possible to understand several things at the same time," according to the Philosopher (Topic. ii, 10). Therefore neither is it possible to intend several things at the same time.

On the contrary, Art imitates nature. Now nature intends two purposes by means of one instrument: thus "the tongue is for the purpose of taste and speech" (De Anima ii, 8). Therefore, for the same reason, art or reason can at the same time direct one thing to two ends: so that one can intend several ends at the same time.

I answer that, The expression "two things" may be taken in two ways: they may be ordained to one another or not so ordained. And if they be ordained to one another, it is evident, from what has been said, that a man can intend several things at the same time. For intention is not only of the last end, as stated above (a. 2), but also of an intermediary end. Now a man intends at the same time, both the proximate and the last end; as the mixing of a medicine and the giving of health.

But if we take two things that are not ordained to one another, thus also a man can intend several things at the same time. This is evident from the fact that a

man prefers one thing to another because it is the better of the two. Now one of the reasons for which one thing is better than another is that it is available for more purposes: wherefore one thing can be chosen in preference to another, because of the greater number of purposes for which it is available: so that evidently a man can intend several things at the same time.

Reply to Objection 1. Augustine means to say that man cannot at the same time direct his attention to God and to bodily benefits, as to two last ends: since, as stated above (q. 1, a. 5), one man cannot have several last ends.

Reply to Objection 2. There can be several termini ordained to one another, of the same movement and in the same direction; but not unless they be ordained to one another. At the same time it must be observed that what is not one in reality may be taken as one by the reason. Now intention is a movement of the will to something already ordained by the reason, as stated above (a. 1, ad 3). Wherefore where we have many things in reality, we may take them as one term of intention, in so far as the reason takes them as one: either because two things concur in the integrity of one whole, as a proper measure of heat and cold conduce to health; or because two things are included in one which may be intended. For instance, the acquiring of wine and clothing is included in wealth, as in something common to both; wherefore nothing hinders the man who intends to acquire wealth, from intending both the others.

Reply to Objection 3. As stated in the Ia, q. 12, a. 10; Ia, q. 58, a. 2; Ia, q. 85, a. 4 it is possible to understand several things at the same time, in so far as, in some way, they are one.

Objection 1. It would seem that the intention of the end and the volition of the means are not one and the same movement. For Augustine says (De Trin. xi, 6) that “the will to see the window, has for its end the seeing of the window; and is another act from the will to see, through the window, the passersby.” But that I should will to see the passersby, through the window, belongs to intention; whereas that I will to see the window, belongs to the volition of the means. Therefore intention of the end and the willing of the means are distinct movements of the will.

Objection 2. Further, acts are distinct according to their objects. But the end and the means are distinct objects. Therefore the intention of the end and the willing of the means are distinct movements of the will.

Objection 3. Further, the willing of the means is called choice. But choice and intention are not the same. Therefore intention of the end and the willing of the means are not the same movement of the will.

On the contrary, The means in relation to the end, are as the mid-space to the terminus. Now it is all the same movement that passes through the mid-space to the terminus, in natural things. Therefore in things pertaining to the will, the intention of the end is the same movement as the willing of the means.

I answer that, The movement of the will to the end and to the means can be considered in two ways. First, according as the will is moved to each of the aforesaid absolutely and in itself. And thus there are really two movements of the will to them. Secondly, it may be considered accordingly as the will is moved to the means for the sake of the end: and thus the movement of the

will to the end and its movement to the means are one and the same thing. For when I say: “I wish to take medicine for the sake of health,” I signify no more than one movement of my will. And this is because the end is the reason for willing the means. Now the object, and that by reason of which it is an object, come under the same act; thus it is the same act of sight that perceives color and light, as stated above (q. 8, a. 3, ad 2). And the same applies to the intellect; for if it consider principle and conclusion absolutely, it considers each by a distinct act; but when it assents to the conclusion on account of the principles, there is but one act of the intellect.

Reply to Objection 1. Augustine is speaking of seeing the window and of seeing, through the window, the passersby, according as the will is moved to either absolutely.

Reply to Objection 2. The end, considered as a thing, and the means to that end, are distinct objects of the will. But in so far as the end is the formal object in willing the means, they are one and the same object.

Reply to Objection 3. A movement which is one as to the subject, may differ, according to our way of looking at it, as to its beginning and end, as in the case of ascent and descent (Phys. iii, 3). Accordingly, in so far as the movement of the will is to the means, as ordained to the end, it is called “choice”: but the movement of the will to the end as acquired by the means, it is called “intention.” A sign of this is that we can have intention of the end without having determined the means which are the object of choice.

Objection 1. It would seem that irrational animals intend the end. For in things void of reason nature stands further apart from the rational nature, than does the sensitive nature in irrational animals. But nature intends the end even in things void of reason, as is proved in Phys. ii, 8. Much more, therefore, do irrational animals intend the end.

Objection 2. Further, just as intention is of the end, so is enjoyment. But enjoyment is in irrational animals, as stated above (q. 11, a. 2). Therefore intention is too.

Objection 3. Further, to intend an end belongs to one who acts for an end; since to intend is nothing else than to tend to something. But irrational animals act for an end; for an animal is moved either to seek food, or to do something of the kind. Therefore irrational animals intend an end.

On the contrary, Intention of an end implies ordaining something to an end: which belongs to reason. Since therefore irrational animals are void of reason, it seems that they do not intend an end.

I answer that, As stated above (a. 1), to intend is to tend to something; and this belongs to the mover and to the moved. According, therefore, as that which is moved to an end by another is said to intend the end, thus nature is said to intend an end, as being moved to its end by God, as the arrow is moved by the archer. And in this way, irrational animals intend an end, inasmuch as they are moved to something by natural instinct. The other way of intending an end belongs to the mover; according as he ordains the movement of something, either his own or another’s, to an end. This belongs to reason alone. Wherefore irrational animals do not intend an end in this way, which is to intend properly and principally, as stated above (a. 1).

Reply to Objection 1. This argument takes intention in the sense of being moved to an end.

Reply to Objection 2. Enjoyment does not imply the ordaining of one thing to another, as intention does, but absolute repose in the end.

Reply to Objection 3. Irrational animals are moved

to an end, not as though they thought that they can gain the end by this movement; this belongs to one that intends; but through desiring the end by natural instinct, they are moved to an end, moved, as it were, by another, like other things that are moved naturally.

Objection 1. It would seem that intention is an act of the intellect, and not of the will. For it is written (Mat. 6:22): “If thy eye be single, thy whole body shall be lightsome”: where, according to Augustine (De Serm. Dom. in Monte ii, 13) the eye signifies intention. But since the eye is the organ of sight, it signifies the apprehensive power. Therefore intention is not an act of the appetitive but of the apprehensive power.

Objection 2. Further, Augustine says (De Serm. Dom. in Monte ii, 13) that Our Lord spoke of intention as a light, when He said (Mat. 6:23): “If the light that is in thee be darkness,” etc. But light pertains to knowledge. Therefore intention does too.

Objection 3. Further, intention implies a kind of ordaining to an end. But to ordain is an act of reason. Therefore intention belongs not to the will but to the reason.

Objection 4. Further, an act of the will is either of the end or of the means. But the act of the will in respect of the end is called volition, or enjoyment; with regard to the means, it is choice, from which intention is distinct. Therefore it is not an act of the will.

On the contrary, Augustine says (De Trin. xi, 4,8,9) that “the intention of the will unites the sight to the object seen; and the images retained in the memory, to the penetrating gaze of the soul’s inner thought.” Therefore intention is an act of the will.

I answer that, Intention, as the very word denotes, signifies, “to tend to something.” Now both the action of the mover and the movement of thing moved, tend to something. But that the movement of the thing moved tends to anything, is due to the action of the mover. Consequently intention belongs first and principally to

that which moves to the end: hence we say that an architect or anyone who is in authority, by his command moves others to that which he intends. Now the will moves all the other powers of the soul to the end, as shown above (q. 9, a. 1). Wherefore it is evident that intention, properly speaking, is an act of the will.

Reply to Objection 1. The eye designates intention figuratively, not because intention has reference to knowledge, but because it presupposes knowledge, which proposes to the will the end to which the latter moves; thus we foresee with the eye whither we should tend with our bodies.

Reply to Objection 2. Intention is called a light because it is manifest to him who intends. Wherefore works are called darkness because a man knows what he intends, but knows not what the result may be, as Augustine expounds (De Serm. Dom. in Monte ii, 13).

Reply to Objection 3. The will does not ordain, but tends to something according to the order of reason. Consequently this word “intention” indicates an act of the will, presupposing the act whereby the reason orders something to the end.

Reply to Objection 4. Intention is an act of the will in regard to the end. Now the will stands in a threefold relation to the end. First, absolutely; and thus we have “volition,” whereby we will absolutely to have health, and so forth. Secondly, it considers the end, as its place of rest; and thus “enjoyment” regards the end. Thirdly, it considers the end as the term towards which something is ordained; and thus “intention” regards the end. For when we speak of intending to have health, we mean not only that we have it, but that we will have it by means of something else.

Objection 1. It would seem that intention is only of the last end. For it is said in the book of Prosper's Sentences (Sent. 100): "The intention of the heart is a cry to God." But God is the last end of the human heart. Therefore intention is always regards the last end.

Objection 2. Further, intention regards the end as the terminus, as stated above (a. 1, ad 4). But a terminus is something last. Therefore intention always regards the last end.

Objection 3. Further, just as intention regards the end, so does enjoyment. But enjoyment is always of the last end. Therefore intention is too.

On the contrary, There is but one last end of human wills, viz. Happiness, as stated above (q. 1, a. 7). If, therefore, intentions were only of the last end, men would not have different intentions: which is evidently false.

I answer that, As stated above (a. 1, ad 4), intention regards the end as a terminus of the movement of the will. Now a terminus of movement may be taken in two ways. First, the very last terminus, when the move-

ment comes to a stop; this is the terminus of the whole movement. Secondly, some point midway, which is the beginning of one part of the movement, and the end or terminus of the other. Thus in the movement from A to C through B, C is the last terminus, while B is a terminus, but not the last. And intention can be both. Consequently though intention is always of the end, it need not be always of the last end.

Reply to Objection 1. The intention of the heart is called a cry to God, not that God is always the object of intention, but because He sees our intention. Or because, when we pray, we direct our intention to God, which intention has the force of a cry.

Reply to Objection 2. A terminus is something last, not always in respect of the whole, but sometimes in respect of a part.

Reply to Objection 3. Enjoyment implies rest in the end; and this belongs to the last end alone. But intention implies movement towards an end, not rest. Wherefore the comparison proves nothing.

Objection 1. It would seem that one cannot intend several things at the same time. For Augustine says (De Serm. Dom. in Monte ii, 14,16,17) that man's intention cannot be directed at the same time to God and to bodily benefits. Therefore, for the same reason, neither to any other two things.

Objection 2. Further, intention designates a movement of the will towards a terminus. Now there cannot be several termini in the same direction of one movement. Therefore the will cannot intend several things at the same time.

Objection 3. Further, intention presupposes an act of reason or of the intellect. But "it is not possible to understand several things at the same time," according to the Philosopher (Topic. ii, 10). Therefore neither is it possible to intend several things at the same time.

On the contrary, Art imitates nature. Now nature intends two purposes by means of one instrument: thus "the tongue is for the purpose of taste and speech" (De Anima ii, 8). Therefore, for the same reason, art or reason can at the same time direct one thing to two ends: so that one can intend several ends at the same time.

I answer that, The expression "two things" may be taken in two ways: they may be ordained to one another or not so ordained. And if they be ordained to one another, it is evident, from what has been said, that a man can intend several things at the same time. For intention is not only of the last end, as stated above (a. 2), but also of an intermediary end. Now a man intends at the same time, both the proximate and the last end; as the mixing of a medicine and the giving of health.

But if we take two things that are not ordained to one another, thus also a man can intend several things at the same time. This is evident from the fact that a

man prefers one thing to another because it is the better of the two. Now one of the reasons for which one thing is better than another is that it is available for more purposes: wherefore one thing can be chosen in preference to another, because of the greater number of purposes for which it is available: so that evidently a man can intend several things at the same time.

Reply to Objection 1. Augustine means to say that man cannot at the same time direct his attention to God and to bodily benefits, as to two last ends: since, as stated above (q. 1, a. 5), one man cannot have several last ends.

Reply to Objection 2. There can be several termini ordained to one another, of the same movement and in the same direction; but not unless they be ordained to one another. At the same time it must be observed that what is not one in reality may be taken as one by the reason. Now intention is a movement of the will to something already ordained by the reason, as stated above (a. 1, ad 3). Wherefore where we have many things in reality, we may take them as one term of intention, in so far as the reason takes them as one: either because two things concur in the integrity of one whole, as a proper measure of heat and cold conduce to health; or because two things are included in one which may be intended. For instance, the acquiring of wine and clothing is included in wealth, as in something common to both; wherefore nothing hinders the man who intends to acquire wealth, from intending both the others.

Reply to Objection 3. As stated in the Ia, q. 12, a. 10; Ia, q. 58, a. 2; Ia, q. 85, a. 4 it is possible to understand several things at the same time, in so far as, in some way, they are one.

Objection 1. It would seem that the intention of the end and the volition of the means are not one and the same movement. For Augustine says (*De Trin.* xi, 6) that “the will to see the window, has for its end the seeing of the window; and is another act from the will to see, through the window, the passersby.” But that I should will to see the passersby, through the window, belongs to intention; whereas that I will to see the window, belongs to the volition of the means. Therefore intention of the end and the willing of the means are distinct movements of the will.

Objection 2. Further, acts are distinct according to their objects. But the end and the means are distinct objects. Therefore the intention of the end and the willing of the means are distinct movements of the will.

Objection 3. Further, the willing of the means is called choice. But choice and intention are not the same. Therefore intention of the end and the willing of the means are not the same movement of the will.

On the contrary, The means in relation to the end, are as the mid-space to the terminus. Now it is all the same movement that passes through the mid-space to the terminus, in natural things. Therefore in things pertaining to the will, the intention of the end is the same movement as the willing of the means.

I answer that, The movement of the will to the end and to the means can be considered in two ways. First, according as the will is moved to each of the aforesaid absolutely and in itself. And thus there are really two movements of the will to them. Secondly, it may be considered accordingly as the will is moved to the means for the sake of the end: and thus the movement of the

will to the end and its movement to the means are one and the same thing. For when I say: “I wish to take medicine for the sake of health,” I signify no more than one movement of my will. And this is because the end is the reason for willing the means. Now the object, and that by reason of which it is an object, come under the same act; thus it is the same act of sight that perceives color and light, as stated above (q. 8, a. 3, ad 2). And the same applies to the intellect; for if it consider principle and conclusion absolutely, it considers each by a distinct act; but when it assents to the conclusion on account of the principles, there is but one act of the intellect.

Reply to Objection 1. Augustine is speaking of seeing the window and of seeing, through the window, the passersby, according as the will is moved to either absolutely.

Reply to Objection 2. The end, considered as a thing, and the means to that end, are distinct objects of the will. But in so far as the end is the formal object in willing the means, they are one and the same object.

Reply to Objection 3. A movement which is one as to the subject, may differ, according to our way of looking at it, as to its beginning and end, as in the case of ascent and descent (*Phys.* iii, 3). Accordingly, in so far as the movement of the will is to the means, as ordained to the end, it is called “choice”: but the movement of the will to the end as acquired by the means, it is called “intention.” A sign of this is that we can have intention of the end without having determined the means which are the object of choice.

Objection 1. It would seem that irrational animals intend the end. For in things void of reason nature stands further apart from the rational nature, than does the sensitive nature in irrational animals. But nature intends the end even in things void of reason, as is proved in Phys. ii, 8. Much more, therefore, do irrational animals intend the end.

Objection 2. Further, just as intention is of the end, so is enjoyment. But enjoyment is in irrational animals, as stated above (q. 11, a. 2). Therefore intention is too.

Objection 3. Further, to intend an end belongs to one who acts for an end; since to intend is nothing else than to tend to something. But irrational animals act for an end; for an animal is moved either to seek food, or to do something of the kind. Therefore irrational animals intend an end.

On the contrary, Intention of an end implies ordaining something to an end: which belongs to reason. Since therefore irrational animals are void of reason, it seems that they do not intend an end.

I answer that, As stated above (a. 1), to intend is to tend to something; and this belongs to the mover and to the moved. According, therefore, as that which is

moved to an end by another is said to intend the end, thus nature is said to intend an end, as being moved to its end by God, as the arrow is moved by the archer. And in this way, irrational animals intend an end, inasmuch as they are moved to something by natural instinct. The other way of intending an end belongs to the mover; according as he ordains the movement of something, either his own or another's, to an end. This belongs to reason alone. Wherefore irrational animals do not intend an end in this way, which is to intend properly and principally, as stated above (a. 1).

Reply to Objection 1. This argument takes intention in the sense of being moved to an end.

Reply to Objection 2. Enjoyment does not imply the ordaining of one thing to another, as intention does, but absolute repose in the end.

Reply to Objection 3. Irrational animals are moved to an end, not as though they thought that they can gain the end by this movement; this belongs to one that intends; but through desiring the end by natural instinct, they are moved to an end, moved, as it were, by another, like other things that are moved naturally.

FIRST PART OF THE SECOND PART, QUESTION 13
Of Choice, Which Is an Act of the Will with Regard to the Means
(In Six Articles)

We must now consider the acts of the will with regard to the means. There are three of them: to choose, to consent, and to use. And choice is preceded by counsel. First of all, then, we must consider choice: secondly, counsel; thirdly, consent; fourthly, use.

Concerning choice there are six points of inquiry:

- (1) Of what power is it the act; of the will or of the reason?
- (2) Whether choice is to be found in irrational animals?
- (3) Whether choice is only the means, or sometimes also of the end?
- (4) Whether choice is only of things that we do ourselves?
- (5) Whether choice is only of possible things?
- (6) Whether man chooses of necessity or freely?

Whether choice is an act of will or of reason?

Ia IIae q. 13 a. 1

Objection 1. It would seem that choice is an act, not of will but of reason. For choice implies comparison, whereby one is given preference to another. But to compare is an act of reason. Therefore choice is an act of reason.

Objection 2. Further, it is for the same faculty to form a syllogism, and to draw the conclusion. But, in practical matters, it is the reason that forms syllogisms. Since therefore choice is a kind of conclusion in practical matters, as stated in *Ethic. vii, 3*, it seems that it is an act of reason.

Objection 3. Further, ignorance does not belong to the will but to the cognitive power. Now there is an "ignorance of choice," as is stated in *Ethic. iii, 1*. Therefore it seems that choice does not belong to the will but to the reason.

On the contrary, The Philosopher says (*Ethic. iii, 3*) that choice is "the desire of things in our power." But desire is an act of will. Therefore choice is too.

I answer that, The word choice implies something belonging to the reason or intellect, and something belonging to the will: for the Philosopher says (*Ethic. vi, 2*) that choice is either "intellect influenced by appetite or appetite influenced by intellect." Now whenever two things concur to make one, one of them is formal in regard to the other. Hence Gregory of Nyssa* says that choice "is neither desire only, nor counsel only, but a combination of the two. For just as we say that an animal is composed of soul and body, and that it is neither a mere body, nor a mere soul, but both; so is it with choice."

Now we must observe, as regards the acts of the

soul, that an act belonging essentially to some power or habit, receives a form or species from a higher power or habit, according as an inferior is ordained by a superior: for if a man were to perform an act of fortitude for the love of God, that act is materially an act of fortitude, but formally, an act of charity. Now it is evident that, in a sense, reason precedes the will and ordains its act: in so far as the will tends to its object, according to the order of reason, since the apprehensive power presents the object to the appetite. Accordingly, that act whereby the will tends to something proposed to it as being good, through being ordained to the end by the reason, is materially an act of the will, but formally an act of the reason. Now in such like matters the substance of the act is as the matter in comparison to the order imposed by the higher power. Wherefore choice is substantially not an act of the reason but of the will: for choice is accomplished in a certain movement of the soul towards the good which is chosen. Consequently it is evidently an act of the appetitive power.

Reply to Objection 1. Choice implies a previous comparison; not that it consists in the comparison itself.

Reply to Objection 2. It is quite true that it is for the reason to draw the conclusion of a practical syllogism; and it is called "a decision" or "judgment," to be followed by "choice." And for this reason the conclusion seems to belong to the act of choice, as to that which results from it.

Reply to Objection 3. In speaking "of ignorance of choice," we do not mean that choice is a sort of knowledge, but that there is ignorance of what ought to be chosen.

* Nemesius, *De Nat. Hom.* xxxiii.

Objection 1. It would seem that irrational animals are able to choose. For choice “is the desire of certain things on account of an end,” as stated in *Ethic.* iii, 2,3. But irrational animals desire something on account of an end: since they act for an end, and from desire. Therefore choice is in irrational animals.

Objection 2. Further, the very word “electio” [choice] seems to signify the taking of something in preference to others. But irrational animals take something in preference to others: thus we can easily see for ourselves that a sheep will eat one grass and refuse another. Therefore choice is in irrational animals.

Objection 3. Further, according to *Ethic.* vi, 12, “it is from prudence that a man makes a good choice of means.” But prudence is found in irrational animals: hence it is said in the beginning of *Metaph.* i, 1 that “those animals which, like bees, cannot hear sounds, are prudent by instinct.” We see this plainly, in wonderful cases of sagacity manifested in the works of various animals, such as bees, spiders, and dogs. For a hound in following a stag, on coming to a crossroad, tries by scent whether the stag has passed by the first or the second road: and if he find that the stag has not passed there, being thus assured, takes to the third road without trying the scent; as though he were reasoning by way of exclusion, arguing that the stag must have passed by this way, since he did not pass by the others, and there is no other road. Therefore it seems that irrational animals are able to choose.

On the contrary, Gregory of Nyssa* says that “children and irrational animals act willingly but not from choice.” Therefore choice is not in irrational animals.

I answer that, Since choice is the taking of one thing in preference to another it must of necessity be in respect of several things that can be chosen. Consequently in those things which are altogether determinate to one there is no place for choice. Now the difference between the sensitive appetite and the will is that, as stated above (q. 1, a. 2, ad 3), the sensitive appetite is determinate to one particular thing, according to the order of nature; whereas the will, although determinate to one thing in general, viz. the good, according to the

order of nature, is nevertheless indeterminate in respect of particular goods. Consequently choice belongs properly to the will, and not to the sensitive appetite which is all that irrational animals have. Wherefore irrational animals are not competent to choose.

Reply to Objection 1. Not every desire of one thing on account of an end is called choice: there must be a certain discrimination of one thing from another. And this cannot be except when the appetite can be moved to several things.

Reply to Objection 2. An irrational animal takes one thing in preference to another, because its appetite is naturally determinate to that thing. Wherefore as soon as an animal, whether by its sense or by its imagination, is offered something to which its appetite is naturally inclined, it is moved to that alone, without making any choice. Just as fire is moved upwards and not downwards, without its making any choice.

Reply to Objection 3. As stated in *Phys.* iii, 3 “movement is the act of the movable, caused by a mover.” Wherefore the power of the mover appears in the movement of that which it moves. Accordingly, in all things moved by reason, the order of reason which moves them is evident, although the things themselves are without reason: for an arrow through the motion of the archer goes straight towards the target, as though it were endowed with reason to direct its course. The same may be seen in the movements of clocks and all engines put together by the art of man. Now as artificial things are in comparison to human art, so are all natural things in comparison to the Divine art. And accordingly order is to be seen in things moved by nature, just as in things moved by reason, as is stated in *Phys.* ii. And thus it is that in the works of irrational animals we notice certain marks of sagacity, in so far as they have a natural inclination to set about their actions in a most orderly manner through being ordained by the Supreme art. For which reason, too, certain animals are called prudent or sagacious; and not because they reason or exercise any choice about things. This is clear from the fact that all that share in one nature, invariably act in the same way.

Objection 1. It would seem that choice is not only of the means. For the Philosopher says (*Ethic.* vi, 12) that “virtue makes us choose aright; but it is not the part of virtue, but of some other power to direct aright those things which are to be done for its sake.” But that for the sake of which something is done is the end. Therefore choice is of the end.

Objection 2. Further, choice implies preference of one thing to another. But just as there can be preference

of means, so can there be preference of ends. Therefore choice can be of ends, just as it can be of means.

On the contrary, The Philosopher says (*Ethic.* iii, 2) that “volition is of the end, but choice of the means.”

I answer that, As already stated (a. 1, ad 2), choice results from the decision or judgment which is, as it were, the conclusion of a practical syllogism. Hence that which is the conclusion of a practical syllogism, is the matter of choice. Now in practical things the end

* Nemesius, *De Nat. Hom.* xxxiii.

stands in the position of a principle, not of a conclusion, as the Philosopher says (Phys. ii, 9). Wherefore the end, as such, is not a matter of choice.

But just as in speculative knowledge nothing hinders the principle of one demonstration or of one science, from being the conclusion of another demonstration or science; while the first indemonstrable principle cannot be the conclusion of any demonstration or science; so too that which is the end in one operation, may be ordained to something as an end. And in this way it is a matter of choice. Thus in the work of a physician health is the end: wherefore it is not a matter of choice for a physician, but a matter of principle. Now the health

of the body is ordained to the good of the soul, consequently with one who has charge of the soul's health, health or sickness may be a matter of choice; for the Apostle says (2 Cor. 12:10): "For when I am weak, then am I powerful." But the last end is nowise a matter of choice.

Reply to Objection 1. The proper ends of virtues are ordained to Happiness as to their last end. And thus it is that they can be a matter of choice.

Reply to Objection 2. As stated above (q. 1, a. 5), there is but one last end. Accordingly wherever there are several ends, they can be the subject of choice, in so far as they are ordained to a further end.

Whether choice is of those things only that are done by us?

Ia IIae q. 13 a. 4

Objection 1. It would seem that choice is not only in respect of human acts. For choice regards the means. Now, not only acts, but also the organs, are means (Phys. ii, 3). Therefore choice is not only concerned with human acts.

Objection 2. Further, action is distinct from contemplation. But choice has a place even in contemplation; in so far as one opinion is preferred to another. Therefore choice is not concerned with human acts alone.

Objection 3. Further, men are chosen for certain posts, whether secular or ecclesiastical, by those who exercise no action in their regard. Therefore choice is not concerned with human acts alone.

On the contrary, The Philosopher says (Ethic. iii, 2) that "no man chooses save what he can do himself."

I answer that, Just as intention regards the end, so does choice regard the means. Now the end is either an action or a thing. And when the end is a thing, some human action must intervene; either in so far as man produces the thing which is the end, as the physician produces health (wherefore the production of health is said to be the end of the physician); or in so far as man, in

some fashion, uses or enjoys the thing which is the end; thus for the miser, money or the possession of money is the end. The same is to be said of the means. For the means must needs be either an action; or a thing, with some action intervening whereby man either makes the thing which is the means, or puts it to some use. And thus it is that choice is always in regard to human acts.

Reply to Objection 1. The organs are ordained to the end, inasmuch as man makes use of them for the sake of the end.

Reply to Objection 2. In contemplation itself there is the act of the intellect assenting to this or that opinion. It is exterior action that is put in contradistinction to contemplation.

Reply to Objection 3. When a man chooses someone for a bishopric or some high position in the state, he chooses to name that man to that post. Else, if he had no right to act in the appointment of the bishop or official, he would have no right to choose. Likewise, whenever we speak of one thing being chosen in preference to another, it is in conjunction with some action of the chooser.

Whether choice is only of possible things?

Ia IIae q. 13 a. 5

Objection 1. It would seem that choice is not only of possible things. For choice is an act of the will, as stated above (a. 1). Now there is "a willing of impossibilities" (Ethic. iii, 2). Therefore there is also a choice of impossibilities.

Objection 2. Further, choice is of things done by us, as stated above (a. 4). Therefore it matters not, as far as the act of choosing is concerned, whether one choose that which is impossible in itself, or that which is impossible to the chooser. Now it often happens that we are unable to accomplish what we choose: so that this proves to be impossible to us. Therefore choice is of the impossible.

Objection 3. Further, to try to do a thing is to choose to do it. But the Blessed Benedict says (Regula

lxviii) that if the superior command what is impossible, it should be attempted. Therefore choice can be of the impossible.

On the contrary, The Philosopher says (Ethic. iii, 2) that "there is no choice of impossibilities."

I answer that, As stated above (a. 4), our choice is always concerned with our actions. Now whatever is done by us, is possible to us. Therefore we must needs say that choice is only of possible things.

Moreover, the reason for choosing a thing is that it conduces to an end. But what is impossible cannot conduce to an end. A sign of this is that when men in taking counsel together come to something that is impossible to them, they depart, as being unable to proceed with the business.

Again, this is evident if we examine the previous process of the reason. For the means, which are the object of choice, are to the end, as the conclusion is to the principle. Now it is clear that an impossible conclusion does not follow from a possible principle. Wherefore an end cannot be possible, unless the means be possible. Now no one is moved to the impossible. Consequently no one would tend to the end, save for the fact that the means appear to be possible. Therefore the impossible is not the object of choice.

Reply to Objection 1. The will stands between the intellect and the external action: for the intellect proposes to the will its object, and the will causes the external action. Hence the principle of the movement in the will is to be found in the intellect, which apprehends something under the universal notion of good: but the term or perfection of the will's act is to be observed in its relation to the action whereby a man tends to the attainment of a thing; for the movement of the will is from the soul to the thing. Consequently the perfect act of the will is in respect of something that is good for one to do.

Now this cannot be something impossible. Wherefore the complete act of the will is only in respect of what is possible and good for him that wills. But the incomplete act of the will is in respect of the impossible; and by some is called "velleity," because, to wit, one would will [vellet] such a thing, were it possible. But choice is an act of the will, fixed on something to be done by the chooser. And therefore it is by no means of anything but what is possible.

Reply to Objection 2. Since the object of the will is the apprehended good, we must judge of the object of the will according as it is apprehended. And so, just as sometimes the will tends to something which is apprehended as good, and yet is not really good; so is choice sometimes made of something apprehended as possible to the chooser, and yet impossible to him.

Reply to Objection 3. The reason for this is that the subject should not rely on his own judgment to decide whether a certain thing is possible; but in each case should stand by his superior's judgment.

Whether man chooses of necessity or freely?

Ia IIae q. 13 a. 6

Objection 1. It would seem that man chooses of necessity. For the end stands in relation to the object of choice, as the principle of that which follows from the principles, as declared in *Ethic.* vii, 8. But conclusions follow of necessity from their principles. Therefore man is moved of necessity from (willing) the end of the choice (of the means).

Objection 2. Further, as stated above (a. 1, ad 2), choice follows the reason's judgment of what is to be done. But reason judges of necessity about some things: on account of the necessity of the premises. Therefore it seems that choice also follows of necessity.

Objection 3. Further, if two things are absolutely equal, man is not moved to one more than to the other; thus if a hungry man, as Plato says (*Cf. De Coelo* ii, 13), be confronted on either side with two portions of food equally appetizing and at an equal distance, he is not moved towards one more than to the other; and he finds the reason of this in the immobility of the earth in the middle of the world. Now, if that which is equally (eligible) with something else cannot be chosen, much less can that be chosen which appears as less (eligible). Therefore if two or more things are available, of which one appears to be more (eligible), it is impossible to choose any of the others. Therefore that which appears to hold the first place is chosen of necessity. But every act of choosing is in regard to something that seems in some way better. Therefore every choice is made necessarily.

On the contrary, Choice is an act of a rational power; which according to the Philosopher (*Metaph.* ix, 2) stands in relation to opposites.

I answer that, Man does not choose of necessity.

And this is because that which is possible not to be, is not of necessity. Now the reason why it is possible not to choose, or to choose, may be gathered from a twofold power in man. For man can will and not will, act and not act; again, he can will this or that, and do this or that. The reason of this is seated in the very power of the reason. For the will can tend to whatever the reason can apprehend as good. Now the reason can apprehend as good, not only this, viz. "to will" or "to act," but also this, viz. "not to will" or "not to act." Again, in all particular goods, the reason can consider an aspect of some good, and the lack of some good, which has the aspect of evil: and in this respect, it can apprehend any single one of such goods as to be chosen or to be avoided. The perfect good alone, which is Happiness, cannot be apprehended by the reason as an evil, or as lacking in any way. Consequently man wills Happiness of necessity, nor can he will not to be happy, or to be unhappy. Now since choice is not of the end, but of the means, as stated above (a. 3); it is not of the perfect good, which is Happiness, but of other particular goods. Therefore man chooses not of necessity, but freely.

Reply to Objection 1. The conclusion does not always of necessity follow from the principles, but only when the principles cannot be true if the conclusion is not true. In like manner, the end does not always necessitate in man the choosing of the means, because the means are not always such that the end cannot be gained without them; or, if they be such, they are not always considered in that light.

Reply to Objection 2. The reason's decision or judgment of what is to be done is about things that are contingent and possible to us. In such matters the con-

clusions do not follow of necessity from principles that are absolutely necessary, but from such as are so conditionally; as, for instance, "If he runs, he is in motion."

Reply to Objection 3. If two things be proposed as

equal under one aspect, nothing hinders us from considering in one of them some particular point of superiority, so that the will has a bent towards that one rather than towards the other.

Objection 1. It would seem that choice is an act, not of will but of reason. For choice implies comparison, whereby one is given preference to another. But to compare is an act of reason. Therefore choice is an act of reason.

Objection 2. Further, it is for the same faculty to form a syllogism, and to draw the conclusion. But, in practical matters, it is the reason that forms syllogisms. Since therefore choice is a kind of conclusion in practical matters, as stated in *Ethic.* vii, 3, it seems that it is an act of reason.

Objection 3. Further, ignorance does not belong to the will but to the cognitive power. Now there is an “ignorance of choice,” as is stated in *Ethic.* iii, 1. Therefore it seems that choice does not belong to the will but to the reason.

On the contrary, The Philosopher says (*Ethic.* iii, 3) that choice is “the desire of things in our power.” But desire is an act of will. Therefore choice is too.

I answer that, The word choice implies something belonging to the reason or intellect, and something belonging to the will: for the Philosopher says (*Ethic.* vi, 2) that choice is either “intellect influenced by appetite or appetite influenced by intellect.” Now whenever two things concur to make one, one of them is formal in regard to the other. Hence Gregory of Nyssa* says that choice “is neither desire only, nor counsel only, but a combination of the two. For just as we say that an animal is composed of soul and body, and that it is neither a mere body, nor a mere soul, but both; so is it with choice.”

Now we must observe, as regards the acts of the

soul, that an act belonging essentially to some power or habit, receives a form or species from a higher power or habit, according as an inferior is ordained by a superior: for if a man were to perform an act of fortitude for the love of God, that act is materially an act of fortitude, but formally, an act of charity. Now it is evident that, in a sense, reason precedes the will and ordains its act: in so far as the will tends to its object, according to the order of reason, since the apprehensive power presents the object to the appetite. Accordingly, that act whereby the will tends to something proposed to it as being good, through being ordained to the end by the reason, is materially an act of the will, but formally an act of the reason. Now in such like matters the substance of the act is as the matter in comparison to the order imposed by the higher power. Wherefore choice is substantially not an act of the reason but of the will: for choice is accomplished in a certain movement of the soul towards the good which is chosen. Consequently it is evidently an act of the appetitive power.

Reply to Objection 1. Choice implies a previous comparison; not that it consists in the comparison itself.

Reply to Objection 2. It is quite true that it is for the reason to draw the conclusion of a practical syllogism; and it is called “a decision” or “judgment,” to be followed by “choice.” And for this reason the conclusion seems to belong to the act of choice, as to that which results from it.

Reply to Objection 3. In speaking “of ignorance of choice,” we do not mean that choice is a sort of knowledge, but that there is ignorance of what ought to be chosen.

* Nemesius, *De Nat. Hom.* xxxiii.

Objection 1. It would seem that irrational animals are able to choose. For choice “is the desire of certain things on account of an end,” as stated in *Ethic.* iii, 2,3. But irrational animals desire something on account of an end: since they act for an end, and from desire. Therefore choice is in irrational animals.

Objection 2. Further, the very word “electio” [choice] seems to signify the taking of something in preference to others. But irrational animals take something in preference to others: thus we can easily see for ourselves that a sheep will eat one grass and refuse another. Therefore choice is in irrational animals.

Objection 3. Further, according to *Ethic.* vi, 12, “it is from prudence that a man makes a good choice of means.” But prudence is found in irrational animals: hence it is said in the beginning of *Metaph.* i, 1 that “those animals which, like bees, cannot hear sounds, are prudent by instinct.” We see this plainly, in wonderful cases of sagacity manifested in the works of various animals, such as bees, spiders, and dogs. For a hound in following a stag, on coming to a crossroad, tries by scent whether the stag has passed by the first or the second road: and if he find that the stag has not passed there, being thus assured, takes to the third road without trying the scent; as though he were reasoning by way of exclusion, arguing that the stag must have passed by this way, since he did not pass by the others, and there is no other road. Therefore it seems that irrational animals are able to choose.

On the contrary, Gregory of Nyssa* says that “children and irrational animals act willingly but not from choice.” Therefore choice is not in irrational animals.

I answer that, Since choice is the taking of one thing in preference to another it must of necessity be in respect of several things that can be chosen. Consequently in those things which are altogether determinate to one there is no place for choice. Now the difference between the sensitive appetite and the will is that, as stated above (q. 1, a. 2, ad 3), the sensitive appetite is determinate to one particular thing, according to the order of nature; whereas the will, although determinate to one thing in general, viz. the good, according to the

order of nature, is nevertheless indeterminate in respect of particular goods. Consequently choice belongs properly to the will, and not to the sensitive appetite which is all that irrational animals have. Wherefore irrational animals are not competent to choose.

Reply to Objection 1. Not every desire of one thing on account of an end is called choice: there must be a certain discrimination of one thing from another. And this cannot be except when the appetite can be moved to several things.

Reply to Objection 2. An irrational animal takes one thing in preference to another, because its appetite is naturally determinate to that thing. Wherefore as soon as an animal, whether by its sense or by its imagination, is offered something to which its appetite is naturally inclined, it is moved to that alone, without making any choice. Just as fire is moved upwards and not downwards, without its making any choice.

Reply to Objection 3. As stated in *Phys.* iii, 3 “movement is the act of the movable, caused by a mover.” Wherefore the power of the mover appears in the movement of that which it moves. Accordingly, in all things moved by reason, the order of reason which moves them is evident, although the things themselves are without reason: for an arrow through the motion of the archer goes straight towards the target, as though it were endowed with reason to direct its course. The same may be seen in the movements of clocks and all engines put together by the art of man. Now as artificial things are in comparison to human art, so are all natural things in comparison to the Divine art. And accordingly order is to be seen in things moved by nature, just as in things moved by reason, as is stated in *Phys.* ii. And thus it is that in the works of irrational animals we notice certain marks of sagacity, in so far as they have a natural inclination to set about their actions in a most orderly manner through being ordained by the Supreme art. For which reason, too, certain animals are called prudent or sagacious; and not because they reason or exercise any choice about things. This is clear from the fact that all that share in one nature, invariably act in the same way.

* Nemesius, *De Nat. Hom.* xxxiii.

Objection 1. It would seem that choice is not only of the means. For the Philosopher says (*Ethic.* vi, 12) that “virtue makes us choose aright; but it is not the part of virtue, but of some other power to direct aright those things which are to be done for its sake.” But that for the sake of which something is done is the end. Therefore choice is of the end.

Objection 2. Further, choice implies preference of one thing to another. But just as there can be preference of means, so can there be preference of ends. Therefore choice can be of ends, just as it can be of means.

On the contrary, The Philosopher says (*Ethic.* iii, 2) that “volition is of the end, but choice of the means.”

I answer that, As already stated (a. 1, ad 2), choice results from the decision or judgment which is, as it were, the conclusion of a practical syllogism. Hence that which is the conclusion of a practical syllogism, is the matter of choice. Now in practical things the end stands in the position of a principle, not of a conclusion, as the Philosopher says (*Phys.* ii, 9). Wherefore the end, as such, is not a matter of choice.

But just as in speculative knowledge nothing hinders

the principle of one demonstration or of one science, from being the conclusion of another demonstration or science; while the first indemonstrable principle cannot be the conclusion of any demonstration or science; so too that which is the end in one operation, may be ordained to something as an end. And in this way it is a matter of choice. Thus in the work of a physician health is the end: wherefore it is not a matter of choice for a physician, but a matter of principle. Now the health of the body is ordained to the good of the soul, consequently with one who has charge of the soul’s health, health or sickness may be a matter of choice; for the Apostle says (2 Cor. 12:10): “For when I am weak, then am I powerful.” But the last end is nowise a matter of choice.

Reply to Objection 1. The proper ends of virtues are ordained to Happiness as to their last end. And thus it is that they can be a matter of choice.

Reply to Objection 2. As stated above (q. 1, a. 5), there is but one last end. Accordingly wherever there are several ends, they can be the subject of choice, in so far as they are ordained to a further end.

Objection 1. It would seem that choice is not only in respect of human acts. For choice regards the means. Now, not only acts, but also the organs, are means (Phys. ii, 3). Therefore choice is not only concerned with human acts.

Objection 2. Further, action is distinct from contemplation. But choice has a place even in contemplation; in so far as one opinion is preferred to another. Therefore choice is not concerned with human acts alone.

Objection 3. Further, men are chosen for certain posts, whether secular or ecclesiastical, by those who exercise no action in their regard. Therefore choice is not concerned with human acts alone.

On the contrary, The Philosopher says (Ethic. iii, 2) that “no man chooses save what he can do himself.”

I answer that, Just as intention regards the end, so does choice regard the means. Now the end is either an action or a thing. And when the end is a thing, some human action must intervene; either in so far as man produces the thing which is the end, as the physician produces health (wherefore the production of health is said to be the end of the physician); or in so far as man, in

some fashion, uses or enjoys the thing which is the end; thus for the miser, money or the possession of money is the end. The same is to be said of the means. For the means must needs be either an action; or a thing, with some action intervening whereby man either makes the thing which is the means, or puts it to some use. And thus it is that choice is always in regard to human acts.

Reply to Objection 1. The organs are ordained to the end, inasmuch as man makes use of them for the sake of the end.

Reply to Objection 2. In contemplation itself there is the act of the intellect assenting to this or that opinion. It is exterior action that is put in contradistinction to contemplation.

Reply to Objection 3. When a man chooses someone for a bishopric or some high position in the state, he chooses to name that man to that post. Else, if he had no right to act in the appointment of the bishop or official, he would have no right to choose. Likewise, whenever we speak of one thing being chosen in preference to another, it is in conjunction with some action of the chooser.

Objection 1. It would seem that choice is not only of possible things. For choice is an act of the will, as stated above (a. 1). Now there is “a willing of impossibilities” (Ethic. iii, 2). Therefore there is also a choice of impossibilities.

Objection 2. Further, choice is of things done by us, as stated above (a. 4). Therefore it matters not, as far as the act of choosing is concerned, whether one choose that which is impossible in itself, or that which is impossible to the chooser. Now it often happens that we are unable to accomplish what we choose: so that this proves to be impossible to us. Therefore choice is of the impossible.

Objection 3. Further, to try to do a thing is to choose to do it. But the Blessed Benedict says (Regula lxviii) that if the superior command what is impossible, it should be attempted. Therefore choice can be of the impossible.

On the contrary, The Philosopher says (Ethic. iii, 2) that “there is no choice of impossibilities.”

I answer that, As stated above (a. 4), our choice is always concerned with our actions. Now whatever is done by us, is possible to us. Therefore we must needs say that choice is only of possible things.

Moreover, the reason for choosing a thing is that it conduces to an end. But what is impossible cannot conduce to an end. A sign of this is that when men in taking counsel together come to something that is impossible to them, they depart, as being unable to proceed with the business.

Again, this is evident if we examine the previous process of the reason. For the means, which are the object of choice, are to the end, as the conclusion is to the principle. Now it is clear that an impossible conclusion does not follow from a possible principle. Wherefore an end cannot be possible, unless the means be possible.

Now no one is moved to the impossible. Consequently no one would tend to the end, save for the fact that the means appear to be possible. Therefore the impossible is not the object of choice.

Reply to Objection 1. The will stands between the intellect and the external action: for the intellect proposes to the will its object, and the will causes the external action. Hence the principle of the movement in the will is to be found in the intellect, which apprehends something under the universal notion of good: but the term or perfection of the will’s act is to be observed in its relation to the action whereby a man tends to the attainment of a thing; for the movement of the will is from the soul to the thing. Consequently the perfect act of the will is in respect of something that is good for one to do. Now this cannot be something impossible. Wherefore the complete act of the will is only in respect of what is possible and good for him that wills. But the incomplete act of the will is in respect of the impossible; and by some is called “velleity,” because, to wit, one would will [vellet] such a thing, were it possible. But choice is an act of the will, fixed on something to be done by the chooser. And therefore it is by no means of anything but what is possible.

Reply to Objection 2. Since the object of the will is the apprehended good, we must judge of the object of the will according as it is apprehended. And so, just as sometimes the will tends to something which is apprehended as good, and yet is not really good; so is choice sometimes made of something apprehended as possible to the chooser, and yet impossible to him.

Reply to Objection 3. The reason for this is that the subject should not rely on his own judgment to decide whether a certain thing is possible; but in each case should stand by his superior’s judgment.

Objection 1. It would seem that man chooses of necessity. For the end stands in relation to the object of choice, as the principle of that which follows from the principles, as declared in *Ethic.* vii, 8. But conclusions follow of necessity from their principles. Therefore man is moved of necessity from (willing) the end of the choice (of the means).

Objection 2. Further, as stated above (a. 1, ad 2), choice follows the reason's judgment of what is to be done. But reason judges of necessity about some things: on account of the necessity of the premises. Therefore it seems that choice also follows of necessity.

Objection 3. Further, if two things are absolutely equal, man is not moved to one more than to the other; thus if a hungry man, as Plato says (*Cf. De Coelo* ii, 13), be confronted on either side with two portions of food equally appetizing and at an equal distance, he is not moved towards one more than to the other; and he finds the reason of this in the immobility of the earth in the middle of the world. Now, if that which is equally (eligible) with something else cannot be chosen, much less can that be chosen which appears as less (eligible). Therefore if two or more things are available, of which one appears to be more (eligible), it is impossible to choose any of the others. Therefore that which appears to hold the first place is chosen of necessity. But every act of choosing is in regard to something that seems in some way better. Therefore every choice is made necessarily.

On the contrary, Choice is an act of a rational power; which according to the Philosopher (*Metaph.* ix, 2) stands in relation to opposites.

I answer that, Man does not choose of necessity. And this is because that which is possible not to be, is not of necessity. Now the reason why it is possible not to choose, or to choose, may be gathered from a twofold power in man. For man can will and not will, act and

not act; again, he can will this or that, and do this or that. The reason of this is seated in the very power of the reason. For the will can tend to whatever the reason can apprehend as good. Now the reason can apprehend as good, not only this, viz. "to will" or "to act," but also this, viz. "not to will" or "not to act." Again, in all particular goods, the reason can consider an aspect of some good, and the lack of some good, which has the aspect of evil: and in this respect, it can apprehend any single one of such goods as to be chosen or to be avoided. The perfect good alone, which is Happiness, cannot be apprehended by the reason as an evil, or as lacking in any way. Consequently man wills Happiness of necessity, nor can he will not to be happy, or to be unhappy. Now since choice is not of the end, but of the means, as stated above (a. 3); it is not of the perfect good, which is Happiness, but of other particular goods. Therefore man chooses not of necessity, but freely.

Reply to Objection 1. The conclusion does not always of necessity follow from the principles, but only when the principles cannot be true if the conclusion is not true. In like manner, the end does not always necessitate in man the choosing of the means, because the means are not always such that the end cannot be gained without them; or, if they be such, they are not always considered in that light.

Reply to Objection 2. The reason's decision or judgment of what is to be done is about things that are contingent and possible to us. In such matters the conclusions do not follow of necessity from principles that are absolutely necessary, but from such as are so conditionally; as, for instance, "If he runs, he is in motion."

Reply to Objection 3. If two things be proposed as equal under one aspect, nothing hinders us from considering in one of them some particular point of superiority, so that the will has a bent towards that one rather than towards the other.

FIRST PART OF THE SECOND PART, QUESTION 14

Of Counsel, Which Precedes Choice

(In Six Articles)

We must now consider counsel; concerning which there are six points of inquiry:

- (1) Whether counsel is an inquiry?
- (2) Whether counsel is of the end or of the means?
- (3) Whether counsel is only of things that we do?
- (4) Whether counsel is of all things that we do?
- (5) Whether the process of counsel is one of analysis?
- (6) Whether the process of counsel is indefinite?

Whether counsel is an inquiry?

Ia IIae q. 14 a. 1

Objection 1. It would seem that counsel is not an inquiry. For Damascene says (De Fide Orth. ii, 22) that counsel is “an act of the appetite.” But inquiry is not an act of the appetite. Therefore counsel is not an inquiry.

Objection 2. Further, inquiry is a discursive act of the intellect: for which reason it is not found in God, Whose knowledge is not discursive, as we have shown in the Ia, q. 14, a. 7. But counsel is ascribed to God: for it is written (Eph. 1:11) that “He worketh all things according to the counsel of His will.” Therefore counsel is not inquiry.

Objection 3. Further, inquiry is of doubtful matters. But counsel is given in matters that are certainly good; thus the Apostle says (1 Cor. 7:25): “Now concerning virgins I have no commandment of the Lord: but I give counsel.” Therefore counsel is not an inquiry.

On the contrary, Gregory of Nyssa* says: “Every counsel is an inquiry; but not every inquiry is a counsel.”

I answer that, Choice, as stated above (q. 13, a. 1, ad 2; a. 3), follows the judgment of the reason about what is to be done. Now there is much uncertainty in things that have to be done; because actions are concerned with contingent singulars, which by reason of their vicissitude, are uncertain. Now in things doubtful and uncertain the reason does not pronounce judgment, without previous inquiry: wherefore the reason must of necessity institute an inquiry before deciding on the objects of choice; and this inquiry is called counsel. Hence the Philosopher says (Ethic. iii, 2) that choice is the “desire of what has been already counselled.”

Reply to Objection 1. When the acts of two powers are ordained to one another, in each of them there is something belonging to the other power: consequently each act can be denominated from either power. Now it is evident that the act of the reason giving direction as to

the means, and the act of the will tending to these means according to the reason’s direction, are ordained to one another. Consequently there is to be found something of the reason, viz. order, in that act of the will, which is choice: and in counsel, which is an act of reason, something of the will—both as matter (since counsel is of what man wills to do)—and as motive (because it is from willing the end, that man is moved to take counsel in regard to the means). And therefore, just as the Philosopher says (Ethic. vi, 2) that choice “is intellect influenced by appetite,” thus pointing out that both concur in the act of choosing; so Damascene says (De Fide Orth. ii, 22) that counsel is “appetite based on inquiry,” so as to show that counsel belongs, in a way, both to the will, on whose behalf and by whose impulsion the inquiry is made, and to the reason that executes the inquiry.

Reply to Objection 2. The things that we say of God must be understood without any of the defects which are to be found in us: thus in us science is of conclusions derived by reasoning from causes to effects: but science when said of God means sure knowledge of all effects in the First Cause, without any reasoning process. In like manner we ascribe counsel to God, as to the certainty of His knowledge or judgment, which certainty in us arises from the inquiry of counsel. But such inquiry has no place in God; wherefore in this respect it is not ascribed to God: in which sense Damascene says (De Fide Orth. ii, 22): “God takes not counsel: those only take counsel who lack knowledge.”

Reply to Objection 3. It may happen that things which are most certainly good in the opinion of wise and spiritual men are not certainly good in the opinion of many, or at least of carnal-minded men. Consequently in such things counsel may be given.

* Nemesius, De Nat. Hom. xxxiv.

Objection 1. It would seem that counsel is not only of the means but also of the end. For whatever is doubtful, can be the subject of inquiry. Now in things to be done by man there happens sometimes a doubt as to the end and not only as to the means. Since therefore inquiry as to what is to be done is counsel, it seems that counsel can be of the end.

Objection 2. Further, the matter of counsel is human actions. But some human actions are ends, as stated in Ethic. i, 1. Therefore counsel can be of the end.

On the contrary, Gregory of Nyssa* says that “counsel is not of the end, but of the means.”

I answer that, The end is the principle in practical matters: because the reason of the means is to be found in the end. Now the principle cannot be called in question, but must be presupposed in every inquiry.

Since therefore counsel is an inquiry, it is not of the end, but only of the means. Nevertheless it may happen that what is the end in regard to some things, is ordained to something else; just as also what is the principle of one demonstration, is the conclusion of another: and consequently that which is looked upon as the end in one inquiry, may be looked upon as the means in another; and thus it will become an object of counsel.

Reply to Objection 1. That which is looked upon as an end, is already fixed: consequently as long as there is any doubt about it, it is not looked upon as an end. Wherefore if counsel is taken about it, it will be counsel not about the end, but about the means.

Reply to Objection 2. Counsel is about operations, in so far as they are ordained to some end. Consequently if any human act be an end, it will not, as such, be the matter of counsel.

Objection 1. It would seem that counsel is not only of things that we do. For counsel implies some kind of conference. But it is possible for many to confer about things that are not subject to movement, and are not the result of our actions, such as the nature of various things. Therefore counsel is not only of things that we do.

Objection 2. Further, men sometimes seek counsel about things that are laid down by law; hence we speak of counsel at law. And yet those who seek counsel thus, have nothing to do in making the laws. Therefore counsel is not only of things that we do.

Objection 3. Further, some are said to take consultation about future events; which, however, are not in our power. Therefore counsel is not only of things that we do.

Objection 4. Further, if counsel were only of things that we do, no would take counsel about what another does. But this is clearly untrue. Therefore counsel is not only of things that we do.

On the contrary, Gregory of Nyssa† says: “We take counsel of things that are within our competency and that we are able to do.”

I answer that, Counsel properly implies a conference held between several; the very word [consilium] denotes this, for it means a sitting together [considium], from the fact that many sit together in order to confer with one another. Now we must take note that in contingent particular cases, in order that anything be known for certain, it is necessary to take several conditions or circumstances into consideration, which it is not easy for one to consider, but are considered by several with greater certainty, since what one takes note of, escapes the notice of another; whereas in necessary and univer-

sal things, our view is brought to bear on matters much more absolute and simple, so that one man by himself may be sufficient to consider these things. Wherefore the inquiry of counsel is concerned, properly speaking, with contingent singulars. Now the knowledge of the truth in such matters does not rank so high as to be desirable of itself, as is the knowledge of things universal and necessary; but it is desired as being useful towards action, because actions bear on things singular and contingent. Consequently, properly speaking, counsel is about things done by us.

Reply to Objection 1. Counsel implies conference, not of any kind, but about what is to be done, for the reason given above.

Reply to Objection 2. Although that which is laid down by the law is not due to the action of him who seeks counsel, nevertheless it directs him in his action: since the mandate of the law is one reason for doing something.

Reply to Objection 3. Counsel is not only about what is done, but also about whatever has relation to what is done. And for this reason we speak of consulting about future events, in so far as man is induced to do or omit something, through the knowledge of future events.

Reply to Objection 4. We seek counsel about the actions of others, in so far as they are, in some way, one with us; either by union of affection—thus a man is solicitous about what concerns his friend, as though it concerned himself; or after the manner of an instrument, for the principal agent and the instrument are, in a way, one cause, since one acts through the other; thus the master takes counsel about what he would do through his servant.

* Nemesius, De Nat. Hom. xxxiv. † Nemesius, De Nat. Hom. xxxiv.

Objection 1. It would seem that counsel is about all things that we have to do. For choice is the “desire of what is counselled” as stated above (a. 1). But choice is about all things that we do. Therefore counsel is too.

Objection 2. Further, counsel implies the reason’s inquiry. But, whenever we do not act through the impulse of passion, we act in virtue of the reason’s inquiry. Therefore there is counsel about everything that we do.

Objection 3. Further, the Philosopher says (Ethic. iii, 3) that “if it appears that something can be done by more means than one, we take counsel by inquiring whereby it may be done most easily and best; but if it can be accomplished by one means, how it can be done by this.” But whatever is done, is done by one means or by several. Therefore counsel takes place in all things that we do.

On the contrary, Gregory of Nyssa* says that “counsel has no place in things that are done according to science or art.”

I answer that, Counsel is a kind of inquiry, as stated above (a. 1). But we are wont to inquire about things that admit of doubt; hence the process of inquiry, which is called an argument, “is a reason that attests something that admitted of doubt”†. Now, that something in relation to human acts admits of no doubt, arises from a twofold source. First, because certain determinate ends are gained by certain determinate means: as happens in the arts which are governed by certain fixed rules

of action; thus a writer does not take counsel how to form his letters, for this is determined by art. Secondly, from the fact that it little matters whether it is done this or that way; this occurs in minute matters, which help or hinder but little with regard to the end aimed at; and reason looks upon small things as mere nothings. Consequently there are two things of which we do not take counsel, although they conduce to the end, as the Philosopher says (Ethic. iii, 3): namely, minute things, and those which have a fixed way of being done, as in works produced by art, with the exception of those arts that admit of conjecture such as medicine, commerce, and the like, as Gregory of Nyssa says‡.

Reply to Objection 1. Choice presupposes counsel by reason of its judgment or decision. Consequently when the judgment or decision is evident without inquiry, there is no need for the inquiry of counsel.

Reply to Objection 2. In matters that are evident, the reason makes no inquiry, but judges at once. Consequently there is no need of counsel in all that is done by reason.

Reply to Objection 3. When a thing can be accomplished by one means, but in different ways, doubt may arise, just as when it can be accomplished by several means: hence the need of counsel. But when not only the means, but also the way of using the means, is fixed, then there is no need of counsel.

Objection 1. It would seem that the process of counsel is not one of analysis. For counsel is about things that we do. But the process of our actions is not one of analysis, but rather one of synthesis, viz. from the simple to the composite. Therefore counsel does not always proceed by way of analysis.

Objection 2. Further, counsel is an inquiry of the reason. But reason proceeds from things that precede to things that follow, according to the more appropriate order. Since then, the past precedes the present, and the present precedes the future, it seems that in taking counsel one should proceed from the past and present to the future: which is not an analytical process. Therefore the process of counsel is not one of analysis.

Objection 3. Further, counsel is only of such things as are possible to us, according to Ethic. iii, 3. But the question as to whether a certain thing is possible to us, depends on what we are able or unable to do, in order to gain such and such an end. Therefore the inquiry of counsel should begin from things present.

On the contrary, The Philosopher says (Ethic. iii, 3) that “he who takes counsel seems to inquire and analyze.”

I answer that, In every inquiry one must begin from some principle. And if this principle precedes both in knowledge and in being, the process is not analytic, but synthetic: because to proceed from cause to effect is to proceed synthetically, since causes are more simple than effects. But if that which precedes in knowledge is later in the order of being, the process is one of analysis, as when our judgment deals with effects, which by analysis we trace to their simple causes. Now the principle in the inquiry of counsel is the end, which precedes indeed in intention, but comes afterwards into execution. Hence the inquiry of counsel must needs be one of analysis, beginning that is to say, from that which is intended in the future, and continuing until it arrives at that which is to be done at once.

Reply to Objection 1. Counsel is indeed about action. But actions take their reason from the end; and consequently the order of reasoning about actions is contrary to the order of actions.

Reply to Objection 2. Reason begins with that which is first according to reason; but not always with that which is first in point of time.

Reply to Objection 3. We should not want to know

* Nemesius, De Nat. Hom. xxxiv. † Cicero, Topic. ad Trebat.

‡ Nemesius, De Nat. Hom. xxiv.

whether something to be done for an end be possible, if it were not suitable for gaining that end. Hence we must

first inquire whether it be conducive to the end, before considering whether it be possible.

Whether the process of counsel is indefinite?

Ia IIae q. 14 a. 6

Objection 1. It would seem that the process of counsel is indefinite. For counsel is an inquiry about the particular things with which action is concerned. But singulars are infinite. Therefore the process of counsel is indefinite.

Objection 2. Further, the inquiry of counsel has to consider not only what is to be done, but how to avoid obstacles. But every human action can be hindered, and an obstacle can be removed by some human reason. Therefore the inquiry about removing obstacles can go on indefinitely.

Objection 3. Further, the inquiry of demonstrative science does not go on indefinitely, because one can come to principles that are self-evident, which are absolutely certain. But such like certainty is not to be had in contingent singulars, which are variable and uncertain. Therefore the inquiry of counsel goes on indefinitely.

On the contrary, “No one is moved to that which he cannot possibly reach” (De Coelo i, 7). But it is impossible to pass through the infinite. If therefore the inquiry of counsel is infinite, no one would begin to take counsel. Which is clearly untrue.

I answer that, The inquiry of counsel is actually finite on both sides, on that of its principle and on that of its term. For a twofold principle is available in the inquiry of counsel. One is proper to it, and belongs to the very genus of things pertaining to operation: this is the end which is not the matter of counsel, but is taken for granted as its principle, as stated above (a. 2). The other principle is taken from another genus, so to speak; thus in demonstrative sciences one science postulates cer-

tain things from another, without inquiring into them. Now these principles which are taken for granted in the inquiry of counsel are any facts received through the senses—for instance, that this is bread or iron: and also any general statements known either through speculative or through practical science; for instance, that adultery is forbidden by God, or that man cannot live without suitable nourishment. Of such things counsel makes no inquiry. But the term of inquiry is that which we are able to do at once. For just as the end is considered in the light of a principle, so the means are considered in the light of a conclusion. Wherefore that which presents itself as to be done first, holds the position of an ultimate conclusion whereat the inquiry comes to an end. Nothing however prevents counsel from being infinite potentially, for as much as an infinite number of things may present themselves to be inquired into by means of counsel.

Reply to Objection 1. Singulars are infinite; not actually, but only potentially.

Reply to Objection 2. Although human action can be hindered, the hindrance is not always at hand. Consequently it is not always necessary to take counsel about removing the obstacle.

Reply to Objection 3. In contingent singulars, something may be taken for certain, not simply, indeed, but for the time being, and as far as it concerns the work to be done. Thus that Socrates is sitting is not a necessary statement; but that he is sitting, as long as he continues to sit, is necessary; and this can be taken for a certain fact.

Objection 1. It would seem that counsel is not an inquiry. For Damascene says (*De Fide Orth.* ii, 22) that counsel is “an act of the appetite.” But inquiry is not an act of the appetite. Therefore counsel is not an inquiry.

Objection 2. Further, inquiry is a discursive act of the intellect: for which reason it is not found in God, whose knowledge is not discursive, as we have shown in the Ia, q. 14, a. 7. But counsel is ascribed to God: for it is written (*Eph.* 1:11) that “He worketh all things according to the counsel of His will.” Therefore counsel is not inquiry.

Objection 3. Further, inquiry is of doubtful matters. But counsel is given in matters that are certainly good; thus the Apostle says (*1 Cor.* 7:25): “Now concerning virgins I have no commandment of the Lord: but I give counsel.” Therefore counsel is not an inquiry.

On the contrary, Gregory of Nyssa* says: “Every counsel is an inquiry; but not every inquiry is a counsel.”

I answer that, Choice, as stated above (q. 13, a. 1, ad 2; a. 3), follows the judgment of the reason about what is to be done. Now there is much uncertainty in things that have to be done; because actions are concerned with contingent singulars, which by reason of their vicissitude, are uncertain. Now in things doubtful and uncertain the reason does not pronounce judgment, without previous inquiry: wherefore the reason must of necessity institute an inquiry before deciding on the objects of choice; and this inquiry is called counsel. Hence the Philosopher says (*Ethic.* iii, 2) that choice is the “desire of what has been already counselled.”

Reply to Objection 1. When the acts of two powers are ordained to one another, in each of them there is something belonging to the other power: consequently each act can be denominated from either power. Now it is evident that the act of the reason giving direction as to

the means, and the act of the will tending to these means according to the reason’s direction, are ordained to one another. Consequently there is to be found something of the reason, viz. order, in that act of the will, which is choice: and in counsel, which is an act of reason, something of the will—both as matter (since counsel is of what man wills to do)—and as motive (because it is from willing the end, that man is moved to take counsel in regard to the means). And therefore, just as the Philosopher says (*Ethic.* vi, 2) that choice “is intellect influenced by appetite,” thus pointing out that both concur in the act of choosing; so Damascene says (*De Fide Orth.* ii, 22) that counsel is “appetite based on inquiry,” so as to show that counsel belongs, in a way, both to the will, on whose behalf and by whose impulsion the inquiry is made, and to the reason that executes the inquiry.

Reply to Objection 2. The things that we say of God must be understood without any of the defects which are to be found in us: thus in us science is of conclusions derived by reasoning from causes to effects: but science when said of God means sure knowledge of all effects in the First Cause, without any reasoning process. In like manner we ascribe counsel to God, as to the certainty of His knowledge or judgment, which certainty in us arises from the inquiry of counsel. But such inquiry has no place in God; wherefore in this respect it is not ascribed to God: in which sense Damascene says (*De Fide Orth.* ii, 22): “God takes not counsel: those only take counsel who lack knowledge.”

Reply to Objection 3. It may happen that things which are most certainly good in the opinion of wise and spiritual men are not certainly good in the opinion of many, or at least of carnal-minded men. Consequently in such things counsel may be given.

* Nemesius, *De Nat. Hom.* xxxiv.

Objection 1. It would seem that counsel is not only of the means but also of the end. For whatever is doubtful, can be the subject of inquiry. Now in things to be done by man there happens sometimes a doubt as to the end and not only as to the means. Since therefore inquiry as to what is to be done is counsel, it seems that counsel can be of the end.

Objection 2. Further, the matter of counsel is human actions. But some human actions are ends, as stated in Ethic. i, 1. Therefore counsel can be of the end.

On the contrary, Gregory of Nyssa* says that “counsel is not of the end, but of the means.”

I answer that, The end is the principle in practical matters: because the reason of the means is to be found in the end. Now the principle cannot be called in question, but must be presupposed in every inquiry.

Since therefore counsel is an inquiry, it is not of the end, but only of the means. Nevertheless it may happen that what is the end in regard to some things, is ordained to something else; just as also what is the principle of one demonstration, is the conclusion of another: and consequently that which is looked upon as the end in one inquiry, may be looked upon as the means in another; and thus it will become an object of counsel.

Reply to Objection 1. That which is looked upon as an end, is already fixed: consequently as long as there is any doubt about it, it is not looked upon as an end. Wherefore if counsel is taken about it, it will be counsel not about the end, but about the means.

Reply to Objection 2. Counsel is about operations, in so far as they are ordained to some end. Consequently if any human act be an end, it will not, as such, be the matter of counsel.

* Nemesius, De Nat. Hom. xxxiv.

Objection 1. It would seem that counsel is not only of things that we do. For counsel implies some kind of conference. But it is possible for many to confer about things that are not subject to movement, and are not the result of our actions, such as the nature of various things. Therefore counsel is not only of things that we do.

Objection 2. Further, men sometimes seek counsel about things that are laid down by law; hence we speak of counsel at law. And yet those who seek counsel thus, have nothing to do in making the laws. Therefore counsel is not only of things that we do.

Objection 3. Further, some are said to take consultation about future events; which, however, are not in our power. Therefore counsel is not only of things that we do.

Objection 4. Further, if counsel were only of things that we do, no would take counsel about what another does. But this is clearly untrue. Therefore counsel is not only of things that we do.

On the contrary, Gregory of Nyssa* says: “We take counsel of things that are within our competency and that we are able to do.”

I answer that, Counsel properly implies a conference held between several; the very word [consilium] denotes this, for it means a sitting together [considium], from the fact that many sit together in order to confer with one another. Now we must take note that in contingent particular cases, in order that anything be known for certain, it is necessary to take several conditions or circumstances into consideration, which it is not easy for one to consider, but are considered by several with greater certainty, since what one takes note of, escapes the notice of another; whereas in necessary and univer-

sal things, our view is brought to bear on matters much more absolute and simple, so that one man by himself may be sufficient to consider these things. Wherefore the inquiry of counsel is concerned, properly speaking, with contingent singulars. Now the knowledge of the truth in such matters does not rank so high as to be desirable of itself, as is the knowledge of things universal and necessary; but it is desired as being useful towards action, because actions bear on things singular and contingent. Consequently, properly speaking, counsel is about things done by us.

Reply to Objection 1. Counsel implies conference, not of any kind, but about what is to be done, for the reason given above.

Reply to Objection 2. Although that which is laid down by the law is not due to the action of him who seeks counsel, nevertheless it directs him in his action: since the mandate of the law is one reason for doing something.

Reply to Objection 3. Counsel is not only about what is done, but also about whatever has relation to what is done. And for this reason we speak of consulting about future events, in so far as man is induced to do or omit something, through the knowledge of future events.

Reply to Objection 4. We seek counsel about the actions of others, in so far as they are, in some way, one with us; either by union of affection—thus a man is solicitous about what concerns his friend, as though it concerned himself; or after the manner of an instrument, for the principal agent and the instrument are, in a way, one cause, since one acts through the other; thus the master takes counsel about what he would do through his servant.

* Nemesius, De Nat. Hom. xxxiv.

Objection 1. It would seem that counsel is about all things that we have to do. For choice is the “desire of what is counselled” as stated above (a. 1). But choice is about all things that we do. Therefore counsel is too.

Objection 2. Further, counsel implies the reason’s inquiry. But, whenever we do not act through the impulse of passion, we act in virtue of the reason’s inquiry. Therefore there is counsel about everything that we do.

Objection 3. Further, the Philosopher says (Ethic. iii, 3) that “if it appears that something can be done by more means than one, we take counsel by inquiring whereby it may be done most easily and best; but if it can be accomplished by one means, how it can be done by this.” But whatever is done, is done by one means or by several. Therefore counsel takes place in all things that we do.

On the contrary, Gregory of Nyssa* says that “counsel has no place in things that are done according to science or art.”

I answer that, Counsel is a kind of inquiry, as stated above (a. 1). But we are wont to inquire about things that admit of doubt; hence the process of inquiry, which is called an argument, “is a reason that attests something that admitted of doubt”†. Now, that something in relation to human acts admits of no doubt, arises from a twofold source. Reply to Objection 1. Counsel is indeed about action. But actions take their reason from the end; and consequently the order of reasoning about actions is contrary to the order of actions.

Reply to Objection 2. Reason begins with that which is first according to reason; but not always with that which is first in point of time.

Reply to Objection 3. We should not want to know whether something to be done for an end be possible, if it were not suitable for gaining that end. Hence we must first inquire whether it be conducive to the end, before considering whether it be possible.

Objection 1. It would seem that the process of counsel is indefinite. For counsel is an inquiry about the particular things with which action is concerned. But singulars are infinite. Therefore the process of counsel is indefinite.

Objection 2. Further, the inquiry of counsel has to consider not only what is to be done, but how to avoid obstacles. But every human action can be hindered, and an obstacle can be removed by some human reason. Therefore the inquiry about removing obstacles can go on indefinitely.

Objection 3. Further, the inquiry of demonstrative science does not go on indefinitely, because one can come to principles that are self-evident, which are absolutely certain. But such like certainty is not to be had in contingent singulars, which are variable and uncertain. Therefore the inquiry of counsel goes on indefinitely.

On the contrary, “No one is moved to that which he cannot possibly reach” (De Coelo i, 7). But it is impossible to pass through the infinite. If therefore the inquiry of counsel is infinite, no one would begin to take counsel. Which is clearly untrue.

I answer that, The inquiry of counsel is actually finite on both sides, on that of its principle and on that of its term. For a twofold principle is available in the inquiry of counsel. One is proper to it, and belongs to the very genus of things pertaining to operation: this is the end which is not the matter of counsel, but is taken for granted as its principle, as stated above (a. 2). The other principle is taken from another genus, so to speak; thus in demonstrative sciences one science postulates cer-

tain things from another, without inquiring into them. Now these principles which are taken for granted in the inquiry of counsel are any facts received through the senses—for instance, that this is bread or iron: and also any general statements known either through speculative or through practical science; for instance, that adultery is forbidden by God, or that man cannot live without suitable nourishment. Of such things counsel makes no inquiry. But the term of inquiry is that which we are able to do at once. For just as the end is considered in the light of a principle, so the means are considered in the light of a conclusion. Wherefore that which presents itself as to be done first, holds the position of an ultimate conclusion whereat the inquiry comes to an end. Nothing however prevents counsel from being infinite potentially, for as much as an infinite number of things may present themselves to be inquired into by means of counsel.

Reply to Objection 1. Singulars are infinite; not actually, but only potentially.

Reply to Objection 2. Although human action can be hindered, the hindrance is not always at hand. Consequently it is not always necessary to take counsel about removing the obstacle.

Reply to Objection 3. In contingent singulars, something may be taken for certain, not simply, indeed, but for the time being, and as far as it concerns the work to be done. Thus that Socrates is sitting is not a necessary statement; but that he is sitting, as long as he continues to sit, is necessary; and this can be taken for a certain fact.

FIRST PART OF THE SECOND PART, QUESTION 15
Of Consent, Which Is an Act of the Will in Regard to the Means
(In Four Articles)

We must now consider consent; concerning which there are four points of inquiry:

- (1) Whether consent is an act of the appetitive or of the apprehensive power?
- (2) Whether it is to be found in irrational animals?
- (3) Whether it is directed to the end or to the means?
- (4) Whether consent to an act belongs to the higher part of the soul only?

Whether consent is an act of the appetitive or of the apprehensive power?

Ia IIae q. 15 a. 1

Objection 1. It would seem that consent belongs only to the apprehensive part of the soul. For Augustine (De Trin. xii, 12) ascribes consent to the higher reason. But the reason is an apprehensive power. Therefore consent belongs to an apprehensive power.

Objection 2. Further, consent is “co-sense.” But sense is an apprehensive power. Therefore consent is the act of an apprehensive power.

Objection 3. Further, just as assent is an application of the intellect to something, so is consent. But assent belongs to the intellect, which is an apprehensive power. Therefore consent also belongs to an apprehensive power.

On the contrary, Damascene says (De Fide Orth. ii, 22) that “if a man judge without affection for that of which he judges, there is no sentence,” i.e. consent. But affection belongs to the appetitive power. Therefore consent does also.

I answer that, Consent implies application of sense to something. Now it is proper to sense to take cognizance of things present; for the imagination apprehends the similitude of corporeal things, even in the absence of the things of which they bear the likeness; while the intellect apprehends universal ideas, which it can apprehend indifferently, whether the singulars be present or absent. And since the act of an appetitive power is a kind of inclination to the thing itself, the application of the appetitive power to the thing, in so far

as it cleaves to it, gets by a kind of similitude, the name of sense, since, as it were, it acquires direct knowledge of the thing to which it cleaves, in so far as it takes complacency in it. Hence it is written (Wis. 1:1): “Think of [Sentite] the Lord in goodness.” And on these grounds consent is an act of the appetitive power.

Reply to Objection 1. As stated in De Anima iii, 9, “the will is in the reason.” Hence, when Augustine ascribes consent to the reason, he takes reason as including the will.

Reply to Objection 2. Sense, properly speaking, belongs to the apprehensive faculty; but by way of similitude, in so far as it implies seeking acquaintance, it belongs to the appetitive power, as stated above.

Reply to Objection 3. “Assentire” [to assent] is, to speak, “ad aliud sentire” [to feel towards something]; and thus it implies a certain distance from that to which assent is given. But “consentire” [to consent] is “to feel with,” and this implies a certain union to the object of consent. Hence the will, to which it belongs to tend to the thing itself, is more properly said to consent: whereas the intellect, whose act does not consist in a movement towards the thing, but rather the reverse, as we have stated in the Ia, q. 16, a. 1; Ia, q. 27, a. 4; Ia, q. 59, a. 2, is more properly said to assent: although one word is wont to be used for the other*. We may also say that the intellect assents, in so far as it is moved by the will.

Whether consent is to be found in irrational animals?

Ia IIae q. 15 a. 2

Objection 1. It would seem that consent is to be found in irrational animals. For consent implies a determination of the appetite to one thing. But the appetite of irrational animals is determinate to one thing. Therefore consent is to be found in irrational animals.

Objection 2. Further, if you remove what is first, you remove what follows. But consent precedes the accomplished act. If therefore there were no consent in irrational animals, there would be no act accomplished; which is clearly false.

Objection 3. Further, men are sometimes said to

consent to do something, through some passion; desire, for instance, or anger. But irrational animals act through passion. Therefore they consent.

On the contrary, Damascene says (De Fide Orth. ii, 22) that “after judging, man approves and embraces the judgment of his counselling, and this is called the sentence,” i.e. consent. But counsel is not in irrational animals. Therefore neither is consent.

I answer that, Consent, properly speaking, is not in irrational animals. The reason of this is that consent implies an application of the appetitive movement

* In Latin rather than in English.

to something as to be done. Now to apply the appetitive movement to the doing of something, belongs to the subject in whose power it is to move the appetite: thus to touch a stone is an action suitable to a stick, but to apply the stick so that it touch the stone, belongs to one who has the power of moving the stick. But irrational animals have not the command of the appetitive movement; for this is in them through natural instinct. Hence in the irrational animal, there is indeed the movement of the appetite, but it does not apply that movement to some particular thing. And hence it is that the irrational animal is not properly said to consent: this is proper to the rational nature, which has the command of the appetitive movement, and is able to apply or not to apply it to this or that thing.

Reply to Objection 1. In irrational animals the determination of the appetite to a particular thing is merely

passive: whereas consent implies a determination of the appetite, which is active rather than merely passive.

Reply to Objection 2. If the first be removed, then what follows is removed, provided that, properly speaking, it follow from that only. But if something can follow from several things, it is not removed by the fact that one of them is removed; thus if hardening is the effect of heat and of cold (since bricks are hardened by the fire, and frozen water is hardened by the cold), then by removing heat it does not follow that there is no hardening. Now the accomplishment of an act follows not only from consent, but also from the impulse of the appetite, such as is found in irrational animals.

Reply to Objection 3. The man who acts through passion is able not to follow the passion: whereas irrational animals have not that power. Hence the comparison fails.

Whether consent is directed to the end or to the means?

Ia IIae q. 15 a. 3

Objection 1. It would seem that consent is directed to the end. Because that on account of which a thing is such is still more such. But it is on account of the end that we consent to the means. Therefore, still more do we consent to the end.

Objection 2. Further, the act of the intemperate man is his end, just as the act of the virtuous man is his end. But the intemperate man consents to his own act. Therefore consent can be directed to the end.

Objection 3. Further, desire of the means is choice, as stated above (q. 13, a. 1). If therefore consent were only directed to the means it would nowise differ from choice. And this is proved to be false by the authority of Damascene who says (De Fide Orth. ii, 22) that “after the approval” which he calls “the sentence,” “comes the choice.” Therefore consent is not only directed to the means.

On the contrary, Damascene says (De Fide Orth. ii, 22) that the “sentence,” i.e. the consent, takes place “when a man approves and embraces the judgment of his counsel.” But counsel is only about the means. Therefore the same applies to consent.

I answer that, Consent is the application of the appetitive movement to something that is already in the power of him who causes the application. Now the order of action is this: First there is the apprehension of the end; then the desire of the end; then the counsel about the means; then the desire of the means. Now the appetite tends to the last end naturally: wherefore the application of the appetitive movement to the apprehended end has not the nature of consent, but of simple volition. But as to those things which come under consideration after the last end, in so far as they are directed to the end, they come under counsel: and so counsel can be applied to them, in so far as the appeti-

tive movement is applied to the judgment resulting from counsel. But the appetitive movement to the end is not applied to counsel: rather is counsel applied to it, because counsel presupposes the desire of the end. On the other hand, the desire of the means presupposes the decision of counsel. And therefore the application of the appetitive movement to counsel’s decision is consent, properly speaking. Consequently, since counsel is only about the means, consent, properly speaking, is of nothing else but the means.

Reply to Objection 1. Just as the knowledge of conclusions through the principles is science, whereas the knowledge of the principles is not science, but something higher, namely, understanding; so do we consent to the means on account of the end, in respect of which our act is not consent but something greater, namely, volition.

Reply to Objection 2. Delight in his act, rather than the act itself, is the end of the intemperate man, and for sake of this delight he consents to that act.

Reply to Objection 3. Choice includes something that consent has not, namely, a certain relation to something to which something else is preferred: and therefore after consent there still remains a choice. For it may happen that by aid of counsel several means have been found conducive to the end, and through each of these meeting with approval, consent has been given to each: but after approving of many, we have given our preference to one by choosing it. But if only one meets with approval, then consent and choice do not differ in reality, but only in our way of looking at them; so that we call it consent, according as we approve of doing that thing; but choice according as we prefer it to those that do not meet with our approval.

Objection 1. It would seem that consent to the act does not always belong to the higher reason. For “delight follows action, and perfects it, just as beauty perfects youth”* (Ethic. x, 4). But consent to delight belongs to the lower reason, as Augustine says (De Trin. xii, 12). Therefore consent to the act does not belong only to the higher reason.

Objection 2. Further, an act to which we consent is said to be voluntary. But it belongs to many powers to produce voluntary acts. Therefore the higher reason is not alone in consenting to the act.

Objection 3. Further, “the higher reason is that which is intent on the contemplation and consultation of things eternal,” as Augustine says (De Trin. xii, 7). But man often consents to an act not for eternal, but for temporal reasons, or even on account of some passion of the soul. Therefore consent to an act does not belong to the higher reason alone.

On the contrary, Augustine says (De Trin. xii, 12): “It is impossible for man to make up his mind to commit a sin, unless that mental faculty which has the sovereign power of urging his members to, or restraining them from, act, yield to the evil deed and become its slave.”

I answer that, The final decision belongs to him who holds the highest place, and to whom it belongs to judge of the others; for as long as judgment about some matter remains to be pronounced, the final decision has not been given. Now it is evident that it belongs to the higher reason to judge of all: since it is by the reason that we judge of sensible things; and of things pertaining to human principles we judge according to Divine

principles, which is the function of the higher reason. Wherefore as long as a man is uncertain whether he resists or not, according to Divine principles, no judgment of the reason can be considered in the light of a final decision. Now the final decision of what is to be done is consent to the act. Therefore consent to the act belongs to the higher reason; but in that sense in which the reason includes the will, as stated above (a. 1, ad 1).

Reply to Objection 1. Consent to delight in the work done belongs to the higher reason, as also does consent to the work; but consent to delight in thought belongs to the lower reason, just as to the lower reason it belongs to think. Nevertheless the higher reason exercises judgment on the fact of thinking or not thinking, considered as an action; and in like manner on the delight that results. But in so far as the act of thinking is considered as ordained to a further act, it belongs to the lower reason. For that which is ordained to something else, belongs to a lower art or power than does the end to which it is ordained: hence the art which is concerned with the end is called the master or principal art.

Reply to Objection 2. Since actions are called voluntary from the fact that we consent to them, it does not follow that consent is an act of each power, but of the will which is in the reason, as stated above (a. 1, ad 1), and from which the voluntary act is named.

Reply to Objection 3. The higher reason is said to consent not only because it always moves to act, according to the eternal reasons; but also because it fails to dissent according to those same reasons.

* *oion tois akmaiois he hora*;—as youthful vigor perfects a man in his prime

Objection 1. It would seem that consent belongs only to the apprehensive part of the soul. For Augustine (De Trin. xii, 12) ascribes consent to the higher reason. But the reason is an apprehensive power. Therefore consent belongs to an apprehensive power.

Objection 2. Further, consent is “co-sense.” But sense is an apprehensive power. Therefore consent is the act of an apprehensive power.

Objection 3. Further, just as assent is an application of the intellect to something, so is consent. But assent belongs to the intellect, which is an apprehensive power. Therefore consent also belongs to an apprehensive power.

On the contrary, Damascene says (De Fide Orth. ii, 22) that “if a man judge without affection for that of which he judges, there is no sentence,” i.e. consent. But affection belongs to the appetitive power. Therefore consent does also.

I answer that, Consent implies application of sense to something. Now it is proper to sense to take cognizance of things present; for the imagination apprehends the similitude of corporeal things, even in the absence of the things of which they bear the likeness; while the intellect apprehends universal ideas, which it can apprehend indifferently, whether the singulars be present or absent. And since the act of an appetitive power is a kind of inclination to the thing itself, the application of the appetitive power to the thing, in so far

as it cleaves to it, gets by a kind of similitude, the name of sense, since, as it were, it acquires direct knowledge of the thing to which it cleaves, in so far as it takes complacency in it. Hence it is written (Wis. 1:1): “Think of [Sentite] the Lord in goodness.” And on these grounds consent is an act of the appetitive power.

Reply to Objection 1. As stated in De Anima iii, 9, “the will is in the reason.” Hence, when Augustine ascribes consent to the reason, he takes reason as including the will.

Reply to Objection 2. Sense, properly speaking, belongs to the apprehensive faculty; but by way of similitude, in so far as it implies seeking acquaintance, it belongs to the appetitive power, as stated above.

Reply to Objection 3. “Assentire” [to assent] is, to speak, “ad aliud sentire” [to feel towards something]; and thus it implies a certain distance from that to which assent is given. But “consentire” [to consent] is “to feel with,” and this implies a certain union to the object of consent. Hence the will, to which it belongs to tend to the thing itself, is more properly said to consent: whereas the intellect, whose act does not consist in a movement towards the thing, but rather the reverse, as we have stated in the Ia, q. 16, a. 1; Ia, q. 27, a. 4; Ia, q. 59, a. 2, is more properly said to assent: although one word is wont to be used for the other*. We may also say that the intellect assents, in so far as it is moved by the will.

* In Latin rather than in English.

Objection 1. It would seem that consent is to be found in irrational animals. For consent implies a determination of the appetite to one thing. But the appetite of irrational animals is determinate to one thing. Therefore consent is to be found in irrational animals.

Objection 2. Further, if you remove what is first, you remove what follows. But consent precedes the accomplished act. If therefore there were no consent in irrational animals, there would be no act accomplished; which is clearly false.

Objection 3. Further, men are sometimes said to consent to do something, through some passion; desire, for instance, or anger. But irrational animals act through passion. Therefore they consent.

On the contrary, Damascene says (*De Fide Orth.* ii, 22) that “after judging, man approves and embraces the judgment of his counselling, and this is called the sentence,” i.e. consent. But counsel is not in irrational animals. Therefore neither is consent.

I answer that, Consent, properly speaking, is not in irrational animals. The reason of this is that consent implies an application of the appetitive movement to something as to be done. Now to apply the appetitive movement to the doing of something, belongs to the subject in whose power it is to move the appetite: thus to touch a stone is an action suitable to a stick, but to apply the stick so that it touch the stone, belongs to one who has the power of moving the stick. But irrational

animals have not the command of the appetitive movement; for this is in them through natural instinct. Hence in the irrational animal, there is indeed the movement of the appetite, but it does not apply that movement to some particular thing. And hence it is that the irrational animal is not properly said to consent: this is proper to the rational nature, which has the command of the appetitive movement, and is able to apply or not to apply it to this or that thing.

Reply to Objection 1. In irrational animals the determination of the appetite to a particular thing is merely passive: whereas consent implies a determination of the appetite, which is active rather than merely passive.

Reply to Objection 2. If the first be removed, then what follows is removed, provided that, properly speaking, it follow from that only. But if something can follow from several things, it is not removed by the fact that one of them is removed; thus if hardening is the effect of heat and of cold (since bricks are hardened by the fire, and frozen water is hardened by the cold), then by removing heat it does not follow that there is no hardening. Now the accomplishment of an act follows not only from consent, but also from the impulse of the appetite, such as is found in irrational animals.

Reply to Objection 3. The man who acts through passion is able not to follow the passion: whereas irrational animals have not that power. Hence the comparison fails.

Objection 1. It would seem that consent is directed to the end. Because that on account of which a thing is such is still more such. But it is on account of the end that we consent to the means. Therefore, still more do we consent to the end.

Objection 2. Further, the act of the intemperate man is his end, just as the act of the virtuous man is his end. But the intemperate man consents to his own act. Therefore consent can be directed to the end.

Objection 3. Further, desire of the means is choice, as stated above (q. 13, a. 1). If therefore consent were only directed to the means it would nowise differ from choice. And this is proved to be false by the authority of Damascene who says (De Fide Orth. ii, 22) that “after the approval” which he calls “the sentence,” “comes the choice.” Therefore consent is not only directed to the means.

On the contrary, Damascene says (De Fide Orth. ii, 22) that the “sentence,” i.e. the consent, takes place “when a man approves and embraces the judgment of his counsel.” But counsel is only about the means. Therefore the same applies to consent.

I answer that, Consent is the application of the appetitive movement to something that is already in the power of him who causes the application. Now the order of action is this: First there is the apprehension of the end; then the desire of the end; then the counsel about the means; then the desire of the means. Now the appetite tends to the last end naturally: wherefore the application of the appetitive movement to the apprehended end has not the nature of consent, but of simple volition. But as to those things which come under consideration after the last end, in so far as they are directed to the end, they come under counsel: and so counsel can be applied to them, in so far as the appeti-

tive movement is applied to the judgment resulting from counsel. But the appetitive movement to the end is not applied to counsel: rather is counsel applied to it, because counsel presupposes the desire of the end. On the other hand, the desire of the means presupposes the decision of counsel. And therefore the application of the appetitive movement to counsel’s decision is consent, properly speaking. Consequently, since counsel is only about the means, consent, properly speaking, is of nothing else but the means.

Reply to Objection 1. Just as the knowledge of conclusions through the principles is science, whereas the knowledge of the principles is not science, but something higher, namely, understanding; so do we consent to the means on account of the end, in respect of which our act is not consent but something greater, namely, volition.

Reply to Objection 2. Delight in his act, rather than the act itself, is the end of the intemperate man, and for sake of this delight he consents to that act.

Reply to Objection 3. Choice includes something that consent has not, namely, a certain relation to something to which something else is preferred: and therefore after consent there still remains a choice. For it may happen that by aid of counsel several means have been found conducive to the end, and through each of these meeting with approval, consent has been given to each: but after approving of many, we have given our preference to one by choosing it. But if only one meets with approval, then consent and choice do not differ in reality, but only in our way of looking at them; so that we call it consent, according as we approve of doing that thing; but choice according as we prefer it to those that do not meet with our approval.

Objection 1. It would seem that consent to the act does not always belong to the higher reason. For “delight follows action, and perfects it, just as beauty perfects youth”* (Ethic. x, 4). But consent to delight belongs to the lower reason, as Augustine says (De Trin. xii, 12). Therefore consent to the act does not belong only to the higher reason.

Objection 2. Further, an act to which we consent is said to be voluntary. But it belongs to many powers to produce voluntary acts. Therefore the higher reason is not alone in consenting to the act.

Objection 3. Further, “the higher reason is that which is intent on the contemplation and consultation of things eternal,” as Augustine says (De Trin. xii, 7). But man often consents to an act not for eternal, but for temporal reasons, or even on account of some passion of the soul. Therefore consent to an act does not belong to the higher reason alone.

On the contrary, Augustine says (De Trin. xii, 12): “It is impossible for man to make up his mind to commit a sin, unless that mental faculty which has the sovereign power of urging his members to, or restraining them from, act, yield to the evil deed and become its slave.”

I answer that, The final decision belongs to him who holds the highest place, and to whom it belongs to judge of the others; for as long as judgment about some matter remains to be pronounced, the final decision has not been given. Now it is evident that it belongs to the higher reason to judge of all: since it is by the reason that we judge of sensible things; and of things pertaining to human principles we judge according to Divine

principles, which is the function of the higher reason. Wherefore as long as a man is uncertain whether he resists or not, according to Divine principles, no judgment of the reason can be considered in the light of a final decision. Now the final decision of what is to be done is consent to the act. Therefore consent to the act belongs to the higher reason; but in that sense in which the reason includes the will, as stated above (a. 1, ad 1).

Reply to Objection 1. Consent to delight in the work done belongs to the higher reason, as also does consent to the work; but consent to delight in thought belongs to the lower reason, just as to the lower reason it belongs to think. Nevertheless the higher reason exercises judgment on the fact of thinking or not thinking, considered as an action; and in like manner on the delight that results. But in so far as the act of thinking is considered as ordained to a further act, it belongs to the lower reason. For that which is ordained to something else, belongs to a lower art or power than does the end to which it is ordained: hence the art which is concerned with the end is called the master or principal art.

Reply to Objection 2. Since actions are called voluntary from the fact that we consent to them, it does not follow that consent is an act of each power, but of the will which is in the reason, as stated above (a. 1, ad 1), and from which the voluntary act is named.

Reply to Objection 3. The higher reason is said to consent not only because it always moves to act, according to the eternal reasons; but also because it fails to dissent according to those same reasons.

* *oion tois akmaiois he hora*;—as youthful vigor perfects a man in his prime

FIRST PART OF THE SECOND PART, QUESTION 16

Of Use, Which Is an Act of the Will in Regard to the Means (In Four Articles)

We must now consider use; concerning which there are four points of inquiry:

- (1) Whether use is an act of the will?
- (2) Whether it is to be found in irrational animals?
- (3) Whether it regards the means only, or the end also?
- (4) Of the relation of use to choice.

Whether use is an act of the will?

Ia IIae q. 16 a. 1

Objection 1. It would seem that use is not an act of the will. For Augustine says (De Doctr. Christ. i, 4) that “to use is to refer that which is the object of use to the obtaining of something else.” But “to refer” something to another is an act of the reason to which it belongs to compare and to direct. Therefore use is an act of the reason and not of the will.

Objection 2. Further, Damascene says (De Fide Orth. ii, 22) that man “goes forward to the operation, and this is called impulse; then he makes use (of the powers) and this is called use.” But operation belongs to the executive power; and the act of the will does not follow the act of the executive power, on the contrary execution comes last. Therefore use is not an act of the will.

Objection 3. Further, Augustine says (QQ. 83, qu. 30): “All things that were made were made for man’s use, because reason with which man is endowed uses all things by its judgment of them.” But judgment of things created by God belongs to the speculative reason; which seems to be altogether distinct from the will, which is the principle of human acts. Therefore use is not an act of the will.

On the contrary, Augustine says (De Trin. x, 11): “To use is to apply to something to purpose of the will.”

I answer that, The use of a thing implies the application of that thing to an operation: hence the operation to which we apply a thing is called its use; thus the use of a horse is to ride, and the use of a stick is to strike. Now we apply to an operation not only the interior prin-

ciples of action, viz. the powers of the soul or the members of the body; as the intellect, to understand; and the eye, to see; but also external things, as a stick, to strike. But it is evident that we do not apply external things to an operation save through the interior principles which are either the powers of the soul, or the habits of those powers, or the organs which are parts of the body. Now it has been shown above (q. 9, a. 1) that it is the will which moves the soul’s powers to their acts, and this is to apply them to operation. Hence it is evident that first and principally use belongs to the will as first mover; to the reason, as directing; and to the other powers as executing the operation, which powers are compared to the will which applies them to act, as the instruments are compared to the principal agent. Now action is properly ascribed, not to the instrument, but to the principal agent, as building is ascribed to the builder, not to his tools. Hence it is evident that use is, properly speaking, an act of the will.

Reply to Objection 1. Reason does indeed refer one thing to another; but the will tends to that which is referred by the reason to something else. And in this sense to use is to refer one thing to another.

Reply to Objection 2. Damascene is speaking of use in so far as it belongs to the executive powers.

Reply to Objection 3. Even the speculative reason is applied by the will to the act of understanding or judging. Consequently the speculative reason is said to use, in so far as it is moved by the will, in the same way as the other powers.

Whether use is to be found in irrational animals?

Ia IIae q. 16 a. 2

Objection 1. It would seem that use is to be found in irrational animals. For it is better to enjoy than to use, because, as Augustine says (De Trin. x, 10): “We use things by referring them to something else which we are to enjoy.” But enjoyment is to be found in irrational animals, as stated above (q. 11, a. 2). Much more, therefore, is it possible for them to use.

Objection 2. Further, to apply the members to action is to use them. But irrational animals apply their members to action; for instance, their feet, to walk; their

horns, to strike. Therefore it is possible for irrational animals to use.

On the contrary, Augustine says (QQ. 83, qu. 30): “None but a rational animal can make use of a thing.”

I answer that, as stated above (a. 1), to use is to apply an active principle to action: thus to consent is to apply the appetitive movement to the desire of something, as stated above (q. 15, Aa. 1,2,3). Now he alone who has the disposal of a thing, can apply it to something else; and this belongs to him alone who knows how to

refer it to something else, which is an act of the reason. And therefore none but a rational animal consents and uses.

Reply to Objection 1. To enjoy implies the absolute movement of the appetite to the appetible: whereas to use implies a movement of the appetite to something as directed to something else. If therefore we compare use and enjoyment in respect of their objects, enjoyment is better than use; because that which is appetible absolutely is better than that which is appetible only as directed to something else. But if we compare them in

respect of the apprehensive power that precedes them, greater excellence is required on the part of use: because to direct one thing to another is an act of reason; whereas to apprehend something absolutely is within the competency even of sense.

Reply to Objection 2. Animals by means of their members do something from natural instinct; not through knowing the relation of their members to these operations. Wherefore, properly speaking, they do not apply their members to action, nor do they use them.

Whether use regards also the last end?

Ia IIae q. 16 a. 3

Objection 1. It would seem that use can regard also the last end. For Augustine says (De Trin. x, 11): "Whoever enjoys, uses." But man enjoys the last end. Therefore he uses the last end.

Objection 2. Further, "to use is to apply something to the purpose of the will" (De Trin. x, 11). But the last end, more than anything else, is the object of the will's application. Therefore it can be the object of use.

Objection 3. Further, Hilary says (De Trin. ii) that "Eternity is in the Father, Likeness in the Image," i.e. in the Son, "Use in the Gift," i.e. in the Holy Ghost. But the Holy Ghost, since He is God, is the last end. Therefore the last end can be the object of use.

On the contrary, Augustine says (QQ. 83, qu. 30): "No one rightly uses God, but one enjoys Him." But God alone is the last end. Therefore we cannot use the last end.

I answer that, Use, as stated above (a. 1), implies the application of one thing to another. Now that which is applied to another is regarded in the light of means to an end; and consequently use always regards the means. For this reason things that are adapted to a certain end are said to be "useful"; in fact their very usefulness is sometimes called use.

It must, however, be observed that the last end may be taken in two ways: first, simply; secondly, in respect of an individual. For since the end, as stated above (q. 1, a. 8; q. 2, a. 7), signifies sometimes the thing itself, and

sometimes the attainment or possession of that thing (thus the miser's end is either money or the possession of it); it is evident that, simply speaking, the last end is the thing itself; for the possession of money is good only inasmuch as there is some good in money. But in regard to the individual, the obtaining of money is the last end; for the miser would not seek for money, save that he might have it. Therefore, simply and properly speaking, a man enjoys money, because he places his last end therein; but in so far as he seeks to possess it, he is said to use it.

Reply to Objection 1. Augustine is speaking of use in general, in so far as it implies the relation of an end to the enjoyment which a man seeks in that end.

Reply to Objection 2. The end is applied to the purpose of the will, that the will may find rest in it. Consequently this rest in the end, which is the enjoyment thereof, is in this sense called use of the end. But the means are applied to the will's purpose, not only in being used as means, but as ordained to something else in which the will finds rest.

Reply to Objection 3. The words of Hilary refer to use as applicable to rest in the last end; just as, speaking in a general sense, one may be said to use the end for the purpose of attaining it, as stated above. Hence Augustine says (De Trin. vi, 10) that "this love, delight, felicity, or happiness, is called use by him."

Whether use precedes choice?

Ia IIae q. 16 a. 4

Objection 1. It would seem that use precedes choice. For nothing follows after choice, except execution. But use, since it belongs to the will, precedes execution. Therefore it precedes choice also.

Objection 2. Further, the absolute precedes the relative. Therefore the less relative precedes the more relative. But choice implies two relations: one, of the thing chosen, in relation to the end; the other, of the thing chosen, in respect of that to which it is preferred; whereas use implies relation to the end only. Therefore use precedes choice.

Objection 3. Further, the will uses the other powers

in so far as it removes them. But the will moves itself, too, as stated above (q. 9, a. 3). Therefore it uses itself, by applying itself to act. But it does this when it consents. Therefore there is use in consent. But consent precedes choice as stated above (q. 15, a. 3, ad 3). Therefore use does also.

On the contrary, Damascene says (De Fide Orth. ii, 22) that "the will after choosing has an impulse to the operation, and afterwards it uses (the powers)." Therefore use follows choice.

I answer that, The will has a twofold relation to the thing willed. One, according as the thing willed is, in a

way, in the willing subject, by a kind of proportion or order to the thing willed. Wherefore those things that are naturally proportionate to a certain end, are said to desire that end naturally. Yet to have an end thus is to have it imperfectly. Now every imperfect thing tends to perfection. And therefore both the natural and the voluntary appetite tend to have the end in reality; and this is to have it perfectly. This is the second relation of the will to the thing willed.

Now the thing willed is not only the end, but also the means. And the last act that belongs to the first relation of the will to the means, is choice; for there the will becomes fully proportionate, by willing the means fully. Use, on the other hand, belongs to the second relation of the will, in respect of which it tends to the realization of the thing willed. Wherefore it is evident that use follows choice; provided that by use we mean the will's use of the executive power in moving it. But since the will, in a way, moves the reason also, and uses it, we may take the use of the means, as consisting in the con-

sideration of the reason, whereby it refers the means to the end. In this sense use precedes choice.

Reply to Objection 1. The motion of the will to the execution of the work, precedes execution, but follows choice. And so, since use belongs to that very motion of the will, it stands between choice and execution.

Reply to Objection 2. What is essentially relative is after the absolute; but the thing to which relation is referred need not come after. Indeed, the more a cause precedes, the more numerous the effects to which it has relation.

Reply to Objection 3. Choice precedes use, if they be referred to the same object. But nothing hinders the use of one thing preceding the choice of another. And since the acts of the will react on one another, in each act of the will we can find both consent and choice and use; so that we may say that the will consents to choose, and consents to consent, and uses itself in consenting and choosing. And such acts as are ordained to that which precedes, precede also.

Objection 1. It would seem that use is not an act of the will. For Augustine says (*De Doctr. Christ.* i, 4) that “to use is to refer that which is the object of use to the obtaining of something else.” But “to refer” something to another is an act of the reason to which it belongs to compare and to direct. Therefore use is an act of the reason and not of the will.

Objection 2. Further, Damascene says (*De Fide Orth.* ii, 22) that man “goes forward to the operation, and this is called impulse; then he makes use (of the powers) and this is called use.” But operation belongs to the executive power; and the act of the will does not follow the act of the executive power, on the contrary execution comes last. Therefore use is not an act of the will.

Objection 3. Further, Augustine says (*QQ.* 83, qu. 30): “All things that were made were made for man’s use, because reason with which man is endowed uses all things by its judgment of them.” But judgment of things created by God belongs to the speculative reason; which seems to be altogether distinct from the will, which is the principle of human acts. Therefore use is not an act of the will.

On the contrary, Augustine says (*De Trin.* x, 11): “To use is to apply to something to purpose of the will.”

I answer that, The use of a thing implies the application of that thing to an operation: hence the operation to which we apply a thing is called its use; thus the use of a horse is to ride, and the use of a stick is to strike. Now we apply to an operation not only the interior prin-

ciples of action, viz. the powers of the soul or the members of the body; as the intellect, to understand; and the eye, to see; but also external things, as a stick, to strike. But it is evident that we do not apply external things to an operation save through the interior principles which are either the powers of the soul, or the habits of those powers, or the organs which are parts of the body. Now it has been shown above (q. 9, a. 1) that it is the will which moves the soul’s powers to their acts, and this is to apply them to operation. Hence it is evident that first and principally use belongs to the will as first mover; to the reason, as directing; and to the other powers as executing the operation, which powers are compared to the will which applies them to act, as the instruments are compared to the principal agent. Now action is properly ascribed, not to the instrument, but to the principal agent, as building is ascribed to the builder, not to his tools. Hence it is evident that use is, properly speaking, an act of the will.

Reply to Objection 1. Reason does indeed refer one thing to another; but the will tends to that which is referred by the reason to something else. And in this sense to use is to refer one thing to another.

Reply to Objection 2. Damascene is speaking of use in so far as it belongs to the executive powers.

Reply to Objection 3. Even the speculative reason is applied by the will to the act of understanding or judging. Consequently the speculative reason is said to use, in so far as it is moved by the will, in the same way as the other powers.

Objection 1. It would seem that use is to be found in irrational animals. For it is better to enjoy than to use, because, as Augustine says (De Trin. x, 10): “We use things by referring them to something else which we are to enjoy.” But enjoyment is to be found in irrational animals, as stated above (q. 11, a. 2). Much more, therefore, is it possible for them to use.

Objection 2. Further, to apply the members to action is to use them. But irrational animals apply their members to action; for instance, their feet, to walk; their horns, to strike. Therefore it is possible for irrational animals to use.

On the contrary, Augustine says (QQ. 83, qu. 30): “None but a rational animal can make use of a thing.”

I answer that, as stated above (a. 1), to use is to apply an active principle to action: thus to consent is to apply the appetitive movement to the desire of something, as stated above (q. 15, Aa. 1,2,3). Now he alone who has the disposal of a thing, can apply it to something else; and this belongs to him alone who knows how to refer it to something else, which is an act of the reason.

And therefore none but a rational animal consents and uses.

Reply to Objection 1. To enjoy implies the absolute movement of the appetite to the appetible: whereas to use implies a movement of the appetite to something as directed to something else. If therefore we compare use and enjoyment in respect of their objects, enjoyment is better than use; because that which is appetible absolutely is better than that which is appetible only as directed to something else. But if we compare them in respect of the apprehensive power that precedes them, greater excellence is required on the part of use: because to direct one thing to another is an act of reason; whereas to apprehend something absolutely is within the competency even of sense.

Reply to Objection 2. Animals by means of their members do something from natural instinct; not through knowing the relation of their members to these operations. Wherefore, properly speaking, they do not apply their members to action, nor do they use them.

Objection 1. It would seem that use can regard also the last end. For Augustine says (De Trin. x, 11): “Whoever enjoys, uses.” But man enjoys the last end. Therefore he uses the last end.

Objection 2. Further, “to use is to apply something to the purpose of the will” (De Trin. x, 11). But the last end, more than anything else, is the object of the will’s application. Therefore it can be the object of use.

Objection 3. Further, Hilary says (De Trin. ii) that “Eternity is in the Father, Likeness in the Image,” i.e. in the Son, “Use in the Gift,” i.e. in the Holy Ghost. But the Holy Ghost, since He is God, is the last end. Therefore the last end can be the object of use.

On the contrary, Augustine says (QQ. 83, qu. 30): “No one rightly uses God, but one enjoys Him.” But God alone is the last end. Therefore we cannot use the last end.

I answer that, Use, as stated above (a. 1), implies the application of one thing to another. Now that which is applied to another is regarded in the light of means to an end; and consequently use always regards the means. For this reason things that are adapted to a certain end are said to be “useful”; in fact their very usefulness is sometimes called use.

It must, however, be observed that the last end may be taken in two ways: first, simply; secondly, in respect of an individual. For since the end, as stated above (q. 1, a. 8; q. 2, a. 7), signifies sometimes the thing itself, and

sometimes the attainment or possession of that thing (thus the miser’s end is either money or the possession of it); it is evident that, simply speaking, the last end is the thing itself; for the possession of money is good only inasmuch as there is some good in money. But in regard to the individual, the obtaining of money is the last end; for the miser would not seek for money, save that he might have it. Therefore, simply and properly speaking, a man enjoys money, because he places his last end therein; but in so far as he seeks to possess it, he is said to use it.

Reply to Objection 1. Augustine is speaking of use in general, in so far as it implies the relation of an end to the enjoyment which a man seeks in that end.

Reply to Objection 2. The end is applied to the purpose of the will, that the will may find rest in it. Consequently this rest in the end, which is the enjoyment thereof, is in this sense called use of the end. But the means are applied to the will’s purpose, not only in being used as means, but as ordained to something else in which the will finds rest.

Reply to Objection 3. The words of Hilary refer to use as applicable to rest in the last end; just as, speaking in a general sense, one may be said to use the end for the purpose of attaining it, as stated above. Hence Augustine says (De Trin. vi, 10) that “this love, delight, felicity, or happiness, is called use by him.”

Objection 1. It would seem that use precedes choice. For nothing follows after choice, except execution. But use, since it belongs to the will, precedes execution. Therefore it precedes choice also.

Objection 2. Further, the absolute precedes the relative. Therefore the less relative precedes the more relative. But choice implies two relations: one, of the thing chosen, in relation to the end; the other, of the thing chosen, in respect of that to which it is preferred; whereas use implies relation to the end only. Therefore use precedes choice.

Objection 3. Further, the will uses the other powers in so far as it removes them. But the will moves itself, too, as stated above (q. 9, a. 3). Therefore it uses itself, by applying itself to act. But it does this when it consents. Therefore there is use in consent. But consent precedes choice as stated above (q. 15, a. 3, ad 3). Therefore use does also.

On the contrary, Damascene says (De Fide Orth. ii, 22) that “the will after choosing has an impulse to the operation, and afterwards it uses (the powers).” Therefore use follows choice.

I answer that, The will has a twofold relation to the thing willed. One, according as the thing willed is, in a way, in the willing subject, by a kind of proportion or order to the thing willed. Wherefore those things that are naturally proportionate to a certain end, are said to desire that end naturally. Yet to have an end thus is to have it imperfectly. Now every imperfect thing tends to perfection. And therefore both the natural and the voluntary appetite tend to have the end in reality; and this is to have it perfectly. This is the second relation of the

will to the thing willed.

Now the thing willed is not only the end, but also the means. And the last act that belongs to the first relation of the will to the means, is choice; for there the will becomes fully proportionate, by willing the means fully. Use, on the other hand, belongs to the second relation of the will, in respect of which it tends to the realization of the thing willed. Wherefore it is evident that use follows choice; provided that by use we mean the will’s use of the executive power in moving it. But since the will, in a way, moves the reason also, and uses it, we may take the use of the means, as consisting in the consideration of the reason, whereby it refers the means to the end. In this sense use precedes choice.

Reply to Objection 1. The motion of the will to the execution of the work, precedes execution, but follows choice. And so, since use belongs to that very motion of the will, it stands between choice and execution.

Reply to Objection 2. What is essentially relative is after the absolute; but the thing to which relation is referred need not come after. Indeed, the more a cause precedes, the more numerous the effects to which it has relation.

Reply to Objection 3. Choice precedes use, if they be referred to the same object. But nothing hinders the use of one thing preceding the choice of another. And since the acts of the will react on one another, in each act of the will we can find both consent and choice and use; so that we may say that the will consents to choose, and consents to consent, and uses itself in consenting and choosing. And such acts as are ordained to that which precedes, precede also.

FIRST PART OF THE SECOND PART, QUESTION 17

Of the Acts Commanded by the Will (In Nine Articles)

We must now consider the acts commanded by the will; under which head there are nine points of inquiry:

- (1) Whether command is an act of the will or of the reason?
- (2) Whether command belongs to irrational animals?
- (3) Of the order between command and use
- (4) Whether command and the commanded act are one act or distinct?
- (5) Whether the act of the will is commanded?
- (6) Whether the act of the reason is commanded?
- (7) Whether the act of the sensitive appetite is commanded?
- (8) Whether the act of the vegetal soul is commanded?
- (9) Whether the acts of the external members are commanded?

Whether command is an act of the reason or of the will?

Ia IIae q. 17 a. 1

Objection 1. It would seem that command is not an act of the reason but of the will. For command is a kind of motion; because Avicenna says that there are four ways of moving, “by perfecting, by disposing, by commanding, and by counselling.” But it belongs to the will to move all the other powers of the soul, as stated above (q. 9, a. 1). Therefore command is an act of the will.

Objection 2. Further, just as to be commanded belongs to that which is subject, so, seemingly, to command belongs to that which is most free. But the root of liberty is especially in the will. Therefore to command belongs to the will.

Objection 3. Further, command is followed at once by act. But the act of the reason is not followed at once by act: for he who judges that a thing should be done, does not do it at once. Therefore command is not an act of the reason, but of the will.

On the contrary, Gregory of Nyssa* and the Philosopher (Ethic. i, 13) say that “the appetite obeys reason.” Therefore command is an act of the reason.

I answer that, Command is an act of the reason presupposing, however, an act of the will. In proof of this, we must take note that, since the acts of the reason and of the will can be brought to bear on one another, in so far as the reason reasons about willing, and the will wills to reason, the result is that the act of the reason precedes the act of the will, and conversely. And since the power of the preceding act continues in the act that follows, it happens sometimes that there is an act of the will in so far as it retains in itself something of an act of the reason, as we have stated in reference to use and choice; and conversely, that there is an act of the reason in so far as it retains in itself something of an act of the will.

Now, command is essentially indeed an act of the reason: for the commander orders the one commanded to do something, by way of intimation or declaration; and to order thus by intimating or declaring is an act of the reason. Now the reason can intimate or declare something in two ways. First, absolutely: and this intimation is expressed by a verb in the indicative mood, as when one person says to another: “This is what you should do.” Sometimes, however, the reason intimates something to a man by moving him thereto; and this intimation is expressed by a verb in the imperative mood; as when it is said to someone: “Do this.” Now the first mover, among the powers of the soul, to the doing of an act is the will, as stated above (q. 9, a. 1). Since therefore the second mover does not move, save in virtue of the first mover, it follows that the very fact that the reason moves by commanding, is due to the power of the will. Consequently it follows that command is an act of the reason, presupposing an act of the will, in virtue of which the reason, by its command, moves (the power) to the execution of the act.

Reply to Objection 1. To command is to move, not anyhow, but by intimating and declaring to another; and this is an act of the reason.

Reply to Objection 2. The root of liberty is the will as the subject thereof; but it is the reason as its cause. For the will can tend freely towards various objects, precisely because the reason can have various perceptions of good. Hence philosophers define the free-will as being “a free judgment arising from reason,” implying that reason is the root of liberty.

Reply to Objection 3. This argument proves that command is an act of reason not absolutely, but with a kind of motion as stated above.

* Nemesius, De Nat. Hom. xvi.

Objection 1. It would seem that command belongs to irrational animals. Because, according to Avicenna, “the power that commands movement is the appetite; and the power that executes movement is in the muscles and nerves.” But both powers are in irrational animals. Therefore command is to be found in irrational animals.

Objection 2. Further, the condition of a slave is that of one who receives commands. But the body is compared to the soul as a slave to his master, as the Philosopher says (Polit. i, 2). Therefore the body is commanded by the soul, even in irrational animals, since they are composed of soul and body.

Objection 3. Further, by commanding, man has an impulse towards an action. But impulse to action is to be found in irrational animals, as Damascene says (De Fide Orth. ii, 22). Therefore command is to be found in irrational animals.

On the contrary, Command is an act of reason, as stated above (a. 1). But in irrational animals there is no reason. Neither, therefore, is there command.

I answer that, To command is nothing else than to direct someone to do something, by a certain motion of intimation. Now to direct is the proper act of reason. Wherefore it is impossible that irrational animals

should command in any way, since they are devoid of reason.

Reply to Objection 1. The appetitive power is said to command movement, in so far as it moves the commanding reason. But this is only in man. In irrational animals the appetitive power is not, properly speaking, a commanding faculty, unless command be taken loosely for motion.

Reply to Objection 2. The body of the irrational animal is competent to obey; but its soul is not competent to command, because it is not competent to direct. Consequently there is no ratio there of commander and commanded; but only of mover and moved.

Reply to Objection 3. Impulse to action is in irrational animals otherwise than in man. For the impulse of man to action arises from the directing reason; wherefore his impulse is one of command. On the other hand, the impulse of the irrational animal arises from natural instinct; because as soon as they apprehend the fitting or the unfitting, their appetite is moved naturally to pursue or to avoid. Wherefore they are directed by another to act; and they themselves do not direct themselves to act. Consequently in them is impulse but not command.

Objection 1. It would seem that use precedes command. For command is an act of the reason presupposing an act of the will, as stated above (a. 1). But, as we have already shown (q. 16, a. 1), use is an act of the will. Therefore use precedes command.

Objection 2. Further, command is one of those things that are ordained to the end. But use is of those things that are ordained to the end. Therefore it seems that use precedes command.

Objection 3. Further, every act of a power moved by the will is called use; because the will uses the other powers, as stated above (q. 16, a. 1). But command is an act of the reason as moved by the will, as stated above (a. 1). Therefore command is a kind of use. Now the common precedes the proper. Therefore use precedes command.

On the contrary, Damascene says (De Fide Orth. ii, 22) that impulse to action precedes use. But impulse to operation is given by command. Therefore command precedes use.

I answer that, use of that which is directed to the end, in so far as it is in the reason referring this to the end, precedes choice, as stated above (q. 16, a. 4). Wherefore still more does it precede command. On the other hand, use of that which is directed to the end, in so far as it is subject to the executive power, follows command; because use in the user is united to the act of the thing used; for one does not use a stick before doing

something with the stick. But command is not simultaneous with the act of the thing to which the command is given: for it naturally precedes its fulfilment, sometimes, indeed, by priority of time. Consequently it is evident that command precedes use.

Reply to Objection 1. Not every act of the will precedes this act of the reason which is command; but an act of the will precedes, viz. choice; and an act of the will follows, viz. use. Because after counsel’s decision, which is reason’s judgment, the will chooses; and after choice, the reason commands that power which has to do what was chosen; and then, last of all, someone’s will begins to use, by executing the command of reason; sometimes it is another’s will, when one commands another; sometimes the will of the one that commands, when he commands himself to do something.

Reply to Objection 2. Just as act ranks before power, so does the object rank before the act. Now the object of use is that which is directed to the end. Consequently, from the fact that command precedes, rather than that it follows use.

Reply to Objection 3. Just as the act of the will in using the reason for the purpose of command, precedes the command; so also we may say that this act whereby the will uses the reason, is preceded by a command of reason; since the acts of these powers react on one another.

Objection 1. It would seem that the commanded act is not one with the command itself. For the acts of different powers are themselves distinct. But the commanded act belongs to one power, and the command to another; since one is the power that commands, and the other is the power that receives the command. Therefore the commanded act is not one with the command.

Objection 2. Further, whatever things can be separate from one another, are distinct: for nothing is severed from itself. But sometimes the commanded act is separate from the command: for sometimes the command is given, and the commanded act follows not. Therefore command is a distinct act from the act commanded.

Objection 3. Further, whatever things are related to one another as precedent and consequent, are distinct. But command naturally precedes the commanded act. Therefore they are distinct.

On the contrary, The Philosopher says (Topic. iii, 2) that “where one thing is by reason of another, there is but one.” But there is no commanded act unless by reason of the command. Therefore they are one.

I answer that, Nothing prevents certain things being distinct in one respect, and one in another respect. Indeed, every multitude is one in some respect, as Dionysius says (Div. Nom. xiii). But a difference is to be observed in this, that some are simply many, and one in a particular aspect: while with others it is the reverse. Now “one” is predicated in the same way as “being.” And substance is being simply, whereas accident or being “of reason” is a being only in a certain respect. Wherefore those things that are one in substance are one simply, though many in a certain respect. Thus, in the genus substance, the whole composed of its integral or essential parts, is one simply: because the whole is being and substance simply, and the parts are being

and substances in the whole. But those things which are distinct in substance, and one according to an accident, are distinct simply, and one in a certain respect: thus many men are one people, and many stones are one heap; which is unity of composition or order. In like manner also many individuals that are one in genus or species are many simply, and one in a certain respect: since to be one in genus or species is to be one according to the consideration of the reason.

Now just as in the genus of natural things, a whole is composed of matter and form (e.g. man, who is one natural being, though he has many parts, is composed of soul and body); so, in human acts, the act of a lower power is in the position of matter in regard to the act of a higher power, in so far as the lower power acts in virtue of the higher power moving it: for thus also the act of the first mover is as the form in regard to the act of its instrument. Hence it is evident that command and the commanded act are one human act, just as a whole is one, yet in its parts, many.

Reply to Objection 1. If the distinct powers are not ordained to one another, their acts are diverse simply. But when one power is the mover of the other, then their acts are, in a way, one: since “the act of the mover and the act of the thing moved are one act” (Phys. iii, 3).

Reply to Objection 2. The fact that command and the commanded act can be separated from one another shows that they are different parts. Because the parts of a man can be separated from one another, and yet they form one whole.

Reply to Objection 3. In those things that are many in parts, but one as a whole, nothing hinders one part from preceding another. Thus the soul, in a way, precedes the body; and the heart, the other members.

Objection 1. It would seem that the act of the will is not commanded. For Augustine says (Confess. viii, 9): “The mind commands the mind to will, and yet it does not.” But to will is the act of the will. Therefore the act of the will is not commanded.

Objection 2. Further, to receive a command belongs to one who can understand the command. But the will cannot understand the command; for the will differs from the intellect, to which it belongs to understand. Therefore the act of the will is not commanded.

Objection 3. Further, if one act of the will is commanded, for the same reason all are commanded. But if all the acts of the will are commanded, we must needs proceed to infinity; because the act of the will precedes the act of reason commanding, as stated above (a. 1); for if that act of the will be also commanded, this com-

mand will be preceded by another act of the reason, and so on to infinity. But to proceed to infinity is not possible. Therefore the act of the will is not commanded.

On the contrary, Whatever is in our power, is subject to our command. But the acts of the will, most of all, are in our power; since all our acts are said to be in our power, in so far as they are voluntary. Therefore the acts of the will are commanded by us.

I answer that, As stated above (a. 1), command is nothing else than the act of the reason directing, with a certain motion, something to act. Now it is evident that the reason can direct the act of the will: for just as it can judge it to be good to will something, so it can direct by commanding man to will. From this it is evident that an act of the will can be commanded.

Reply to Objection 1. As Augustine says (Con-

fess. viii, 9) when the mind commands itself perfectly to will, then already it wills: but that sometimes it commands and wills not, is due to the fact that it commands imperfectly. Now imperfect command arises from the fact that the reason is moved by opposite motives to command or not to command: wherefore it fluctuates between the two, and fails to command perfectly.

Reply to Objection 2. Just as each of the members of the body works not for itself alone but for the whole body; thus it is for the whole body that the eye sees; so is it with the powers of the soul. For the intellect under-

stands, not for itself alone, but for all the powers; and the will wills not only for itself, but for all the powers too. Wherefore man, in so far as he is endowed with intellect and will, commands the act of the will for himself.

Reply to Objection 3. Since command is an act of reason, that act is commanded which is subject to reason. Now the first act of the will is not due to the direction of the reason but to the instigation of nature, or of a higher cause, as stated above (q. 9, a. 4). Therefore there is no need to proceed to infinity.

Whether the act of the reason is commanded?

Ia IIae q. 17 a. 6

Objection 1. It would seem that the act of the reason cannot be commanded. For it seems impossible for a thing to command itself. But it is the reason that commands, as stated above (a. 1). Therefore the act of the reason is not commanded.

Objection 2. Further, that which is essential is different from that which is by participation. But the power whose act is commanded by reason, is rational by participation, as stated in Ethic. i, 13. Therefore the act of that power, which is essentially rational, is not commanded.

Objection 3. Further, that act is commanded, which is in our power. But to know and judge the truth, which is the act of reason, is not always in our power. Therefore the act of the reason cannot be commanded.

On the contrary, That which we do of our free-will, can be done by our command. But the acts of the reason are accomplished through the free-will: for Damascene says (De Fide Orth. ii, 22) that “by his free-will man inquires, considers, judges, approves.” Therefore the acts of the reason can be commanded.

I answer that, Since the reason reacts on itself, just as it directs the acts of other powers, so can it direct its own act. Consequently its act can be commanded.

But we must take note that the act of the reason may be considered in two ways. First, as to the exercise of the act. And considered thus, the act of the reason can always be commanded: as when one is told to be attentive, and to use one’s reason. Secondly, as to the object;

in respect of which two acts of the reason have to be noticed. One is the act whereby it apprehends the truth about something. This act is not in our power: because it happens in virtue of a natural or supernatural light. Consequently in this respect, the act of the reason is not in our power, and cannot be commanded. The other act of the reason is that whereby it assents to what it apprehends. If, therefore, that which the reason apprehends is such that it naturally assents thereto, e.g. the first principles, it is not in our power to assent or dissent to the like: assent follows naturally, and consequently, properly speaking, is not subject to our command. But some things which are apprehended do not convince the intellect to such an extent as not to leave it free to assent or dissent, or at least suspend its assent or dissent, on account of some cause or other; and in such things assent or dissent is in our power, and is subject to our command.

Reply to Objection 1. Reason commands itself, just as the will moves itself, as stated above (q. 9, a. 3), that is to say, in so far as each power reacts on its own acts, and from one thing tends to another.

Reply to Objection 2. On account of the diversity of objects subject to the act of the reason, nothing prevents the reason from participating in itself: thus the knowledge of principles is participated in the knowledge of the conclusions.

The reply to the third object is evident from what has been said.

Whether the act of the sensitive appetite is commanded?

Ia IIae q. 17 a. 7

Objection 1. It would seem that the act of the sensitive appetite is not commanded. For the Apostle says (Rom. 7:15): “For I do not that good which I will”: and a gloss explains this by saying that man lusts, although he wills not to lust. But to lust is an act of the sensitive appetite. Therefore the act of the sensitive appetite is not subject to our command.

Objection 2. Further, corporeal matter obeys God alone, to the effect of formal transmutation, as was shown in the Ia, q. 65, a. 4; Ia, q. 91, a. 2; Ia, q. 110, a. 2.

But the act of the sensitive appetite is accompanied by a formal transmutation of the body, consisting in heat or cold. Therefore the act of the sensitive appetite is not subject to man’s command.

Objection 3. Further, the proper motive principle of the sensitive appetite is something apprehended by sense or imagination. But it is not always in our power to apprehend something by sense or imagination. Therefore the act of the sensitive appetite is not subject to our command.

On the contrary, Gregory of Nyssa* says: “That which obeys reason is twofold, the concupiscible and the irascible,” which belong to the sensitive appetite. Therefore the act of the sensitive appetite is subject to the command of reason.

I answer that, An act is subject to our command, in so far as it is in our power, as stated above (a. 5). Consequently in order to understand in what manner the act of the sensitive appetite is subject to the command of reason, we must consider in what manner it is in our power. Now it must be observed that the sensitive appetite differs from the intellectual appetite, which is called the will, in the fact that the sensitive appetite is a power of a corporeal organ, whereas the will is not. Again, every act of a power that uses a corporeal organ, depends not only on a power of the soul, but also on the disposition of that corporeal organ: thus the act of vision depends on the power of sight, and on the condition of the eye, which condition is a help or a hindrance to that act. Consequently the act of the sensitive appetite depends not only on the appetitive power, but also on the disposition of the body.

Now whatever part the power of the soul takes in the act, follows apprehension. And the apprehension of the imagination, being a particular apprehension, is regulated by the apprehension of reason, which is universal; just as a particular active power is regulated by a universal active power. Consequently in this respect the act of the sensitive appetite is subject to the command of reason. On the other hand, condition or disposition of the body is not subject to the command of reason: and consequently in this respect, the movement of the sensitive appetite is hindered from being wholly subject to the command of reason.

Moreover it happens sometimes that the movement of the sensitive appetite is aroused suddenly in consequence of an apprehension of the imagination of sense. And then such movement occurs without the command of reason: although reason could have prevented it, had it foreseen. Hence the Philosopher says (Polit. i, 2) that

the reason governs the irascible and concupiscible not by a “despotic supremacy,” which is that of a master over his slave; but by a “politic and royal supremacy,” whereby the free are governed, who are not wholly subject to command.

Reply to Objection 1. That man lusts, although he wills not to lust, is due to a disposition of the body, whereby the sensitive appetite is hindered from perfect compliance with the command of reason. Hence the Apostle adds (Rom. 7:15): “I see another law in my members, fighting against the law of my mind.” This may also happen through a sudden movement of concupiscence, as stated above.

Reply to Objection 2. The condition of the body stands in a twofold relation to the act of the sensitive appetite. First, as preceding it: thus a man may be disposed in one way or another, in respect of his body, to this or that passion. Secondly, as consequent to it: thus a man becomes heated through anger. Now the condition that precedes, is not subject to the command of reason: since it is due either to nature, or to some previous movement, which cannot cease at once. But the condition that is consequent, follows the command of reason: since it results from the local movement of the heart, which has various movements according to the various acts of the sensitive appetite.

Reply to Objection 3. Since the external sensible is necessary for the apprehension of the senses, it is not in our power to apprehend anything by the senses, unless the sensible be present; which presence of the sensible is not always in our power. For it is then that man can use his senses if he will so to do; unless there be some obstacle on the part of the organ. On the other hand, the apprehension of the imagination is subject to the ordering of reason, in proportion to the strength or weakness of the imaginative power. For that man is unable to imagine the things that reason considers, is either because they cannot be imagined, such as incorporeal things; or because of the weakness of the imaginative power, due to some organic indisposition.

Whether the act of the vegetal soul is commanded?

Ia IIae q. 17 a. 8

Objection 1. It would seem that the acts of the vegetal soul are subject to the command of reason. For the sensitive powers are of higher rank than the vegetal powers. But the powers of the sensitive soul are subject to the command of reason. Much more, therefore, are the powers of the vegetal soul.

Objection 2. Further, man is called a “little world”*, because the soul is in the body, as God is in the world. But God is in the world in such a way, that everything in the world obeys His command. Therefore all that is in man, even the powers of the vegetal soul, obey the command of reason.

Objection 3. Further, praise and blame are awarded

only to such acts as are subject to the command of reason. But in the acts of the nutritive and generative power, there is room for praise and blame, virtue and vice: as in the case of gluttony and lust, and their contrary virtues. Therefore the acts of these powers are subject to the command of reason.

On the contrary, Gregory of Nyssa† says that “the nutritive and generative power is one over which the reason has no control.”

I answer that, Some acts proceed from the natural appetite, others from the animal, or from the intellectual appetite: for every agent desires an end in some way. Now the natural appetite does not follow from

* Nemesius, De Nat. Hom. xvi. * Aristotle, Phys. viii. 2

† Nemesius, De Nat. Hom. xxii.

some apprehension, as to the animal and the intellectual appetite. But the reason commands by way of apprehensive power. Wherefore those acts that proceed from the intellective or the animal appetite, can be commanded by reason: but not those acts that proceed from the natural appetite. And such are the acts of the vegetal soul; wherefore Gregory of Nyssa (Nemesius, De Nat. Hom. xxii) says “that generation and nutrition belong to what are called natural powers.” Consequently the acts of the vegetal soul are not subject to the command of reason.

Reply to Objection 1. The more immaterial an act is, the more noble it is, and the more is it subject to the command of reason. Hence the very fact that the acts of the vegetal soul do not obey reason, shows that they rank lowest.

Reply to Objection 2. The comparison holds in a certain respect: because, to wit, as God moves the world, so the soul moves the body. But it does not hold in every respect: for the soul did not create the body out of nothing, as God created the world; for which reason the world is wholly subject to His command.

Reply to Objection 3. Virtue and vice, praise and blame do not affect the acts themselves of the nutritive and generative power, i.e. digestion, and formation of the human body; but they affect the acts of the sensitive part, that are ordained to the acts of generation and nutrition; for example the desire for pleasure in the act of taking food or in the act of generation, and the right or wrong use thereof.

Whether the acts of the external members are commanded?

Ia IIae q. 17 a. 9

Objection 1. It would seem that the members of the body do not obey reason as to their acts. For it is evident that the members of the body are more distant from the reason, than the powers of the vegetal soul. But the powers of the vegetal soul do not obey reason, as stated above (a. 8). Therefore much less do the members of the body obey.

Objection 2. Further, the heart is the principle of animal movement. But the movement of the heart is not subject to the command of reason: for Gregory of Nyssa* says that “the pulse is not controlled by reason.” Therefore the movement of the bodily members is not subject to the command of reason.

Objection 3. Further, Augustine says (De Civ. Dei xiv, 16) that “the movement of the genital members is sometimes inopportune and not desired; sometimes when sought it fails, and whereas the heart is warm with desire, the body remains cold.” Therefore the movements of the members are not obedient to reason.

On the contrary, Augustine says (Confess. viii, 9): “The mind commands a movement of the hand, and so ready is the hand to obey, that scarcely can one discern obedience from command.”

I answer that, The members of the body are organs of the soul’s powers. Consequently according as the powers of the soul stand in respect of obedience to reason, so do the members of the body stand in respect thereof. Since then the sensitive powers are subject to the command of reason, whereas the natural powers are not; therefore all movements of members, that are moved by the sensitive powers, are subject to the command of reason; whereas those movements of members, that arise from the natural powers, are not subject to the command of reason.

Reply to Objection 1. The members do not move themselves, but are moved through the powers of the soul; of which powers, some are in closer contact with the reason than are the powers of the vegetal soul.

Reply to Objection 2. In things pertaining to intellect and will, that which is according to nature stands first, whence all other things are derived: thus from the knowledge of principles that are naturally known, is derived knowledge of the conclusions; and from volition of the end naturally desired, is derived the choice of the means. So also in bodily movements the principle is according to nature. Now the principle of bodily movements begins with the movement of the heart. Consequently the movement of the heart is according to nature, and not according to the will: for like a proper accident, it results from life, which follows from the union of soul and body. Thus the movement of heavy and light things results from their substantial form: for which reason they are said to be moved by their generator, as the Philosopher states (Phys. viii, 4). Wherefore this movement is called “vital.” For which reason Gregory of Nyssa (Nemesius, De Nat. Hom. xxii) says that, just as the movement of generation and nutrition does not obey reason, so neither does the pulse which is a vital movement. By the pulse he means the movement of the heart which is indicated by the pulse veins.

Reply to Objection 3. As Augustine says (De Civ. Dei xiv, 17,20) it is in punishment of sin that the movement of these members does not obey reason: in this sense, that the soul is punished for its rebellion against God, by the insubmission of that member whereby original sin is transmitted to posterity.

But because, as we shall state later on, the effect of the sin of our first parent was that his nature was left to itself, through the withdrawal of the supernatural gift which God had bestowed on man, we must consider the natural cause of this particular member’s insubmission to reason. This is stated by Aristotle (De Causis Mot. Animal.) who says that “the movements of the heart and of the organs of generation are involuntary,” and that the reason of this is as follows. These members are stirred at the occasion of some apprehension; in so far

* Nemesius, De Nat. Hom. xxii.

as the intellect and imagination represent such things as arouse the passions of the soul, of which passions these movements are a consequence. But they are not moved at the command of the reason or intellect, because these movements are conditioned by a certain natural change of heat and cold, which change is not subject to the command of reason. This is the case with these two organs in particular, because each is as it were a sepa-

rate animal being, in so far as it is a principle of life; and the principle is virtually the whole. For the heart is the principle of the senses; and from the organ of generation proceeds the seminal virtue, which is virtually the entire animal. Consequently they have their proper movements naturally: because principles must needs be natural, as stated above (Reply obj. 2).

Objection 1. It would seem that command is not an act of the reason but of the will. For command is a kind of motion; because Avicenna says that there are four ways of moving, “by perfecting, by disposing, by commanding, and by counselling.” But it belongs to the will to move all the other powers of the soul, as stated above (q. 9, a. 1). Therefore command is an act of the will.

Objection 2. Further, just as to be commanded belongs to that which is subject, so, seemingly, to command belongs to that which is most free. But the root of liberty is especially in the will. Therefore to command belongs to the will.

Objection 3. Further, command is followed at once by act. But the act of the reason is not followed at once by act: for he who judges that a thing should be done, does not do it at once. Therefore command is not an act of the reason, but of the will.

On the contrary, Gregory of Nyssa* and the Philosopher (Ethic. i, 13) say that “the appetite obeys reason.” Therefore command is an act of the reason.

I answer that, Command is an act of the reason presupposing, however, an act of the will. In proof of this, we must take note that, since the acts of the reason and of the will can be brought to bear on one another, in so far as the reason reasons about willing, and the will wills to reason, the result is that the act of the reason precedes the act of the will, and conversely. And since the power of the preceding act continues in the act that follows, it happens sometimes that there is an act of the will in so far as it retains in itself something of an act of the reason, as we have stated in reference to use and choice; and conversely, that there is an act of the reason in so far as it retains in itself something of an act of the will.

Now, command is essentially indeed an act of the reason: for the commander orders the one commanded to do something, by way of intimation or declaration; and to order thus by intimating or declaring is an act of the reason. Now the reason can intimate or declare something in two ways. First, absolutely: and this intimation is expressed by a verb in the indicative mood, as when one person says to another: “This is what you should do.” Sometimes, however, the reason intimates something to a man by moving him thereto; and this intimation is expressed by a verb in the imperative mood; as when it is said to someone: “Do this.” Now the first mover, among the powers of the soul, to the doing of an act is the will, as stated above (q. 9, a. 1). Since therefore the second mover does not move, save in virtue of the first mover, it follows that the very fact that the reason moves by commanding, is due to the power of the will. Consequently it follows that command is an act of the reason, presupposing an act of the will, in virtue of which the reason, by its command, moves (the power) to the execution of the act.

Reply to Objection 1. To command is to move, not anyhow, but by intimating and declaring to another; and this is an act of the reason.

Reply to Objection 2. The root of liberty is the will as the subject thereof; but it is the reason as its cause. For the will can tend freely towards various objects, precisely because the reason can have various perceptions of good. Hence philosophers define the free-will as being “a free judgment arising from reason,” implying that reason is the root of liberty.

Reply to Objection 3. This argument proves that command is an act of reason not absolutely, but with a kind of motion as stated above.

* Nemesius, De Nat. Hom. xvi.

Objection 1. It would seem that command belongs to irrational animals. Because, according to Avicenna, “the power that commands movement is the appetite; and the power that executes movement is in the muscles and nerves.” But both powers are in irrational animals. Therefore command is to be found in irrational animals.

Objection 2. Further, the condition of a slave is that of one who receives commands. But the body is compared to the soul as a slave to his master, as the Philosopher says (*Polit.* i, 2). Therefore the body is commanded by the soul, even in irrational animals, since they are composed of soul and body.

Objection 3. Further, by commanding, man has an impulse towards an action. But impulse to action is to be found in irrational animals, as Damascene says (*De Fide Orth.* ii, 22). Therefore command is to be found in irrational animals.

On the contrary, Command is an act of reason, as stated above (a. 1). But in irrational animals there is no reason. Neither, therefore, is there command.

I answer that, To command is nothing else than to direct someone to do something, by a certain motion of intimation. Now to direct is the proper act of reason. Wherefore it is impossible that irrational animals

should command in any way, since they are devoid of reason.

Reply to Objection 1. The appetitive power is said to command movement, in so far as it moves the commanding reason. But this is only in man. In irrational animals the appetitive power is not, properly speaking, a commanding faculty, unless command be taken loosely for motion.

Reply to Objection 2. The body of the irrational animal is competent to obey; but its soul is not competent to command, because it is not competent to direct. Consequently there is no ratio there of commander and commanded; but only of mover and moved.

Reply to Objection 3. Impulse to action is in irrational animals otherwise than in man. For the impulse of man to action arises from the directing reason; wherefore his impulse is one of command. On the other hand, the impulse of the irrational animal arises from natural instinct; because as soon as they apprehend the fitting or the unfitting, their appetite is moved naturally to pursue or to avoid. Wherefore they are directed by another to act; and they themselves do not direct themselves to act. Consequently in them is impulse but not command.

Objection 1. It would seem that use precedes command. For command is an act of the reason presupposing an act of the will, as stated above (a. 1). But, as we have already shown (q. 16, a. 1), use is an act of the will. Therefore use precedes command.

Objection 2. Further, command is one of those things that are ordained to the end. But use is of those things that are ordained to the end. Therefore it seems that use precedes command.

Objection 3. Further, every act of a power moved by the will is called use; because the will uses the other powers, as stated above (q. 16, a. 1). But command is an act of the reason as moved by the will, as stated above (a. 1). Therefore command is a kind of use. Now the common precedes the proper. Therefore use precedes command.

On the contrary, Damascene says (De Fide Orth. ii, 22) that impulse to action precedes use. But impulse to operation is given by command. Therefore command precedes use.

I answer that, use of that which is directed to the end, in so far as it is in the reason referring this to the end, precedes choice, as stated above (q. 16, a. 4). Wherefore still more does it precede command. On the other hand, use of that which is directed to the end, in so far as it is subject to the executive power, follows command; because use in the user is united to the act of the thing used; for one does not use a stick before doing

something with the stick. But command is not simultaneous with the act of the thing to which the command is given: for it naturally precedes its fulfilment, sometimes, indeed, by priority of time. Consequently it is evident that command precedes use.

Reply to Objection 1. Not every act of the will precedes this act of the reason which is command; but an act of the will precedes, viz. choice; and an act of the will follows, viz. use. Because after counsel's decision, which is reason's judgment, the will chooses; and after choice, the reason commands that power which has to do what was chosen; and then, last of all, someone's will begins to use, by executing the command of reason; sometimes it is another's will, when one commands another; sometimes the will of the one that commands, when he commands himself to do something.

Reply to Objection 2. Just as act ranks before power, so does the object rank before the act. Now the object of use is that which is directed to the end. Consequently, from the fact that command precedes, rather than that it follows use.

Reply to Objection 3. Just as the act of the will in using the reason for the purpose of command, precedes the command; so also we may say that this act whereby the will uses the reason, is preceded by a command of reason; since the acts of these powers react on one another.

Objection 1. It would seem that the commanded act is not one with the command itself. For the acts of different powers are themselves distinct. But the commanded act belongs to one power, and the command to another; since one is the power that commands, and the other is the power that receives the command. Therefore the commanded act is not one with the command.

Objection 2. Further, whatever things can be separate from one another, are distinct: for nothing is severed from itself. But sometimes the commanded act is separate from the command: for sometimes the command is given, and the commanded act follows not. Therefore command is a distinct act from the act commanded.

Objection 3. Further, whatever things are related to one another as precedent and consequent, are distinct. But command naturally precedes the commanded act. Therefore they are distinct.

On the contrary, The Philosopher says (Topic. iii, 2) that “where one thing is by reason of another, there is but one.” But there is no commanded act unless by reason of the command. Therefore they are one.

I answer that, Nothing prevents certain things being distinct in one respect, and one in another respect. Indeed, every multitude is one in some respect, as Dionysius says (Div. Nom. xiii). But a difference is to be observed in this, that some are simply many, and one in a particular aspect: while with others it is the reverse. Now “one” is predicated in the same way as “being.” And substance is being simply, whereas accident or being “of reason” is a being only in a certain respect. Wherefore those things that are one in substance are one simply, though many in a certain respect. Thus, in the genus substance, the whole composed of its integral or essential parts, is one simply: because the whole is being and substance simply, and the parts are being

and substances in the whole. But those things which are distinct in substance, and one according to an accident, are distinct simply, and one in a certain respect: thus many men are one people, and many stones are one heap; which is unity of composition or order. In like manner also many individuals that are one in genus or species are many simply, and one in a certain respect: since to be one in genus or species is to be one according to the consideration of the reason.

Now just as in the genus of natural things, a whole is composed of matter and form (e.g. man, who is one natural being, though he has many parts, is composed of soul and body); so, in human acts, the act of a lower power is in the position of matter in regard to the act of a higher power, in so far as the lower power acts in virtue of the higher power moving it: for thus also the act of the first mover is as the form in regard to the act of its instrument. Hence it is evident that command and the commanded act are one human act, just as a whole is one, yet in its parts, many.

Reply to Objection 1. If the distinct powers are not ordained to one another, their acts are diverse simply. But when one power is the mover of the other, then their acts are, in a way, one: since “the act of the mover and the act of the thing moved are one act” (Phys. iii, 3).

Reply to Objection 2. The fact that command and the commanded act can be separated from one another shows that they are different parts. Because the parts of a man can be separated from one another, and yet they form one whole.

Reply to Objection 3. In those things that are many in parts, but one as a whole, nothing hinders one part from preceding another. Thus the soul, in a way, precedes the body; and the heart, the other members.

Objection 1. It would seem that the act of the will is not commanded. For Augustine says (Confess. viii, 9): “The mind commands the mind to will, and yet it does not.” But to will is the act of the will. Therefore the act of the will is not commanded.

Objection 2. Further, to receive a command belongs to one who can understand the command. But the will cannot understand the command; for the will differs from the intellect, to which it belongs to understand. Therefore the act of the will is not commanded.

Objection 3. Further, if one act of the will is commanded, for the same reason all are commanded. But if all the acts of the will are commanded, we must needs proceed to infinity; because the act of the will precedes the act of reason commanding, as stated above (a. 1); for if that act of the will be also commanded, this command will be preceded by another act of the reason, and so on to infinity. But to proceed to infinity is not possible. Therefore the act of the will is not commanded.

On the contrary, Whatever is in our power, is subject to our command. But the acts of the will, most of all, are in our power; since all our acts are said to be in our power, in so far as they are voluntary. Therefore the acts of the will are commanded by us.

I answer that, As stated above (a. 1), command is nothing else than the act of the reason directing, with a certain motion, something to act. Now it is evident that

the reason can direct the act of the will: for just as it can judge it to be good to will something, so it can direct by commanding man to will. From this it is evident that an act of the will can be commanded.

Reply to Objection 1. As Augustine says (Confess. viii, 9) when the mind commands itself perfectly to will, then already it wills: but that sometimes it commands and wills not, is due to the fact that it commands imperfectly. Now imperfect command arises from the fact that the reason is moved by opposite motives to command or not to command: wherefore it fluctuates between the two, and fails to command perfectly.

Reply to Objection 2. Just as each of the members of the body works not for itself alone but for the whole body; thus it is for the whole body that the eye sees; so is it with the powers of the soul. For the intellect understands, not for itself alone, but for all the powers; and the will wills not only for itself, but for all the powers too. Wherefore man, in so far as he is endowed with intellect and will, commands the act of the will for himself.

Reply to Objection 3. Since command is an act of reason, that act is commanded which is subject to reason. Now the first act of the will is not due to the direction of the reason but to the instigation of nature, or of a higher cause, as stated above (q. 9, a. 4). Therefore there is no need to proceed to infinity.

Objection 1. It would seem that the act of the reason cannot be commanded. For it seems impossible for a thing to command itself. But it is the reason that commands, as stated above (a. 1). Therefore the act of the reason is not commanded.

Objection 2. Further, that which is essential is different from that which is by participation. But the power whose act is commanded by reason, is rational by participation, as stated in *Ethic.* i, 13. Therefore the act of that power, which is essentially rational, is not commanded.

Objection 3. Further, that act is commanded, which is in our power. But to know and judge the truth, which is the act of reason, is not always in our power. Therefore the act of the reason cannot be commanded.

On the contrary, That which we do of our free-will, can be done by our command. But the acts of the reason are accomplished through the free-will: for Damascene says (*De Fide Orth.* ii, 22) that “by his free-will man inquires, considers, judges, approves.” Therefore the acts of the reason can be commanded.

I answer that, Since the reason reacts on itself, just as it directs the acts of other powers, so can it direct its own act. Consequently its act can be commanded.

But we must take note that the act of the reason may be considered in two ways. First, as to the exercise of the act. And considered thus, the act of the reason can always be commanded: as when one is told to be attentive, and to use one’s reason. Secondly, as to the object;

in respect of which two acts of the reason have to be noticed. One is the act whereby it apprehends the truth about something. This act is not in our power: because it happens in virtue of a natural or supernatural light. Consequently in this respect, the act of the reason is not in our power, and cannot be commanded. The other act of the reason is that whereby it assents to what it apprehends. If, therefore, that which the reason apprehends is such that it naturally assents thereto, e.g. the first principles, it is not in our power to assent or dissent to the like: assent follows naturally, and consequently, properly speaking, is not subject to our command. But some things which are apprehended do not convince the intellect to such an extent as not to leave it free to assent or dissent, or at least suspend its assent or dissent, on account of some cause or other; and in such things assent or dissent is in our power, and is subject to our command.

Reply to Objection 1. Reason commands itself, just as the will moves itself, as stated above (q. 9, a. 3), that is to say, in so far as each power reacts on its own acts, and from one thing tends to another.

Reply to Objection 2. On account of the diversity of objects subject to the act of the reason, nothing prevents the reason from participating in itself: thus the knowledge of principles is participated in the knowledge of the conclusions.

The reply to the third object is evident from what has been said.

Objection 1. It would seem that the act of the sensitive appetite is not commanded. For the Apostle says (Rom. 7:15): “For I do not that good which I will”: and a gloss explains this by saying that man lusts, although he wills not to lust. But to lust is an act of the sensitive appetite. Therefore the act of the sensitive appetite is not subject to our command.

Objection 2. Further, corporeal matter obeys God alone, to the effect of formal transmutation, as was shown in the Ia, q. 65, a. 4; Ia, q. 91, a. 2; Ia, q. 110, a. 2. But the act of the sensitive appetite is accompanied by a formal transmutation of the body, consisting in heat or cold. Therefore the act of the sensitive appetite is not subject to man’s command.

Objection 3. Further, the proper motive principle of the sensitive appetite is something apprehended by sense or imagination. But it is not always in our power to apprehend something by sense or imagination. Therefore the act of the sensitive appetite is not subject to our command.

On the contrary, Gregory of Nyssa* says: “That which obeys reason is twofold, the concupiscible and the irascible,” which belong to the sensitive appetite. Therefore the act of the sensitive appetite is subject to the command of reason.

I answer that, An act is subject to our command, in so far as it is in our power, as stated above (a. 5). Consequently in order to understand in what manner the act of the sensitive appetite is subject to the command of reason, we must consider in what manner it is in our power. Now it must be observed that the sensitive appetite differs from the intellective appetite, which is called the will, in the fact that the sensitive appetite is a power of a corporeal organ, whereas the will is not. Again, every act of a power that uses a corporeal organ, depends not only on a power of the soul, but also on the disposition of that corporeal organ: thus the act of vision depends on the power of sight, and on the condition of the eye, which condition is a help or a hindrance to that act. Consequently the act of the sensitive appetite depends not only on the appetitive power, but also on the disposition of the body.

Now whatever part the power of the soul takes in the act, follows apprehension. And the apprehension of the imagination, being a particular apprehension, is regulated by the apprehension of reason, which is universal; just as a particular active power is regulated by a universal active power. Consequently in this respect the act of the sensitive appetite is subject to the command of reason. On the other hand, condition or disposition

of the body is not subject to the command of reason: and consequently in this respect, the movement of the sensitive appetite is hindered from being wholly subject to the command of reason.

Moreover it happens sometimes that the movement of the sensitive appetite is aroused suddenly in consequence of an apprehension of the imagination of sense. And then such movement occurs without the command of reason: although reason could have prevented it, had it foreseen. Hence the Philosopher says (Polit. i, 2) that the reason governs the irascible and concupiscible not by a “despotic supremacy,” which is that of a master over his slave; but by a “politic and royal supremacy,” whereby the free are governed, who are not wholly subject to command.

Reply to Objection 1. That man lusts, although he wills not to lust, is due to a disposition of the body, whereby the sensitive appetite is hindered from perfect compliance with the command of reason. Hence the Apostle adds (Rom. 7:15): “I see another law in my members, fighting against the law of my mind.” This may also happen through a sudden movement of concupiscence, as stated above.

Reply to Objection 2. The condition of the body stands in a twofold relation to the act of the sensitive appetite. First, as preceding it: thus a man may be disposed in one way or another, in respect of his body, to this or that passion. Secondly, as consequent to it: thus a man becomes heated through anger. Now the condition that precedes, is not subject to the command of reason: since it is due either to nature, or to some previous movement, which cannot cease at once. But the condition that is consequent, follows the command of reason: since it results from the local movement of the heart, which has various movements according to the various acts of the sensitive appetite.

Reply to Objection 3. Since the external sensible is necessary for the apprehension of the senses, it is not in our power to apprehend anything by the senses, unless the sensible be present; which presence of the sensible is not always in our power. For it is then that man can use his senses if he will so to do; unless there be some obstacle on the part of the organ. On the other hand, the apprehension of the imagination is subject to the ordering of reason, in proportion to the strength or weakness of the imaginative power. For that man is unable to imagine the things that reason considers, is either because they cannot be imagined, such as incorporeal things; or because of the weakness of the imaginative power, due to some organic indisposition.

* Nemesius, De Nat. Hom. xvi.

Objection 1. It would seem that the acts of the vegetal soul are subject to the command of reason. For the sensitive powers are of higher rank than the vegetal powers. But the powers of the sensitive soul are subject to the command of reason. Much more, therefore, are the powers of the vegetal soul.

Objection 2. Further, man is called a “little world”*, because the soul is in the body, as God is in the world. But God is in the world in such a way, that everything in the world obeys His command. Therefore all that is in man, even the powers of the vegetal soul, obey the command of reason.

Objection 3. Further, praise and blame are awarded only to such acts as are subject to the command of reason. But in the acts of the nutritive and generative power, there is room for praise and blame, virtue and vice: as in the case of gluttony and lust, and their contrary virtues. Therefore the acts of these powers are subject to the command of reason.

On the contrary, Gregory of Nyssa[†] says that “the nutritive and generative power is one over which the reason has no control.”

I answer that, Some acts proceed from the natural appetite, others from the animal, or from the intellectual appetite: for every agent desires an end in some way. Now the natural appetite does not follow from some apprehension, as to the animal and the intellectual appetite. But the reason commands by way of apprehen-

sive power. Wherefore those acts that proceed from the intellectual or the animal appetite, can be commanded by reason: but not those acts that proceed from the natural appetite. And such are the acts of the vegetal soul; wherefore Gregory of Nyssa (Nemesius, De Nat. Hom. xxii) says “that generation and nutrition belong to what are called natural powers.” Consequently the acts of the vegetal soul are not subject to the command of reason.

Reply to Objection 1. The more immaterial an act is, the more noble it is, and the more is it subject to the command of reason. Hence the very fact that the acts of the vegetal soul do not obey reason, shows that they rank lowest.

Reply to Objection 2. The comparison holds in a certain respect: because, to wit, as God moves the world, so the soul moves the body. But it does not hold in every respect: for the soul did not create the body out of nothing, as God created the world; for which reason the world is wholly subject to His command.

Reply to Objection 3. Virtue and vice, praise and blame do not affect the acts themselves of the nutritive and generative power, i.e. digestion, and formation of the human body; but they affect the acts of the sensitive part, that are ordained to the acts of generation and nutrition; for example the desire for pleasure in the act of taking food or in the act of generation, and the right or wrong use thereof.

* Aristotle, Phys. viii. 2 † Nemesius, De Nat. Hom. xxii.

Objection 1. It would seem that the members of the body do not obey reason as to their acts. For it is evident that the members of the body are more distant from the reason, than the powers of the vegetal soul. But the powers of the vegetal soul do not obey reason, as stated above (a. 8). Therefore much less do the members of the body obey.

Objection 2. Further, the heart is the principle of animal movement. But the movement of the heart is not subject to the command of reason: for Gregory of Nyssa* says that “the pulse is not controlled by reason.” Therefore the movement of the bodily members is not subject to the command of reason.

Objection 3. Further, Augustine says (De Civ. Dei xiv, 16) that “the movement of the genital members is sometimes inopportune and not desired; sometimes when sought it fails, and whereas the heart is warm with desire, the body remains cold.” Therefore the movements of the members are not obedient to reason.

On the contrary, Augustine says (Confess. viii, 9): “The mind commands a movement of the hand, and so ready is the hand to obey, that scarcely can one discern obedience from command.”

I answer that, The members of the body are organs of the soul’s powers. Consequently according as the powers of the soul stand in respect of obedience to reason, so do the members of the body stand in respect thereof. Since then the sensitive powers are subject to the command of reason, whereas the natural powers are not; therefore all movements of members, that are moved by the sensitive powers, are subject to the command of reason; whereas those movements of members, that arise from the natural powers, are not subject to the command of reason.

Reply to Objection 1. The members do not move themselves, but are moved through the powers of the soul; of which powers, some are in closer contact with the reason than are the powers of the vegetal soul.

Reply to Objection 2. In things pertaining to intellect and will, that which is according to nature stands first, whence all other things are derived: thus from the knowledge of principles that are naturally known, is derived knowledge of the conclusions; and from volition of the end naturally desired, is derived the choice of the means. So also in bodily movements the principle is according to nature. Now the principle of bodily move-

ments begins with the movement of the heart. Consequently the movement of the heart is according to nature, and not according to the will: for like a proper accident, it results from life, which follows from the union of soul and body. Thus the movement of heavy and light things results from their substantial form: for which reason they are said to be moved by their generator, as the Philosopher states (Phys. viii, 4). Wherefore this movement is called “vital.” For which reason Gregory of Nyssa (Nemesius, De Nat. Hom. xxii) says that, just as the movement of generation and nutrition does not obey reason, so neither does the pulse which is a vital movement. By the pulse he means the movement of the heart which is indicated by the pulse veins.

Reply to Objection 3. As Augustine says (De Civ. Dei xiv, 17,20) it is in punishment of sin that the movement of these members does not obey reason: in this sense, that the soul is punished for its rebellion against God, by the insubmission of that member whereby original sin is transmitted to posterity.

But because, as we shall state later on, the effect of the sin of our first parent was that his nature was left to itself, through the withdrawal of the supernatural gift which God had bestowed on man, we must consider the natural cause of this particular member’s insubmission to reason. This is stated by Aristotle (De Causis Mot. Animal.) who says that “the movements of the heart and of the organs of generation are involuntary,” and that the reason of this is as follows. These members are stirred at the occasion of some apprehension; in so far as the intellect and imagination represent such things as arouse the passions of the soul, of which passions these movements are a consequence. But they are not moved at the command of the reason or intellect, because these movements are conditioned by a certain natural change of heat and cold, which change is not subject to the command of reason. This is the case with these two organs in particular, because each is as it were a separate animal being, in so far as it is a principle of life; and the principle is virtually the whole. For the heart is the principle of the senses; and from the organ of generation proceeds the seminal virtue, which is virtually the entire animal. Consequently they have their proper movements naturally: because principles must needs be natural, as stated above (Reply obj. 2).

* Nemesius, De Nat. Hom. xxii.

FIRST PART OF THE SECOND PART, QUESTION 18

Of the Good and Evil of Human Acts, in General

(In Eleven Articles)

We must now consider the good and evil of human acts. First, how a human act is good or evil; secondly, what results from the good or evil of a human act, as merit or demerit, sin and guilt.

Under the first head there will be a threefold consideration: the first will be of the good and evil of human acts, in general; the second, of the good and evil of internal acts; the third, of the good and evil of external acts.

Concerning the first there are eleven points of inquiry:

- (1) Whether every human action is good, or are there evil actions?
- (2) Whether the good or evil of a human action is derived from its object?
- (3) Whether it is derived from a circumstance?
- (4) Whether it is derived from the end?
- (5) Whether a human action is good or evil in its species?
- (6) Whether an action has the species of good or evil from its end?
- (7) Whether the species derived from the end is contained under the species derived from the object, as under its genus, or conversely?
- (8) Whether any action is indifferent in its species?
- (9) Whether an individual action can be indifferent?
- (10) Whether a circumstance places a moral action in the species of good or evil?
- (11) Whether every circumstance that makes an action better or worse, places the moral action in the species of good or evil?

Whether every human action is good, or are there evil actions?

Ia IIae q. 18 a. 1

Objection 1. It would seem that every human action is good, and that none is evil. For Dionysius says (Div. Nom. iv) that evil acts not, save in virtue of the good. But no evil is done in virtue of the good. Therefore no action is evil.

Objection 2. Further, nothing acts except in so far as it is in act. Now a thing is evil, not according as it is in act, but according as its potentiality is void of act; whereas in so far as its potentiality is perfected by act, it is good, as stated in Metaph. ix, 9. Therefore nothing acts in so far as it is evil, but only according as it is good. Therefore every action is good, and none is evil.

Objection 3. Further, evil cannot be a cause, save accidentally, as Dionysius declares (Div. Nom. iv). But every action has some effect which is proper to it. Therefore no action is evil, but every action is good.

On the contrary, Our Lord said (Jn. 3:20): "Every one that doth evil, hateth the light." Therefore some actions of man are evil.

I answer that, We must speak of good and evil in actions as of good and evil in things: because such as everything is, such is the act that it produces. Now in things, each one has so much good as it has being: since good and being are convertible, as was stated in the Ia, q. 5, Aa. 1,3. But God alone has the whole plenitude of His Being in a certain unity: whereas every other thing has its proper fulness of being in a certain multiplicity. Wherefore it happens with some things, that they have being in some respect, and yet they are lacking in the fulness of being due to them. Thus the fulness of human being requires a compound of soul and body, having all

the powers and instruments of knowledge and movement: wherefore if any man be lacking in any of these, he is lacking in something due to the fulness of his being. So that as much as he has of being, so much has he of goodness: while so far as he is lacking in goodness, and is said to be evil: thus a blind man is possessed of goodness inasmuch as he lives; and of evil, inasmuch as he lacks sight. That, however, which has nothing of being or goodness, could not be said to be either evil or good. But since this same fulness of being is of the very essence of good, if a thing be lacking in its due fulness of being, it is not said to be good simply, but in a certain respect, inasmuch as it is a being; although it can be called a being simply, and a non-being in a certain respect, as was stated in the Ia, q. 5, a. 1, ad 1. We must therefore say that every action has goodness, in so far as it has being; whereas it is lacking in goodness, in so far as it is lacking in something that is due to its fulness of being; and thus it is said to be evil: for instance if it lacks the quantity determined by reason, or its due place, or something of the kind.

Reply to Objection 1. Evil acts in virtue of deficient goodness. For if there were nothing of good there, there would be neither being nor possibility of action. On the other hand if good were not deficient, there would be no evil. Consequently the action done is a deficient good, which is good in a certain respect, but simply evil.

Reply to Objection 2. Nothing hinders a thing from being in act in a certain respect, so that it can act; and in a certain respect deficient in act, so as to cause a de-

ficient act. Thus a blind man has in act the power of walking, whereby he is able to walk; but inasmuch as he is deprived of sight he suffers a defect in walking by stumbling when he walks.

Reply to Objection 3. An evil action can have a

proper effect, according to the goodness and being that it has. Thus adultery is the cause of human generation, inasmuch as it implies union of male and female, but not inasmuch as it lacks the order of reason.

Whether the good or evil of a man's action is derived from its object?

Ia IIae q. 18 a. 2

Objection 1. It would seem that the good or evil of an action is not derived from its object. For the object of any action is a thing. But "evil is not in things, but in the sinner's use of them," as Augustine says (*De Doctr. Christ.* iii, 12). Therefore the good or evil of a human action is not derived from their object.

Objection 2. Further, the object is compared to the action as its matter. But the goodness of a thing is not from its matter, but rather from the form, which is an act. Therefore good and evil in actions is not derived from their object.

Objection 3. Further, the object of an active power is compared to the action as effect to cause. But the goodness of a cause does not depend on its effect; rather is it the reverse. Therefore good or evil in actions is not derived from their object.

On the contrary, It is written (*Osee* 9:10): "They became abominable as those things which they loved." Now man becomes abominable to God on account of the malice of his action. Therefore the malice of his action is according to the evil objects that man loves. And the same applies to the goodness of his action.

I answer that, as stated above (a. 1) the good or evil of an action, as of other things, depends on its fulness of being or its lack of that fulness. Now the first thing that belongs to the fulness of being seems to be that which gives a thing its species. And just as a natural thing has its species from its form, so an action has its species from its object, as movement from its term. And therefore just as the primary goodness of a natural thing is derived from its form, which gives it its species, so the primary goodness of a moral action is derived from its suitable object: hence some call such an action "good in its genus"; for instance, "to make use of what is one's own." And just as, in natural things, the primary evil

is when a generated thing does not realize its specific form (for instance, if instead of a man, something else be generated); so the primary evil in moral actions is that which is from the object, for instance, "to take what belongs to another." And this action is said to be "evil in its genus," genus here standing for species, just as we apply the term "mankind" to the whole human species.

Reply to Objection 1. Although external things are good in themselves, nevertheless they have not always a due proportion to this or that action. And so, inasmuch as they are considered as objects of such actions, they have not the quality of goodness.

Reply to Objection 2. The object is not the matter "of which" (a thing is made), but the matter "about which" (something is done); and stands in relation to the act as its form, as it were, through giving it its species.

Reply to Objection 3. The object of the human action is not always the object of an active power. For the appetitive power is, in a way, passive; in so far as it is moved by the appetible object; and yet it is a principle of human actions. Nor again have the objects of the active powers always the nature of an effect, but only when they are already transformed: thus food when transformed is the effect of the nutritive power; whereas food before being transformed stands in relation to the nutritive power as the matter about which it exercises its operation. Now since the object is in some way the effect of the active power, it follows that it is the term of its action, and consequently that it gives it its form and species, since movement derives its species from its term. Moreover, although the goodness of an action is not caused by the goodness of its effect, yet an action is said to be good from the fact that it can produce a good effect. Consequently the very proportion of an action to its effect is the measure of its goodness.

Whether man's action is good or evil from a circumstance?

Ia IIae q. 18 a. 3

Objection 1. It would seem that an action is not good or evil from a circumstance. For circumstances stand around [circumstant] an action, as being outside it, as stated above (q. 7, a. 1). But "good and evil are in things themselves," as is stated in *Metaph.* vi, 4. Therefore an action does not derive goodness or malice from a circumstance.

Objection 2. Further, the goodness or malice of an action is considered principally in the doctrine of morals. But since circumstances are accidents of actions, it seems that they are outside the scope of art:

because "no art takes notice of what is accidental" (*Metaph.* vi, 2). Therefore the goodness or malice of an action is not taken from a circumstance.

Objection 3. Further, that which belongs to a thing, in respect of its substance, is not ascribed to it in respect of an accident. But good and evil belong to an action in respect of its substance; because an action can be good or evil in its genus as stated above (a. 2). Therefore an action is not good or bad from a circumstance.

On the contrary, the Philosopher says (*Ethic.* ii, 3) that a virtuous man acts as he should, and when he

should, and so on in respect of the other circumstances. Therefore, on the other hand, the vicious man, in the matter of each vice, acts when he should not, or where he should not, and so on with the other circumstances. Therefore human actions are good or evil according to circumstances.

I answer that, In natural things, it is to be noted that the whole fulness of perfection due to a thing, is not from the mere substantial form, that gives it its species; since a thing derives much from supervening accidents, as man does from shape, color, and the like; and if any one of these accidents be out of due proportion, evil is the result. So it is with action. For the plenitude of its goodness does not consist wholly in its species, but also in certain additions which accrue to it by reason of certain accidents: and such are its due circumstances. Wherefore if something be wanting that is requisite as a

due circumstance the action will be evil.

Reply to Objection 1. Circumstances are outside an action, inasmuch as they are not part of its essence; but they are in an action as accidents thereof. Thus, too, accidents in natural substances are outside the essence.

Reply to Objection 2. Every accident is not accidentally in its subject; for some are proper accidents; and of these every art takes notice. And thus it is that the circumstances of actions are considered in the doctrine of morals.

Reply to Objection 3. Since good and being are convertible; according as being is predicated of substance and of accident, so is good predicated of a thing both in respect of its essential being, and in respect of its accidental being; and this, both in natural things and in moral actions.

Whether a human action is good or evil from its end?

Ia IIae q. 18 a. 4

Objection 1. It would seem that the good and evil in human actions are not from the end. For Dionysius says (Div. Nom. iv) that “nothing acts with a view to evil.” If therefore an action were good or evil from its end, no action would be evil. Which is clearly false.

Objection 2. Further, the goodness of an action is something in the action. But the end is an extrinsic cause. Therefore an action is not said to be good or bad according to its end.

Objection 3. Further, a good action may happen to be ordained to an evil end, as when a man gives an alms from vainglory; and conversely, an evil action may happen to be ordained to a good end, as a theft committed in order to give something to the poor. Therefore an action is not good or evil from its end.

On the contrary, Boethius says (De Differ. Topic. ii) that “if the end is good, the thing is good, and if the end be evil, the thing also is evil.”

I answer that, The disposition of things as to goodness is the same as their disposition as to being. Now in some things the being does not depend on another, and in these it suffices to consider their being absolutely. But there are things the being of which depends on something else, and hence in their regard we must consider their being in its relation to the cause on which it depends. Now just as the being of a thing depends on the agent, and the form, so the goodness of a thing depends on its end. Hence in the Divine Persons, Whose goodness does not depend on another, the measure of goodness is not taken from the end. Whereas human ac-

tions, and other things, the goodness of which depends on something else, have a measure of goodness from the end on which they depend, besides that goodness which is in them absolutely.

Accordingly a fourfold goodness may be considered in a human action. First, that which, as an action, it derives from its genus; because as much as it has of action and being so much has it of goodness, as stated above (a. 1). Secondly, it has goodness according to its species; which is derived from its suitable object. Thirdly, it has goodness from its circumstances, in respect, as it were, of its accidents. Fourthly, it has goodness from its end, to which it is compared as to the cause of its goodness.

Reply to Objection 1. The good in view of which one acts is not always a true good; but sometimes it is a true good, sometimes an apparent good. And in the latter event, an evil action results from the end in view.

Reply to Objection 2. Although the end is an extrinsic cause, nevertheless due proportion to the end, and relation to the end, are inherent to the action.

Reply to Objection 3. Nothing hinders an action that is good in one of the way mentioned above, from lacking goodness in another way. And thus it may happen that an action which is good in its species or in its circumstances is ordained to an evil end, or vice versa. However, an action is not good simply, unless it is good in all those ways: since “evil results from any single defect, but good from the complete cause,” as Dionysius says (Div. Nom. iv).

Whether a human action is good or evil in its species?

Ia IIae q. 18 a. 5

Objection 1. It would seem that good and evil in moral actions do not make a difference of species. For the existence of good and evil in actions is in conformity with their existence in things, as stated above (a. 1).

But good and evil do not make a specific difference in things; for a good man is specifically the same as a bad man. Therefore neither do they make a specific difference in actions.

Objection 2. Further, since evil is a privation, it is a non-being. But non-being cannot be a difference, according to the Philosopher (Metaph. iii, 3). Since therefore the difference constitutes the species, it seems that an action is not constituted in a species through being evil. Consequently good and evil do not diversify the species of human actions.

Objection 3. Further, acts that differ in species produce different effects. But the same specific effect results from a good and from an evil action: thus a man is born of adulterous or of lawful wedlock. Therefore good and evil actions do not differ in species.

Objection 4. Further, actions are sometimes said to be good or bad from a circumstance, as stated above (a. 3). But since a circumstance is an accident, it does not give an action its species. Therefore human actions do not differ in species on account of their goodness or malice.

On the contrary, According to the Philosopher (Ethic ii. 1) “like habits produce like actions.” But a good and a bad habit differ in species, as liberality and prodigality. Therefore also good and bad actions differ in species.

I answer that, Every action derives its species from its object, as stated above (a. 2). Hence it follows that a difference of object causes a difference of species in actions. Now, it must be observed that a difference of objects causes a difference of species in actions, according as the latter are referred to one active principle, which does not cause a difference in actions, according as they are referred to another active principle. Because nothing accidental constitutes a species, but only that which is essential; and a difference of object may be essential in reference to one active principle, and accidental in reference to another. Thus to know color and to know sound, differ essentially in reference to sense, but not in reference to the intellect.

Now in human actions, good and evil are predicated in reference to the reason; because as Dionysius says (Div. Nom. iv), “the good of man is to be in accordance

with reason,” and evil is “to be against reason.” For that is good for a thing which suits it in regard to its form; and evil, that which is against the order of its form. It is therefore evident that the difference of good and evil considered in reference to the object is an essential difference in relation to reason; that is to say, according as the object is suitable or unsuitable to reason. Now certain actions are called human or moral, inasmuch as they proceed from the reason. Consequently it is evident that good and evil diversify the species in human actions; since essential differences cause a difference of species.

Reply to Objection 1. Even in natural things, good and evil, inasmuch as something is according to nature, and something against nature, diversify the natural species; for a dead body and a living body are not of the same species. In like manner, good, inasmuch as it is in accord with reason, and evil, inasmuch as it is against reason, diversify the moral species.

Reply to Objection 2. Evil implies privation, not absolute, but affecting some potentiality. For an action is said to be evil in its species, not because it has no object at all; but because it has an object in disaccord with reason, for instance, to appropriate another’s property. Wherefore in so far as the object is something positive, it can constitute the species of an evil act.

Reply to Objection 3. The conjugal act and adultery, as compared to reason, differ specifically and have effects specifically different; because the other deserves praise and reward, the other, blame and punishment. But as compared to the generative power, they do not differ in species; and thus they have one specific effect.

Reply to Objection 4. A circumstance is sometimes taken as the essential difference of the object, as compared to reason; and then it can specify a moral act. And it must needs be so whenever a circumstance transforms an action from good to evil; for a circumstance would not make an action evil, except through being repugnant to reason.

Whether an action has the species of good or evil from its end?

Ia IIae q. 18 a. 6

Objection 1. It would seem that the good and evil which are from the end do not diversify the species of actions. For actions derive their species from the object. But the end is altogether apart from the object. Therefore the good and evil which are from the end do not diversify the species of an action.

Objection 2. Further, that which is accidental does not constitute the species, as stated above (a. 5). But it is accidental to an action to be ordained to some particular end; for instance, to give alms from vainglory. Therefore actions are not diversified as to species, according to the good and evil which are from the end.

Objection 3. Further, acts that differ in species, can be ordained to the same end: thus to the end of vain-

glory, actions of various virtues and vices can be ordained. Therefore the good and evil which are taken from the end, do not diversify the species of action.

On the contrary, It has been shown above (q. 1, a. 3) that human actions derive their species from the end. Therefore good and evil in respect of the end diversify the species of actions.

I answer that, Certain actions are called human, inasmuch as they are voluntary, as stated above (q. 1, a. 1). Now, in a voluntary action, there is a twofold action, viz. the interior action of the will, and the external action: and each of these actions has its object. The end is properly the object of the interior act of the will: while the object of the external action, is that on which

the action is brought to bear. Therefore just as the external action takes its species from the object on which it bears; so the interior act of the will takes its species from the end, as from its own proper object.

Now that which is on the part of the will is formal in regard to that which is on the part of the external action: because the will uses the limbs to act as instruments; nor have external actions any measure of morality, save in so far as they are voluntary. Consequently the species of a human act is considered formally with regard to the end, but materially with regard to the object of the external action. Hence the Philosopher says (*Ethic. v, 2*) that "he who steals that he may commit adultery, is strictly

speaking, more adulterer than thief."

Reply to Objection 1. The end also has the character of an object, as stated above.

Reply to Objection 2. Although it is accidental to the external action to be ordained to some particular end, it is not accidental to the interior act of the will, which act is compared to the external act, as form to matter.

Reply to Objection 3. When many actions, differing in species, are ordained to the same end, there is indeed a diversity of species on the part of the external actions; but unity of species on the part of the internal action.

Whether the species derived from the end is contained under the species derived from the object, as under its genus, or conversely?

Ia IIae q. 18 a. 7

Objection 1. It would seem that the species of goodness derived from the end is contained under the species of goodness derived from the object, as a species is contained under its genus; for instance, when a man commits a theft in order to give alms. For an action takes its species from its object, as stated above (*Aa. 2,6*). But it is impossible for a thing to be contained under another species, if this species be not contained under the proper species of that thing; because the same thing cannot be contained in different species that are not subordinate to one another. Therefore the species which is taken from the end, is contained under the species which is taken from the object.

Objection 2. Further, the last difference always constitutes the most specific species. But the difference derived from the end seems to come after the difference derived from the object: because the end is something last. Therefore the species derived from the end, is contained under the species derived from the object, as its most specific species.

Objection 3. Further, the more formal a difference is compared to genus, as form to matter. But the species derived from the end, is more formal than that which is derived from the object, as stated above (*a. 6*). Therefore the species derived from the end is contained under the species derived from the object, as the most specific species is contained under the subaltern genus.

On the contrary, Each genus has its determinate differences. But an action of one same species on the part of its object, can be ordained to an infinite number of ends: for instance, theft can be ordained to an infinite number of good and bad ends. Therefore the species derived from the end is not contained under the species derived from the object, as under its genus.

I answer that, The object of the external act can stand in a twofold relation to the end of the will: first, as being of itself ordained thereto; thus to fight well is of itself ordained to victory; secondly, as being ordained thereto accidentally; thus to take what belongs to another is ordained accidentally to the giving of alms.

Now the differences that divide a genus, and constitute the species of that genus, must, as the Philosopher says (*Metaph. vii, 12*), divide that genus essentially: and if they divide it accidentally, the division is incorrect: as, if one were to say: "Animals are divided into rational and irrational; and the irrational into animals with wings, and animals without wings"; for "winged" and "wingless" are not essential determinations of the irrational being. But the following division would be correct: "Some animals have feet, some have no feet: and of those that have feet, some have two feet, some four, some many": because the latter division is an essential determination of the former. Accordingly when the object is not of itself ordained to the end, the specific difference derived from the object is not an essential determination of the species derived from the end, nor is the reverse the case. Wherefore one of these species is not under the other; but then the moral action is contained under two species that are disparate, as it were. Consequently we say that he that commits theft for the sake of adultery, is guilty of a twofold malice in one action. On the other hand, if the object be of itself ordained to the end, one of these differences is an essential determination of the other. Wherefore one of these species will be contained under the other.

It remains to be considered which of the two is contained under the other. In order to make this clear, we must first of all observe that the more particular the form is from which a difference is taken, the more specific is the difference. Secondly, that the more universal an agent is, the more universal a form does it cause. Thirdly, that the more remote an end is, the more universal the agent to which it corresponds; thus victory, which is the last end of the army, is the end intended by the commander in chief; while the right ordering of this or that regiment is the end intended by one of the lower officers. From all this it follows that the specific difference derived from the end, is more general; and that the difference derived from an object which of itself is ordained to that end, is a specific difference in relation

to the former. For the will, the proper object of which is the end, is the universal mover in respect of all the powers of the soul, the proper objects of which are the objects of their particular acts.

Reply to Objection 1. One and the same thing, considered in its substance, cannot be in two species, one of which is not subordinate to the other. But in respect of those things which are superadded to the substance, one thing can be contained under different species. Thus one and the same fruit, as to its color, is contained under one species, i.e. a white thing: and, as to its perfume, under the species of sweet-smelling things. In like manner an action which, as to its substance, is in one natural species, considered in respect to the moral conditions

that are added to it, can belong to two species, as stated above (q. 1, a. 3, ad 3).

Reply to Objection 2. The end is last in execution; but first in the intention of the reason, in regard to which moral actions receive their species.

Reply to Objection 3. Difference is compared to genus as form to matter, inasmuch as it actualizes the genus. On the other hand, the genus is considered as more formal than the species, inasmuch as it is something more absolute and less contracted. Wherefore also the parts of a definition are reduced to the genus of formal cause, as is stated in Phys. ii, 3. And in this sense the genus is the formal cause of the species; and so much the more formal, as it is more universal.

Whether any action is indifferent in its species?

Ia IIae q. 18 a. 8

Objection 1. It would seem that no action is indifferent in its species. For evil is the privation of good, according to Augustine (Enchiridion xi). But privation and habit are immediate contraries, according to the Philosopher (Categor. viii). Therefore there is not such thing as an action that is indifferent in its species, as though it were between good and evil.

Objection 2. Further, human actions derive their species from their end or object, as stated above (a. 6; q. 1, a. 3). But every end and every object is either good or bad. Therefore every human action is good or evil according to its species. None, therefore, is indifferent in its species.

Objection 3. Further, as stated above (a. 1), an action is said to be good, when it has its due complement of goodness; and evil, when it lacks that complement. But every action must needs either have the entire plenitude of its goodness, or lack it in some respect. Therefore every action must needs be either good or bad in its species, and none is indifferent.

On the contrary, Augustine says (De Serm. Dom. in Monte ii, 18) that “there are certain deeds of a middle kind, which can be done with a good or evil mind, of which it is rash to form a judgment.” Therefore some actions are indifferent according to their species.

I answer that, As stated above (Aa. 2,5), every action takes its species from its object; while human action, which is called moral, takes its species from the object, in relation to the principle of human actions, which is the reason. Wherefore if the object of an action includes something in accord with the order of reason, it will be a good action according to its species; for instance, to give alms to a person in want. On the other hand, if it includes something repugnant to the order of reason, it will be an evil act according to its species;

for instance, to steal, which is to appropriate what belongs to another. But it may happen that the object of an action does not include something pertaining to the order of reason; for instance, to pick up a straw from the ground, to walk in the fields, and the like: and such actions are indifferent according to their species.

Reply to Objection 1. Privation is twofold. One is privation “as a result” [privatum esse], and this leaves nothing, but takes all away: thus blindness takes away sight altogether; darkness, light; and death, life. Between this privation and the contrary habit, there can be no medium in respect of the proper subject. The other is privation “in process” [privari]: thus sickness is privation of health; not that it takes health away altogether, but that it is a kind of road to the entire loss of health, occasioned by death. And since this sort of privation leaves something, it is not always the immediate contrary of the opposite habit. In this way evil is a privation of good, as Simplicius says in his commentary on the Categories: because it does not take away all good, but leaves some. Consequently there can be something between good and evil.

Reply to Objection 2. Every object or end has some goodness or malice, at least natural to it: but this does not imply moral goodness or malice, which is considered in relation to the reason, as stated above. And it is of this that we are here treating.

Reply to Objection 3. Not everything belonging to an action belongs also to its species. Wherefore although an action’s specific nature may not contain all that belongs to the full complement of its goodness, it is not therefore an action specifically bad; nor is it specifically good. Thus a man in regard to his species is neither virtuous nor wicked.

Objection 1. It would seem that an individual action can be indifferent. For there is no species that does not, cannot, contain an individual. But an action can be indifferent in its species, as stated above (a. 8). Therefore an individual action can be indifferent.

Objection 2. Further, individual actions cause like habits, as stated in Ethic. ii, 1. But a habit can be indifferent: for the Philosopher says (Ethic. iv, 1) that those who are of an even temper and prodigal disposition are not evil; and yet it is evident that they are not good, since they depart from virtue; and thus they are indifferent in respect of a habit. Therefore some individual actions are indifferent.

Objection 3. Further, moral good belongs to virtue, while moral evil belongs to vice. But it happens sometimes that a man fails to ordain a specifically indifferent action to a vicious or virtuous end. Therefore an individual action may happen to be indifferent.

On the contrary, Gregory says in a homily (vi in Evang.): “An idle word is one that lacks either the usefulness of rectitude or the motive of just necessity or pious utility.” But an idle word is an evil, because “men... shall render an account of it in the day of judgment” (Mat. 12:36): while if it does not lack the motive of just necessity or pious utility, it is good. Therefore every word is either good or bad. For the same reason every other action is either good or bad. Therefore no individual action is indifferent.

I answer that, It sometimes happens that an action is indifferent in its species, but considered in the individual it is good or evil. And the reason of this is because a moral action, as stated above (a. 3), derives its goodness not only from its object, whence it takes its species; but also from the circumstances, which are its accidents, as it were; just as something belongs to a man by reason of his individual accidents, which does not belong to him by reason of his species. And every individual action must needs have some circumstance that makes it good or bad, at least in respect of the intention of the end. For since it belongs to the reason to direct; if an action that proceeds from deliberate reason be not directed to the due end, it is, by that fact alone, repugnant to reason, and has the character of evil. But if it be directed to a due end, it is in accord with reason; where-

fore it has the character of good. Now it must needs be either directed or not directed to a due end. Consequently every human action that proceeds from deliberate reason, if it be considered in the individual, must be good or bad.

If, however, it does not proceed from deliberate reason, but from some act of the imagination, as when a man strokes his beard, or moves his hand or foot; such an action, properly speaking, is not moral or human; since this depends on the reason. Hence it will be indifferent, as standing apart from the genus of moral actions.

Reply to Objection 1. For an action to be indifferent in its species can be understood in several ways. First in such a way that its species demands that it remain indifferent; and the objection proceeds along this line. But no action can be specifically indifferent thus: since no object of human action is such that it cannot be directed to good or evil, either through its end or through a circumstance. Secondly, specific indifference of an action may be due to the fact that as far as its species is concerned, it is neither good nor bad. Wherefore it can be made good or bad by something else. Thus man, as far as his species is concerned, is neither white nor black; nor is it a condition of his species that he should not be black or white; but blackness or whiteness is superadded to man by other principles than those of his species.

Reply to Objection 2. The Philosopher states that a man is evil, properly speaking, if he be hurtful to others. And accordingly, because he hurts none save himself. And the same applies to all others who are not hurtful to other men. But we say here that evil, in general, is all that is repugnant to right reason. And in this sense every individual action is either good or bad, as stated above.

Reply to Objection 3. Whenever an end is intended by deliberate reason, it belongs either to the good of some virtue, or to the evil of some vice. Thus, if a man's action is directed to the support or repose of his body, it is also directed to the good of virtue, provided he direct his body itself to the good of virtue. The same clearly applies to other actions.

Objection 1. It would seem that a circumstance cannot place a moral action in the species of good or evil. For the species of an action is taken from its object. But circumstances differ from the object. Therefore circumstances do not give an action its species.

Objection 2. Further, circumstances are as accidents in relation to the moral action, as stated above (q. 7, a. 1). But an accident does not constitute the

species. Therefore a circumstance does not constitute a species of good or evil.

Objection 3. Further, one thing is not in several species. But one action has several circumstances. Therefore a circumstance does not place a moral action in a species of good or evil.

On the contrary, Place is a circumstance. But place makes a moral action to be in a certain species of evil;

for theft of a thing from a holy place is a sacrilege. Therefore a circumstance makes a moral action to be specifically good or bad.

I answer that, Just as the species of natural things are constituted by their natural forms, so the species of moral actions are constituted by forms as conceived by the reason, as is evident from what was said above (a. 5). But since nature is determinate to one thing, nor can a process of nature go on to infinity, there must needs be some ultimate form, giving a specific difference, after which no further specific difference is possible. Hence it is that in natural things, that which is accidental to a thing, cannot be taken as a difference constituting the species. But the process of reason is not fixed to one particular term, for at any point it can still proceed further. And consequently that which, in one action, is taken as a circumstance added to the object that specifies the action, can again be taken by the directing reason, as the principal condition of the object that determines the action's species. Thus to appropriate another's property is specified by reason of the property being "another's," and in this respect it is placed in the species of theft; and if we consider that action also in its bearing on place or time, then this will be an additional circumstance. But since the reason can direct as to place, time, and the like, it may happen that the condition as to place, in relation to the object, is con-

sidered as being in disaccord with reason: for instance, reason forbids damage to be done to a holy place. Consequently to steal from a holy place has an additional repugnance to the order of reason. And thus place, which was first of all considered as a circumstance, is considered here as the principal condition of the object, and as itself repugnant to reason. And in this way, whenever a circumstance has a special relation to reason, either for or against, it must needs specify the moral action whether good or bad.

Reply to Objection 1. A circumstance, in so far as it specifies an action, is considered as a condition of the object, as stated above, and as being, as it were, a specific difference thereof.

Reply to Objection 2. A circumstance, so long as it is but a circumstance, does not specify an action, since thus it is a mere accident: but when it becomes a principal condition of the object, then it does specify the action.

Reply to Objection 3. It is not every circumstance that places the moral action in the species of good or evil; since not every circumstance implies accord or disaccord with reason. Consequently, although one action may have many circumstances, it does not follow that it is in many species. Nevertheless there is no reason why one action should not be in several, even disparate, moral species, as said above (a. 7, ad 1; q. 1, a. 3, ad 3).

Whether every circumstance that makes an action better or worse, places a moral action in a species of good or evil? Ia IIae q. 18 a. 11

Objection 1. It would seem that every circumstance relating to good or evil, specifies an action. For good and evil are specific differences of moral actions. Therefore that which causes a difference in the goodness or malice of a moral action, causes a specific difference, which is the same as to make it differ in species. Now that which makes an action better or worse, makes it differ in goodness and malice. Therefore it causes it to differ in species. Therefore every circumstance that makes an action better or worse, constitutes a species.

Objection 2. Further, an additional circumstance either has in itself the character of goodness or malice, or it has not. If not, it cannot make the action better or worse; because what is not good, cannot make a greater good; and what is not evil, cannot make a greater evil. But if it has in itself the character of good or evil, for this very reason it has a certain species of good or evil. Therefore every circumstance that makes an action better or worse, constitutes a new species of good or evil.

Objection 3. Further, according to Dionysius (Div. Nom. iv), "evil is caused by each single defect." Now every circumstance that increases malice, has a special defect. Therefore every such circumstance adds a new species of sin. And for the same reason, every circumstance that increases goodness, seems to add a new species of goodness: just as every unity added to a num-

ber makes a new species of number; since the good consists in "number, weight, and measure" (Ia, q. 5, a. 5).

On the contrary, More and less do not change a species. But more and less is a circumstance of additional goodness or malice. Therefore not every circumstance that makes a moral action better or worse, places it in a species of good or evil.

I answer that, As stated above (a. 10), a circumstance gives the species of good or evil to a moral action, in so far as it regards a special order of reason. Now it happens sometimes that a circumstance does not regard a special order of reason in respect of good or evil, except on the supposition of another previous circumstance, from which the moral action takes its species of good or evil. Thus to take something in a large or small quantity, does not regard the order of reason in respect of good or evil, except a certain other condition be presupposed, from which the action takes its malice or goodness; for instance, if what is taken belongs to another, which makes the action to be discordant with reason. Wherefore to take what belongs to another in a large or small quantity, does not change the species of the sin. Nevertheless it can aggravate or diminish the sin. The same applies to other evil or good actions. Consequently not every circumstance that makes a moral action better or worse, changes its

species.

Reply to Objection 1. In things which can be more or less intense, the difference of more or less does not change the species: thus by differing in whiteness through being more or less white a thing is not changed in regard to its species of color. In like manner that which makes an action to be more or less good or evil, does not make the action differ in species.

Reply to Objection 2. A circumstance that aggravates a sin, or adds to the goodness of an action, sometimes has no goodness or malice in itself, but in regard to some other condition of the action, as stated above.

Consequently it does not add a new species, but adds to the goodness or malice derived from this other condition of the action.

Reply to Objection 3. A circumstance does not always involve a distinct defect of its own; sometimes it causes a defect in reference to something else. In like manner a circumstance does not always add further perfection, except in reference to something else. And, for as much as it does, although it may add to the goodness or malice, it does not always change the species of good or evil.

Objection 1. It would seem that every human action is good, and that none is evil. For Dionysius says (Div. Nom. iv) that evil acts not, save in virtue of the good. But no evil is done in virtue of the good. Therefore no action is evil.

Objection 2. Further, nothing acts except in so far as it is in act. Now a thing is evil, not according as it is in act, but according as its potentiality is void of act; whereas in so far as its potentiality is perfected by act, it is good, as stated in *Metaph.* ix, 9. Therefore nothing acts in so far as it is evil, but only according as it is good. Therefore every action is good, and none is evil.

Objection 3. Further, evil cannot be a cause, save accidentally, as Dionysius declares (Div. Nom. iv). But every action has some effect which is proper to it. Therefore no action is evil, but every action is good.

On the contrary, Our Lord said (Jn. 3:20): “Every one that doth evil, hateth the light.” Therefore some actions of man are evil.

I answer that, We must speak of good and evil in actions as of good and evil in things: because such as everything is, such is the act that it produces. Now in things, each one has so much good as it has being: since good and being are convertible, as was stated in the Ia, q. 5, Aa. 1,3. But God alone has the whole plenitude of His Being in a certain unity: whereas every other thing has its proper fulness of being in a certain multiplicity. Wherefore it happens with some things, that they have being in some respect, and yet they are lacking in the fulness of being due to them. Thus the fulness of human being requires a compound of soul and body, having all the powers and instruments of knowledge and movement: wherefore if any man be lacking in any of these, he is lacking in something due to the fulness of his being. So that as much as he has of being, so much has he of goodness: while so far as he is lacking in goodness,

and is said to be evil: thus a blind man is possessed of goodness inasmuch as he lives; and of evil, inasmuch as he lacks sight. That, however, which has nothing of being or goodness, could not be said to be either evil or good. But since this same fulness of being is of the very essence of good, if a thing be lacking in its due fulness of being, it is not said to be good simply, but in a certain respect, inasmuch as it is a being; although it can be called a being simply, and a non-being in a certain respect, as was stated in the Ia, q. 5, a. 1, ad 1. We must therefore say that every action has goodness, in so far as it has being; whereas it is lacking in goodness, in so far as it is lacking in something that is due to its fulness of being; and thus it is said to be evil: for instance if it lacks the quantity determined by reason, or its due place, or something of the kind.

Reply to Objection 1. Evil acts in virtue of deficient goodness. For if there were nothing of good there, there would be neither being nor possibility of action. On the other hand if good were not deficient, there would be no evil. Consequently the action done is a deficient good, which is good in a certain respect, but simply evil.

Reply to Objection 2. Nothing hinders a thing from being in act in a certain respect, so that it can act; and in a certain respect deficient in act, so as to cause a deficient act. Thus a blind man has in act the power of walking, whereby he is able to walk; but inasmuch as he is deprived of sight he suffers a defect in walking by stumbling when he walks.

Reply to Objection 3. An evil action can have a proper effect, according to the goodness and being that it has. Thus adultery is the cause of human generation, inasmuch as it implies union of male and female, but not inasmuch as it lacks the order of reason.

Objection 1. It would seem that a circumstance cannot place a moral action in the species of good or evil. For the species of an action is taken from its object. But circumstances differ from the object. Therefore circumstances do not give an action its species.

Objection 2. Further, circumstances are as accidents in relation to the moral action, as stated above (q. 7, a. 1). But an accident does not constitute the species. Therefore a circumstance does not constitute a species of good or evil.

Objection 3. Further, one thing is not in several species. But one action has several circumstances. Therefore a circumstance does not place a moral action in a species of good or evil.

On the contrary, Place is a circumstance. But place makes a moral action to be in a certain species of evil; for theft of a thing from a holy place is a sacrilege. Therefore a circumstance makes a moral action to be specifically good or bad.

I answer that, Just as the species of natural things are constituted by their natural forms, so the species of moral actions are constituted by forms as conceived by the reason, as is evident from what was said above (a. 5). But since nature is determinate to one thing, nor can a process of nature go on to infinity, there must needs be some ultimate form, giving a specific difference, after which no further specific difference is possible. Hence it is that in natural things, that which is accidental to a thing, cannot be taken as a difference constituting the species. But the process of reason is not fixed to one particular term, for at any point it can still proceed further. And consequently that which, in one action, is taken as a circumstance added to the object that specifies the action, can again be taken by the directing reason, as the principal condition of the object that de-

termines the action's species. Thus to appropriate another's property is specified by reason of the property being "another's," and in this respect it is placed in the species of theft; and if we consider that action also in its bearing on place or time, then this will be an additional circumstance. But since the reason can direct as to place, time, and the like, it may happen that the condition as to place, in relation to the object, is considered as being in disaccord with reason: for instance, reason forbids damage to be done to a holy place. Consequently to steal from a holy place has an additional repugnance to the order of reason. And thus place, which was first of all considered as a circumstance, is considered here as the principal condition of the object, and as itself repugnant to reason. And in this way, whenever a circumstance has a special relation to reason, either for or against, it must needs specify the moral action whether good or bad.

Reply to Objection 1. A circumstance, in so far as it specifies an action, is considered as a condition of the object, as stated above, and as being, as it were, a specific difference thereof.

Reply to Objection 2. A circumstance, so long as it is but a circumstance, does not specify an action, since thus it is a mere accident: but when it becomes a principal condition of the object, then it does specify the action.

Reply to Objection 3. It is not every circumstance that places the moral action in the species of good or evil; since not every circumstance implies accord or disaccord with reason. Consequently, although one action may have many circumstances, it does not follow that it is in many species. Nevertheless there is no reason why one action should not be in several, even disparate, moral species, as said above (a. 7, ad 1; q. 1, a. 3, ad 3).

Objection 1. It would seem that every circumstance relating to good or evil, specifies an action. For good and evil are specific differences of moral actions. Therefore that which causes a difference in the goodness or malice of a moral action, causes a specific difference, which is the same as to make it differ in species. Now that which makes an action better or worse, makes it differ in goodness and malice. Therefore it causes it to differ in species. Therefore every circumstance that makes an action better or worse, constitutes a species.

Objection 2. Further, an additional circumstance either has in itself the character of goodness or malice, or it has not. If not, it cannot make the action better or worse; because what is not good, cannot make a greater good; and what is not evil, cannot make a greater evil. But if it has in itself the character of good or evil, for this very reason it has a certain species of good or evil. Therefore every circumstance that makes an action better or worse, constitutes a new species of good or evil.

Objection 3. Further, according to Dionysius (Div. Nom. iv), “evil is caused by each single defect.” Now every circumstance that increases malice, has a special defect. Therefore every such circumstance adds a new species of sin. And for the same reason, every circumstance that increases goodness, seems to add a new species of goodness: just as every unity added to a number makes a new species of number; since the good consists in “number, weight, and measure” (Ia, q. 5, a. 5).

On the contrary, More and less do not change a species. But more and less is a circumstance of additional goodness or malice. Therefore not every circumstance that makes a moral action better or worse, places it in a species of good or evil.

I answer that, As stated above (a. 10), a circumstance gives the species of good or evil to a moral action, in so far as it regards a special order of reason. Now it happens sometimes that a circumstance does not regard a special order of reason in respect of good

or evil, except on the supposition of another previous circumstance, from which the moral action takes its species of good or evil. Thus to take something in a large or small quantity, does not regard the order of reason in respect of good or evil, except a certain other condition be presupposed, from which the action takes its malice or goodness; for instance, if what is taken belongs to another, which makes the action to be discordant with reason. Wherefore to take what belongs to another in a large or small quantity, does not change the species of the sin. Nevertheless it can aggravate or diminish the sin. The same applies to other evil or good actions. Consequently not every circumstance that makes a moral action better or worse, changes its species.

Reply to Objection 1. In things which can be more or less intense, the difference of more or less does not change the species: thus by differing in whiteness through being more or less white a thing is not changed in regard to its species of color. In like manner that which makes an action to be more or less good or evil, does not make the action differ in species.

Reply to Objection 2. A circumstance that aggravates a sin, or adds to the goodness of an action, sometimes has no goodness or malice in itself, but in regard to some other condition of the action, as stated above. Consequently it does not add a new species, but adds to the goodness or malice derived from this other condition of the action.

Reply to Objection 3. A circumstance does not always involve a distinct defect of its own; sometimes it causes a defect in reference to something else. In like manner a circumstance does not always add further perfection, except in reference to something else. And, for as much as it does, although it may add to the goodness or malice, it does not always change the species of good or evil.

Objection 1. It would seem that the good or evil of an action is not derived from its object. For the object of any action is a thing. But "evil is not in things, but in the sinner's use of them," as Augustine says (*De Doctr. Christ.* iii, 12). Therefore the good or evil of a human action is not derived from their object.

Objection 2. Further, the object is compared to the action as its matter. But the goodness of a thing is not from its matter, but rather from the form, which is an act. Therefore good and evil in actions is not derived from their object.

Objection 3. Further, the object of an active power is compared to the action as effect to cause. But the goodness of a cause does not depend on its effect; rather is it the reverse. Therefore good or evil in actions is not derived from their object.

On the contrary, It is written (*Osee* 9:10): "They became abominable as those things which they loved." Now man becomes abominable to God on account of the malice of his action. Therefore the malice of his action is according to the evil objects that man loves. And the same applies to the goodness of his action.

I answer that, as stated above (a. 1) the good or evil of an action, as of other things, depends on its fulness of being or its lack of that fulness. Now the first thing that belongs to the fulness of being seems to be that which gives a thing its species. And just as a natural thing has its species from its form, so an action has its species from its object, as movement from its term. And therefore just as the primary goodness of a natural thing is derived from its form, which gives it its species, so the primary goodness of a moral action is derived from its suitable object: hence some call such an action "good in its genus"; for instance, "to make use of what is one's own." And just as, in natural things, the primary evil

is when a generated thing does not realize its specific form (for instance, if instead of a man, something else be generated); so the primary evil in moral actions is that which is from the object, for instance, "to take what belongs to another." And this action is said to be "evil in its genus," genus here standing for species, just as we apply the term "mankind" to the whole human species.

Reply to Objection 1. Although external things are good in themselves, nevertheless they have not always a due proportion to this or that action. And so, inasmuch as they are considered as objects of such actions, they have not the quality of goodness.

Reply to Objection 2. The object is not the matter "of which" (a thing is made), but the matter "about which" (something is done); and stands in relation to the act as its form, as it were, through giving it its species.

Reply to Objection 3. The object of the human action is not always the object of an active power. For the appetitive power is, in a way, passive; in so far as it is moved by the appetible object; and yet it is a principle of human actions. Nor again have the objects of the active powers always the nature of an effect, but only when they are already transformed: thus food when transformed is the effect of the nutritive power; whereas food before being transformed stands in relation to the nutritive power as the matter about which it exercises its operation. Now since the object is in some way the effect of the active power, it follows that it is the term of its action, and consequently that it gives it its form and species, since movement derives its species from its term. Moreover, although the goodness of an action is not caused by the goodness of its effect, yet an action is said to be good from the fact that it can produce a good effect. Consequently the very proportion of an action to its effect is the measure of its goodness.

Objection 1. It would seem that an action is not good or evil from a circumstance. For circumstances stand around [circumstant] an action, as being outside it, as stated above (q. 7, a. 1). But “good and evil are in things themselves,” as is stated in *Metaph.* vi, 4. Therefore an action does not derive goodness or malice from a circumstance.

Objection 2. Further, the goodness or malice of an action is considered principally in the doctrine of morals. But since circumstances are accidents of actions, it seems that they are outside the scope of art: because “no art takes notice of what is accidental” (*Metaph.* vi, 2). Therefore the goodness or malice of an action is not taken from a circumstance.

Objection 3. Further, that which belongs to a thing, in respect of its substance, is not ascribed to it in respect of an accident. But good and evil belong to an action in respect of its substance; because an action can be good or evil in its genus as stated above (a. 2). Therefore an action is not good or bad from a circumstance.

On the contrary, the Philosopher says (*Ethic.* ii, 3) that a virtuous man acts as he should, and when he should, and so on in respect of the other circumstances. Therefore, on the other hand, the vicious man, in the matter of each vice, acts when he should not, or where he should not, and so on with the other circumstances. Therefore human actions are good or evil according to circumstances.

I answer that, In natural things, it is to be noted that the whole fulness of perfection due to a thing, is not from the mere substantial form, that gives it its species; since a thing derives much from supervening accidents, as man does from shape, color, and the like; and if any one of these accidents be out of due proportion, evil is the result. So it is with action. For the plenitude of its goodness does not consist wholly in its species, but also in certain additions which accrue to it by reason of certain accidents: and such are its due circumstances. Wherefore if something be wanting that is requisite as a due circumstance the action will be evil.

Reply to Objection 1. Circumstances are outside an action, inasmuch as they are not part of its essence; but they are in an action as accidents thereof. Thus, too, accidents in natural substances are outside the essence.

Reply to Objection 2. Every accident is not accidentally in its subject; for some are proper accidents; and of these every art takes notice. And thus it is that the circumstances of actions are considered in the doctrine of morals.

Reply to Objection 3. Since good and being are convertible; according as being is predicated of substance and of accident, so is good predicated of a thing both in respect of its essential being, and in respect of its accidental being; and this, both in natural things and in moral actions.

Objection 1. It would seem that the good and evil in human actions are not from the end. For Dionysius says (Div. Nom. iv) that “nothing acts with a view to evil.” If therefore an action were good or evil from its end, no action would be evil. Which is clearly false.

Objection 2. Further, the goodness of an action is something in the action. But the end is an extrinsic cause. Therefore an action is not said to be good or bad according to its end.

Objection 3. Further, a good action may happen to be ordained to an evil end, as when a man gives an alms from vainglory; and conversely, an evil action may happen to be ordained to a good end, as a theft committed in order to give something to the poor. Therefore an action is not good or evil from its end.

On the contrary, Boethius says (De Differ. Topic. ii) that “if the end is good, the thing is good, and if the end be evil, the thing also is evil.”

I answer that, The disposition of things as to goodness is the same as their disposition as to being. Now in some things the being does not depend on another, and in these it suffices to consider their being absolutely. But there are things the being of which depends on something else, and hence in their regard we must consider their being in its relation to the cause on which it depends. Now just as the being of a thing depends on the agent, and the form, so the goodness of a thing depends on its end. Hence in the Divine Persons, Whose goodness does not depend on another, the measure of goodness is not taken from the end. Whereas human ac-

tions, and other things, the goodness of which depends on something else, have a measure of goodness from the end on which they depend, besides that goodness which is in them absolutely.

Accordingly a fourfold goodness may be considered in a human action. First, that which, as an action, it derives from its genus; because as much as it has of action and being so much has it of goodness, as stated above (a. 1). Secondly, it has goodness according to its species; which is derived from its suitable object. Thirdly, it has goodness from its circumstances, in respect, as it were, of its accidents. Fourthly, it has goodness from its end, to which it is compared as to the cause of its goodness.

Reply to Objection 1. The good in view of which one acts is not always a true good; but sometimes it is a true good, sometimes an apparent good. And in the latter event, an evil action results from the end in view.

Reply to Objection 2. Although the end is an extrinsic cause, nevertheless due proportion to the end, and relation to the end, are inherent to the action.

Reply to Objection 3. Nothing hinders an action that is good in one of the way mentioned above, from lacking goodness in another way. And thus it may happen that an action which is good in its species or in its circumstances is ordained to an evil end, or vice versa. However, an action is not good simply, unless it is good in all those ways: since “evil results from any single defect, but good from the complete cause,” as Dionysius says (Div. Nom. iv).

Objection 1. It would seem that good and evil in moral actions do not make a difference of species. For the existence of good and evil in actions is in conformity with their existence in things, as stated above (a. 1). But good and evil do not make a specific difference in things; for a good man is specifically the same as a bad man. Therefore neither do they make a specific difference in actions.

Objection 2. Further, since evil is a privation, it is a non-being. But non-being cannot be a difference, according to the Philosopher (Metaph. iii, 3). Since therefore the difference constitutes the species, it seems that an action is not constituted in a species through being evil. Consequently good and evil do not diversify the species of human actions.

Objection 3. Further, acts that differ in species produce different effects. But the same specific effect results from a good and from an evil action: thus a man is born of adulterous or of lawful wedlock. Therefore good and evil actions do not differ in species.

Objection 4. Further, actions are sometimes said to be good or bad from a circumstance, as stated above (a. 3). But since a circumstance is an accident, it does not give an action its species. Therefore human actions do not differ in species on account of their goodness or malice.

On the contrary, According to the Philosopher (Ethic ii. 1) “like habits produce like actions.” But a good and a bad habit differ in species, as liberality and prodigality. Therefore also good and bad actions differ in species.

I answer that, Every action derives its species from its object, as stated above (a. 2). Hence it follows that a difference of object causes a difference of species in actions. Now, it must be observed that a difference of objects causes a difference of species in actions, according as the latter are referred to one active principle, which does not cause a difference in actions, according as they are referred to another active principle. Because nothing accidental constitutes a species, but only that which is essential; and a difference of object may be essential in reference to one active principle, and accidental in reference to another. Thus to know color and to know sound, differ essentially in reference to sense, but not in

reference to the intellect.

Now in human actions, good and evil are predicated in reference to the reason; because as Dionysius says (Div. Nom. iv), “the good of man is to be in accordance with reason,” and evil is “to be against reason.” For that is good for a thing which suits it in regard to its form; and evil, that which is against the order of its form. It is therefore evident that the difference of good and evil considered in reference to the object is an essential difference in relation to reason; that is to say, according as the object is suitable or unsuitable to reason. Now certain actions are called human or moral, inasmuch as they proceed from the reason. Consequently it is evident that good and evil diversify the species in human actions; since essential differences cause a difference of species.

Reply to Objection 1. Even in natural things, good and evil, inasmuch as something is according to nature, and something against nature, diversify the natural species; for a dead body and a living body are not of the same species. In like manner, good, inasmuch as it is in accord with reason, and evil, inasmuch as it is against reason, diversify the moral species.

Reply to Objection 2. Evil implies privation, not absolute, but affecting some potentiality. For an action is said to be evil in its species, not because it has no object at all; but because it has an object in disaccord with reason, for instance, to appropriate another’s property. Wherefore in so far as the object is something positive, it can constitute the species of an evil act.

Reply to Objection 3. The conjugal act and adultery, as compared to reason, differ specifically and have effects specifically different; because the other deserves praise and reward, the other, blame and punishment. But as compared to the generative power, they do not differ in species; and thus they have one specific effect.

Reply to Objection 4. A circumstance is sometimes taken as the essential difference of the object, as compared to reason; and then it can specify a moral act. And it must needs be so whenever a circumstance transforms an action from good to evil; for a circumstance would not make an action evil, except through being repugnant to reason.

Objection 1. It would seem that the good and evil which are from the end do not diversify the species of actions. For actions derive their species from the object. But the end is altogether apart from the object. Therefore the good and evil which are from the end do not diversify the species of an action.

Objection 2. Further, that which is accidental does not constitute the species, as stated above (a. 5). But it is accidental to an action to be ordained to some particular end; for instance, to give alms from vainglory. Therefore actions are not diversified as to species, according to the good and evil which are from the end.

Objection 3. Further, acts that differ in species, can be ordained to the same end: thus to the end of vainglory, actions of various virtues and vices can be ordained. Therefore the good and evil which are taken from the end, do not diversify the species of action.

On the contrary, It has been shown above (q. 1, a. 3) that human actions derive their species from the end. Therefore good and evil in respect of the end diversify the species of actions.

I answer that, Certain actions are called human, inasmuch as they are voluntary, as stated above (q. 1, a. 1). Now, in a voluntary action, there is a twofold action, viz. the interior action of the will, and the external action: and each of these actions has its object. The end is properly the object of the interior act of the will:

while the object of the external action, is that on which the action is brought to bear. Therefore just as the external action takes its species from the object on which it bears; so the interior act of the will takes its species from the end, as from its own proper object.

Now that which is on the part of the will is formal in regard to that which is on the part of the external action: because the will uses the limbs to act as instruments; nor have external actions any measure of morality, save in so far as they are voluntary. Consequently the species of a human act is considered formally with regard to the end, but materially with regard to the object of the external action. Hence the Philosopher says (*Ethic. v, 2*) that “he who steals that he may commit adultery, is strictly speaking, more adulterer than thief.”

Reply to Objection 1. The end also has the character of an object, as stated above.

Reply to Objection 2. Although it is accidental to the external action to be ordained to some particular end, it is not accidental to the interior act of the will, which act is compared to the external act, as form to matter.

Reply to Objection 3. When many actions, differing in species, are ordained to the same end, there is indeed a diversity of species on the part of the external actions; but unity of species on the part of the internal action.

Objection 1. It would seem that the species of goodness derived from the end is contained under the species of goodness derived from the object, as a species is contained under its genus; for instance, when a man commits a theft in order to give alms. For an action takes its species from its object, as stated above (Aa. 2,6). But it is impossible for a thing to be contained under another species, if this species be not contained under the proper species of that thing; because the same thing cannot be contained in different species that are not subordinate to one another. Therefore the species which is taken from the end, is contained under the species which is taken from the object.

Objection 2. Further, the last difference always constitutes the most specific species. But the difference derived from the end seems to come after the difference derived from the object: because the end is something last. Therefore the species derived from the end, is contained under the species derived from the object, as its most specific species.

Objection 3. Further, the more formal a difference is compared to genus, as form to matter. But the species derived from the end, is more formal than that which is derived from the object, as stated above (a. 6). Therefore the species derived from the end is contained under the species derived from the object, as the most specific species is contained under the subaltern genus.

On the contrary, Each genus has its determinate differences. But an action of one same species on the part of its object, can be ordained to an infinite number of ends: for instance, theft can be ordained to an infinite number of good and bad ends. Therefore the species derived from the end is not contained under the species derived from the object, as under its genus.

I answer that, The object of the external act can stand in a twofold relation to the end of the will: first, as being of itself ordained thereto; thus to fight well is of itself ordained to victory; secondly, as being ordained thereto accidentally; thus to take what belongs to another is ordained accidentally to the giving of alms. Now the differences that divide a genus, and constitute the species of that genus, must, as the Philosopher says (Metaph. vii, 12), divide that genus essentially: and if they divide it accidentally, the division is incorrect: as, if one were to say: "Animals are divided into rational and irrational; and the irrational into animals with wings, and animals without wings"; for "winged" and "wingless" are not essential determinations of the irrational being. But the following division would be correct: "Some animals have feet, some have no feet: and of those that have feet, some have two feet, some four, some many": because the latter division is an essential determination of the former. Accordingly when the object is not of itself ordained to the end, the specific dif-

ference derived from the object is not an essential determination of the species derived from the end, nor is the reverse the case. Wherefore one of these species is not under the other; but then the moral action is contained under two species that are disparate, as it were. Consequently we say that he that commits theft for the sake of adultery, is guilty of a twofold malice in one action. On the other hand, if the object be of itself ordained to the end, one of these differences is an essential determination of the other. Wherefore one of these species will be contained under the other.

It remains to be considered which of the two is contained under the other. In order to make this clear, we must first of all observe that the more particular the form is from which a difference is taken, the more specific is the difference. Secondly, that the more universal an agent is, the more universal a form does it cause. Thirdly, that the more remote an end is, the more universal the agent to which it corresponds; thus victory, which is the last end of the army, is the end intended by the commander in chief; while the right ordering of this or that regiment is the end intended by one of the lower officers. From all this it follows that the specific difference derived from the end, is more general; and that the difference derived from an object which of itself is ordained to that end, is a specific difference in relation to the former. For the will, the proper object of which is the end, is the universal mover in respect of all the powers of the soul, the proper objects of which are the objects of their particular acts.

Reply to Objection 1. One and the same thing, considered in its substance, cannot be in two species, one of which is not subordinate to the other. But in respect of those things which are superadded to the substance, one thing can be contained under different species. Thus one and the same fruit, as to its color, is contained under one species, i.e. a white thing: and, as to its perfume, under the species of sweet-smelling things. In like manner an action which, as to its substance, is in one natural species, considered in respect to the moral conditions that are added to it, can belong to two species, as stated above (q. 1, a. 3, ad 3).

Reply to Objection 2. The end is last in execution; but first in the intention of the reason, in regard to which moral actions receive their species.

Reply to Objection 3. Difference is compared to genus as form to matter, inasmuch as it actualizes the genus. On the other hand, the genus is considered as more formal than the species, inasmuch as it is something more absolute and less contracted. Wherefore also the parts of a definition are reduced to the genus of formal cause, as is stated in Phys. ii, 3. And in this sense the genus is the formal cause of the species; and so much the more formal, as it is more universal.

Objection 1. It would seem that no action is indifferent in its species. For evil is the privation of good, according to Augustine (Enchiridion xi). But privation and habit are immediate contraries, according to the Philosopher (Categor. viii). Therefore there is not such thing as an action that is indifferent in its species, as though it were between good and evil.

Objection 2. Further, human actions derive their species from their end or object, as stated above (a. 6; q. 1, a. 3). But every end and every object is either good or bad. Therefore every human action is good or evil according to its species. None, therefore, is indifferent in its species.

Objection 3. Further, as stated above (a. 1), an action is said to be good, when it has its due complement of goodness; and evil, when it lacks that complement. But every action must needs either have the entire plenitude of its goodness, or lack it in some respect. Therefore every action must needs be either good or bad in its species, and none is indifferent.

On the contrary, Augustine says (De Serm. Dom. in Monte ii, 18) that “there are certain deeds of a middle kind, which can be done with a good or evil mind, of which it is rash to form a judgment.” Therefore some actions are indifferent according to their species.

I answer that, As stated above (Aa. 2,5), every action takes its species from its object; while human action, which is called moral, takes its species from the object, in relation to the principle of human actions, which is the reason. Wherefore if the object of an action includes something in accord with the order of reason, it will be a good action according to its species; for instance, to give alms to a person in want. On the other hand, if it includes something repugnant to the order of reason, it will be an evil act according to its species;

for instance, to steal, which is to appropriate what belongs to another. But it may happen that the object of an action does not include something pertaining to the order of reason; for instance, to pick up a straw from the ground, to walk in the fields, and the like: and such actions are indifferent according to their species.

Reply to Objection 1. Privation is twofold. One is privation “as a result” [privatum esse], and this leaves nothing, but takes all away: thus blindness takes away sight altogether; darkness, light; and death, life. Between this privation and the contrary habit, there can be no medium in respect of the proper subject. The other is privation “in process” [privari]: thus sickness is privation of health; not that it takes health away altogether, but that it is a kind of road to the entire loss of health, occasioned by death. And since this sort of privation leaves something, it is not always the immediate contrary of the opposite habit. In this way evil is a privation of good, as Simplicius says in his commentary on the Categories: because it does not take away all good, but leaves some. Consequently there can be something between good and evil.

Reply to Objection 2. Every object or end has some goodness or malice, at least natural to it: but this does not imply moral goodness or malice, which is considered in relation to the reason, as stated above. And it is of this that we are here treating.

Reply to Objection 3. Not everything belonging to an action belongs also to its species. Wherefore although an action’s specific nature may not contain all that belongs to the full complement of its goodness, it is not therefore an action specifically bad; nor is it specifically good. Thus a man in regard to his species is neither virtuous nor wicked.

Objection 1. It would seem that an individual action can be indifferent. For there is no species that does not, cannot, contain an individual. But an action can be indifferent in its species, as stated above (a. 8). Therefore an individual action can be indifferent.

Objection 2. Further, individual actions cause like habits, as stated in *Ethic.* ii, 1. But a habit can be indifferent: for the Philosopher says (*Ethic.* iv, 1) that those who are of an even temper and prodigal disposition are not evil; and yet it is evident that they are not good, since they depart from virtue; and thus they are indifferent in respect of a habit. Therefore some individual actions are indifferent.

Objection 3. Further, moral good belongs to virtue, while moral evil belongs to vice. But it happens sometimes that a man fails to ordain a specifically indifferent action to a vicious or virtuous end. Therefore an individual action may happen to be indifferent.

On the contrary, Gregory says in a homily (vi in *Evang.*): “An idle word is one that lacks either the usefulness of rectitude or the motive of just necessity or pious utility.” But an idle word is an evil, because “men... shall render an account of it in the day of judgment” (*Mat.* 12:36): while if it does not lack the motive of just necessity or pious utility, it is good. Therefore every word is either good or bad. For the same reason every other action is either good or bad. Therefore no individual action is indifferent.

I answer that, It sometimes happens that an action is indifferent in its species, but considered in the individual it is good or evil. And the reason of this is because a moral action, as stated above (a. 3), derives its goodness not only from its object, whence it takes its species; but also from the circumstances, which are its accidents, as it were; just as something belongs to a man by reason of his individual accidents, which does not belong to him by reason of his species. And every individual action must needs have some circumstance that makes it good or bad, at least in respect of the intention of the end. For since it belongs to the reason to direct; if an action that proceeds from deliberate reason be not directed to the due end, it is, by that fact alone, repugnant to reason, and has the character of evil. But if it be directed to a due end, it is in accord with reason; where-

fore it has the character of good. Now it must needs be either directed or not directed to a due end. Consequently every human action that proceeds from deliberate reason, if it be considered in the individual, must be good or bad.

If, however, it does not proceed from deliberate reason, but from some act of the imagination, as when a man strokes his beard, or moves his hand or foot; such an action, properly speaking, is not moral or human; since this depends on the reason. Hence it will be indifferent, as standing apart from the genus of moral actions.

Reply to Objection 1. For an action to be indifferent in its species can be understood in several ways. First in such a way that its species demands that it remain indifferent; and the objection proceeds along this line. But no action can be specifically indifferent thus: since no object of human action is such that it cannot be directed to good or evil, either through its end or through a circumstance. Secondly, specific indifference of an action may be due to the fact that as far as its species is concerned, it is neither good nor bad. Wherefore it can be made good or bad by something else. Thus man, as far as his species is concerned, is neither white nor black; nor is it a condition of his species that he should not be black or white; but blackness or whiteness is superadded to man by other principles than those of his species.

Reply to Objection 2. The Philosopher states that a man is evil, properly speaking, if he be hurtful to others. And accordingly, because he hurts none save himself. And the same applies to all others who are not hurtful to other men. But we say here that evil, in general, is all that is repugnant to right reason. And in this sense every individual action is either good or bad, as stated above.

Reply to Objection 3. Whenever an end is intended by deliberate reason, it belongs either to the good of some virtue, or to the evil of some vice. Thus, if a man's action is directed to the support or repose of his body, it is also directed to the good of virtue, provided he direct his body itself to the good of virtue. The same clearly applies to other actions.

FIRST PART OF THE SECOND PART, QUESTION 19

Of the Goodness and Malice of the Interior Act of the Will

(In Ten Articles)

We must now consider the goodness of the interior act of the will; under which head there are ten points of inquiry:

- (1) Whether the goodness of the will depends on the subject?
- (2) Whether it depends on the object alone?
- (3) Whether it depends on reason?
- (4) Whether it depends on the eternal law?
- (5) Whether erring reason binds?
- (6) Whether the will is evil if it follows the erring reason against the law of God?
- (7) Whether the goodness of the will in regard to the means, depends on the intention of the end?
- (8) Whether the degree of goodness or malice in the will depends on the degree of good or evil in the intention?
- (9) Whether the goodness of the will depends on its conformity to the Divine Will?
- (10) Whether it is necessary for the human will, in order to be good, to be conformed to the Divine Will, as regards the thing willed?

Whether the goodness of the will depends on the object?

Ia IIae q. 19 a. 1

Objection 1. It would seem that the goodness of the will does not depend on the object. For the will cannot be directed otherwise than to what is good: since “evil is outside the scope of the will,” as Dionysius says (Div. Nom. iv). If therefore the goodness of the will depended on the object, it would follow that every act of the will is good, and none bad.

Objection 2. Further, good is first of all in the end: wherefore the goodness of the end, as such, does not depend on any other. But, according to the Philosopher (Ethic. vi, 5), “goodness of action is the end, but goodness of making is never the end”: because the latter is always ordained to the thing made, as to its end. Therefore the goodness of the act of the will does not depend on any object.

Objection 3. Further, such as a thing is, such does it make a thing to be. But the object of the will is good, by reason of the goodness of nature. Therefore it cannot give moral goodness to the will. Therefore the moral goodness of the will does not depend on the object.

On the contrary, the Philosopher says (Ethic. v, 1) that justice is that habit “from which men wish for just things”: and accordingly, virtue is a habit from which men wish for good things. But a good will is one which is in accordance with virtue. Therefore the goodness of the will is from the fact that a man wills that which is

good.

I answer that, Good and evil are essential differences of the act of the will. Because good and evil of themselves regard the will; just as truth and falsehood regard reason; the act of which is divided essentially by the difference of truth and falsehood, for as much as an opinion is said to be true or false. Consequently good and evil will are acts differing in species. Now the specific difference in acts is according to objects, as stated above (q. 18, a. 5). Therefore good and evil in the acts of the will is derived properly from the objects.

Reply to Objection 1. The will is not always directed to what is truly good, but sometimes to the apparent good; which has indeed some measure of good, but not of a good that is simply suitable to be desired. Hence it is that the act of the will is not always good, but sometimes evil.

Reply to Objection 2. Although an action can, in a certain way, be man’s last end; nevertheless such action is not an act of the will, as stated above (q. 1, a. 1, ad 2).

Reply to Objection 3. Good is presented to the will as its object by the reason: and in so far as it is in accord with reason, it enters the moral order, and causes moral goodness in the act of the will: because the reason is the principle of human and moral acts, as stated above (q. 18, a. 5).

Whether the goodness of the will depends on the object alone?

Ia IIae q. 19 a. 2

Objection 1. It would seem that the goodness of the will does not depend on the object alone. For the end has a closer relationship to the will than to any other power. But the acts of the other powers derive goodness not only from the object but also from the end, as we

have shown above (q. 18, a. 4). Therefore the act also of the will derives goodness not only from the object but also from the end.

Objection 2. Further, the goodness of an action is derived not only from the object but also from the cir-

cumstances, as stated above (q. 18, a. 3). But according to the diversity of circumstances there may be diversity of goodness and malice in the act of the will: for instance, if a man will, when he ought, where he ought, as much as he ought, and how he ought, or if he will as he ought not. Therefore the goodness of the will depends not only on the object, but also on the circumstances.

Objection 3. Further, ignorance of circumstances excuses malice of the will, as stated above (q. 6, a. 8). But it would not be so, unless the goodness or malice of the will depended on the circumstances. Therefore the goodness and malice of the will depend on the circumstances, and not only on the object.

On the contrary, An action does not take its species from the circumstances as such, as stated above (q. 18, a. 10, ad 2). But good and evil are specific differences of the act of the will, as stated above (a. 1). Therefore the goodness and malice of the will depend, not on the circumstances, but on the object alone.

I answer that, In every genus, the more a thing is first, the more simple it is, and the fewer the principles of which it consists: thus primary bodies are simple. Hence it is to be observed that the first things in every genus, are, in some way, simple and consist of one principle. Now the principle of the goodness and malice of human actions is taken from the act of the will. Consequently the goodness and malice of the act of the will depend on some one thing; while the goodness and malice of other acts may depend on several things.

Now that one thing which is the principle in each genus, is not something accidental to that genus, but something essential thereto: because whatever is accidental is reduced to something essential, as to its principle. Therefore the goodness of the will's act depends

on that one thing alone, which of itself causes goodness in the act; and that one thing is the object, and not the circumstances, which are accidents, as it were, of the act.

Reply to Objection 1. The end is the object of the will, but not of the other powers. Hence, in regard to the act of the will, the goodness derived from the object, does not differ from that which is derived from the end, as they differ in the acts of the other powers; except perhaps accidentally, in so far as one end depends on another, and one act of the will on another.

Reply to Objection 2. Given that the act of the will is fixed on some good, no circumstances can make that act bad. Consequently when it is said that a man wills a good when he ought not, or where he ought not, this can be understood in two ways. First, so that this circumstance is referred to the thing willed. And thus the act of the will is not fixed on something good: since to will to do something when it ought not to be done, is not to will something good. Secondly, so that the circumstance is referred to the act of willing. And thus, it is impossible to will something good when one ought not to, because one ought always to will what is good: except, perhaps, accidentally, in so far as a man by willing some particular good, is prevented from willing at the same time another good which he ought to will at that time. And then evil results, not from his willing that particular good, but from his not willing the other. The same applies to the other circumstances.

Reply to Objection 3. Ignorance of circumstances excuses malice of the will, in so far as the circumstance affects the thing willed: that is to say, in so far as a man ignores the circumstances of the act which he wills.

Whether the goodness of the will depends on reason?

Ia IIae q. 19 a. 3

Objection 1. It would seem that the goodness of the will does not depend on reason. For what comes first does not depend on what follows. But the good belongs to the will before it belongs to reason, as is clear from what has been said above (q. 9, a. 1). Therefore the goodness of the will does not depend on reason.

Objection 2. Further, the Philosopher says (Ethic. vi, 2) that the goodness of the practical intellect is "a truth that is in conformity with right desire." But right desire is a good will. Therefore the goodness of the practical reason depends on the goodness of the will, rather than conversely.

Objection 3. Further, the mover does not depend on that which is moved, but vice versa. But the will moves the reason and the other powers, as stated above (q. 9, a. 1). Therefore the goodness of the will does not depend on reason.

On the contrary, Hilary says (De Trin. x): "It is an unruly will that persists in its desires in opposition to reason." But the goodness of the will consists in not be-

ing unruly. Therefore the goodness of the will depends on its being subject to reason.

I answer that, As stated above (Aa. 1,2), the goodness of the will depends properly on the object. Now the will's object is proposed to it by reason. Because the good understood is the proportionate object of the will; while sensitive or imaginary good is proportionate not to the will but to the sensitive appetite: since the will can tend to the universal good, which reason apprehends; whereas the sensitive appetite tends only to the particular good, apprehended by the sensitive power. Therefore the goodness of the will depends on reason, in the same way as it depends on the object.

Reply to Objection 1. The good considered as such, i.e. as appetible, pertains to the will before pertaining to the reason. But considered as true it pertains to the reason, before, under the aspect of goodness, pertaining to the will: because the will cannot desire a good that is not previously apprehended by reason.

Reply to Objection 2. The Philosopher speaks here

of the practical intellect, in so far as it counsels and reasons about the means: for in this respect it is perfected by prudence. Now in regard to the means, the rectitude of the reason depends on its conformity with the desire of a due end: nevertheless the very desire of the due end

presupposes on the part of reason a right apprehension of the end.

Reply to Objection 3. The will moves the reason in one way: the reason moves the will in another, viz. on the part of the object, as stated above (q. 9, a. 1).

Whether the goodness of the will depends on the eternal law?

Ia IIae q. 19 a. 4

Objection 1. It would seem that the goodness of the human will does not depend on the eternal law. Because to one thing there is one rule and one measure. But the rule of the human will, on which its goodness depends, is right reason. Therefore the goodness of the will does not depend on the eternal law.

Objection 2. Further, “a measure is homogeneous with the thing measured” (Metaph. x, 1). But the eternal law is not homogeneous with the human will. Therefore the eternal law cannot be the measure on which the goodness of the human will depends.

Objection 3. Further, a measure should be most certain. But the eternal law is unknown to us. Therefore it cannot be the measure on which the goodness of our will depends.

On the contrary, Augustine says (Contra Faust. xxii, 27) that “sin is a deed, word or desire against the eternal law.” But malice of the will is the root of sin. Therefore, since malice is contrary to goodness, the goodness of the will depends on the eternal law.

I answer that, Wherever a number of causes are subordinate to one another, the effect depends more on the first than on the second cause: since the second cause acts only in virtue of the first. Now it is from

the eternal law, which is the Divine Reason, that human reason is the rule of the human will, from which the human derives its goodness. Hence it is written (Ps. 4:6,7): “Many say: Who showeth us good things? The light of Thy countenance, O Lord, is signed upon us”: as though to say: “The light of our reason is able to show us good things, and guide our will, in so far as it is the light (i.e. derived from) Thy countenance.” It is therefore evident that the goodness of the human will depends on the eternal law much more than on human reason: and when human reason fails we must have recourse to the Eternal Reason.

Reply to Objection 1. To one thing there are not several proximate measures; but there can be several measures if one is subordinate to the other.

Reply to Objection 2. A proximate measure is homogeneous with the thing measured; a remote measure is not.

Reply to Objection 3. Although the eternal law is unknown to us according as it is in the Divine Mind: nevertheless, it becomes known to us somewhat, either by natural reason which is derived therefrom as its proper image; or by some sort of additional revelation.

Whether the will is evil when it is at variance with erring reason?

Ia IIae q. 19 a. 5

Objection 1. It would seem that the will is not evil when it is at variance with erring reason. Because the reason is the rule of the human will, in so far as it is derived from the eternal law, as stated above (a. 4). But erring reason is not derived from the eternal law. Therefore erring reason is not the rule of the human will. Therefore the will is not evil, if it be at variance with erring reason.

Objection 2. Further, according to Augustine, the command of a lower authority does not bind if it be contrary to the command of a higher authority: for instance, if a provincial governor command something that is forbidden by the emperor. But erring reason sometimes proposes what is against the command of a higher power, namely, God Whose power is supreme. Therefore the decision of an erring reason does not bind. Consequently the will is not evil if it be at variance with erring reason.

Objection 3. Further, every evil will is reducible to some species of malice. But the will that is at variance with erring reason is not reducible to some species of malice. For instance, if a man’s reason err in telling

him to commit fornication, his will is not willing to do so, cannot be reduced to any species of malice. Therefore the will is not evil when it is at variance with erring reason.

On the contrary, As stated in the Ia, q. 79, a. 13, conscience is nothing else than the application of knowledge to some action. Now knowledge is in the reason. Therefore when the will is at variance with erring reason, it is against conscience. But every such will is evil; for it is written (Rom. 14:23): “All that is not of faith”—i.e. all that is against conscience—“is sin.” Therefore the will is evil when it is at variance with erring reason.

I answer that, Since conscience is a kind of dictate of the reason (for it is an application of knowledge to action, as was stated in the Ia, q. 19, a. 13), to inquire whether the will is evil when it is at variance with erring reason, is the same as to inquire “whether an erring conscience binds.” On this matter, some distinguished three kinds of actions: for some are good generically; some are indifferent; some are evil generically. And they say that if reason or conscience tell us

to do something which is good generically, there is no error: and in like manner if it tell us not to do something which is evil generically; since it is the same reason that prescribes what is good and forbids what is evil. On the other hand if a man's reason or conscience tells him that he is bound by precept to do what is evil in itself; or that what is good in itself, is forbidden, then his reason or conscience errs. In like manner if a man's reason or conscience tell him, that what is indifferent in itself, for instance to raise a straw from the ground, is forbidden or commanded, his reason or conscience errs. They say, therefore, that reason or conscience when erring in matters of indifference, either by commanding or by forbidding them, binds: so that the will which is at variance with that erring reason is evil and sinful. But they say that when reason or conscience errs in commanding what is evil in itself, or in forbidding what is good in itself and necessary for salvation, it does not bind; wherefore in such cases the will which is at variance with erring reason or conscience is not evil.

But this is unreasonable. For in matters of indifference, the will that is at variance with erring reason or conscience, is evil in some way on account of the object, on which the goodness or malice of the will depends; not indeed on account of the object according as it is in its own nature; but according as it is accidentally apprehended by reason as something evil to do or to avoid. And since the object of the will is that which is proposed by the reason, as stated above (a. 3), from the very fact that a thing is proposed by the reason as being evil, the will by tending thereto becomes evil. And this is the case not only in indifferent matters, but also in those that are good or evil in themselves. For not only indifferent matters can receive the character of goodness or malice accidentally; but also that which is good, can receive the character of evil, or that which is evil, can receive the character of goodness, on account of the reason apprehending it as such. For instance, to refrain from fornication is good: yet the will does not tend to this good except in so far as it is proposed by the reason. If, therefore, the erring reason propose it as an evil, the will tends to it as to something evil. Consequently the

will is evil, because it wills evil, not indeed that which is evil in itself, but that which is evil accidentally, through being apprehended as such by the reason. In like manner, to believe in Christ is good in itself, and necessary for salvation: but the will does not tend thereto, except inasmuch as it is proposed by the reason. Consequently if it be proposed by the reason as something evil, the will tends to it as to something evil: not as if it were evil in itself, but because it is evil accidentally, through the apprehension of the reason. Hence the Philosopher says (Ethic. vii, 9) that "properly speaking the incontinent man is one who does not follow right reason; but accidentally, he is also one who does not follow false reason." We must therefore conclude that, absolutely speaking, every will at variance with reason, whether right or erring, is always evil.

Reply to Objection 1. Although the judgment of an erring reason is not derived from God, yet the erring reason puts forward its judgment as being true, and consequently as being derived from God, from Whom is all truth.

Reply to Objection 2. The saying of Augustine holds good when it is known that the inferior authority prescribes something contrary to the command of the higher authority. But if a man were to believe the command of the proconsul to be the command of the emperor, in scorning the command of the proconsul he would scorn the command of the emperor. In like manner if a man were to know that human reason was dictating something contrary to God's commandment, he would not be bound to abide by reason: but then reason would not be entirely erroneous. But when erring reason proposes something as being commanded by God, then to scorn the dictate of reason is to scorn the commandment of God.

Reply to Objection 3. Whenever reason apprehends something as evil, it apprehends it under some species of evil; for instance, as being something contrary to a divine precept, or as giving scandal, or for some such like reason. And then that evil is reduced to that species of malice.

Whether the will is good when it abides by erring reason?

Ia IIae q. 19 a. 6

Objection 1. It would seem that the will is good when it abides by erring reason. For just as the will, when at variance with the reason, tends to that which reason judges to be evil; so, when in accord with reason, it tends to what reason judges to be good. But the will is evil when it is at variance with reason, even when erring. Therefore even when it abides by erring reason, the will is good.

Objection 2. Further, the will is always good, when it abides by the commandment of God and the eternal law. But the eternal law and God's commandment are proposed to us by the apprehension of the reason, even

when it errs. Therefore the will is good, even when it abides by erring reason.

Objection 3. Further, the will is evil when it is at variance with erring reason. If, therefore, the will is evil also when it abides by erring reason, it seems that the will is always evil when in conjunction with erring reason: so that in such a case a man would be in a dilemma, and, of necessity, would sin: which is unreasonable. Therefore the will is good when it abides by erring reason.

On the contrary, The will of those who slew the apostles was evil. And yet it was in accord with the

erring reason, according to Jn. 16:2: “The hour cometh, that whosoever killeth you, will think that he doth a service to God.” Therefore the will can be evil, when it abides by erring reason.

I answer that, Whereas the previous question is the same as inquiring “whether an erring conscience binds”; so this question is the same as inquiring “whether an erring conscience excuses.” Now this question depends on what has been said above about ignorance. For it was said (q. 6, a. 8) that ignorance sometimes causes an act to be involuntary, and sometimes not. And since moral good and evil consist in action in so far as it is voluntary, as was stated above (a. 2); it is evident that when ignorance causes an act to be involuntary, it takes away the character of moral good and evil; but not, when it does not cause the act to be involuntary. Again, it has been stated above (q. 6, a. 8) that when ignorance is in any way willed, either directly or indirectly, it does not cause the act to be involuntary. And I call that ignorance “directly” voluntary, to which the act of the will tends: and that, “indirectly” voluntary, which is due to negligence, by reason of a man not wishing to know what he ought to know, as stated above (q. 6, a. 8).

If then reason or conscience err with an error that is involuntary, either directly, or through negligence, so that one errs about what one ought to know; then such an error of reason or conscience does not excuse the will, that abides by that erring reason or conscience, from being evil. But if the error arise from ignorance of some circumstance, and without any negligence, so that it cause the act to be involuntary, then that error of reason or conscience excuses the will, that abides by that erring reason, from being evil. For instance, if erring

reason tell a man that he should go to another man’s wife, the will that abides by that erring reason is evil; since this error arises from ignorance of the Divine Law, which he is bound to know. But if a man’s reason, errs in mistaking another for his wife, and if he wish to give her her right when she asks for it, his will is excused from being evil: because this error arises from ignorance of a circumstance, which ignorance excuses, and causes the act to be involuntary.

Reply to Objection 1. As Dionysius says (Div. Nom. iv), “good results from the entire cause, evil from each particular defect.” Consequently in order that the thing to which the will tends be called evil, it suffices, either that it be evil in itself, or that it be apprehended as evil. But in order for it to be good, it must be good in both ways.

Reply to Objection 2. The eternal law cannot err, but human reason can. Consequently the will that abides by human reason, is not always right, nor is it always in accord with the eternal law.

Reply to Objection 3. Just as in syllogistic arguments, granted one absurdity, others must needs follow; so in moral matters, given one absurdity, others must follow too. Thus suppose a man to seek vainglory, he will sin, whether he does his duty for vainglory or whether he omit to do it. Nor is he in a dilemma about the matter: because he can put aside his evil intention. In like manner, suppose a man’s reason or conscience to err through inexcusable ignorance, then evil must needs result in the will. Nor is this man in a dilemma: because he can lay aside his error, since his ignorance is vincible and voluntary.

Whether the goodness of the will, as regards the means, depends on the intention of the end? Ia IIae q. 19 a. 7

Objection 1. It would seem that the goodness of the will does not depend on the intention of the end. For it has been stated above (a. 2) that the goodness of the will depends on the object alone. But as regards the means, the object of the will is one thing, and the end intended is another. Therefore in such matters the goodness of the will does not depend on the intention of the end.

Objection 2. Further, to wish to keep God’s commandment, belongs to a good will. But this can be referred to an evil end, for instance, to vainglory or covetousness, by willing to obey God for the sake of temporal gain. Therefore the goodness of the will does not depend on the intention of the end.

Objection 3. Further, just as good and evil diversify the will, so do they diversify the end. But malice of the will does not depend on the malice of the end intended; since a man who wills to steal in order to give alms, has an evil will, although he intends a good end. Therefore neither does the goodness of the will depend on the goodness of the end intended.

On the contrary, Augustine says (Confess. ix, 3) that God rewards the intention. But God rewards a thing because it is good. Therefore the goodness of the will depends on the intention of the end.

I answer that, The intention may stand in a twofold relation to the act of the will; first, as preceding it, secondly as following* it. The intention precedes the act of the will causally, when we will something because we intend a certain end. And then the order to the end is considered as the reason of the goodness of the thing willed: for instance, when a man wills to fast for God’s sake; because the act of fasting is specifically good from the very fact that it is done for God’s sake. Wherefore, since the goodness of the will depends on the goodness of the thing willed, as stated above (Aa. 1,2), it must, of necessity, depend on the intention of the end.

On the other hand, intention follows the act of the will, when it is added to a preceding act of the will; for instance, a man may will to do something, and may afterwards refer it to God. And then the goodness of the

* Leonine edn.: ‘accompanying’

previous act of the will does not depend on the subsequent intention, except in so far as that act is repeated with the subsequent intention.

Reply to Objection 1. When the intention is the cause of the act of willing, the order to the end is considered as the reason of the goodness of the object, as stated above.

Reply to Objection 2. The act of the will cannot be said to be good, if an evil intention is the cause of willing. For when a man wills to give an alms for the sake of vainglory, he wills that which is good in itself, under a species of evil; and therefore, as willed by him, it is evil. Wherefore his will is evil. If, however, the inten-

tion is subsequent to the act of the will, then the latter may be good: and the intention does not spoil that act of the will which preceded, but that which is repeated.

Reply to Objection 3. As we have already stated (a. 6, ad 1), “evil results from each particular defect, but good from the whole and entire cause.” Hence, whether the will tend to what is evil in itself, even under the species of good; or to the good under the species of evil, it will be evil in either case. But in order for the will to be good, it must tend to the good under the species of good; in other words, it must will the good for the sake of the good.

Whether the degree of goodness or malice in the will depends on the degree of good or evil in the intention? Ia IIae q. 19 a. 8

Objection 1. It would seem that the degree of goodness in the will depends on the degree of good in the intention. Because on Mat. 12:35, “A good man out of the good treasure of his heart bringeth forth that which is good,” a gloss says: “A man does as much good as he intends.” But the intention gives goodness not only to the external action, but also to the act of the will, as stated above (a. 7). Therefore the goodness of a man’s will is according to the goodness of his intention.

Objection 2. Further, if you add to the cause, you add to the effect. But the goodness of the intention is the cause of the good will. Therefore a man’s will is good, according as his intention is good.

Objection 3. Further, in evil actions, a man sins in proportion to his intention: for if a man were to throw a stone with a murderous intention, he would be guilty of murder. Therefore, for the same reason, in good actions, the will is good in proportion to the good intended.

On the contrary, The intention can be good, while the will is evil. Therefore, for the same reason, the intention can be better, and the will less good.

I answer that, In regard to both the act, and the intention of the end, we may consider a twofold quantity: one, on the part of the object, by reason of a man willing or doing a good that is greater; the other, taken from the intensity of the act, according as a man wills or acts intensely; and this is more on the part of the agent.

If then we speak of these respective quantities from the point of view of the object, it is evident that the quantity in the act does not depend on the quantity in the intention. With regard to the external act this may happen in two ways. First, through the object that is ordained to the intended end not being proportionate to that end; for instance, if a man were to give ten pounds, he could not realize his intention, if he intended to buy a thing worth a hundred pounds. Secondly, on account of the obstacles that may supervene in regard to the exterior action, which obstacles we are unable to remove: for instance, a man intends to go to Rome, and encounters obstacles, which prevent him from going. On the other hand, with regard to the interior act of the will,

this happens in only one way: because the interior acts of the will are in our power, whereas the external actions are not. But the will can will an object that is not proportionate to the intended end: and thus the will that tends to that object considered absolutely, is not so good as the intention. Yet because the intention also belongs, in a way, to the act of the will, inasmuch, to wit, as it is the reason thereof; it comes to pass that the quantity of goodness in the intention redounds upon the act of the will; that is to say, in so far as the will wills some great good for an end, although that by which it wills to gain so great a good, is not proportionate to that good.

But if we consider the quantity in the intention and in the act, according to their respective intensity, then the intensity of the intention redounds upon the interior act and the exterior act of the will: since the intention stands in relation to them as a kind of form, as is clear from what has been said above (q. 12, a. 4; q. 18, a. 6). And yet considered materially, while the intention is intense, the interior or exterior act may be not so intense, materially speaking: for instance, when a man does not will with as much intensity to take medicine as he wills to regain health. Nevertheless the very fact of intending health intensely, redounds, as a formal principle, upon the intense volition of medicine.

We must observe, however, that the intensity of the interior or exterior act, may be referred to the intention as its object: as when a man intends to will intensely, or to do something intensely. And yet it does not follow that he wills or acts intensely; because the quantity of goodness in the interior or exterior act does not depend on the quantity of the good intended, as is shown above. And hence it is that a man does not merit as much as he intends to merit: because the quantity of merit is measured by the intensity of the act, as we shall show later on (q. 20, a. 4; q. 114, a. 4).

Reply to Objection 1. This gloss speaks of good as in the estimation of God, Who considers principally the intention of the end. Wherefore another gloss says on the same passage that “the treasure of the heart is the intention, according to which God judges our works.” For

the goodness of the intention, as stated above, redounds, so to speak, upon the goodness of the will, which makes even the external act to be meritorious in God's sight.

Reply to Objection 2. The goodness of the intention is not the whole cause of a good will. Hence the argument does not prove.

Reply to Objection 3. The mere malice of the intention suffices to make the will evil: and therefore too, the will is as evil as the intention is evil. But the same reasoning does not apply to goodness, as stated above (ad 2).

Whether the goodness of the will depends on its conformity to the Divine will?

Ia IIae q. 19 a. 9

Objection 1. It would seem that the goodness of the human will does not depend on its conformity to the Divine will. Because it is impossible for man's will to be conformed to the Divine will; as appears from the word of Isa. 55:9: "As the heavens are exalted above the earth, so are My ways exalted above your ways, and My thoughts above your thoughts." If therefore goodness of the will depended on its conformity to the Divine will, it would follow that it is impossible for man's will to be good. Which is inadmissible.

Objection 2. Further, just as our wills arise from the Divine will, so does our knowledge flow from the Divine knowledge. But our knowledge does not require to be conformed to God's knowledge; since God knows many things that we know not. Therefore there is no need for our will to be conformed to the Divine will.

Objection 3. Further, the will is a principle of action. But our action cannot be conformed to God's. Therefore neither can our will be conformed to His.

On the contrary, It is written (Mat. 26:39): "Not as I will, but as Thou wilt": which words He said, because "He wishes man to be upright and to tend to God," as Augustine expounds in the *Enchiridion**. But the rectitude of the will is its goodness. Therefore the goodness

of the will depends on its conformity to the Divine will.

I answer that, As stated above (a. 7), the goodness of the will depends on the intention of the end. Now the last end of the human will is the Sovereign Good, namely, God, as stated above (q. 1, a. 8; q. 3, a. 1). Therefore the goodness of the human will requires it to be ordained to the Sovereign Good, that is, to God.

Now this Good is primarily and essentially compared to the Divine will, as its proper object. Again, that which is first in any genus is the measure and rule of all that belongs to that genus. Moreover, everything attains to rectitude and goodness, in so far as it is in accord with its proper measure. Therefore, in order that man's will be good it needs to be conformed to the Divine will.

Reply to Objection 1. The human will cannot be conformed to the will of God so as to equal it, but only so as to imitate it. In like manner human knowledge is conformed to the Divine knowledge, in so far as it knows truth: and human action is conformed to the Divine, in so far as it is becoming to the agent: and this by way of imitation, not by way of equality.

From the above may be gathered the replies to the Second and Third Objections.

Whether it is necessary for the human will, in order to be good, to be conformed to the Divine will, as regards the thing willed?

Ia IIae q. 19 a. 10

Objection 1. It would seem that the human will need not always be conformed to the Divine will, as regards the thing willed. For we cannot will what we know not: since the apprehended good is the object of the will. But in many things we know not what God wills. Therefore the human will cannot be conformed to the Divine will as to the thing willed.

Objection 2. Further, God wills to damn the man whom He foresees about to die in mortal sin. If therefore man were bound to conform his will to the Divine will, in the point of the thing willed, it would follow that a man is bound to will his own damnation. Which is inadmissible.

Objection 3. Further, no one is bound to will what is against filial piety. But if man were to will what God wills, this would sometimes be contrary to filial piety: for instance, when God wills the death of a father: if his son were to will it also, it would be against filial piety. Therefore man is not bound to conform his will to the

Divine will, as to the thing willed.

On the contrary, (1) On Ps. 32:1, "Praise cometh the upright," a gloss says: "That man has an upright heart, who wills what God wills." But everyone is bound to have an upright heart. Therefore everyone is bound to will what God wills.

(2) Moreover, the will takes its form from the object, as does every act. If therefore man is bound to conform his will to the Divine will, it follows that he is bound to conform it, as to the thing willed.

(3) Moreover, opposition of wills arises from men willing different things. But whoever has a will in opposition to the Divine will, has an evil will. Therefore whoever does not conform his will to the Divine will, as to the thing willed, has an evil will.

I answer that, As is evident from what has been said above (Aa. 3,5), the will tends to its object, according as it is proposed by the reason. Now a thing may be considered in various ways by the reason, so as to

* Enarr. in Ps. 32, serm. i.

appear good from one point of view, and not good from another point of view. And therefore if a man's will wills a thing to be, according as it appears to be good, his will is good: and the will of another man, who wills that thing not to be, according as it appears evil, is also good. Thus a judge has a good will, in willing a thief to be put to death, because this is just: while the will of another—e.g. the thief's wife or son, who wishes him not to be put to death, inasmuch as killing is a natural evil, is also good.

Now since the will follows the apprehension of the reason or intellect; the more universal the aspect of the apprehended good, the more universal the good to which the will tends. This is evident in the example given above: because the judge has care of the common good, which is justice, and therefore he wishes the thief's death, which has the aspect of good in relation to the common estate; whereas the thief's wife has to consider the private, the good of the family, and from this point of view she wishes her husband, the thief, not to be put to death. Now the good of the whole universe is that which is apprehended by God, Who is the Maker and Governor of all things: hence whatever He wills, He wills it under the aspect of the common good; this is His own Goodness, which is the good of the whole universe. On the other hand, the apprehension of a creature, according to its nature, is of some particular good, proportionate to that nature. Now a thing may happen to be good under a particular aspect, and yet not good under a universal aspect, or vice versa, as stated above. And therefore it comes to pass that a certain will is good from willing something considered under a particular aspect, which thing God wills not, under a universal aspect, and vice versa. And hence too it is, that various wills of various men can be good in respect of opposite things, for as much as, under various aspects, they wish a particular thing to be or not to be.

But a man's will is not right in willing a particular good, unless he refer it to the common good as an end: since even the natural appetite of each part is ordained to the common good of the whole. Now it is the end that supplies the formal reason, as it were, of willing whatever is directed to the end. Consequently, in order that a man will some particular good with a right will, he must will that particular good materially, and the Divine and universal good, formally. Therefore the human will is bound to be conformed to the Divine will, as to that which is willed formally, for it is bound to will the Divine and universal good; but not as to that which is willed materially, for the reason given above.

At the same time in both these respects, the human will is conformed to the Divine, in a certain degree. Because inasmuch as it is conformed to the Divine will in

the common aspect of the thing willed, it is conformed thereto in the point of the last end. While, inasmuch as it is not conformed to the Divine will in the thing willed materially, it is conformed to that will considered as efficient cause; since the proper inclination consequent to nature, or to the particular apprehension of some particular thing, comes to a thing from God as its efficient cause. Hence it is customary to say that a man's will, in this respect, is conformed to the Divine will, because it wills what God wishes him to will.

There is yet another kind of conformity in respect of the formal cause, consisting in man's willing something from charity, as God wills it. And this conformity is also reduced to the formal conformity, that is in respect of the last end, which is the proper object of charity.

Reply to Objection 1. We can know in a general way what God wills. For we know that whatever God wills, He wills it under the aspect of good. Consequently whoever wills a thing under any aspect of good, has a will conformed to the Divine will, as to the reason of the thing willed. But we know not what God wills in particular: and in this respect we are not bound to conform our will to the Divine will.

But in the state of glory, every one will see in each thing that he wills, the relation of that thing to what God wills in that particular matter. Consequently he will conform his will to God in all things not only formally, but also materially.

Reply to Objection 2. God does not will the damnation of a man, considered precisely as damnation, nor a man's death, considered precisely as death, because, "He wills all men to be saved" (1 Tim. 2:4); but He wills such things under the aspect of justice. Wherefore in regard to such things it suffices for man to will the upholding of God's justice and of the natural order.

Wherefore the reply to the Third Objection is evident.

To the first argument advanced in a contrary sense, it should be said that a man who conforms his will to God's, in the aspect of reason of the thing willed, wills what God wills, more than the man, who conforms his will to God's, in the point of the very thing willed; because the will tends more to the end, than to that which is on account of the end.

To the second, it must be replied that the species and form of an act are taken from the object considered formally, rather than from the object considered materially.

To the third, it must be said that there is no opposition of wills when several people desire different things, but not under the same aspect: but there is opposition of wills, when under one and the same aspect, one man wills a thing which another wills not. But there is no question of this here.

Objection 1. It would seem that the goodness of the will does not depend on the object. For the will cannot be directed otherwise than to what is good: since “evil is outside the scope of the will,” as Dionysius says (Div. Nom. iv). If therefore the goodness of the will depended on the object, it would follow that every act of the will is good, and none bad.

Objection 2. Further, good is first of all in the end: wherefore the goodness of the end, as such, does not depend on any other. But, according to the Philosopher (Ethic. vi, 5), “goodness of action is the end, but goodness of making is never the end”: because the latter is always ordained to the thing made, as to its end. Therefore the goodness of the act of the will does not depend on any object.

Objection 3. Further, such as a thing is, such does it make a thing to be. But the object of the will is good, by reason of the goodness of nature. Therefore it cannot give moral goodness to the will. Therefore the moral goodness of the will does not depend on the object.

On the contrary, the Philosopher says (Ethic. v, 1) that justice is that habit “from which men wish for just things”: and accordingly, virtue is a habit from which men wish for good things. But a good will is one which is in accordance with virtue. Therefore the goodness of the will is from the fact that a man wills that which is

good.

I answer that, Good and evil are essential differences of the act of the will. Because good and evil of themselves regard the will; just as truth and falsehood regard reason; the act of which is divided essentially by the difference of truth and falsehood, for as much as an opinion is said to be true or false. Consequently good and evil will are acts differing in species. Now the specific difference in acts is according to objects, as stated above (q. 18, a. 5). Therefore good and evil in the acts of the will is derived properly from the objects.

Reply to Objection 1. The will is not always directed to what is truly good, but sometimes to the apparent good; which has indeed some measure of good, but not of a good that is simply suitable to be desired. Hence it is that the act of the will is not always good, but sometimes evil.

Reply to Objection 2. Although an action can, in a certain way, be man’s last end; nevertheless such action is not an act of the will, as stated above (q. 1, a. 1, ad 2).

Reply to Objection 3. Good is presented to the will as its object by the reason: and in so far as it is in accord with reason, it enters the moral order, and causes moral goodness in the act of the will: because the reason is the principle of human and moral acts, as stated above (q. 18, a. 5).

Objection 1. It would seem that the human will need not always be conformed to the Divine will, as regards the thing willed. For we cannot will what we know not: since the apprehended good is the object of the will. But in many things we know not what God wills. Therefore the human will cannot be conformed to the Divine will as to the thing willed.

Objection 2. Further, God wills to damn the man whom He foresees about to die in mortal sin. If therefore man were bound to conform his will to the Divine will, in the point of the thing willed, it would follow that a man is bound to will his own damnation. Which is inadmissible.

Objection 3. Further, no one is bound to will what is against filial piety. But if man were to will what God wills, this would sometimes be contrary to filial piety: for instance, when God wills the death of a father: if his son were to will it also, it would be against filial piety. Therefore man is not bound to conform his will to the Divine will, as to the thing willed.

On the contrary, (1) On Ps. 32:1, "Praise becometh the upright," a gloss says: "That man has an upright heart, who wills what God wills." But everyone is bound to have an upright heart. Therefore everyone is bound to will what God wills.

(2) Moreover, the will takes its form from the object, as does every act. If therefore man is bound to conform his will to the Divine will, it follows that he is bound to conform it, as to the thing willed.

(3) Moreover, opposition of wills arises from men willing different things. But whoever has a will in opposition to the Divine will, has an evil will. Therefore whoever does not conform his will to the Divine will, as to the thing willed, has an evil will.

I answer that, As is evident from what has been said above (Aa. 3,5), the will tends to its object, according as it is proposed by the reason. Now a thing may be considered in various ways by the reason, so as to appear good from one point of view, and not good from another point of view. And therefore if a man's will wills a thing to be, according as it appears to be good, his will is good: and the will of another man, who wills that thing not to be, according as it appears evil, is also good. Thus a judge has a good will, in willing a thief to be put to death, because this is just: while the will of another—e.g. the thief's wife or son, who wishes him not to be put to death, inasmuch as killing is a natural evil, is also good.

Now since the will follows the apprehension of the reason or intellect; the more universal the aspect of the apprehended good, the more universal the good to which the will tends. This is evident in the example given above: because the judge has care of the common good, which is justice, and therefore he wishes the thief's death, which has the aspect of good in relation

to the common estate; whereas the thief's wife has to consider the private, the good of the family, and from this point of view she wishes her husband, the thief, not to be put to death. Now the good of the whole universe is that which is apprehended by God, Who is the Maker and Governor of all things: hence whatever He wills, He wills it under the aspect of the common good; this is His own Goodness, which is the good of the whole universe. On the other hand, the apprehension of a creature, according to its nature, is of some particular good, proportionate to that nature. Now a thing may happen to be good under a particular aspect, and yet not good under a universal aspect, or vice versa, as stated above. And therefore it comes to pass that a certain will is good from willing something considered under a particular aspect, which thing God wills not, under a universal aspect, and vice versa. And hence too it is, that various wills of various men can be good in respect of opposite things, for as much as, under various aspects, they wish a particular thing to be or not to be.

But a man's will is not right in willing a particular good, unless he refer it to the common good as an end: since even the natural appetite of each part is ordained to the common good of the whole. Now it is the end that supplies the formal reason, as it were, of willing whatever is directed to the end. Consequently, in order that a man will some particular good with a right will, he must will that particular good materially, and the Divine and universal good, formally. Therefore the human will is bound to be conformed to the Divine will, as to that which is willed formally, for it is bound to will the Divine and universal good; but not as to that which is willed materially, for the reason given above.

At the same time in both these respects, the human will is conformed to the Divine, in a certain degree. Because inasmuch as it is conformed to the Divine will in the common aspect of the thing willed, it is conformed thereto in the point of the last end. While, inasmuch as it is not conformed to the Divine will in the thing willed materially, it is conformed to that will considered as efficient cause; since the proper inclination consequent to nature, or to the particular apprehension of some particular thing, comes to a thing from God as its efficient cause. Hence it is customary to say that a man's will, in this respect, is conformed to the Divine will, because it wills what God wishes him to will.

There is yet another kind of conformity in respect of the formal cause, consisting in man's willing something from charity, as God wills it. And this conformity is also reduced to the formal conformity, that is in respect of the last end, which is the proper object of charity.

Reply to Objection 1. We can know in a general way what God wills. For we know that whatever God wills, He wills it under the aspect of good. Consequently whoever wills a thing under any aspect of good,

has a will conformed to the Divine will, as to the reason of the thing willed. But we know not what God wills in particular: and in this respect we are not bound to conform our will to the Divine will.

But in the state of glory, every one will see in each thing that he wills, the relation of that thing to what God wills in that particular matter. Consequently he will conform his will to God in all things not only formally, but also materially.

Reply to Objection 2. God does not will the damnation of a man, considered precisely as damnation, nor a man's death, considered precisely as death, because, "He wills all men to be saved" (1 Tim. 2:4); but He wills such things under the aspect of justice. Wherefore in regard to such things it suffices for man to will the upholding of God's justice and of the natural order.

Wherefore the reply to the Third Objection is evi-

dent.

To the first argument advanced in a contrary sense, it should be said that a man who conforms his will to God's, in the aspect of reason of the thing willed, wills what God wills, more than the man, who conforms his will to God's, in the point of the very thing willed; because the will tends more to the end, than to that which is on account of the end.

To the second, it must be replied that the species and form of an act are taken from the object considered formally, rather than from the object considered materially.

To the third, it must be said that there is no opposition of wills when several people desire different things, but not under the same aspect: but there is opposition of wills, when under one and the same aspect, one man wills a thing which another wills not. But there is no question of this here.

Objection 1. It would seem that the goodness of the will does not depend on the object alone. For the end has a closer relationship to the will than to any other power. But the acts of the other powers derive goodness not only from the object but also from the end, as we have shown above (q. 18, a. 4). Therefore the act also of the will derives goodness not only from the object but also from the end.

Objection 2. Further, the goodness of an action is derived not only from the object but also from the circumstances, as stated above (q. 18, a. 3). But according to the diversity of circumstances there may be diversity of goodness and malice in the act of the will: for instance, if a man will, when he ought, where he ought, as much as he ought, and how he ought, or if he will as he ought not. Therefore the goodness of the will depends not only on the object, but also on the circumstances.

Objection 3. Further, ignorance of circumstances excuses malice of the will, as stated above (q. 6, a. 8). But it would not be so, unless the goodness or malice of the will depended on the circumstances. Therefore the goodness and malice of the will depend on the circumstances, and not only on the object.

On the contrary, An action does not take its species from the circumstances as such, as stated above (q. 18, a. 10, ad 2). But good and evil are specific differences of the act of the will, as stated above (a. 1). Therefore the goodness and malice of the will depend, not on the circumstances, but on the object alone.

I answer that, In every genus, the more a thing is first, the more simple it is, and the fewer the principles of which it consists: thus primary bodies are simple. Hence it is to be observed that the first things in every genus, are, in some way, simple and consist of one principle. Now the principle of the goodness and malice of human actions is taken from the act of the will. Consequently the goodness and malice of the act of the will depend on some one thing; while the goodness and malice of other acts may depend on several things.

Now that one thing which is the principle in each genus, is not something accidental to that genus, but something essential thereto: because whatever is accidental is reduced to something essential, as to its principle. Therefore the goodness of the will's act depends on that one thing alone, which of itself causes goodness in the act; and that one thing is the object, and not the circumstances, which are accidents, as it were, of the act.

Reply to Objection 1. The end is the object of the will, but not of the other powers. Hence, in regard to the act of the will, the goodness derived from the object, does not differ from that which is derived from the end, as they differ in the acts of the other powers; except perhaps accidentally, in so far as one end depends on another, and one act of the will on another.

Reply to Objection 2. Given that the act of the will is fixed on some good, no circumstances can make that act bad. Consequently when it is said that a man wills a good when he ought not, or where he ought not, this can be understood in two ways. First, so that this circumstance is referred to the thing willed. And thus the act of the will is not fixed on something good: since to will to do something when it ought not to be done, is not to will something good. Secondly, so that the circumstance is referred to the act of willing. And thus, it is impossible to will something good when one ought not to, because one ought always to will what is good: except, perhaps, accidentally, in so far as a man by willing some particular good, is prevented from willing at the same time another good which he ought to will at that time. And then evil results, not from his willing that particular good, but from his not willing the other. The same applies to the other circumstances.

Reply to Objection 3. Ignorance of circumstances excuses malice of the will, in so far as the circumstance affects the thing willed: that is to say, in so far as a man ignores the circumstances of the act which he wills.

Objection 1. It would seem that the goodness of the will does not depend on reason. For what comes first does not depend on what follows. But the good belongs to the will before it belongs to reason, as is clear from what has been said above (q. 9, a. 1). Therefore the goodness of the will does not depend on reason.

Objection 2. Further, the Philosopher says (Ethic. vi, 2) that the goodness of the practical intellect is “a truth that is in conformity with right desire.” But right desire is a good will. Therefore the goodness of the practical reason depends on the goodness of the will, rather than conversely.

Objection 3. Further, the mover does not depend on that which is moved, but vice versa. But the will moves the reason and the other powers, as stated above (q. 9, a. 1). Therefore the goodness of the will does not depend on reason.

On the contrary, Hilary says (De Trin. x): “It is an unruly will that persists in its desires in opposition to reason.” But the goodness of the will consists in not being unruly. Therefore the goodness of the will depends on its being subject to reason.

I answer that, As stated above (Aa. 1,2), the goodness of the will depends properly on the object. Now the will’s object is proposed to it by reason. Because

the good understood is the proportionate object of the will; while sensitive or imaginary good is proportionate not to the will but to the sensitive appetite: since the will can tend to the universal good, which reason apprehends; whereas the sensitive appetite tends only to the particular good, apprehended by the sensitive power. Therefore the goodness of the will depends on reason, in the same way as it depends on the object.

Reply to Objection 1. The good considered as such, i.e. as appetible, pertains to the will before pertaining to the reason. But considered as true it pertains to the reason, before, under the aspect of goodness, pertaining to the will: because the will cannot desire a good that is not previously apprehended by reason.

Reply to Objection 2. The Philosopher speaks here of the practical intellect, in so far as it counsels and reasons about the means: for in this respect it is perfected by prudence. Now in regard to the means, the rectitude of the reason depends on its conformity with the desire of a due end: nevertheless the very desire of the due end presupposes on the part of reason a right apprehension of the end.

Reply to Objection 3. The will moves the reason in one way: the reason moves the will in another, viz. on the part of the object, as stated above (q. 9, a. 1).

Objection 1. It would seem that the goodness of the human will does not depend on the eternal law. Because to one thing there is one rule and one measure. But the rule of the human will, on which its goodness depends, is right reason. Therefore the goodness of the will does not depend on the eternal law.

Objection 2. Further, “a measure is homogeneous with the thing measured” (Metaph. x, 1). But the eternal law is not homogeneous with the human will. Therefore the eternal law cannot be the measure on which the goodness of the human will depends.

Objection 3. Further, a measure should be most certain. But the eternal law is unknown to us. Therefore it cannot be the measure on which the goodness of our will depends.

On the contrary, Augustine says (Contra Faust. xxii, 27) that “sin is a deed, word or desire against the eternal law.” But malice of the will is the root of sin. Therefore, since malice is contrary to goodness, the goodness of the will depends on the eternal law.

I answer that, Wherever a number of causes are subordinate to one another, the effect depends more on the first than on the second cause: since the second cause acts only in virtue of the first. Now it is from

the eternal law, which is the Divine Reason, that human reason is the rule of the human will, from which the human derives its goodness. Hence it is written (Ps. 4:6,7): “Many say: Who showeth us good things? The light of Thy countenance, O Lord, is signed upon us”: as though to say: “The light of our reason is able to show us good things, and guide our will, in so far as it is the light (i.e. derived from) Thy countenance.” It is therefore evident that the goodness of the human will depends on the eternal law much more than on human reason: and when human reason fails we must have recourse to the Eternal Reason.

Reply to Objection 1. To one thing there are not several proximate measures; but there can be several measures if one is subordinate to the other.

Reply to Objection 2. A proximate measure is homogeneous with the thing measured; a remote measure is not.

Reply to Objection 3. Although the eternal law is unknown to us according as it is in the Divine Mind: nevertheless, it becomes known to us somewhat, either by natural reason which is derived therefrom as its proper image; or by some sort of additional revelation.

Objection 1. It would seem that the will is not evil when it is at variance with erring reason. Because the reason is the rule of the human will, in so far as it is derived from the eternal law, as stated above (a. 4). But erring reason is not derived from the eternal law. Therefore erring reason is not the rule of the human will. Therefore the will is not evil, if it be at variance with erring reason.

Objection 2. Further, according to Augustine, the command of a lower authority does not bind if it be contrary to the command of a higher authority: for instance, if a provincial governor command something that is forbidden by the emperor. But erring reason sometimes proposes what is against the command of a higher power, namely, God Whose power is supreme. Therefore the decision of an erring reason does not bind. Consequently the will is not evil if it be at variance with erring reason.

Objection 3. Further, every evil will is reducible to some species of malice. But the will that is at variance with erring reason is not reducible to some species of malice. For instance, if a man's reason err in telling him to commit fornication, his will in not willing to do so, cannot be reduced to any species of malice. Therefore the will is not evil when it is at variance with erring reason.

On the contrary, As stated in the Ia, q. 79, a. 13, conscience is nothing else than the application of knowledge to some action. Now knowledge is in the reason. Therefore when the will is at variance with erring reason, it is against conscience. But every such will is evil; for it is written (Rom. 14:23): "All that is not of faith"—i.e. all that is against conscience—"is sin." Therefore the will is evil when it is at variance with erring reason.

I answer that, Since conscience is a kind of dictate of the reason (for it is an application of knowledge to action, as was stated in the Ia, q. 19, a. 13), to inquire whether the will is evil when it is at variance with erring reason, is the same as to inquire "whether an erring conscience binds." On this matter, some distinguished three kinds of actions: for some are good generically; some are indifferent; some are evil generically. And they say that if reason or conscience tell us to do something which is good generically, there is no error: and in like manner if it tell us not to do something which is evil generically; since it is the same reason that prescribes what is good and forbids what is evil. On the other hand if a man's reason or conscience tells him that he is bound by precept to do what is evil in itself; or that what is good in itself, is forbidden, then his reason or conscience errs. In like manner if a man's reason or conscience tell him, that what is indifferent in itself, for instance to raise a straw from the ground, is forbidden or commanded, his reason or conscience errs. They say, therefore, that reason or conscience when erring in mat-

ters of indifference, either by commanding or by forbidding them, binds: so that the will which is at variance with that erring reason is evil and sinful. But they say that when reason or conscience errs in commanding what is evil in itself, or in forbidding what is good in itself and necessary for salvation, it does not bind; wherefore in such cases the will which is at variance with erring reason or conscience is not evil.

But this is unreasonable. For in matters of indifference, the will that is at variance with erring reason or conscience, is evil in some way on account of the object, on which the goodness or malice of the will depends; not indeed on account of the object according as it is in its own nature; but according as it is accidentally apprehended by reason as something evil to do or to avoid. And since the object of the will is that which is proposed by the reason, as stated above (a. 3), from the very fact that a thing is proposed by the reason as being evil, the will by tending thereto becomes evil. And this is the case not only in indifferent matters, but also in those that are good or evil in themselves. For not only indifferent matters can receive the character of goodness or malice accidentally; but also that which is good, can receive the character of evil, or that which is evil, can receive the character of goodness, on account of the reason apprehending it as such. For instance, to refrain from fornication is good: yet the will does not tend to this good except in so far as it is proposed by the reason. If, therefore, the erring reason propose it as an evil, the will tends to it as to something evil. Consequently the will is evil, because it wills evil, not indeed that which is evil in itself, but that which is evil accidentally, through being apprehended as such by the reason. In like manner, to believe in Christ is good in itself, and necessary for salvation: but the will does not tend thereto, except inasmuch as it is proposed by the reason. Consequently if it be proposed by the reason as something evil, the will tends to it as to something evil: not as if it were evil in itself, but because it is evil accidentally, through the apprehension of the reason. Hence the Philosopher says (Ethic. vii, 9) that "properly speaking the incontinent man is one who does not follow right reason; but accidentally, he is also one who does not follow false reason." We must therefore conclude that, absolutely speaking, every will at variance with reason, whether right or erring, is always evil.

Reply to Objection 1. Although the judgment of an erring reason is not derived from God, yet the erring reason puts forward its judgment as being true, and consequently as being derived from God, from Whom is all truth.

Reply to Objection 2. The saying of Augustine holds good when it is known that the inferior authority prescribes something contrary to the command of the higher authority. But if a man were to believe the command of the proconsul to be the command of the

emperor, in scorning the command of the proconsul he would scorn the command of the emperor. In like manner if a man were to know that human reason was dictating something contrary to God's commandment, he would not be bound to abide by reason: but then reason would not be entirely erroneous. But when erring reason proposes something as being commanded by God, then to scorn the dictate of reason is to scorn the com-

mandment of God.

Reply to Objection 3. Whenever reason apprehends something as evil, it apprehends it under some species of evil; for instance, as being something contrary to a divine precept, or as giving scandal, or for some such like reason. And then that evil is reduced to that species of malice.

Objection 1. It would seem that the will is good when it abides by erring reason. For just as the will, when at variance with the reason, tends to that which reason judges to be evil; so, when in accord with reason, it tends to what reason judges to be good. But the will is evil when it is at variance with reason, even when erring. Therefore even when it abides by erring reason, the will is good.

Objection 2. Further, the will is always good, when it abides by the commandment of God and the eternal law. But the eternal law and God's commandment are proposed to us by the apprehension of the reason, even when it errs. Therefore the will is good, even when it abides by erring reason.

Objection 3. Further, the will is evil when it is at variance with erring reason. If, therefore, the will is evil also when it abides by erring reason, it seems that the will is always evil when in conjunction with erring reason: so that in such a case a man would be in a dilemma, and, of necessity, would sin: which is unreasonable. Therefore the will is good when it abides by erring reason.

On the contrary, The will of those who slew the apostles was evil. And yet it was in accord with the erring reason, according to Jn. 16:2: "The hour cometh, that whosoever killeth you, will think that he doth a service to God." Therefore the will can be evil, when it abides by erring reason.

I answer that, Whereas the previous question is the same as inquiring "whether an erring conscience binds"; so this question is the same as inquiring "whether an erring conscience excuses." Now this question depends on what has been said above about ignorance. For it was said (q. 6, a. 8) that ignorance sometimes causes an act to be involuntary, and sometimes not. And since moral good and evil consist in action in so far as it is voluntary, as was stated above (a. 2); it is evident that when ignorance causes an act to be involuntary, it takes away the character of moral good and evil; but not, when it does not cause the act to be involuntary. Again, it has been stated above (q. 6, a. 8) that when ignorance is in any way willed, either directly or indirectly, it does not cause the act to be involuntary. And I call that ignorance "directly" voluntary, to which the act of the will tends: and that, "indirectly" voluntary, which

is due to negligence, by reason of a man not wishing to know what he ought to know, as stated above (q. 6, a. 8).

If then reason or conscience err with an error that is involuntary, either directly, or through negligence, so that one errs about what one ought to know; then such an error of reason or conscience does not excuse the will, that abides by that erring reason or conscience, from being evil. But if the error arise from ignorance of some circumstance, and without any negligence, so that it cause the act to be involuntary, then that error of reason or conscience excuses the will, that abides by that erring reason, from being evil. For instance, if erring reason tell a man that he should go to another man's wife, the will that abides by that erring reason is evil; since this error arises from ignorance of the Divine Law, which he is bound to know. But if a man's reason, errs in mistaking another for his wife, and if he wish to give her her right when she asks for it, his will is excused from being evil: because this error arises from ignorance of a circumstance, which ignorance excuses, and causes the act to be involuntary.

Reply to Objection 1. As Dionysius says (Div. Nom. iv), "good results from the entire cause, evil from each particular defect." Consequently in order that the thing to which the will tends be called evil, it suffices, either that it be evil in itself, or that it be apprehended as evil. But in order for it to be good, it must be good in both ways.

Reply to Objection 2. The eternal law cannot err, but human reason can. Consequently the will that abides by human reason, is not always right, nor is it always in accord with the eternal law.

Reply to Objection 3. Just as in syllogistic arguments, granted one absurdity, others must needs follow; so in moral matters, given one absurdity, others must follow too. Thus suppose a man to seek vainglory, he will sin, whether he does his duty for vainglory or whether he omit to do it. Nor is he in a dilemma about the matter: because he can put aside his evil intention. In like manner, suppose a man's reason or conscience to err through inexcusable ignorance, then evil must needs result in the will. Nor is this man in a dilemma: because he can lay aside his error, since his ignorance is vincible and voluntary.

Objection 1. It would seem that the goodness of the will does not depend on the intention of the end. For it has been stated above (a. 2) that the goodness of the will depends on the object alone. But as regards the means, the object of the will is one thing, and the end intended is another. Therefore in such matters the goodness of the will does not depend on the intention of the end.

Objection 2. Further, to wish to keep God's commandment, belongs to a good will. But this can be referred to an evil end, for instance, to vainglory or covetousness, by willing to obey God for the sake of temporal gain. Therefore the goodness of the will does not depend on the intention of the end.

Objection 3. Further, just as good and evil diversify the will, so do they diversify the end. But malice of the will does not depend on the malice of the end intended; since a man who wills to steal in order to give alms, has an evil will, although he intends a good end. Therefore neither does the goodness of the will depend on the goodness of the end intended.

On the contrary, Augustine says (Confess. ix, 3) that God rewards the intention. But God rewards a thing because it is good. Therefore the goodness of the will depends on the intention of the end.

I answer that, The intention may stand in a twofold relation to the act of the will; first, as preceding it, secondly as following* it. The intention precedes the act of the will causally, when we will something because we intend a certain end. And then the order to the end is considered as the reason of the goodness of the thing willed: for instance, when a man wills to fast for God's sake; because the act of fasting is specifically good from the very fact that it is done for God's sake. Wherefore,

since the goodness of the will depends on the goodness of the thing willed, as stated above (Aa. 1,2), it must, of necessity, depend on the intention of the end.

On the other hand, intention follows the act of the will, when it is added to a preceding act of the will; for instance, a man may will to do something, and may afterwards refer it to God. And then the goodness of the previous act of the will does not depend on the subsequent intention, except in so far as that act is repeated with the subsequent intention.

Reply to Objection 1. When the intention is the cause of the act of willing, the order to the end is considered as the reason of the goodness of the object, as stated above.

Reply to Objection 2. The act of the will cannot be said to be good, if an evil intention is the cause of willing. For when a man wills to give an alms for the sake of vainglory, he wills that which is good in itself, under a species of evil; and therefore, as willed by him, it is evil. Wherefore his will is evil. If, however, the intention is subsequent to the act of the will, then the latter may be good: and the intention does not spoil that act of the will which preceded, but that which is repeated.

Reply to Objection 3. As we have already stated (a. 6, ad 1), "evil results from each particular defect, but good from the whole and entire cause." Hence, whether the will tend to what is evil in itself, even under the species of good; or to the good under the species of evil, it will be evil in either case. But in order for the will to be good, it must tend to the good under the species of good; in other words, it must will the good for the sake of the good.

* Leonine edn.: 'accompanying'

Objection 1. It would seem that the degree of goodness in the will depends on the degree of good in the intention. Because on Mat. 12:35, “A good man out of the good treasure of his heart bringeth forth that which is good,” a gloss says: “A man does as much good as he intends.” But the intention gives goodness not only to the external action, but also to the act of the will, as stated above (a. 7). Therefore the goodness of a man’s will is according to the goodness of his intention.

Objection 2. Further, if you add to the cause, you add to the effect. But the goodness of the intention is the cause of the good will. Therefore a man’s will is good, according as his intention is good.

Objection 3. Further, in evil actions, a man sins in proportion to his intention: for if a man were to throw a stone with a murderous intention, he would be guilty of murder. Therefore, for the same reason, in good actions, the will is good in proportion to the good intended.

On the contrary, The intention can be good, while the will is evil. Therefore, for the same reason, the intention can be better, and the will less good.

I answer that, In regard to both the act, and the intention of the end, we may consider a twofold quantity: one, on the part of the object, by reason of a man willing or doing a good that is greater; the other, taken from the intensity of the act, according as a man wills or acts intensely; and this is more on the part of the agent.

If then we speak of these respective quantities from the point of view of the object, it is evident that the quantity in the act does not depend on the quantity in the intention. With regard to the external act this may happen in two ways. First, through the object that is ordained to the intended end not being proportionate to that end; for instance, if a man were to give ten pounds, he could not realize his intention, if he intended to buy a thing worth a hundred pounds. Secondly, on account of the obstacles that may supervene in regard to the exterior action, which obstacles we are unable to remove: for instance, a man intends to go to Rome, and encounters obstacles, which prevent him from going. On the other hand, with regard to the interior act of the will, this happens in only one way: because the interior acts of the will are in our power, whereas the external actions are not. But the will can will an object that is not proportionate to the intended end: and thus the will that tends to that object considered absolutely, is not so good as the intention. Yet because the intention also belongs,

in a way, to the act of the will, inasmuch, to wit, as it is the reason thereof; it comes to pass that the quantity of goodness in the intention redounds upon the act of the will; that is to say, in so far as the will wills some great good for an end, although that by which it wills to gain so great a good, is not proportionate to that good.

But if we consider the quantity in the intention and in the act, according to their respective intensity, then the intensity of the intention redounds upon the interior act and the exterior act of the will: since the intention stands in relation to them as a kind of form, as is clear from what has been said above (q. 12, a. 4; q. 18, a. 6). And yet considered materially, while the intention is intense, the interior or exterior act may be not so intense, materially speaking: for instance, when a man does not will with as much intensity to take medicine as he wills to regain health. Nevertheless the very fact of intending health intensely, redounds, as a formal principle, upon the intense volition of medicine.

We must observe, however, that the intensity of the interior or exterior act, may be referred to the intention as its object: as when a man intends to will intensely, or to do something intensely. And yet it does not follow that he wills or acts intensely; because the quantity of goodness in the interior or exterior act does not depend on the quantity of the good intended, as is shown above. And hence it is that a man does not merit as much as he intends to merit: because the quantity of merit is measured by the intensity of the act, as we shall show later on (q. 20, a. 4; q. 114, a. 4).

Reply to Objection 1. This gloss speaks of good as in the estimation of God, Who considers principally the intention of the end. Wherefore another gloss says on the same passage that “the treasure of the heart is the intention, according to which God judges our works.” For the goodness of the intention, as stated above, redounds, so to speak, upon the goodness of the will, which makes even the external act to be meritorious in God’s sight.

Reply to Objection 2. The goodness of the intention is not the whole cause of a good will. Hence the argument does not prove.

Reply to Objection 3. The mere malice of the intention suffices to make the will evil: and therefore too, the will is as evil as the intention is evil. But the same reasoning does not apply to goodness, as stated above (ad 2).

Objection 1. It would seem that the goodness of the human will does not depend on its conformity to the Divine will. Because it is impossible for man's will to be conformed to the Divine will; as appears from the word of Isa. 55:9: "As the heavens are exalted above the earth, so are My ways exalted above your ways, and My thoughts above your thoughts." If therefore goodness of the will depended on its conformity to the Divine will, it would follow that it is impossible for man's will to be good. Which is inadmissible.

Objection 2. Further, just as our wills arise from the Divine will, so does our knowledge flow from the Divine knowledge. But our knowledge does not require to be conformed to God's knowledge; since God knows many things that we know not. Therefore there is no need for our will to be conformed to the Divine will.

Objection 3. Further, the will is a principle of action. But our action cannot be conformed to God's. Therefore neither can our will be conformed to His.

On the contrary, It is written (Mat. 26:39): "Not as I will, but as Thou wilt": which words He said, because "He wishes man to be upright and to tend to God," as Augustine expounds in the *Enchiridion**. But the rectitude of the will is its goodness. Therefore the goodness

of the will depends on its conformity to the Divine will.

I answer that, As stated above (a. 7), the goodness of the will depends on the intention of the end. Now the last end of the human will is the Sovereign Good, namely, God, as stated above (q. 1, a. 8; q. 3, a. 1). Therefore the goodness of the human will requires it to be ordained to the Sovereign Good, that is, to God.

Now this Good is primarily and essentially compared to the Divine will, as its proper object. Again, that which is first in any genus is the measure and rule of all that belongs to that genus. Moreover, everything attains to rectitude and goodness, in so far as it is in accord with its proper measure. Therefore, in order that man's will be good it needs to be conformed to the Divine will.

Reply to Objection 1. The human will cannot be conformed to the will of God so as to equal it, but only so as to imitate it. In like manner human knowledge is conformed to the Divine knowledge, in so far as it knows truth: and human action is conformed to the Divine, in so far as it is becoming to the agent: and this by way of imitation, not by way of equality.

From the above may be gathered the replies to the Second and Third Objections.

* Enarr. in Ps. 32, serm. i.

Objection 1. It would seem that it does not belong to man to act for an end. For a cause is naturally first. But an end, in its very name, implies something that is last. Therefore an end is not a cause. But that for which a man acts, is the cause of his action; since this preposition “for” indicates a relation of causality. Therefore it does not belong to man to act for an end.

Objection 2. Further, that which is itself the last end is not for an end. But in some cases the last end is an action, as the Philosopher states (Ethic. i, 1). Therefore man does not do everything for an end.

Objection 3. Further, then does a man seem to act for an end, when he acts deliberately. But man does many things without deliberation, sometimes not even thinking of what he is doing; for instance when one moves one’s foot or hand, or scratches one’s beard, while intent on something else. Therefore man does not do everything for an end.

On the contrary, All things contained in a genus are derived from the principle of that genus. Now the end is the principle in human operations, as the Philosopher states (Phys. ii, 9). Therefore it belongs to man to do everything for an end.

I answer that, Of actions done by man those alone are properly called “human,” which are proper to man as man. Now man differs from irrational animals in this, that he is master of his actions. Wherefore those actions alone are properly called human, of which man is master. Now man is master of his actions through his reason and will; whence, too, the free-will is defined as “the faculty and will of reason.” Therefore those actions are properly called human which proceed from a deliberate will. And if any other actions are found in man, they can

be called actions “of a man,” but not properly “human” actions, since they are not proper to man as man. Now it is clear that whatever actions proceed from a power, are caused by that power in accordance with the nature of its object. But the object of the will is the end and the good. Therefore all human actions must be for an end.

Reply to Objection 1. Although the end be last in the order of execution, yet it is first in the order of the agent’s intention. And it is this way that it is a cause.

Reply to Objection 2. If any human action be the last end, it must be voluntary, else it would not be human, as stated above. Now an action is voluntary in one of two ways: first, because it is commanded by the will, e.g. to walk, or to speak; secondly, because it is elicited by the will, for instance the very act of willing. Now it is impossible for the very act elicited by the will to be the last end. For the object of the will is the end, just as the object of sight is color: wherefore just as the first visible cannot be the act of seeing, because every act of seeing is directed to a visible object; so the first appetible, i.e. the end, cannot be the very act of willing. Consequently it follows that if a human action be the last end, it must be an action commanded by the will: so that there, some action of man, at least the act of willing, is for the end. Therefore whatever a man does, it is true to say that man acts for an end, even when he does that action in which the last end consists.

Reply to Objection 3. Such like actions are not properly human actions; since they do not proceed from deliberation of the reason, which is the proper principle of human actions. Therefore they have indeed an imaginary end, but not one that is fixed by reason.

Objection 1. It would seem that it is proper to the rational nature to act for an end. For man, to whom it belongs to act for an end, never acts for an unknown end. On the other hand, there are many things that have no knowledge of an end; either because they are altogether without knowledge, as insensible creatures: or because they do not apprehend the idea of an end as such, as irrational animals. Therefore it seems proper to the rational nature to act for an end.

Objection 2. Further, to act for an end is to order one's action to an end. But this is the work of reason. Therefore it does not belong to things that lack reason.

Objection 3. Further, the good and the end is the object of the will. But "the will is in the reason" (De Anima iii, 9). Therefore to act for an end belongs to none but a rational nature.

On the contrary, The Philosopher proves (Phys. ii, 5) that "not only mind but also nature acts for an end."

I answer that, Every agent, of necessity, acts for an end. For if, in a number of causes ordained to one another, the first be removed, the others must, of necessity, be removed also. Now the first of all causes is the final cause. The reason of which is that matter does not receive form, save in so far as it is moved by an agent; for nothing reduces itself from potentiality to act. But an agent does not move except out of intention for an end. For if the agent were not determinate to some particular effect, it would not do one thing rather than another: consequently in order that it produce a determinate effect, it must, of necessity, be determined to some certain one, which has the nature of an end. And just as this determination is effected, in the rational nature, by the "rational appetite," which is called the will; so, in other things, it is caused by their natural inclination, which is called the "natural appetite."

Nevertheless it must be observed that a thing tends to an end, by its action or movement, in two ways: first, as a thing, moving itself to the end, as man; secondly, as a thing moved by another to the end, as an arrow tends to a determinate end through being moved by the archer who directs his action to the end. Therefore those things that are possessed of reason, move themselves to an end;

because they have dominion over their actions through their free-will, which is the "faculty of will and reason." But those things that lack reason tend to an end, by natural inclination, as being moved by another and not by themselves; since they do not know the nature of an end as such, and consequently cannot ordain anything to an end, but can be ordained to an end only by another. For the entire irrational nature is in comparison to God as an instrument to the principal agent, as stated above (Ia, q. 22, a. 2, ad 4; Ia, q. 103, a. 1, ad 3). Consequently it is proper to the rational nature to tend to an end, as directing [agens] and leading itself to the end: whereas it is proper to the irrational nature to tend to an end, as directed or led by another, whether it apprehend the end, as do irrational animals, or do not apprehend it, as is the case of those things which are altogether void of knowledge.

Reply to Objection 1. When a man of himself acts for an end, he knows the end: but when he is directed or led by another, for instance, when he acts at another's command, or when he is moved under another's compulsion, it is not necessary that he should know the end. And it is thus with irrational creatures.

Reply to Objection 2. To ordain towards an end belongs to that which directs itself to an end: whereas to be ordained to an end belongs to that which is directed by another to an end. And this can belong to an irrational nature, but owing to some one possessed of reason.

Reply to Objection 3. The object of the will is the end and the good in universal. Consequently there can be no will in those things that lack reason and intellect, since they cannot apprehend the universal; but they have a natural appetite or a sensitive appetite, determinate to some particular good. Now it is clear that particular causes are moved by a universal cause: thus the governor of a city, who intends the common good, moves, by his command, all the particular departments of the city. Consequently all things that lack reason are, of necessity, moved to their particular ends by some rational will which extends to the universal good, namely by the Divine will.

Objection 1. It would seem that human acts are not specified by their end. For the end is an extrinsic cause. But everything is specified by an intrinsic principle. Therefore human acts are not specified by their end.

Objection 2. Further, that which gives a thing its species should exist before it. But the end comes into existence afterwards. Therefore a human act does not derive its species from the end.

Objection 3. Further, one thing cannot be in more than one species. But one and the same act may happen to be ordained to various ends. Therefore the end does not give the species to human acts.

On the contrary, Augustine says (*De Mor. Eccl. et Manich. ii, 13*): “According as their end is worthy of blame or praise so are our deeds worthy of blame or praise.”

I answer that Each thing receives its species in respect of an act and not in respect of potentiality; wherefore things composed of matter and form are established in their respective species by their own forms. And this is also to be observed in proper movements. For since movements are, in a way, divided into action and passion, each of these receives its species from an act; action indeed from the act which is the principle of acting, and passion from the act which is the terminus of the movement. Wherefore heating, as an action, is nothing else than a certain movement proceeding from heat, while heating as a passion is nothing else than a movement towards heat: and it is the definition that shows the specific nature. And either way, human acts, whether they be considered as actions, or as passions, receive their species from the end. For human acts can be considered in both ways, since man moves himself, and is moved by himself. Now it has been stated above (a. 1) that acts are called human, inasmuch as they proceed from a deliberate will. Now the object of the will is the good and the end. And hence it is clear that the principle of human acts, in so far as they are human, is the

end. In like manner it is their terminus: for the human act terminates at that which the will intends as the end; thus in natural agents the form of the thing generated is conformed to the form of the generator. And since, as Ambrose says (*Prolog. super Luc.*) “morality is said properly of man,” moral acts properly speaking receive their species from the end, for moral acts are the same as human acts.

Reply to Objection 1. The end is not altogether extrinsic to the act, because it is related to the act as principle or terminus; and thus it just this that is essential to an act, viz. to proceed from something, considered as action, and to proceed towards something, considered as passion.

Reply to Objection 2. The end, in so far as it pre-exists in the intention, pertains to the will, as stated above (a. 1, ad 1). And it is thus that it gives the species to the human or moral act.

Reply to Objection 3. One and the same act, in so far as it proceeds once from the agent, is ordained to but one proximate end, from which it has its species: but it can be ordained to several remote ends, of which one is the end of the other. It is possible, however, that an act which is one in respect of its natural species, be ordained to several ends of the will: thus this act “to kill a man,” which is but one act in respect of its natural species, can be ordained, as to an end, to the safeguarding of justice, and to the satisfying of anger: the result being that there would be several acts in different species of morality: since in one way there will be an act of virtue, in another, an act of vice. For a movement does not receive its species from that which is its terminus accidentally, but only from that which is its “per se” terminus. Now moral ends are accidental to a natural thing, and conversely the relation to a natural end is accidental to morality. Consequently there is no reason why acts which are the same considered in their natural species, should not be diverse, considered in their moral species, and conversely.

Objection 1. It would seem that there is no last end of human life, but that we proceed to infinity. For good is essentially diffusive, as Dionysius states (*Div. Nom.* iv). Consequently if that which proceeds from good is itself good, the latter must needs diffuse some other good: so that the diffusion of good goes on indefinitely. But good has the nature of an end. Therefore there is an indefinite series of ends.

Objection 2. Further, things pertaining to the reason can be multiplied to infinity: thus mathematical quantities have no limit. For the same reason the species of numbers are infinite, since, given any number, the reason can think of one yet greater. But desire of the end is consequent on the apprehension of the reason. Therefore it seems that there is also an infinite series of ends.

Objection 3. Further, the good and the end is the object of the will. But the will can react on itself an infinite number of times: for I can will something, and will to will it, and so on indefinitely. Therefore there is an infinite series of ends of the human will, and there is no last end of the human will.

On the contrary, The Philosopher says (*Metaph.* ii, 2) that “to suppose a thing to be indefinite is to deny that it is good.” But the good is that which has the nature of an end. Therefore it is contrary to the nature of an end to proceed indefinitely. Therefore it is necessary to fix one last end.

I answer that, Absolutely speaking, it is not possible to proceed indefinitely in the matter of ends, from any point of view. For in whatsoever things there is an essential order of one to another, if the first be removed, those that are ordained to the first, must of necessity be removed also. Wherefore the Philosopher proves (*Phys.* viii, 5) that we cannot proceed to infinitude in causes of movement, because then there would be no first mover, without which neither can the others move, since they move only through being moved by the first mover. Now there is to be observed a twofold order in ends—the order of intention and the order of execution: and in either of these orders there must be something first. For that which is first in the order of intention, is the principle, as it were, moving the appetite; consequently, if you remove this principle, there will be nothing to move the appetite. On the other hand, the principle in execution is that wherein operation has its beginning; and if this principle be taken away, no one will begin to work. Now the principle in the intention is the last end; while the principle in execution is the first of the things which are ordained to the end. Con-

sequently, on neither side is it possible to go to infinity since if there were no last end, nothing would be desired, nor would any action have its term, nor would the intention of the agent be at rest; while if there is no first thing among those that are ordained to the end, none would begin to work at anything, and counsel would have no term, but would continue indefinitely.

On the other hand, nothing hinders infinity from being in things that are ordained to one another not essentially but accidentally; for accidental causes are indeterminate. And in this way it happens that there is an accidental infinity of ends, and of things ordained to the end.

Reply to Objection 1. The very nature of good is that something flows from it, but not that it flows from something else. Since, therefore, good has the nature of end, and the first good is the last end, this argument does not prove that there is no last end; but that from the end, already supposed, we may proceed downwards indefinitely towards those things that are ordained to the end. And this would be true if we considered but the power of the First Good, which is infinite. But, since the First Good diffuses itself according to the intellect, to which it is proper to flow forth into its effects according to a certain fixed form; it follows that there is a certain measure to the flow of good things from the First Good from Which all other goods share the power of diffusion. Consequently the diffusion of goods does not proceed indefinitely but, as it is written (*Wis.* 11:21), God disposes all things “in number, weight and measure.”

Reply to Objection 2. In things which are of themselves, reason begins from principles that are known naturally, and advances to some term. Wherefore the Philosopher proves (*Poster.* i, 3) that there is no infinite process in demonstrations, because there we find a process of things having an essential, not an accidental, connection with one another. But in those things which are accidentally connected, nothing hinders the reason from proceeding indefinitely. Now it is accidental to a stated quantity or number, as such, that quantity or unity be added to it. Wherefore in such like things nothing hinders the reason from an indefinite process.

Reply to Objection 3. This multiplication of acts of the will reacting on itself, is accidental to the order of ends. This is clear from the fact that in regard to one and the same end, the will reacts on itself indifferently once or several times.

Objection 1. It would seem possible for one man's will to be directed at the same time to several things, as last ends. For Augustine says (De Civ. Dei xix, 1) that some held man's last end to consist in four things, viz. "in pleasure, repose, the gifts of nature, and virtue." But these are clearly more than one thing. Therefore one man can place the last end of his will in many things.

Objection 2. Further, things not in opposition to one another do not exclude one another. Now there are many things which are not in opposition to one another. Therefore the supposition that one thing is the last end of the will does not exclude others.

Objection 3. Further, by the fact that it places its last end in one thing, the will does not lose its freedom. But before it placed its last end in that thing, e.g. pleasure, it could place it in something else, e.g. riches. Therefore even after having placed his last end in pleasure, a man can at the same time place his last end in riches. Therefore it is possible for one man's will to be directed at the same time to several things, as last ends.

On the contrary, That in which a man rests as in his last end, is master of his affections, since he takes therefrom his entire rule of life. Hence of gluttons it is written (Phil. 3:19): "Whose god is their belly": viz. because they place their last end in the pleasures of the belly. Now according to Mat. 6:24, "No man can serve two masters," such, namely, as are not ordained to one another. Therefore it is impossible for one man to have several last ends not ordained to one another.

I answer that, It is impossible for one man's will to be directed at the same time to diverse things, as last ends. Three reasons may be assigned for this. First, because, since everything desires its own perfection, a man desires for his ultimate end, that which he desires as his perfect and crowning good. Hence Augustine (De Civ. Dei xix, 1): "In speaking of the end of good we mean now, not that it passes away so as to be no more, but that it is perfected so as to be complete." It is therefore necessary for the last end so to fill man's appetite,

that nothing is left besides it for man to desire. Which is not possible, if something else be required for his perfection. Consequently it is not possible for the appetite so to tend to two things, as though each were its perfect good.

The second reason is because, just as in the process of reasoning, the principle is that which is naturally known, so in the process of the rational appetite, i.e. the will, the principle needs to be that which is naturally desired. Now this must needs be one: since nature tends to one thing only. But the principle in the process of the rational appetite is the last end. Therefore that to which the will tends, as to its last end, is one.

The third reason is because, since voluntary actions receive their species from the end, as stated above (a. 3), they must needs receive their genus from the last end, which is common to them all: just as natural things are placed in a genus according to a common form. Since, then, all things that can be desired by the will, belong, as such, to one genus, the last end must needs be one. And all the more because in every genus there is one first principle; and the last end has the nature of a first principle, as stated above. Now as the last end of man, simply as man, is to the whole human race, so is the last end of any individual man to that individual. Therefore, just as of all men there is naturally one last end, so the will of an individual man must be fixed on one last end.

Reply to Objection 1. All these several objects were considered as one perfect good resulting therefrom, by those who placed in them the last end.

Reply to Objection 2. Although it is possible to find several things which are not in opposition to one another, yet it is contrary to a thing's perfect good, that anything besides be required for that thing's perfection.

Reply to Objection 3. The power of the will does not extend to making opposites exist at the same time. Which would be the case were it to tend to several diverse objects as last ends, as has been shown above (ad 2).

Objection 1. It would seem that man does not will all, whatsoever he wills, for the last end. For things ordained to the last end are said to be serious matter, as being useful. But jests are foreign to serious matter. Therefore what man does in jest, he ordains not to the last end.

Objection 2. Further, the Philosopher says at the beginning of his *Metaphysics* 1,[2] that speculative science is sought for its own sake. Now it cannot be said that each speculative science is the last end. Therefore man does not desire all, whatsoever he desires, for the last end.

Objection 3. Further, whosoever ordains something to an end, thinks of that end. But man does not always think of the last end in all that he desires or does. Therefore man neither desires nor does all for the last end.

On the contrary, Augustine says (*De Civ. Dei* xix, 1): “That is the end of our good, for the sake of which we love other things, whereas we love it for its own sake.”

I answer that, Man must, of necessity, desire all, whatsoever he desires, for the last end. This is evident for two reasons. First, because whatever man desires, he desires it under the aspect of good. And if he desire it, not as his perfect good, which is the last end, he must, of necessity, desire it as tending to the perfect good, because the beginning of anything is always or-

daind to its completion; as is clearly the case in effects both of nature and of art. Wherefore every beginning of perfection is ordained to complete perfection which is achieved through the last end. Secondly, because the last end stands in the same relation in moving the appetite, as the first mover in other movements. Now it is clear that secondary moving causes do not move save inasmuch as they are moved by the first mover. Therefore secondary objects of the appetite do not move the appetite, except as ordained to the first object of the appetite, which is the last end.

Reply to Objection 1. Actions done jestingly are not directed to any external end; but merely to the good of the jester, in so far as they afford him pleasure or relaxation. But man’s consummate good is his last end.

Reply to Objection 2. The same applies to speculative science; which is desired as the scientist’s good, included in complete and perfect good, which is the ultimate end.

Reply to Objection 3. One need not always be thinking of the last end, whenever one desires or does something: but the virtue of the first intention, which was in respect of the last end, remains in every desire directed to any object whatever, even though one’s thoughts be not actually directed to the last end. Thus while walking along the road one needs not to be thinking of the end at every step.

Objection 1. It would seem that all men have not the same last end. For before all else the unchangeable good seems to be the last end of man. But some turn away from the unchangeable good, by sinning. Therefore all men have not the same last end.

Objection 2. Further, man's entire life is ruled according to his last end. If, therefore, all men had the same last end, they would not have various pursuits in life. Which is evidently false.

Objection 3. Further, the end is the term of action. But actions are of individuals. Now although men agree in their specific nature, yet they differ in things pertaining to individuals. Therefore all men have not the same last end.

On the contrary, Augustine says (De Trin. xiii, 3) that all men agree in desiring the last end, which is happiness.

I answer that, We can speak of the last end in two ways: first, considering only the aspect of last end; secondly, considering the thing in which the aspect of last end is realized. So, then, as to the aspect of last end, all agree in desiring the last end: since all desire the fulfilment of their perfection, and it is precisely this fulfilment

in which the last end consists, as stated above (a. 5). But as to the thing in which this aspect is realized, all men are not agreed as to their last end: since some desire riches as their consummate good; some, pleasure; others, something else. Thus to every taste the sweet is pleasant but to some, the sweetness of wine is most pleasant, to others, the sweetness of honey, or of something similar. Yet that sweet is absolutely the best of all pleasant things, in which he who has the best taste takes most pleasure. In like manner that good is most complete which the man with well disposed affections desires for his last end.

Reply to Objection 1. Those who sin turn from that in which their last end really consists: but they do not turn away from the intention of the last end, which intention they mistakenly seek in other things.

Reply to Objection 2. Various pursuits in life are found among men by reason of the various things in which men seek to find their last end.

Reply to Objection 3. Although actions are of individuals, yet their first principle of action is nature, which tends to one thing, as stated above (a. 5).

Objection 1. It would seem that all other creatures concur in man's last end. For the end corresponds to the beginning. But man's beginning—i.e. God—is also the beginning of all else. Therefore all other things concur in man's last end.

Objection 2. Further, Dionysius says (Div. Nom. iv) that "God turns all things to Himself as to their last end." But He is also man's last end; because He alone is to be enjoyed by man, as Augustine says (De Doctr. Christ. i, 5,22). Therefore other things, too, concur in man's last end.

Objection 3. Further, man's last end is the object of the will. But the object of the will is the universal good, which is the end of all. Therefore other things, too, concur in man's last end.

On the contrary, man's last end is happiness; which all men desire, as Augustine says (De Trin. xiii, 3,4). But "happiness is not possible for animals bereft of reason," as Augustine says (QQ. 83, qu. 5). Therefore other things do not concur in man's last end.

I answer that, As the Philosopher says (Phys. ii,

2), the end is twofold—the end "for which" and the end "by which"; viz. the thing itself in which is found the aspect of good, and the use or acquisition of that thing. Thus we say that the end of the movement of a weighty body is either a lower place as "thing," or to be in a lower place, as "use"; and the end of the miser is money as "thing," or possession of money as "use."

If, therefore, we speak of man's last end as of the thing which is the end, thus all other things concur in man's last end, since God is the last end of man and of all other things. If, however, we speak of man's last end, as of the acquisition of the end, then irrational creatures do not concur with man in this end. For man and other rational creatures attain to their last end by knowing and loving God: this is not possible to other creatures, which acquire their last end, in so far as they share in the Divine likeness, inasmuch as they are, or live, or even know.

Hence it is evident how the objections are solved: since happiness means the acquisition of the last end.

FIRST PART OF THE SECOND PART, QUESTION 2

Of Those Things in Which Man's Happiness Consists

(In Eight Articles)

We have now to consider happiness: and (1) in what it consists; (2) what it is; (3) how we can obtain it. Concerning the first there are eight points of inquiry:

- (1) Whether happiness consists in wealth?
- (2) Whether in honor?
- (3) Whether in fame or glory?
- (4) Whether in power?
- (5) Whether in any good of the body?
- (6) Whether in pleasure?
- (7) Whether in any good of the soul?
- (8) Whether in any created good?

Whether man's happiness consists in wealth?

Ia IIae q. 2 a. 1

Objection 1. It would seem that man's happiness consists in wealth. For since happiness is man's last end, it must consist in that which has the greatest hold on man's affections. Now this is wealth: for it is written (Eccles. 10:19): "All things obey money." Therefore man's happiness consists in wealth.

Objection 2. Further, according to Boethius (De Consol. iii), happiness is "a state of life made perfect by the aggregate of all good things." Now money seems to be the means of possessing all things: for, as the Philosopher says (Ethic. v, 5), money was invented, that it might be a sort of guarantee for the acquisition of whatever man desires. Therefore happiness consists in wealth.

Objection 3. Further, since the desire for the sovereign good never fails, it seems to be infinite. But this is the case with riches more than anything else; since "a covetous man shall not be satisfied with riches" (Eccles. 5:9). Therefore happiness consists in wealth.

On the contrary, Man's good consists in retaining happiness rather than in spreading it. But as Boethius says (De Consol. ii), "wealth shines in giving rather than in hoarding: for the miser is hateful, whereas the generous man is applauded." Therefore man's happiness does not consist in wealth.

I answer that, It is impossible for man's happiness to consist in wealth. For wealth is twofold, as the Philosopher says (Polit. i, 3), viz. natural and artificial. Natural wealth is that which serves man as a remedy for his natural wants: such as food, drink, clothing, cars, dwellings, and such like, while artificial wealth is that which is not a direct help to nature, as money, but is invented by the art of man, for the convenience of exchange, and as a measure of things salable.

Now it is evident that man's happiness cannot consist in natural wealth. For wealth of this kind is sought for the sake of something else, viz. as a support of human nature: consequently it cannot be man's last end, rather is it ordained to man as to its end. Wherefore in

the order of nature, all such things are below man, and made for him, according to Ps. 8:8: "Thou hast subjected all things under his feet."

And as to artificial wealth, it is not sought save for the sake of natural wealth; since man would not seek it except because, by its means, he procures for himself the necessaries of life. Consequently much less can it be considered in the light of the last end. Therefore it is impossible for happiness, which is the last end of man, to consist in wealth.

Reply to Objection 1. All material things obey money, so far as the multitude of fools is concerned, who know no other than material goods, which can be obtained for money. But we should take our estimation of human goods not from the foolish but from the wise: just as it is for a person whose sense of taste is in good order, to judge whether a thing is palatable.

Reply to Objection 2. All things salable can be had for money: not so spiritual things, which cannot be sold. Hence it is written (Prov. 17:16): "What doth it avail a fool to have riches, seeing he cannot buy wisdom."

Reply to Objection 3. The desire for natural riches is not infinite: because they suffice for nature in a certain measure. But the desire for artificial wealth is infinite, for it is the servant of disordered concupiscence, which is not curbed, as the Philosopher makes clear (Polit. i, 3). Yet this desire for wealth is infinite otherwise than the desire for the sovereign good. For the more perfectly the sovereign good is possessed, the more it is loved, and other things despised: because the more we possess it, the more we know it. Hence it is written (Ecclus. 24:29): "They that eat me shall yet hunger." Whereas in the desire for wealth and for whatsoever temporal goods, the contrary is the case: for when we already possess them, we despise them, and seek others: which is the sense of Our Lord's words (Jn. 4:13): "Whosoever drinketh of this water," by which temporal goods are signified, "shall thirst again." The reason of this is that we realize more their insufficiency

when we possess them: and this very fact shows that they are imperfect, and the sovereign good does not consist therein.

Whether man's happiness consists in honors?

Ia IIae q. 2 a. 2

Objection 1. It would seem that man's happiness consists in honors. For happiness or bliss is "the reward of virtue," as the Philosopher says (Ethic. i, 9). But honor more than anything else seems to be that by which virtue is rewarded, as the Philosopher says (Ethic. iv, 3). Therefore happiness consists especially in honor.

Objection 2. Further, that which belongs to God and to persons of great excellence seems especially to be happiness, which is the perfect good. But that is honor, as the Philosopher says (Ethic. iv, 3). Moreover, the Apostle says (1 Tim. 1:17): "To... the only God be honor and glory." Therefore happiness consists in honor.

Objection 3. Further, that which man desires above all is happiness. But nothing seems more desirable to man than honor: since man suffers loss in all other things, lest he should suffer loss of honor. Therefore happiness consists in honor.

On the contrary, Happiness is in the happy. But honor is not in the honored, but rather in him who honors, and who offers deference to the person honored, as the Philosopher says (Ethic. i, 5). Therefore happiness does not consist in honor.

I answer that, It is impossible for happiness to consist in honor. For honor is given to a man on account

of some excellence in him; and consequently it is a sign and attestation of the excellence that is in the person honored. Now a man's excellence is in proportion, especially to his happiness, which is man's perfect good; and to its parts, i.e. those goods by which he has a certain share of happiness. And therefore honor can result from happiness, but happiness cannot principally consist therein.

Reply to Objection 1. As the Philosopher says (Ethic. i, 5), honor is not that reward of virtue, for which the virtuous work: but they receive honor from men by way of reward, "as from those who have nothing greater to offer." But virtue's true reward is happiness itself, for which the virtuous work: whereas if they worked for honor, it would no longer be a virtue, but ambition.

Reply to Objection 2. Honor is due to God and to persons of great excellence as a sign of attestation of excellence already existing: not that honor makes them excellent.

Reply to Objection 3. That man desires honor above all else, arises from his natural desire for happiness, from which honor results, as stated above. Wherefore man seeks to be honored especially by the wise, on whose judgment he believes himself to be excellent or happy.

Whether man's happiness consists in fame or glory?

Ia IIae q. 2 a. 3

Objection 1. It would seem that man's happiness consists in glory. For happiness seems to consist in that which is paid to the saints for the trials they have undergone in the world. But this is glory: for the Apostle says (Rom. 8:18): "The sufferings of this time are not worthy to be compared with the glory to come, that shall be revealed in us." Therefore happiness consists in glory.

Objection 2. Further, good is diffusive of itself, as stated by Dionysius (Div. Nom. iv). But man's good is spread abroad in the knowledge of others by glory more than by anything else: since, according to Ambrose*, glory consists "in being well known and praised." Therefore man's happiness consists in glory.

Objection 3. Further, happiness is the most enduring good. Now this seems to be fame or glory; because by this men attain to eternity after a fashion. Hence Boethius says (De Consol. ii): "You seem to beget unto yourselves eternity, when you think of your fame in future time." Therefore man's happiness consists in fame or glory.

On the contrary, Happiness is man's true good. But

it happens that fame or glory is false: for as Boethius says (De Consol. iii), "many owe their renown to the lying reports spread among the people. Can anything be more shameful? For those who receive false fame, must needs blush at their own praise." Therefore man's happiness does not consist in fame or glory.

I answer that, Man's happiness cannot consist in human fame or glory. For glory consists "in being well known and praised," as Ambrose† says. Now the thing known is related to human knowledge otherwise than to God's knowledge: for human knowledge is caused by the things known, whereas God's knowledge is the cause of the things known. Wherefore the perfection of human good, which is called happiness, cannot be caused by human knowledge: but rather human knowledge of another's happiness proceeds from, and, in a fashion, is caused by, human happiness itself, inchoate or perfect. Consequently man's happiness cannot consist in fame or glory. On the other hand, man's good depends on God's knowledge as its cause. And therefore man's beatitude depends, as on its cause, on the glory

* Augustine, Contra Maxim. Arian. ii. 13 † Augustine, Contra Maxim. Arian. ii, 13

which man has with God; according to Ps. 90:15,16: “I will deliver him, and I will glorify him; I will fill him with length of days, and I will show him my salvation.”

Furthermore, we must observe that human knowledge often fails, especially in contingent singulars, such as are human acts. For this reason human glory is frequently deceptive. But since God cannot be deceived, His glory is always true; hence it is written (2 Cor. 10:18): “He... is approved... whom God commendeth.”

Reply to Objection 1. The Apostle speaks, then, not of the glory which is with men, but of the glory which is from God, with His Angels. Hence it is written (Mk. 8:38): “The Son of Man shall confess him in the glory of His Father, before His angels”^{*}.

Reply to Objection 2. A man’s good which, through fame or glory, is in the knowledge of many, if this knowledge be true, must needs be derived from good existing in the man himself: and hence it presupposes perfect or inchoate happiness. But if the knowledge be false, it does not harmonize with the thing: and thus good does not exist in him who is looked upon as famous. Hence it follows that fame can nowise make man happy.

Reply to Objection 3. Fame has no stability; in fact, it is easily ruined by false report. And if sometimes it endures, this is by accident. But happiness endures of itself, and for ever.

Whether man’s happiness consists in power?

Ia IIae q. 2 a. 4

Objection 1. It would seem that happiness consists in power. For all things desire to become like to God, as to their last end and first beginning. But men who are in power, seem, on account of the similarity of power, to be most like to God: hence also in Scripture they are called “gods” (Ex. 22:28), “Thou shalt not speak ill of the gods.” Therefore happiness consists in power.

Objection 2. Further, happiness is the perfect good. But the highest perfection for man is to be able to rule others; which belongs to those who are in power. Therefore happiness consists in power.

Objection 3. Further, since happiness is supremely desirable, it is contrary to that which is before all to be shunned. But, more than aught else, men shun servitude, which is contrary to power. Therefore happiness consists in power.

On the contrary, Happiness is the perfect good. But power is most imperfect. For as Boethius says (De Consol. iii), “the power of man cannot relieve the gnawings of care, nor can it avoid the thorny path of anxiety”: and further on: “Think you a man is powerful who is surrounded by attendants, whom he inspires with fear indeed, but whom he fears still more?”

I answer that, It is impossible for happiness to consist in power; and this for two reasons. First because power has the nature of principle, as is stated in Metaph. v, 12, whereas happiness has the nature of last end. Secondly, because power has relation to good and evil: whereas happiness is man’s proper and perfect good. Wherefore some happiness might consist in the good use of power, which is by virtue, rather than in power itself.

Now four general reasons may be given to prove that happiness consists in none of the foregoing ex-

ternal goods. First, because, since happiness is man’s supreme good, it is incompatible with any evil. Now all the foregoing can be found both in good and in evil men. Secondly, because, since it is the nature of happiness to “satisfy of itself,” as stated in Ethic. i, 7, having gained happiness, man cannot lack any needful good. But after acquiring any one of the foregoing, man may still lack many goods that are necessary to him; for instance, wisdom, bodily health, and such like. Thirdly, because, since happiness is the perfect good, no evil can accrue to anyone therefrom. This cannot be said of the foregoing: for it is written (Eccles. 5:12) that “riches” are sometimes “kept to the hurt of the owner”; and the same may be said of the other three. Fourthly, because man is ordained to happiness through principles that are in him; since he is ordained thereto naturally. Now the four goods mentioned above are due rather to external causes, and in most cases to fortune; for which reason they are called goods of fortune. Therefore it is evident that happiness nowise consists in the foregoing.

Reply to Objection 1. God’s power is His goodness: hence He cannot use His power otherwise than well. But it is not so with men. Consequently it is not enough for man’s happiness, that he become like God in power, unless he become like Him in goodness also.

Reply to Objection 2. Just as it is a very good thing for a man to make good use of power in ruling many, so is it a very bad thing if he makes a bad use of it. And so it is that power is towards good and evil.

Reply to Objection 3. Servitude is a hindrance to the good use of power: therefore is it that men naturally shun it; not because man’s supreme good consists in power.

* St. Thomas joins Mk. 8:38 with Lk. 12:8 owing to a possible variant in his text, or to the fact that he was quoting from memory

Objection 1. It would seem that man's happiness consists in bodily goods. For it is written (Ecclus. 30:16): "There is no riches above the riches of the health of the body." But happiness consists in that which is best. Therefore it consists in the health of the body.

Objection 2. Further, Dionysius says (Div. Nom. v), that "to be" is better than "to live," and "to live" is better than all that follows. But for man's being and living, the health of the body is necessary. Since, therefore, happiness is man's supreme good, it seems that health of the body belongs more than anything else to happiness.

Objection 3. Further, the more universal a thing is, the higher the principle from which it depends; because the higher a cause is, the greater the scope of its power. Now just as the causality of the efficient cause consists in its flowing into something, so the causality of the end consists in its drawing the appetite. Therefore, just as the First Cause is that which flows into all things, so the last end is that which attracts the desire of all. But being itself is that which is most desired by all. Therefore man's happiness consists most of all in things pertaining to his being, such as the health of the body.

On the contrary, Man surpasses all other animals in regard to happiness. But in bodily goods he is surpassed by many animals; for instance, by the elephant in longevity, by the lion in strength, by the stag in fleetness. Therefore man's happiness does not consist in goods of the body.

I answer that, It is impossible for man's happiness to consist in the goods of the body; and this for two reasons. First, because, if a thing be ordained to another as to its end, its last end cannot consist in the preservation of its being. Hence a captain does not intend as a last end, the preservation of the ship entrusted to him, since a ship is ordained to something else as its end, viz. to navigation. Now just as the ship is entrusted to the captain that he may steer its course, so man is given over to his will and reason; according to Ecclus. 15:14: "God made man from the beginning and left him in the hand of his own counsel." Now it is evident that man is or-

daind to something as his end: since man is not the supreme good. Therefore the last end of man's reason and will cannot be the preservation of man's being.

Secondly, because, granted that the end of man's will and reason be the preservation of man's being, it could not be said that the end of man is some good of the body. For man's being consists in soul and body; and though the being of the body depends on the soul, yet the being of the human soul depends not on the body, as shown above (Ia, q. 75, a. 2); and the very body is for the soul, as matter for its form, and the instruments for the man that puts them into motion, that by their means he may do his work. Wherefore all goods of the body are ordained to the goods of the soul, as to their end. Consequently happiness, which is man's last end, cannot consist in goods of the body.

Reply to Objection 1. Just as the body is ordained to the soul, as its end, so are external goods ordained to the body itself. And therefore it is with reason that the good of the body is preferred to external goods, which are signified by "riches," just as the good of the soul is preferred to all bodily goods.

Reply to Objection 2. Being taken simply, as including all perfection of being, surpasses life and all that follows it; for thus being itself includes all these. And in this sense Dionysius speaks. But if we consider being itself as participated in this or that thing, which does not possess the whole perfection of being, but has imperfect being, such as the being of any creature; then it is evident that being itself together with an additional perfection is more excellent. Hence in the same passage Dionysius says that things that live are better than things that exist, and intelligent better than living things.

Reply to Objection 3. Since the end corresponds to the beginning; this argument proves that the last end is the first beginning of being, in Whom every perfection of being is: Whose likeness, according to their proportion, some desire as to being only, some as to living being, some as to being which is living, intelligent and happy. And this belongs to few.

Objection 1. It would seem that man's happiness consists in pleasure. For since happiness is the last end, it is not desired for something else, but other things for it. But this answers to pleasure more than to anything else: "for it is absurd to ask anyone what is his motive in wishing to be pleased" (Ethic. x, 2). Therefore happiness consists principally in pleasure and delight.

Objection 2. Further, "the first cause goes more deeply into the effect than the second cause" (De Causis i). Now the causality of the end consists in its attracting the appetite. Therefore, seemingly that which moves

most the appetite, answers to the notion of the last end. Now this is pleasure: and a sign of this is that delight so far absorbs man's will and reason, that it causes him to despise other goods. Therefore it seems that man's last end, which is happiness, consists principally in pleasure.

Objection 3. Further, since desire is for good, it seems that what all desire is best. But all desire delight; both wise and foolish, and even irrational creatures. Therefore delight is the best of all. Therefore happiness, which is the supreme good, consists in plea-

sure.

On the contrary, Boethius says (De Consol. iii): “Any one that chooses to look back on his past excesses, will perceive that pleasures had a sad ending: and if they can render a man happy, there is no reason why we should not say that the very beasts are happy too.”

I answer that, Because bodily delights are more generally known, “the name of pleasure has been appropriated to them” (Ethic. vii, 13), although other delights excel them: and yet happiness does not consist in them. Because in every thing, that which pertains to its essence is distinct from its proper accident: thus in man it is one thing that he is a mortal rational animal, and another that he is a risible animal. We must therefore consider that every delight is a proper accident resulting from happiness, or from some part of happiness; since the reason that a man is delighted is that he has some fitting good, either in reality, or in hope, or at least in memory. Now a fitting good, if indeed it be the perfect good, is precisely man’s happiness: and if it is imperfect, it is a share of happiness, either proximate, or remote, or at least apparent. Therefore it is evident that neither is delight, which results from the perfect good, the very essence of happiness, but something resulting therefrom as its proper accident.

But bodily pleasure cannot result from the perfect good even in that way. For it results from a good apprehended by sense, which is a power of the soul, which power makes use of the body. Now good pertaining to the body, and apprehended by sense, cannot be man’s perfect good. For since the rational soul excels the capacity of corporeal matter, that part of the soul which is independent of a corporeal organ, has a certain infinity in regard to the body and those parts of the soul which are tied down to the body: just as immaterial things are in a way infinite as compared to material things, since a form is, after a fashion, contracted and bounded by matter, so that a form which is independent of matter

is, in a way, infinite. Therefore sense, which is a power of the body, knows the singular, which is determinate through matter: whereas the intellect, which is a power independent of matter, knows the universal, which is abstracted from matter, and contains an infinite number of singulars. Consequently it is evident that good which is fitting to the body, and which causes bodily delight through being apprehended by sense, is not man’s perfect good, but is quite a trifle as compared with the good of the soul. Hence it is written (Wis. 7:9) that “all gold in comparison of her, is as a little sand.” And therefore bodily pleasure is neither happiness itself, nor a proper accident of happiness.

Reply to Objection 1. It comes to the same whether we desire good, or desire delight, which is nothing else than the appetite’s rest in good: thus it is owing to the same natural force that a weighty body is borne downwards and that it rests there. Consequently just as good is desired for itself, so delight is desired for itself and not for anything else, if the preposition “for” denote the final cause. But if it denote the formal or rather the motive cause, thus delight is desirable for something else, i.e. for the good, which is the object of that delight, and consequently is its principle, and gives it its form: for the reason that delight is desired is that it is rest in the thing desired.

Reply to Objection 2. The vehemence of desire for sensible delight arises from the fact that operations of the senses, through being the principles of our knowledge, are more perceptible. And so it is that sensible pleasures are desired by the majority.

Reply to Objection 3. All desire delight in the same way as they desire good: and yet they desire delight by reason of the good and not conversely, as stated above (ad 1). Consequently it does not follow that delight is the supreme and essential good, but that every delight results from some good, and that some delight results from that which is the essential and supreme good.

Whether some good of the soul constitutes man’s happiness?

Ia IIae q. 2 a. 7

Objection 1. It would seem that some good of the soul constitutes man’s happiness. For happiness is man’s good. Now this is threefold: external goods, goods of the body, and goods of the soul. But happiness does not consist in external goods, nor in goods of the body, as shown above (Aa. 4,5). Therefore it consists in goods of the soul.

Objection 2. Further, we love that for which we desire good, more than the good that we desire for it: thus we love a friend for whom we desire money, more than we love money. But whatever good a man desires, he desires it for himself. Therefore he loves himself more than all other goods. Now happiness is what is loved above all: which is evident from the fact that for its sake all else is loved and desired. Therefore happiness consists in some good of man himself: not, however, in

goods of the body; therefore, in goods of the soul.

Objection 3. Further, perfection is something belonging to that which is perfected. But happiness is a perfection of man. Therefore happiness is something belonging to man. But it is not something belonging to the body, as shown above (a. 5). Therefore it is something belonging to the soul; and thus it consists in goods of the soul.

On the contrary, As Augustine says (De Doctr. Christ. i, 22), “that which constitutes the life of happiness is to be loved for its own sake.” But man is not to be loved for his own sake, but whatever is in man is to be loved for God’s sake. Therefore happiness consists in no good of the soul.

I answer that, As stated above (q. 1, a. 8), the end is twofold: namely, the thing itself, which we desire to

attain, and the use, namely, the attainment or possession of that thing. If, then, we speak of man's last end, it is impossible for man's last end to be the soul itself or something belonging to it. Because the soul, considered in itself, is as something existing in potentiality: for it becomes knowing actually, from being potentially knowing; and actually virtuous, from being potentially virtuous. Now since potentiality is for the sake of act as for its fulfilment, that which in itself is in potentiality cannot be the last end. Therefore the soul itself cannot be its own last end.

In like manner neither can anything belonging to it, whether power, habit, or act. For that good which is the last end, is the perfect good fulfilling the desire. Now man's appetite, otherwise the will, is for the universal good. And any good inherent to the soul is a participated good, and consequently a portioned good. Therefore none of them can be man's last end.

But if we speak of man's last end, as to the attainment or possession thereof, or as to any use whatever of the thing itself desired as an end, thus does something of man, in respect of his soul, belong to his last end: since man attains happiness through his soul. Therefore the thing itself which is desired as end, is that which consti-

tutes happiness, and makes man happy; but the attainment of this thing is called happiness. Consequently we must say that happiness is something belonging to the soul; but that which constitutes happiness is something outside the soul.

Reply to Objection 1. Inasmuch as this division includes all goods that man can desire, thus the good of the soul is not only power, habit, or act, but also the object of these, which is something outside. And in this way nothing hinders us from saying that what constitutes happiness is a good of the soul.

Reply to Objection 2. As far as the proposed objection is concerned, happiness is loved above all, as the good desired; whereas a friend is loved as that for which good is desired; and thus, too, man loves himself. Consequently it is not the same kind of love in both cases. As to whether man loves anything more than himself with the love of friendship there will be occasion to inquire when we treat of Charity.

Reply to Objection 3. Happiness, itself, since it is a perfection of the soul, is an inherent good of the soul; but that which constitutes happiness, viz. which makes man happy, is something outside his soul, as stated above.

Whether any created good constitutes man's happiness?

Ia IIae q. 2 a. 8

Objection 1. It would seem that some created good constitutes man's happiness. For Dionysius says (Div. Nom. vii) that Divine wisdom "unites the ends of first things to the beginnings of second things," from which we may gather that the summit of a lower nature touches the base of the higher nature. But man's highest good is happiness. Since then the angel is above man in the order of nature, as stated in Ia, q. 111, a. 1, it seems that man's happiness consists in man somehow reaching the angel.

Objection 2. Further, the last end of each thing is that which, in relation to it, is perfect: hence the part is for the whole, as for its end. But the universe of creatures which is called the macrocosm, is compared to man who is called the microcosm (Phys. viii, 2), as perfect to imperfect. Therefore man's happiness consists in the whole universe of creatures.

Objection 3. Further, man is made happy by that which lulls his natural desire. But man's natural desire does not reach out to a good surpassing his capacity. Since then man's capacity does not include that good which surpasses the limits of all creation, it seems that man can be made happy by some created good. Consequently some created good constitutes man's happiness.

On the contrary, Augustine says (De Civ. Dei xix, 26): "As the soul is the life of the body, so God is man's life of happiness: of Whom it is written: 'Happy is that people whose God is the Lord' (Ps. 143:15)."

I answer that, It is impossible for any created good to constitute man's happiness. For happiness is the perfect good, which lulls the appetite altogether; else it

would not be the last end, if something yet remained to be desired. Now the object of the will, i.e. of man's appetite, is the universal good; just as the object of the intellect is the universal true. Hence it is evident that naught can lull man's will, save the universal good. This is to be found, not in any creature, but in God alone; because every creature has goodness by participation. Wherefore God alone can satisfy the will of man, according to the words of Ps. 102:5: "Who satisfieth thy desire with good things." Therefore God alone constitutes man's happiness.

Reply to Objection 1. The summit of man does indeed touch the base of the angelic nature, by a kind of likeness; but man does not rest there as in his last end, but reaches out to the universal fount itself of good, which is the common object of happiness of all the blessed, as being the infinite and perfect good.

Reply to Objection 2. If a whole be not the last end, but ordained to a further end, then the last end of a part thereof is not the whole itself, but something else. Now the universe of creatures, to which man is compared as part to whole, is not the last end, but is ordained to God, as to its last end. Therefore the last end of man is not the good of the universe, but God himself.

Reply to Objection 3. Created good is not less than that good of which man is capable, as of something intrinsic and inherent to him: but it is less than the good of which he is capable, as of an object, and which is infinite. And the participated good which is in an angel, and in the whole universe, is a finite and restricted good.

FIRST PART OF THE SECOND PART, QUESTION 20

Of Goodness and Malice in External Human Affairs

(In Six Articles)

We must next consider goodness and malice as to external actions: under which head there are six points of inquiry:

- (1) Whether goodness and malice is first in the act of the will, or in the external action?
- (2) Whether the whole goodness or malice of the external action depends on the goodness of the will?
- (3) Whether the goodness and malice of the interior act are the same as those of the external action?
- (4) Whether the external action adds any goodness or malice to that of the interior act?
- (5) Whether the consequences of an external action increase its goodness or malice?
- (6) Whether one and the same external action can be both good and evil?

Whether goodness or malice is first in the action of the will, or in the external action?

Ia IIae q. 20 a. 1

Objection 1. It would seem that good and evil are in the external action prior to being in the act of the will. For the will derives goodness from its object, as stated above (q. 19, Aa. 1,2). But the external action is the object of the interior act of the will: for a man is said to will to commit a theft, or to will to give an alms. Therefore good and evil are in the external action, prior to being in the act of the will.

Objection 2. Further, the aspect of good belongs first to the end: since what is directed to the end receives the aspect of good from its relation to the end. Now whereas the act of the will cannot be an end, as stated above (q. 1, a. 1, ad 2), the act of another power can be an end. Therefore good is in the act of some other power prior to being in the act of the will.

Objection 3. Further, the act of the will stands in a formal relation to the external action, as stated above (q. 18, a. 6). But that which is formal is subsequent; since form is something added to matter. Therefore good and evil are in the external action, prior to being in the act of the will.

On the contrary, Augustine says (Retract. i, 9) that "it is by the will that we sin, and that we behave aright." Therefore moral good and evil are first in the will.

I answer that, External actions may be said to be good or bad in two ways. First, in regard to their genus, and the circumstances connected with them: thus the giving of alms, if the required conditions be observed, is said to be good. Secondly, a thing is said to be good or evil, from its relation to the end: thus the giving of alms for vainglory is said to be evil. Now, since the

end is the will's proper object, it is evident that this aspect of good or evil, which the external action derives from its relation to the end, is to be found first of all in the act of the will, whence it passes to the external action. On the other hand, the goodness or malice which the external action has of itself, on account of its being about due matter and its being attended by due circumstances, is not derived from the will, but rather from the reason. Consequently, if we consider the goodness of the external action, in so far as it comes from reason's ordination and apprehension, it is prior to the goodness of the act of the will: but if we consider it in so far as it is in the execution of the action done, it is subsequent to the goodness of the will, which is its principle.

Reply to Objection 1. The exterior action is the object of the will, inasmuch as it is proposed to the will by the reason, as good apprehended and ordained by the reason: and thus it is prior to the good in the act of the will. But inasmuch as it is found in the execution of the action, it is an effect of the will, and is subsequent to the will.

Reply to Objection 2. The end precedes in the order of intention, but follows in the order of execution.

Reply to Objection 3. A form as received into matter, is subsequent to matter in the order of generation, although it precedes it in the order of nature: but inasmuch as it is in the active cause, it precedes in every way. Now the will is compared to the exterior action, as its efficient cause. Wherefore the goodness of the act of the will, as existing in the active cause, is the form of the exterior action.

Whether the whole goodness and malice of the external action depends on the goodness of the will?

Ia IIae q. 20 a. 2

Objection 1. It would seem that the whole goodness and malice of the external action depend on the goodness of the will. For it is written (Mat. 7:18): "A good tree cannot bring forth evil fruit, neither can an evil tree

bring forth good fruit." But, according to the gloss, the tree signifies the will, and fruit signifies works. Therefore, it is impossible for the interior act of the will to be good, and the external action evil, or vice versa.

Objection 2. Further, Augustine says (Retract. i, 9) that there is no sin without the will. If therefore there is no sin in the will, there will be none in the external action. And so the whole goodness or malice of the external action depends on the will.

Objection 3. Further, the good and evil of which we are speaking now are differences of the moral act. Now differences make an essential division in a genus, according to the Philosopher (Metaph. vii, 12). Since therefore an act is moral from being voluntary, it seems that goodness and malice in an act are derived from the will alone.

On the contrary, Augustine says (Contra Mendac. vii), that “there are some actions which neither a good end nor a good will can make good.”

I answer that, As stated above (a. 1), we may consider a twofold goodness or malice in the external action: one in respect of due matter and circumstances; the other in respect of the order to the end. And that which is in respect of the order to the end, depends entirely on the will: while that which is in respect of due matter or circumstances, depends on the reason: and on this goodness depends the goodness of the will, in so far as the will tends towards it.

Now it must be observed, as was noted above (q. 19, a. 6, ad 1), that for a thing to be evil, one single defect suffices, whereas, for it to be good simply, it is not enough for it to be good in one point only, it must be good in every respect. If therefore the will be good, both from its proper object and from its end, it follows that the external action is good. But if the will be good from its intention of the end, this is not enough to make the external action good: and if the will be evil either by reason of its intention of the end, or by reason of the act willed, it follows that the external action is evil.

Reply to Objection 1. If the good tree be taken to signify the good will, it must be in so far as the will derives goodness from the act willed and from the end intended.

Reply to Objection 2. A man sins by his will, not only when he wills an evil end; but also when he wills an evil act.

Reply to Objection 3. Voluntariness applies not only to the interior act of the will, but also to external actions, inasmuch as they proceed from the will and the reason. Consequently the difference of good and evil is applicable to both the interior and external act.

Whether the goodness and malice of the external action are the same as those of the interior act?

Ia IIae q. 20 a. 3

Objection 1. It would seem that the goodness and malice of the interior act of the will are not the same as those of the external action. For the principle of the interior act is the interior apprehensive or appetitive power of the soul; whereas the principle of the external action is the power that accomplishes the movement. Now where the principles of action are different, the actions themselves are different. Moreover, it is the action which is the subject of goodness or malice: and the same accident cannot be in different subjects. Therefore the goodness of the interior act cannot be the same as that of the external action.

Objection 2. Further, “A virtue makes that, which has it, good, and renders its action good also” (Ethic. ii, 6). But the intellectual virtue in the commanding power is distinct from the moral virtue in the power commanded, as is declared in Ethic. i, 13. Therefore the goodness of the interior act, which belongs to the commanding power, is distinct from the goodness of the external action, which belongs to the power commanded.

Objection 3. Further, the same thing cannot be cause and effect; since nothing is its own cause. But the goodness of the interior act is the cause of the goodness of the external action, or vice versa, as stated above (Aa. 1,2). Therefore it is not the same goodness in each.

On the contrary, It was shown above (q. 18, a. 6) that the act of the will is the form, as it were, of the external action. Now that which results from the material and formal element is one thing. Therefore there is but

one goodness of the internal and external act.

I answer that, As stated above (q. 17, a. 4), the interior act of the will, and the external action, considered morally, are one act. Now it happens sometimes that one and the same individual act has several aspects of goodness or malice, and sometimes that it has but one. Hence we must say that sometimes the goodness or malice of the interior act is the same as that of the external action, and sometimes not. For as we have already said (Aa. 1,2), these two goodnesses or malices, of the internal and external acts, are ordained to one another. Now it may happen, in things that are subordinate to something else, that a thing is good merely from being subordinate; thus a bitter draught is good merely because it procures health. Wherefore there are not two goodnesses, one the goodness of health, and the other the goodness of the draught; but one and the same. On the other hand it happens sometimes that that which is subordinate to something else, has some aspect of goodness in itself, besides the fact of its being subordinate to some other good: thus a palatable medicine can be considered in the light of a pleasurable good, besides being conducive to health.

We must therefore say that when the external action derives goodness or malice from its relation to the end only, then there is but one and the same goodness of the act of the will which of itself regards the end, and of the external action, which regards the end through the medium of the act of the will. But when the external action has goodness or malice of itself, i.e. in regard to

its matter and circumstances, then the goodness of the external action is distinct from the goodness of the will in regarding the end; yet so that the goodness of the end passes into the external action, and the goodness of the matter and circumstances passes into the act of the will, as stated above (Aa. 1,2).

Reply to Objection 1. This argument proves that the internal and external actions are different in the physical order: yet distinct as they are in that respect, they combine to form one thing in the moral order, as stated above (q. 17, a. 4).

Reply to Objection 2. As stated in Ethic. vi, 12, a moral virtue is ordained to the act of that virtue, which act is the end, as it were, of that virtue; whereas prudence, which is in the reason, is ordained to things directed to the end. For this reason various virtues are necessary. But right reason in regard to the very end of a virtue has no other goodness than the goodness of that

virtue, in so far as the goodness of the reason is participated in each virtue.

Reply to Objection 3. When a thing is derived by one thing from another, as from a univocal efficient cause, then it is not the same in both: thus when a hot thing heats, the heat of the heater is distinct from the heat of the thing heated, although it be the same specifically. But when a thing is derived from one thing from another, according to analogy or proportion, then it is one and the same in both: thus the healthiness which is in medicine or urine is derived from the healthiness of the animal's body; nor is health as applied to urine and medicine, distinct from health as applied to the body of an animal, of which health medicine is the cause, and urine the sign. It is in this way that the goodness of the external action is derived from the goodness of the will, and vice versa; viz. according to the order of one to the other.

Whether the external action adds any goodness or malice to that of the interior act?

Ia IIae q. 20 a. 4

Objection 1. It would seem that the external action does not add any goodness or malice to that of the interior action. For Chrysostom says (Hom. xix in Mat.): "It is the will that is rewarded for doing good, or punished for doing evil." Now works are the witnesses of the will. Therefore God seeks for works not on His own account, in order to know how to judge; but for the sake of others, that all may understand how just He is. But good or evil is to be estimated according to God's judgment rather than according to the judgment of man. Therefore the external action adds no goodness or malice to that of the interior act.

Objection 2. Further, the goodness and malice of the interior and external acts are one and the same, as stated above (a. 3). But increase is the addition of one thing to another. Therefore the external action does not add to the goodness or malice of the interior act.

Objection 3. Further, the entire goodness of created things does not add to the Divine Goodness, because it is entirely derived therefrom. But sometimes the entire goodness of the external action is derived from the goodness of the interior act, and sometimes conversely, as stated above (Aa. 1,2). Therefore neither of them adds to the goodness or malice of the other.

On the contrary, Every agent intends to attain good and avoid evil. If therefore by the external action no further goodness or malice be added, it is to no purpose that he who has a good or an evil will, does a good deed or refrains from an evil deed. Which is unreasonable.

I answer that, If we speak of the goodness which the external action derives from the will tending to the end, then the external action adds nothing to this goodness, unless it happens that the will in itself is made better in good things, or worse in evil things. This, seemingly, may happen in three ways. First in point of number; if, for instance, a man wishes to do some-

thing with a good or an evil end in view, and does not do it then, but afterwards wills and does it, the act of his will is doubled and a double good, or a double evil is the result. Secondly, in point of extension: when, for instance, a man wishes to do something for a good or an evil end, and is hindered by some obstacle, whereas another man perseveres in the movement of the will until he accomplish it in deed; it is evident that the will of the latter is more lasting in good or evil, and in this respect, is better or worse. Thirdly, in point of intensity: for these are certain external actions, which, in so far as they are pleasurable, or painful, are such as naturally to make the will more intense or more remiss; and it is evident that the more intensely the will tends to good or evil, the better or worse it is.

On the other hand, if we speak of the goodness which the external action derives from its matter and due circumstances, thus it stands in relation to the will as its term and end. And in this way it adds to the goodness or malice of the will; because every inclination or movement is perfected by attaining its end or reaching its term. Wherefore the will is not perfect, unless it be such that, given the opportunity, it realizes the operation. But if this prove impossible, as long as the will is perfect, so as to realize the operation if it could; the lack of perfection derived from the external action, is simply involuntary. Now just as the involuntary deserves neither punishment nor reward in the accomplishment of good or evil deeds, so neither does it lessen reward or punishment, if a man through simple involuntariness fail to do good or evil.

Reply to Objection 1. Chrysostom is speaking of the case where a man's will is complete, and does not refrain from the deed save through the impossibility of achievement.

Reply to Objection 2. This argument applies to that

goodness which the external action derives from the will as tending to the end. But the goodness which the external action takes from its matter and circumstances, is distinct from that which it derives from the end; but it

is not distinct from that which it has from the very act willed, to which it stands in the relation of measure and cause, as stated above (Aa. 1,2).

From this the reply to the Third Objection is evident.

Whether the consequences of the external action increase its goodness or malice?

Ia IIae q. 20 a. 5

Objection 1. It would seem that the consequences of the external action increase its goodness or malice. For the effect pre-exists virtually in its cause. But the consequences result from the action as an effect from its cause. Therefore they pre-exist virtually in actions. Now a thing is judged to be good or bad according to its virtue, since a virtue “makes that which has it to be good” (Ethic. ii, 6). Therefore the consequences increase the goodness or malice of an action.

Objection 2. Further, the good actions of his hearers are consequences resulting from the words of a preacher. But such goods as these redound to the merit of the preacher, as is evident from Phil. 4:1: “My dearly beloved brethren, my joy and my crown.” Therefore the consequences of an action increase its goodness or malice.

Objection 3. Further, punishment is not increased, unless the fault increases: wherefore it is written (Dt. 25:2): “According to the measure of the sin shall the measure also of the stripes be.” But the punishment is increased on account of the consequences; for it is written (Ex. 21:29): “But if the ox was wont to push with his horn yesterday and the day before, and they warned his master, and he did not shut him up, and he shall kill a man or a woman, then the ox shall be stoned, and his owner also shall be put to death.” But he would not have been put to death, if the ox, although he had not been shut up, had not killed a man. Therefore the consequences increase the goodness or malice of an action.

Objection 4. Further, if a man do something which may cause death, by striking, or by sentencing, and if death does not ensue, he does not contract irregularity: but he would if death were to ensue. Therefore the consequence of an action increase its goodness or malice.

On the contrary, The consequences do not make an action that was evil, to be good; nor one that was good, to be evil. For instance, if a man give an alms to a poor man who makes bad use of the alms by committing a sin, this does not undo the good done by the giver; and,

in like manner, if a man bear patiently a wrong done to him, the wrongdoer is not thereby excused. Therefore the consequences of an action do not increase its goodness or malice.

I answer that, The consequences of an action are either foreseen or not. If they are foreseen, it is evident that they increase the goodness or malice. For when a man foresees that many evils may follow from his action, and yet does not therefore desist therefrom, this shows his will to be all the more inordinate.

But if the consequences are not foreseen, we must make a distinction. Because if they follow from the nature of the action and in the majority of cases, in this respect, the consequences increase the goodness or malice of that action: for it is evident that an action is specifically better, if better results can follow from it; and specifically worse, if it is of a nature to produce worse results. On the other hand, if the consequences follow by accident and seldom, then they do not increase the goodness or malice of the action: because we do not judge of a thing according to that which belongs to it by accident, but only according to that which belongs to it of itself.

Reply to Objection 1. The virtue of a cause is measured by the effect that flows from the nature of the cause, not by that which results by accident.

Reply to Objection 2. The good actions done by the hearers, result from the preacher’s words, as an effect that flows from their very nature. Hence they redound to the merit of the preacher: especially when such is his intention.

Reply to Objection 3. The consequences for which that man is ordered to be punished, both follow from the nature of the cause, and are supposed to be foreseen. For this reason they are reckoned as punishable.

Reply to Objection 4. This argument would prove if irregularity were the result of the fault. But it is not the result of the fault, but of the fact, and of the obstacle to the reception of a sacrament.

Whether one and the same external action can be both good and evil?

Ia IIae q. 20 a. 6

Objection 1. It would seem that one and the same external action can be both good and evil. For “movement, if continuous, is one and the same” (Phys. v, 4). But one continuous movement can be both good and bad: for instance, a man may go to church continuously, intending at first vainglory, and afterwards the service of God. Therefore one and the same action can be both

good and bad.

Objection 2. Further, according to the Philosopher (Phys. iii, 3), action and passion are one act. But the passion may be good, as Christ’s was; and the action evil, as that of the Jews. Therefore one and the same act can be both good and evil.

Objection 3. Further, since a servant is an instru-

ment, as it were, of his master, the servant's action is his master's, just as the action of a tool is the workman's action. But it may happen that the servant's action result from his master's good will, and is therefore good: and from the evil will of the servant, and is therefore evil. Therefore the same action can be both good and evil.

On the contrary, The same thing cannot be the subject of contraries. But good and evil are contraries. Therefore the same action cannot be both good and evil.

On the contrary, The same thing cannot be the subject of contraries. But good and evil are contraries. Therefore the same action cannot be both good and evil.

I answer that, Nothing hinders a thing from being one, in so far as it is in one genus, and manifold, in so far as it is referred to another genus. Thus a continuous surface is one, considered as in the genus of quantity; and yet it is manifold, considered as to the genus of color, if it be partly white, and partly black. And accordingly, nothing hinders an action from being one, considered in the natural order; whereas it is not one, considered in the moral order; and vice versa, as we have stated above (a. 3, ad 1; q. 18, a. 7, ad 1). For continuous walking is

one action, considered in the natural order: but it may resolve itself into many actions, considered in the moral order, if a change take place in the walker's will, for the will is the principle of moral actions. If therefore we consider one action in the moral order, it is impossible for it to be morally both good and evil. Whereas if it be one as to natural and not moral unity, it can be both good and evil.

Reply to Objection 1. This continual movement which proceeds from various intentions, although it is one in the natural order, is not one in the point of moral unity.

Reply to Objection 2. Action and passion belong to the moral order, in so far as they are voluntary. And therefore in so far as they are voluntary in respect of wills that differ, they are two distinct things, and good can be in one of them while evil is in the other.

Reply to Objection 3. The action of the servant, in so far as it proceeds from the will of the servant, is not the master's action: but only in so far as it proceeds from the master's command. Wherefore the evil will of the servant does not make the action evil in this respect.

Objection 1. It would seem that good and evil are in the external action prior to being in the act of the will. For the will derives goodness from its object, as stated above (q. 19, Aa. 1,2). But the external action is the object of the interior act of the will: for a man is said to will to commit a theft, or to will to give an alms. Therefore good and evil are in the external action, prior to being in the act of the will.

Objection 2. Further, the aspect of good belongs first to the end: since what is directed to the end receives the aspect of good from its relation to the end. Now whereas the act of the will cannot be an end, as stated above (q. 1, a. 1, ad 2), the act of another power can be an end. Therefore good is in the act of some other power prior to being in the act of the will.

Objection 3. Further, the act of the will stands in a formal relation to the external action, as stated above (q. 18, a. 6). But that which is formal is subsequent; since form is something added to matter. Therefore good and evil are in the external action, prior to being in the act of the will.

On the contrary, Augustine says (Retract. i, 9) that “it is by the will that we sin, and that we behave aright.” Therefore moral good and evil are first in the will.

I answer that, External actions may be said to be good or bad in two ways. First, in regard to their genus, and the circumstances connected with them: thus the giving of alms, if the required conditions be observed, is said to be good. Secondly, a thing is said to be good or evil, from its relation to the end: thus the giving of alms for vainglory is said to be evil. Now, since the

end is the will’s proper object, it is evident that this aspect of good or evil, which the external action derives from its relation to the end, is to be found first of all in the act of the will, whence it passes to the external action. On the other hand, the goodness or malice which the external action has of itself, on account of its being about due matter and its being attended by due circumstances, is not derived from the will, but rather from the reason. Consequently, if we consider the goodness of the external action, in so far as it comes from reason’s ordination and apprehension, it is prior to the goodness of the act of the will: but if we consider it in so far as it is in the execution of the action done, it is subsequent to the goodness of the will, which is its principle.

Reply to Objection 1. The exterior action is the object of the will, inasmuch as it is proposed to the will by the reason, as good apprehended and ordained by the reason: and thus it is prior to the good in the act of the will. But inasmuch as it is found in the execution of the action, it is an effect of the will, and is subsequent to the will.

Reply to Objection 2. The end precedes in the order of intention, but follows in the order of execution.

Reply to Objection 3. A form as received into matter, is subsequent to matter in the order of generation, although it precedes it in the order of nature: but inasmuch as it is in the active cause, it precedes in every way. Now the will is compared to the exterior action, as its efficient cause. Wherefore the goodness of the act of the will, as existing in the active cause, is the form of the exterior action.

Objection 1. It would seem that the whole goodness and malice of the external action depend on the goodness of the will. For it is written (Mat. 7:18): “A good tree cannot bring forth evil fruit, neither can an evil tree bring forth good fruit.” But, according to the gloss, the tree signifies the will, and fruit signifies works. Therefore, it is impossible for the interior act of the will to be good, and the external action evil, or vice versa.

Objection 2. Further, Augustine says (Retract. i, 9) that there is no sin without the will. If therefore there is no sin in the will, there will be none in the external action. And so the whole goodness or malice of the external action depends on the will.

Objection 3. Further, the good and evil of which we are speaking now are differences of the moral act. Now differences make an essential division in a genus, according to the Philosopher (Metaph. vii, 12). Since therefore an act is moral from being voluntary, it seems that goodness and malice in an act are derived from the will alone.

On the contrary, Augustine says (Contra Mendac. vii), that “there are some actions which neither a good end nor a good will can make good.”

I answer that, As stated above (a. 1), we may consider a twofold goodness or malice in the external action: one in respect of due matter and circumstances; the other in respect of the order to the end. And that which is in respect of the order to the end, depends en-

tirely on the will: while that which is in respect of due matter or circumstances, depends on the reason: and on this goodness depends the goodness of the will, in so far as the will tends towards it.

Now it must be observed, as was noted above (q. 19, a. 6, ad 1), that for a thing to be evil, one single defect suffices, whereas, for it to be good simply, it is not enough for it to be good in one point only, it must be good in every respect. If therefore the will be good, both from its proper object and from its end, it follows that the external action is good. But if the will be good from its intention of the end, this is not enough to make the external action good: and if the will be evil either by reason of its intention of the end, or by reason of the act willed, it follows that the external action is evil.

Reply to Objection 1. If the good tree be taken to signify the good will, it must be in so far as the will derives goodness from the act willed and from the end intended.

Reply to Objection 2. A man sins by his will, not only when he wills an evil end; but also when he wills an evil act.

Reply to Objection 3. Voluntariness applies not only to the interior act of the will, but also to external actions, inasmuch as they proceed from the will and the reason. Consequently the difference of good and evil is applicable to both the interior and external act.

Objection 1. It would seem that the goodness and malice of the interior act of the will are not the same as those of the external action. For the principle of the interior act is the interior apprehensive or appetitive power of the soul; whereas the principle of the external action is the power that accomplishes the movement. Now where the principles of action are different, the actions themselves are different. Moreover, it is the action which is the subject of goodness or malice: and the same accident cannot be in different subjects. Therefore the goodness of the interior act cannot be the same as that of the external action.

Objection 2. Further, "A virtue makes that, which has it, good, and renders its action good also" (Ethic. ii, 6). But the intellectual virtue in the commanding power is distinct from the moral virtue in the power commanded, as is declared in Ethic. i, 13. Therefore the goodness of the interior act, which belongs to the commanding power, is distinct from the goodness of the external action, which belongs to the power commanded.

Objection 3. Further, the same thing cannot be cause and effect; since nothing is its own cause. But the goodness of the interior act is the cause of the goodness of the external action, or vice versa, as stated above (Aa. 1,2). Therefore it is not the same goodness in each.

On the contrary, It was shown above (q. 18, a. 6) that the act of the will is the form, as it were, of the external action. Now that which results from the material and formal element is one thing. Therefore there is but one goodness of the internal and external act.

I answer that, As stated above (q. 17, a. 4), the interior act of the will, and the external action, considered morally, are one act. Now it happens sometimes that one and the same individual act has several aspects of goodness or malice, and sometimes that it has but one. Hence we must say that sometimes the goodness or malice of the interior act is the same as that of the external action, and sometimes not. For as we have already said (Aa. 1,2), these two goodnesses or malices, of the internal and external acts, are ordained to one another. Now it may happen, in things that are subordinate to something else, that a thing is good merely from being subordinate; thus a bitter draught is good merely because it procures health. Wherefore there are not two goodnesses, one the goodness of health, and the other the goodness of the draught; but one and the same. On the other hand it happens sometimes that that which is

subordinate to something else, has some aspect of goodness in itself, besides the fact of its being subordinate to some other good: thus a palatable medicine can be considered in the light of a pleasurable good, besides being conducive to health.

We must therefore say that when the external action derives goodness or malice from its relation to the end only, then there is but one and the same goodness of the act of the will which of itself regards the end, and of the external action, which regards the end through the medium of the act of the will. But when the external action has goodness or malice of itself, i.e. in regard to its matter and circumstances, then the goodness of the external action is distinct from the goodness of the will in regarding the end; yet so that the goodness of the end passes into the external action, and the goodness of the matter and circumstances passes into the act of the will, as stated above (Aa. 1,2).

Reply to Objection 1. This argument proves that the internal and external actions are different in the physical order: yet distinct as they are in that respect, they combine to form one thing in the moral order, as stated above (q. 17, a. 4).

Reply to Objection 2. As stated in Ethic. vi, 12, a moral virtue is ordained to the act of that virtue, which act is the end, as it were, of that virtue; whereas prudence, which is in the reason, is ordained to things directed to the end. For this reason various virtues are necessary. But right reason in regard to the very end of a virtue has no other goodness than the goodness of that virtue, in so far as the goodness of the reason is participated in each virtue.

Reply to Objection 3. When a thing is derived by one thing from another, as from a univocal efficient cause, then it is not the same in both: thus when a hot thing heats, the heat of the heater is distinct from the heat of the thing heated, although it be the same specifically. But when a thing is derived from one thing from another, according to analogy or proportion, then it is one and the same in both: thus the healthiness which is in medicine or urine is derived from the healthiness of the animal's body; nor is health as applied to urine and medicine, distinct from health as applied to the body of an animal, of which health medicine is the cause, and urine the sign. It is in this way that the goodness of the external action is derived from the goodness of the will, and vice versa; viz. according to the order of one to the other.

Objection 1. It would seem that the external action does not add any goodness or malice to that of the interior action. For Chrysostom says (Hom. xix in Mat.): “It is the will that is rewarded for doing good, or punished for doing evil.” Now works are the witnesses of the will. Therefore God seeks for works not on His account, in order to know how to judge; but for the sake of others, that all may understand how just He is. But good or evil is to be estimated according to God’s judgment rather than according to the judgment of man. Therefore the external action adds no goodness or malice to that of the interior act.

Objection 2. Further, the goodness and malice of the interior and external acts are one and the same, as stated above (a. 3). But increase is the addition of one thing to another. Therefore the external action does not add to the goodness or malice of the interior act.

Objection 3. Further, the entire goodness of created things does not add to the Divine Goodness, because it is entirely derived therefrom. But sometimes the entire goodness of the external action is derived from the goodness of the interior act, and sometimes conversely, as stated above (Aa. 1,2). Therefore neither of them adds to the goodness or malice of the other.

On the contrary, Every agent intends to attain good and avoid evil. If therefore by the external action no further goodness or malice be added, it is to no purpose that he who has a good or an evil will, does a good deed or refrains from an evil deed. Which is unreasonable.

I answer that, If we speak of the goodness which the external action derives from the will tending to the end, then the external action adds nothing to this goodness, unless it happens that the will in itself is made better in good things, or worse in evil things. This, seemingly, may happen in three ways. First in point of number; if, for instance, a man wishes to do something with a good or an evil end in view, and does not do it then, but afterwards wills and does it, the act of his will is doubled and a double good, or a double evil is the result. Secondly, in point of extension: when, for

instance, a man wishes to do something for a good or an evil end, and is hindered by some obstacle, whereas another man perseveres in the movement of the will until he accomplish it in deed; it is evident that the will of the latter is more lasting in good or evil, and in this respect, is better or worse. Thirdly, in point of intensity: for these are certain external actions, which, in so far as they are pleasurable, or painful, are such as naturally to make the will more intense or more remiss; and it is evident that the more intensely the will tends to good or evil, the better or worse it is.

On the other hand, if we speak of the goodness which the external action derives from its matter and due circumstances, thus it stands in relation to the will as its term and end. And in this way it adds to the goodness or malice of the will; because every inclination or movement is perfected by attaining its end or reaching its term. Wherefore the will is not perfect, unless it be such that, given the opportunity, it realizes the operation. But if this prove impossible, as long as the will is perfect, so as to realize the operation if it could; the lack of perfection derived from the external action, is simply involuntary. Now just as the involuntary deserves neither punishment nor reward in the accomplishment of good or evil deeds, so neither does it lessen reward or punishment, if a man through simple involuntariness fail to do good or evil.

Reply to Objection 1. Chrysostom is speaking of the case where a man’s will is complete, and does not refrain from the deed save through the impossibility of achievement.

Reply to Objection 2. This argument applies to that goodness which the external action derives from the will as tending to the end. But the goodness which the external action takes from its matter and circumstances, is distinct from that which it derives from the end; but it is not distinct from that which it has from the very act willed, to which it stands in the relation of measure and cause, as stated above (Aa. 1,2).

From this the reply to the Third Objection is evident.

Objection 1. It would seem that the consequences of the external action increase its goodness or malice. For the effect pre-exists virtually in its cause. But the consequences result from the action as an effect from its cause. Therefore they pre-exist virtually in actions. Now a thing is judged to be good or bad according to its virtue, since a virtue “makes that which has it to be good” (Ethic. ii, 6). Therefore the consequences increase the goodness or malice of an action.

Objection 2. Further, the good actions of his hearers are consequences resulting from the words of a preacher. But such goods as these redound to the merit of the preacher, as is evident from Phil. 4:1: “My dearly beloved brethren, my joy and my crown.” Therefore the consequences of an action increase its goodness or malice.

Objection 3. Further, punishment is not increased, unless the fault increases: wherefore it is written (Dt. 25:2): “According to the measure of the sin shall the measure also of the stripes be.” But the punishment is increased on account of the consequences; for it is written (Ex. 21:29): “But if the ox was wont to push with his horn yesterday and the day before, and they warned his master, and he did not shut him up, and he shall kill a man or a woman, then the ox shall be stoned, and his owner also shall be put to death.” But he would not have been put to death, if the ox, although he had not been shut up, had not killed a man. Therefore the consequences increase the goodness or malice of an action.

Objection 4. Further, if a man do something which may cause death, by striking, or by sentencing, and if death does not ensue, he does not contract irregularity: but he would if death were to ensue. Therefore the consequence of an action increase its goodness or malice.

On the contrary, The consequences do not make an action that was evil, to be good; nor one that was good, to be evil. For instance, if a man give an alms to a poor man who makes bad use of the alms by committing a sin, this does not undo the good done by the giver; and,

in like manner, if a man bear patiently a wrong done to him, the wrongdoer is not thereby excused. Therefore the consequences of an action do not increase its goodness or malice.

I answer that, The consequences of an action are either foreseen or not. If they are foreseen, it is evident that they increase the goodness or malice. For when a man foresees that many evils may follow from his action, and yet does not therefore desist therefrom, this shows his will to be all the more inordinate.

But if the consequences are not foreseen, we must make a distinction. Because if they follow from the nature of the action and in the majority of cases, in this respect, the consequences increase the goodness or malice of that action: for it is evident that an action is specifically better, if better results can follow from it; and specifically worse, if it is of a nature to produce worse results. On the other hand, if the consequences follow by accident and seldom, then they do not increase the goodness or malice of the action: because we do not judge of a thing according to that which belongs to it by accident, but only according to that which belongs to it of itself.

Reply to Objection 1. The virtue of a cause is measured by the effect that flows from the nature of the cause, not by that which results by accident.

Reply to Objection 2. The good actions done by the hearers, result from the preacher’s words, as an effect that flows from their very nature. Hence they redound to the merit of the preacher: especially when such is his intention.

Reply to Objection 3. The consequences for which that man is ordered to be punished, both follow from the nature of the cause, and are supposed to be foreseen. For this reason they are reckoned as punishable.

Reply to Objection 4. This argument would prove if irregularity were the result of the fault. But it is not the result of the fault, but of the fact, and of the obstacle to the reception of a sacrament.

Objection 1. It would seem that one and the same external action can be both good and evil. For “movement, if continuous, is one and the same” (Phys. v, 4). But one continuous movement can be both good and bad: for instance, a man may go to church continuously, intending at first vainglory, and afterwards the service of God. Therefore one and the same action can be both good and bad.

Objection 2. Further, according to the Philosopher (Phys. iii, 3), action and passion are one act. But the passion may be good, as Christ’s was; and the action evil, as that of the Jews. Therefore one and the same act can be both good and evil.

Objection 3. Further, since a servant is an instrument, as it were, of his master, the servant’s action is his master’s, just as the action of a tool is the workman’s action. But it may happen that the servant’s action result from his master’s good will, and is therefore good: and from the evil will of the servant, and is therefore evil. Therefore the same action can be both good and evil.

On the contrary, The same thing cannot be the subject of contraries. But good and evil are contraries. Therefore the same action cannot be both good and evil.

On the contrary, The same thing cannot be the subject of contraries. But good and evil are contraries. Therefore the same action cannot be both good and evil.

I answer that, Nothing hinders a thing from being one, in so far as it is in one genus, and manifold, in so far as it is referred to another genus. Thus a continuous sur-

face is one, considered as in the genus of quantity; and yet it is manifold, considered as to the genus of color, if it be partly white, and partly black. And accordingly, nothing hinders an action from being one, considered in the natural order; whereas it is not one, considered in the moral order; and vice versa, as we have stated above (a. 3, ad 1; q. 18, a. 7, ad 1). For continuous walking is one action, considered in the natural order: but it may resolve itself into many actions, considered in the moral order, if a change take place in the walker’s will, for the will is the principle of moral actions. If therefore we consider one action in the moral order, it is impossible for it to be morally both good and evil. Whereas if it be one as to natural and not moral unity, it can be both good and evil.

Reply to Objection 1. This continual movement which proceeds from various intentions, although it is one in the natural order, is not one in the point of moral unity.

Reply to Objection 2. Action and passion belong to the moral order, in so far as they are voluntary. And therefore in so far as they are voluntary in respect of wills that differ, they are two distinct things, and good can be in one of them while evil is in the other.

Reply to Objection 3. The action of the servant, in so far as it proceeds from the will of the servant, is not the master’s action: but only in so far as it proceeds from the master’s command. Wherefore the evil will of the servant does not make the action evil in this respect.

FIRST PART OF THE SECOND PART, QUESTION 21

Of the Consequences of Human Actions by Reason of Their Goodness and Malice (In Four Articles)

We have now to consider the consequences of human actions by reason of their goodness and malice: and under this head there are four points of inquiry:

- (1) Whether a human action is right or sinful by reason of its being good or evil?
- (2) Whether it thereby deserves praise or blame?
- (3) Whether accordingly, it is meritorious or demeritorious?
- (4) Whether it is accordingly meritorious or demeritorious before God?

Whether a human action is right or sinful, in so far as it is good or evil?

Ia IIae q. 21 a. 1

Objection 1. It seems that a human action is not right or sinful, in so far as it is good or evil. For “monsters are the sins of nature” (Phys. ii, 8). But monsters are not actions, but things engendered outside the order of nature. Now things that are produced according to art and reason imitate those that are produced according to nature (Phys. ii, 8). Therefore an action is not sinful by reason of its being inordinate and evil.

Objection 2. Further, sin, as stated in Phys. ii, 8 occurs in nature and art, when the end intended by nature or art is not attained. But the goodness or malice of a human action depends, before all, on the intention of the end, and on its achievement. Therefore it seems that the malice of an action does not make it sinful.

Objection 3. Further, if the malice of an action makes it sinful, it follows that wherever there is evil, there is sin. But this is false: since punishment is not a sin, although it is an evil. Therefore an action is not sinful by reason of its being evil.

On the contrary, As shown above (q. 19, a. 4), the goodness of a human action depends principally on the Eternal Law: and consequently its malice consists in its being in disaccord with the Eternal Law. But this is the very nature of sin; for Augustine says (Contra Faust. xxii, 27) that “sin is a word, deed, or desire, in opposition to the Eternal Law.” Therefore a human action is sinful by reason of its being evil.

I answer that, Evil is more comprehensive than sin, as also is good than right. For every privation of good, in whatever subject, is an evil: whereas sin consists properly in an action done for a certain end, and lacking due order to that end. Now the due order to an end is measured by some rule. In things that act according to nature, this rule is the natural force that inclines them to that end. When therefore an action proceeds from a natural force, in accord with the natural inclination to an end, then the action is said to be right: since the mean does not exceed its limits, viz. the action does not

swerve from the order of its active principle to the end. But when an action strays from this rectitude, it comes under the notion of sin.

Now in those things that are done by the will, the proximate rule is the human reason, while the supreme rule is the Eternal Law. When, therefore, a human action tends to the end, according to the order of reason and of the Eternal Law, then that action is right: but when it turns aside from that rectitude, then it is said to be a sin. Now it is evident from what has been said (q. 19, Aa. 3,4) that every voluntary action that turns aside from the order of reason and of the Eternal Law, is evil, and that every good action is in accord with reason and the Eternal Law. Hence it follows that a human action is right or sinful by reason of its being good or evil.

Reply to Objection 1. Monsters are called sins, inasmuch as they result from a sin in nature’s action.

Reply to Objection 2. The end is twofold; the last end, and the proximate end. In the sin of nature, the action does indeed fail in respect of the last end, which is the perfection of the thing generated; but it does not fail in respect of any proximate end whatever; since when nature works it forms something. In like manner, the sin of the will always fails as regards the last end intended, because no voluntary evil action can be ordained to happiness, which is the last end: and yet it does not fail in respect of some proximate end: intended and achieved by the will. Wherefore also, since the very intention of this end is ordained to the last end, this same intention may be right or sinful.

Reply to Objection 3. Each thing is ordained to its end by its action: and therefore sin, which consists in straying from the order to the end, consists properly in an action. On the other hand, punishment regards the person of the sinner, as was stated in the Ia, q. 48, a. 5, ad 4; a. 6, ad 3.

Objection 1. It would seem that a human action does not deserve praise or blame by reason of its being good or evil. For “sin happens even in things done by nature” (Phys. ii, 8). And yet natural things are not deserving of praise or blame (Ethic. iii, 5). Therefore a human action does not deserve blame, by reason of its being evil or sinful; and, consequently, neither does it deserve praise, by reason of its being good.

Objection 2. Further, just as sin occurs in moral actions, so does it happen in the productions of art: because as stated in Phys. ii, 8 “it is a sin in a grammarian to write badly, and in a doctor to give the wrong medicine.” But the artist is not blamed for making something bad: because the artist’s work is such, that he can produce a good or a bad thing, just as he lists. Therefore it seems that neither is there any reason for blaming a moral action, in the fact that it is evil.

Objection 3. Further, Dionysius says (Div. Nom. iv) that evil is “weak and incapable.” But weakness or inability either takes away or diminishes guilt. Therefore a human action does not incur guilt from being evil.

On the contrary, The Philosopher says (De Virt. et Vit. i) that “virtuous deeds deserve praise, while deeds that are opposed to virtue deserve censure and blame.” But good actions are virtuous; because “virtue makes that which has it, good, and makes its action good” (Ethic. ii, 6): wherefore actions opposed to virtue are evil. Therefore a human action deserves praise or blame, through being good or evil.

I answer that, Just as evil is more comprehensive than sin, so is sin more comprehensive than blame. For an action is said to deserve praise or blame, from its being imputed to the agent: since to praise or to blame means nothing else than to impute to someone the malice or goodness of his action. Now an action is imputed to an agent, when it is in his power, so that he has dominion over it: because it is through his will that man has dominion over his actions, as was made clear above (q. 1, Aa. 1,2). Hence it follows that good or evil, in

voluntary actions alone, renders them worthy of praise or blame: and in such like actions, evil, sin and guilt are one and the same thing.

Reply to Objection 1. Natural actions are not in the power of the natural agent: since the action of nature is determinate. And, therefore, although there be sin in natural actions, there is no blame.

Reply to Objection 2. Reason stands in different relations to the productions of art, and to moral actions. In matters of art, reason is directed to a particular end, which is something devised by reason: whereas in moral matters, it is directed to the general end of all human life. Now a particular end is subordinate to the general end. Since therefore sin is a departure from the order to the end, as stated above (a. 1), sin may occur in two ways, in a production of art. First, by a departure from the particular end intended by the artist: and this sin will be proper to the art; for instance, if an artist produce a bad thing, while intending to produce something good; or produce something good, while intending to produce something bad. Secondly, by a departure from the general end of human life: and then he will be said to sin, if he intend to produce a bad work, and does so in effect, so that another is taken in thereby. But this sin is not proper to the artist as such, but as man. Consequently for the former sin the artist is blamed as an artist; while for the latter he is blamed as a man. On the other hand, in moral matters, where we take into consideration the order of reason to the general end of human life, sin and evil are always due to a departure from the order of reason to the general end of human life. Wherefore man is blamed for such a sin, both as man and as a moral being. Hence the Philosopher says (Ethic. vi, 5) that “in art, he who sins voluntarily is preferable; but in prudence, as in the moral virtues,” which prudence directs, “he is the reverse.”

Reply to Objection 3. Weakness that occurs in voluntary evils, is subject to man’s power: wherefore it neither takes away nor diminishes guilt.

Objection 1. It would seem that a human action is not meritorious or demeritorious on account of its goodness or malice. For we speak of merit or demerit in relation to retribution, which has no place save in matters relating to another person. But good or evil actions are not all related to another person, for some are related to the person of the agent. Therefore not every good or evil human action is meritorious or demeritorious.

Objection 2. Further, no one deserves punishment or reward for doing as he chooses with that of which he is master: thus if a man destroys what belongs to him, he is not punished, as if he had destroyed what belongs to another. But man is master of his own actions.

Therefore a man does not merit punishment or reward, through putting his action to a good or evil purpose.

Objection 3. Further, if a man acquire some good for himself, he does not on that account deserve to be benefited by another man: and the same applies to evil. Now a good action is itself a kind of good and perfection of the agent: while an inordinate action is his evil. Therefore a man does not merit or demerit, from the fact that he does a good or an evil deed.

On the contrary, It is written (Is. 3:10,11): “Say to the just man that it is well; for he shall eat the fruit of his doings. Woe to the wicked unto evil; for the reward of his hands shall be given him.”

I answer that, We speak of merit and demerit, in relation to retribution, rendered according to justice. Now, retribution according to justice is rendered to a man, by reason of his having done something to another's advantage or hurt. It must, moreover, be observed that every individual member of a society is, in a fashion, a part and member of the whole society. Wherefore, any good or evil, done to the member of a society, redounds on the whole society: thus, who hurts the hand, hurts the man. When, therefore, anyone does good or evil to another individual, there is a twofold measure of merit or demerit in his action: first, in respect of the retribution owed to him by the individual to whom he has done good or harm; secondly, in respect of the retribution owed to him by the whole of society. Now when a man ordains his action directly for the good or evil of the whole society, retribution is owed to him, before and above all, by the whole society; secondarily, by all the parts of society. Whereas when a man does that which conduces to his own benefit or disadvantage, then again is retribution owed to him, in so far as this too affects the community, forasmuch as he is a part of society: although retribution is not due to him, in so far as it

conduces to the good or harm of an individual, who is identical with the agent: unless, perchance, he owe retribution to himself, by a sort of resemblance, in so far as man is said to be just to himself.

It is therefore evident that a good or evil action deserves praise or blame, in so far as it is in the power of the will: that it is right or sinful, according as it is ordained to the end; and that its merit or demerit depends on the recompense for justice or injustice towards another.

Reply to Objection 1. A man's good or evil actions, although not ordained to the good or evil of another individual, are nevertheless ordained to the good or evil of another, i.e. the community.

Reply to Objection 2. Man is master of his actions; and yet, in so far as he belongs to another, i.e. the community, of which he forms part, he merits or demerits, inasmuch as he disposes his actions well or ill: just as if he were to dispense well or ill other belongings of his, in respect of which he is bound to serve the community.

Reply to Objection 3. This very good or evil, which a man does to himself by his action, redounds to the community, as stated above.

Whether a human action is meritorious or demeritorious before God, according as it is good or evil?

Ia IIae q. 21 a. 4

Objection 1. It would seem that man's actions, good or evil, are not meritorious or demeritorious in the sight of God. Because, as stated above (a. 3), merit and demerit imply relation to retribution for good or harm done to another. But a man's action, good or evil, does no good or harm to God; for it is written (Job 35:6,7): "If thou sin, what shalt thou hurt Him? . . . And if thou do justly, what shalt thou give Him?" Therefore a human action, good or evil, is not meritorious or demeritorious in the sight of God.

Objection 2. Further, an instrument acquires no merit or demerit in the sight of him that uses it; because the entire action of the instrument belongs to the user. Now when man acts he is the instrument of the Divine power which is the principal cause of his action; hence it is written (Is. 10:15): "Shall the axe boast itself against him that cutteth with it? Or shall the saw exalt itself against him by whom it is drawn?" where man while acting is evidently compared to an instrument. Therefore man merits or demerits nothing in God's sight, by good or evil deeds.

Objection 3. Further, a human action acquires merit or demerit through being ordained to someone else. But not all human actions are ordained to God. Therefore not every good or evil action acquires merit or demerit in God's sight.

On the contrary, It is written (Eccles. 12:14): "All things that are done, God will bring into judgment. . . whether it be good or evil." Now judgment implies retribution, in respect of which we speak of merit

and demerit. Therefore every human action, both good and evil, acquires merit or demerit in God's sight.

I answer that, A human action, as stated above (a. 3), acquires merit or demerit, through being ordained to someone else, either by reason of himself, or by reason of the community: and in each way, our actions, good and evil, acquire merit or demerit, in the sight of God. On the part of God Himself, inasmuch as He is man's last end; and it is our duty to refer all our actions to the last end, as stated above (q. 19, a. 10). Consequently, whoever does an evil deed, not referable to God, does not give God the honor due to Him as our last end. On the part of the whole community of the universe, because in every community, he who governs the community, cares, first of all, for the common good; wherefore it is his business to award retribution for such things as are done well or ill in the community. Now God is the governor and ruler of the whole universe, as stated in the Ia, q. 103, a. 5: and especially of rational creatures. Consequently it is evident that human actions acquire merit or demerit in reference to Him: else it would follow that human actions are no business of God's.

Reply to Objection 1. God in Himself neither gains nor losses anything by the action of man: but man, for his part, takes something from God, or offers something to Him, when he observes or does not observe the order instituted by God.

Reply to Objection 2. Man is so moved, as an instrument, by God, that, at the same time, he moves him-

self by his free-will, as was explained above (q. 9, a. 6, ad 3). Consequently, by his action, he acquires merit or demerit in God's sight.

Reply to Objection 3. Man is not ordained to the body politic, according to all that he is and has; and so it does not follow that every action of his acquires merit

or demerit in relation to the body politic. But all that man is, and can, and has, must be referred to God: and therefore every action of man, whether good or bad, acquires merit or demerit in the sight of God, as far as the action itself is concerned.

Objection 1. It seems that a human action is not right or sinful, in so far as it is good or evil. For “monsters are the sins of nature” (Phys. ii, 8). But monsters are not actions, but things engendered outside the order of nature. Now things that are produced according to art and reason imitate those that are produced according to nature (Phys. ii, 8). Therefore an action is not sinful by reason of its being inordinate and evil.

Objection 2. Further, sin, as stated in Phys. ii, 8 occurs in nature and art, when the end intended by nature or art is not attained. But the goodness or malice of a human action depends, before all, on the intention of the end, and on its achievement. Therefore it seems that the malice of an action does not make it sinful.

Objection 3. Further, if the malice of an action makes it sinful, it follows that wherever there is evil, there is sin. But this is false: since punishment is not a sin, although it is an evil. Therefore an action is not sinful by reason of its being evil.

On the contrary, As shown above (q. 19, a. 4), the goodness of a human action depends principally on the Eternal Law: and consequently its malice consists in its being in disaccord with the Eternal Law. But this is the very nature of sin; for Augustine says (Contra Faust. xxii, 27) that “sin is a word, deed, or desire, in opposition to the Eternal Law.” Therefore a human action is sinful by reason of its being evil.

I answer that, Evil is more comprehensive than sin, as also is good than right. For every privation of good, in whatever subject, is an evil: whereas sin consists properly in an action done for a certain end, and lacking due order to that end. Now the due order to an end is measured by some rule. In things that act according to nature, this rule is the natural force that inclines them to that end. When therefore an action proceeds from a natural force, in accord with the natural inclination to an end, then the action is said to be right: since the mean does not exceed its limits, viz. the action does not

swerve from the order of its active principle to the end. But when an action strays from this rectitude, it comes under the notion of sin.

Now in those things that are done by the will, the proximate rule is the human reason, while the supreme rule is the Eternal Law. When, therefore, a human action tends to the end, according to the order of reason and of the Eternal Law, then that action is right: but when it turns aside from that rectitude, then it is said to be a sin. Now it is evident from what has been said (q. 19, Aa. 3,4) that every voluntary action that turns aside from the order of reason and of the Eternal Law, is evil, and that every good action is in accord with reason and the Eternal Law. Hence it follows that a human action is right or sinful by reason of its being good or evil.

Reply to Objection 1. Monsters are called sins, inasmuch as they result from a sin in nature’s action.

Reply to Objection 2. The end is twofold; the last end, and the proximate end. In the sin of nature, the action does indeed fail in respect of the last end, which is the perfection of the thing generated; but it does not fail in respect of any proximate end whatever; since when nature works it forms something. In like manner, the sin of the will always fails as regards the last end intended, because no voluntary evil action can be ordained to happiness, which is the last end: and yet it does not fail in respect of some proximate end: intended and achieved by the will. Wherefore also, since the very intention of this end is ordained to the last end, this same intention may be right or sinful.

Reply to Objection 3. Each thing is ordained to its end by its action: and therefore sin, which consists in straying from the order to the end, consists properly in an action. On the other hand, punishment regards the person of the sinner, as was stated in the Ia, q. 48, a. 5, ad 4; a. 6, ad 3.

Objection 1. It would seem that a human action does not deserve praise or blame by reason of its being good or evil. For “sin happens even in things done by nature” (Phys. ii, 8). And yet natural things are not deserving of praise or blame (Ethic. iii, 5). Therefore a human action does not deserve blame, by reason of its being evil or sinful; and, consequently, neither does it deserve praise, by reason of its being good.

Objection 2. Further, just as sin occurs in moral actions, so does it happen in the productions of art: because as stated in Phys. ii, 8 “it is a sin in a grammarian to write badly, and in a doctor to give the wrong medicine.” But the artist is not blamed for making something bad: because the artist’s work is such, that he can produce a good or a bad thing, just as he lists. Therefore it seems that neither is there any reason for blaming a moral action, in the fact that it is evil.

Objection 3. Further, Dionysius says (Div. Nom. iv) that evil is “weak and incapable.” But weakness or inability either takes away or diminishes guilt. Therefore a human action does not incur guilt from being evil.

On the contrary, The Philosopher says (De Virt. et Vit. i) that “virtuous deeds deserve praise, while deeds that are opposed to virtue deserve censure and blame.” But good actions are virtuous; because “virtue makes that which has it, good, and makes its action good” (Ethic. ii, 6): wherefore actions opposed to virtue are evil. Therefore a human action deserves praise or blame, through being good or evil.

I answer that, Just as evil is more comprehensive than sin, so is sin more comprehensive than blame. For an action is said to deserve praise or blame, from its being imputed to the agent: since to praise or to blame means nothing else than to impute to someone the malice or goodness of his action. Now an action is imputed to an agent, when it is in his power, so that he has dominion over it: because it is through his will that man has dominion over his actions, as was made clear above (q. 1, Aa. 1,2). Hence it follows that good or evil, in

voluntary actions alone, renders them worthy of praise or blame: and in such like actions, evil, sin and guilt are one and the same thing.

Reply to Objection 1. Natural actions are not in the power of the natural agent: since the action of nature is determinate. And, therefore, although there be sin in natural actions, there is no blame.

Reply to Objection 2. Reason stands in different relations to the productions of art, and to moral actions. In matters of art, reason is directed to a particular end, which is something devised by reason: whereas in moral matters, it is directed to the general end of all human life. Now a particular end is subordinate to the general end. Since therefore sin is a departure from the order to the end, as stated above (a. 1), sin may occur in two ways, in a production of art. First, by a departure from the particular end intended by the artist: and this sin will be proper to the art; for instance, if an artist produce a bad thing, while intending to produce something good; or produce something good, while intending to produce something bad. Secondly, by a departure from the general end of human life: and then he will be said to sin, if he intend to produce a bad work, and does so in effect, so that another is taken in thereby. But this sin is not proper to the artist as such, but as man. Consequently for the former sin the artist is blamed as an artist; while for the latter he is blamed as a man. On the other hand, in moral matters, where we take into consideration the order of reason to the general end of human life, sin and evil are always due to a departure from the order of reason to the general end of human life. Wherefore man is blamed for such a sin, both as man and as a moral being. Hence the Philosopher says (Ethic. vi, 5) that “in art, he who sins voluntarily is preferable; but in prudence, as in the moral virtues,” which prudence directs, “he is the reverse.”

Reply to Objection 3. Weakness that occurs in voluntary evils, is subject to man’s power: wherefore it neither takes away nor diminishes guilt.

Objection 1. It would seem that a human action is not meritorious or demeritorious on account of its goodness or malice. For we speak of merit or demerit in relation to retribution, which has no place save in matters relating to another person. But good or evil actions are not all related to another person, for some are related to the person of the agent. Therefore not every good or evil human action is meritorious or demeritorious.

Objection 2. Further, no one deserves punishment or reward for doing as he chooses with that of which he is master: thus if a man destroys what belongs to him, he is not punished, as if he had destroyed what belongs to another. But man is master of his own actions. Therefore a man does not merit punishment or reward, through putting his action to a good or evil purpose.

Objection 3. Further, if a man acquire some good for himself, he does not on that account deserve to be benefited by another man: and the same applies to evil. Now a good action is itself a kind of good and perfection of the agent: while an inordinate action is his evil. Therefore a man does not merit or demerit, from the fact that he does a good or an evil deed.

On the contrary, It is written (Is. 3:10,11): “Say to the just man that it is well; for he shall eat the fruit of his doings. Woe to the wicked unto evil; for the reward of his hands shall be given him.”

I answer that, We speak of merit and demerit, in relation to retribution, rendered according to justice. Now, retribution according to justice is rendered to a man, by reason of his having done something to another’s advantage or hurt. It must, moreover, be observed that every individual member of a society is, in a fashion, a part and member of the whole society. Wherefore, any good or evil, done to the member of a society, redounds on the whole society: thus, who hurts the hand, hurts the man. When, therefore, anyone does good or evil to

another individual, there is a twofold measure of merit or demerit in his action: first, in respect of the retribution owed to him by the individual to whom he has done good or harm; secondly, in respect of the retribution owed to him by the whole of society. Now when a man ordains his action directly for the good or evil of the whole society, retribution is owed to him, before and above all, by the whole society; secondarily, by all the parts of society. Whereas when a man does that which conduces to his own benefit or disadvantage, then again is retribution owed to him, in so far as this too affects the community, forasmuch as he is a part of society: although retribution is not due to him, in so far as it conduces to the good or harm of an individual, who is identical with the agent: unless, perchance, he owe retribution to himself, by a sort of resemblance, in so far as man is said to be just to himself.

It is therefore evident that a good or evil action deserves praise or blame, in so far as it is in the power of the will: that it is right or sinful, according as it is ordained to the end; and that its merit or demerit depends on the recompense for justice or injustice towards another.

Reply to Objection 1. A man’s good or evil actions, although not ordained to the good or evil of another individual, are nevertheless ordained to the good or evil of another, i.e. the community.

Reply to Objection 2. Man is master of his actions; and yet, in so far as he belongs to another, i.e. the community, of which he forms part, he merits or demerits, inasmuch as he disposes his actions well or ill: just as if he were to dispense well or ill other belongings of his, in respect of which he is bound to serve the community.

Reply to Objection 3. This very good or evil, which a man does to himself by his action, redounds to the community, as stated above.

Objection 1. It would seem that man's actions, good or evil, are not meritorious or demeritorious in the sight of God. Because, as stated above (a. 3), merit and demerit imply relation to retribution for good or harm done to another. But a man's action, good or evil, does no good or harm to God; for it is written (Job 35:6,7): "If thou sin, what shalt thou hurt Him? . . . And if thou do justly, what shalt thou give Him?" Therefore a human action, good or evil, is not meritorious or demeritorious in the sight of God.

Objection 2. Further, an instrument acquires no merit or demerit in the sight of him that uses it; because the entire action of the instrument belongs to the user. Now when man acts he is the instrument of the Divine power which is the principal cause of his action; hence it is written (Is. 10:15): "Shall the axe boast itself against him that cutteth with it? Or shall the saw exalt itself against him by whom it is drawn?" where man while acting is evidently compared to an instrument. Therefore man merits or demerits nothing in God's sight, by good or evil deeds.

Objection 3. Further, a human action acquires merit or demerit through being ordained to someone else. But not all human actions are ordained to God. Therefore not every good or evil action acquires merit or demerit in God's sight.

On the contrary, It is written (Eccles. 12:14): "All things that are done, God will bring into judgment. . . whether it be good or evil." Now judgment implies retribution, in respect of which we speak of merit and demerit. Therefore every human action, both good and evil, acquires merit or demerit in God's sight.

I answer that, A human action, as stated above (a. 3), acquires merit or demerit, through being ordained to someone else, either by reason of himself, or by reason of the community: and in each way, our actions,

good and evil, acquire merit or demerit, in the sight of God. On the part of God Himself, inasmuch as He is man's last end; and it is our duty to refer all our actions to the last end, as stated above (q. 19, a. 10). Consequently, whoever does an evil deed, not referable to God, does not give God the honor due to Him as our last end. On the part of the whole community of the universe, because in every community, he who governs the community, cares, first of all, for the common good; wherefore it is his business to award retribution for such things as are done well or ill in the community. Now God is the governor and ruler of the whole universe, as stated in the Ia, q. 103, a. 5: and especially of rational creatures. Consequently it is evident that human actions acquire merit or demerit in reference to Him: else it would follow that human actions are no business of God's.

Reply to Objection 1. God in Himself neither gains nor losses anything by the action of man: but man, for his part, takes something from God, or offers something to Him, when he observes or does not observe the order instituted by God.

Reply to Objection 2. Man is so moved, as an instrument, by God, that, at the same time, he moves himself by his free-will, as was explained above (q. 9, a. 6, ad 3). Consequently, by his action, he acquires merit or demerit in God's sight.

Reply to Objection 3. Man is not ordained to the body politic, according to all that he is and has; and so it does not follow that every action of his acquires merit or demerit in relation to the body politic. But all that man is, and can, and has, must be referred to God: and therefore every action of man, whether good or bad, acquires merit or demerit in the sight of God, as far as the action itself is concerned.

FIRST PART OF THE SECOND PART, QUESTION 22

Of the Subject of the Soul's Passions

(In Three Articles)

We must now consider the passions of the soul: first, in general; secondly, in particular. Taking them in general, there are four things to be considered: (1) Their subject: (2) The difference between them: (3) Their mutual relationship: (4) Their malice and goodness.

Under the first head there are three points of inquiry:

- (1) Whether there is any passion in the soul?
- (2) Whether passion is in the appetitive rather than in the apprehensive part?
- (3) Whether passion is in the sensitive appetite rather than in the intellectual appetite, which is called the will?

Whether any passion is in the soul?

Ia IIae q. 22 a. 1

Objection 1. It would seem that there is no passion in the soul. Because passivity belongs to matter. But the soul is not composed of matter and form, as stated in the Ia, q. 75, a. 5. Therefore there is no passion in the soul.

Objection 2. Further, passion is movement, as is stated in Phys. iii, 3. But the soul is not moved, as is proved in De Anima i, 3. Therefore passion is not in the soul.

Objection 3. Further, passion is the road to corruption; since "every passion, when increased, alters the substance," as is stated in Topic. vi, 6. But the soul is incorruptible. Therefore no passion is in the soul.

On the contrary, The Apostle says (Rom. 7:5): "When we were in the flesh, the passions of sins which were by the law, did the work in our members." Now sins are, properly speaking, in the soul. Therefore passions also, which are described as being "of sins," are in the soul.

I answer that, The word "passive" is used in three ways. First, in a general way, according as whatever receives something is passive, although nothing is taken from it: thus we may say that the air is passive when it is lit up. But this is to be perfected rather than to be passive. Secondly, the word "passive" is employed in its proper sense, when something is received, while something else is taken away: and this happens in two ways. For sometimes that which is lost is unsuitable to the thing: thus when an animal's body is healed, and loses sickness. At other times the contrary occurs: thus to ail is to be passive; because the ailment is received and health is lost. And here we have passion in its most proper acceptation. For a thing is said to be passive from its being drawn to the agent: and when a thing recedes from what is suitable to it, then especially does it appear to be drawn to something else. Moreover in

De Generat. i, 3 it is stated that when a more excellent thing is generated from a less excellent, we have generation simply, and corruption in a particular respect: whereas the reverse is the case, when from a more excellent thing, a less excellent is generated. In these three ways it happens that passions are in the soul. For in the sense of mere reception, we speak of "feeling and understanding as being a kind of passion" (De Anima i, 5). But passion, accompanied by the loss of something, is only in respect of a bodily transmutation; wherefore passion properly so called cannot be in the soul, save accidentally, in so far, to wit, as the "composite" is passive. But here again we find a difference; because when this transmutation is for the worse, it has more of the nature of a passion, than when it is for the better: hence sorrow is more properly a passion than joy.

Reply to Objection 1. It belongs to matter to be passive in such a way as to lose something and to be transmuted: hence this happens only in those things that are composed of matter and form. But passivity, as implying mere reception, need not be in matter, but can be in anything that is in potentiality. Now, though the soul is not composed of matter and form, yet it has something of potentiality, in respect of which it is competent to receive or to be passive, according as the act of understanding is a kind of passion, as stated in De Anima iii, 4.

Reply to Objection 2. Although it does not belong to the soul in itself to be passive and to be moved, yet it belongs accidentally as stated in De Anima i, 3.

Reply to Objection 3. This argument is true of passion accompanied by transmutation to something worse. And passion, in this sense, is not found in the soul, except accidentally: but the composite, which is corruptible, admits of it by reason of its own nature.

Objection 1. It would seem that passion is in the apprehensive part of the soul rather than in the appetitive. Because that which is first in any genus, seems to rank first among all things that are in that genus, and to be their cause, as is stated in *Metaph.* ii, 1. Now passion is found to be in the apprehensive, before being in the appetitive part: for the appetitive part is not affected unless there be a previous passion in the apprehensive part. Therefore passion is in the apprehensive part more than in the appetitive.

Objection 2. Further, what is more active is less passive; for action is contrary to passion. Now the appetitive part is more active than the apprehensive part. Therefore it seems that passion is more in the apprehensive part.

Objection 3. Further, just as the sensitive appetite is the power of a corporeal organ, so is the power of sensitive apprehension. But passion in the soul occurs, properly speaking, in respect of a bodily transmutation. Therefore passion is not more in the sensitive appetitive than in the sensitive apprehensive part.

On the contrary, Augustine says (*De Civ. Dei* ix, 4) that “the movement of the soul, which the Greeks called *pathe*, are styled by some of our writers, Cicero* for instance, disturbances; by some, affections or emotions; while others rendering the Greek more accurately, call them passions.” From this it is evident that the passions of the soul are the same as affections. But affections manifestly belong to the appetitive, and not to the apprehensive part. Therefore the passions are in the appetitive rather than in the apprehensive part.

I answer that, As we have already stated (a. 1) the word “passion” implies that the patient is drawn to that which belongs to the agent. Now the soul is drawn to a thing by the appetitive power rather than by the apprehensive power: because the soul has, through its appetitive power, an order to things as they are in themselves: hence the Philosopher says (*Metaph.* vi, 4) that “good and evil,” i.e. the objects of the appetitive power, “are in things themselves.” On the other hand the apprehensive power is not drawn to a thing, as it is in itself; but knows it by reason of an “intention” of the thing, which “intention” it has in itself, or receives in its own way. Hence we find it stated (*Metaph.* vi, 4) that “the true and the false,” which pertain to knowledge, “are not in things, but in the mind.” Consequently it is evident that the nature of passion is consistent with the appetitive, rather than with the apprehensive part.

Reply to Objection 1. In things relating to perfection the case is the opposite, in comparison to things that pertain to defect. Because in things relating to per-

fection, intensity is in proportion to the approach to one first principle; to which the nearer a thing approaches, the more intense it is. Thus the intensity of a thing possessed of light depends on its approach to something endowed with light in a supreme degree, to which the nearer a thing approaches the more light it possesses. But in things that relate to defect, intensity depends, not on approach to something supreme, but in receding from that which is perfect; because therein consists the very notion of privation and defect. Wherefore the less a thing recedes from that which stands first, the less intense it is: and the result is that at first we always find some small defect, which afterwards increases as it goes on. Now passion pertains to defect, because it belongs to a thing according as it is in potentiality. Wherefore in those things that approach to the Supreme Perfection, i.e. to God, there is but little potentiality and passion: while in other things, consequently, there is more. Hence also, in the supreme, i.e. the apprehensive, power of the soul, passion is found less than in the other powers.

Reply to Objection 2. The appetitive power is said to be more active, because it is, more than the apprehensive power, the principle of the exterior action: and this for the same reason that it is more passive, namely, its being related to things as existing in themselves: since it is through the external action that we come into contact with things.

Reply to Objection 3. As stated in the Ia, q. 78, a. 3 the organs of the soul can be changed in two ways. First, by a spiritual change, in respect of which the organ receives an “intention” of the object. And this is essential to the act of the sensitive apprehension: thus is the eye changed by the object visible, not by being colored, but by receiving an intention of color. But the organs are receptive of another and natural change, which affects their natural disposition; for instance, when they become hot or cold, or undergo some similar change. And whereas this kind of change is accidental to the act of the sensitive apprehension; for instance, if the eye be wearied through gazing intently at something or be overcome by the intensity of the object: on the other hand, it is essential to the act of the sensitive appetite; wherefore the material element in the definitions of the movements of the appetitive part, is the natural change of the organ; for instance, “anger is” said to be “a kindling of the blood about the heart.” Hence it is evident that the notion of passion is more consistent with the act of the sensitive appetite, than with that of the sensitive apprehension, although both are actions of a corporeal organ.

* Those things which the Greeks call *pathe*, we prefer to call disturbances rather than diseases (*Tusc.* iv. 5)

Objection 1. It would seem that passion is not more in the sensitive than in the intellectual appetite. For Dionysius declares (Div. Nom. ii) Hierotheus “to be taught by a kind of yet more Godlike instruction; not only by learning Divine things, but also by suffering [patiens] them.” But the sensitive appetite cannot “suffer” Divine things, since its object is the sensible good. Therefore passion is in the intellectual appetite, just as it is also in the sensitive appetite.

Objection 2. Further, the more powerful the active force, the more intense the passion. But the object of the intellectual appetite, which is the universal good, is a more powerful active force than the object of the sensitive appetite, which is a particular good. Therefore passion is more consistent with the intellectual than with the sensitive appetite.

Objection 3. Further, joy and love are said to be passions. But these are to be found in the intellectual and not only in the sensitive appetite: else they would not be ascribed by the Scriptures to God and the angels. Therefore the passions are not more in the sensitive than in the intellectual appetite.

On the contrary, Damascene says (De Fide Orth. ii, 22), while describing the animal passions: “Passion is a movement of the sensitive appetite when we imagine good or evil: in other words, passion is a movement of the irrational soul, when we think of good or evil.”

I answer that, As stated above (a. 1) passion is properly to be found where there is corporeal transmutation. This corporeal transmutation is found in the act of the sensitive appetite, and is not only spiritual, as in

the sensitive apprehension, but also natural. Now there is no need for corporeal transmutation in the act of the intellectual appetite: because this appetite is not exercised by means of a corporeal organ. It is therefore evident that passion is more properly in the act of the sensitive appetite, than in that of the intellectual appetite; and this is again evident from the definitions of Damascene quoted above.

Reply to Objection 1. By “suffering” Divine things is meant being well affected towards them, and united to them by love: and this takes place without any alteration in the body.

Reply to Objection 2. Intensity of passion depends not only on the power of the agent, but also on the passibility of the patient: because things that are disposed to passion, suffer much even from petty agents. Therefore although the object of the intellectual appetite has greater activity than the object of the sensitive appetite, yet the sensitive appetite is more passive.

Reply to Objection 3. When love and joy and the like are ascribed to God or the angels, or to man in respect of his intellectual appetite, they signify simple acts of the will having like effects, but without passion. Hence Augustine says (De Civ. Dei ix, 5): “The holy angels feel no anger while they punish...no fellow-feeling with misery while they relieve the unhappy: and yet ordinary human speech is wont to ascribe to them also these passions by name, because, although they have none of our weakness, their acts bear a certain resemblance to ours.”

Objection 1. It would seem that there is no passion in the soul. Because passivity belongs to matter. But the soul is not composed of matter and form, as stated in the Ia, q. 75, a. 5. Therefore there is no passion in the soul.

Objection 2. Further, passion is movement, as is stated in Phys. iii, 3. But the soul is not moved, as is proved in De Anima i, 3. Therefore passion is not in the soul.

Objection 3. Further, passion is the road to corruption; since “every passion, when increased, alters the substance,” as is stated in Topic. vi, 6. But the soul is incorruptible. Therefore no passion is in the soul.

On the contrary, The Apostle says (Rom. 7:5): “When we were in the flesh, the passions of sins which were by the law, did the work in our members.” Now sins are, properly speaking, in the soul. Therefore passions also, which are described as being “of sins,” are in the soul.

Answer that, The word “passive” is used in three ways. First, in a general way, according as whatever receives something is passive, although nothing is taken from it: thus we may say that the air is passive when it is lit up. But this is to be perfected rather than to be passive. Secondly, the word “passive” is employed in its proper sense, when something is received, while something else is taken away: and this happens in two ways. For sometimes that which is lost is unsuitable to the thing: thus when an animal’s body is healed, and loses sickness. At other times the contrary occurs: thus to ail is to be passive; because the ailment is received and health is lost. And here we have passion in its most proper acceptation. For a thing is said to be passive from its being drawn to the agent: and when a thing recedes from what is suitable to it, then especially does it appear to be drawn to something else. Moreover in

De Generat. i, 3 it is stated that when a more excellent thing is generated from a less excellent, we have generation simply, and corruption in a particular respect: whereas the reverse is the case, when from a more excellent thing, a less excellent is generated. In these three ways it happens that passions are in the soul. For in the sense of mere reception, we speak of “feeling and understanding as being a kind of passion” (De Anima i, 5). But passion, accompanied by the loss of something, is only in respect of a bodily transmutation; wherefore passion properly so called cannot be in the soul, save accidentally, in so far, to wit, as the “composite” is passive. But here again we find a difference; because when this transmutation is for the worse, it has more of the nature of a passion, than when it is for the better: hence sorrow is more properly a passion than joy.

Reply to Objection 1. It belongs to matter to be passive in such a way as to lose something and to be transmuted: hence this happens only in those things that are composed of matter and form. But passivity, as implying mere reception, need not be in matter, but can be in anything that is in potentiality. Now, though the soul is not composed of matter and form, yet it has something of potentiality, in respect of which it is competent to receive or to be passive, according as the act of understanding is a kind of passion, as stated in De Anima iii, 4.

Reply to Objection 2. Although it does not belong to the soul in itself to be passive and to be moved, yet it belongs accidentally as stated in De Anima i, 3.

Reply to Objection 3. This argument is true of passion accompanied by transmutation to something worse. And passion, in this sense, is not found in the soul, except accidentally: but the composite, which is corruptible, admits of it by reason of its own nature.

Objection 1. It would seem that passion is in the apprehensive part of the soul rather than in the appetitive. Because that which is first in any genus, seems to rank first among all things that are in that genus, and to be their cause, as is stated in *Metaph.* ii, 1. Now passion is found to be in the apprehensive, before being in the appetitive part: for the appetitive part is not affected unless there be a previous passion in the apprehensive part. Therefore passion is in the apprehensive part more than in the appetitive.

Objection 2. Further, what is more active is less passive; for action is contrary to passion. Now the appetitive part is more active than the apprehensive part. Therefore it seems that passion is more in the apprehensive part.

Objection 3. Further, just as the sensitive appetite is the power of a corporeal organ, so is the power of sensitive apprehension. But passion in the soul occurs, properly speaking, in respect of a bodily transmutation. Therefore passion is not more in the sensitive appetitive than in the sensitive apprehensive part.

On the contrary, Augustine says (*De Civ. Dei* ix, 4) that “the movement of the soul, which the Greeks called *pathe*, are styled by some of our writers, Cicero* for instance, disturbances; by some, affections or emotions; while others rendering the Greek more accurately, call them passions.” From this it is evident that the passions of the soul are the same as affections. But affections manifestly belong to the appetitive, and not to the apprehensive part. Therefore the passions are in the appetitive rather than in the apprehensive part.

I answer that, As we have already stated (a. 1) the word “passion” implies that the patient is drawn to that which belongs to the agent. Now the soul is drawn to a thing by the appetitive power rather than by the apprehensive power: because the soul has, through its appetitive power, an order to things as they are in themselves: hence the Philosopher says (*Metaph.* vi, 4) that “good and evil,” i.e. the objects of the appetitive power, “are in things themselves.” On the other hand the apprehensive power is not drawn to a thing, as it is in itself; but knows it by reason of an “intention” of the thing, which “intention” it has in itself, or receives in its own way. Hence we find it stated (*Metaph.* vi, 4) that “the true and the false,” which pertain to knowledge, “are not in things, but in the mind.” Consequently it is evident that the nature of passion is consistent with the appetitive, rather than with the apprehensive part.

Reply to Objection 1. In things relating to perfection the case is the opposite, in comparison to things that pertain to defect. Because in things relating to per-

fection, intensity is in proportion to the approach to one first principle; to which the nearer a thing approaches, the more intense it is. Thus the intensity of a thing possessed of light depends on its approach to something endowed with light in a supreme degree, to which the nearer a thing approaches the more light it possesses. But in things that relate to defect, intensity depends, not on approach to something supreme, but in receding from that which is perfect; because therein consists the very notion of privation and defect. Wherefore the less a thing recedes from that which stands first, the less intense it is: and the result is that at first we always find some small defect, which afterwards increases as it goes on. Now passion pertains to defect, because it belongs to a thing according as it is in potentiality. Wherefore in those things that approach to the Supreme Perfection, i.e. to God, there is but little potentiality and passion: while in other things, consequently, there is more. Hence also, in the supreme, i.e. the apprehensive, power of the soul, passion is found less than in the other powers.

Reply to Objection 2. The appetitive power is said to be more active, because it is, more than the apprehensive power, the principle of the exterior action: and this for the same reason that it is more passive, namely, its being related to things as existing in themselves: since it is through the external action that we come into contact with things.

Reply to Objection 3. As stated in the Ia, q. 78, a. 3 the organs of the soul can be changed in two ways. First, by a spiritual change, in respect of which the organ receives an “intention” of the object. And this is essential to the act of the sensitive apprehension: thus is the eye changed by the object visible, not by being colored, but by receiving an intention of color. But the organs are receptive of another and natural change, which affects their natural disposition; for instance, when they become hot or cold, or undergo some similar change. And whereas this kind of change is accidental to the act of the sensitive apprehension; for instance, if the eye be wearied through gazing intently at something or be overcome by the intensity of the object: on the other hand, it is essential to the act of the sensitive appetite; wherefore the material element in the definitions of the movements of the appetitive part, is the natural change of the organ; for instance, “anger is” said to be “a kindling of the blood about the heart.” Hence it is evident that the notion of passion is more consistent with the act of the sensitive appetite, than with that of the sensitive apprehension, although both are actions of a corporeal organ.

* Those things which the Greeks call *pathe*, we prefer to call disturbances rather than diseases (*Tusc.* iv. 5)

Objection 1. It would seem that passion is not more in the sensitive than in the intellectual appetite. For Dionysius declares (Div. Nom. ii) Hierotheus “to be taught by a kind of yet more Godlike instruction; not only by learning Divine things, but also by suffering [patiens] them.” But the sensitive appetite cannot “suffer” Divine things, since its object is the sensible good. Therefore passion is in the intellectual appetite, just as it is also in the sensitive appetite.

Objection 2. Further, the more powerful the active force, the more intense the passion. But the object of the intellectual appetite, which is the universal good, is a more powerful active force than the object of the sensitive appetite, which is a particular good. Therefore passion is more consistent with the intellectual than with the sensitive appetite.

Objection 3. Further, joy and love are said to be passions. But these are to be found in the intellectual and not only in the sensitive appetite: else they would not be ascribed by the Scriptures to God and the angels. Therefore the passions are not more in the sensitive than in the intellectual appetite.

On the contrary, Damascene says (De Fide Orth. ii, 22), while describing the animal passions: “Passion is a movement of the sensitive appetite when we imagine good or evil: in other words, passion is a movement of the irrational soul, when we think of good or evil.”

I answer that, As stated above (a. 1) passion is properly to be found where there is corporeal transmutation. This corporeal transmutation is found in the act of the sensitive appetite, and is not only spiritual, as in

the sensitive apprehension, but also natural. Now there is no need for corporeal transmutation in the act of the intellectual appetite: because this appetite is not exercised by means of a corporeal organ. It is therefore evident that passion is more properly in the act of the sensitive appetite, than in that of the intellectual appetite; and this is again evident from the definitions of Damascene quoted above.

Reply to Objection 1. By “suffering” Divine things is meant being well affected towards them, and united to them by love: and this takes place without any alteration in the body.

Reply to Objection 2. Intensity of passion depends not only on the power of the agent, but also on the passibility of the patient: because things that are disposed to passion, suffer much even from petty agents. Therefore although the object of the intellectual appetite has greater activity than the object of the sensitive appetite, yet the sensitive appetite is more passive.

Reply to Objection 3. When love and joy and the like are ascribed to God or the angels, or to man in respect of his intellectual appetite, they signify simple acts of the will having like effects, but without passion. Hence Augustine says (De Civ. Dei ix, 5): “The holy angels feel no anger while they punish...no fellow-feeling with misery while they relieve the unhappy: and yet ordinary human speech is wont to ascribe to them also these passions by name, because, although they have none of our weakness, their acts bear a certain resemblance to ours.”

FIRST PART OF THE SECOND PART, QUESTION 23

How the Passions Differ From One Another (In Four Articles)

We must now consider how the passions differ from one another: and under this head there are four points of inquiry:

- (1) Whether the passions of the concupiscible part are different from those of the irascible part?
- (2) Whether the contrariety of passions in the irascible part is based on the contrariety of good and evil?
- (3) Whether there is any passion that has no contrary?
- (4) Whether, in the same power, there are any passions, differing in species, but not contrary to one another?

Whether the passions of the concupiscible part are different from those of the irascible part? Ia IIae q. 23 a. 1

Objection 1. It would seem that the same passions are in the irascible and concupiscible parts. For the Philosopher says (Ethic. ii, 5) that the passions of the soul are those emotions “which are followed by joy or sorrow.” But joy and sorrow are in the concupiscible part. Therefore all the passions are in the concupiscible part, and not some in the irascible, others in the concupiscible part.

Objection 2. Further, on the words of Mat. 13:33, “The kingdom of heaven is like to leaven,” etc., Jerome’s gloss says: “We should have prudence in the reason; hatred of vice in the irascible faculty; desire of virtue, in the concupiscible part.” But hatred is in the concupiscible faculty, as also is love, of which it is the contrary, as is stated in Topic. ii, 7. Therefore the same passion is in the concupiscible and irascible faculties.

Objection 3. Further, passions and actions differ specifically according to their objects. But the objects of the irascible and concupiscible passions are the same, viz. good and evil. Therefore the same passions are in the irascible and concupiscible faculties.

On the contrary, The acts of the different powers differ in species; for instance, to see, and to hear. But the irascible and the concupiscible are two powers into which the sensitive appetite is divided, as stated in the Ia, q. 81, a. 2. Therefore, since the passions are movements of the sensitive appetite, as stated above (q. 22, a. 3), the passions of the irascible faculty are specifically distinct from those of the concupiscible part.

I answer that, The passions of the irascible part differ in species from those of the concupiscible faculty. For since different powers have different objects, as stated in the Ia, q. 77, a. 3, the passions of different powers must of necessity be referred to different objects. Much more, therefore, do the passions of different faculties differ in species; since a greater difference in the object is required to diversify the species of the powers, than to diversify the species of passions or actions. For just as in the physical order, diversity of genus arises from diversity in the potentiality of matter, while diver-

sity of species arises from diversity of form in the same matter; so in the acts of the soul, those that belong to different powers, differ not only in species but also in genus, while acts and passions regarding different specific objects, included under the one common object of a single power, differ as the species of that genus.

In order, therefore, to discern which passions are in the irascible, and which in the concupiscible, we must take the object of each of these powers. For we have stated in the Ia, q. 81, a. 2, that the object of the concupiscible power is sensible good or evil, simply apprehended as such, which causes pleasure or pain. But, since the soul must, of necessity, experience difficulty or struggle at times, in acquiring some such good, or in avoiding some such evil, in so far as such good or evil is more than our animal nature can easily acquire or avoid; therefore this very good or evil, inasmuch as it is of an arduous or difficult nature, is the object of the irascible faculty. Therefore whatever passions regard good or evil absolutely, belong to the concupiscible power; for instance, joy, sorrow, love, hatred, and such like: whereas those passions which regard good or bad as arduous, through being difficult to obtain or avoid, belong to the irascible faculty; such are daring, fear, hope and the like.

Reply to Objection 1. As stated in the Ia, q. 81, a. 2, the irascible faculty is bestowed on animals, in order to remove the obstacles that hinder the concupiscible power from tending towards its object, either by making some good difficult to obtain, or by making some evil hard to avoid. The result is that all the irascible passions terminate in the concupiscible passions: and thus it is that even the passions which are in the irascible faculty are followed by joy and sadness which are in the concupiscible faculty.

Reply to Objection 2. Jerome ascribes hatred of vice to the irascible faculty, not by reason of hatred, which is properly a concupiscible passion; but on account of the struggle, which belongs to the irascible power.

Reply to Objection 3. Good, inasmuch as it is delightful, moves the concupiscible power. But if it prove difficult to obtain, from this very fact it has a certain contrariety to the concupiscible power: and hence

the need of another power tending to that good. The same applies to evil. And this power is the irascible faculty. Consequently the concupiscible passions are specifically different from the irascible passions.

Whether the contrariety of the irascible passions is based on the contrariety of good and evil?

Ia IIae q. 23 a. 2

Objection 1. It would seem that the contrariety of the irascible passions is based on no other contrariety than that of good and evil. For the irascible passions are ordained to the concupiscible passions, as stated above (a. 1, ad 1). But the contrariety of the concupiscible passions is no other than that of good and evil; take, for instance, love and hatred, joy and sorrow. Therefore the same applies to the irascible passions.

Objection 2. Further, passions differ according to their objects; just as movements differ according to their termini. But there is no other contrariety of movements, except that of the termini, as is stated in Phys. v, 3. Therefore there is no other contrariety of passions, save that of the objects. Now the object of the appetite is good or evil. Therefore in no appetitive power can there be contrariety of passions other than that of good and evil.

Objection 3. Further, “every passion of the soul is by way of approach and withdrawal,” as Avicenna declares in his sixth book of Physics. Now approach results from the apprehension of good; withdrawal, from the apprehension of evil: since just as “good is what all desire” (Ethic. i, 1), so evil is what all shun. Therefore, in the passions of the soul, there can be no other contrariety than that of good and evil.

On the contrary, Fear and daring are contrary to one another, as stated in Ethic. iii, 7. But fear and daring do not differ in respect of good and evil: because each regards some kind of evil. Therefore not every contrariety of the irascible passions is that of good and evil.

I answer that, Passion is a kind of movement, as stated in Phys. iii, 3. Therefore contrariety of passions is based on contrariety of movements or changes. Now there is a twofold contrariety in changes and movements, as stated in Phys. v, 5. One is according to approach and withdrawal in respect of the same term: and this contrariety belongs properly to changes, i.e. to generation, which is a change “to being,” and to corruption, which is a change “from being.” The other contrariety is according to opposition of termini, and belongs properly to movements: thus whitening, which is movement from black to white, is contrary to blackening, which is

movement from white to black.

Accordingly there is a twofold contrariety in the passions of the soul: one, according to contrariety of objects, i.e. of good and evil; the other, according to approach and withdrawal in respect of the same term. In the concupiscible passions the former contrariety alone is to be found; viz. that which is based on the objects: whereas in the irascible passions, we find both forms of contrariety. The reason of this is that the object of the concupiscible faculty, as stated above (a. 1), is sensible good or evil considered absolutely. Now good, as such, cannot be a term wherefrom, but only a term whereto, since nothing shuns good as such; on the contrary, all things desire it. In like manner, nothing desires evil, as such; but all things shun it: wherefore evil cannot have the aspect of a term whereto, but only of a term wherefrom. Accordingly every concupiscible passion in respect of good, tends to it, as love, desire and joy; while every concupiscible passion in respect of evil, tends from it, as hatred, avoidance or dislike, and sorrow. Wherefore, in the concupiscible passions, there can be no contrariety of approach and withdrawal in respect of the same object.

On the other hand, the object of the irascible faculty is sensible good or evil, considered not absolutely, but under the aspect of difficulty or arduousness. Now the good which is difficult or arduous, considered as good, is of such a nature as to produce in us a tendency to it, which tendency pertains to the passion of “hope”; whereas, considered as arduous or difficult, it makes us turn from it; and this pertains to the passion of “despair.” In like manner the arduous evil, considered as an evil, has the aspect of something to be shunned; and this belongs to the passion of “fear”: but it also contains a reason for tending to it, as attempting something arduous, whereby to escape being subject to evil; and this tendency is called “daring.” Consequently, in the irascible passions we find contrariety in respect of good and evil (as between hope and fear): and also contrariety according to approach and withdrawal in respect of the same term (as between daring and fear).

From what has been said the replies to the objections are evident.

Objection 1. It would seem that every passion of the soul has a contrary. For every passion of the soul is either in the irascible or in the concupiscible faculty, as stated above (a. 1). But both kinds of passion have their respective modes of contrariety. Therefore every passion of the soul has its contrary.

Objection 2. Further, every passion of the soul has either good or evil for its object; for these are the common objects of the appetitive part. But a passion having good for its object, is contrary to a passion having evil for its object. Therefore every passion has a contrary.

Objection 3. Further, every passion of the soul is in respect of approach or withdrawal, as stated above (a. 2). But every approach has a corresponding contrary withdrawal, and vice versa. Therefore every passion of the soul has a contrary.

On the contrary, Anger is a passion of the soul. But no passion is set down as being contrary to anger, as stated in Ethic. iv, 5. Therefore not every passion has a contrary.

I answer that, The passion of anger is peculiar in this, that it cannot have a contrary, either according to approach and withdrawal, or according to the contrariety of good and evil. For anger is caused by a difficult evil already present: and when such an evil is present,

the appetite must needs either succumb, so that it does not go beyond the limits of "sadness," which is a concupiscible passion; or else it has a movement of attack on the hurtful evil, which movement is that of "anger." But it cannot have a movement of withdrawal: because the evil is supposed to be already present or past. Thus no passion is contrary to anger according to contrariety of approach and withdrawal.

In like manner neither can there be according to contrariety of good and evil. Because the opposite of present evil is good obtained, which can be no longer have the aspect of arduousness or difficulty. Nor, when once good is obtained, does there remain any other movement, except the appetite's repose in the good obtained; which repose belongs to joy, which is a passion of the concupiscible faculty.

Accordingly no movement of the soul can be contrary to the movement of anger, and nothing else than cessation from its movement is contrary thereto; thus the Philosopher says (Rhet. ii, 3) that "calm is contrary to anger," by opposition not of contrariety but of negation or privation.

From what has been said the replies to the objections are evident.

Objection 1. It would seem that there cannot be, in the same power, specifically different passions that are not contrary to one another. For the passions of the soul differ according to their objects. Now the objects of the soul's passions are good and evil; and on this distinction is based the contrariety of the passions. Therefore no passions of the same power, that are not contrary to one another, differ specifically.

Objection 2. Further, difference of species implies a difference of form. But every difference of form is in respect of some contrariety, as stated in Metaph. x, 8. Therefore passions of the same power, that are not contrary to one another, do not differ specifically.

Objection 3. Further, since every passion of the soul consists in approach or withdrawal in respect of good or evil, it seems that every difference in the passions of the soul must needs arise from the difference of good and evil; or from the difference of approach and withdrawal; or from degrees in approach or withdrawal. Now the first two differences cause contrariety in the passions of the soul, as stated above (a. 2): whereas the third difference does not diversify the species; else the species of the soul's passions would be infinite. Therefore it is not possible for passions of the same power to differ in species, without being contrary to one another.

On the contrary, Love and joy differ in species, and

are in the concupiscible power; and yet they are not contrary to one another; rather, in fact, one causes the other. Therefore in the same power there are passions that differ in species without being contrary to one another.

I answer that, Passions differ in accordance with their active causes, which, in the case of the passions of the soul, are their objects. Now, the difference in active causes may be considered in two ways: first, from the point of view of their species or nature, as fire differs from water; secondly, from the point of view of the difference in their active power. In the passions of the soul we can treat the difference of their active or motive causes in respect of their motive power, as if they were natural agents. For every mover, in a fashion, either draws the patient to itself, or repels it from itself. Now in drawing it to itself, it does three things in the patient. Because, in the first place, it gives the patient an inclination or aptitude to tend to the mover: thus a light body, which is above, bestows lightness on the body generated, so that it has an inclination or aptitude to be above. Secondly, if the generated body be outside its proper place, the mover gives it movement towards that place. Thirdly, it makes it to rest, when it shall have come to its proper place: since to the same cause are due, both rest in a place, and the movement to that place. The same applies to the cause of repulsion.

Now, in the movements of the appetitive faculty, good has, as it were, a force of attraction, while evil has a force of repulsion. In the first place, therefore, good causes, in the appetitive power, a certain inclination, aptitude or connaturalness in respect of good: and this belongs to the passion of "love": the corresponding contrary of which is "hatred" in respect of evil. Secondly, if the good be not yet possessed, it causes in the appetite a movement towards the attainment of the good beloved: and this belongs to the passion of "desire" or "concupiscence": and contrary to it, in respect of evil, is the passion of "aversion" or "dislike." Thirdly, when the good is obtained, it causes the appetite to rest, as it were, in the good obtained: and this belongs to the passion of "delight" or "joy"; the contrary of which, in respect of evil, is "sorrow" or "sadness."

On the other hand, in the irascible passions, the aptitude, or inclination to seek good, or to shun evil, is presupposed as arising from the concupiscible faculty,

which regards good or evil absolutely. And in respect of good not yet obtained, we have "hope" and "despair." In respect of evil not yet present we have "fear" and "daring." But in respect of good obtained there is no irascible passion: because it is no longer considered in the light of something arduous, as stated above (a. 3). But evil already present gives rise to the passion of "anger."

Accordingly it is clear that in the concupiscible faculty there are three couples of passions; viz. love and hatred, desire and aversion, joy and sadness. In like manner there are three groups in the irascible faculty; viz. hope and despair, fear and daring, and anger which has not contrary passion.

Consequently there are altogether eleven passions differing specifically; six in the concupiscible faculty, and five in the irascible; and under these all the passions of the soul are contained.

From this the replies to the objections are evident.

Objection 1. It would seem that the same passions are in the irascible and concupiscible parts. For the Philosopher says (*Ethic.* ii, 5) that the passions of the soul are those emotions “which are followed by joy or sorrow.” But joy and sorrow are in the concupiscible part. Therefore all the passions are in the concupiscible part, and not some in the irascible, others in the concupiscible part.

Objection 2. Further, on the words of *Mat.* 13:33, “The kingdom of heaven is like to leaven,” etc., Jerome’s gloss says: “We should have prudence in the reason; hatred of vice in the irascible faculty; desire of virtue, in the concupiscible part.” But hatred is in the concupiscible faculty, as also is love, of which it is the contrary, as is stated in *Topic.* ii, 7. Therefore the same passion is in the concupiscible and irascible faculties.

Objection 3. Further, passions and actions differ specifically according to their objects. But the objects of the irascible and concupiscible passions are the same, viz. good and evil. Therefore the same passions are in the irascible and concupiscible faculties.

On the contrary, The acts of the different powers differ in species; for instance, to see, and to hear. But the irascible and the concupiscible are two powers into which the sensitive appetite is divided, as stated in the Ia, q. 81, a. 2. Therefore, since the passions are movements of the sensitive appetite, as stated above (q. 22, a. 3), the passions of the irascible faculty are specifically distinct from those of the concupiscible part.

I answer that, The passions of the irascible part differ in species from those of the concupiscible faculty. For since different powers have different objects, as stated in the Ia, q. 77, a. 3, the passions of different powers must of necessity be referred to different objects. Much more, therefore, do the passions of different faculties differ in species; since a greater difference in the object is required to diversify the species of the powers, than to diversify the species of passions or actions. For just as in the physical order, diversity of genus arises from diversity in the potentiality of matter, while diversity of species arises from diversity of form in the same matter; so in the acts of the soul, those that belong to different powers, differ not only in species but also in genus, while acts and passions regarding different spe-

cific objects, included under the one common object of a single power, differ as the species of that genus.

In order, therefore, to discern which passions are in the irascible, and which in the concupiscible, we must take the object of each of these powers. For we have stated in the Ia, q. 81, a. 2, that the object of the concupiscible power is sensible good or evil, simply apprehended as such, which causes pleasure or pain. But, since the soul must, of necessity, experience difficulty or struggle at times, in acquiring some such good, or in avoiding some such evil, in so far as such good or evil is more than our animal nature can easily acquire or avoid; therefore this very good or evil, inasmuch as it is of an arduous or difficult nature, is the object of the irascible faculty. Therefore whatever passions regard good or evil absolutely, belong to the concupiscible power; for instance, joy, sorrow, love, hatred, and such like: whereas those passions which regard good or bad as arduous, through being difficult to obtain or avoid, belong to the irascible faculty; such are daring, fear, hope and the like.

Reply to Objection 1. As stated in the Ia, q. 81, a. 2, the irascible faculty is bestowed on animals, in order to remove the obstacles that hinder the concupiscible power from tending towards its object, either by making some good difficult to obtain, or by making some evil hard to avoid. The result is that all the irascible passions terminate in the concupiscible passions: and thus it is that even the passions which are in the irascible faculty are followed by joy and sadness which are in the concupiscible faculty.

Reply to Objection 2. Jerome ascribes hatred of vice to the irascible faculty, not by reason of hatred, which is properly a concupiscible passion; but on account of the struggle, which belongs to the irascible power.

Reply to Objection 3. Good, inasmuch as it is delightful, moves the concupiscible power. But if it prove difficult to obtain, from this very fact it has a certain contrariety to the concupiscible power: and hence the need of another power tending to that good. The same applies to evil. And this power is the irascible faculty. Consequently the concupiscible passions are specifically different from the irascible passions.

Objection 1. It would seem that the contrariety of the irascible passions is based on no other contrariety than that of good and evil. For the irascible passions are ordained to the concupiscible passions, as stated above (a. 1, ad 1). But the contrariety of the concupiscible passions is no other than that of good and evil; take, for instance, love and hatred, joy and sorrow. Therefore the same applies to the irascible passions.

Objection 2. Further, passions differ according to their objects; just as movements differ according to their termini. But there is no other contrariety of movements, except that of the termini, as is stated in *Phys.* v, 3. Therefore there is no other contrariety of passions, save that of the objects. Now the object of the appetite is good or evil. Therefore in no appetitive power can there be contrariety of passions other than that of good and evil.

Objection 3. Further, “every passion of the soul is by way of approach and withdrawal,” as Avicenna declares in his sixth book of *Physics*. Now approach results from the apprehension of good; withdrawal, from the apprehension of evil: since just as “good is what all desire” (*Ethic.* i, 1), so evil is what all shun. Therefore, in the passions of the soul, there can be no other contrariety than that of good and evil.

On the contrary, Fear and daring are contrary to one another, as stated in *Ethic.* iii, 7. But fear and daring do not differ in respect of good and evil: because each regards some kind of evil. Therefore not every contrariety of the irascible passions is that of good and evil.

I answer that, Passion is a kind of movement, as stated in *Phys.* iii, 3. Therefore contrariety of passions is based on contrariety of movements or changes. Now there is a twofold contrariety in changes and movements, as stated in *Phys.* v, 5. One is according to approach and withdrawal in respect of the same term: and this contrariety belongs properly to changes, i.e. to generation, which is a change “to being,” and to corruption, which is a change “from being.” The other contrariety is according to opposition of termini, and belongs properly to movements: thus whitening, which is movement from black to white, is contrary to blackening, which is

movement from white to black.

Accordingly there is a twofold contrariety in the passions of the soul: one, according to contrariety of objects, i.e. of good and evil; the other, according to approach and withdrawal in respect of the same term. In the concupiscible passions the former contrariety alone is to be found; viz. that which is based on the objects: whereas in the irascible passions, we find both forms of contrariety. The reason of this is that the object of the concupiscible faculty, as stated above (a. 1), is sensible good or evil considered absolutely. Now good, as such, cannot be a term wherefrom, but only a term whereto, since nothing shuns good as such; on the contrary, all things desire it. In like manner, nothing desires evil, as such; but all things shun it: wherefore evil cannot have the aspect of a term whereto, but only of a term wherefrom. Accordingly every concupiscible passion in respect of good, tends to it, as love, desire and joy; while every concupiscible passion in respect of evil, tends from it, as hatred, avoidance or dislike, and sorrow. Wherefore, in the concupiscible passions, there can be no contrariety of approach and withdrawal in respect of the same object.

On the other hand, the object of the irascible faculty is sensible good or evil, considered not absolutely, but under the aspect of difficulty or arduousness. Now the good which is difficult or arduous, considered as good, is of such a nature as to produce in us a tendency to it, which tendency pertains to the passion of “hope”; whereas, considered as arduous or difficult, it makes us turn from it; and this pertains to the passion of “despair.” In like manner the arduous evil, considered as an evil, has the aspect of something to be shunned; and this belongs to the passion of “fear”: but it also contains a reason for tending to it, as attempting something arduous, whereby to escape being subject to evil; and this tendency is called “daring.” Consequently, in the irascible passions we find contrariety in respect of good and evil (as between hope and fear): and also contrariety according to approach and withdrawal in respect of the same term (as between daring and fear).

From what has been said the replies to the objections are evident.

Objection 1. It would seem that every passion of the soul has a contrary. For every passion of the soul is either in the irascible or in the concupiscible faculty, as stated above (a. 1). But both kinds of passion have their respective modes of contrariety. Therefore every passion of the soul has its contrary.

Objection 2. Further, every passion of the soul has either good or evil for its object; for these are the common objects of the appetitive part. But a passion having good for its object, is contrary to a passion having evil for its object. Therefore every passion has a contrary.

Objection 3. Further, every passion of the soul is in respect of approach or withdrawal, as stated above (a. 2). But every approach has a corresponding contrary withdrawal, and vice versa. Therefore every passion of the soul has a contrary.

On the contrary, Anger is a passion of the soul. But no passion is set down as being contrary to anger, as stated in *Ethic. iv, 5*. Therefore not every passion has a contrary.

I answer that, The passion of anger is peculiar in this, that it cannot have a contrary, either according to approach and withdrawal, or according to the contrariety of good and evil. For anger is caused by a difficult evil already present: and when such an evil is present,

the appetite must needs either succumb, so that it does not go beyond the limits of “sadness,” which is a concupiscible passion; or else it has a movement of attack on the hurtful evil, which movement is that of “anger.” But it cannot have a movement of withdrawal: because the evil is supposed to be already present or past. Thus no passion is contrary to anger according to contrariety of approach and withdrawal.

In like manner neither can there be according to contrariety of good and evil. Because the opposite of present evil is good obtained, which can be no longer have the aspect of arduousness or difficulty. Nor, when once good is obtained, does there remain any other movement, except the appetite’s repose in the good obtained; which repose belongs to joy, which is a passion of the concupiscible faculty.

Accordingly no movement of the soul can be contrary to the movement of anger, and nothing else than cessation from its movement is contrary thereto; thus the Philosopher says (*Rhet. ii, 3*) that “calm is contrary to anger,” by opposition not of contrariety but of negation or privation.

From what has been said the replies to the objections are evident.

Objection 1. It would seem that there cannot be, in the same power, specifically different passions that are not contrary to one another. For the passions of the soul differ according to their objects. Now the objects of the soul's passions are good and evil; and on this distinction is based the contrariety of the passions. Therefore no passions of the same power, that are not contrary to one another, differ specifically.

Objection 2. Further, difference of species implies a difference of form. But every difference of form is in respect of some contrariety, as stated in *Metaph.* x, 8. Therefore passions of the same power, that are not contrary to one another, do not differ specifically.

Objection 3. Further, since every passion of the soul consists in approach or withdrawal in respect of good or evil, it seems that every difference in the passions of the soul must needs arise from the difference of good and evil; or from the difference of approach and withdrawal; or from degrees in approach or withdrawal. Now the first two differences cause contrariety in the passions of the soul, as stated above (a. 2): whereas the third difference does not diversify the species; else the species of the soul's passions would be infinite. Therefore it is not possible for passions of the same power to differ in species, without being contrary to one another.

On the contrary, Love and joy differ in species, and are in the concupiscible power; and yet they are not contrary to one another; rather, in fact, one causes the other. Therefore in the same power there are passions that differ in species without being contrary to one another.

I answer that, Passions differ in accordance with their active causes, which, in the case of the passions of the soul, are their objects. Now, the difference in active causes may be considered in two ways: first, from the point of view of their species or nature, as fire differs from water; secondly, from the point of view of the difference in their active power. In the passions of the soul we can treat the difference of their active or motive causes in respect of their motive power, as if they were natural agents. For every mover, in a fashion, either draws the patient to itself, or repels it from itself. Now in drawing it to itself, it does three things in the patient. Because, in the first place, it gives the patient an inclination or aptitude to tend to the mover: thus a light body, which is above, bestows lightness on

the body generated, so that it has an inclination or aptitude to be above. Secondly, if the generated body be outside its proper place, the mover gives it movement towards that place. Thirdly, it makes it to rest, when it shall have come to its proper place: since to the same cause are due, both rest in a place, and the movement to that place. The same applies to the cause of repulsion.

Now, in the movements of the appetitive faculty, good has, as it were, a force of attraction, while evil has a force of repulsion. In the first place, therefore, good causes, in the appetitive power, a certain inclination, aptitude or connaturalness in respect of good: and this belongs to the passion of "love": the corresponding contrary of which is "hatred" in respect of evil. Secondly, if the good be not yet possessed, it causes in the appetite a movement towards the attainment of the good beloved: and this belongs to the passion of "desire" or "concupiscence": and contrary to it, in respect of evil, is the passion of "aversion" or "dislike." Thirdly, when the good is obtained, it causes the appetite to rest, as it were, in the good obtained: and this belongs to the passion of "delight" or "joy"; the contrary of which, in respect of evil, is "sorrow" or "sadness."

On the other hand, in the irascible passions, the aptitude, or inclination to seek good, or to shun evil, is presupposed as arising from the concupiscible faculty, which regards good or evil absolutely. And in respect of good not yet obtained, we have "hope" and "despair." In respect of evil not yet present we have "fear" and "daring." But in respect of good obtained there is no irascible passion: because it is no longer considered in the light of something arduous, as stated above (a. 3). But evil already present gives rise to the passion of "anger."

Accordingly it is clear that in the concupiscible faculty there are three couples of passions; viz. love and hatred, desire and aversion, joy and sadness. In like manner there are three groups in the irascible faculty; viz. hope and despair, fear and daring, and anger which has not contrary passion.

Consequently there are altogether eleven passions differing specifically; six in the concupiscible faculty, and five in the irascible; and under these all the passions of the soul are contained.

From this the replies to the objections are evident.

FIRST PART OF THE SECOND PART, QUESTION 24

Of Good and Evil in the Passions of the Soul (In Four Articles)

We must now consider good and evil in the passions of the soul: and under this head there are four points of inquiry:

- (1) Whether moral good and evil can be found in the passions of the soul?
- (2) Whether every passion of the soul is morally evil?
- (3) Whether every passion increases or decreases the goodness or malice of an act?
- (4) Whether any passion is good or evil specifically?

Whether moral good and evil can be found in the passions of the soul?

Ia IIae q. 24 a. 1

Objection 1. It would seem that no passion of the soul is morally good or evil. For moral good and evil are proper to man: since “morals are properly predicated of man,” as Ambrose says (Super Luc. Prolog.). But passions are not proper to man, for he has them in common with other animals. Therefore no passion of the soul is morally good or evil.

Objection 2. Further, the good or evil of man consists in “being in accord, or in disaccord with reason,” as Dionysius says (Div. Nom. iv). Now the passions of the soul are not in the reason, but in the sensitive appetite, as stated above (q. 22, a. 3). Therefore they have no connection with human, i.e. moral, good or evil.

Objection 3. Further, the Philosopher says (Ethic. ii, 5) that “we are neither praised nor blamed for our passions.” But we are praised and blamed for moral good and evil. Therefore the passions are not morally good or evil.

On the contrary, Augustine says (De Civ. Dei xiv, 7) while speaking of the passions of the soul: “They are evil if our love is evil; good if our love is good.”

I answer that, We may consider the passions of the soul in two ways: first, in themselves; secondly, as being subject to the command of the reason and will. If then the passions be considered in themselves, to wit, as movements of the irrational appetite, thus there is no moral good or evil in them, since this depends on the

reason, as stated above (q. 18, a. 5). If, however, they be considered as subject to the command of the reason and will, then moral good and evil are in them. Because the sensitive appetite is nearer than the outward members to the reason and will; and yet the movements and actions of the outward members are morally good or evil, inasmuch as they are voluntary. Much more, therefore, may the passions, in so far as they are voluntary, be called morally good or evil. And they are said to be voluntary, either from being commanded by the will, or from not being checked by the will.

Reply to Objection 1. These passions, considered in themselves, are common to man and other animals: but, as commanded by the reason, they are proper to man.

Reply to Objection 2. Even the lower appetitive powers are called rational, in so far as “they partake of reason in some sort” (Ethic. i, 13).

Reply to Objection 3. The Philosopher says that we are neither praised nor blamed for our passions considered absolutely; but he does not exclude their becoming worthy of praise or blame, in so far as they are subordinate to reason. Hence he continues: “For the man who fears or is angry, is not praised... or blamed, but the man who is angry in a certain way, i.e. according to, or against reason.”

Whether every passion of the soul is evil morally?

Ia IIae q. 24 a. 2

Objection 1. It would seem that all the passions of the soul are morally evil. For Augustine says (De Civ. Dei ix, 4) that “some call the soul’s passions diseases or disturbances of the soul”*. But every disease or disturbance of the soul is morally evil. Therefore every passion of the soul is evil morally.

Objection 2. Further, Damascene says (De Fide Orth. ii, 22) that “movement in accord with nature is an action, but movement contrary to nature is passion.” But in movements of the soul, what is against nature is sinful and morally evil: hence he says elsewhere (De

Fide Orth. ii, 4) that “the devil turned from that which is in accord with nature to that which is against nature.” Therefore these passions are morally evil.

Objection 3. Further, whatever leads to sin, has an aspect of evil. But these passions lead to sin: wherefore they are called “the passions of sins” (Rom. 7:5). Therefore it seems that they are morally evil.

On the contrary, Augustine says (De Civ. Dei xiv, 9) that “all these emotions are right in those whose love is rightly placed... For they fear to sin, they desire to persevere; they grieve for sin, they rejoice in good

* Those things which the Greeks call *pathē*, we prefer to call disturbances rather than diseases (Tusc. iv. 5)

works.”

I answer that, On this question the opinion of the Stoics differed from that of the Peripatetics: for the Stoics held that all passions are evil, while the Peripatetics maintained that moderate passions are good. This difference, although it appears great in words, is nevertheless, in reality, none at all, or but little, if we consider the intent of either school. For the Stoics did not discern between sense and intellect; and consequently neither between the intellectual and sensitive appetite. Hence they did not discriminate the passions of the soul from the movements of the will, in so far as the passions of the soul are in the sensitive appetite, while the simple movements of the will are in the intellectual appetite: but every rational movement of the appetitive part they call will, while they called passion, a movement that exceeds the limits of reason. Wherefore Cicero, following their opinion (*De Tusc. Quaest. iii, 4*) calls all passions “diseases of the soul”: whence he argues that “those who are diseased are unsound; and those who are unsound are wanting in sense.” Hence we speak of those who are wanting in sense of being “unsound.”

On the other hand, the Peripatetics give the name of “passions” to all the movements of the sensitive ap-

petite. Wherefore they esteem them good, when they are controlled by reason; and evil when they are not controlled by reason. Hence it is evident that Cicero was wrong in disapproving (*De Tusc. Quaest. iii, 4*) of the Peripatetic theory of a mean in the passions, when he says that “every evil, though moderate, should be shunned; for, just as a body, though it be moderately ailing, is not sound; so, this mean in the diseases or passions of the soul, is not sound.” For passions are not called “diseases” or “disturbances” of the soul, save when they are not controlled by reason.

Hence the reply to the First Objection is evident.

Reply to Objection 2. In every passion there is an increase or decrease in the natural movement of the heart, according as the heart is moved more or less intensely by contraction and dilatation; and hence it derives the character of passion. But there is no need for passion to deviate always from the order of natural reason.

Reply to Objection 3. The passions of the soul, in so far as they are contrary to the order of reason, incline us to sin: but in so far as they are controlled by reason, they pertain to virtue.

Whether passion increases or decreases the goodness or malice of an act?

Ia IIae q. 24 a. 3

Objection 1. It would seem that every passion decreases the goodness of a moral action. For anything that hinders the judgment of reason, on which depends the goodness of a moral act, consequently decreases the goodness of the moral act. But every passion hinders the judgment of reason: for Sallust says (*Catilin.*): “All those that take counsel about matters of doubt, should be free from hatred, anger, friendship and pity.” Therefore passion decreases the goodness of a moral act.

Objection 2. Further, the more a man’s action is like to God, the better it is: hence the Apostle says (*Eph. 5:1*): “Be ye followers of God, as most dear children.” But “God and the holy angels feel no anger when they punish... no fellow-feeling with misery when they relieve the unhappy,” as Augustine says (*De Civ. Dei ix, 5*). Therefore it is better to do such like deeds without than with a passion of the soul.

Objection 3. Further, just as moral evil depends on its relation to reason, so also does moral good. But moral evil is lessened by passion: for he sins less, who sins from passion, than he who sins deliberately. Therefore he does a better deed, who does well without passion, than he who does with passion.

On the contrary, Augustine says (*De Civ. Dei ix, 5*) that “the passion of pity is obedient to reason, when pity is bestowed without violating right, as when the poor are relieved, or the penitent forgiven.” But nothing that is obedient to reason lessens the moral good. Therefore a passion of the soul does not lessen moral good.

I answer that, As the Stoics held that every passion of the soul is evil, they consequently held that every passion of the soul lessens the goodness of an act; since the admixture of evil either destroys good altogether, or makes it to be less good. And this is true indeed, if by passions we understand none but the inordinate movements of the sensitive appetite, considered as disturbances or ailments. But if we give the name of passions to all the movements of the sensitive appetite, then it belongs to the perfection of man’s good that his passions be moderated by reason. For since man’s good is founded on reason as its root, that good will be all the more perfect, according as it extends to more things pertaining to man. Wherefore no one questions the fact that it belongs to the perfection of moral good, that the actions of the outward members be controlled by the law of reason. Hence, since the sensitive appetite can obey reason, as stated above (*q. 17, a. 7*), it belongs to the perfection of moral or human good, that the passions themselves also should be controlled by reason.

Accordingly just as it is better that man should both will good and do it in his external act; so also does it belong to the perfection of moral good, that man should be moved unto good, not only in respect of his will, but also in respect of his sensitive appetite; according to *Ps. 83:3*: “My heart and my flesh have rejoiced in the living God”: where by “heart” we are to understand the intellectual appetite, and by “flesh” the sensitive appetite.

Reply to Objection 1. The passions of the soul may stand in a twofold relation to the judgment of rea-

son. First, antecedently: and thus, since they obscure the judgment of reason, on which the goodness of the moral act depends, they diminish the goodness of the act; for it is more praiseworthy to do a work of charity from the judgment of reason than from the mere passion of pity. In the second place, consequently: and this in two ways. First, by way of redundancy: because, to wit, when the higher part of the soul is intensely moved to anything, the lower part also follows that movement: and thus the passion that results in consequence, in the sensitive appetite, is a sign of the intensity of the will, and so indicates greater moral goodness. Secondly, by way of choice; when, to wit, a man, by the judgment of

his reason, chooses to be affected by a passion in order to work more promptly with the co-operation of the sensitive appetite. And thus a passion of the soul increases the goodness of an action.

Reply to Objection 2. In God and the angels there is no sensitive appetite, nor again bodily members: and so in them good does not depend on the right ordering of passions or of bodily actions, as it does in us.

Reply to Objection 3. A passion that tends to evil, and precedes the judgment of reason, diminishes sin; but if it be consequent in either of the ways mentioned above (Reply obj. 1), it aggravates the sin, or else it is a sign of its being more grievous.

Whether any passion is good or evil in its species?

Ia IIae q. 24 a. 4

Objection 1. It would seem that no passion of the soul is good or evil morally according to its species. Because moral good and evil depend on reason. But the passions are in the sensitive appetite; so that accordance with reason is accidental to them. Since, therefore, nothing accidental belongs to a thing's species, it seems that no passion is good or evil according to its species.

Objection 2. Further, acts and passions take their species from their object. If, therefore, any passion were good or evil, according to its species, it would follow that those passions the object of which is good, are specifically good, such as love, desire and joy: and that those passions, the object of which is evil, are specifically evil, as hatred, fear and sadness. But this is clearly false. Therefore no passion is good or evil according to its species.

Objection 3. Further, there is no species of passion that is not to be found in other animals. But moral good is in man alone. Therefore no passion of the soul is good or evil according to its species.

On the contrary, Augustine says (De Civ. Dei ix, 5) that "pity is a kind of virtue." Moreover, the Philosopher says (Ethic. ii, 7) that modesty is a praiseworthy passion. Therefore some passions are good or evil according to their species.

I answer that, We ought, seemingly, to apply to passions what has been said in regard to acts (q. 18, Aa. 5,6; q. 20, a. 1)—viz. that the species of a passion, as the species of an act, can be considered from

two points of view. First, according to its natural genus; and thus moral good and evil have no connection with the species of an act or passion. Secondly, according to its moral genus, inasmuch as it is voluntary and controlled by reason. In this way moral good and evil can belong to the species of a passion, in so far as the object to which a passion tends, is, of itself, in harmony or in discord with reason: as is clear in the case of "shame" which is base fear; and of "envy" which is sorrow for another's good: for thus passions belong to the same species as the external act.

Reply to Objection 1. This argument considers the passions in their natural species, in so far as the sensitive appetite is considered in itself. But in so far as the sensitive appetite obeys reason, good and evil of reason are no longer accidentally in the passions of the appetite, but essentially.

Reply to Objection 2. Passions having a tendency to good, are themselves good, if they tend to that which is truly good, and in like manner, if they turn away from that which is truly evil. On the other hand, those passions which consist in aversion from good, and a tendency to evil, are themselves evil.

Reply to Objection 3. In irrational animals the sensitive appetite does not obey reason. Nevertheless, in so far as they are led by a kind of estimative power, which is subject to a higher, i.e. the Divine reason, there is a certain likeness of moral good in them, in regard to the soul's passions.

Objection 1. It would seem that no passion of the soul is morally good or evil. For moral good and evil are proper to man: since “morals are properly predicated of man,” as Ambrose says (Super Luc. Prolog.). But passions are not proper to man, for he has them in common with other animals. Therefore no passion of the soul is morally good or evil.

Objection 2. Further, the good or evil of man consists in “being in accord, or in disaccord with reason,” as Dionysius says (Div. Nom. iv). Now the passions of the soul are not in the reason, but in the sensitive appetite, as stated above (q. 22, a. 3). Therefore they have no connection with human, i.e. moral, good or evil.

Objection 3. Further, the Philosopher says (Ethic. ii, 5) that “we are neither praised nor blamed for our passions.” But we are praised and blamed for moral good and evil. Therefore the passions are not morally good or evil.

On the contrary, Augustine says (De Civ. Dei xiv, 7) while speaking of the passions of the soul: “They are evil if our love is evil; good if our love is good.”

I answer that, We may consider the passions of the soul in two ways: first, in themselves; secondly, as being subject to the command of the reason and will. If then the passions be considered in themselves, to wit, as movements of the irrational appetite, thus there is no moral good or evil in them, since this depends on the

reason, as stated above (q. 18, a. 5). If, however, they be considered as subject to the command of the reason and will, then moral good and evil are in them. Because the sensitive appetite is nearer than the outward members to the reason and will; and yet the movements and actions of the outward members are morally good or evil, inasmuch as they are voluntary. Much more, therefore, may the passions, in so far as they are voluntary, be called morally good or evil. And they are said to be voluntary, either from being commanded by the will, or from not being checked by the will.

Reply to Objection 1. These passions, considered in themselves, are common to man and other animals: but, as commanded by the reason, they are proper to man.

Reply to Objection 2. Even the lower appetitive powers are called rational, in so far as “they partake of reason in some sort” (Ethic. i, 13).

Reply to Objection 3. The Philosopher says that we are neither praised nor blamed for our passions considered absolutely; but he does not exclude their becoming worthy of praise or blame, in so far as they are subordinate to reason. Hence he continues: “For the man who fears or is angry, is not praised. . . or blamed, but the man who is angry in a certain way, i.e. according to, or against reason.”

Objection 1. It would seem that all the passions of the soul are morally evil. For Augustine says (*De Civ. Dei* ix, 4) that “some call the soul’s passions diseases or disturbances of the soul”*. But every disease or disturbance of the soul is morally evil. Therefore every passion of the soul is evil morally.

Objection 2. Further, Damascene says (*De Fide Orth.* ii, 22) that “movement in accord with nature is an action, but movement contrary to nature is passion.” But in movements of the soul, what is against nature is sinful and morally evil: hence he says elsewhere (*De Fide Orth.* ii, 4) that “the devil turned from that which is in accord with nature to that which is against nature.” Therefore these passions are morally evil.

Objection 3. Further, whatever leads to sin, has an aspect of evil. But these passions lead to sin: wherefore they are called “the passions of sins” (*Rom.* 7:5). Therefore it seems that they are morally evil.

On the contrary, Augustine says (*De Civ. Dei* xiv, 9) that “all these emotions are right in those whose love is rightly placed. . . For they fear to sin, they desire to persevere; they grieve for sin, they rejoice in good works.”

I answer that, On this question the opinion of the Stoics differed from that of the Peripatetics: for the Stoics held that all passions are evil, while the Peripatetics maintained that moderate passions are good. This difference, although it appears great in words, is nevertheless, in reality, none at all, or but little, if we consider the intent of either school. For the Stoics did not discern between sense and intellect; and consequently neither between the intellectual and sensitive appetite. Hence they did not discriminate the passions of the soul from the movements of the will, in so far as the passions of the soul are in the sensitive appetite, while the simple

movements of the will are in the intellectual appetite: but every rational movement of the appetitive part they call will, while they called passion, a movement that exceeds the limits of reason. Wherefore Cicero, following their opinion (*De Tusc. Quaest.* iii, 4) calls all passions “diseases of the soul”: whence he argues that “those who are diseased are unsound; and those who are unsound are wanting in sense.” Hence we speak of those who are wanting in sense of being “unsound.”

On the other hand, the Peripatetics give the name of “passions” to all the movements of the sensitive appetite. Wherefore they esteem them good, when they are controlled by reason; and evil when they are not controlled by reason. Hence it is evident that Cicero was wrong in disapproving (*De Tusc. Quaest.* iii, 4) of the Peripatetic theory of a mean in the passions, when he says that “every evil, though moderate, should be shunned; for, just as a body, though it be moderately ailing, is not sound; so, this mean in the diseases or passions of the soul, is not sound.” For passions are not called “diseases” or “disturbances” of the soul, save when they are not controlled by reason.

Hence the reply to the First Objection is evident.

Reply to Objection 2. In every passion there is an increase or decrease in the natural movement of the heart, according as the heart is moved more or less intensely by contraction and dilatation; and hence it derives the character of passion. But there is no need for passion to deviate always from the order of natural reason.

Reply to Objection 3. The passions of the soul, in so far as they are contrary to the order of reason, incline us to sin: but in so far as they are controlled by reason, they pertain to virtue.

* Those things which the Greeks call *pathe*, we prefer to call disturbances rather than diseases (*Tusc.* iv. 5)

Objection 1. It would seem that every passion decreases the goodness of a moral action. For anything that hinders the judgment of reason, on which depends the goodness of a moral act, consequently decreases the goodness of the moral act. But every passion hinders the judgment of reason: for Sallust says (Catilin.): “All those that take counsel about matters of doubt, should be free from hatred, anger, friendship and pity.” Therefore passion decreases the goodness of a moral act.

Objection 2. Further, the more a man’s action is like to God, the better it is: hence the Apostle says (Eph. 5:1): “Be ye followers of God, as most dear children.” But “God and the holy angels feel no anger when they punish. . . no fellow-feeling with misery when they relieve the unhappy,” as Augustine says (De Civ. Dei ix, 5). Therefore it is better to do such like deeds without than with a passion of the soul.

Objection 3. Further, just as moral evil depends on its relation to reason, so also does moral good. But moral evil is lessened by passion: for he sins less, who sins from passion, than he who sins deliberately. Therefore he does a better deed, who does well without passion, than he who does with passion.

On the contrary, Augustine says (De Civ. Dei ix, 5) that “the passion of pity is obedient to reason, when pity is bestowed without violating right, as when the poor are relieved, or the penitent forgiven.” But nothing that is obedient to reason lessens the moral good. Therefore a passion of the soul does not lessen moral good.

I answer that, As the Stoics held that every passion of the soul is evil, they consequently held that every passion of the soul lessens the goodness of an act; since the admixture of evil either destroys good altogether, or makes it to be less good. And this is true indeed, if by passions we understand none but the inordinate movements of the sensitive appetite, considered as disturbances or ailments. But if we give the name of passions to all the movements of the sensitive appetite, then it belongs to the perfection of man’s good that his passions be moderated by reason. For since man’s good is founded on reason as its root, that good will be all the more perfect, according as it extends to more things

pertaining to man. Wherefore no one questions the fact that it belongs to the perfection of moral good, that the actions of the outward members be controlled by the law of reason. Hence, since the sensitive appetite can obey reason, as stated above (q. 17, a. 7), it belongs to the perfection of moral or human good, that the passions themselves also should be controlled by reason.

Accordingly just as it is better that man should both will good and do it in his external act; so also does it belong to the perfection of moral good, that man should be moved unto good, not only in respect of his will, but also in respect of his sensitive appetite; according to Ps. 83:3: “My heart and my flesh have rejoiced in the living God”: where by “heart” we are to understand the intellectual appetite, and by “flesh” the sensitive appetite.

Reply to Objection 1. The passions of the soul may stand in a twofold relation to the judgment of reason. First, antecedently: and thus, since they obscure the judgment of reason, on which the goodness of the moral act depends, they diminish the goodness of the act; for it is more praiseworthy to do a work of charity from the judgment of reason than from the mere passion of pity. In the second place, consequently: and this in two ways. First, by way of redundancy: because, to wit, when the higher part of the soul is intensely moved to anything, the lower part also follows that movement: and thus the passion that results in consequence, in the sensitive appetite, is a sign of the intensity of the will, and so indicates greater moral goodness. Secondly, by way of choice; when, to wit, a man, by the judgment of his reason, chooses to be affected by a passion in order to work more promptly with the co-operation of the sensitive appetite. And thus a passion of the soul increases the goodness of an action.

Reply to Objection 2. In God and the angels there is no sensitive appetite, nor again bodily members: and so in them good does not depend on the right ordering of passions or of bodily actions, as it does in us.

Reply to Objection 3. A passion that tends to evil, and precedes the judgment of reason, diminishes sin; but if it be consequent in either of the ways mentioned above (Reply obj. 1), it aggravates the sin, or else it is a sign of its being more grievous.

Objection 1. It would seem that no passion of the soul is good or evil morally according to its species. Because moral good and evil depend on reason. But the passions are in the sensitive appetite; so that accordance with reason is accidental to them. Since, therefore, nothing accidental belongs to a thing's species, it seems that no passion is good or evil according to its species.

Objection 2. Further, acts and passions take their species from their object. If, therefore, any passion were good or evil, according to its species, it would follow that those passions the object of which is good, are specifically good, such as love, desire and joy: and that those passions, the object of which is evil, are specifically evil, as hatred, fear and sadness. But this is clearly false. Therefore no passion is good or evil according to its species.

Objection 3. Further, there is no species of passion that is not to be found in other animals. But moral good is in man alone. Therefore no passion of the soul is good or evil according to its species.

On the contrary, Augustine says (De Civ. Dei ix, 5) that "pity is a kind of virtue." Moreover, the Philosopher says (Ethic. ii, 7) that modesty is a praiseworthy passion. Therefore some passions are good or evil according to their species.

I answer that, We ought, seemingly, to apply to passions what has been said in regard to acts (q. 18, Aa. 5,6; q. 20, a. 1)—viz. that the species of a passion, as the species of an act, can be considered from

two points of view. First, according to its natural genus; and thus moral good and evil have no connection with the species of an act or passion. Secondly, according to its moral genus, inasmuch as it is voluntary and controlled by reason. In this way moral good and evil can belong to the species of a passion, in so far as the object to which a passion tends, is, of itself, in harmony or in discord with reason: as is clear in the case of "shame" which is base fear; and of "envy" which is sorrow for another's good: for thus passions belong to the same species as the external act.

Reply to Objection 1. This argument considers the passions in their natural species, in so far as the sensitive appetite is considered in itself. But in so far as the sensitive appetite obeys reason, good and evil of reason are no longer accidentally in the passions of the appetite, but essentially.

Reply to Objection 2. Passions having a tendency to good, are themselves good, if they tend to that which is truly good, and in like manner, if they turn away from that which is truly evil. On the other hand, those passions which consist in aversion from good, and a tendency to evil, are themselves evil.

Reply to Objection 3. In irrational animals the sensitive appetite does not obey reason. Nevertheless, in so far as they are led by a kind of estimative power, which is subject to a higher, i.e. the Divine reason, there is a certain likeness of moral good in them, in regard to the soul's passions.

FIRST PART OF THE SECOND PART, QUESTION 25

Of the Order of the Passions to One Another (In Four Articles)

We must now consider the order of the passions to one another: and under this head there are four points of inquiry:

- (1) The relation of the irascible passions to the concupiscible passions;
- (2) The relation of the concupiscible passions to one another;
- (3) The relation of the irascible passions to one another;
- (4) The four principal passions.

Whether the irascible passions precede the concupiscible passions, or vice versa?

Ia IIae q. 25 a. 1

Objection 1. It would seem that the irascible passions precede the concupiscible passions. For the order of the passions is that of their objects. But the object of the irascible faculty is the difficult good, which seems to be the highest good. Therefore the irascible passions seem to precede the concupiscible passions.

Objection 2. Further, the mover precedes that which is moved. But the irascible faculty is compared to the concupiscible, as mover to that which is moved: since it is given to animals, for the purposed of removing the obstacles that hinder the concupiscible faculty from enjoying its object, as stated above (q. 23, a. 1, ad 1; Ia, q. 81, a. 2). Now “that which removes an obstacle, is a kind of mover” (Phys. viii, 4). Therefore the irascible passions precede the concupiscible passions.

Objection 3. Further, joy and sadness are concupiscible passions. But joy and sadness succeed to the irascible passions: for the Philosopher says (Ethic. iv, 5) that “retaliation causes anger to cease, because it produces pleasure instead of the previous pain.” Therefore the concupiscible passions follow the irascible passions.

On the contrary, The concupiscible passions regard the absolute good, while the irascible passions regard a restricted, viz. the difficult, good. Since, therefore, the absolute good precedes the restricted good, it seems that the concupiscible passions precede the irascible.

I answer that, In the concupiscible passions there is more diversity than in the passions of the irascible faculty. For in the former we find something relating to movement—e.g. desire; and something belonging to repose, e.g. joy and sadness. But in the irascible passions there is nothing pertaining to repose, and only that which belongs to movement. The reason of this is that when we find rest in a thing, we no longer look upon it as something difficult or arduous; whereas such is the object of the irascible faculty.

Now since rest is the end of movement, it is first in the order of intention, but last in the order of execution. If, therefore, we compare the passions of the irascible faculty with those concupiscible passions that denote rest in good, it is evident that in the order of execution, the irascible passions take precedence of such like pas-

sions of the concupiscible faculty: thus hope precedes joy, and hence causes it, according to the Apostle (Rom. 12:12): “Rejoicing in hope.” But the concupiscible passion which denotes rest in evil, viz. sadness, comes between two irascible passions: because it follows fear; since we become sad when we are confronted by the evil that we feared: while it precedes the movement of anger; since the movement of self-vindication, that results from sadness, is the movement of anger. And because it is looked upon as a good thing to pay back the evil done to us; when the angry man has achieved this he rejoices. Thus it is evident that every passion of the irascible faculty terminates in a concupiscible passion denoting rest, viz. either in joy or in sadness.

But if we compare the irascible passions to those concupiscible passions that denote movement, then it is clear that the latter take precedence: because the passions of the irascible faculty add something to those of the concupiscible faculty; just as the object of the irascible adds the aspect of arduousness or difficulty to the object of the concupiscible faculty. Thus hope adds to desire a certain effort, and a certain raising of the spirits to the realization of the arduous good. In like manner fear adds to aversion or detestation a certain lowness of spirits, on account of difficulty in shunning the evil.

Accordingly the passions of the irascible faculty stand between those concupiscible passions that denote movement towards good or evil, and those concupiscible passions that denote rest in good or evil. And it is therefore evident that the irascible passions both arise from and terminate in the passions of the concupiscible faculty.

Reply to Objection 1. This argument would prove, if the formal object of the concupiscible faculty were something contrary to the arduous, just as the formal object of the irascible faculty is that which is arduous. But because the object of the concupiscible faculty is good absolutely, it naturally precedes the object of the irascible, as the common precedes the proper.

Reply to Objection 2. The remover of an obstacle is not a direct but an accidental mover: and here we are speaking of passions as directly related to one another. Moreover, the irascible passion removes the ob-

stacle that hinders the concupiscible from resting in its object. Wherefore it only follows that the irascible pas-

sions precede those concupiscible passions that connote rest. The third object leads to the same conclusion.

Whether love is the first of the concupiscible passions?

Ia IIae q. 25 a. 2

Objection 1. It would seem that love is not the first of the concupiscible passions. For the concupiscible faculty is so called from concupiscence, which is the same passion as desire. But “things are named from their chief characteristic” (De Anima ii, 4). Therefore desire takes precedence of love.

Objection 2. Further, love implies a certain union; since it is a “uniting and binding force,” as Dionysius says (Div. Nom. iv). But concupiscence or desire is a movement towards union with the thing coveted or desired. Therefore desire precedes love.

Objection 3. Further, the cause precedes its effect. But pleasure is sometimes the cause of love: since some love on account of pleasure (Ethic. viii, 3,4). Therefore pleasure precedes love; and consequently love is not the first of the concupiscible passions.

On the contrary, Augustine says (De Civ. Dei xiv, 7,9) that all the passions are caused by love: since “love yearning for the beloved object, is desire; and, having and enjoying it, is joy.” Therefore love is the first of the concupiscible passions.

I answer that, Good and evil are the object of the concupiscible faculty. Now good naturally precedes evil; since evil is privation of good. Wherefore all the passions, the object of which is good, are naturally before those, the object of which is evil—that is to say, each precedes its contrary passion: because the quest of a good is the reason for shunning the opposite evil.

Now good has the aspect of an end, and the end is indeed first in the order of intention, but last in the order of execution. Consequently the order of the concupiscible passions can be considered either in the order of intention or in the order of execution. In the order of execution, the first place belongs to that which takes place first in the thing that tends to the end. Now it is evident that whatever tends to an end, has, in the first

place, an aptitude or proportion to that end, for nothing tends to a disproportionate end; secondly, it is moved to that end; thirdly, it rests in the end, after having attained it. And this very aptitude or proportion of the appetite to good is love, which is complacency in good; while movement towards good is desire or concupiscence; and rest in good is joy or pleasure. Accordingly in this order, love precedes desire, and desire precedes pleasure. But in the order of intention, it is the reverse: because the pleasure intended causes desire and love. For pleasure is the enjoyment of the good, which enjoyment is, in a way, the end, just as the good itself is, as stated above (q. 11, a. 3, ad 3).

Reply to Objection 1. We name a thing as we understand it, for “words are signs of thoughts,” as the Philosopher states (Peri Herm. i, 1). Now in most cases we know a cause by its effect. But the effect of love, when the beloved object is possessed, is pleasure: when it is not possessed, it is desire or concupiscence: and, as Augustine says (De Trin. x, 12), “we are more sensible to love, when we lack that which we love.” Consequently of all the concupiscible passions, concupiscence is felt most; and for this reason the power is named after it.

Reply to Objection 2. The union of lover and beloved is twofold. There is real union, consisting in the conjunction of one with the other. This union belongs to joy or pleasure, which follows desire. There is also an affective union, consisting in an aptitude or proportion, in so far as one thing, from the very fact of its having an aptitude for and an inclination to another, partakes of it: and love betokens such a union. This union precedes the movement of desire.

Reply to Objection 3. Pleasure causes love, in so far as it precedes love in the order of intention.

Whether hope is the first of the irascible passions?

Ia IIae q. 25 a. 3

Objection 1. It would seem that hope is not the first of the irascible passions. Because the irascible faculty is denominated from anger. Since, therefore, “things are named from their chief characteristic” (cf. a. 2, obj. 1), it seems that anger precedes and surpasses hope.

Objection 2. Further, the object of the irascible faculty is something arduous. Now it seems more arduous to strive to overcome a contrary evil that threatens soon to overtake us, which pertains to daring; or an evil actually present, which pertains to anger; than to strive simply to obtain some good. Again, it seems more arduous to strive to overcome a present evil, than a future evil. Therefore anger seems to be a stronger passion

than daring, and daring, than hope. And consequently it seems that hope does not precede them.

Objection 3. Further, when a thing is moved towards an end, the movement of withdrawal precedes the movement of approach. But fear and despair imply withdrawal from something; while daring and hope imply approach towards something. Therefore fear and despair precede hope and daring.

On the contrary, The nearer a thing is to the first, the more it precedes others. But hope is nearer to love, which is the first of the passions. Therefore hope is the first of the passions in the irascible faculty.

I answer that, As stated above (a. 1) all irascible

passions imply movement towards something. Now this movement of the irascible faculty towards something may be due to two causes: one is the mere aptitude or proportion to the end; and this pertains to love or hatred, those whose object is good, or evil; and this belongs to sadness or joy. As a matter of fact, the presence of good produces no passion in the irascible, as stated above (q. 23, Aa. 3,4); but the presence of evil gives rise to the passion of anger.

Since then in order of generation or execution, proportion or aptitude to the end precedes the achievement of the end; it follows that, of all the irascible passions, anger is the last in the order of generation. And among the other passions of the irascible faculty, which imply a movement arising from love of good or hatred of evil, those whose object is good, viz. hope and despair, must naturally precede those whose object is evil, viz. daring and fear: yet so that hope precedes despair; since hope is a movement towards good as such, which is essentially attractive, so that hope tends to good directly; whereas despair is a movement away from good, a movement which is consistent with good, not as such, but in respect of something else, wherefore its tendency from good is accidental, as it were. In like manner fear, through being a movement from evil, precedes daring. And that hope and despair naturally precede fear and daring is evident from this—that as the desire of good is the reason for avoiding evil, so hope and despair are the reason for fear and daring: because daring arises from the hope of victory, and fear arises from the despair of overcoming. Lastly, anger arises from daring: for no

one is angry while seeking vengeance, unless he dare to avenge himself, as Avicenna observes in the sixth book of his *Physics*. Accordingly, it is evident that hope is the first of all the irascible passions.

And if we wish to know the order of all the passions in the way of generation, love and hatred are first; desire and aversion, second; hope and despair, third; fear and daring, fourth; anger, fifth; sixth and last, joy and sadness, which follow from all the passions, as stated in *Ethic.* ii, 5: yet so that love precedes hatred; desire precedes aversion; hope precedes despair; fear precedes daring; and joy precedes sadness, as may be gathered from what has been stated above.

Reply to Objection 1. Because anger arises from the other passions, as an effect from the causes that precede it, it is from anger, as being more manifest than the other passions, that the power takes its name.

Reply to Objection 2. It is not the arduousness but the good that is the reason for approach or desire. Consequently hope, which regards good more directly, takes precedence: although at times daring or even anger regards something more arduous.

Reply to Objection 3. The movement of the appetite is essentially and directly towards the good as towards its proper object; its movement from evil results from this. For the movement of the appetitive part is in proportion, not to natural movement, but to the intention of nature, which intends the end before intending the removal of a contrary, which removal is desired only for the sake of obtaining the end.

Whether these are the four principal passions: joy, sadness, hope and fear?

Ia IIae q. 25 a. 4

Objection 1. It would seem that joy, sadness, hope and fear are not the four principal passions. For Augustine (*De Civ. Dei* xiv, 3,[7] sqq.) omits hope and puts desire in its place.

Objection 2. Further, there is a twofold order in the passions of the soul: the order of intention, and the order of execution or generation. The principal passions should therefore be taken, either in the order of intention; and thus joy and sadness, which are the final passions, will be the principal passions; or in the order of execution or generation, and thus love will be the principal passion. Therefore joy and sadness, hope and fear should in no way be called the four principal passions.

Objection 3. Further, just as daring is caused by hope, so fear is caused by despair. Either, therefore, hope and despair should be reckoned as principal passions, since they cause others: or hope and daring, from being akin to one another.

On the contrary, Boethius (*De Consol.* i) in enumerating the four principal passions, says:

“Banish joys: banish fears:

Away with hope: away with tears.”

I answer that, These four are commonly called the

principal passions. Two of them, viz. joy and sadness, are said to be principal because in them all the other passions have their completion and end; wherefore they arise from all the other passions, as is stated in *Ethic.* ii, 5. Fear and hope are principal passions, not because they complete the others simply, but because they complete them as regards the movement of the appetite towards something: for in respect of good, movement begins in love, goes forward to desire, and ends in hope; while in respect of evil, it begins in hatred, goes on to aversion, and ends in fear. Hence it is customary to distinguish these four passions in relation to the present and the future: for movement regards the future, while rest is in something present: so that joy relates to present good, sadness relates to present evil; hope regards future good, and fear, future evil.

As to the other passions that regard good or evil, present or future, they all culminate in these four. For this reason some have said that these four are the principal passions, because they are general passions; and this is true, provided that by hope and fear we understand the appetite’s common tendency to desire or shun something.

Reply to Objection 1. Augustine puts desire or covetousness in place of hope, in so far as they seem to regard the same object, viz. some future good.

Reply to Objection 2. These are called principal passions, in the order of intention and completion. And though fear and hope are not the last passions simply, yet they are the last of those passions that tend towards something as future. Nor can the argument be pressed any further except in the case of anger: yet neither can anger be reckoned a principal passion, because it is an

effect of daring, which cannot be a principal passion, as we shall state further on (Reply obj. 3).

Reply to Objection 3. Despair implies movement away from good; and this is, as it were, accidental: and daring implies movement towards evil; and this too is accidental. Consequently these cannot be principal passions; because that which is accidental cannot be said to be principal. And so neither can anger be called a principal passion, because it arises from daring.

Objection 1. It would seem that the irascible passions precede the concupiscible passions. For the order of the passions is that of their objects. But the object of the irascible faculty is the difficult good, which seems to be the highest good. Therefore the irascible passions seem to precede the concupiscible passions.

Objection 2. Further, the mover precedes that which is moved. But the irascible faculty is compared to the concupiscible, as mover to that which is moved: since it is given to animals, for the purposed of removing the obstacles that hinder the concupiscible faculty from enjoying its object, as stated above (q. 23, a. 1, ad 1; Ia, q. 81, a. 2). Now “that which removes an obstacle, is a kind of mover” (Phys. viii, 4). Therefore the irascible passions precede the concupiscible passions.

Objection 3. Further, joy and sadness are concupiscible passions. But joy and sadness succeed to the irascible passions: for the Philosopher says (Ethic. iv, 5) that “retaliation causes anger to cease, because it produces pleasure instead of the previous pain.” Therefore the concupiscible passions follow the irascible passions.

On the contrary, The concupiscible passions regard the absolute good, while the irascible passions regard a restricted, viz. the difficult, good. Since, therefore, the absolute good precedes the restricted good, it seems that the concupiscible passions precede the irascible.

I answer that, In the concupiscible passions there is more diversity than in the passions of the irascible faculty. For in the former we find something relating to movement—e.g. desire; and something belonging to repose, e.g. joy and sadness. But in the irascible passions there is nothing pertaining to repose, and only that which belongs to movement. The reason of this is that when we find rest in a thing, we no longer look upon it as something difficult or arduous; whereas such is the object of the irascible faculty.

Now since rest is the end of movement, it is first in the order of intention, but last in the order of execution. If, therefore, we compare the passions of the irascible faculty with those concupiscible passions that denote rest in good, it is evident that in the order of execution, the irascible passions take precedence of such like passions of the concupiscible faculty: thus hope precedes joy, and hence causes it, according to the Apostle (Rom.

12:12): “Rejoicing in hope.” But the concupiscible passion which denotes rest in evil, viz. sadness, comes between two irascible passions: because it follows fear; since we become sad when we are confronted by the evil that we feared: while it precedes the movement of anger; since the movement of self-vindication, that results from sadness, is the movement of anger. And because it is looked upon as a good thing to pay back the evil done to us; when the angry man has achieved this he rejoices. Thus it is evident that every passion of the irascible faculty terminates in a concupiscible passion denoting rest, viz. either in joy or in sadness.

But if we compare the irascible passions to those concupiscible passions that denote movement, then it is clear that the latter take precedence: because the passions of the irascible faculty add something to those of the concupiscible faculty; just as the object of the irascible adds the aspect of arduousness or difficulty to the object of the concupiscible faculty. Thus hope adds to desire a certain effort, and a certain raising of the spirits to the realization of the arduous good. In like manner fear adds to aversion or detestation a certain lowness of spirits, on account of difficulty in shunning the evil.

Accordingly the passions of the irascible faculty stand between those concupiscible passions that denote movement towards good or evil, and those concupiscible passions that denote rest in good or evil. And it is therefore evident that the irascible passions both arise from and terminate in the passions of the concupiscible faculty.

Reply to Objection 1. This argument would prove, if the formal object of the concupiscible faculty were something contrary to the arduous, just as the formal object of the irascible faculty is that which is arduous. But because the object of the concupiscible faculty is good absolutely, it naturally precedes the object of the irascible, as the common precedes the proper.

Reply to Objection 2. The remover of an obstacle is not a direct but an accidental mover: and here we are speaking of passions as directly related to one another. Moreover, the irascible passion removes the obstacle that hinders the concupiscible from resting in its object. Wherefore it only follows that the irascible passions precede those concupiscible passions that connote rest. The third object leads to the same conclusion.

Objection 1. It would seem that love is not the first of the concupiscible passions. For the concupiscible faculty is so called from concupiscence, which is the same passion as desire. But “things are named from their chief characteristic” (De Anima ii, 4). Therefore desire takes precedence of love.

Objection 2. Further, love implies a certain union; since it is a “uniting and binding force,” as Dionysius says (Div. Nom. iv). But concupiscence or desire is a movement towards union with the thing coveted or desired. Therefore desire precedes love.

Objection 3. Further, the cause precedes its effect. But pleasure is sometimes the cause of love: since some love on account of pleasure (Ethic. viii, 3,4). Therefore pleasure precedes love; and consequently love is not the first of the concupiscible passions.

On the contrary, Augustine says (De Civ. Dei xiv, 7,9) that all the passions are caused by love: since “love yearning for the beloved object, is desire; and, having and enjoying it, is joy.” Therefore love is the first of the concupiscible passions.

I answer that, Good and evil are the object of the concupiscible faculty. Now good naturally precedes evil; since evil is privation of good. Wherefore all the passions, the object of which is good, are naturally before those, the object of which is evil—that is to say, each precedes its contrary passion: because the quest of a good is the reason for shunning the opposite evil.

Now good has the aspect of an end, and the end is indeed first in the order of intention, but last in the order of execution. Consequently the order of the concupiscible passions can be considered either in the order of intention or in the order of execution. In the order of execution, the first place belongs to that which takes place first in the thing that tends to the end. Now it is evident that whatever tends to an end, has, in the first

place, an aptitude or proportion to that end, for nothing tends to a disproportionate end; secondly, it is moved to that end; thirdly, it rests in the end, after having attained it. And this very aptitude or proportion of the appetite to good is love, which is complacency in good; while movement towards good is desire or concupiscence; and rest in good is joy or pleasure. Accordingly in this order, love precedes desire, and desire precedes pleasure. But in the order of intention, it is the reverse: because the pleasure intended causes desire and love. For pleasure is the enjoyment of the good, which enjoyment is, in a way, the end, just as the good itself is, as stated above (q. 11, a. 3, ad 3).

Reply to Objection 1. We name a thing as we understand it, for “words are signs of thoughts,” as the Philosopher states (Peri Herm. i, 1). Now in most cases we know a cause by its effect. But the effect of love, when the beloved object is possessed, is pleasure: when it is not possessed, it is desire or concupiscence: and, as Augustine says (De Trin. x, 12), “we are more sensible to love, when we lack that which we love.” Consequently of all the concupiscible passions, concupiscence is felt most; and for this reason the power is named after it.

Reply to Objection 2. The union of lover and beloved is twofold. There is real union, consisting in the conjunction of one with the other. This union belongs to joy or pleasure, which follows desire. There is also an affective union, consisting in an aptitude or proportion, in so far as one thing, from the very fact of its having an aptitude for and an inclination to another, partakes of it: and love betokens such a union. This union precedes the movement of desire.

Reply to Objection 3. Pleasure causes love, in so far as it precedes love in the order of intention.

Objection 1. It would seem that hope is not the first of the irascible passions. Because the irascible faculty is denominated from anger. Since, therefore, “things are named from their chief characteristic” (cf. a. 2, obj. 1), it seems that anger precedes and surpasses hope.

Objection 2. Further, the object of the irascible faculty is something arduous. Now it seems more arduous to strive to overcome a contrary evil that threatens soon to overtake us, which pertains to daring; or an evil actually present, which pertains to anger; than to strive simply to obtain some good. Again, it seems more arduous to strive to overcome a present evil, than a future evil. Therefore anger seems to be a stronger passion than daring, and daring, than hope. And consequently it seems that hope does not precede them.

Objection 3. Further, when a thing is moved towards an end, the movement of withdrawal precedes the movement of approach. But fear and despair imply withdrawal from something; while daring and hope imply approach towards something. Therefore fear and despair precede hope and daring.

On the contrary, The nearer a thing is to the first, the more it precedes others. But hope is nearer to love, which is the first of the passions. Therefore hope is the first of the passions in the irascible faculty.

I answer that, As stated above (a. 1) all irascible passions imply movement towards something. Now this movement of the irascible faculty towards something may be due to two causes: one is the mere aptitude or proportion to the end; and this pertains to love or hatred, those whose object is good, or evil; and this belongs to sadness or joy. As a matter of fact, the presence of good produces no passion in the irascible, as stated above (q. 23, Aa. 3,4); but the presence of evil gives rise to the passion of anger.

Since then in order of generation or execution, proportion or aptitude to the end precedes the achievement of the end; it follows that, of all the irascible passions, anger is the last in the order of generation. And among the other passions of the irascible faculty, which imply a movement arising from love of good or hatred of evil, those whose object is good, viz. hope and despair, must naturally precede those whose object is evil, viz. daring and fear: yet so that hope precedes despair;

since hope is a movement towards good as such, which is essentially attractive, so that hope tends to good directly; whereas despair is a movement away from good, a movement which is consistent with good, not as such, but in respect of something else, wherefore its tendency from good is accidental, as it were. In like manner fear, through being a movement from evil, precedes daring. And that hope and despair naturally precede fear and daring is evident from this—that as the desire of good is the reason for avoiding evil, so hope and despair are the reason for fear and daring: because daring arises from the hope of victory, and fear arises from the despair of overcoming. Lastly, anger arises from daring: for no one is angry while seeking vengeance, unless he dare to avenge himself, as Avicenna observes in the sixth book of his Physics. Accordingly, it is evident that hope is the first of all the irascible passions.

And if we wish to know the order of all the passions in the way of generation, love and hatred are first; desire and aversion, second; hope and despair, third; fear and daring, fourth; anger, fifth; sixth and last, joy and sadness, which follow from all the passions, as stated in Ethic. ii, 5: yet so that love precedes hatred; desire precedes aversion; hope precedes despair; fear precedes daring; and joy precedes sadness, as may be gathered from what has been stated above.

Reply to Objection 1. Because anger arises from the other passions, as an effect from the causes that precede it, it is from anger, as being more manifest than the other passions, that the power takes its name.

Reply to Objection 2. It is not the arduousness but the good that is the reason for approach or desire. Consequently hope, which regards good more directly, takes precedence: although at times daring or even anger regards something more arduous.

Reply to Objection 3. The movement of the appetite is essentially and directly towards the good as towards its proper object; its movement from evil results from this. For the movement of the appetitive part is in proportion, not to natural movement, but to the intention of nature, which intends the end before intending the removal of a contrary, which removal is desired only for the sake of obtaining the end.

Objection 1. It would seem that joy, sadness, hope and fear are not the four principal passions. For Augustine (De Civ. Dei xiv, 3,[7] sqq.) omits hope and puts desire in its place.

Objection 2. Further, there is a twofold order in the passions of the soul: the order of intention, and the order of execution or generation. The principal passions should therefore be taken, either in the order of intention; and thus joy and sadness, which are the final passions, will be the principal passions; or in the order of execution or generation, and thus love will be the principal passion. Therefore joy and sadness, hope and fear should in no way be called the four principal passions.

Objection 3. Further, just as daring is caused by hope, so fear is caused by despair. Either, therefore, hope and despair should be reckoned as principal passions, since they cause others: or hope and daring, from being akin to one another.

On the contrary, Boethius (De Consol. i) in enumerating the four principal passions, says:

“Banish joys: banish fears:

Away with hope: away with tears.”

I answer that, These four are commonly called the principal passions. Two of them, viz. joy and sadness, are said to be principal because in them all the other passions have their completion and end; wherefore they arise from all the other passions, as is stated in Ethic. ii, 5. Fear and hope are principal passions, not because they complete the others simply, but because they complete them as regards the movement of the appetite towards something: for in respect of good, movement begins in love, goes forward to desire, and ends in hope; while in respect of evil, it begins in hatred, goes on to

aversion, and ends in fear. Hence it is customary to distinguish these four passions in relation to the present and the future: for movement regards the future, while rest is in something present: so that joy relates to present good, sadness relates to present evil; hope regards future good, and fear, future evil.

As to the other passions that regard good or evil, present or future, they all culminate in these four. For this reason some have said that these four are the principal passions, because they are general passions; and this is true, provided that by hope and fear we understand the appetite's common tendency to desire or shun something.

Reply to Objection 1. Augustine puts desire or covetousness in place of hope, in so far as they seem to regard the same object, viz. some future good.

Reply to Objection 2. These are called principal passions, in the order of intention and completion. And though fear and hope are not the last passions simply, yet they are the last of those passions that tend towards something as future. Nor can the argument be pressed any further except in the case of anger: yet neither can anger be reckoned a principal passion, because it is an effect of daring, which cannot be a principal passion, as we shall state further on (Reply obj. 3).

Reply to Objection 3. Despair implies movement away from good; and this is, as it were, accidental: and daring implies movement towards evil; and this too is accidental. Consequently these cannot be principal passions; because that which is accidental cannot be said to be principal. And so neither can anger be called a principal passion, because it arises from daring.

FIRST PART OF THE SECOND PART, QUESTION 26

Of the Passions of the Soul in Particular: And First, of Love

(In Four Articles)

We have now to consider the soul's passions in particular, and (1) the passions of the concupiscible faculty; (2) the passions of the irascible faculty.

The first of these considerations will be threefold: since we shall consider (1) Love and hatred; (2) Desire and aversion; (3) Pleasure and sadness.

Concerning love, three points must be considered: (1) Love itself; (2) The cause of love; (3) The effects of love. Under the first head there are four points of inquiry:

- (1) Whether love is in the concupiscible power?
- (2) Whether love is a passion?
- (3) Whether love is the same as dilection?
- (4) Whether love is properly divided into love of friendship, and love of concupiscence?

Whether love is in the concupiscible power?

Ia IIae q. 26 a. 1

Objection 1. It would seem that love is not in the concupiscible power. For it is written (Wis. 8:2): "Her," namely wisdom, "have I loved, and have sought her out from my youth." But the concupiscible power, being a part of the sensitive appetite, cannot tend to wisdom, which is not apprehended by the senses. Therefore love is not in the concupiscible power.

Objection 2. Further, love seems to be identified with every passion: for Augustine says (De Civ. Dei xiv, 7): "Love, yearning for the object beloved, is desire; having and enjoying it, is joy; fleeing what is contrary to it, is fear; and feeling what is contrary to it, is sadness." But not every passion is in the concupiscible power; indeed, fear, which is mentioned in this passage, is in the irascible power. Therefore we must not say absolutely that love is in the concupiscible power.

Objection 3. Further, Dionysius (Div. Nom. iv) mentions a "natural love." But natural love seems to pertain rather to the natural powers, which belong to the vegetal soul. Therefore love is not simply in the concupiscible power.

On the contrary, The Philosopher says (Topic. ii, 7) that "love is in the concupiscible power."

I answer that, Love is something pertaining to the appetite; since good is the object of both. Wherefore love differs according to the difference of appetites. For there is an appetite which arises from an apprehension existing, not in the subject of the appetite, but in some other: and this is called the "natural appetite." Because natural things seek what is suitable to them according to their nature, by reason of an apprehension which is not in them, but in the Author of their nature, as stated in the Ia, q. 6, a. 1, ad 2; Ia, q. 103, a. 1, ad 1,3. And there is another appetite arising from an apprehension in the

subject of the appetite, but from necessity and not from free-will. Such is, in irrational animals, the "sensitive appetite," which, however, in man, has a certain share of liberty, in so far as it obeys reason. Again, there is another appetite following freely from an apprehension in the subject of the appetite. And this is the rational or intellectual appetite, which is called the "will."

Now in each of these appetites, the name "love" is given to the principle movement towards the end loved. In the natural appetite the principle of this movement is the appetitive subject's connaturalness with the thing to which it tends, and may be called "natural love": thus the connaturalness of a heavy body for the centre, is by reason of its weight and may be called "natural love." In like manner the aptitude of the sensitive appetite or of the will to some good, that is to say, its very complacency in good is called "sensitive love," or "intellectual" or "rational love." So that sensitive love is in the sensitive appetite, just as intellectual love is in the intellectual appetite. And it belongs to the concupiscible power, because it regards good absolutely, and not under the aspect of difficulty, which is the object of the irascible faculty.

Reply to Objection 1. The words quoted refer to intellectual or rational love.

Reply to Objection 2. Love is spoken of as being fear, joy, desire and sadness, not essentially but causally.

Reply to Objection 3. Natural love is not only in the powers of the vegetal soul, but in all the soul's powers, and also in all the parts of the body, and universally in all things: because, as Dionysius says (Div. Nom. iv), "Beauty and goodness are beloved by all things"; since each single thing has a connaturalness with that which is naturally suitable to it.

Objection 1. It would seem that love is not a passion. For no power is a passion. But every love is a power, as Dionysius says (Div. Nom. iv). Therefore love is not a passion.

Objection 2. Further, love is a kind of union or bond, as Augustine says (De Trin. viii, 10). But a union or bond is not a passion, but rather a relation. Therefore love is not a passion.

Objection 3. Further, Damascene says (De Fide Orth. ii, 22) that passion is a movement. But love does not imply the movement of the appetite; for this is desire, of which movement love is the principle. Therefore love is not a passion.

On the contrary, The Philosopher says (Ethic. viii, 5) that “love is a passion.”

I answer that, Passion is the effect of the agent on the patient. Now a natural agent produces a twofold effect on the patient: for in the first place it gives it the form; and secondly it gives it the movement that results from the form. Thus the generator gives the generated body both weight and the movement resulting from weight: so that weight, from being the principle of movement to the place, which is connatural to that body by reason of its weight, can, in a way, be called “natural love.” In the same way the appetible object gives the appetite, first, a certain adaptation to itself, which consists in complacency in that object; and from this follows movement towards the appetible object. For “the appetitive movement is circular,” as stated in De Anima iii, 10; because the appetible object moves

the appetite, introducing itself, as it were, into its intention; while the appetite moves towards the realization of the appetible object, so that the movement ends where it began. Accordingly, the first change wrought in the appetite by the appetible object is called “love,” and is nothing else than complacency in that object; and from this complacency results a movement towards that same object, and this movement is “desire”; and lastly, there is rest which is “joy.” Since, therefore, love consists in a change wrought in the appetite by the appetible object, it is evident that love is a passion: properly so called, according as it is in the concupiscible faculty; in a wider and extended sense, according as it is in the will.

Reply to Objection 1. Since power denotes a principle of movement or action, Dionysius calls love a power, in so far as it is a principle of movement in the appetite.

Reply to Objection 2. Union belongs to love in so far as by reason of the complacency of the appetite, the lover stands in relation to that which he loves, as though it were himself or part of himself. Hence it is clear that love is not the very relation of union, but that union is a result of love. Hence, too, Dionysius says that “love is a unitive force” (Div. Nom. iv), and the Philosopher says (Polit. ii, 1) that union is the work of love.

Reply to Objection 3. Although love does not denote the movement of the appetite in tending towards the appetible object, yet it denotes that movement whereby the appetite is changed by the appetible object, so as to have complacency therein.

Objection 1. It would seem that love is the same as dilection. For Dionysius says (Div. Nom. iv) that love is to dilection, “as four is to twice two, and as a rectilinear figure is to one composed of straight lines.” But these have the same meaning. Therefore love and dilection denote the same thing.

Objection 2. Further, the movements of the appetite differ by reason of their objects. But the objects of dilection and love are the same. Therefore these are the same.

Objection 3. Further, if dilection and love differ, it seems that it is chiefly in the fact that “dilection refers to good things, love to evil things, as some have maintained,” according to Augustine (De Civ. Dei xiv, 7). But they do not differ thus; because as Augustine says (De Civ. Dei xiv, 7) the holy Scripture uses both words in reference to either good or bad things. Therefore love and dilection do not differ: thus indeed Augustine concludes (De Civ. Dei xiv, 7) that “it is not one thing to speak of love, and another to speak of dilection.”

On the contrary, Dionysius says (Div. Nom. iv)

that “some holy men have held that love means something more Godlike than dilection does.”

I answer that, We find four words referring in a way, to the same thing: viz. love, dilection, charity and friendship. They differ, however, in this, that “friendship,” according to the Philosopher (Ethic. viii, 5), “is like a habit,” whereas “love” and “dilection” are expressed by way of act or passion; and “charity” can be taken either way.

Moreover these three express act in different ways. For love has a wider signification than the others, since every dilection or charity is love, but not vice versa. Because dilection implies, in addition to love, a choice [electionem] made beforehand, as the very word denotes: and therefore dilection is not in the concupiscible power, but only in the will, and only in the rational nature. Charity denotes, in addition to love, a certain perfection of love, in so far as that which is loved is held to be of great price, as the word itself implies*.

Reply to Objection 1. Dionysius is speaking of love and dilection, in so far as they are in the intellectual

* Referring to the Latin “carus” (dear)

appetite; for thus love is the same as dilection.

Reply to Objection 2. The object of love is more general than the object of dilection: because love extends to more than dilection does, as stated above.

Reply to Objection 3. Love and dilection differ, not in respect of good and evil, but as stated. Yet in the intellectual faculty love is the same as dilection. And it is in this sense that Augustine speaks of love in the passage quoted: hence a little further on he adds that “a right will is well-directed love, and a wrong will is ill-directed love.” However, the fact that love, which is concupiscible passion, inclines many to evil, is the rea-

son why some assigned the difference spoken of.

Reply to Objection 4. The reason why some held that, even when applied to the will itself, the word “love” signifies something more Godlike than “dilection,” was because love denotes a passion, especially in so far as it is in the sensitive appetite; whereas dilection presupposes the judgment of reason. But it is possible for man to tend to God by love, being as it were passively drawn by Him, more than he can possibly be drawn thereto by his reason, which pertains to the nature of dilection, as stated above. And consequently love is more Godlike than dilection.

Whether love is properly divided into love of friendship and love of concupiscence?

Ia IIae q. 26 a. 4

Objection 1. It would seem that love is not properly divided into love of friendship and love of concupiscence. For “love is a passion, while friendship is a habit,” according to the Philosopher (Ethic. viii, 5). But habit cannot be the member of a division of passions. Therefore love is not properly divided into love of concupiscence and love of friendship.

Objection 2. Further, a thing cannot be divided by another member of the same division; for man is not a member of the same division as “animal.” But concupiscence is a member of the same division as love, as a passion distinct from love. Therefore concupiscence is not a division of love.

Objection 3. Further, according to the Philosopher (Ethic. viii, 3) friendship is threefold, that which is founded on “usefulness,” that which is founded on “pleasure,” and that which is founded on “goodness.” But useful and pleasant friendship are not without concupiscence. Therefore concupiscence should not be contrasted with friendship.

On the contrary, We are said to love certain things, because we desire them: thus “a man is said to love wine, on account of its sweetness which he desires”; as stated in Topic. ii, 3. But we have no friendship for wine and suchlike things, as stated in Ethic. viii, 2. Therefore love of concupiscence is distinct from love of friendship.

I answer that, As the Philosopher says (Rhet. ii, 4), “to love is to wish good to someone.” Hence the movement of love has a twofold tendency: towards the good which a man wishes to someone (to himself or

to another) and towards that to which he wishes some good. Accordingly, man has love of concupiscence towards the good that he wishes to another, and love of friendship towards him to whom he wishes good.

Now the members of this division are related as primary and secondary: since that which is loved with the love of friendship is loved simply and for itself; whereas that which is loved with the love of concupiscence, is loved, not simply and for itself, but for something else. For just as that which has existence, is a being simply, while that which exists in another is a relative being; so, because good is convertible with being, the good, which itself has goodness, is good simply; but that which is another’s good, is a relative good. Consequently the love with which a thing is loved, that it may have some good, is love simply; while the love, with which a thing is loved, that it may be another’s good, is relative love.

Reply to Objection 1. Love is not divided into friendship and concupiscence, but into love of friendship, and love of concupiscence. For a friend is, properly speaking, one to whom we wish good: while we are said to desire, what we wish for ourselves.

Hence the Reply to the Second Objection.

Reply to Objection 3. When friendship is based on usefulness or pleasure, a man does indeed wish his friend some good: and in this respect the character of friendship is preserved. But since he refers this good further to his own pleasure or use, the result is that friendship of the useful or pleasant, in so far as it is connected with love of concupiscence, loses the character to true friendship.

Objection 1. It would seem that love is not in the concupiscible power. For it is written (Wis. 8:2): “Her,” namely wisdom, “have I loved, and have sought her out from my youth.” But the concupiscible power, being a part of the sensitive appetite, cannot tend to wisdom, which is not apprehended by the senses. Therefore love is not in the concupiscible power.

Objection 2. Further, love seems to be identified with every passion: for Augustine says (De Civ. Dei xiv, 7): “Love, yearning for the object beloved, is desire; having and enjoying it, is joy; fleeing what is contrary to it, is fear; and feeling what is contrary to it, is sadness.” But not every passion is in the concupiscible power; indeed, fear, which is mentioned in this passage, is in the irascible power. Therefore we must not say absolutely that love is in the concupiscible power.

Objection 3. Further, Dionysius (Div. Nom. iv) mentions a “natural love.” But natural love seems to pertain rather to the natural powers, which belong to the vegetal soul. Therefore love is not simply in the concupiscible power.

On the contrary, The Philosopher says (Topic. ii, 7) that “love is in the concupiscible power.”

I answer that, Love is something pertaining to the appetite; since good is the object of both. Wherefore love differs according to the difference of appetites. For there is an appetite which arises from an apprehension existing, not in the subject of the appetite, but in some other: and this is called the “natural appetite.” Because natural things seek what is suitable to them according to their nature, by reason of an apprehension which is not in them, but in the Author of their nature, as stated in the Ia, q. 6, a. 1, ad 2; Ia, q. 103, a. 1, ad 1,3. And there is another appetite arising from an apprehension in the

subject of the appetite, but from necessity and not from free-will. Such is, in irrational animals, the “sensitive appetite,” which, however, in man, has a certain share of liberty, in so far as it obeys reason. Again, there is another appetite following freely from an apprehension in the subject of the appetite. And this is the rational or intellectual appetite, which is called the “will.”

Now in each of these appetites, the name “love” is given to the principle movement towards the end loved. In the natural appetite the principle of this movement is the appetitive subject’s connaturalness with the thing to which it tends, and may be called “natural love”: thus the connaturalness of a heavy body for the centre, is by reason of its weight and may be called “natural love.” In like manner the aptitude of the sensitive appetite or of the will to some good, that is to say, its very complacency in good is called “sensitive love,” or “intellectual” or “rational love.” So that sensitive love is in the sensitive appetite, just as intellectual love is in the intellectual appetite. And it belongs to the concupiscible power, because it regards good absolutely, and not under the aspect of difficulty, which is the object of the irascible faculty.

Reply to Objection 1. The words quoted refer to intellectual or rational love.

Reply to Objection 2. Love is spoken of as being fear, joy, desire and sadness, not essentially but causally.

Reply to Objection 3. Natural love is not only in the powers of the vegetal soul, but in all the soul’s powers, and also in all the parts of the body, and universally in all things: because, as Dionysius says (Div. Nom. iv), “Beauty and goodness are beloved by all things”; since each single thing has a connaturalness with that which is naturally suitable to it.

Objection 1. It would seem that love is not a passion. For no power is a passion. But every love is a power, as Dionysius says (Div. Nom. iv). Therefore love is not a passion.

Objection 2. Further, love is a kind of union or bond, as Augustine says (De Trin. viii, 10). But a union or bond is not a passion, but rather a relation. Therefore love is not a passion.

Objection 3. Further, Damascene says (De Fide Orth. ii, 22) that passion is a movement. But love does not imply the movement of the appetite; for this is desire, of which movement love is the principle. Therefore love is not a passion.

On the contrary, The Philosopher says (Ethic. viii, 5) that “love is a passion.”

I answer that, Passion is the effect of the agent on the patient. Now a natural agent produces a twofold effect on the patient: for in the first place it gives it the form; and secondly it gives it the movement that results from the form. Thus the generator gives the generated body both weight and the movement resulting from weight: so that weight, from being the principle of movement to the place, which is connatural to that body by reason of its weight, can, in a way, be called “natural love.” In the same way the appetible object gives the appetite, first, a certain adaptation to itself, which consists in complacency in that object; and from this follows movement towards the appetible object. For “the appetitive movement is circular,” as stated in De Anima iii, 10; because the appetible object moves

the appetite, introducing itself, as it were, into its intention; while the appetite moves towards the realization of the appetible object, so that the movement ends where it began. Accordingly, the first change wrought in the appetite by the appetible object is called “love,” and is nothing else than complacency in that object; and from this complacency results a movement towards that same object, and this movement is “desire”; and lastly, there is rest which is “joy.” Since, therefore, love consists in a change wrought in the appetite by the appetible object, it is evident that love is a passion: properly so called, according as it is in the concupiscible faculty; in a wider and extended sense, according as it is in the will.

Reply to Objection 1. Since power denotes a principle of movement or action, Dionysius calls love a power, in so far as it is a principle of movement in the appetite.

Reply to Objection 2. Union belongs to love in so far as by reason of the complacency of the appetite, the lover stands in relation to that which he loves, as though it were himself or part of himself. Hence it is clear that love is not the very relation of union, but that union is a result of love. Hence, too, Dionysius says that “love is a unitive force” (Div. Nom. iv), and the Philosopher says (Polit. ii, 1) that union is the work of love.

Reply to Objection 3. Although love does not denote the movement of the appetite in tending towards the appetible object, yet it denotes that movement whereby the appetite is changed by the appetible object, so as to have complacency therein.

Objection 1. It would seem that love is the same as dilection. For Dionysius says (Div. Nom. iv) that love is to dilection, “as four is to twice two, and as a rectilinear figure is to one composed of straight lines.” But these have the same meaning. Therefore love and dilection denote the same thing.

Objection 2. Further, the movements of the appetite differ by reason of their objects. But the objects of dilection and love are the same. Therefore these are the same.

Objection 3. Further, if dilection and love differ, it seems that it is chiefly in the fact that “dilection refers to good things, love to evil things, as some have maintained,” according to Augustine (De Civ. Dei xiv, 7). But they do not differ thus; because as Augustine says (De Civ. Dei xiv, 7) the holy Scripture uses both words in reference to either good or bad things. Therefore love and dilection do not differ: thus indeed Augustine concludes (De Civ. Dei xiv, 7) that “it is not one thing to speak of love, and another to speak of dilection.”

On the contrary, Dionysius says (Div. Nom. iv) that “some holy men have held that love means something more Godlike than dilection does.”

I answer that, We find four words referring in a way, to the same thing: viz. love, dilection, charity and friendship. They differ, however, in this, that “friendship,” according to the Philosopher (Ethic. viii, 5), “is like a habit,” whereas “love” and “dilection” are expressed by way of act or passion; and “charity” can be taken either way.

Moreover these three express act in different ways. For love has a wider signification than the others, since every dilection or charity is love, but not vice versa. Be-

cause dilection implies, in addition to love, a choice [electionem] made beforehand, as the very word denotes: and therefore dilection is not in the concupiscible power, but only in the will, and only in the rational nature. Charity denotes, in addition to love, a certain perfection of love, in so far as that which is loved is held to be of great price, as the word itself implies*.

Reply to Objection 1. Dionysius is speaking of love and dilection, in so far as they are in the intellectual appetite; for thus love is the same as dilection.

Reply to Objection 2. The object of love is more general than the object of dilection: because love extends to more than dilection does, as stated above.

Reply to Objection 3. Love and dilection differ, not in respect of good and evil, but as stated. Yet in the intellectual faculty love is the same as dilection. And it is in this sense that Augustine speaks of love in the passage quoted: hence a little further on he adds that “a right will is well-directed love, and a wrong will is ill-directed love.” However, the fact that love, which is concupiscible passion, inclines many to evil, is the reason why some assigned the difference spoken of.

Reply to Objection 4. The reason why some held that, even when applied to the will itself, the word “love” signifies something more Godlike than “dilection,” was because love denotes a passion, especially in so far as it is in the sensitive appetite; whereas dilection presupposes the judgment of reason. But it is possible for man to tend to God by love, being as it were passively drawn by Him, more than he can possibly be drawn thereto by his reason, which pertains to the nature of dilection, as stated above. And consequently love is more Godlike than dilection.

* Referring to the Latin “carus” (dear)

Objection 1. It would seem that love is not properly divided into love of friendship and love of concupiscence. For “love is a passion, while friendship is a habit,” according to the Philosopher (*Ethic.* viii, 5). But habit cannot be the member of a division of passions. Therefore love is not properly divided into love of concupiscence and love of friendship.

Objection 2. Further, a thing cannot be divided by another member of the same division; for man is not a member of the same division as “animal.” But concupiscence is a member of the same division as love, as a passion distinct from love. Therefore concupiscence is not a division of love.

Objection 3. Further, according to the Philosopher (*Ethic.* viii, 3) friendship is threefold, that which is founded on “usefulness,” that which is founded on “pleasure,” and that which is founded on “goodness.” But useful and pleasant friendship are not without concupiscence. Therefore concupiscence should not be contrasted with friendship.

On the contrary, We are said to love certain things, because we desire them: thus “a man is said to love wine, on account of its sweetness which he desires”; as stated in *Topic.* ii, 3. But we have no friendship for wine and suchlike things, as stated in *Ethic.* viii, 2. Therefore love of concupiscence is distinct from love of friendship.

I answer that, As the Philosopher says (*Rhet.* ii, 4), “to love is to wish good to someone.” Hence the movement of love has a twofold tendency: towards the good which a man wishes to someone (to himself or

to another) and towards that to which he wishes some good. Accordingly, man has love of concupiscence towards the good that he wishes to another, and love of friendship towards him to whom he wishes good.

Now the members of this division are related as primary and secondary: since that which is loved with the love of friendship is loved simply and for itself; whereas that which is loved with the love of concupiscence, is loved, not simply and for itself, but for something else. For just as that which has existence, is a being simply, while that which exists in another is a relative being; so, because good is convertible with being, the good, which itself has goodness, is good simply; but that which is another’s good, is a relative good. Consequently the love with which a thing is loved, that it may have some good, is love simply; while the love, with which a thing is loved, that it may be another’s good, is relative love.

Reply to Objection 1. Love is not divided into friendship and concupiscence, but into love of friendship, and love of concupiscence. For a friend is, properly speaking, one to whom we wish good: while we are said to desire, what we wish for ourselves.

Hence the Reply to the Second Objection.

Reply to Objection 3. When friendship is based on usefulness or pleasure, a man does indeed wish his friend some good: and in this respect the character of friendship is preserved. But since he refers this good further to his own pleasure or use, the result is that friendship of the useful or pleasant, in so far as it is connected with love of concupiscence, loses the character to true friendship.

FIRST PART OF THE SECOND PART, QUESTION 27

Of the Cause of Love (In Four Articles)

We must now consider the cause of love: and under this head there are four points of inquiry:

- (1) Whether good is the only cause of love?
- (2) Whether knowledge is a cause of love?
- (3) Whether likeness is a cause of love?
- (4) Whether any other passion of the soul is a cause of love?

Whether good is the only cause of love?

Ia IIae q. 27 a. 1

Objection 1. It would seem that good is not the only cause of love. For good does not cause love, except because it is loved. But it happens that evil also is loved, according to Ps. 10:6: "He that loveth iniquity, hateth his own soul": else, every love would be good. Therefore good is not the only cause of love.

Objection 2. Further, the Philosopher says (Rhet. ii, 4) that "we love those who acknowledge their evils." Therefore it seems that evil is the cause of love.

Objection 3. Further, Dionysius says (Div. Nom. iv) that not "the good" only but also "the beautiful is beloved by all."

On the contrary, Augustine says (De Trin. viii, 3): "Assuredly the good alone is beloved." Therefore good alone is the cause of love.

I answer that, As stated above (q. 26, a. 1), Love belongs to the appetitive power which is a passive faculty. Wherefore its object stands in relation to it as the cause of its movement or act. Therefore the cause of love must needs be love's object. Now the proper object of love is the good; because, as stated above (q. 26, Aa. 1,2), love implies a certain connaturalness or complacency of the lover for the thing beloved, and to everything, that thing is a good, which is akin and proportionate to it. It follows, therefore, that good is the proper cause of love.

Reply to Objection 1. Evil is never loved except

under the aspect of good, that is to say, in so far as it is good in some respect, and is considered as being good simply. And thus a certain love is evil, in so far as it tends to that which is not simply a true good. It is in this way that man "loves iniquity," inasmuch as, by means of iniquity, some good is gained; pleasure, for instance, or money, or such like.

Reply to Objection 2. Those who acknowledge their evils, are beloved, not for their evils, but because they acknowledge them, for it is a good thing to acknowledge one's faults, in so far as it excludes insincerity or hypocrisy.

Reply to Objection 3. The beautiful is the same as the good, and they differ in aspect only. For since good is what all seek, the notion of good is that which calms the desire; while the notion of the beautiful is that which calms the desire, by being seen or known. Consequently those senses chiefly regard the beautiful, which are the most cognitive, viz. sight and hearing, as ministering to reason; for we speak of beautiful sights and beautiful sounds. But in reference to the other objects of the other senses, we do not use the expression "beautiful," for we do not speak of beautiful tastes, and beautiful odors. Thus it is evident that beauty adds to goodness a relation to the cognitive faculty: so that "good" means that which simply pleases the appetite; while the "beautiful" is something pleasant to apprehend.

Whether knowledge is a cause of love?

Ia IIae q. 27 a. 2

Objection 1. It would seem that knowledge is not a cause of love. For it is due to love that a thing is sought. But some things are sought without being known, for instance, the sciences; for since "to have them is the same as to know them," as Augustine says (Qq. 83, qu. 35), if we knew them we should have them, and should not seek them. Therefore knowledge is not the cause of love.

Objection 2. Further, to love what we know not seems like loving something more than we know it. But some things are loved more than they are known: thus in this life God can be loved in Himself, but cannot be known in Himself. Therefore knowledge is not the

cause of love.

Objection 3. Further, if knowledge were the cause of love, there would be no love, where there is no knowledge. But in all things there is love, as Dionysius says (Div. Nom. iv); whereas there is not knowledge in all things. Therefore knowledge is not the cause of love.

On the contrary, Augustine proves (De Trin. x, 1,2) that "none can love what he does not know."

I answer that, As stated above (a. 1), good is the cause of love, as being its object. But good is not the object of the appetite, except as apprehended. And therefore love demands some apprehension of the good that is loved. For this reason the Philosopher (Ethic. ix,

5,12) says that bodily sight is the beginning of sensitive love: and in like manner the contemplation of spiritual beauty or goodness is the beginning of spiritual love. Accordingly knowledge is the cause of love for the same reason as good is, which can be loved only if known.

Reply to Objection 1. He who seeks science, is not entirely without knowledge thereof: but knows something about it already in some respect, either in a general way, or in some one of its effects, or from having heard it commended, as Augustine says (*De Trin.* x, 1,2). But to have it is not to know it thus, but to know it perfectly.

Reply to Objection 2. Something is required for the perfection of knowledge, that is not requisite for the perfection of love. For knowledge belongs to the reason, whose function it is to distinguish things which in reality are united, and to unite together, after a fashion, things that are distinct, by comparing one with another. Consequently the perfection of knowledge requires that

man should know distinctly all that is in a thing, such as its parts, powers, and properties. On the other hand, love is in the appetitive power, which regards a thing as it is in itself: wherefore it suffices, for the perfection of love, that a thing be loved according as it is known in itself. Hence it is, therefore, that a thing is loved more than it is known; since it can be loved perfectly, even without being perfectly known. This is most evident in regard to the sciences, which some love through having a certain general knowledge of them: for instance, they know that rhetoric is a science that enables man to persuade others; and this is what they love in rhetoric. The same applies to the love of God.

Reply to Objection 3. Even natural love, which is in all things, is caused by a kind of knowledge, not indeed existing in natural things themselves, but in Him Who created their nature, as stated above (q. 26, a. 1; cf. Ia, q. 6, a. 1, ad 2).

Whether likeness is a cause of love?

Ia IIae q. 27 a. 3

Objection 1. It would seem that likeness is not a cause of love. For the same thing is not the cause of contraries. But likeness is the cause of hatred; for it is written (*Prov.* 13:10) that “among the proud there are always contentions”; and the Philosopher says (*Ethic.* viii, 1) that “potters quarrel with one another.” Therefore likeness is not a cause of love.

Objection 2. Further, Augustine says (*Confess.* iv, 14) that “a man loves in another that which he would not be himself: thus he loves an actor, but would not himself be an actor.” But it would not be so, if likeness were the proper cause of love; for in that case a man would love in another, that which he possesses himself, or would like to possess. Therefore likeness is not a cause of love.

Objection 3. Further, everyone loves that which he needs, even if he have it not: thus a sick man loves health, and a poor man loves riches. But in so far as he needs them and lacks them, he is unlike them. Therefore not only likeness but also unlikeness is a cause of love.

Objection 4. Further, the Philosopher says (*Rhet.* ii, 4) that “we love those who bestow money and health on us; and also those who retain their friendship for the dead.” But all are not such. Therefore likeness is not a cause of love.

On the contrary, It is written (*Ecclus.* 13:19): “Every beast loveth its like.”

I answer that, Likeness, properly speaking, is a cause of love. But it must be observed that likeness between things is twofold. One kind of likeness arises from each thing having the same quality actually: for example, two things possessing the quality of whiteness are said to be alike. Another kind of likeness arises from one thing having potentially and by way of inclination,

a quality which the other has actually: thus we may say that a heavy body existing outside its proper place is like another heavy body that exists in its proper place: or again, according as potentiality bears a resemblance to its act; since act is contained, in a manner, in the potentiality itself.

Accordingly the first kind of likeness causes love of friendship or well-being. For the very fact that two men are alike, having, as it were, one form, makes them to be, in a manner, one in that form: thus two men are one thing in the species of humanity, and two white men are one thing in whiteness. Hence the affections of one tend to the other, as being one with him; and he wishes good to him as to himself. But the second kind of likeness causes love of concupiscence, or friendship founded on usefulness or pleasure: because whatever is in potentiality, as such, has the desire for its act; and it takes pleasure in its realization, if it be a sentient and cognitive being.

Now it has been stated above (q. 26, a. 4), that in the love of concupiscence, the lover, properly speaking, loves himself, in willing the good that he desires. But a man loves himself more than another: because he is one with himself substantially, whereas with another he is one only in the likeness of some form. Consequently, if this other's likeness to him arising from the participation of a form, hinders him from gaining the good that he loves, he becomes hateful to him, not for being like him, but for hindering him from gaining his own good. This is why “potters quarrel among themselves,” because they hinder one another's gain: and why “there are contentions among the proud,” because they hinder one another in attaining the position they covet.

Hence the Reply to the First Objection is evident.

Reply to Objection 2. Even when a man loves in

another what he loves not in himself, there is a certain likeness of proportion: because as the latter is to that which is loved in him, so is the former to that which he loves in himself: for instance, if a good singer love a good writer, we can see a likeness of proportion, inasmuch as each one has that which is becoming to him in respect of his art.

Reply to Objection 3. He that loves what he needs, bears a likeness to what he loves, as potentiality bears a likeness to its act, as stated above.

Reply to Objection 4. According to the same like-

ness of potentiality to its act, the illiberal man loves the man who is liberal, in so far as he expects from him something which he desires. The same applies to the man who is constant in his friendship as compared to one who is inconstant. For in either case friendship seems to be based on usefulness. We might also say that although not all men have these virtues in the complete habit, yet they have them according to certain seminal principles in the reason, in force of which principles the man who is not virtuous loves the virtuous man, as being in conformity with his own natural reason.

Whether any other passion of the soul is a cause of love?

Ia IIae q. 27 a. 4

Objection 1. It would seem that some other passion can be the cause of love. For the Philosopher (Ethic. viii, 3) says that some are loved for the sake of the pleasure they give. But pleasure is a passion. Therefore another passion is a cause of love.

Objection 2. Further, desire is a passion. But we love some because we desire to receive something from them: as happens in every friendship based on usefulness. Therefore another passion is a cause of love.

Objection 3. Further, Augustine says (De Trin. x, 1): "When we have no hope of getting a thing, we love it but half-heartedly or not at all, even if we see how beautiful it is." Therefore hope too is a cause of love.

On the contrary, All the other emotions of the soul are caused by love, as Augustine says (De Civ. Dei xiv, 7,9).

I answer that, There is no other passion of the soul that does not presuppose love of some kind. The reason is that every other passion of the soul implies either movement towards something, or rest in something. Now every movement towards something, or rest in something, arises from some kinship or aptness to

that thing; and in this does love consist. Therefore it is not possible for any other passion of the soul to be universally the cause of every love. But it may happen that some other passion is the cause of some particular love: just as one good is the cause of another.

Reply to Objection 1. When a man loves a thing for the pleasure it affords, his love is indeed caused by pleasure; but that very pleasure is caused, in its turn, by another preceding love; for none takes pleasure save in that which is loved in some way.

Reply to Objection 2. Desire for a thing always presupposes love for that thing. But desire of one thing can be the cause of another thing's being loved; thus he that desires money, for this reason loves him from whom he receives it.

Reply to Objection 3. Hope causes or increases love; both by reason of pleasure, because it causes pleasure; and by reason of desire, because hope strengthens desire, since we do not desire so intensely that which we have no hope of receiving. Nevertheless hope itself is of a good that is loved.

Objection 1. It would seem that good is not the only cause of love. For good does not cause love, except because it is loved. But it happens that evil also is loved, according to Ps. 10:6: “He that loveth iniquity, hateth his own soul”: else, every love would be good. Therefore good is not the only cause of love.

Objection 2. Further, the Philosopher says (Rhet. ii, 4) that “we love those who acknowledge their evils.” Therefore it seems that evil is the cause of love.

Objection 3. Further, Dionysius says (Div. Nom. iv) that not “the good” only but also “the beautiful is beloved by all.”

On the contrary, Augustine says (De Trin. viii, 3): “Assuredly the good alone is beloved.” Therefore good alone is the cause of love.

I answer that, As stated above (q. 26, a. 1), Love belongs to the appetitive power which is a passive faculty. Wherefore its object stands in relation to it as the cause of its movement or act. Therefore the cause of love must needs be love’s object. Now the proper object of love is the good; because, as stated above (q. 26, Aa. 1,2), love implies a certain connaturalness or complacency of the lover for the thing beloved, and to everything, that thing is a good, which is akin and proportionate to it. It follows, therefore, that good is the proper cause of love.

Reply to Objection 1. Evil is never loved except

under the aspect of good, that is to say, in so far as it is good in some respect, and is considered as being good simply. And thus a certain love is evil, in so far as it tends to that which is not simply a true good. It is in this way that man “loves iniquity,” inasmuch as, by means of iniquity, some good is gained; pleasure, for instance, or money, or such like.

Reply to Objection 2. Those who acknowledge their evils, are beloved, not for their evils, but because they acknowledge them, for it is a good thing to acknowledge one’s faults, in so far as it excludes insincerity or hypocrisy.

Reply to Objection 3. The beautiful is the same as the good, and they differ in aspect only. For since good is what all seek, the notion of good is that which calms the desire; while the notion of the beautiful is that which calms the desire, by being seen or known. Consequently those senses chiefly regard the beautiful, which are the most cognitive, viz. sight and hearing, as ministering to reason; for we speak of beautiful sights and beautiful sounds. But in reference to the other objects of the other senses, we do not use the expression “beautiful,” for we do not speak of beautiful tastes, and beautiful odors. Thus it is evident that beauty adds to goodness a relation to the cognitive faculty: so that “good” means that which simply pleases the appetite; while the “beautiful” is something pleasant to apprehend.

Objection 1. It would seem that knowledge is not a cause of love. For it is due to love that a thing is sought. But some things are sought without being known, for instance, the sciences; for since “to have them is the same as to know them,” as Augustine says (Qq. 83, qu. 35), if we knew them we should have them, and should not seek them. Therefore knowledge is not the cause of love.

Objection 2. Further, to love what we know not seems like loving something more than we know it. But some things are loved more than they are known: thus in this life God can be loved in Himself, but cannot be known in Himself. Therefore knowledge is not the cause of love.

Objection 3. Further, if knowledge were the cause of love, there would be no love, where there is no knowledge. But in all things there is love, as Dionysius says (Div. Nom. iv); whereas there is not knowledge in all things. Therefore knowledge is not the cause of love.

On the contrary, Augustine proves (De Trin. x, 1,2) that “none can love what he does not know.”
